The Company is subject to a variety of claims and suits that arise from time to time in the ordinary course of its business, acquisitions, or other transactions. While the Company's management currently believes that resolving all of these matters, individually or in the aggregate, will not have a material adverse impact on the Company's consolidated financial position or results of operations, the litigation and other claims that the Company faces are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a material adverse impact on the Company's consolidated financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

As discussed at Note 7, on December 15, 2009, Brotman initiated the Notes Offering. During the Notes Offering, Culver, a minority shareholder of Brotman, filed a shareholder complaint against Prospect, PHAS, Brotman, and each member of the Brotman Board of Directors alleging breach of fiduciary duty, conspiracy, oppression of minority shareholder, unjust enrichment, injunctive relief and involuntary dissolution of Brotman. Culver alleges that the defendants conspired to dilute Culver's ownership interest through the offering of the Brotman Notes, two rights offerings, and assorted contracts between Prospect and Brotman. The trial court enjoined a portion of the offering of the Brotman Notes on June 25, 2010. However, on October 24, 2011, the Court of Appeal reversed the June 25, 2010 preliminary injunction order. In particular, the Court of Appeal ruled that Culver lacks standing to bring its direct claims for breach of fiduciary duty, conspiracy, oppression of minority shareholder, and unjust enrichment. Culver filed a petition for review with the California Supreme Court. Trial on those claims is currently scheduled for March 5, 2012, but Prospect intends to file a motion to dispense with these direct claims in light of the Court of Appeal's ruling. Additionally, with respect to the involuntary dissolution claim, Prospect exercised its statutory right to purchase Culver's shares in Brotman. That initiated an appraisal process, which is ongoing.

03 February 2012 17:03:30 PDT Alyse Wagner Leonard Green & Partners

As discussed at Note 4, following the announcement of the Ivy Merger, the Lessey and Terrier Partners lawsuits were filed against the Company and certain members of its Board of Directors. Both lawsuits allege breach of fiduciary duty claims against the members of the Company's Board of Directors at the time, and aiding and abetting breach of fiduciary duty claims. Both cases allege that the members of the Company's Board failed to obtain the best price available as part of the going-private negotiations, and seek damages as a result. In September 2011, the plaintiffs in Lessey filed a motion for class certification, and the defendants filed their opposition in November 2011. The plaintiffs have yet to file any reply and there has been no ruling on the motion as of yet. Because the resolution of certain issues in the class certification motion has the potential to vitiate the Terrier Partners lawsuit by forcing the plaintiffs in that case into the class covered by Lessey, the Terrier Partners case has been effectively stayed pending resolution of the class certification motion. No trial date has been set in either case, and the Company intends to vigorously defend both cases.

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

Legal Matters

The Company is subject to legal actions arising from the normal conduct of business. After taking into consideration legal counsel's evaluation of such actions, the Company is of the opinion that the outcome of such matters will not have a materially adverse effect on the Company's consolidated financial position, results of operations, and cash flows.

Seismic Standards

Alta and Brotman are required to comply with the Hospital Seismic Safety Act ("SB 1953"), which regulates the seismic performance of all aspects of hospital facilities in California. SB 1953 imposes near-term and long-term compliance deadlines for seismic safety assessment, submission of corrective plans, and the retrofitting or replacement of medical facilities to comply with current seismic standards. In addition to SB 1953, California's Alfred E. Alquist Hospital Facilities Seismic Safety Act (the "Alquist Act") requires that the California Building Standards Commission adopt earthquake performance categories, seismic evaluation procedures, standards and timeframes for upgrading certain facilities, and seismic retrofit building standards. These regulations require hospitals to meet seismic performance standards to ensure that they are capable of providing medical services to the public after an earthquake or other disaster. The Building Standards Commission completed its adoption of evaluation criteria and retrofit standards in 1998.

The Alquist Act requires that within three years after the Building Standards Commission had adopted evaluation criteria and retrofit standards:

- Hospitals in California must conduct seismic evaluation and submit these evaluations to the Office of Statewide Health Planning and Development ("OSHPD"), Facilities Development Division for its review and approval;

- Hospitals in California must identify the most critical nonstructural systems that represent the greatest risk of failure during an earthquake and submit timetables for upgrading these systems to the OSHPD, Facilities Development Division for its review and approval; and

- Hospitals in California must prepare a plan and compliance schedule for each regulated building demonstrating the steps a hospital will take to bring the hospital buildings into substantial compliance with the regulations and standards.

03 February 2012 17:03:30 PDT Alise Wagner Leonard
Green & Partners

The Company was required to conduct engineering studies at its hospital to determine whether and to what extent modifications to the hospital facilities will be required. Management believes that Brotman meets all current requirements; however, it may be required to make significant capital expenditures in the future to comply with the seismic standards, which could impact its earnings. The cost at September 30, 2011 is unknown at this time but could be material. In addition, such modifications to the hospital facilities could potentially result in environmental remediation liabilities which may be material to the Company.

The OSHPD is currently implementing a new voluntary program to re-evaluate the seismic risk of hospital buildings classified as Structural Performance Category (SPC-1). These buildings are considered hazardous and at risk of collapse in the event of an earthquake and must be retrofitted, replaced or removed from providing acute care services by 2013. OSHPD is using HAZARDS U.S. (HAZUS), a state-of-the-art methodology, to reassess the seismic risk of SPC-1 buildings and those

that are determined to pose a low seismic risk may be reclassified to SPC-2. The SPC-2 buildings would have until 2030 to comply with the structural seismic safety standards. Participation in the HAZUS program is optional for hospital owners wishing to have their SPC-1 building(s) re-evaluated. Brotman has received SB 306 approval that extends to 2020 the seismic replacement or retro fit of its buildings. This approval subordinates to HAZUS which, if received would give the Company an extension to 2030.

These requirements can result in significant operational changes and capital outlays. Management is continuing to assess its options and the methods of financing the required retrofits. Based on management's evaluation, the renovation needs to comply with the California seismic safety standards for its acute-care facilities, including asbestos abatement, are not estimable at this time.

Legislation and HIPAA

The healthcare industry is subject to numerous laws and regulations of federal, state and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government healthcare program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity has continued with respect to investigations and allegations concerning possible violations of fraud and abuse statutes and regulations by healthcare providers. Violations of these laws and regulations could result in expulsion from government healthcare programs together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed.

The Company believes that it is in compliance with fraud and abuse regulations as well as other applicable government laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation as well as regulatory actions unknown or unasserted at this time.

The Health Insurance Portability and Accountability Act ("HIPAA") was enacted on August 21, 1996, to assure health insurance portability, reduce healthcare fraud and abuse, guarantee security and privacy of health information, and enforce standards for health information. Organizations are required to be in compliance with HIPAA provisions by April 2005. Effective August 2009, the Health Information Technology for Economic and Clinical Health Act ("HITECH Act") was introduced imposing notification requirements of certain security breaches relating to protected health information. The Company may be subject to significant fines and penalties if found not to be compliant with the provisions outlined in the regulations.

California Hospital Fee Program – Assembly Bill 1383

The State of California has enacted Assembly Bill 1383 ("AB 1383") effective January 1, 2010, as amended by Assembly Bill 1653 (collectively the "Program"), to provide one-time supplemental payments to certain medical facilities such as the hospitals owned and operated by the Company's subsidiaries that serve a disproportionate share of indigent and low-income patients. The Program requires participating hospitals to pay fee assessments into a pool of funds to which the federal government contributes matching funds. These funds, including the federal matching funds, are then distributed to qualifying hospitals based on a prescribed formula.

03 February 2012 17:03:30 PDT Alyse Wagner Leonard
Greene & Partners

Through September 30, 2011, the Company's Alta hospitals received invoices for total fee assessments under AB 1653 of approximately $26,200,000 due in four equal installments between October 8, 2010 and September 30, 2011. The Company paid these fee assessments as they became due. Through September 30, 2011, supplemental payments to Alta received under the Program totaled approximately $44,600,000. Accordingly, the "net" pre-tax benefit received by the Alta hospitals under this program was approximately $18,400,000. Per the California Department of Health Care Services ("DHCS"), all amounts received were reflected in net patient revenue, and all amounts paid were reflected in general and administrative expenses during the fiscal year ended September 30, 2011.

In October 2010, Brotman received invoices for fee assessments under the Program of approximately $19,000,000, also due in four equal installments between October 8, 2010 and December 13, 2010, following payment of which, Brotman was scheduled to receive approximately $15,000,000. Brotman does not have the financial resources to pay the assessed fees. Management of Brotman estimates that Brotman would be a "net" payer under AB 1653, since the fee assessments on Brotman could exceed by approximately $4,000,000 the supplemental payments that Brotman would expect to receive as part of the program. Accordingly, on October 6, 2010, the Company notified the DHCS that Brotman was opting out of the program. As a result, Brotman may not be entitled to receive any supplemental payments under the Program and will be ineligible to participate in certain California-funded health care programs, other than Medi-Cal. Through September 30, 2011, implied supplemental payments to Brotman under the Program were approximately $15,000,000. Accordingly, the "net" pre-tax loss incurred by Brotman under this program was approximately $4,000,000.

The Company believes that Brotman is entitled to opt out of the Program and thereby avoid liability for payment of the program fees recently assessed on Brotman, as well as any interest or penalties that would otherwise apply to the unpaid fees. Management also believes that Brotman's election to opt out of the Program will not impair its eligibility for continued participation in California's Medi-Cal program. DHCS' opinion is that Brotman's participation is mandatory. The difference in opinion has not been resolved.

Brotman contested any liability under AB 1653. Beginning February 14, 2011, the California Department of Health Care Services ("DHCS") began withholding against amounts otherwise due Brotman, in the amount of $65,000 per week, indicating that withholdings would continue for 108 weeks and total approximately $7,000,000. Through September 30, 2011, a total of approximately $1,772,000 had been withheld against Brotman's Medi-Cal payments. Pending resolution of this disputed obligation, Brotman has recorded a liability of approximately $4,800,000, representing the accrued loss above, as well as deferred recognition of payments received from managed care plans. The difference between the amount recorded and the estimated maximum withholdings represents interest and penalties (currently contested) of approximately $1,100,000 owed under the AB 1653 program and a further expected amount of approximately $1,074,000 that Brotman would be obligated for under the SB 90 program. As discussed below, SB 90 is still pending final approvals from the Centers for Medicare and Medicaid Services ("CMS"). Once SB 90 is approved, this amount will be accrued.

In addition, on April 13, 2011 California Governor, Jerry Brown signed SB 90 which provided for a six-month extension of the Hospital Fee Program from January 1, 2011 through June 30, 2011. While the Company's Alta hospitals are net gainers under SB 90, Brotman is expected to be a "net payer" in the amount of approximately $1,074,000. SB 90 is conditioned on approval by CMS. As

03 February 2012 17:03:30 PDT Alyse Wagner Leonard
Orsen & Partners

such, Alta has approximately $8,841,000 of payments reflected in "prepaid hospital program provider tax" and approximately $15,332,000 of receipts reflected in "hospital fee program liability and deferred revenue" on the accompanying consolidated balance sheets. Brotman does not have sufficient funds to pay the fee payments due under SB 90 and does not intend to pay them. The Company currently believes that the net amount due by Brotman under SB 90 is included in the weekly Medi-Cal withholding of approximately $65,000 per week and that the State will not materially change the amount of the weekly withholding as a result of SB 90.

Brotman management is contesting these AB 1653 and SB 90 obligations and withholds. Failure by management to successfully contest such obligations withholds, however, could have a significant adverse impact on Brotman, including being a triggering event requiring a specific impairment evaluation and write down of Brotman's goodwill and other intangibles. The Company did not conduct an impairment analysis as of September 30, 2011, as this was not required under current accounting literature due to the negative carrying value of Brotman's net assets. However, accounting literature expected to be adopted by the Company effective October 1, 2011 is expected to require an impairment of goodwill and the amount of such impairment could be material to the consolidated financial statements.

Gibson & Partners

Collective Bargaining Agreements

The collective bargaining agreement entered into between Hollywood Community Hospital, which is one of the hospitals under the consolidated group of Alta Hospitals System, LLC, and Service Employees International Union, United Healthcare Workers-West ("SEIU"), covers a small group of Hollywood Community Hospital's employees and expired on May 9, 2011. The parties are currently in good faith negotiations. In addition, approximately 77% of the employees of Brotman are part of a collective bargaining agreement with the SEIU or the California Nurses Association ("CNA"). Brotman's current agreements with SEIU and CNA expire on September 30, 2013, and October 31, 2012, respectively.

Tangible Net Equity ("TNE") requirement

The Company's affiliated physician organizations must comply with a minimum working capital requirement, Tangible Net Equity ("TNE") requirement, cash-to-claims ratio and claims payment requirements prescribed by the California Department of Managed Health Care. TNE is defined as net assets, less intangibles and amounts due from affiliates, plus subordinated obligations. At September 30, 2011, the Company and the affiliated physician organizations were in compliance with these regulatory requirements.

Employee Health Plans

Brotman offers self-insured HMO and PPO plans to employees. Employee health benefits are administered by a local claims processor, based on plan coverage and eligibility guidelines determined by Brotman, as well as Brotman's collective bargaining agreements. A commercial insurance policy covers losses in excess of $200,000 per occurrence. An actuarially estimated liability of approximately $595,000 and $448,000 for incurred but not reported claims has been included in accrued salaries and benefits as of September 30, 2011 and September 30, 2010, respectively.

Provider Contract

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

Long-term Liability

During the year, the Company implemented a new hospital information system at Brotman. As of September 30, 2011, a liability totaling approximately $4,200,000 was recorded on the Company's consolidated balance sheet, of which $3,100,000 was recorded as accounts payable and other accrued liabilities, and $1,100,000 was classified as other long-term liabilities based on a deferred payment agreement entered into between the Company and the vendor.

12. Defined Contribution Plan

Each of the Company's reporting units —Alta, Brotman, Prospect and ProMed—sponsor a defined contribution plan covering substantially all employees who meet certain eligibility requirements. Under these plans, employees can contribute up to 100% of their compensation up to the IRS deferred annual maximum. There is currently no company match under any of the plans. The Company is currently evaluating alternatives for combining one or more of these plans in fiscal 2012. Total expenses under the plans were approximately $301,000 and $120,000 during the years ended September 30, 2011 and 2010, respectively.

13. Accrued Medical Claims and Other Healthcare Costs Payable

The following table presents the roll-forward of incurred but not reported, or IBNR, claims reserves as of and for each of the fiscal years ended September 30, 2011 and 2010 (in thousands):

	September 30	
	2011	2010
IBNR as of beginning of year	**$17,859**	$16,824
Medical group claim expenses incurred during the year:		
Related to current year	**95,940**	80,945
Related to prior year	**(379)**	(2,667)
Total incurred	**95,563**	78,278
Medical group claims paid during the year:		
Related to current year	**(72,957)**	(63,373)
Related to prior year	**(17,164)**	(13,870)
Total paid	**(90,121)**	(77,243)
IBNR as of end of year	**$23,301**	$17,859

02 February 2012 17:03:30 PDT Alyse Wagner Leonard
Greenhill Partners

Following is a reconciliation of medical group cost of revenues per the consolidated statements of operations to healthcare claims expense reflected in the preceding table (in thousands):

	Years Ended September 30	
	2011	2010
Capitation expense	**$ 73,939**	$ 74,005
Fee-for-service claims expense	**75,905**	72,239
Other physician compensation	**3,559**	2,876
Other cost of revenues	**284**	383
Total cost of revenues	**$153,687**	$149,503

14. Joint Venture

The Company (through Santa Ana/Tustin Physicians Group, Inc.) and an unrelated third party, AMVI Care Health Network, Inc. ("AMVI") formed a joint venture to initially service Medi-Cal (Medi-Cal is the California Medicaid program) members under the CalOptima program in Orange County, California. Healthy Families and OneCare members were subsequently added to the joint venture arrangement. The Company does not consolidate the joint venture. The Company includes in its consolidated financial statements only the net results attributable to those enrollees specifically identified as assigned to it, together with the management fee that it charges the joint venture partner for managing those enrollees specifically assigned to AMVI. Costs incurred by the Company in managing the joint venture are included in general and administrative expenses in the accompanying consolidated financial statements. As of September 30, 2011 and 2010, the amounts due to joint venture of approximately $649,000 and $418,000, respectively, which represent advance capital distributions from the joint venture, were included in accounts payable and other accrued liabilities in the accompanying consolidated financial statements.

Summarized unaudited financial information for the unconsolidated joint venture as of and for each of the years ended September 30, 2011 and 2010 is as follows (in thousands):

	September 30,	
	2011	2010
Cash	**$887**	$1,539
Receivables	**1,508**	471
Total assets	**$2,395**	$2,010
Accrued medical claims	**$1,177**	$766
Other payables	**22**	7
Other partner's capital	**1,195**	1,236
Prospect's capital	**1**	1
Total liabilities and partners' capital	**$2,395**	$2,010
Revenues	**$11,785**	$10,169
Income before income taxes	**$1,581**	$2,043
Prospect's equity income	**$2,150**	$2,504
Management fees earned by Prospect	**$709**	$669

03 February 2012 17:03:30 PDT Alyse Wagner Leonard
Green & Partners

15. Segment Information

The Company's operations are organized into three reporting segments: (i) Hospital Services—which is comprised of the Alta and Brotman reporting units, owns and operates five hospitals—Los Angeles Community Hospital, Hollywood Community Hospital, Norwalk Community Hospital, Van Nuys Community Hospital and Brotman Medical Center; (ii) Medical Group—which is comprised of the Prospect and ProMed reporting units, provides management services to affiliated physician organizations that operate as independent physician associations; and (iii) Corporate, which represents expenses incurred in Prospect Medical Holdings, Inc. (the "Parent Entity"), that were not allocated to the other reporting segments.

The accounting policies of the reporting segments are the same as those described in the summary of significant accounting policies (see Note 2). The Company evaluates financial performance and allocates resources primarily based on earnings from operations before interest expense, interest income, income taxes, depreciation and amortization, as well as income or loss from operations before income taxes, excluding infrequent or unusual items.

The reporting segments are strategic business units that offer different services within the healthcare industry. Business in each reporting segment is conducted by one or more direct or indirect wholly-owned subsidiaries of the Company and certain affiliated physician organizations controlled through assignable option agreements and management services agreements.

The Company voluntarily discloses the following table summarizes certain information for each of the reporting segments regularly provided to and reviewed by the chief operating decision maker (in thousands):

	As of and for the Year Ended September 30, 2011				
	Hospital Services	Medical Group	Corporate(1)	Intersegment Eliminations	Consolidated
Revenues from external customers	$ 346,962	$ 199,475	$ -	$ -	$ 546,437

Segment goodwill	$130,912	$22,338	$–	$–	$153,250

(1) Prospect files consolidated tax returns and allocates costs for shared services and corporate overhead to each of the reporting segments. With the exception of the Brotman Acquisition, all acquisition-related debt, including debt related to the Medical Group and Hospital Services segment, is recorded at the Parent Entity level. As such, the Company does not allocate interest expense to the operating segments.

(2) Prospect Medical Group, Inc. (which serves as a holding company for the other affiliated physician organizations) files consolidated tax returns.

16. Fair Value of Financial Instruments

ASC 820, Fair Value Measurements and Disclosures, establishes a framework for measuring fair value and clarified that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants.

ASC 820 requires disclosure about how fair value is determined for assets and liabilities and establishes a hierarchy for which these assets and liabilities must be grouped, based on significant levels of inputs as follows: Level 1 quoted prices in active markets for identical assets or liabilities; Level 2 quoted prices in active markets for similar assets and liabilities and inputs that are observable for the asset or liability; or Level 3 unobservable inputs for the asset or liability, such as discounted cash flow models or valuations. The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The Company's Level 1 assets include cash and cash equivalents (money market mutual funds) and investments.

08 February 2012 17:03:30 PDT Alyse Wagner Leonard Green & Partners

Financial Items Measured at Fair Value on a Recurring Basis

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis and where they are classified within the hierarchy (in thousands):

	Total	Level 1	Level 2	Level 3
As of September 30, 2011				
Money market mutual funds and bonds	$538	$538	$–	$–
As of September 30, 2010				
Money market mutual funds	$766	$766	$–	$–

The Company's investments are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices.

Nonfinancial Items Measured at Fair Value on a Nonrecurring Basis

Nonfinancial assets such as goodwill and identifiable intangible assets are measured at fair value when there is an indicator of impairment and recorded at fair value only when impairment is recognized. The Company performs an annual impairment test on the goodwill and intangibles.

The fair values of the Company's current financial assets and liabilities approximate their reported carrying amounts. The carrying values and the fair values of non-current financial assets and liabilities that qualify as financial instruments under the guidance are as follows (in thousands).

	As of September 30, 2011		As of September 30, 2010	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:				
Long-term notes receivable (included in other assets)	**$240**	**$208**	$300	$273
Liabilities:				
Long-term debt	**$144,611**	**$159,012**	$157,552	$183,003

Included in other assets were long-term notes receivable, which amount was received as part of the consideration for the sale of three medical clinics in April 2004, the fair value of such notes receivable was estimated based on expected future payments discounted at risk-adjusted rates. The fair value of the Company's long-term debt was determined based on quoted market prices with respect to Prospect's Notes and based on expected future payments discounted at risk-adjusted rates of 10% with respect to Brotman's debt.

03 February 2012 17:03:30 PDT Alyse Wagner Leonard
Orsen & Partners

17. Subsequent Events

On October 17, 2011 Brotman issued a Demand Promissory Note, in the principal amount of $740,000 (the "Advance Note") and on November 4, 2011 Brotman further issued a Demand Promissory Note, in the principal amount of $3,825,000 (the "Working Capital Note") (collectively, the "Subordinated Notes") to PHAS. The Subordinated Notes, which is to fund Brotman's working capital, bear simple interest at the Bank of America, N.A. prime rate are fully and immediately payable on demand. As of December 19, 2011, a total of $740,000 of the Advance Note and a total of $1,165,000 of the Working Capital Note have been advanced to Brotman. In conjunction with the issuance of the Subordinated Notes, on November 4, 2011, in order to induce Gemino to permit Brotman to issue the Subordinated Notes and to extend the financial accommodations to Brotman pursuant to the Gemino Credit Agreement (see Note 9) PHAS and Gemino entered into Intercreditor and Subordination Agreement, pursuant to which PHAS agreed to subordinate and defer the payment of the Subordinated Notes to the prior payment in full of the Gemino debt.

Effective December 5, 2011, the third tranche of the February 7, 2011 rights offering was completed, in the amount of 290,378 shares of Brotman stock at a price of $2.91 per share, for total proceeds of $850,000. The oversubscription period for the third completed tranche offering began with a mailing to qualified rights holders on December 1, 2011 and terminated on December 5, 2011. Following the consummation of the third tranche offering, PHAS, having participated in the amount of approximately $663,000, increased its existing ownership stake in Brotman from approximately 78.26% to approximately 78.28%, with full participation in the offering by Brotman's second largest shareholder, Culver and the non-participation of certain other shareholders.

Effective November 15, 2011, the Board of Directors and shareholders of Ivy Holdings further granted 9,694 options under the Ivy Plan to seven members of the Company's management with a vesting commencement date of October 1, 2011. These options are exercisable into Ivy Holdings stock and vest based on a number of criteria, including time, Company and Business Unit performance and CEO discretion.

Independent Auditors' Report on Supplemental Material

Board of Directors and Shareholders
Prospect Medical Holdings, Inc.
Los Angeles, California

Our audits of the basic consolidated financial statements included in the preceding section of this report were performed for the purpose of forming an opinion on those statements taken as a whole. The supplemental material presented in the following section of this report is presented for purposes of additional analysis and is not a required part of the basic consolidated financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic consolidated financial statements. The information has been subjected to the auditing procedures applied in the audits of the basic consolidated financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic consolidated financial statements or to the basic consolidated financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the information is fairly stated in all material respects in relation to the basic consolidated financial statements taken as a whole.

Re: Seventeenth Response to December 6, 2023 Letter and November 25, 2024 Clarifying Questions to Leonard Green & Partners, L.P.

Dear Chairman Whitehouse and Ranking Member Grassley:

We represent Leonard Green & Partners, L.P. ("LGP" or the "Firm") and are writing in response to your letter dated December 6, 2023 (the "Letter") requesting the production of certain documents and information in connection with the United States Senate Committee on the Budget's (the "Committee's") inquiry into private equity and health care, and Clarifying Questions posed by your staff on November 25, 2024 (the "Clarifying Question(s)").

We are pleased to provide you with this seventeenth response to your Letter and Clarifying Questions. We hope that the Committee finds this response helpful to its review.

* * *

This response contains some of the Firm's confidential, trade secret, and/or proprietary information. We have marked this response "Confidential" and request that it not be disclosed beyond the Committee or made public. We ask that you treat this response and the accompanying document as confidential Committee records in accordance with Standing Rule of the Senate XXIX, clause 5, afford them the maximum protection available to the Committee, and that you inform us of any proposed use by the Committee of the information contained herein or the accompanying documents and provide LGP with an opportunity to be heard prior to any such proposed use.

The information contained in this response is based on the Firm's best efforts undertaken within the timeframe provided and based on its understanding of the terms of the Letter. The representations made in this response are based on information reasonably available to the Firm and may not reflect all existing relevant information. LGP reserves the opportunity to supplement information in this response. In providing information responsive

to the Letter, LGP does not waive any rights or legal options relating to the Committee's inquiry.

LGP does not intend to, and does not, waive any applicable privilege, protection or other legal basis under which information may not be subject to production. If it were found that the information or documents provided constitute disclosure of privileged material, such disclosure would be inadvertent. By the provision of such information, LGP does not waive and has not waived the attorney-client privilege or any other protections.

LGP requests that the Committee share with LGP in advance of publication a draft of any report that it intends to publish concerning this inquiry so that LGP can flag any factual errors or issues for the Committee's awareness and potential correction.

For your convenience, we have reproduced below the requests to which we are responding in this, the Firm's seventeenth response.

* * *

November 25, 2024 Clarifying Question 1:

Please provide a date for the execution of the attached document. Please also confirm the dates of formation of the Audit and Compliance Committee, the Management Audit Committee, and the Executive Compliance Committee. If said committees existed before LGP owned a majority stake in Prospect, list the date of the first meeting of each committee that took place after LGP acquired a majority stake in Prospect.

Response:

The document found at Bates Numbers LGP-SBC-000002876 to LGP-SBC-000002882 was approved by the Board of Directors on November 14, 2018. The resolutions approved on that date authorized the formation of the Audit and Compliance Committee, the Management Audit Committee, and the Executive Compliance Committee. LGP is aware that similar committees were active throughout the time that LGP held an investment in PMH. For instance, previously-produced board meeting minutes dated February 25, 2011 reference an audit committee. *See* Bates Numbers LGP-SBC-000003127 to LGP-SBC-000003130; *see also* LGP-SBC-00003055 to LGP-SBC-000003056. LGP is unable to speak to the existence of similar committees prior to its investment in PMH.

November 25, 2024 Clarifying Question 2:

In order for the Budget Committee to correctly understand the purpose, responsibilities, and authority of Prospect's Compensation Committee—on which LGP Directors served—please provide the charter of said committee, and any amended versions thereof, that were in effect from August 16, 2010, through the date of LGP's divestment.

Response:

Please see Bates Number LGP-SBC-000003249 for a board resolution responsive to this Request, which shows that the Board of Directors established the Compensation Committee by resolution on February 22, 2011.

November 25, 2024 Clarifying Question 3:

Based on our review of financial documents provided to us, it appears that Ellen Shin received a $10,000 settlement payment related to her departure from Prospect. Please confirm the circumstances surrounding Ms. Shin's departure and whether Ms. Shin and Steve Aleman were terminated "for cause." If so, explain the nature of that "cause."

Response:

As stated in its First Response, LGP largely deferred to PMH on personnel decisions. LGP's only involvement was through its role on the Board of Directors, as LGP Directors would approve the appointment of executive officers of PMH as recommended by PMH management.

Re: Eighth Response to December 6, 2023 Letter to Leonard Green & Partners, L.P.

Dear Chairman Whitehouse and Ranking Member Grassley:

We represent Leonard Green & Partners, L.P. ("LGP" or the "Firm") and are writing in response to the December 6, 2023 letter (the "Letter") from the United States Senate Committee on the Budget (the "Committee") regarding private equity and health care.

We are pleased to provide you with this eighth response to your Letter. We hope that the Committee finds this response helpful to its review.

* * *

This response contains some of the Firm's confidential, trade secret, and/or proprietary information. We have marked this letter "Confidential" and request that it not be disclosed beyond the Committee or made public. We ask that you treat this letter as a confidential Committee record in accordance with Standing Rule of the Senate XXIX, clause 5, afford it the maximum protection available to the Committee, and that you inform us of any proposed use by the Committee of the information contained herein and provide LGP with an opportunity to be heard prior to any such proposed use.

The information contained in this response is based on the Firm's best efforts undertaken within the timeframe provided and based on its understanding of the terms of the Letter. The representations made in this response are based on information reasonably available to the Firm and may not reflect all existing relevant information. LGP reserves the opportunity to supplement information in this response. In providing information responsive to the Letter, LGP does not waive any rights or legal options relating to the Committee's inquiry.

LGP does not intend to, and does not, waive any applicable privilege, protection or other legal basis under which information may not be subject to production. If it were found

that the information or documents provided constitute disclosure of privileged material, such disclosure would be inadvertent. By the provision of such information, LGP does not waive and has not waived the attorney-client privilege or any other protections.

For your convenience, we have reproduced below the requests to which we are responding in this, the Firm's eighth response.

* * *

Request 18:

Provide, broken down by fiscal year, the exact dollar amount of profits that Leonard Green collected as a result of its ownership stake in PMH, from the time Leonard Green first acquired its interest in PMH to the time of its divestment.

Response:

Please find a summary of the cumulative cash flows between Green Equity Investors V, L.P., Green Equity Investors Side V, L.P. and IVY LGP Coinvest LLC (the "Funds") and PMH from 2010 through 2021 in the chart below.

Year	Investments by the Funds into Ivy Holdings	Distributions from Ivy Holdings to the Funds	Cumulative Cash Flows	Notes
2010	($154,680,000)	$0	($154,680,000)	The Funds' Investment in Common & Preferred Stock
2011	$0	$0	($154,680,000)	
2012	$0	$88,127,574	($66,552,426)	Redemption of the Funds' Preferred Stock
		$61,209,483	($5,342,943)	Dividend
2013	$0	$0	($5,342,943)	
2014	$0	$0	($5,342,943)	
2015	$0	$0	($5,342,943)	
2016	$0	$0	($5,342,943)	
2017	$0	$0	($5,342,943)	
2018	$0	$274,982,083	$269,639,140	Dividend
2019	($24,000,000)		$245,639,140	Shareholder Loan from the Funds

		$25,972,910	$271,612,050	Repayment of Shareholder Loan
2020	$0	$0	$271,612,050	
2021		$10,000,000	$281,612,050	Sale proceeds
	($34,800,000)		$246,812,050	Escrow funding
		$4,800,000	$251,612,050	Escrow release

Request 19:

Provide, broken down by fiscal year, the exact dollar amount of any annual dividends that Leonard Green paid out to shareholders or investors as a result of its ownership stake in PMH, from the time Leonard Green acquired its interest in PMH to the time of its divestment.

Response:

Please find the amount of gross proceeds received by the Funds as a result of dividends PMH paid out to shareholders from 2011 through 2019 in the table below. Please note that the Funds did not distribute the entire amount of the dividends to its investors, as a portion was withheld from each distribution to cover expenses.

Year	Dividends Paid Out to the Funds
2011	$0
2012	$61,209,483.38
2013	$0
2014	$0
2015	$0
2016	$0
2017	$0
2018	$274,982,083.00
2019	$0

Re: Fourteenth Response to December 6, 2023 Letter to Leonard Green & Partners, L.P.

Dear Chairman Whitehouse and Ranking Member Grassley:

We represent Leonard Green & Partners, L.P. ("LGP" or the "Firm") and are writing in response to your letter dated December 6, 2023 (the "Letter") requesting the production of certain documents and information in connection with the United States Senate Committee on the Budget's (the "Committee's") inquiry into private equity and health care, and follow-up requests posed by your staff by e-mail.

We are pleased to provide you with this fourteenth response to your Letter. We hope that the Committee finds this response helpful to its review.

* * *

This letter contains some of the Firm's confidential, trade secret, and/or proprietary information. We have marked this letter "Confidential" and request that it not be disclosed beyond the Committee or made public. We ask that you treat this letter and the accompanying documents as confidential Committee records in accordance with Standing Rule of the Senate XXIX, clause 5, afford them the maximum protection available to the Committee, and that you inform us of any proposed use by the Committee of the information contained herein or the accompanying documents and provide LGP with an opportunity to be heard prior to any such proposed use.

The information contained in this response is based on the Firm's best efforts undertaken within the timeframe provided and based on its understanding of the terms of the Letter. The representations made in this response are based on information reasonably available to the Firm and may not reflect all existing relevant information. LGP reserves the opportunity to supplement information in this response. In providing information responsive to the Letter, LGP does not waive any rights or legal options relating to the Committee's inquiry.

LGP does not intend to, and does not, waive any applicable privilege, protection or other legal basis under which information may not be subject to production. If it were found that the information or documents provided constitute disclosure of privileged material, such disclosure would be inadvertent. By the provision of such information, LGP does not waive and has not waived the attorney-client privilege or any other protections.

For your convenience, we have reproduced below the requests to which we are responding in this, the Firm's fourteenth response.

* * *

December 6, 2023 Letter Request 15:

Produce all documents between and among PMH and Leonard Green regarding the 2019 sale-leaseback transaction.

Response:

Please find at Bates Numbers LGP-SBC-000003169 - LGP-SBC-000003242 documents responsive to this request.

December 6, 2023 Letter Request 20:

Produce all documents between and among MPT and Leonard Green regarding the 2019 sale-leaseback transaction.

Response:

Please find at Bates Numbers LGP-SBC-000003131 - LGP-SBC-000003168 documents responsive to this request.

May 17, 2024 Email Request 7:

Provide a list and brief subject matter description of any federal or state government investigations to which PMH, its subsidiaries, or affiliates have been subject from 2010 through the date of LGP's divestment. In addition, provide a list and brief subject matter description of any federal or state government investigations to which LGP has been

subject related to its relationship with PMH, its subsidiaries, or affiliates from 2010 through the date of LGP's divestment.

Response:

LGP is not aware of any federal or state government investigations to which the Firm has been subject related to its relationship with PMH, its subsidiaries, or affiliates during the time period referenced above.

May 17, 2024 Email Request 8:

In 2019, funds of LGP, along with members of management of PMH, provided a cash infusion of $41 million to Ivy Holdings, Inc. Why was this cash infusion necessary? How were these funds spent? When and how was the cash infusion paid back? Provide documents sufficient to support this information.

Response:

In January 2019 and February 2019, LGP and other shareholders provided a loan to Ivy Holdings of $41 million, which Ivy Holdings contributed to Ivy Intermediate Holdings as equity, which was then contributed as equity to PMH. The loan was made to provide additional liquidity to PMH. *See* LGP-SBC-00000001 to LGP-SBC-00000031. PMH used the proceeds of the loan for general corporate purposes. In September 2019, PMH contributed $44.4 million of cash to Ivy Intermediate, which was then contributed to Ivy Holdings and used by Ivy Holding to repay the loan in full. *See also* LGP-SBC-000000743 at LGP-SBC-000000780, LGP-SBC-000000787 – 791.

Los Angeles, CA 90034

Via email: Redacted

Dear Mr. Aleman:

MPT is pleased to submit this non-binding proposal and indicative term sheet outlining the general terms of a possible transaction between affiliates of MPT Operating Partnership, L.P. ("MPT") and affiliates of Prospect Medical Holdings, Inc. ("Prospect") with regard to the acquisition and leaseback of the 20 Prospect hospitals listed in Exhibit I to this letter (the "Hospitals").

Subject to our discretionary diligence, MPT Board approval, and completion of definitive legal documentation, MPT expects to acquire from and lease back to Prospect all of the real estate interests (including land and all improvements located thereon, collectively, the "Real Estate") in the Hospitals on terms described in Exhibit II to this letter. Our proposal reflects the following assumptions:

- Initial valuation (funded at closing) of $1.6 billion; conditional valuation (based on Year 2 EBITDAR of $350,000,000) of $1.8 billion
- Consolidated Pro Forma Adjusted EBITDAR of approximately $300,000,000 in the first 12 months subsequent to closing and $350,000,000 in the following 12 months
- Initial annual rent of $120,000,000
- Minimum 15-year initial lease term with three, five-year renewal options
- Annual rent escalations based on CPI with a floor of 2.0% and a ceiling of 5.0%

As noted above and based on your 2019 Pro Forma EBITDAR projection of approximately $300 million, we would expect to fund a purchase price of $1.6 billion at closing. Furthermore, based on achievement of sustained annual EBITDAR of up to $350 million during a to-be-defined period after closing, we would fund an additional purchase consideration of up to $200 million. We have also discussed with you means to mitigate or defer capital gains taxes that would otherwise be paid. These may include limited use of mortgage financing and other investment by MPT in certain Prospect capital investments.

If the provisions described in this letter are satisfactory to you, we would begin our diligence procedures immediately, along with simultaneously drafting definitive agreements. MPT has more than $1.0 billion of cash on hand in addition to $1.3 billion of immediately available cash under our revolving credit facility. We are not dependent on any type of capital raise to fund this transaction.

MPT CONFIDENTIAL

Although this non-binding proposal sets forth some of the principal terms of our proposal for Prospect, it does not include all of the representations, warranties, defaults, definitions, covenants (affirmative and negative) and other terms which will be contained in the definitive documents for the transaction. Moreover, this non-binding proposal creates no obligation or right of any party with respect to any other party.

Please do not hesitate to contact me with any questions.

Regards,

R. Steven Hamner
Executive Vice President & CFO

CC: Edward K. Aldag, Jr.

Exhibit II
Schedule of Certain Terms for
Proposed Transaction with Prospect Medical Holdings, Inc.
March 20, 2019

This is a draft of certain terms of a proposed agreement only and should not be construed as an offer to enter into any transaction. This draft document shall not create any legal obligation of any party to any other party. None of the parties shall have any rights or obligations with respect to any possible transaction unless and until definitive agreements are entered into, and then only to the extent specifically stated in those agreements; and no party shall have any liability to any other party for failure to enter into such definitive agreements for any reason, or for no reason, including, without limitation, failure of any party to enter into any such agreement as a result of the exercise of such party's sole and absolute discretion.

Transaction	• Acquisition from and master lease to Prospect of the properties described in Exhibit I to this letter
Properties	• Hospitals described in Exhibit I to this letter
Purchase Price	• Initial Purchase Price of $1,600,000,000 on a debt-free, cash-free basis, and conditional valuation of $1,800,000,000 (based on Year 2 EBITDAR of $350,000,000)
Lessee	• Affiliates of Prospect Medical Holdings, Inc.
Guarantor	• Full performance and payment guaranty of Lease provided by Prospect, or another entity acceptable to MPT
Lease Structure	• Absolute net master lease with Lessee responsible for all costs of ownership, including capital expenditures, structural, HVAC, foundation and other costs
Initial Lease Rate	• 7.50% of Purchase Price; cadence of payments to be agreed between MPT and Prospect
Annual Escalator	• Annual escalators of CPI with an annual floor of 2.0% and a ceiling of 5.0%
Lease Term	• Minimum 15 years, with three, five-year renewals (MPT receptive to longer initial term)
Purchase Option	• At expiration of the Lease Term, Lessee will have the right to purchase the Hospitals at the greater of fair market value or MPT's total capital invested to date
Expansions	• The Master Lease will contain a mechanism whereby either MPT or Prospect can fund expansions, at Prospect's option. Any expansion funded by MPT will be added to the lease base associated with the hospital benefiting from the investment
Additional Capital Commitment	• Subject to diligence, MPT is eager to provide a committed capital line to fund the development or acquisition of additional hospitals • Terms substantially similar to those of the Hospitals. All facilities leased to Prospect by MPT to be joined to the Master Lease
Credit Enhancement & Other	• Any deposit or letter of credit provision to be determined subject to diligence and agreement • Financial covenants: to be agreed between MPT and Prospect, but limited to (i) EBITDAR to lease payment coverage at the facility level and (ii) fixed charge coverage at the Guarantor level • No Lessor restriction on periodic alteration of bed layout; changes to services

Medical Properties Trust, Inc.

MPT CONFIDENTIAL

EXECUTIVE SUMMARY

Landmark Acquisition of Greater than $1.55B in RE Assets

Acquisition of 16 Hospitals in Four States

Prospect Medical Holdings (PMH or Prospect), currently operates 20 hospitals in six states. Three hospitals in TX and one in NJ are actively being marketed for sale and are excluded from the transaction. Of the 16 hospitals MPT is acquiring, two are behavioral health hospitals located in CA and the remaining 14 are general acute hospitals in four states: CA (5), PA (4), CT (3), and RI (2). The two RI facilities will be subject to delayed closing. The purchase price allocated to these hospitals will be funded at closing under a Taxable REIT Subsidiary (TRS) Loan, which MPT will have the option to convert to a purchase of the hospitals and their inclusion in Master Lease II within three years subject to the resolution of certain RI pension litigation satisfactory to MPT and the receipt of all regulatory approvals for the transaction from the state of RI.

Proven Operator of Community-Based Hospitals in Urban Markets

- Expecting a first year rent coverage of over 2.46x.
- Numerous improvement initiatives underway to lift EBITDA $80M over the next 18 months.
- Well positioned for the industry's shift towards value-based purchasing.
  - Network of 11,000 primary care physicians and specialists across markets.
  - Over 160 access points for consumers through physician group practices, urgent care centers, diagnostic centers and other ambulatory settings.
- Dedicated to maintaining facilities spending $60M to $80M for capital improvements annually.

Total MPT Real Estate Investment[1]	$1.55B
Master Lease I & II	$1.39B
TRS Loan	$112.9M
Mortgage	$51.3M
Initial Cap Rate	7.5%
Term[2]	15 years (expires August 2034) with two 5-year renewals, and one 4 year, 9 month renewal
Annual Escalator[3]	Rate increases to CPI with a floor of 2% and a ceiling of 4%
Guaranty	Prospect Medical Holdings, Inc. and all Lessee/Borrower Entities
Capital Reserve Requirement[4]	$1,000 per staffed bed
Licensed Beds	2,915
Square Feet	4.2M

Prospect Actual and Projected Performance [5][6][7][8]

Notes:

(1) *Additional Earn Out opportunities after Prospect hits annualized adjusted EBITDAR of $281M, with additional benchmarks and payouts as scheduled in the lease.*
(2) *The TRS Loan has a three year maturity after which a balloon payment of the principal is due unless the special condition properties are closed upon. After close, the two special condition properties will be joined to Master Lease II and the remaining principal will be added to the lease base.*
(3) *Escalator begins January 1, 2021.*
(4) *Capital Reserve Requirement is increased by the October CPI (with a floor of 2% and a ceiling of 4%) commencing January 1st, 2021. To the extent that this allocated amount is not spent in funding of Major Repairs, Prospect will be required to pay the difference between the allocation and the actual amount spent.*
(5) *Financials are presented on a discrete quarter basis.*
(6) *Financials throughout this report include actual results through 6/30/2019. Financials for Prospect Medical Holdings are reported on a 9/30 fiscal year end.*
(7) *Source: Prospect Medical Holdings.*
(8) *Coverage assumes Earnout threshold is met in Q4 2020 & $50M is funded in Q1 2021. Additionally, coverage assumes a 2% rent escalator in Q1 2021.*
(9) *Q4 2019 EBITDAR estimated based on the result of annualizing Q3 2019 YTD figures.*

MPT CONFIDENTIAL

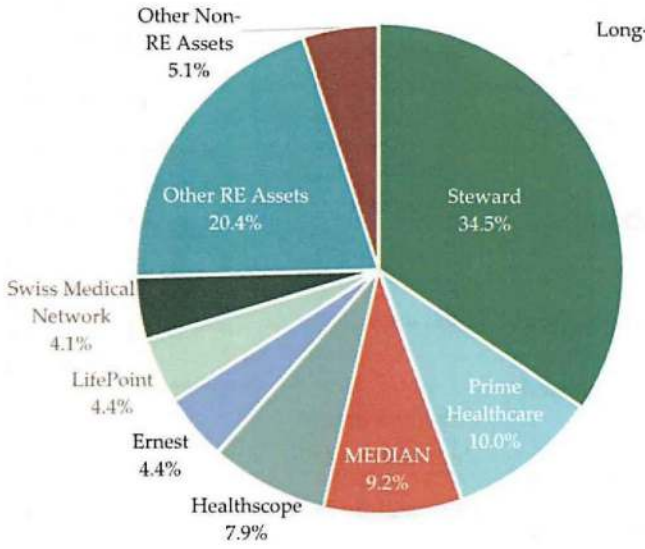
EXECUTIVE SUMMARY

MPT Pro Forma Portfolio

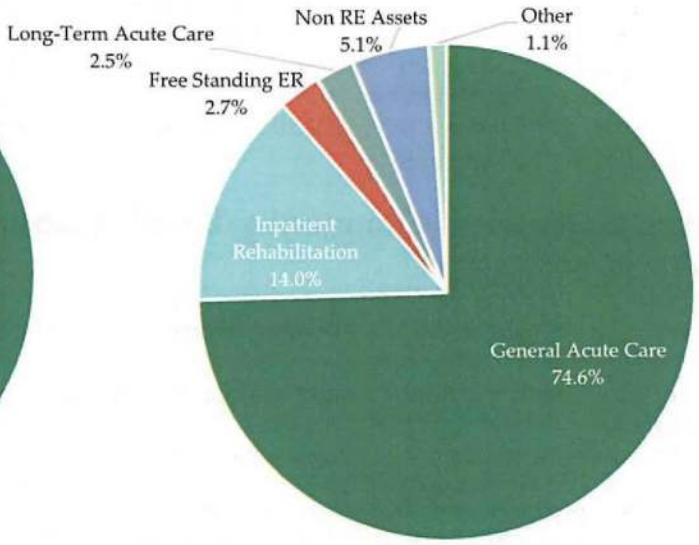
New Investment in Profitable Operator with over $3B in Annual Revenues and over 160 Patient Access Points

MPT's $1.6B investment in Prospect will help continue the dilution of Steward's concentration in the Baseline portfolio. Steward's concentration will drop below 30% with the new acquisition, from 34.5% to 27.2%, furthering MPT's diversification strategy in additional operators. General Acute Care concentration remains relatively unchanged from 74.6% to 77.4% and maintains MPT's focus on General Acute Care hospitals.

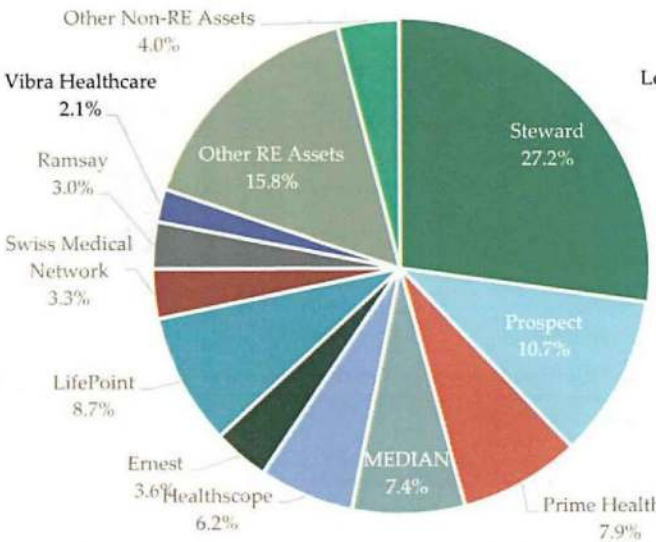
By Operator - Baseline



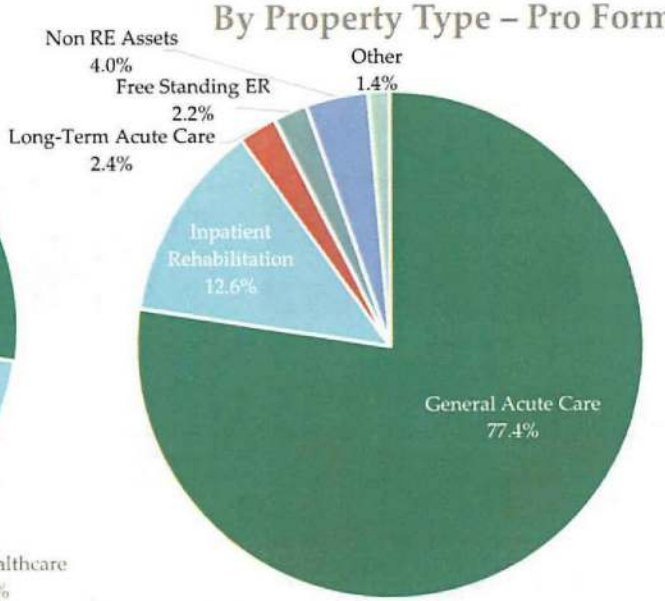
By Property Type - Baseline



By Operator – Pro Forma



By Property Type – Pro Forma



**Baseline figures are as of 6.30.2019 and include Ramsay ($440.6M) and St. Luke's Health System ($145.5M). Pro Forma figures are as of 6/30/2019 and include Prospect ($1.6B), Quorum Health Care ($750.0M) and various other deals totaling to $453.8M.*

MPT CONFIDENTIAL

CORPORATE SWOT

Strengths	Weaknesses
1. Cost-efficient provider of local market healthcare services 2. Strong competitive position in its markets 3. Physician alignment and use of medical group enrollment to drive business to its hospitals 4. Portfolio wide volume growth 5. Visionary and energized leadership team	1. Prospect portfolio is heavily concentrated in two markets-Los Angeles and Philadelphia 2. Heavily reliant on Medicaid supplemental payments (HQAF, DSH, UPL) 3. Erratic timing of QAF payments negatively impacts cash flow 4. Facilities are utilizing different enterprise systems for reporting
Opportunities	**Threats**
1. Deployment of Coordinated Regional Care and risk-based contracting approach 2. Favorable demographics – facilities located in large densely populated areas 3. Expansion of risk-based contracting to Northeastern markets	1. Changing regulatory and reimbursement environment 2. Certain markets could be at risk of increased competition such as Los Angeles and Philadelphia 3. Competitors moving to closed medical staff models causing pressure on IPAs

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Prospect's growth strategy is to acquire underperforming non-profit community hospitals and implement a low-cost Coordinated Regional Care system; Facilities recently acquired in Rhode Island and Connecticut.
2. California QAF payments were made permanent via ballot initiative and would require constitutional amendment to reverse, but similar programs in other states have potential to be replaced as part of health care system restructuring.
3. QAF payments for current program were significantly delayed statewide due to significant change in calculation methodology. These changes are complete, and payments for the next program are expected to be more timely.
4. Prospect has begun migration of all facilities to use of a common enterprise system to report operational metrics and financial data.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect and its competitors are subject to the same regulatory and reimbursement processes. Prospect is increasing utilization of risk-based contracting.
2. Prospect currently has a niche in each of its major markets, which should continue to be a competitive advantage moving forward.
3. Prospect can mitigate the loss of affiliated physicians by continuing to expand its network of IPAs, and by increasing admissions from other avenues such as the ER.

Operating Income from Unconsolidated Joint Ventures	$(931)	$5,388	$2,599	$7,920
Operating (loss) income	**$55,424**	**$72,220**	**$(45,858)**	**$44,070**
EBITDAR	**$102,530**	**$176,568**	**$51,956**	**$142,262**
Less Nix / EOGH EBITDAR	$0.0	$(2,612)	$(49,914)	$0.0
EBITDAR (excluding Discontinued Ops)	**$102,530**	**$179,180**	**$101,870**	**$142,262**

(1) Losses from Discontinued Ops at Nix and EOGH already excluded from fiscal year 2019 figures.

PMH Corporate Overhead

PMH operates with very limited corporate overhead. The lean corporate structure allows for efficiency and flexibility with estimated total corporate overhead costs of $72.4M, based on 2019 annualized year-to-date fiscal Q3 financials. This represents less than 3% of total revenue.

- Of total corporate overhead costs, salaries and benefits make up 66%, outside services make up 25%, and other operating expenses make up 9%.
- Within the next 12-18 months, additional business functions (revenue cycle) are expected to be centralized.

Revenues

Total Revenues grew 5.3% from FY2017 to FY2018 driven by an 8.2% increase of Hospital segment revenue, with a corresponding 9.4% increase in operating expense at the hospital segment. This was partially due to a change in AR valuation at Crozer, which increased both contractual allowances and bad debt reserve during the fourth quarter by $11.0M and $7.7M respectively. This change in methodology will more accurately reflect these two line items going forward.

Operating Expenses

Overall, the operating expenses as a percentage of revenue increased by approximately 4.4% (from 93.9% in 2017 to 98.3% in 2018), but has seen a decrease of 3.2% for annualized FYTD 2019. This decrease was driven by both a 7% decrease in SWB and a 30.1% decrease in Bad Debt within the hospital segment. The decline in bad debt expense is partially attributable to a large Q4 2018 AR adjustment and the consequential change in the reserve methodology.

Consolidated Prospect Management Projected Income Statement

The table below depicts Prospect's financial projections through 2022. A summary of the initiatives driving improved performance, including a bridge to FY 2020 projections, are included on Page 12.

Assumptions used for Prospect and MPT Projections

- FY 2018 includes a combined EBITDAR loss of $49.9M for the Nix (TX) and East Orange (NJ) facilities which have been moved to Discontinued Operations and are not reported in the figures presented for 2019 and beyond. Nix and EOGH as discontinued operations are being treated retroactively for comparison purposes, with EBITDARM and Addbacks being adjusted for the 2018 fiscal year.
- Estimated Addbacks are based on Prospect Identified Addbacks. See table presented on Page 14.
- FY 2018 Prospect EBITDA excludes rent and is therefore considered EBITDAR for MPT UW purposes.
- FY 2018 rent shown on a pro forma basis for comparison purposes.
- Capital Lease amounts are projected amounts as presented in the 2018 Annual Audit.
- ABL Interest is calculated using the projected balance at each year end and assuming a steady LIBOR rate on a go forward basis as of 6/30/2019. 2018 interest is calculated using the actual LIBOR rate at 9/30/2018.
- Rent and Fixed Charge Coverage requirements, as stated in the lease, are calculated using the adjusted EBITDAR figure.

Consolidated Prospect MPT Projected Income Statement

The table below depicts MPT's adjusted financial projections through 2022. The same assumptions in the Prospect pro forma are used in MPT's adjusted pro forma. In addition, a summary of the initiatives driving improved performance, including a bridge to FY 2020 projections, are included on Page 12.

Overview

Overall, MPT felt comfortable with Prospect's anticipated Revenue and Expense growth for 2021 and 2022. Therefore, UW maintained the revenue growth rates and EBITDAR margins projected by Prospect and applied them to the MPT adjusted 2020 projections.

Prospect is currently on track to exceed their initial adjusted EBITDAR projections by 6.1% for FY 2019. In addition, based on these projections, Prospect is anticipated to be within compliance of the covenants required in the leases.

Total Prospect	**$7,698**	**$31,573**	**$28,991**	**$15,888**	**$1,344**	**$85,494**

(1) Represents increased percentage of collections by reduction of bad debts and denials.
(2) Pickup is driven by increased contract rates across all hospitals.

Expense Initiative – SWB: $31.6M

Rhode Island

- $2.4M from more effective seasonality staffing in the summer months.
- $0.8M from closure of an outpatient health center.

Pennsylvania

- $13.0M driven by RIF – 170 FTEs have been identified as necessary reductions – 105 of which had been terminated as of May 2019; 25 positions within the physician practice groups are also to be eliminated.
- $12.0M lift expected due to outsourcing of ED physicians and hospitalist services.

Connecticut

- $2.0M at ECHN and $1.5M at Waterbury driven by RIFs.

Business Development: $15.9M

Rhode Island

- $4.8M driven by volume increase from Certified Clinical Medical Assistant (CCMA) mitigation, growth of ED volume and inpatient conversions, growth of podiatry volume, and the closure of Roger William's outpatient alcohol addiction clinic.

Connecticut

- $0.1M driven by new growth related to chronic care outreach at Waterbury.

Medical Group/CRC

- $10.3M for implementation of claims scrubbing software, shift to capitation arrangements for specialists, and continued shift from FFS and/or partial risk contracts to full risk contracts with commercial payors.
- $0.6M from acquisition of an MSO and an IPA group.

Expense Initiative – Other: $1.3M

Connecticut

- $1.0M in ECHN due to growth driven by utilizing TeamHealth in orthopedic surgeries.

Rhode Island

- $0.3M driven by medical education cap increase.

FINANCIAL ANALYSIS

Consolidated Prospect Medical Holdings Y1 Initiatives Scenario Analysis (in millions)

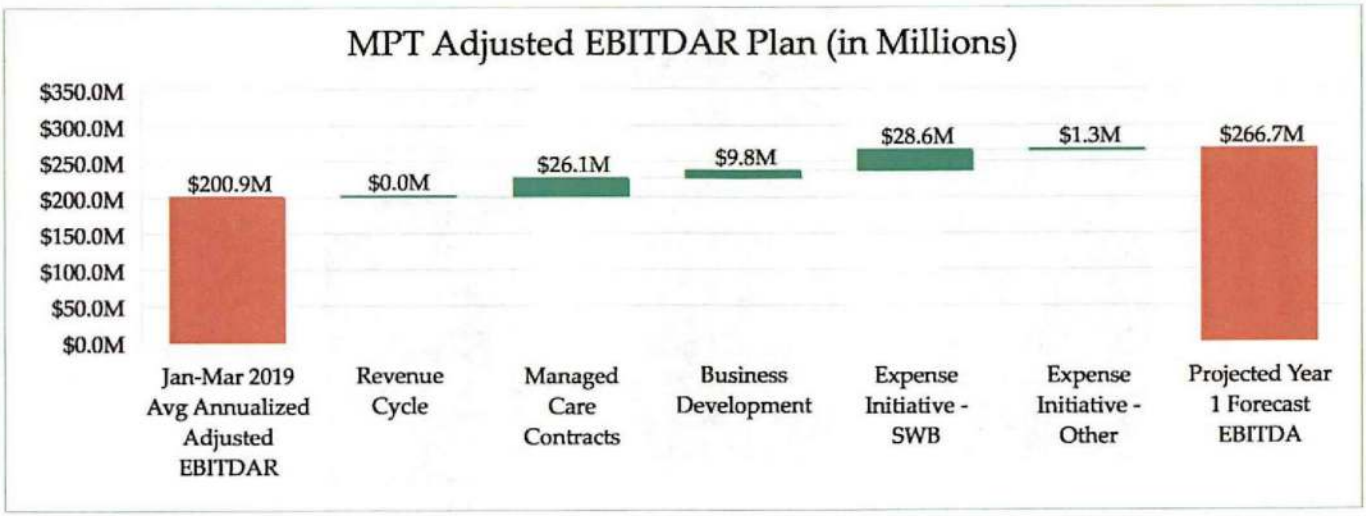
Prospect Initiatives

Below charts are a comparison of Prospect's projected initiatives versus MPT UW's projection.

MPT Adjusted Initiatives

MPT adjusted the Prospect annualized initiatives to more conservative estimates based on supporting data and company-wide YTD improvements. In particular, all revenue cycle initiatives (based upon an expected increase in percentage of collections through the reduction of bad debt and denials) were removed and all managed care contract improvements were limited to agreements that have been executed. In addition, the following cuts were made:

- RI Market – Volume growth expectations were reduced due to limited supporting information
- CT Market – Reduced for SWB initiatives not yet in place
- CRC / PMS Market – Adjusted to include only initiatives with supporting data



MPT CONFIDENTIAL

FINANCIAL ANALYSIS

Adjustments to EBITDAR

Prospect Medical Holdings uses Adjusted EBITDAR in conjunction with EBITDAR to help reflect the operating position of the company as a whole. The adjustments are used to minimize or eliminate the impact of one-time activity or other items that are not indicative of the company's operational performance. In Q2 2019, Prospect reclassified Nix and EOGH as "Discontinued Operations." For that purpose, any adjustments that are specifically related to those facilities have been removed from the FY 2018 addback figures.

Prospect Identified Addbacks						
$ 000's	FY 2017 Actual	FY 2018 Actual (1)(2)	FY 2019 Annualized (3)	FY 2020 Projected (4)	FY2021 Projected (4)	FY 2022 Projected (4)
Transaction Costs related to financing and mergers/acquisitions	$25,800	$12,300	$19,067	$ –	$ –	$ –
Litigation expenses	100	9,100	2,933	–	–	–
Stock-based compensation	1,200	37,500	–		–	–
Sponsor structuring and management fees	900	900	800	–	–	–
Strategic business planning (5)	9,900	13,100	19,600	–	–	–
Non cash items (6)	–	57,800	8,000	–	–	–
Other items	–	–	2,933	35,000	30,000	27,000
Total	**$ 37,900**	**$130,700**	**$53,333**	**$35,000**	**$30,000**	**$27,000**

(1) FY 2019 Q3 MD&A lookback at Adjusted EBITDA by quarter includes retroactive adjustments to FY2018 for comparative purposes. These changes include the exclusion of Nix and EOGH due to their status as "Discontinued Operations" beginning in Q2 of FY 2019.

(2) FY 2018 includes combined adjustments of $26.1M for Nix (TX) and East Orange (NJ), which have been moved to Discontinued Operations and are not reports in the figures presented.

(3) Annualized addbacks from Q1-Q3 of FY 2019 are unaudited numbers as presented in the Q3 2019 MD&A.

(4) No color has been given regarding Projected Addbacks. Classification as "other" does not necessarily reflect the projected classification of the amounts.

(5) See Page 12 for additional notes regarding "Strategic Business Planning."

(6) FY 2018 includes mainly A/R Write Downs ($52M) $24M write down in PA; $15M write down in CA, CT, &RI; $7M reduction in DSH at CA hospitals; $6M write down of PA Physician Group; $5M Other.

Prospect Medical Holdings: EBITDAR by Segment

The graph below depicts Prospect's historic unadjusted EBITDAR by segment, as well as the annualized Q3 2019 FYTD EBITDAR. In addition to the below, Prospect is on track to incur $53.3M of one time addbacks for annualized 2019. Slide 13 depicts the addbacks that are projected. In addition, various initiatives put into place beginning in Q4 of FY 2018 have contributed to an expected growth of unadjusted EBITDAR. Slide 11 details the segment level effect of initiatives on the unadjusted EBITDAR.

Prospect's total EBITDAR is on track to grow 39% from FY2018 to annualized FY2019 driven by a $31.6M increase in Global Risk EBITDAR. This is 6.5% above Prospect's initial projections of $133.2M in unadjusted EBITDAR.

(1) All numbers exclude Discontinued Operations.
(2) FY 2019 EBITDAR by segment presented here are annualized YTD Q3 FY 2019 numbers.

FINANCIAL ANALYSIS

Consolidated Prospect Pro Forma Balance Sheet

The information detailed below is derived from Prospect's historical and pro-forma balance sheet. The Pro Forma reflects organic growth and does not contemplate any additional acquisition activity. Fiscal Years 2017 and 2018 include both Nix and East Orange General Hospital's revenue and operation expenses in calculating AR and AP days. Beginning in Fiscal Year 2019, Nix and East Orange are categorized as discontinued operations and have been excluded from these calculations.

Current and Pro Forma Financial Ratios

	9/30/2017 Actual	9/30/2018 Actual	6/30/2019 (1)(2) Actual	9/30/2020 Projected	9/30/2021 Projected	9/30/2022 Projected
Days Cash on Hand (3)	3.6	0.9	-	9.9	13.7	20.5
AP Days	61.8	61.1	70.2	71.0	69.0	67.8

Current Ratio	1.04x	0.85x	0.84x	0.95x	1.00x	1.05x
Debt to Capitalization (4)	92%	183%	215%	225%	204%	179%

1) *Balance Sheet as of 6/30/2019 represents the balance sheet prior to any transaction with MPT.*
2) *Revenues and OpEx have been annualized for AP and AR days calculations.*
3) *Increased cash on hand due to positive cash flow and repayment of revolving credit facility.*
4) *Increasing Debt to Capitalization is due to repayment of "Long Term Debt" and addition of MPT's transaction into "Long Term Capitalized Leases."*

Cash & Cash Equivalents

While Prospect's cash balance increases substantially throughout the forecasted period from $71.7M in 2020 to $151.9M by 2021, it is important to note that the model does not account for any distributions that could potentially be made. Excess cash as of 6/30/2019 was used to pay down the balance on the revolving credit facility. Once the revolver has been paid down to $135.0M post-transaction, Days Cash on Hand begins to rise and is forecasted to reach 20.5 by 2022.

Long Term Debt Loan

Prospect will use 72% of the $1.55B transaction price in order to pay off the Term Loan of $1.1B. This reduction of debt is required at or before the Closing Date per the Asset Purchase Agreement (APA) Section 4.2 ("Repayment of Indebtedness and Release of Encumbrances").

ABL Revolving Credit Facility

Prospect's ABL Revolving Credit Facility will survive the transaction. Prospect projects the June 30, 2019 outstanding balance of $209.3M to be reduced to $135.0M after completion of the transaction. The borrowing availability is expected to be reduced to approximately $255.0M after the dispositions of Nix and EOGH.

MPT CONFIDENTIAL

FINANCIAL ANALYSIS

Payoff of Pension Liability Requirements

- Based on Section 5.8 of the Asset Purchase Agreement (APA), Prospect is required to make a minimum contribution of $70M to fund the Pension Plan under Crozer-Keystone Health.
- This contribution is to be deposited into escrow at or before Closing, and is required to be finalized no later than January 15, 2020.

ERISA Plans (in millions)		
Plan	**Amount Underfunded As of 9/30/2018**	**Plan Type**
CT Health Care Pension Fund	$13.5	Multiemployer
NE Care Pension Plan	80.6	Multiemployer
Total Multiemployer	$94.1	
Crozer-Keystone Retirement Plan	167.1	Single Employer
ECHN Pension Plan	77.2	Single Employer
Waterbury Hospital Retirement Plan	9.7	Single Employer
Total Single Employer	$254.0	

Multi-Employer Plans (Total Underfunded: $94.1M)

- Given Prospect is not the only employer in these plans, there is no way to determine Prospect's liability unless a withdrawal event occurs.
- PMH is making its minimum contributions (approximately $3M per year).
- Connecticut Health Care Associates Pension Fund currently certified to be in "critical status."
    - Because this is a multi-employer plan, there is no Prospect-specific plan to get out of critical status. They continue to make required contributions.

Single Employer Plans (Total Underfunded: $254.0M)

- All single employer plans are frozen with the exception of union employees under the Waterbury plan (~100 employees).
- PMH is making its minimum contributions (approximately $0.3M per year).
- Prospect has allocated $70M of the MPT transaction proceeds to pay down Pension Obligations.
- Crozer-Keystone Health System Employees' Retirement Plan:
    - Upon acquisition (07/2016) Prospect agreed to file termination of this plan and liquidate/fully fund within 5 years (07/2021), but it would likely take another 18 months (01/2023) to finalize.
    - Prospect has $70M of the MPT transaction proceeds allocated to Pension Obligations. According to Prospect, a majority of the $70M proceeds will be applied to the Crozer plan, putting them in a good position to fulfill their 5 year commitment.
    - Prospect also indicated they could roll this plan into one of their other single employer plans at a later date, allowing them additional time to fulfill the obligation.

FINANCIAL ANALYSIS

Prospect Medical Holdings: Discontinued Operations

NIX and East Orange Healthcare "Discontinued" in Fiscal Year 2019

- Pro Forma Financials
  - Per Prospect's pro forma cash flow, the facilities are expected to be disposed of in FY 2020.
  - Facilities are considered "Discontinued Operations" and are therefore excluded facilities from the financial analysis of the Prospect portfolio.

Net Income (Loss)

	2017 Net Income (Loss)	2018 Net Income (Loss)	FY 2019 Annualized Net Income (Loss)
Nix (TX)	-	(39,453,176)	(19,466,733)
EOGH (NJ)	(7,983,287)	(29,424,985)	(21,854,016)
Total	**(7,983,287)**	**(68,878,161)**	**(41,320,748)**

EBITDA

	2017 EBITDA	2018 EBITDA	FY 2019 Annualized EBITDA
Nix (TX)	-	(31,009,357)	(11,341,454)
EOGH (NJ)	(2,612,294)	(18,904,349)	(16,652,076)
Total	**(2,612,294)**	**(49,913,706)**	**(27,993,530)**

Cash Burn

	06/2019 TTM Cash Burn	06/2019 YTD Cash Burn (9 months)
Nix (TX)	(48,618,033)	(17,737,981)
EOGH (NJ)	(41,229,535)	(16,534,552)
Total	**(89,847,568)**	**(34,272,533)**

Four Facilities with Divestiture Process Currently Underway

- Nix (three facilities in TX)
  - Narrowed down to 3 credible buyers.
  - One closing announced in August 2019 with other closings expected to be announced by end of 2019.
- East Orange (one facility in NJ)
  - Potentially viable disposal option includes donation to a Not-For-Profit upon a financial break even for the facility.
  - Two interested parties – one would provide slight financial gain to Prospect, the other would provide no gain to Prospect.
  - Challenging facility to exit with timing likely closer to Q4 2019 or Q1 2020.

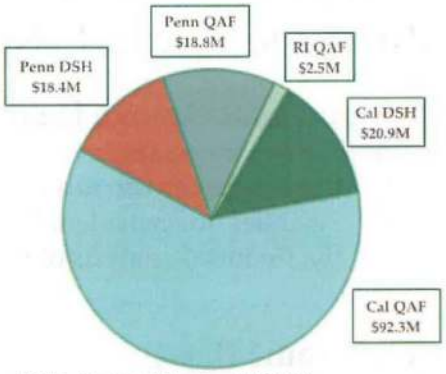
MPT CONFIDENTIAL

FINANCIAL ANALYSIS

Supplemental Funding Overview

Prospect receives supplemental payments from several federal and state funded programs. These payments are projected to approximate $130M - $140M annually for the next five years, representing a significant portion of EBITDA.

2019 Supplemental Funding Projections[1][2]



(1) Total Projected Funding: $152.9M
(2) Excludes $6.6M net payment for Connecticut.

State Tax Programs

California

- California's Hospital Quality Assurance Fee (QAF) Program is crucial to the preservation of California's safety-net hospital system as it provides funding to compensate hospitals for caring for California's Medi-Cal population.
- Hospitals must meet a number of different requirements to receive supplemental payments including: licensing, hospital type, and patients served criteria.
- Funding is determined via a hospital fee model. The hospital fee model calculates the fees and payments for each participating hospital utilizing current and historical data to determine the Medi-Cal utilization rate, federal upper payment limit, and various other data elements.
- For the current program, QAF 5, $4B in fees are assessed from the hospitals which draws down a $5B federal match for a total of $9B in funds. $1B in funds are kept by the State and the remaining $8B is redistributed to the hospitals over time, based on historic and current Medi-Cal utilization rates. Payments to the hospitals are made in two ways:
    - The State issues Medi-Cal fee-for-service supplemental payments to the hospitals (approximately $4B).
    - The State issues Medi-Cal managed care supplemental payments to the Health Plans. Health plans then issue supplemental payments to the hospitals via (1) pass-through based on historic utilization (approximately $2B) and (2) directed payments based on current utilization (approximately $2B).
- The current 30-month program, QAF 5 ended on June 30th, 2019 and will be replaced by QAF 6, which is expected to run through 2021. The QAF 6 model is not yet available, but based on current information, total net payments are expected to be materially consistent with the QAF 5 program. QAF 6 payments made by the Health Plans are expected to be heavier on directed payments as opposed to pass-through.
- Although the QAF program's payment and receipt amounts are generally predictable, the timing of such are often unpredictable and delayed.

Pennsylvania

- Pennsylvania's Quality Care Assessment (QCA) Program is similar to California's QAF Program as it is funded by a hospital tax assessment and federal matching funds, which are then redistributed.
    - Hospitals are taxed based on a percentage of net inpatient and outpatient revenue each quarter.
    - Funds are then redistributed to qualifying hospitals as supplemental fee-for-service and Managed Care payments on a quarterly basis. Hospitals that are exempt (not qualifying) include: state and private owned psychiatric hospitals, LTACHs, federal veteran's affairs hospitals, hospitals that do not charge for their services, critical access hospitals, and cancer hospitals.

Rhode Island and Connecticut

- Connecticut and Rhode Island tax programs are used as a way to reduce the state's share of Medicaid expenditures by federalizing the funds. The state returns a portion of the tax and retains the remainder to offset general fund expenditures. In Connecticut, most hospitals are taxed more than they receive which results in a net payment as is the case for Prospect facilities in the state.

MPT CONFIDENTIAL MPT_PROSPECT_00000039

FINANCIAL ANALYSIS

Supplemental Funding

Disproportionate Share Hospital (DSH) Payments

- President Ronald Reagan and Congress created Medicaid DSH payments in 1985 to sustain safety-net hospitals that incur uncompensated costs and operate on narrow or negative margins.
- Federal law requires that state Medicaid programs make DSH payments to qualifying hospitals that serve a large number of Medicaid and uninsured individuals.
- The DSH payment is calculated as a percentage add-on to the basic DRG payment. The amount of DSH payment a hospital receives is determined using a formula combined with each hospital's DSH percentage.
    - Hospital DSH percentages are calculated using a combination of Medicare and Medicaid patient days.
- The Affordable Care Act aimed to reduce Medicaid DSH funding by approximately $17 billion. Since 2013 Congress has delayed cuts to the program four times, including through the Bipartisan Budget Act of 2018. Federal DSH cuts are scheduled to begin in FY2020, but may be delayed again. Forecasts herein assume cuts will be delayed again, as this seems likely, based on history.

California

- Hospitals with Medi-Cal revenue (including managed care and capitation) that is more than 25% of their total Net Patient Revenue (excluding HQAF) are eligible to participate in the program.
- The program pays a per diem amount per historic Medicaid or Managed Medicaid patient day and is adjusted by a percentage of funds available to the program, which has varied between 50-60% over the past three years.

Pennsylvania

- DSH funding comes from several different Pennsylvania state programs:
    - The Pennsylvania Community Access Fund reimburses hospitals that have a disproportionate share of Medicaid patients and is split into two parts: Uncompensated Care Support ($2.2M) and a Grant ($4.1M). Both parts of the Community Access Fund are federally matched and are paid out annually.
    - The Pennsylvania Legislative specifically supports Crozer Chester Medical Center due to their high Medicaid population. The current payment is $5M from the state of Pennsylvania, which qualifies for a drawdown of federal matching funds.

Prospect Net Annual DSH Funding Forecast by State

FINANCIAL ANALYSIS

Supplemental Funding

Financial Analysis – 2019 Actual vs. 2019 Forecast

This analysis compares the Net Supplemental Funding recorded by Prospect through Q2 2019 against the Net Supplemental Funding Forecast and documents any material differences as provided by management.

Prospect Net Supplemental Funding by State				
(In Millions)	Q2 2019 YTD Total	Q2 2019 YTD Projection	Surplus/ (Shortfall)	Management Explanation
CA DSH	$11.4	$10.4	$1.0	
CA QAF	46.2	46.2	0.0	
PA DSH	5.9	9.2	(3.3)	Temporary difference due to timing. An additional $5.0M is recognized in July similar to prior years.
PA QAF	8.9	9.4	(0.5)	
RI QAF	1.2	1.2	0.0	
CT QAF	(7.5)	(3.2)	(4.3)	Per discussion with Management, supplemental payments have decreased in FY2019. This has been partially mitigated by an increase in Medicaid payments. The expected shortfall exposure is $2M.
Total	**$66.1**	**$73.2**	**($7.1)**	

Cash Flow Forecast

Supplemental funding, and in particular, California QAF, is notoriously received in large sums and is extremely difficult to predict the exact timing. Additionally, most supplemental payments are recorded on an accrual rather than a cash basis. As such, the below cash flow statement does not tie to the Net Supplemental Funding by State, as previously presented, but has been provided by Prospect and is used for cash projection purposes.

Prospect Net Supplemental Payments Cash Flow Projections[1]														
	2019								2020					
in Millions	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	Mar	Apr	May	Total

MPT CONFIDENTIAL

FINANCIAL ANALYSIS

Revenue Cycle Overview

Prospect revenue cycle management has significantly improved year over year and as of March 2019, total year to date cash collections of net patient revenue is over 100%. Management is focused on comprehensive initiatives to further improve revenue cycle management as a result of FY 2018 AR adjustments. Currently, revenue cycle management is performed at a market level across five business offices; the California hospitals centralize into one office. Management is implementing a system-wide set of initiatives which are expected to further improve collections.

Revenue Cycle Impact on EBITDA Improvement

- Management has included an approximately $7.7M (3.6%) annual EBITDA improvement as a result of revenue cycle improvement.
  - Crozer is projected to benefit from the initiatives with a $1.8M (19%) improvement to annual EBITDA.
- Several improvement initiatives have been identified by management. These include:
  - Claim denials management
    - Using Rubixis (3rd party revenue cycle management), PMH is able to determine exact accounts which have been denied and will lend greater visibility into the claims approval workflow. This platform will improve PMH's ability to proactively identify and settle claims denials.
  - Patient revenue cash collections improvement
    - Management has stated that its' goal is to have at least 90% of Net Revenue before bad debt collected within 90 days. The current 90-day collection rate is approximately 89%, according to management.
  - Centralized billing and collection policies
    - Each market is currently operating under local policies. PMH is working to create system-wide policies based on best practices from each of the markets.

Market	Adj. Annual EBITDA ($M)	Projected Revenue Cycle EBITDA Improvement ($M)	Projected Revenue Cycle EBITDA Improvement (%)
California	$137,722	$1,750	1.3%
CharterCare	15,941	822	5.3%
Crozer	9,525	1,821	19.1%
ECHN	19,919	859	4.3%
Waterbury	29,612	2,446	8.3%
Total Hospital Segment	**$212,268**	**$7,698**	**3.6%**

Source: PMH 1 Year Forecast

Allowance for Doubtful Accounts

- Currently, the estimation of allowance for doubtful accounts is not standardized across the PMH hospitals. Specifically, the estimation is made depending on historical facility collection history.
- In Q4 2018, PMH recorded $105.0M of adjustments reducing net revenues as a result of changes in estimates and related to prior reporting periods.
  - An $18.7M adjustment was recorded at Crozer due to a change in AR valuation model. The model is now based on patient collection rate methodology and was formerly based on expected contractual reimbursements.

MPT CONFIDENTIAL MPT_PROSPECT_00000042

FINANCIAL ANALYSIS

Revenue Cycle

Collection Metrics

- As of March 2019, TTM cash collections versus 60-day prior TTM net patient revenue was approximately 101.5%. This metric has ranged from 97.0% to 101.6% on a monthly basis since October 2017.
- The 90-day collection rate goal is 90%. As of 9/30/2018, days in A/R were 46.

Collection Workflow

- All payor contracts are monitored through Rubixis, a 3rd party that models all contracts to calculate expected receipts.
  - Rubixis was purchased by Transunion in 2019 which further drives management's confidence in the continued use of the successful system.
- PMH management is focused on Rubixis' ability to analyze data as a means to improve denial management.
- As collection and AR reserve policies are standardized, the efficiency gained by Rubixis will assist in more precise reserve estimates.

Source: PMH Cash Collections

(1) FY 2019 cash collections based on Q1 and Q2 figures.

Markets Of Note

CharterCare

BCBS and United volume has increased in FY 2019 while cash collected from these payors has slowed. PMH's revenue cycle team is aware of the delays and is identifying potential solutions and efficiencies to reduce days outstanding.

Crozer

The $11.0M adjustment to Patient AR in Q4 2018 is the driver of the substantial increase in cash collections from FY2018 to FYTD 2019.

Waterbury

Market converted to Cerner in November 2018, driving initial cash collection dips that are expected to normalize throughout FY 2019.

MPT CONFIDENTIAL MPT_PROSPECT_00000043

PROSPECT OVERVIEW

PROSPECT MEDICAL HOLDINGS, INC.

Founded in 1996, Prospect is an integrated healthcare delivery system of affiliated and employed physician group practices, hospitals, urgent care centers, management services, and risk based payment models. From 2004 through 2010 it was a publicly traded company. It was acquired by PE firm Leonard Green Partners, and in July 2011 filed a certification and notice of termination of registration with the SEC to return to private status.

Hospitals & Urgent Care Centers

- Operates 18 acute care & two behavioral health facilities located across six states.
- Focused on providing service to densely populated urban markets.
- Consists of low-cost community hospitals with an integrated care network of outpatient clinics.

Physician Group Practices

- Manages over 750 employed physicians.
- Established relationships with 23 Independent Physician Associations (IPA) and an additional 11,000 affiliated physicians.

Regional Care Management

- Conducts at-risk population health management for nearly 500,000 members in California & Pennsylvania.
- Participates in state programs that provide payments for managing the risk of patient populations.

Hospitals	**20**
Acute Care	18

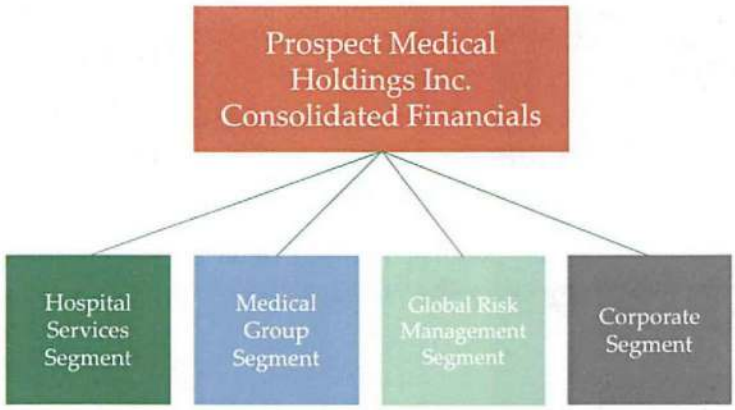
MPT CONFIDENTIAL

PROSPECT MEDICAL HOLDINGS, INC.

Overview by Financial Reporting Segment



Hospital Services Segment[(1)]

- 20 acute care and behavioral health hospitals, elder care facilities and a network of specialty and primary care clinics.
- Hospitals are wholly-owned by Prospect, except for the facilities in Rhode Island, which Prospect has an 85% interest in (Community Board owns 15%).
- Includes financials of employed physicians.

Medical Group Segment

- Healthcare Management Services Organization ("MSO") that provides management services to affiliated physician organizations that operate as independent physicians associations ("IPAs" or "Medical Groups").
- Medical Groups contract with physicians (primary care and specialists) and other healthcare providers to provide medical services under risk-based and fee-for-service contracts.
- Although employed physicians are reported within the Hospital Services Segment, the Medical Group Segment provides operational and strategic support.

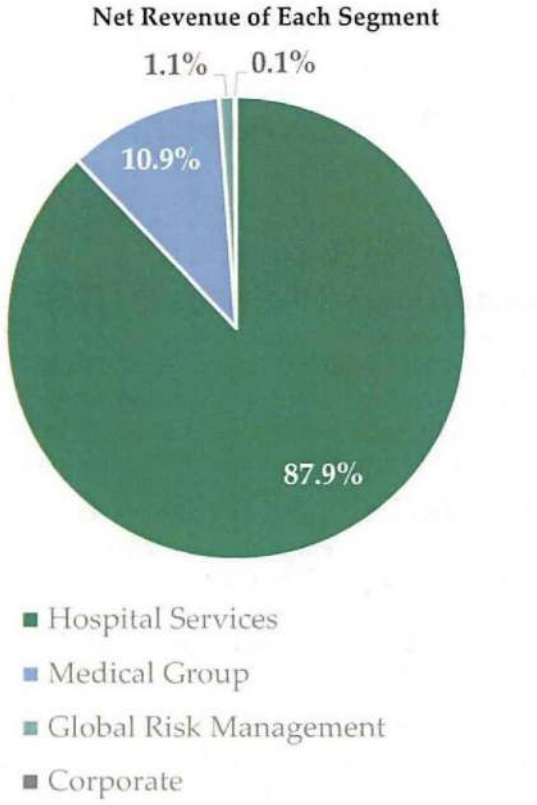
Global Risk Management Segment also known as CRC

- Enters into global and professional capitation arrangements with certain unrelated third-party health plans.
- Manages the provision of care for members in coordination with the Hospital Services and Medical Group segment.

Corporate Segment

- Prospect's corporate overhead costs and captive insurance companies.

Segments in Perspective



(1) This includes Nix Health in Texas and EOGH in New Jersey, both of which were marked as discontinued operations in fiscal Q2 2019. MPT is not purchasing the real estate of these facilities.

MPT CONFIDENTIAL

PROSPECT MEDICAL HOLDINGS, INC.

Medical Group Segment[3]

In 000s	Q3 FY 2019 YTD	Q3 FY 2018 YTD		FY 2019[1]	FY 2018	FY 2017
Revenue:						
Capitation	$229,665	$226,533		$306,219	$307,444	$369,185[2]
Mgmt. Fees	10,323	5,701		13,764	10,501	7,976
Other Operating Rev.	31,863	22,822		42,484	16,462	16,787
Total Revenue	**$271,851**	**$255,056**		**$362,468**	**$334,408**	**$393,948**
PCP Capitation	35,294	36,804		47,059	49,350	48,291
Specialist Capitation	38,333	32,143		51,110	45,045	45,848
Claims Expense	108,055	104,918		144,074	153,552	129,255
Physician Incentives	14,952	9,540		19,936	15,097	46,127
Other Cost of Rev.	558	2,732		745	4,332	5,116
Total Cost of Revenues	**$197,193**	**$186,137**		**$262,924**	**$267,376**	**$274,636**
Gross Margin	**$74,658**	**$68,919**		**$99,544**	**$67,032**	**$119,312**
General and Admin.	50,907	51,638		67,876	73,405	64,478
EBITDA	$23,716	$17,186		$31,622	($6,373)	$54,834
Medical Cost Ratio	79.1%	76.8%		79.1%	80.6%	60.5%

2019 YTD results show a $6.5M increase in EBITDA thus far, driven by revenue growth that outpaced that of expenses:

- $16.8M increase in revenue driven by (1) $3.1M increase in capitation revenues driven by more favorable per-member-per month rates partially offset by membership losses (2) $4.6M increase in Management Fee Revenues and (3) $9.0M increase in Other Revenues driven by an increase in incentive, hospital, and shared risk incentives as a result of lower admissions and better utilization management.
- $11.1M increase in expenses primarily driven by (1) $5.4M increase in Physician Incentives due to payments for improved quality and profitability on profit sharing arrangements with contracted medical groups and (2) $3.1M increase in Claims Expense as a result of a $2M IBNR deficit at Q2 2018 as well as an increase in the cost basis of cases in 2019.

Capitation Revenues within Hospital Services Segment[3]

	Q3 FY 2019 YTD	Q3 FY 2018 YTD		FY 2019[1]	FY 2018	FY 2017[2]
Capitation Revenue	118,053	119,228		157,404	157,622	110,330
Capitation Expense	111,996	112,892		149,328	150,646	107,541
Margin	6,057	6,336		5,878	6,976	2,789
Margin Percentage	5.1%	5.3%		3.8%	4.4%	2.5%

2019 YTD results show a $0.3M decrease in EBITDA thus far, due to a decrease in the number of enrolled members. Management is focused on growing capitation and expects to increase enrollment over the next several years.

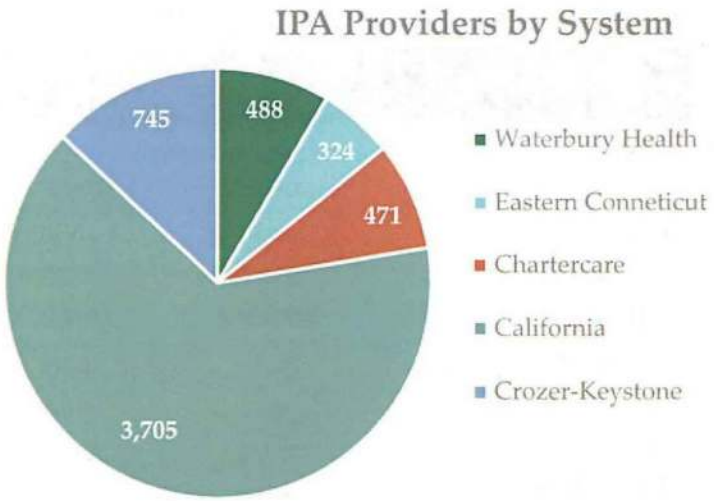
(1) Unaudited results through Q3 2019 annualized.
(2) 2017 Capitation Revenues included a $55M final risk settlement of a certain shared risk arrangement, which did not reoccur in 2018.
(3) Figures may not foot due to rounding.

MPT CONFIDENTIAL

PROSPECT MEDICAL HOLDINGS, INC.

Medical Group Segment

- The Medical Group Segment includes 23 owned or managed IPAs in six states: California, Texas, Rhode Island, New Jersey, Pennsylvania, and Connecticut.
- The primary function of the Medical Group Segment is employing physicians or physician organizations that operate as IPAs ("Affiliates") and retaining patients within the health system. Employed physician expense is captured within the Hospital Services Segment.



- Operating Revenues for the segment primarily include:
  - ❑ Payments for medical services procured by Affiliates[1] under capitated contracts with various managed care providers including HMOs.
    - Capitation revenue under HMO contracts is prepaid monthly to the Affiliates based on the number of enrollees electing any of the Affiliates as their healthcare provider.
    - Capitation revenue is recognized in the month in which the physician organizations are obligated to provide services.
  - ❑ Management Fee Revenue – Management fee revenue for providing financial management, IT, marketing, admin, and other support services is earned in the month the services are rendered. The Medical Group Segment provides management services for both affiliated and unaffiliated entities. Contracts with unaffiliated entities provide for compensation ranging from 6.5% to 10% of revenues of the related management contracts.
- Cost of Revenues for the segment primarily include:
  - ❑ Capitation and claims payments, pharmacy costs, and incentive payments to contracted providers and are recognized in the period incurred or when the services are provided.
  - ❑ Additional expense includes discretionary incentive payment obligations to physicians which are in large part predicated on pay-for-performance, shared risk revenues, and favorable senior capitation risk adjustment payments received from Health Plans which are recorded when the amounts are known (generally in the 3rd or 4th quarter).

Capitation Enrollment Growth

- Prospect is focused on growing their capitated line of business when each of their markets is ready. Currently, the majority of capitation arrangements are located in California as it is the most advanced market for managed care. However, Prospect is planning for the future and working to build the required infrastructure for these types of arrangements within other markets.

Medical Services Provided by Affiliated Physician Organizations			
	2018	2017	2016
Managed Covered Lives through Directly Capitated Contracts	187,000	196,000	198,000
Managed Covered Lives for 3rd Parties	255,000	159,000	109,000

1) *Affiliates include affiliated physician organizations that operate as independent physician associations ("Medical Groups" or "IPAs")*

MPT CONFIDENTIAL MPT_PROSPECT_00000047

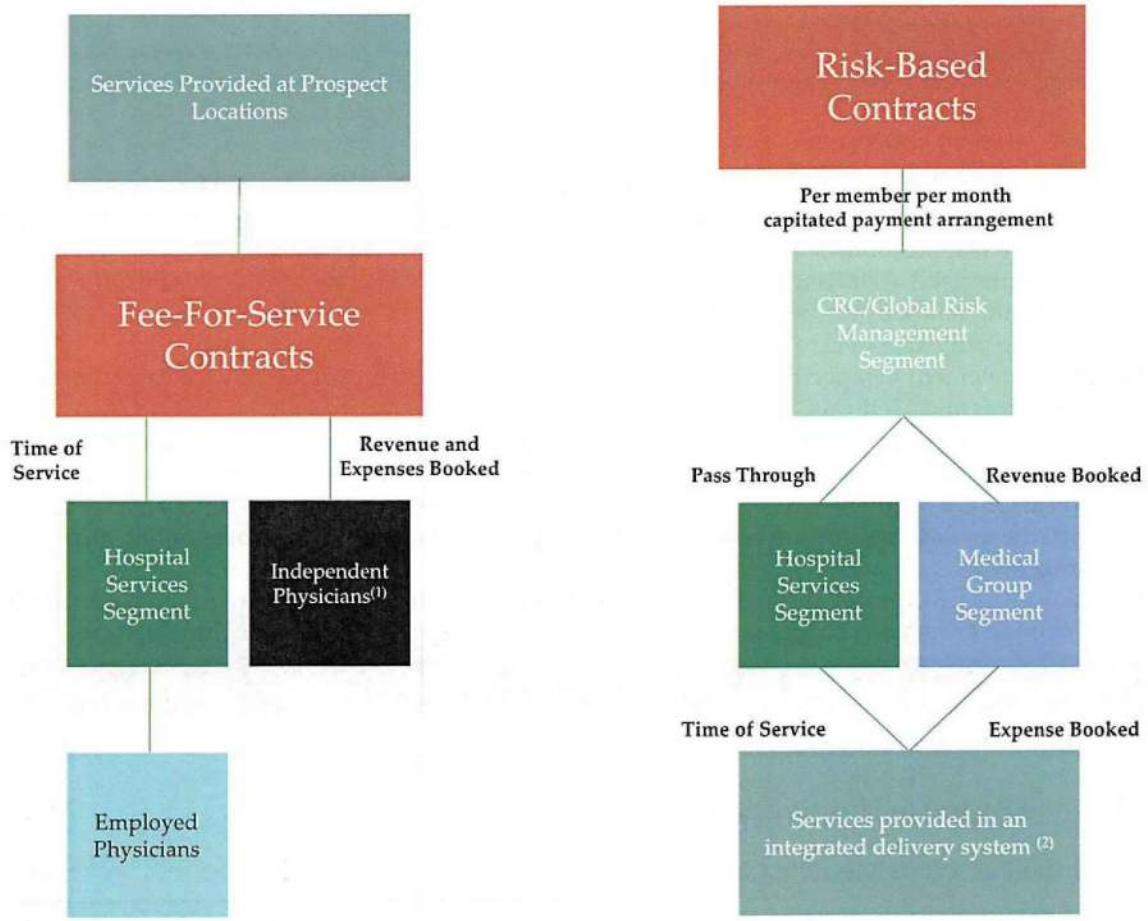
PROSPECT MEDICAL HOLDINGS, INC.

Coordinated Regional Care

Two Primary Sources of Patient Revenue

Prospect's strategy includes alignment and integration among physicians, hospitals and other medical, behavioral, social and community providers. The primary goal is to transform the organization into an open, integrated delivery system with strategic partner health plans to move from fee-for-service to a value-based, global risk reimbursement payment system. PMH describes this integrated model as Coordinated Regional Care ('CRC'). The model is focused on achieving improved patient care and experience at lower costs and better financial returns. Certain of Prospect's markets are more developed with respect to risk-based contracting, namely California, while others remain almost exclusively fee-for-service. FY2018 Patient Revenue was composed of 83% fee-for-service revenue and 17% risk-based revenue. However, Prospect has laid the foundation in each of its locations to capitalize on a shift to risk-based contracts when those markets develop. The CRC model is implemented by Prospect under their Global Risk Management business segment.

Patient Care Structure: Fee-For-Service vs. Risk-Based

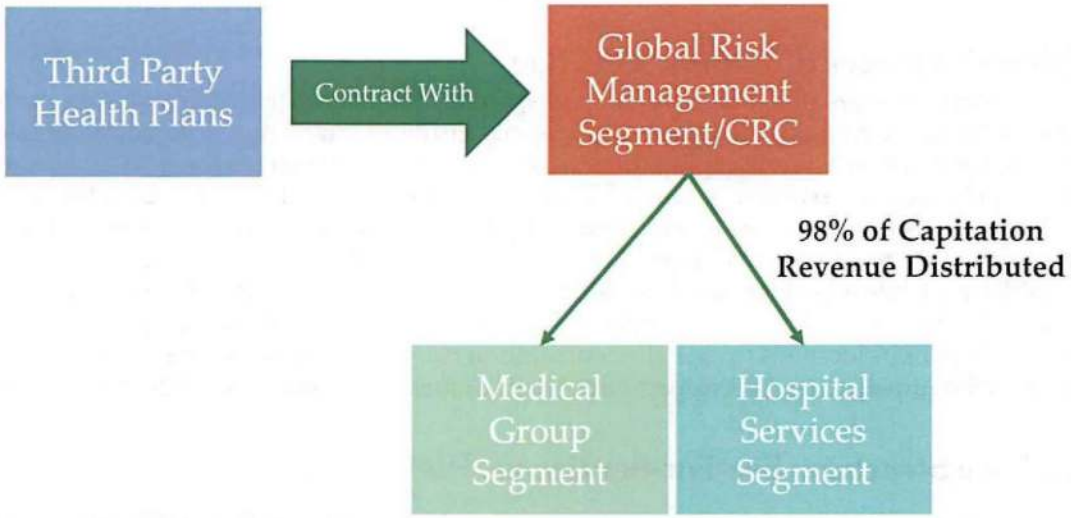


(1) *Independent Physicians Association ("IPA") members leverage the contracts negotiated by the Medical Group Segment.*
(2) *This model increases the incentive to engage physicians and reduce utilization.*

MPT CONFIDENTIAL

PROSPECT MEDICAL HOLDINGS, INC.

Global Risk Management Segment



Purpose

The CRC enters into global capitation arrangements with certain unrelated third-party health plans. The entity manages the provision of care for its members in coordination with the Hospital Services and Medical Group Segments. Primary responsibilities include:

- Negotiating risk-based contracts
- Maintaining relationships with insurance companies
- Managing provision of care downstream

From a financial statement perspective, CRC primarily serves as a pass through entity for capitation revenues to the Hospital Services and Medical Groups Segments.

- Hospital Segment – recognizes revenue and expenses for global capitation arrangements for which hospitals are responsible for the provision of care to members under such arrangements.
- Medical Group Segment -- recognizes revenue and expenses for global capitation arrangements for which the medical groups are responsible for the provision of care to members under such arrangements.

As shown below, the CRC passes through a vast majority of capitation revenues as required by contract and only retains enough to remain solvent as required by each state. Expenses follow the same pattern.

In Millions	2017	2018	Q3 2019 YTD
Capitation Revenue Received	$141.9	$258.2	$192.7
Revenue Passed to Hospital Services	62.5	101.8	77.2
Revenue Passed to Medical Groups	65.0	120.3	88.8
Revenue Remaining at CRC(1)	**$14.4**	**$36.1**	**$26.7**

(1) Does not tie to total CRC segment revenue as there is an immaterial amount of other revenue.

MPT CONFIDENTIAL

PROSPECT MEDICAL HOLDINGS, INC.

Physician Alignment Strategy by Region

Physician alignment is a key focus area for Prospect. However, alignment strategies vary by region as a result of hospital history, physician preference and relationships, legal climate, and risk-based contracting opportunities. Physician alignment strategy by region:

Pennsylvania – Crozer Keystone Health System: **Strong Physician Alignment and Early Stages of Risk-Based Contracts**

- Physician alignment is the bedrock of CKHS' strategic vision and includes three facets:
  - ❑ Enhanced Primary Care Model – 100+ primary care physicians (largest PCP base in the area).
  - ❑ Physician joint venture strategy.
  - ❑ Independent Physician Association strategy – includes 600+ physicians (400+ are employed).
- System negotiates at-risk capitation contracts for medical and behavioral health care services and is looking to expand risk-based contracting.

Connecticut: **Focus on being a "doctor friendly" health system, but limited risk contracting**

- CRC contracts with a next-gen ACO that pays per member per month rates based on quality metrics. There are no full risk contract opportunities in Connecticut, but Prospect will continue to pursue them as a long term strategy.
- IPA arrangement with independent specialists is effective at managing system leakage.
- Waterbury Hospital
  - ❑ Heavily employed medical staff.
  - ❑ Approximately 400 employed physicians and an IPA with over 480 physicians.
- Eastern Connecticut Health Network – Manchester Memorial and Rockville General
  - ❑ Larger population of independent physicians given proximity to Hartford.
  - ❑ 40-50 employed physicians compared to an IPA with over 300 physicians.

Rhode Island -- CharterCARE: **Steadily increasing risk-based contracting bolstered by teaching hospital model**

- IPA includes over 420 physicians (65 employed physicians) started more than four years ago.
- ~20,000 lives in full risk contracts and ~70,000 covered lives in total as of Q1 2019.

California Hospital System: **System's Most Developed IPA and Risk-Based Contracts Market**

- Large IPA Network with Strong Primary Care Base.
  - ❑ In addition to owning a number of IPA groups in CA, Prospect provides management services for affiliated IPAs that are not owned by Prospect.
  - ❑ Coordinated movement between 7 facilities and IPAs allow patients to receive effective and efficient care.
- Serves Large Medicare & Medicaid Managed Care Population under Risk Arrangements.
  - ❑ Hospitals are designed to operate at low cost and focus on the primary medical needs of residents.

Additional Physician Strategies

- Employing physicians and acquiring practices where it makes financial sense and fits with the overall market strategy.
- Marketing management services Prospect can provide to IPAs in order to further develop their network and attract new IPA groups.
- Negotiating risk-based contracts when an individual market is ready and then continuing to further develop those contracts and markets over time.

MPT CONFIDENTIAL

TAX CONSIDERATION & CONSEQUENCES

Impact to Medical Properties Trust

Note: Information below is based on an assessment provided by Redacted MPT Tax Director.

Acquisition Structure:

Medical Properties Trust ("MPT") is organized as a Real Estate Investment Trust ("REIT") and meets all of the requirements to operate as such under the Internal Revenue Code. The Prospect assets to be acquired (both mortgages and leases) are considered qualifying REIT assets. MPT will setup new legal entities under MPT Operating Partnership to serve as the acquisition company for each of the Prospect assets. Given the qualifying nature of the Prospect assets to be acquired, MPT will not be required to use its Taxable REIT Subsidiary for this transaction.

Federal:

MPT, as a REIT, is only taxed on its undistributed income and capital gains. MPT has sufficient dividends to cover the additional lease and mortgage revenue generated from the Prospect facilities. As a result, no federal tax impact from the Prospect acquisition is expected.

State:

a) **California**

i. **Income Taxes** - REIT income is treated the same under California state law as federal law. MPT will not incur state income tax in California on lease revenue generated from the California medical facilities.

ii. **Franchise Taxes** – California assesses an annual minimum franchise tax of $800 for each SPV LLC MPT uses to hold the real property. MPT will use a LP/LLC franchise tax blocker structure to avoid exposure to higher franchise taxes.

iii. **Real Estate Transfer Taxes** - California assesses a real estate transfer tax of 0.11%.

iv. **Transaction Privilege Taxes** - California does not assess sales or privilege tax on lease revenue.

b) **Pennsylvania**

i. **Income Taxes** - REIT income is treated the same under Pennsylvania state law as federal law. MPT will not incur state income tax in Pennsylvania on lease revenue generated from facilities in Pennsylvania.

ii. **Franchise Taxes** - Pennsylvania does not assess state franchise taxes.

iii. **Real Estate Transfer Taxes** – Pennsylvania assesses a real estate transfer tax of 1% of the value of real property.

iv. **Transaction Privilege Taxes** - Pennsylvania does not assess sales or privilege tax on lease revenue.

c) **Connecticut**

i. **Income Taxes** - REIT income is treated the same under Connecticut state law as federal law. MPT will not incur state income tax in Connecticut on lease revenue generated from Connecticut facilities.

ii. **Franchise Taxes** - Connecticut does not assess state franchise taxes.

MPT CONFIDENTIAL

Connecticut (Continued)

iii. **Real Estate Transfer Taxes** - Connecticut assesses a real estate transfer tax of 1% of consideration on amounts up to $800,000 and then 1.5% of the amount in excess of $800,000.

iv. **Transaction Privilege Taxes** - Connecticut does not assess transaction privilege taxes.

d) **Rhode Island**

i. **Income Taxes** - REIT income is treated the same under Rhode Island state law as federal law. MPT will not incur state income tax in Texas on lease revenue generated from the Rhode Island facilities.

ii. **Franchise Tax**- Rhode Island does not assess state franchise taxes.

iii. **Real Estate Transfer Taxes** – Rhode Island assesses a real estate transfer tax of .46%

iv. **Transaction Privilege Taxes** – Rhode Island does not assess transaction privilege taxes.

Impact to Prospect Medical Holdings

Federal:

Prospect Medical Holdings, Inc. ("Prospect") is organized as a corporation for US federal tax purposes. Net income, adjusted for certain tax differences, from the acquisition of the portfolio will result in an increase to cash income tax expense for Prospect. The federal tax rate for Prospect that will be applied to the additional taxable income is 21%.

State:

Prospect will be subject to state income taxes in California, Pennsylvania, Connecticut, and Rhode Island on taxable income generated from operations. The applicable statutory tax rates are as follows: California (8.84%), Pennsylvania (9.99%), Connecticut (7.5%), and Rhode Island (7%). While Texas does not have an income tax regime, they do have a gross margin tax which is based upon the lesser of 70% of total revenue, revenue less compensation, or revenue less cost of service. The gross margin tax rate is 0.75%.

Tax Considerations from Acquisition:

- **Interest Expense:** Under the current tax law, taxpayers are only allowed to deduct interest expense in excess of interest income up to 30% of EBITDA. Depending on the break-out of investment between mortgage loans and leases, there is the potential Prospect will not be able to fully deduct the interest expense on the mortgage loans.

- **Depreciation:** Prospect will lose a tax shield related to the depreciation on the buildings that are sold to MPT through the sale-leaseback transactions. This is approximately 2.5% of the original cost basis of the building. However, Prospect will pick up a tax deduction for lease expense for operating leases which will exceed the depreciation deduction (assuming 7.5% cap rate) currently taken.

- **Capital Gains from Transaction**: It is expected that Prospect has sizeable built-in gains in the real estate to be acquired. Prospect will shield a portion of the capital gains from recognition by mixing the transaction between failed leases, loans and true leases. The failed lease arrangement will be utilized for the properties carrying the largest built-in gains. Prospect is expected to shield a large portion of the recognized built-in gains through the failed lease structuring and the utilization of prior year losses carried forward to 2019.

MPT CONFIDENTIAL

TAX CONSIDERATION & CONSEQUENCES

Property Taxes

In accordance with the Master Lease, Prospect will be responsible for all real property taxes and property taxes on all tangible personal property. All applicable states assess property tax on a calendar year basis. Annual property tax varies from county to county and is based upon a millage rate adopted by the local tax assessor.

i. **Assessment/Valuation Basis:**

   a. California – Fair market value

   b. Pennsylvania – Predetermined ratio applied to actual value

   c. Connecticut – 70% of the true and actual value

   d. Rhode Island - Full cash value

ii. **Assessment Date:**

   a. California – July 1st

   b. Pennsylvania – July 1st

   c. Connecticut – October 1st

   d. Rhode Island – December 31st

iii. **Payment Date:**

   a. California – ½ November 1st, ½ February 1st

   b. Pennsylvania – June 1st in Delaware County

   c. Connecticut – July 1st

   d. Rhode Island – 4 installments on the 24th of July, October, January, and April in Providence County

THIRD PARTY REPORTS

Phase I – Environmental Assessments

The following is a summary of the Phase I initial findings from Terracon and EMG.

	Hospital [1]	Findings
California	Southern California Hospital at Van Nuys	One REC Identified. • A 280 gallon gasoline UST was closed properly with the state in 2000, and is identified as a "controlled REC". No further investigation recommended.
	Southern California Hospital at Culver City	Five RECS identified. • Two underground storage tanks with incomplete records • Offsite gas station located near the hospital • Offsite dry cleaners near the hospital • Heavy hydrocarbon petroleum staining in the basement. **A Phase II report was completed post-closing per Section 39.27 of the Master Lease. No further investigation recommended.**
	Los Angeles Community Hospital at Bellflower	Three RECS identified. • Two underground storage tanks with incomplete inspection and/or disposal records • Offsite dry cleaner located near the hospital. **A Phase II report was completed post-closing per Section 39.27 of the Master Lease. No further investigation recommended.**
	Foothill Regional Medical Center	No RECS identified. A UST was removed in 2004 and soil sampled, but Terracon recommends obtaining the final closure letter.
Connecticut	Waterbury Hospital	Two RECS identified. • Insufficient information about the closure/removal of UST. EMG recommends additional file review. • When Prospect acquired Waterbury in 2016, they filed a "Form III" with the state to say that either the environmental conditions were unknown, or a prior release occurred. EMG recommends a further file review. The site is also in EPA Radon Zone 1, areas with potential for elevated radon levels in the building. EMG recommends radon testing to determine if installation of radon mitigation systems are warranted.
	Rockville General Hospital	Two RECS identified. • Insufficient information about the closure/removal of multiple UST. EMG recommends additional file review. • When Prospect acquired Rockville in 2016, they filed a "Form III" with the state to say that either the environmental conditions were unknown, or a prior release occurred. EMG recommends a further file review. **Compliance with Connecticut Department of Energy & Environmental Protection Bureau of Water Protection and Land Reuse Remediation Division ("CDEE") Letter required post-closing, per Section 39.27 of the Master Lease.**
	Manchester Memorial Hospital	Two RECS identified. • Insufficient information about the closure/removal of multiple UST. EMG recommends additional file review. • Contamination that occurred during removal of a UST in 2012. Approx. 1,142 tons of impacted soil were removed, and monitoring wells were subsequently installed. While the regulatory status of the release is "completed", Prospect reports that additional soil sampling is scheduled to occur in June 2019. Prospect filed a "Form III" when they acquired in 2016 to confirm that the remediation efforts had occurred, and EMG recommends a file review to confirm that all documentation relating to the monitoring has occurred. **Compliance with Connecticut Department of Energy & Environmental Protection Bureau of Water Protection and Land Reuse Remediation Division ("CDEE") Letter required post-closing, per Section 39.27 of the Master Lease.**
Rhode Island	Our Lady of Fatima Hospital	Two RECS identified. • Removal of prior tanks, one of which had a reported release in 1991. EMG recommends a further file review to confirm that the release case has been properly closed. • 2005 release of heating oil fuel which resulted in the installation of four monitoring wells and an instruction from the state of RI to continue "recovering" any contaminated soil as needed. EMG recommends those remediation continue, and the tenant work with the state to obtain final closure of the matter.
	CharterCARE Health Partners at Roger Williams	Three RECS identified. • "Controlled" REC relating to the owner's receipt of a no further action letter following remediation of a release in 2004. • Incomplete closure of state environmental files documenting the removal of a number of USTs. EMG recommends file reviews. • Gas station was on the southwest corner of the project through the 1970s. **A Phase II report is recommended and required post-closing per Section 39.27 of the Master Lease.**
Pennsylvania	Springfield Hospital	One REC identified. • A 6,000 gallon UST was removed in 1990 and caused a release of fuel oil. Although the state records show the cleanup was completed, EMG recommends a further file review to confirm how the UST was disposed of.
	Crozer-Chester Medical Center	Two RECS identified. • There is an active state case relating to a release of fuel oil seeping into Ships Creek that occurred prior to 2001, and a soil and groundwater remediation area located at a parking area onsite. This site has undergone several remedial actions, and EMG identified monitoring wells and a remediation shed onsite. Prospect confirmed that these are being used to track remediation progress. EMG recommends a further file review to confirm status of remediation. • There was a car repair facility onsite from the 1930s-2000s. **A Phase II report was completed post-closing per Section 39.27 of the Master Lease. No further investigation recommended.**
	Taylor Hospital	One REC identified. • Three USTs were reportedly closed in 1993, but EMG found no information about the location of those USTs and if/how they were disposed of. **A Phase II report was completed post-closing per Section 39.27 of the Master Lease. No further investigation recommended.**
	Delaware County Memorial Hospital	One REC identified. • The site is listed on the state environmental brownfield and cleanup database, but Prospect provided no information to EMG about why the listing is there. EMG recommends additional file review to determine status.

(1) *No RECs were identified at Southern California Hospital at Hollywood, Los Angeles Community Hospital, or Los Angeles Community Hospital at Norwalk. No further investigation recommended.*

MPT CONFIDENTIAL MPT_PROSPECT_00000065

THIRD PARTY REPORTS

Property Condition Reports (PCRs)

Redacted performed the Property Condition Reports at all 16 Prospect facilities including ancillary sites. The most costly items needing immediate repair were roof upgrades and parking lot resurfacings. Nine facilities require major parking lot repairs estimated at $50,000 or more. Also, nine facilities require major roofing repairs estimated at $50,000 or more. Redacted recommendation are categorized as Immediate items needing to be completed within the next 12 months of signing and Near Term items needing to be completed within 24 months of signing. Total estimated cost for Immediate items is $5.2M, and repairs are required to be completed post-closing per Section 9.4 of the Master Lease. Of these repairs, the largest items are as follows:

Material Items Needing Immediate Repair (within 12 months)			
State	Facility	Repair	Estimated Cost
CA	Bellflower	Parking Area	$210,000
CT	Waterbury	Parking Area	$1,324,183
CT	Manchester	Parking Area	$215,257
RI	Our Lady of Fatima	Parking Area	$676,850
RI	Roger Williams	Parking Area	$442,103
PA	Crozer	Parking Area	$442,937
PA	Taylor	Roof Replacement	$300,000

In addition to the $5.2M of immediate repairs, Redacted recommends $3.0M in Near Term items. Most of these repairs are window and walls in need of sealing and re-chalking. Unchecked these Near Term items are not a threat to the real estate. These aged seals contribute to energy loss, especially since the majority of these repairs are at facilities located in the Northeast. The largest ticket items in the near term are as follows:

Material Items Needing Near Term Repair (within 24 months)			
State	Facility	Repair	Estimated Cost
PA	Crozer	Window and Brick Work	$1,050,000
PA	Taylor	Window and Roof Replacements	$500,000
PA	Delaware County	Window Replacements	$700,000

Prospect has provided MPT with the Capital Expenditure plan for the near future. A total of $15.7M of repairs and upgrades have recently been completed across the portfolio and $68.4M of repairs have been approved and are currently in work to be completed. However, an additional $38.3M of repair work has been identified as needing to be completed but has not yet received corporate approval.

Prospect CapEx Plan			
State	Recently Completed	In Process	Pending Approval
CA	$5,865,247	$13,252,235	$2,193,596
CT	$5,873,663	$11,673,999	$4,756,363
RI	-	$27,363,553	$28,658,134
PA	$3,939,302	$16,150,114	$ 2,704,945
Total	**$15,678,212**	**$68,439,901**	**$38,313,037**

See the following slides for a complete list of Redacted PCR recommendations.

MPT CONFIDENTIAL MPT_PROSPECT_00000069

THIRD PARTY REPORTS

Seismic Reports

MPT commissioned [Redacted] to conduct a Level 0 seismic assessment of all seven Prospect California campuses. Level 0 reports are considered a screening level review based upon general information about the building and site. The report allows MPT's risk management department to assess the current seismic insurance policy at each hospital to ensure the risk is accounted for.

- [Redacted] uses ST-Risk™ software to compile data from site surveys, seismic data, public records, building structure, date of construction, and several other building and site related determinants to perform risk analysis.
- The two measurements of risk used are the Scenario Expected Loss (SEL) and the Scenario Upper Loss (SUL). The SEL is a measure of the expected average damage of a building during a seismic event at a 50% confidence interval. This means 5 of 10 similar buildings will suffer damages at a greater ratio than the SEL. The SUL is a more conservative estimate of damage at a 90% confidence interval. This means only 10% of similar buildings will suffer a greater percentage of damage than the SUL ratio.
- The loss estimate is considered the approximate repair cost divided by the replacement cost of the building. The replacement cost of the building does not include the value of equipment and inventory, or the monetary loss from discontinued operations.

MPT Conclusions Per Terracon Consultants' Report

- Using the SUL, Terracon predicts a potential loss range from 15% at Los Angeles Community Hospital at Bellflower to 28% at Southern California Hospital at Hollywood.
- The average SUL can be estimated at approximately 22% with a 10% chance of being exceeded.
- MPT and Prospect reviewed property insurance policies and increased levels of earthquake insurance to mitigate the seismic risk of the California facilities.
- Prospect should ensure its California hospital buildings are seismically evaluated and retrofitted, if needed, to be in compliance with OSHPD SPC rating requirements.

Probable Structural Damage Estimate (as % of Replacement Cost)		
Hospital Campus	**Scenario Expected Loss**	**Scenario Upper Loss**
Los Angeles Community Hospital - Olympic		
• Hospital Building	11%	20%
• Parking Structure	13%	20%
Los Angeles Community Hospital – Bellflower	8%	15%
Los Angeles Community Hospital – Norwalk	14%	25%
Foothill Regional Medical Center	14%	24%
Southern California Hospital at Culver City		
• Pavilion	13%	23%
• Tower	14%	25%
• Single-Story Building	13%	20%
• Historic Building	13%	22%
• Warehouse	12%	20%
Southern California Hospital at Van Nuys	14%	25%
Southern California Hospital at Hollywood	16%	28%

Source: [Redacted] PSRA May, 2019.
Damage estimates shown is determined based on a seismic event that has a 10% chance of exceedance in a 50-year exposure period, or a 475-year return period.

MPT CONFIDENTIAL MPT_PROSPECT_00000070

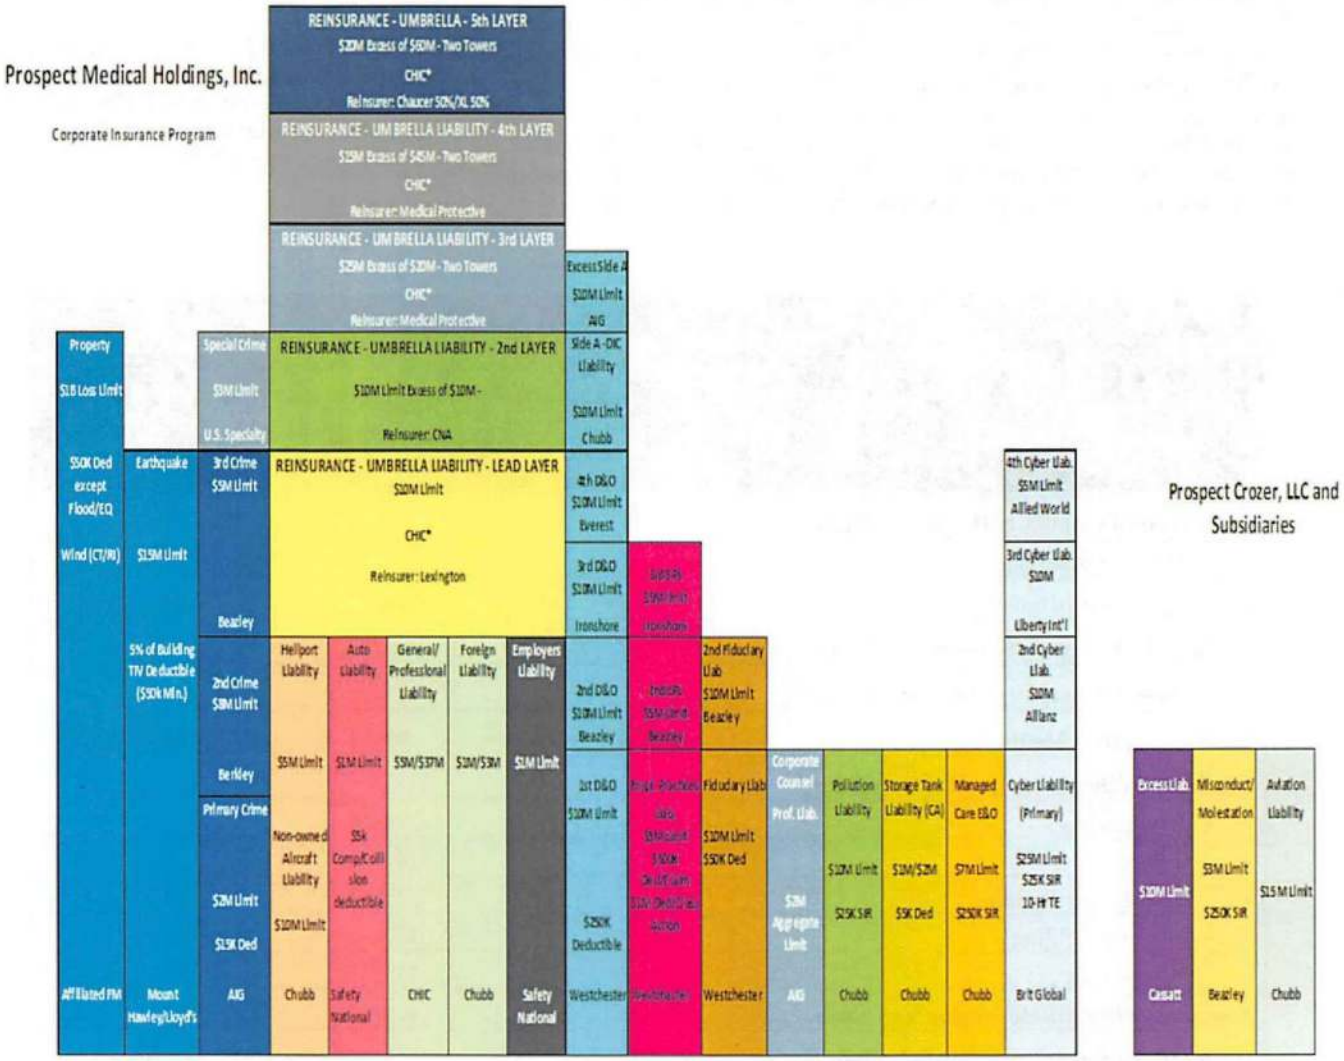
PROSPECT INSURANCE PROGRAM

Overview

The insurance program procured by Prospect is a comprehensive insurance arrangement with coverage and limits that are in line with what Risk Management would expect to see with respect to a healthcare company similar in size and scope of operations. A snapshot of Prospect's current program is included below.

It is important to note that Prospect's existing liability program maintains $80M in commercially insured Umbrella liability limits in excess of a $5M GL/PL self-insured retention with an annual aggregate retention limit of $37M.

Program Snapshot 2019-2020



NOTE: 1. CHIC (Connecticut Healthcare Insurance Company) is Prospect's Captive Insurer
2. Foreign Liability is maintained under a Foreign Package policy placed with Chubb
3. Upon closing, property insurance will be placed by MPT

MPT CONFIDENTIAL

Reimbursement

Hospitals have several major sources of reimbursement. Hospitals generally offer discounts from established charges to certain group purchasers of health care services, including private insurance companies, employers, health maintenance organizations, preferred provider organizations and other managed care plans. These discount programs typically limit the hospital's ability to increase revenues in response to increasing costs. Patients are generally not responsible for the total difference between established hospital gross charges and amounts reimbursed for such services under Medicare, Medicaid, HMOs, PPOs and other managed care plans, but are responsible to the extent of any exclusions, deductibles or coinsurance features of their coverage. The amount of such exclusions, deductibles and coinsurance continues to increase. Collection of amounts due from individuals is typically more difficult to obtain than from government health care programs or other third-party payers. Discounts are typically provided to uninsured patients who do not qualify for Medicaid or charity care under the hospital's charity care policy.

Medicare

In addition to the reimbursement reductions and adjustments discussed below, the Budget Control Act of 2011 (the "BCA") requires automatic spending reductions to reduce the federal deficit, including Medicare spending reductions of up to 2% per fiscal year, with a uniform percentage reduction across all Medicare programs. These automatic spending reductions began on March 1, 2013, with the Centers for Medicare and Medicaid Services ("CMS") imposing a 2% reduction on Medicare claims beginning on April 1, 2013. These reductions have been extended through 2027.

Inpatient Acute Care

Under the Medicare program, reimbursement is received under a prospective payment system ("PPS") for general, acute care hospital inpatient services. Under the hospital inpatient PPS, fixed payment amounts per inpatient discharge are established based on the patient's assigned Medicare severity diagnosis-related group ("MS-DRG"). MS-DRGs classify treatments for illnesses according to the estimated intensity of hospital resources necessary to furnish care for each principal diagnosis. MS-DRG weights represent the average resources for a given MS-DRG relative to the average resources for all MS-DRGs. MS-DRG payments are adjusted for area wage differentials. Hospitals, other than those defined as "new," receive PPS reimbursement for inpatient capital costs based on MS-DRG weights multiplied by a geographically adjusted federal rate. When the cost to treat certain patients falls well outside the normal distribution, providers typically receive additional "outlier" payments.

MS-DRG rates are updated, and MS-DRG weights are recalibrated, using cost-relative weights each federal fiscal year (which begins October 1). The index used to update the MS-DRG rates (the "market basket") gives consideration to the inflation experienced by hospitals and entities outside the health care industry in purchasing goods and services. Each federal fiscal year, the annual market basket update is reduced by a productivity adjustment based on the Bureau of Labor Statistics 10 year moving average of changes in specified economy-wide productivity, as required by the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010(collectively, the "Health Reform Law"). A decrease in payment rates or an increase in rates that is below the increase in the hospital's costs may adversely affect the result of operations.

For federal fiscal year 2018, CMS increased the MS-DRG rate by approximately 1.2%. This increase reflected a 2.7% market basket increase adjusted by the following percentage points: a 0.75 reduction required by the Health Reform Law, a negative 0.6 productivity adjustment, a further reduction of 0.6 to remove the effects of prior adjustments related to the "two midnight rule," and a positive 0.46 adjustment in accordance with the 21st Century Cures Act. Under the two midnight rule, services provided to Medicare beneficiaries are payable as inpatient hospital services only when there is a reasonable expectation that the hospital care is medically necessary and will be required across two midnights, absent unusual circumstances.

MPT CONFIDENTIAL MPT_PROSPECT_00000072

Inpatient Acute Care (continued)

For federal fiscal year 2019, CMS increased the MS-DRG rate by approximately 1.85%. This increase reflects a market basket update of 2.9%, adjusted by the following percentage points: a 0.75 reduction required by the Health Reform Law, a negative 0.8 productivity adjustment, and a positive 0.5 adjustment in accordance with the Medicare Access and CHIP Reauthorization Act of 2015 ("MACRA"). Additional adjustments may apply, depending on patient-specific or hospital-specific factors. For example, under the post-acute care transfer policy, Medicare reimbursement rates may be reduced when an inpatient hospital discharges a patient in a specific MS-DDRG to certain post-acute care settings, including effective October 1, 2018, hospice care.

CMS has implemented, or is implementing, a number of programs and requirements intended to transform Medicare from a passive payer to an active purchaser of quality goods and services. For example, hospitals that do not successfully participate in the Hospital Inpatient Quality Reporting Program are subject to a 0.25% reduction of the market basket update. Hospitals that do not demonstrate meaningful use of electronic health records ("EHR") are subject to a 0.75% reduction of the market basket update.

Medicare does not allow an inpatient hospital discharge to be assigned to a higher paying MS-DRG if certain designated hospital acquired conditions ("HACs") were not present on admission and the identified HAC is the only condition resulting in the assignment of the higher paying MS-DDRG. In this situation, the case is paid as though the secondary diagnosis was not present. There are currently 14 categories of conditions on the list of HACs. In addition, pursuant to the Health Reform Law, the 25% of hospitals with the worst risk-adjusted HAC scores in the designated performance period receive a 1% reduction in their inpatient PPS Medicare payments. CMS has also established three National Coverage Determinations that prohibit Medicare reimbursement for erroneous surgical procedures performed on an inpatient or outpatient basis.

The Health Reform Law also provides for reduced payments to hospitals based on readmission rates. Each federal fiscal year inpatient payments are reduced if a hospital experiences "excess" readmissions within the 30 day time period from the date of discharge for conditions designated by CMS. For federal fiscal year 2019, CMS has designated six conditions or procedures, including heart attack, pneumonia and total hip arthroplasty. Hospitals with what CMS defines as excess readmissions for these conditions or procedures receive reduced payments for all inpatient discharges, not just discharges relating to the conditions or procedures subject to the excess readmission standard. The amount by which payments are reduced is determined by assessing a hospital's performance relative to hospitals with similar proportions of dual eligible patients, subject to a cap established by CMS. The reduction in payments to hospitals with excess readmissions can be up to 3% of a hospital's base payments. Each hospital's performance is publicly reported by CMS.

In addition, pursuant to the Health Reform Law, CMS reduces the inpatient PPS payment amount for all discharges by 2.0%. The total amount collected from these reductions is pooled and used to fund payments to reward hospitals that meet certain quality performance standards established by CMS. CMS scores each hospital based on achievement (relative to other hospitals) and improvement ranges (relative to the hospital's own past performance) for each applicable performance standard. Because the Health Reform Law provides that the pool will be fully distributed, hospitals that meet or exceed the quality performance standards receive greater reimbursement under the value-based purchasing program than they would have otherwise.

Hospitals that do not achieve the necessary quality performance receive reduced Medicare inpatient hospital payments. Hospitals are scored on a number of individual measures that are categorized into four domains: clinical care; efficiency and cost reduction; safety and patient and caregiver experience of care. CMS estimates that $1.9 billion will be available to hospitals as incentive payments in federal fiscal year 2019 under the value-based purchasing program.

MPT CONFIDENTIAL MPT_PROSPECT_00000073

Outpatient

CMS reimburses hospital outpatient services (and certain Medicare Part B services furnished to hospital inpatients who have no Part A coverage) on a PPS basis. CMS uses fee schedules to pay for physical, occupational and speech therapies, durable medical equipment, clinical diagnostic laboratory services, non-implantable orthotics and prosthetics, freestanding surgery center services and services provided by independent diagnostic testing facilities.

In addition, certain items and services furnished by off-campus provider-based departments, subject to certain exceptions, are not covered as outpatient department services under the outpatient PPS. These services are reimbursed under the Medicare Physician Fee Schedule subject to adjustments as specified by CMS. In 2018, CMS finalized a rule that will reimburse clinic visit services provided at all off-campus provider-based departments at the Physician Fee Schedule rate, which is generally lower than the PPS rate. Previously, this rate did not apply to "excepted" provider-based departments. CMS will phase in the expansion of this site-neutral policy over two calendar years, beginning in 2019.

Hospital outpatient services paid under PPS are classified into groups called ambulatory payment classifications ("APCs"). Services for each APC are similar clinically and in terms of the resources they require. A payment rate is established for each APC. Depending on the services provided, a hospital may be paid for more than one APC for a patient visit. The APC payment rates are updated for each calendar year. Each calendar year, the annual market basket update is further reduced by a productivity adjustment based on the BLS 10-year moving average of changes in specified economy-wide productivity as required by the Health Reform Law. For calendar year 2018, CMS increased APC payment rates by an estimated 1.4%. The change reflected a market basket increase of 2.7% with a negative 0.6 percentage point productivity adjustment and a negative 0.75 percentage point adjustment required by the Health Reform Law, along with other payment adjustments and policy changes. For calendar year 2019, CMS increased APC payment rates by an estimated 1.35%. This increase reflects a market basket increase of 2.9% with a negative 0.8 percentage point productivity adjustment and a negative 0.75 percentage point adjustment required by the Health Reform Law. CMS requires hospitals to submit quality data relating to outpatient care to avoid receiving a 2.0 percentage point reduction in the annual payment update under the outpatient PPS.

Psychiatric

Inpatient hospital services furnished in psychiatric hospitals and psychiatric units of general, acute care hospitals are reimbursed on a PPS basis. The inpatient psychiatric facility ("IPF") PPS is based upon a per diem payment, with adjustments to account for certain patient and facility characteristics. The IPF PPS contains an "outlier" policy for extraordinarily costly cases and an adjustment to a facility's base payment if it maintains a full-service emergency department.

CMS has established the IPF PPS payment rate in a manner intended to be budget neutral. Each payment year, the Health Reform Law provides for the annual market basket update to be further reduced by a productivity adjustment based on the BLS 10-year moving average of changes in specified economy-wide productivity. For federal fiscal year 2018, CMS increased inpatient psychiatric payment rates by approximately 1.0%, which reflected a 2.6% IPF market basket update, reduced by a 0.6% productivity adjustment and by 0.75% as required by the Health Reform Law, among other payment adjustments. For federal fiscal year 2019, CMS increased IPF payment rates by an estimated 1.1%, which reflects a 2.9% IPF market basket update with a negative 0.8% productivity adjustment, a negative 0.75% adjustment as required by the Health Reform Law, and other payment adjustments. Inpatient psychiatric facilities are required to report quality measures to CMS to avoid receiving a 2.0% point reduction to the market basket update.

Physician Services

Physician services are reimbursed under the Physician Fee Schedule system, under which CMS has assigned a national relative value unit ("RVU") to most medical procedures and services that reflects the various resources required by a physician to provide the services, relative to all other services. Each RVU is calculated based on a combination of work required in terms of time and intensity of effort for the services, practice expense (overhead) attributable to the service and malpractice insurance expense attributable to the service.

MPT CONFIDENTIAL MPT_PROSPECT_00000074

Physician Services (continued)

These three elements are each modified by a geographic adjustment factor to account for local practice costs and then aggregated. While RVUs for various services may change in a given year, any alterations are required by statute to be virtually budget neutral, such that total payments made under the Physician Fee Schedule may not differ by more than $20 million from what payments would have been if adjustments were not made. CMS annually reviews resource inputs for select services as part of the potentially miss-valued code initiative. To determine the payment rate for a particular service, the sum of the geographically adjusted RVUs is multiplied by a conversion factor. For 2019, CMS updated the conversion factor based on the 0.25% increase required by the Bipartisan Budget Act of 2018 and a budget neutrality adjustment.

Medicare payments are adjusted based on participation in the Quality Payment Program ("QPP"), a payment methodology intended to reward high quality patient care. Physicians and certain other health care clinicians are required to participate in one of two QPP tracks. Under both tracks, performance data collected in each performance year will affect Medicare payments two years later. CMS expects to transition increasing financial risk to providers as the QPP evolves. The Advanced Alternative Payment Model ("APM") track makes incentive payments available for participation in specific innovative payment models approved by CMS. Providers may earn a 5% Medicare incentive payment between 2019 and 2024 and will be exempt from the reporting requirements and payment adjustments imposed under the Merit-Based Incentive Payment System ("MIPS") if the provider has sufficient participation (based on percentage of payments or patients) in an Advanced APM.

Alternatively, providers may participate in the MIPS track. Currently, providers electing this option may receive payment incentives or be subject to payment reductions of up to 5% of the provider's Medicare payments based on their performance with respect to clinical quality, resource use, clinical improvement activities, and meeting Promoting Interoperability standards related to the meaningful use of EHRs. The adjustment percentage will increase incrementally to 9% by 2022. MIPS consolidates components of three previously established physician incentive programs: the Physician Quality Reporting System, the Physician Value-Based Payment Modifier, and the Medicare EHR Incentive Program.

Other

Under PPS, the payment rates are adjusted for the area differences in wage levels by a factor ("wage index") reflecting the relative wage level in the geographic area compared to the national average wage level and taking into account occupational mix.

Medicare reimburses hospitals for a portion (65%) of bad debts resulting from deductible and coinsurance amounts that are uncollectable from Medicare beneficiaries.

CMS has implemented contractor reform whereby CMS competitively bids the Medicare fiscal intermediary and Medicare carrier functions to Medicare Administrative Contractors ("MACs"), which are geographically assigned across 12 jurisdictions to service both Part A and Part B providers.

CMS contracts with third parties to promote the integrity of the Medicare program through reviews of quality concerns and detections and corrections of improper payments. Quality Improvement Organizations ("QIOs"), for example, are groups of physicians and other health care quality experts that work on behalf of CMS to ensure that Medicare pays only for goods and services that are reasonable and necessary and that are provided in the most appropriate setting. Under the Recovery Audit Contractor ("RAC") program, CMS contracts with RACs on a contingency basis to conduct post-payment reviews to detect and correct improper payments in the fee-for-service Medicare program. The compensation for RACs is based on their review of claims submitted to Medicare for billing compliance, including correct coding and medical necessity, and the amount of overpayments and underpayments they identify. CMS limits the number of claims that RACs may audit by limiting the number of records that RACs may request from hospitals based on each provider's claim denial rate for the previous year.

MPT CONFIDENTIAL MPT_PROSPECT_00000075

Other (continued)

CMS has implemented the RAC program on a permanents, nationwide basis and expanded the RAC program to the Managed Medicare program and Medicare Part D. CMS is transitioning some of its other integrity programs to a consolidated model engaging Unified Program Integrity Contractors to perform audits, investigations and other integrity activities.

Managed Medicare

Under the Managed Medicare program, the federal government contracts with private health insurers to provide members with Medicare Part A, Part B and Part D benefits. Managed Medicare plans can be structured as HMOs, PPOs or private fee-for-service plans. In addition to covering Part A and Part B benefits, the health insurers may choose to offer supplemental benefits and impose higher premiums and plan costs on beneficiaries. CMS makes fee payment adjustments based on service benchmarks and quality ratings and publishes star ratings to assist beneficiaries with plan selection. According to CMS, over one-third of all Medicare enrollees participate in managed Medicare plans.

Medicaid

Medicaid programs are funded jointly by the federal government and the states and are administered by states under approved plans. Most state Medicaid program payments are made under a PPS or are based on negotiated payment levels with individual hospitals. Medicaid reimbursement is often less than a hospital's cost of services. The Health Reform Law, as enacted requires states to expand Medicaid coverage to all individuals under age 65 with incomes effectively at or below 138 of the federal poverty level ("FPL"). However, states may opt out of the expansion without losing existing federal Medicaid funding. A number of states have opted out of the Medicaid expansion, but these states could choose to implement the expansion at a later date. Some states use, or have applied to use, waivers granted by CMS to implement expansion, impose different eligibility or enrollment restrictions, or otherwise implement programs that vary from federal standards.

Because most states must operate with balanced budgets and because the Medicaid program is often the state's largest program, states can be expected to adopt or consider adopting legislation designed to reduce their Medicaid expenditures. Budgetary pressures have, in recent years, resulted and likely will continue to result in decreased spending, or decreased spending growth, for Medicaid programs in many states.

Federal funds under the Medicaid program may not be used to reimburse providers for medical assistance provided to treat certain provider preventable conditions. Each state Medicaid program must deny payments to providers for the treatment of health care-acquired conditions designated by CMS as well as other provider-preventable conditions that may be designated by the state.

Congress has expanded the federal government's involvement in fighting fraud, waste and abuse in the Medicaid program through the Medicaid Integrity Program. CMS employs UPICs to perform post-payment audits of Medicaid claims, identify overpayments, and perform other program integrity activities, many of which were previously performed by Medicaid Integrity Contractors. The UPICs collaborate with states and coordinate provider investigations across the Medicare and Medicaid programs. In addition, state Medicaid agencies are required to establish Medicaid RAC programs. These programs vary by state in design and operation.

Certificates of Need

In some states, the construction or expansion of health care facilities, the acquisition of existing facilities, the transfer or change of ownership, capital expenditures, and the addition of new beds or services may be subject to review by and prior approval of, or notifications to, state regulatory agencies under a CON program. Such laws generally require the reviewing state agency to determine the public need for additional or expanded health care facilities or services. Failure to provide required notifications or obtain necessary state approvals can result in the inability to expand facilities, complete an acquisition or expenditure or change ownership or other penalties.

MPT CONFIDENTIAL MPT_PROSPECT_00000076

Federal Health Care Program Regulations

Participation in any federal health care program, including the Medicare and Medicaid programs, is heavily regulated by statute and regulation. If a hospital fails to substantially comply with the numerous conditions of participation in the Medicare and Medicaid programs or performs certain prohibited acts, the hospital's participation in the federal health care programs may be terminated, and civil and/or criminal penalties may be imposed. Civil monetary penalties are adjusted annually based on updates to the consumer price index and were increased under the Bipartisan Budget Act of 2018.

Anti-kickback Statute

A section of the Social Security Act known as the "Anti-kickback Statute" prohibits providers and others from directly or indirectly soliciting, receiving, offering or paying any remuneration with the intent of generating referrals or orders for services or items covered by a federal health care program. Courts have interpreted this statute broadly and held that there is a violation of the Anti-kickback Statute if just one purpose of the remuneration is to generate referrals, even if there are other lawful purposes. Furthermore, the Health Reform Law provides that knowledge of the law or the intent to violate the law is not required. Violations of the Anti-kickback Statute may be punished by a criminal fine of up to $100,000 for each violation, imprisonment, substantial civil monetary penalties per violation that are subject to annual adjustment based on updates to the consumer price index and damages of up to three times the total amount of the remuneration and/or exclusion from participation in federal health care programs, including Medicare and Medicaid. In addition, violators may be subject to additional penalties under the federal False Claims Act ("FCA") as a false or fraudulent claim.

Stark Law

The Social Security Act also includes a provision commonly known as the "Stark Law." The Stark Law prohibits physicians from referring Medicare and Medicaid patients to entities with which they or any of their immediate family members have a financial relationship, if these entities provide "designated health services" reimbursable by Medicare or Medicaid, unless an exception applies. The Stark Law also prohibits entities that provide designated health services reimbursable by Medicare and Medicaid from billing the Medicare and Medicaid programs for any items or services that result from a prohibited referral and requires the entities to refund amounts received for items or services provided pursuant to the prohibited referral on a timely basis. "Designated health services" include inpatient and outpatient hospital services, clinical laboratory services and radiology services. Sanctions for violating the Stark Laws include denial of payment, substantial civil monetary penalties per claim submitted and exclusion from the federal health care programs. Failure to refund amounts received as a result of a prohibited referral on a timely basis may constitute a false or fraudulent claim and may result in civil penalties and additional penalties under the FCA. The statue also provides for a penalty for a circumvention scheme. These penalties are updated annually based on changes to the consumer price index.

Other Fraud and Abuse Provisions

Certain federal fraud and abuse laws apply to all health benefit programs and provide for criminal penalties. The Social Security Act also imposes criminal and civil penalties for making false claims and statements to Medicare and Medicaid. False claims include, but are not limited to, billing for services not rendered or for misrepresenting actual services rendered in order to obtain higher reimbursement, billing for unnecessary goods and services and cost report fraud. Federal enforcement officials have the ability to exclude from Medicare and Medicaid any investors, officers and managing employees associated with business entities that have committed health care fraud, even if the officer or managing employee had no knowledge of the fraud.

Managed Medicaid

Managed Medicaid programs enable states to contract with one or more entities for patient enrollment, care management and claims adjudication. The states usually do not relinquish program responsibilities for financing, eligibility criteria and core benefit plan design.

MPT CONFIDENTIAL MPT_PROSPECT_00000077

Managed Medicare (continued)

Enrollment in Managed Medicaid plans has increased in recent years, as state governments seek to control the cost of Medicaid programs. The provisions of these programs are state-specific. Many states direct managed care plans to pass through supplemental payments to designated providers, independent of services rendered, to ensure consistent funding of providers that serve large numbers of low-income patients. However, in an effort to more closely tie funds to delivery and outcomes, CMS began limiting these "pass-through payments" to managed Medicaid plans in 2016 and will ultimately prohibit such payments by 2027.

Accountable Care Organizations and Bundled Payment Initiatives

An Accountable Care Organization ("ACO") is a network of providers and suppliers that work together to invest in infrastructure and redesign delivery processes to attempt to achieve high quality and efficient delivery of services. Promoting accountability and coordination of care, ACOs are intended to produce savings as a result of improved quality and operational efficiency. ACOs that achieve quality performance standards established by Health and Human Services ("HHS") are eligible to share in a portion of the amounts saved by the Medicare program. There are several types of ACO programs, including the Medicare Shared Savings Program which was established pursuant to the Health Reform Law, and the Next Generation ACO Model.

HHS continues to focus on shifting from traditional fee-for-service reimbursement models to alternative payment models that tie reimbursement to quality and/or value, including bundled payment and pay-for-performance programs. Several private third-party payers are increasingly employing such reimbursement models, which may increasingly shift financial risk to providers.

Disproportionate Share Hospital Payments

In addition to making payments for services provided directly to beneficiaries, Medicare makes additional payments to hospitals that treat a disproportionately large number of low-income patients (Medicaid and Medicare patients eligible to receive Supplemental Security Income). Disproportionate Share Hospital ("DSH") payments are determined annually based on certain statistical information required by HHS and are calculated as a percentage addition to MS-DRG payments.

Hospitals that provide care to a disproportionately high number of low income patients may receive Medicaid DSH payments. The federal government distributes federal Medicaid DSH funds to each state based on a statutory formula. The states then distribute the DSH funding among qualifying hospitals. States have broad discretion to define which hospitals qualify for Medicaid DSH payments and the amount of such payments.

Annual Cost Reports

All hospitals participating in the Medicare and Medicaid programs, whether paid on a reasonable cost basis or under a PPS, are required to meet certain financial reporting requirements. Federal and, where applicable, state regulations require the submission of annual cost reports covering the revenues, costs and expenses associated with the services provided by each hospital to Medicare beneficiaries and Medicaid recipients. These annual cost reports are subject to routine audits, which may result in adjustments to the amounts ultimately determined to be due under these reimbursement programs.

Managed Care and Other Discounted Plans

The hospitals offer discounts from established charges to certain large group purchasers of health care services, including managed care plans and private insurance companies. There is no assurance that these plans will increase their rates in the future although they have done so in the past. It is not clear what impact, if any, health reform efforts at the federal and state levels, consolidation within the third-party payer industry and vertical integration among third-party payers and health care providers will have on the company's ability to negotiate reimbursement rates.

MPT CONFIDENTIAL MPT_PROSPECT_00000078

Uninsured and Self Pay Patients

Self-pay revenues are derived from providing health care services to patients without health insurance coverage and from the patient responsibility portion of payments for health care services that are not covered by an individual's health plan. Collection of amounts due from individuals is typically more difficult than collection of amounts due from government health care programs or private third party payers. Any increases in uninsured individuals, changes to the payer mix or greater adoption of health plan structures that result in higher patient responsibility amounts could increase amounts due from individuals.

A high percentage of uninsured patients are initially admitted through emergency rooms. The Emergency Medical Treatment and Labor Act ("EMTALA") requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency room for treatment, and if the individual is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the individual to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions exists regardless of an individual's ability to pay for treatment. The Health Reform Law requires health plans to reimburse hospitals for emergency services provided to enrollees without prior authorization and without regard to whether a participating provider contract is in place. The financial impact of the obligation to screen for and stabilize emergency medical conditions has been offset, in part, by provisions of the Health Reform Law that decrease the number of uninsured individuals. However, effective January 1, 2019, Congress eliminated the financial penalty associated with the individual mandate. Further, final rules issued in 2018 expand the availability of association health plans and allow the sale of short-term, limited-duration health plans, neither of which are required to cover all of the essential health benefits mandated by the Health Reform Law. It is difficult to predict the impact of these changes, but they may result in fewer individuals electing to obtain public or private health insurance or affect the scope of such coverage, if purchased.

Regulation and Other Factors

Licensure, Certification and Accreditation

Health care facility construction and operation are subject to numerous federal, state and local regulations relating to the adequacy of medical care, equipment, personnel, operating policies and procedures, maintenance of adequate records, fire prevention, rate-setting and compliance with building codes and environmental protection laws. Facilities are subject to periodic inspection by governmental and other authorities to assure continued compliance with the various standards necessary for licensing and accreditation. Hospitals are properly licensed under applicable state laws. Hospitals are eligible to participate in Medicare and Medicaid programs and are accredited by The Joint Commission. If a hospital loses its Medicare or Medicaid certification, the facility would be unable to receive reimbursement from federal health care programs. If a hospital loses accreditation, the facility would be subject to state surveys, increased scrutiny by CMS and likely lose payment from private third-party payers.

5 Acute Care Facilities (876 licensed beds)

- Southern California Hospital at Hollywood – 100 beds
- Southern California Hospital at Culver City – 420 beds
- Los Angeles Community Hospital – 129 beds
- Los Angeles Community Hospital at Norwalk – 50 beds
- Foothill Regional Medical Center – 177 beds

2 Behavioral Health Facilities (201 licensed beds)

- Southern California Hospital at Van Nuys – 57 beds
- Los Angeles Community Hospital at Bellflower – 144 beds

Large IPA Network with Strong Primary Care Base

- In addition to owning a number of IPA groups in CA, Prospect provides management services for affiliated IPAs that are not owned by Prospect.
- Coordinated movement between 7 facilities and IPAs allow patients to receive effective and efficient care.

Serves Large Medicare & Medicaid Managed Care Population under Risk Arrangements

- Prospect Hospitals are designed to operate at low cost and focus on the primary medical needs of residents.
- Prospect Hospitals serve low-income residents reflecting their heavily Medi-Cal payor mix.
- Prospect Hospitals benefit from California Provider Fee payments.
- Strategic relationship with Medicaid Health Plans and contracts with most major health plans.
- Receives approximately $70M per year from California QAF.

Projecting Strong Growth YoY

(in millions)	Year 1[(1)]	Year 2	Year 3
Net Revenues	$719.4	$731.0	$743.1
Expenses	$578.4	$583.9	$591.2
EBITDAR[(2)]	$141.0	$147.1	$151.9

1) Year 1 timeframe is Q4 FY19-Q3 FY20. Projections include all 7 hospitals and CA corporate.
2) Adjusted EBITDA per Prospect's projections that do not include rent expense.
Note: Strategic initiatives driving growth outlined on Page 66.

CALIFORNIA HOSPITAL SYSTEMS

Market Overview

Hospital Operations

- Prospect California has 3 distinct systems: ALTA (Los Angeles Community Hospitals), Southern California Hospitals, and Foothill Regional Medical Center.
- LA Market is fragmented by multiple well-known systems. No single hospital or system holds the dominate market share.
- Most area hospitals operate at a higher cost structure than Prospect, offering specialized clinical services with Medi-Cal representing a relatively small proportion of their patients.
- Prospect continues to grow its behavioral health programs as the need continues to increase in underserved markets.
- Prospect relies on Medi-Cal capitation payments from risk-based managed care plans in LA and Orange County.

MPT CONFIDENTIAL

Strategic Initiatives

Revenue Cycle Improvements

- Prospect's California hospitals are projecting an additional $1.75M annually in EBITDAR from an increase in cash collections, driven by bad debt reduction and denials management.
  - ALTA Hospitals account for $986k.
  - Southern California Hospitals account for $291k.
  - Foothill Regional Medical Center accounts for $474k.
- Hired new Corporate Revenue Cycle leader who has implemented new data analytic tools enabling operational focus on root causes of denials.
- Creation of a billing analyst position as well as a centralized financial clearance center to streamline processing of denials and rejection and ensure clean claims are sent to payors.
- Greater emphasis on appropriately placing patients in observation, which is expected to help reduce denials.
- Increased focus on case management, with replacement of leaders across the organization, enhanced training, and additional physician advisors to review cases.

Managed Care Contracts

- Prospect's California hospitals are projecting an additional $1.57M annually in EBITDAR from 2019 rate increases with managed care providers.
  - ALTA Hospitals account for $1,005k.
  - Southern California Hospitals account for $483k.
  - Foothill Regional Medical Center accounts for $78k.
- These contracts have been fully negotiated and executed; effective June 2019.
- Redacted

Market Share	9.1%

(1) Includes 91 acute beds and 39 sub-acute beds.

Overview

Los Angeles Community Hospital (LACH) is a 129-bed acute care hospital located in East Los Angeles, CA.

- Located approximately 5 miles from Los Angeles city center.
- Operates under one license as the ALTA system, along with Los Angeles Community Hospitals at Norwalk and Bellflower.

Low-Cost Provider in High Medi-Cal Population

- Partners with various Health Science Colleges to employ Licensed Vocational Nurses (LVNs) with lower labor costs than Registered Nurses (RNs).
- Minimal infrastructure keeps fixed costs down.
- An estimated 24% of the PSA population is in poverty, with an average household size of 4.1 (U.S. average is 2.6).

Integrated with Providers and Community

- Excellent relationships with entities providing post-acute care which has been critical for successful case management and shorter LOS.
- Utilize entire hospital system to ensure the patient is aligned with the appropriate care and facility.
- Fosters relationships with doctors through the IPAs and nurses through hospital partnerships.

Consistent High Census

- Nearby hospitals such as UCLA Medical Center and Cedars-Sinai transfer Medi-Cal patients to the facility.
- Closing of 10 hospitals within a 10 mile radius over the past 20 years has driven strong volume growth.

Active Sub-Acute Unit

- 39-bed sub-acute unit where 37 to 38 of the beds are consistently occupied.
- Received a 5-star rating by the CMS in January of 2019.

Recent/Upcoming Capital Expenditures

- Future capital expenditures include bringing a CT Unit in-house and remodeling the physical plant.
- Future initiatives include a new emergency generator, new ultrasound equipment, and a new patient central monitoring system.

MPT CONFIDENTIAL

LOS ANGELES COMMUNITY HOSPITAL

Strengths	Weaknesses
1. Profitable operations as a low-cost provider, driven by minimal infrastructure and aggressive case management 2. Utilize Stratus Video Application to bridge language barriers between patients and physicians 3. Reduced competition due to 10 hospitals in a 10 mile radius closing within the past 20 years, driving a 95% occupancy 4. Vertical integration with post-acute facilities and health plans	1. Rely heavily on timing of QAF payments, which often have delays 2. Non-ER receiving center – relies on emergencies from neighboring hospitals 3. Growing homeless population may lead to difficulty in managing LOS and discharges
Opportunities	**Threats**
1. Potential cost savings by bringing CT in-house 2. Continued partnership with other large CA systems to transfer Medi-Cal patients to LACH 3. Growth of ENT program and face and neck surgeries	1. Changes in government reimbursement 2. Readmission rates are high, leading to penalization in 2018

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. LACH's operations can withstand delays in supplemental reimbursement by focusing on core infrastructure and maintaining profitability before the receipt of QAF distributions.
2. Transfers from other hospitals within the ALTA system can be received in the emergency department before admittance to the hospital is finalized.
3. Prospect's contracts with various hospitals in Los Angeles, which are typically used to direct patients to LACH, can be used to help place patients in appropriate facilities to ensure proper care.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. LACH is reducing readmission rates by leveraging observation stays and enhancing transitional care opportunities with community providers.

LOS ANGELES COMMUNITY HOSPITAL AT NORWALK

13222 Bloomfield Avenue
Norwalk, CA 90650

Beds	50
Square Feet[1]	25,981
Year Built [2]	1954
Market Share	9.1%

(1) *Hospital SF only; Property totals 168,058 SF.*
(2) *Facility Upgrades were made in 1974, 1982, 1983, 1985.*

Overview

Los Angeles Community Hospital at Norwalk is a 50-bed acute care hospital located in Norwalk, Los Angeles, CA.

- Located east of Bellflower and southeast of Los Angeles, this area is one of the most densely populated areas within LA.
- Operates under the Los Angeles Community Hospital license.

Low-Cost Provider in High Medi-Cal Population

- Minimal infrastructure keeps fixed costs down.
- Large, underserved, transient population that keeps facility census near capacity.
- Under-utilized 7-bed pediatric unit; plans are to close service.
- 2018 estimated per capita income for Norwalk City is approximately $13.3k lower than California overall ($19,282 in Norwalk City and $32,374 in CA).

First Responder Lounge

- Introduction of a lounge for first responders who previously had needed to wait outside of the ED when on duty.
- Lounge was opened in January 2018.

Recent/Upcoming Capital Expenditures

- Future capital expenditures include bringing a CT Unit in-house and remodeling the physical plant.
- Future initiatives include a new emergency generator, new ultrasound equipment, and a new patient central monitoring system.

MPT CONFIDENTIAL MPT_PROSPECT_00000086

LOS ANGELES COMMUNITY HOSPITAL AT NORWALK

Strengths	Weaknesses
1. Profitable operations as a low-cost provider, driven by minimal infrastructure 2. Utilize Stratus Video Application to bridge language barriers between patients and physicians 3. Integration within Prospect's CA system can facilitate transfers between facilities to ensure patients needs are met 4. More profitable payor mix than other ALTA hospitals	1. Rely heavily on timing of QAF payments, which often have delays 2. Crowded facility with patient rooms often housing 4 patients or more
Opportunities	**Threats**
1. Potential cost savings by bringing CT in-house 2. Continued partnership with other large CA systems to receive transfers of Medi-Cal patients	1. Changes in government reimbursement 2. Potential high unforeseen cap-ex costs associated with age of building

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Norwalk's operations can withstand delays in supplemental reimbursement by focusing on core infrastructure and maintaining profitability before the receipt of QAF distributions.
2. High census combined with a drive to lower Length of Stay (LOS) increases the QAF payments allocated to Norwalk.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. Norwalk can mitigate potential capital project expenditures associated with an aging building by aligning the construction timing with QAF and other supplemental payments.

MPT CONFIDENTIAL MPT_PROSPECT_00000087

LOS ANGELES COMMUNITY HOSPITAL AT BELLFLOWER

9542 Artesia Boulevard
Bellflower, LA 90706

Beds[1][2]	32
Square Feet	47,858
Year Built	1972
Market Share	9.1%

(1) All beds in service are inpatient psychiatric beds.
(2) An additional 112 beds are suspended, for a total of 144 licensed beds.

Overview

LA Community Hospital at Bellflower is a 2-story, 32-bed behavioral health hospital located 10 miles Southwest of downtown Los Angeles.

- After operating as a general acute facility for more than 60 years, Prospect purchased Bellflower out of bankruptcy in 2013.
- Due to implications of seismic regulations, Prospect eventually decided to convert its patients beds and operate exclusively as a behavioral health facility.
- The Bellflower facility shares its hospital license with Norwalk and LA Community Hospital.

Clinical Operations

- Bellflower operates as a voluntary admission behavioral health center.
- As Bellflower does not have any emergency services, the majority of admissions are driven through referrals from nearby acute care hospitals – not limited to Prospect-operated facilities.
- Bellflower typically sees 85-95% occupancy levels and a cyclical stream of returning patients that need recurring care.

Strengthening Market Position

- Niche position in the LA market as the premier low-cost Medi-Cal-based provider. Nearly all competitors in the market have shut down their behavioral health units, with some facilities now directing patients towards Prospect facilities.
- Additionally, Prospect's continuum of care across Los Angeles allows patients to be retained within the system as the patients are directed towards the Prospect facility that best meets the patient's needs.
- Bellflower's primary competitor is College Hospital Cerritos that operates 2 behavioral health units in the market. These units run at full capacity. However, market demands continue to be high for behavioral service.

Facility Expansion

- Bellflower's operations encompass only a fraction of the available space in the hospital itself. Bellflower is in the design-stage for an additional 60-bed expansion between the 1st and 2nd floors. Expected construction budget is $9-11M with a timeline of 1-2 years.

- Intensive Outpatient Program
- Medication Management

(1) FY2018 Annual Admissions as provided by Prospect

MPT CONFIDENTIAL MPT_PROSPECT_00000088

LOS ANGELES COMMUNITY HOSPITAL AT BELLFLOWER

Strengths	Weaknesses
1. Profitable operations 2. Currently operating near full occupancy 3. Facility located in appropriate area for population which it serves	1. Large underutilized campus 2. Poor reputation due to bankruptcy in 2013
Opportunities	**Threats**
1. 60 bed expansion 2. Affiliation with nearby academic institutions 3. High demand in market for behavioral health services	1. Changes in government reimbursement 2. OSHPD intervention may delay expansion capabilities 3. Cyclical volume due to timing of government assistance income 4. Located in competitive market

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Bellflower can better utilize its campus by following through on its plan to add additional behavioral health beds.
2. Bellflower can improve its reputation by continuing to offer quality services and meeting community needs.

Mitigants to the threats identified during the SWOT analysis are:

1. Bellflower can weather changes in government reimbursement by focusing on core operations and maintaining profitability before the receipt of QAF distributions.
2. Bellflower can expedite potential capital projects by aligning with and preparing for OSHPD regulations.
3. Bellflower can mitigate cyclical volume by increased provider-patient communication and patient education.
4. High demand drives consistently strong occupancy despite multiple competitors.

MPT CONFIDENTIAL MPT_PROSPECT_00000089

SOUTHERN CALIFORNIA HOSPITAL AT CULVER CITY

3828 Delmas Terrace
Culver City, CA 90232

Beds	420
Square Feet	273,944
Year Built	1969
Market Share	9.1%

Overview

Southern California Hospital at Culver City is a 420-bed acute care hospital, located in a well-maintained commercial area within Culver City.

- Originally owned by Dr. David Brotman, Prospect acquired the facility out of bankruptcy from Tenet Healthcare in 2009.
- Operates under one license as the Southern California hospital system, along with Southern California Hospitals at Norwalk and Van Nuys.

Clinical Operations

- Facility offers cutting edge surgical procedures, including its gender confirmation surgery.
- Approximately 30-45% of Culver City's admissions come from IPAs, with the rest of admissions through the ED, primary care physicians, and Skilled Nursing Facilities ("SNF").
- Operates eight ORs, has capacity for two Cath Labs (one currently non-operational), and manages a high-acuity behavioral health unit.

Culver City Market

- Due to close proximity to Hollywood and its growing tech industry, this area is experiencing a positive change in real estate and population.

Physician Relationships

- Over 15 IPA partnerships with LA Care providing the largest share of covered lives.
- Through capitation agreements, these IPAs direct ~30k covered lives to Culver City.
- Despite competing with large systems like UCLA and Cedars for physicians, Prospect has found that many physicians are frustrated with big systems and prefer physician-centric hospitals such as Culver City.

Capital Addition Needs

- Several near-term capital projects with a total budget of ~$4-5M have been identified including: Cardiac Cath Lab, elevator renovations, roof replacement, and pharmacy clean room.
- Future objectives include expansion of the Emergency Department to create more efficiency for both patients and EMS.

Southern CA Hospital at Culver City

(1) FY2018 Annual Admissions as provided by Prospect

MPT CONFIDENTIAL MPT_PROSPECT_00000090

SOUTHERN CALIFORNIA HOSPITAL AT CULVER CITY

Strengths	Weaknesses
1. Profitable operations as a low-cost provider, driven by minimal infrastructure 2. No significant IT investments needed 3. Strong physician relationships 4. High real estate value due to growth of Culver City	1. Low brand recognition due to recent facility name change 2. Slow growth of high margin surgical procedures 3. Emergency Room is not easily accessible and detached from main tower
Opportunities	**Threats**
1. Marketing of gender confirmation program 2. Strengthen relationship with LA Care & other IPAs 3. Continuing to draw business through ER by removing locked psych unit 4. Applying for stroke designation which should increase EMS runs	1. Changes in government reimbursement 2. Main competitors in the market are moving to closed medical staff models causing pressure on IPAs 3. Direct competition with academic systems and other for profit systems for surgical volumes

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Culver City can increase its brand recognition by continuing to offer high-quality services and participating in community engagement programs.
2. Culver City can increase its volume of high margin surgical programs by continuing to market and refine its approach towards its spine and gender confirmation procedures and reopening one non-operational Cath Lab.
3. Culver City can mitigate emergency room accessibility by following through on the plan to renovate / rebuild the exterior entrance to the emergency department.

Mitigants to the threats identified during the SWOT analysis are:

1. Culver City can weather changes in government reimbursement by focusing on core operations and maintaining profitability before the receipt of QAF distributions.
2. Culver City can avoid the loss of affiliated physicians by continuing to expand its network of IPAs, and by increasing admissions from other avenues such as the ER.
3. Culver City can continue to establish relationships with large market players to capture the underserved patient population.

MPT CONFIDENTIAL MPT_PROSPECT_00000091

SOUTHERN CALIFORNIA HOSPITAL AT HOLLYWOOD

6245 De Longpre Avenue
Los Angeles, CA 90028

Beds	100
Square Feet	48,710
Year Built	1962
Market Share	9.1%

Overview

Southern California Hospital at Hollywood is a 100-bed acute care hospital, located in the affluent Hollywood area.

- Established in the early 1960s, this facility was historically known as a center of HIV/AIDS treatment in the heart of Hollywood.
- Caters to specialized needs of the community, including several services for LGBT healthcare.

Clinical Operations

- General acute services are the primary base of operations.
- Facility offers some cutting edge surgical procedures, including its gender confirmation surgery.
- Majority of admissions come from referrals from nearby SNFs.
- Hollywood does not have an emergency room, but instead offers urgent care services that yield a lower reimbursement rate.

Hollywood Market

- Flourishing market can be attributed to the arrival of major tech players in the immediate area, including Amazon, Apple, and Google, and has brought young, well-insured professionals to the area.
- Main competitors for this facility include Silver Lake Medical Center, Olympia Medical Center (MPT-owned), and Hollywood Presbyterian Medical Center.

Physician Relationships

- Facility has 15 active admitting doctors, six of which are major contributors, all of which are affiliated with Prospect owned and managed IPAs.
- Many of these physicians provide services to SNFs in the area.
- Hollywood's health care function is largely geriatric in nature.

Focus on Facility Conditions

- Utilizing employee feedback, Hollywood's management team is working to improve patient and employee experience.
- Improvement initiatives include staff recognition, updated equipment, patient and employee rounding, and tech integration.

1) Facility Level payor mix for Q2 2019 YTD as presented by Prospect

MPT CONFIDENTIAL MPT_PROSPECT_00000092

SOUTHERN CALIFORNIA HOSPITAL AT HOLLYWOOD

Strengths	Weaknesses
1. Profitable operations as a low-cost provider, driven by minimal infrastructure 2. Innovative service lines including gender confirmation 3. Strong focus on increasing employee satisfaction to reduce turnover 4. No significant IT investments needed	1. High employee turnover 2. Aging physical plant 3. No Emergency Room therefore all inpatients must be referred by a physician
Opportunities	**Threats**
1. High real estate value 2. Marketing of gender confirmation program 3. Continue improvement in public perception driven by patient satisfaction ratings	1. Changes in government reimbursement 2. Target population may be displaced by rising real estate costs 3. Reliance on IPA relationships with SNFs in the area to drive patient volume

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Hollywood can decrease employee turnover by continuing to focus on improving patient and employee satisfaction levels.
2. Hollywood can mitigate aging physical plant by engaging in capital addition and renovation projects.
3. Management is considering the build out of an emergency department on campus.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. Hollywood will continue to partner with SNFs throughout Los Angeles to maintain a strong patient base.
3. Prospect continues to grow its IPAs, which include SNF Physicians, to drive persistent improvement of patient retention.

MPT CONFIDENTIAL MPT_PROSPECT_00000093

SOUTHERN CALIFORNIA HOSPITAL AT VAN NUYS

14433 Emelita Street
Van Nuys, CA 90401

Beds[1]	57
Square Feet	38,850
Year Built	1958
Market Share	9.1%

(1) All beds in service are inpatient psychiatric beds.

Overview

Southern California Hospital at Van Nuys is a 57-bed behavioral health hospital located in Van Nuys, CA.

- Located approximately 15 miles Northwest of Los Angeles city center, Van Nuys is considered to be within Los Angeles city limits.
- An estimated 20% of the population within Los Angeles City limits is in poverty, with an average per capita income of $30,570. [1]
- Approximately 60% of the population speaks a language other than English at home. [1]
- Operates under one license as the Southern California system, along with Southern California Hospitals at Culver City and Hollywood.

Successful Intensive Outpatient Program (IOP)

- Provides independence for patients to live on their own and reduces the need for future hospitalization.
- Operates 5 days a week with approximately 50-60 patients per day.

Financial Performance and Strategies

- Declines in 2019 FYTD due to increased expenses.
- While YTD inpatient admissions are up 0.1% YoY, IOP visits have decreased.

Capital Expenditures

- Several capital investments are planned or underway, including parking lot improvements, replacement of fan coil units, and locking doors in Unit 1 and the lobby.
- Larger renovations include a $700k HVAC addition in the kitchen and roof replacements (planned in 3 stages).

Voluntary Inpatient Program

- 24 hour nursing and psychiatry services allow patients to call in at any time. Inpatient program sees an average length of stay of 5.4 days.
- Declines in census at month end are attributed to patients checking out as their government checks arrive.

Southern CA Hospital at Van Nuys

Hospital Main Entrance

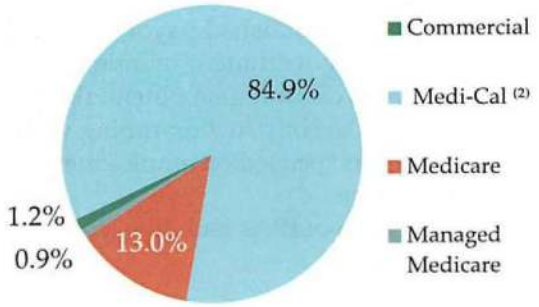
Admission Stats [2]

- Annual Admits: 3,400
- Recurring IOP Visits: 34,300

Service Lines

- Outpatient Adult Psychiatry (Chemical Dependency Track)
- Inpatient Adult Psychiatry

Payor Mix (by Admissions)[1]



1) Facility Level payor mix for Q2 2019 YTD as presented by Prospect

(1) Source: SiteWise
(2) FY2018 Annual Admissions as provided by Prospect

MPT CONFIDENTIAL MPT_PROSPECT_00000094

SOUTHERN CALIFORNIA HOSPITAL AT VAN NUYS

Strengths	Weaknesses
1. Profitable Operations as a low-cost provider, driven by minimal infrastructure 2. Integration within Prospect's CA system to allow for transfers depending on patient needs 3. Patient satisfaction is above 95% 4. No significant IT investments needed	1. Rely heavily on timing of QAF payments, which often have delays 2. Census drops at end of month as government checks are released
Opportunities	**Threats**
1. Potential expansion of Intensive Outpatient Program ("IOP") to include nights and weekends 2. Management focus on increasing managed care volumes	1. Changes in government reimbursement 2. Potential high unforeseen cap-ex costs associated with age of building 3. Largely unionized labor force 4. One of four psychiatrists is nearing retirement age, and management believes it to be a difficult position to fill

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Van Nuys' operations can withstand delays in supplemental reimbursement by focusing on core infrastructure and maintaining profitability before the receipt of QAF distributions.
2. Given the known cyclical nature of the census drops, Prospect is able to adjust staffing and other variable expenses as needed.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. Van Nuys can mitigate potential capital project expenditures associated with an aging building by aligning the construction timing with QAF and other supplemental payments.
3. Prospect is focused on employment engagement to reduce turnover and provide support for employee satisfaction.
4. Integration of IPAs and Physician Groups allows for an extensive network of qualified physicians for replacement.

MPT CONFIDENTIAL MPT_PROSPECT_00000095

FOOTHILL REGIONAL MEDICAL CENTER

14662 Newport Avenue
Tustin, CA 92780

Beds[1]	177
Square Feet	104,000
Year Built	1972
Market Share	9.1%

(1) Includes 120 general acute, 15 intensive care, and 42 pediatric sub-acute beds.

Overview

Foothill Regional Medical Center is an acute care hospital and only Prospect facility located in Orange County, CA.

- Prospect purchased Foothill out of bankruptcy in 2014, and began to slowly reintroduce various service lines while undergoing renovations of the entire facility before re-opening in October 2015.
- Licensed for 177 beds, but there are currently 46 beds in suspension.
- 2018 estimated per capita income for Orange County is approximately $4,500 higher than California overall ($36,922 in Orange County and $32,374 in CA).
- Operates under a separate license than the other 2 California systems.

Serves Niche Market with Pediatric Sub-Acute Unit

- One of six Pediatric Sub-Acute units in California.
- Recently negotiated a 36% increase in per diem for patients with Cal-Optima, an Orange County specific branch of Medi-Cal.
  - Approximately 80% of the unit is covered by Cal-Optima, leading to an estimated $2.7M annual increase in EBITDA.

Development of New Service Lines

- Planning to bring 24 chemical dependency beds out of suspension and run a detox program.
- In process of applying for spine and orthopedic program.
- Beta testing a surgical Personal Injury and Workers Comp Program.
  - Program is anticipated to bring in 150% of Medicare, with a goal to sell and settle the contracts within 30 days.
- Negotiating a "Concierge Program" to bring cash-paying patients from China for various surgical services.

Recent/Upcoming Capital Expenditures

- $960k in planned CapEx to bring two units out of suspension.
- Additional capital projects include a $208k remodel of the lobby and approximately $647k various utility replacements and upgrades.

Foothill Regional Medical Center

Private Patient Room

Admission Stats[1]

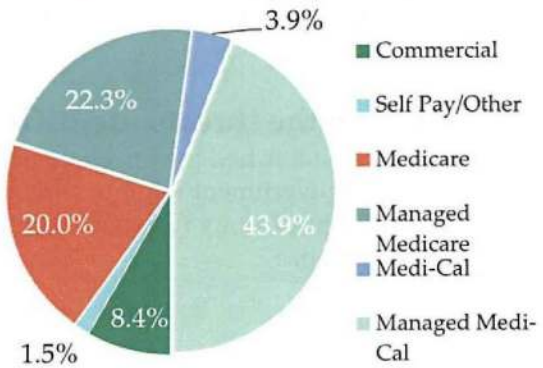
- Acute Admits: 2,800
- Pediatric Sub-Acute Admits: 17
- Annual ED Visits: 5,000

Key Services

- Pediatric Sub-Acute
- Urology
- Inpatient Geriatric and Adult Care
- Intensive Care
- Bariatric Surgery

(1) FY2018 Annual Admissions as provided by Prospect

Payor Mix (by Admissions)[1]



1) Facility Level payor mix for Q2 2019 YTD as presented by Prospect

MPT CONFIDENTIAL

FOOTHILL REGIONAL MEDICAL CENTER

Strengths	Weaknesses
1. Profitable operations as a low-cost provider, driven by minimal infrastructure 2. Utilize Stratus Video Application to bridge language barriers between patients and physicians 3. No significant IT investments needed 4. Pediatric sub-acute unit is one of six in California 5. Strong nurse retention 6. Recently renovated OR driving increase in surgical procedures	1. Rely heavily on timing of QAF payments, which often have delays 2. Previously poor reputation within the community has driven a low census
Opportunities	**Threats**
1. Reintegrate 2 units (46 beds), which are currently in suspension, including a 24 bed chemical detox unit 2. Identified IPA expansion with physicians in Orange County 3. 25% of Orange County population is enrolled in Medi-Cal providing growth market for Prospect 4. Target Medi-Cal mental health and physical health plan providers in Orange County 5. Capitalize on QAF, given that current patient mix is predominately Medi-Cal	1. Changes in government reimbursement 2. Proximity and lack of integration with other Prospect facilities in California

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Prospect has implemented a positive marketing campaign and is heavily involved in the community.
2. Foothill's operations can withstand delays in supplemental reimbursement by focusing on core infrastructure and maintaining profitability before the receipt of QAF distributions.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. Prospect's opportunity to extend their model of integrating with post-acute facilities to the Orange County region.

MPT CONFIDENTIAL MPT_PROSPECT_00000097

EASTERN CONNECTICUT HEALTH NETWORK

System Overview

2-Hospital System East of Hartford, CT

- 2 acute care hospitals (351 licensed beds) located 2 miles apart along I-384 and CT Route 44.
  - Manchester Memorial Hospital – 249 beds
  - Rockville General Hospital – 102 beds
- Shared leadership team manages both hospitals.
- Network of patient access points surrounding hospitals that include urgent care centers, medical office buildings and imaging centers.

Large IPA with Strong Physician Retention

- IPA includes over 290 physicians
- Physician retention rate is 95%
- Currently no risk-based contracts

Strong Ties Within Community

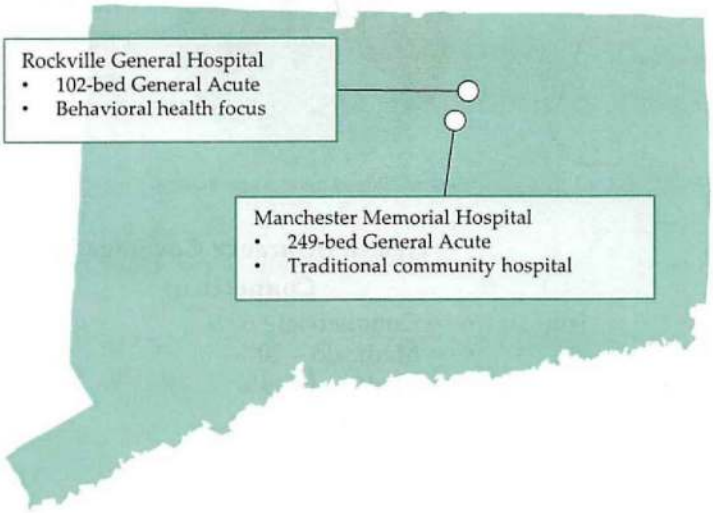
- Both hospitals have been in existence in their respective communities for almost one hundred years.
- Eastern Connecticut Health Network (ECHN) was founded in 1995, merging both hospitals under single leadership. Each hospital still has a separate license as the state denied granting a singular license.
- Facilities are needed within the communities as they serve a high Medicare and Medicaid population.

Manchester Memorial Hospital

Projecting Strong Revenue and EBITDAR Growth

(in millions)	Year 1[1]	Year 2	Year 3
Net Revenues	$307.3	$316.5	$324.4
Expenses	$277.1	$283.2	$287.8
EBITDAR[2]	$30.2	$33.3	$36.6

1) Year 1 timeframe is Q4 FY19-Q3 FY20. Projections include both hospitals.
2) Adjusted EBITDA per Prospect's projections do not include rent expense.
Note: Strategic initiatives driving growth outlined on Page 83.



Rockville General Hospital

MPT CONFIDENTIAL MPT_PROSPECT_00000098

EASTERN CONNECTICUT HEALTH NETWORK

Market Overview

- Manchester Memorial Hospital is located in an area with a middle and upper-middle class population.
- Rockville General Hospital is located in an area with a heavier concentration of working class individuals and is more rural than Manchester.
- Primary competition is Hartford HealthCare as they have a large presence in the state and two facilities on the outskirts of the primary service area.
- The median household income in the primary service area is well above the national figure.

Strategic Initiatives

Managed Care Contracts

A $6.5M EBITDAR pickup is expected, due to favorable rate increases with managed care providers. Contracts with United Healthcare, Oxford, Aetna, Connecticare, Anthem, and Cigna have been fully negotiated and executed. The rate increases for these contracts range from 3.40% to 9.00%.

Expense Initiative - SWB

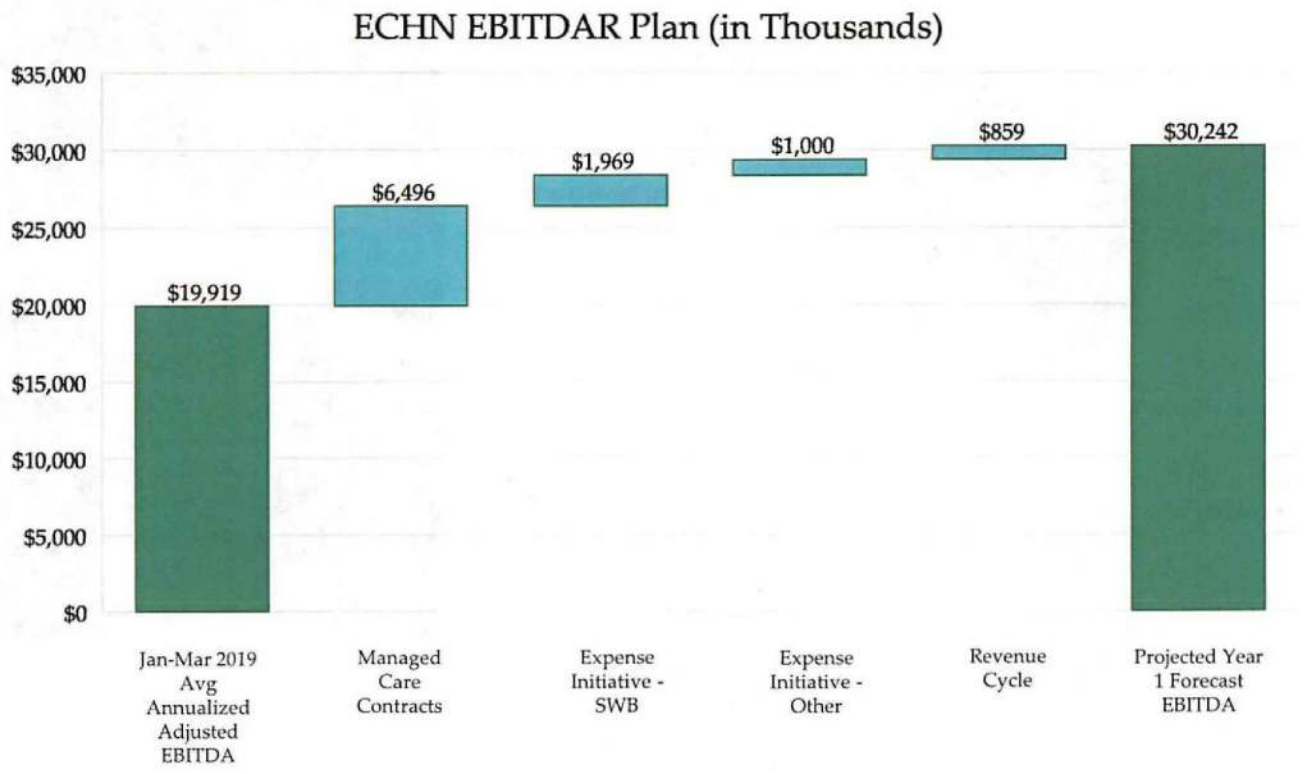
A $2.0M EBITDAR increase is expected to come from a reduction in force (RIF). The RIF of 42 positions occurred between the months of February and April 2019. The reduction in force is not expected to affect volumes at the facilities.

Expense Initiative - Other

A $1.0M EBITDAR increase for FY2019 is projected due to the utilization of TeamHealth in orthopedic surgeries. TeamHealth is expected to add 20 IP surgeries and 5 OP surgeries per month, resulting in $122k in monthly EBITDAR.

Revenue Cycle

Prospect has various initiatives in place for CharterCare to improve revenue cycle performance. One initiative is to focus on reducing denials, which will be accomplished by making sure all claims are viewed within 48 hours to ensure any potential denials are dealt with in a timely manner. The $859k EBITDAR pickup is based off of a 1% improvement from 2018's collection rate.



MPT CONFIDENTIAL

MANCHESTER MEMORIAL HOSPITAL

Overview

Manchester Memorial Hospital is a 249-bed acute care hospital located in Manchester, CT, approximately 10 miles east of Hartford.

Heavy Reliance on ED and OP Volume

- 95% of admissions come through the ED.
  - ED includes a 12-bed behavioral health unit.
- Facility recently partnered with TeamHealth and anticipates pickup of additional 25-30 surgeries per month.
- Approximately 65% of gross charges are from OP volume.

Focus on Med/Surg and Obstetrics (OB)

- Inpatient Med/Surg service lines include General Surgery, Orthopedics, Urology, Oncology, and Vascular services.
- 15-bed Maternity unit that sees 1,500 births per year.
  - Expanding Maternity wing to include a 5-bed postpartum unit.
- 7-bed Neonatal ICU.

Recent/Upcoming Capital Expenditures

- $2.6M Maternity expansion is currently underway. $1M has been completed with the next phase beginning in October 2019.
- $3.0M to open a second cardiac catheterization laboratory, pending state approval.
- $1.5M will be needed for generator and switchgear replacements, but no work has been started yet.

Year Built	1921
Market Share[2]	30.1%

(1) Includes the main hospital complex.
(2) Represents ECHN inpatient market share for FY 2018.

Overview

Rockville General Hospital is a 102-bed acute care hospital located in Vernon, CT, approximately 10 miles east of Hartford. The facility was built around an historical mansion from the 1800s and has incorporated it into the facility's operations.

Focus on Behavioral Health

- Established adult and adolescent behavioral health units drive volume at the hospital.
- Geriatric and Eating Disorder programs are less than 2 years old but are ramping as expected.
- Facility has a 30-bed locked eating disorder unit, which is one of two of its kind that exist in the United States.

Challenging Payor Mix

- Cities of Rockville and Vernon recently merged; not as affluent as Manchester and the area has been slow to recover from factories shutting down in the 1960s.
- Market following trend of increased Managed Medicare.
  - For FY2019 Q2 YTD payor mix, Medicare and Medicaid dropped to 55.9%, while Managed Medicare increased to 28.3%.

Recent/Upcoming Capital Expenditures

- The Geriatric and Eating Disorder Units were recently renovated and opened less than 2 years ago.
- No major capital projects were discussed, but the building is aging and will require capital to maintain going forward.

Payor Mix (by Acute Admissions)[1]

EASTERN CONNECTICUT HEALTH NETWORK

Strengths	Weaknesses
1. Only two hospitals in the suburban communities to the east of Hartford 2. Increasing volume for psychiatric services 3. Hospitals that have close to a 100 year history in their communities 4. Manchester located in a market with a favorable payor mix	1. Aging facilities that have been partially renovated but still with significant capital needs to modernize the space 2. Limited use of on call specialists can impact patient referral patterns 3. Patient service area overlap
Opportunities	**Threats**
1. CON application in place for Cath Lab 2. Stemming the outmigration to the larger, Hartford-based systems 3. Cost savings and service line optimization from synergies of being a 2 hospital system with shared leadership	1. Market leakage from the PSA to Hartford; volume has decreased YoY 2. Low growth service area with limited economic drivers 3. State level Medicaid tax disputes

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. $75M capital commitment is in place ($37M has been completed) and SALB with MPT could be a source of financing for other renovations.
2. ECHN management recently entered a contract with TeamHealth for on call orthopedic surgeries. As a result of this coverage total orthopedic surgeries are up by 65 in the first two months. A contract for maternity services is underway.
3. The facilities are located two miles apart, and serve a similar broader community. The management team is evaluating and reducing the duplication of services where possible. It is likely that Rockville will continue to increase its psychiatric service line, while Manchester promotes its full service community hospital offerings.

Mitigants to the threats identified during the SWOT analysis are:

1. ECHN is in the process of renovating their facilities and recruiting physicians to their IPA to bring more patients into the system.
2. ECHN's management is focused on expanding the defined service area while also focusing on reducing the cost of care delivery for its population.
3. While Waterbury serves a disproportionate share of the Medicaid population in the state, the hospital is currently a net payor into the state funding program, due to the hospital provider tax. The Connecticut Hospital Association has pending lawsuits against the state to release funds from the tax program back to the hospitals.

MPT CONFIDENTIAL MPT_PROSPECT_00000103

WATERBURY HEALTH

Hospital and System Overview

Comprehensive Healthcare Services

Waterbury Health, which includes Waterbury Hospital, offers comprehensive healthcare services – from primary care to emergency and acute care, to home healthcare.

- 1 hospital, Waterbury Health, with 357 licensed beds.
- 25 access points including 11 outpatient facilities and 7 labs.
- System recently underwent a rebranding to tie all services together.

Waterbury Hospital

Potential for Growth

Waterbury Health continues to expand their network into the more affluent suburbs and has the following growth initiatives in place:

- Opening new offices in Watertown, Woodbury, Naugatuck, and Thomaston.
- Establishing a Women's Health Center in Southbury.
- Installing an open MRI in Southbury.

WATERBURY HEALTH

Market Overview

- The Primary Service Area (PSA) is a very diverse population with higher rates of poverty than the state, a higher percentage of English as a Second Language (ESL), and a medically underserved area/population.
- Primary competition is Trinity Health's Saint Mary's Hospital, which is located two miles away.
- Significant leakage of around 20% from the market to Hartford HealthCare and Yale New Haven Health System.
- Waterbury Hospital splits the remaining 80% market share with Saint Mary's Hospital.

Strategic Initiatives

Revenue Cycle

Prospect has various initiatives in place for Waterbury to improve revenue cycle performance. One initiative is to focus on reducing denials, which will be accomplished by making sure all claims are viewed within 48 hours to ensure any potential denials are dealt with in a timely manner. The $2.4M EBITDAR pickup is based off of a 1% improvement from 2018's collection rate.

Managed Care Contracts

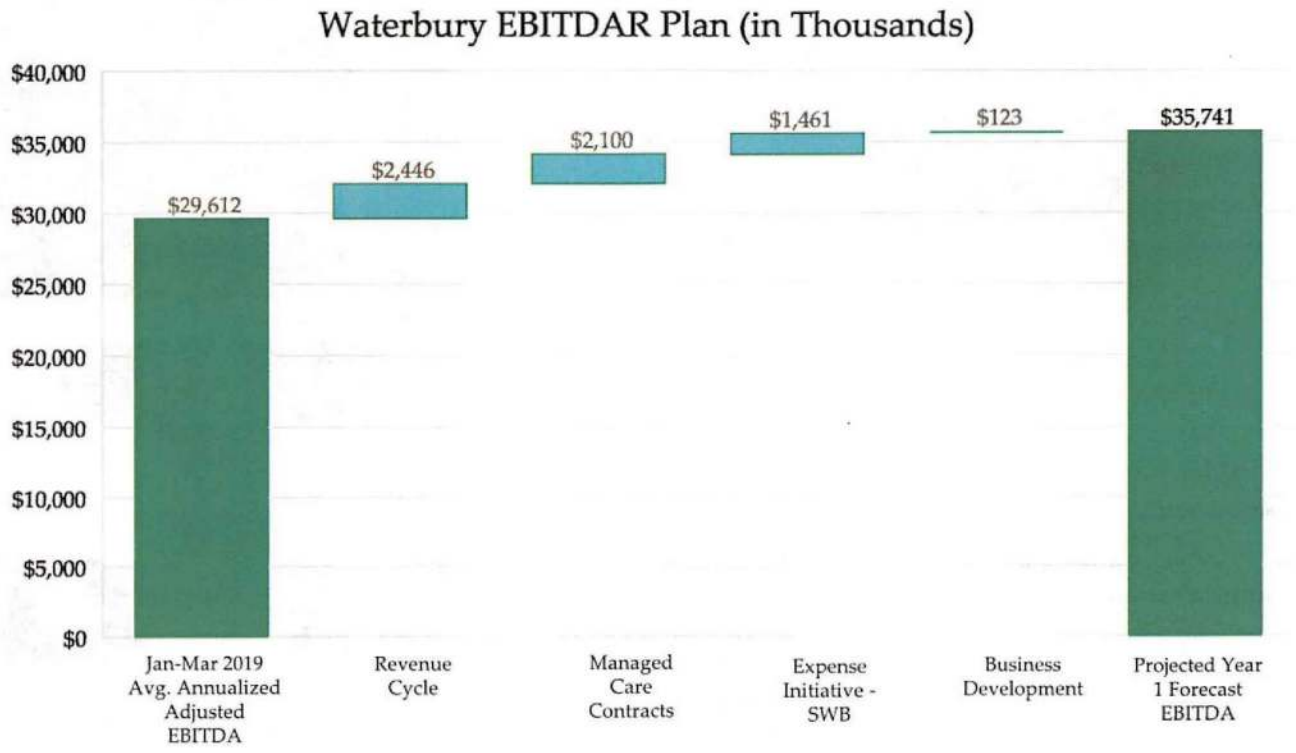
Management is projecting an additional $2.1M annually in EBITDAR as a result of favorable rate increases with managed care providers. Contracts with Redacted have been fully negotiated and executed. The rate increases for these contracts range from 3.00% to 9.38%, except for Redacted which has a 40.00% increase.

Expense Initiative - SWB

A $1.5M annual EBITDAR increase is projected to come from SWB savings due to a reduction in force (RIF) of 12.6 FTEs implemented in fiscal year 2019.

Business Development

Management is projecting a $123k pickup due to new growth related to chronic care outreach. To achieve this initiative, each office in the Waterbury Health network will contact patients in the provider panel that have not come in for follow up in over four months.



WATERBURY HOSPITAL

64 Robbins Street
Waterbury, CT 06708

Overview

Waterbury Hospital is a 357-bed acute care hospital located in Waterbury, CT, which is 30 miles southwest of Hartford, CT.

Emergency Department Driving Admissions

- High Emergency Department (ED) volume of 53,600 visits per year as hospital sits right off of interstate.
- ED volume drives 80% of inpatient admissions.
- Level II Trauma Center.

Teaching Hospital with Prestigious Affiliations

- Two residency programs affiliated with Yale and Quinnipiac.
- Significant number of Yale grads on medical staff.

Recent/Upcoming Capital Expenditures

- Hospital is an aging facility with significant capital needs.
- Renovation of a Wound Care Center was recently completed.
- $30M ED renovation is currently in the planning stages.
- Updating the north entrance to the building.
- Renovating the bridge entrance to the building.
- Outfitting a second catheterization lab with TAVR capability.

History of Failed Acquisition Attempts

- "Left at the altar" three times over the past 5 years in recent acquisition attempts prior to Prospect transaction.

MPT CONFIDENTIAL

WATERBURY HOSPITAL

Strengths	Weaknesses
1. Profitable operations 2. Full service community hospital that provides high quality care locally 3. Academic affiliations 4. Low nursing turnover (6% annually)	1. Facility with significant capital needs 2. Lack of a brand; not known in the community for any particular service lines 3. Overcrowded ED
Opportunities	**Threats**
1. Increasing access points in communities to the west of Waterbury with favorable payor mix and farther distance to Hartford market 2. Differentiating from the services and care delivery of Saint Mary's (Trinity) model 3. Improving image with planned ED renovation project	1. Trinity (Saint Mary's) becoming more aggressive in the market 2. Low growth service area with limited economic drivers 3. State level Medicaid tax disputes

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. ED renovation is being planned and SALB with MPT could be a source of financing for other renovations.
2. While cardiology and orthopedics are a focus of the hospital, the marketing efforts to promote these and other services are in their infancy. The new management team is active with these efforts.
3. ED volume is generally positive; however a high volume of patients, including patients with behavioral needs has a negative effect on patient perception. The ED renovation should also assist with this weakness.

Mitigants to the threats identified during the SWOT analysis are:

1. Saint Mary's is located downtown while Waterbury is trying to draw patients from the more affluent suburban areas who don't want to drive into town. Waterbury's new women's health center and imaging center in Southbury brings another presence to the surrounding suburbs.
2. Waterbury's management is focused on expanding the defined service area while also focusing on reducing the cost of care delivery for its population.
3. While Waterbury serves a disproportionate share of the Medicaid population in the state, the hospital is currently a net payor into the state funding program, due to the hospital provider tax. The Connecticut Hospital Association has pending lawsuits against the state to release funds from the tax program back to the hospitals.

MPT CONFIDENTIAL MPT_PROSPECT_00000108

CROZER-KEYSTONE HEALTH SYSTEM

System Overview

Dominant Provider in Delaware County, PA

- 4 hospitals (598 licensed beds)
  - Crozer-Chester Medical Center – 300 beds
  - Springfield Hospital – 25 beds
  - Taylor Hospital – 105 beds
  - Delaware County Memorial Hospital – 168 beds
- 2 large OP Centers (>100k SF each)
- 67 physician practice locations across 37 physical locations to ensure broad market coverage.

Patient Volume Driven by Large IPA with Strong Primary Care Base

- IPA includes over 600 physicians (400 employed).
- Over 100 primary care physicians – largest PCP base in the area.

System Serves a County Medicaid Population

- System has negotiated favorable Medicaid managed care contracts being the dominant, low cost provider in the market.
- System hospitals are organized to treat and transfer patients to the most cost effective facility.
- 80% of Medicaid beneficiaries in the state are enrolled in some form of managed care.

Coordinated Regional Care

- System negotiates at-risk capitation contracts for medical and behavioral health care services.
- Contract negotiations underway with Independence Blue Cross.

Revenue and EBITDAR Growth Projected Through Network Expansion and Additional Contracts

(in millions)	Year 1[(1)]	Year 2	Year 3
Net Revenues	$794.4	$818.2	$842.8
Expenses	$742.5	$753.4	$768.2
EBITDAR[(2)]	$51.9	$64.8	$74.6

1) Year 1 timeframe is Q4 FY19-Q3 FY20. Projections include all 4 hospitals.
2) Adjusted EBITDA per Prospect's projections that do not include rent expense.

CROZER-KEYSTONE HEALTH SYSTEM

Market Overview

- Crozer-Keystone Health System's ("CKHS") market is defined as Delaware and Philadelphia Counties combined. CKHS's primary service area is Delaware County, however, it also draws patients from neighboring Philadelphia County.
- Within Delaware County, Crozer is the dominant provider, followed by Main Line.
- The market has seen a shift from shipyards being the major industry player to national companies including Boeing, Comcast, and AmeriSourceBergen having a strong presence.
- CKHS's competition operates at a higher cost structure and is less inclined to take Medicaid patients.

Philadelphia, PA Demographics

Strategic Initiatives

Expense Initiative - SWB

- A $13M annual EBITDAR increase is expected to come from a reduction in force by the end of 2019.
  - 170 FTEs have been identified as necessary reductions. As of May 2019, the system had already terminated employment of 105 of the 170 FTEs and has a termination schedule for the remaining 65 FTEs.
  - 25 positions are to be eliminated within physician practice groups.
  - The system recognized $1.3M of savings in February and March related to this initiative.
  - Reductions are not expected to affect volumes.
- Annual EBITDAR increase of $12M from the outsourcing of ED physicians and Hospitalist services (Team Health agreement).
  - Another agreement has been signed with Sound for hospitalist services and Crozer expects utilization management to improve.

Managed Care Contracts

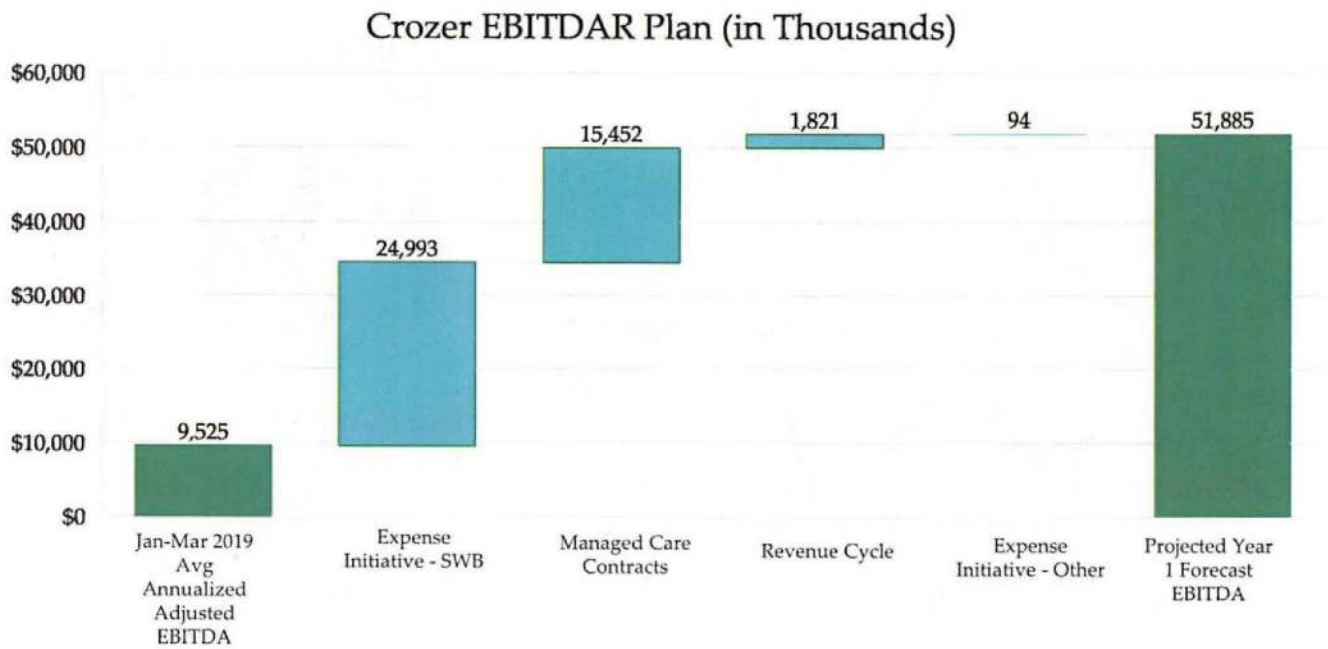
- Crozer is projecting an additional $15M annually in EBITDAR from rate increases with managed care providers.
- These contracts have been fully negotiated and executed; effective June 2019.
- The largest rate increase comes from IBC (Blue Cross). Retropay is embedded in this amount and will continue for a 13 month period. The other rate increases come from Aetna and Cigna.

Revenue Cycle Improvements

- Focus on reducing denials, which will be accomplished by ensuring all claims are viewed within 48 hours to ensure any potential denials are dealt with in a timely manner.
- Creating revenue cycle teams for certain specialty units such as Burn, Neuro, and Trauma, since varying circumstances can occur within the revenue cycle for these units.
- Greater emphasis on appropriately placing patients in observation, which is expected to help reduce denials.

Expense Initiative - Other

- The final initiatives driving additional EBITDAR include the elimination of certain accounting services, OR improvements, medical directorship modifications, and various other initiatives.



MPT CONFIDENTIAL MPT_PROSPECT_00000111

CROZER-CHESTER MEDICAL CENTER

1 Medical Center Blvd.
Upland, PA 19013

Beds	300
Square Feet[1]	1,427,207
Year Built	1952
Market Share[2]	39% | #1 PSA

(1) Includes 20 buildings, 2 parking garages, and adjoining surface parking areas.
(2) Inpatient admissions for Delaware county only.

Overview

Crozer Chester Medical Center ("CCMC") is a 300-bed acute care hospital located on a 69-acre campus in the suburb of Upland, PA, approximately 20 miles southwest of Philadelphia.

- Flagship hospital of the Crozer-Keystone system.
- Located in Delaware County, PA, and also draws patients from New Jersey and Maryland.
- ED drives admissions for the facility, along with referrals from sister hospitals.
- Crozer operates under the same license as Taylor Hospital and Springfield Hospital.

Top-Ranked Tertiary Care Specialties

- Focus on higher-level tertiary care, providing services to an urban population in need of specialized care.
- Burn Unit ranked #1 in the country by the ABA in 2017.
- World-renowned Neurosciences program.
- Nearing completion of comprehensive stroke certification, which would make CCMC the only facility in Delaware County with this certification.

Limited Market Competition

- Consistently running at ADC of 280-290.
- Nearest hospital is Jefferson Health, which has historically struggled.
- High bargaining power with Managed Medicaid payors due to the large Medicaid population in the area and Crozer's large market share of this population.
- Serves a local population that has remained loyal to the hospital since its inception in 1902.

Recent/Upcoming Capital Expenditures

- Hybrid OR has been completed and a new CT scanner is close to opening.
- $16M in boiler replacements ongoing.
- Replacement of LED lighting in common areas to be completed soon.

Convenient Access to Outpatient Services Center

- Crozer-Chester is tied to Crozer-Brinton Lake, which is less than 11 miles away.
- Brinton Lake is in the Crozer-Keystone network, which allows for elective OP volumes to be shifted to the OP center.
- Services include Cancer Care, Cardiology, Dialysis, Primary Care, and more.

Crozer-Chester Medical Center

Crozer Brinton Lake (not part of MPT transaction).

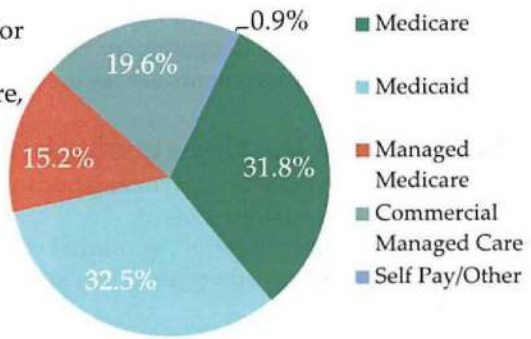
Admission Stats

- Annual Admits: 18,000
- Annual ED Visits: 52,000

Key Services

- Emergency Medicine
- Burn Treatments
- Primary Care
- Behavioral Health
- Neurosurgery

Payor Mix (by Acute Admissions)[1]



1) Facility Level payor mix for Q2 2019 YTD as presented by Prospect

MPT CONFIDENTIAL

CROZER-CHESTER MEDICAL CENTER

Strengths	Weaknesses
1. Tertiary hospital with world-class burn, neuroscience, and stroke units 2. Serves as the main referral hospital from three other Prospect Hospitals in the area 3. Local population loyal to facilities 4. Strong Medicaid bargaining power 5. Strong physician relationships and large employed medical group	1. Inadequate financial/accounting system at the individual hospital level 2. Current IT systems limit management ability to strategically plan on a service line level 3. Lack of focus on specific service lines 4. 1-star hospital rating 5. Historical low patient experience ratings
Opportunities	**Threats**
1. Shifting service lines to other Crozer facilities (OB/GYN) 2. Improving patient experience from pre-admission to discharge 3. Increase retainage of primary care referrals from employed physician group	1. Changes in government reimbursement 2. Largely unionized labor force 3. World-class academic facilities located throughout Philadelphia market

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Prospect is implementing Oracle software at the Crozer facilities at the end of 2019, which will allow the system to begin analyzing performance at the facility and service line levels.
2. Crozer-Chester is working to relocate certain services to other hospitals in the system so they can focus on key service lines.
3. The system has worked to improve quality data points such as patient experience, mortality, and readmissions, and believes the current run-rate will improve this rating (rating currently uses data that is 3 years old).
4. The system has made patient experience a key focus and has recently hired two patient experience officers to help drive improvements across the system.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. Prospect has leverage in the market considering the facilities are the dominant healthcare provider in Delaware County, therefore, they should be able to avoid highly unfavorable collective bargaining agreements.
3. Prospect focuses on its facilities being "community assets," which should allow the facilities to be successful without creating direct competition with the large academic centers.

MPT CONFIDENTIAL

DELAWARE COUNTY MEMORIAL HOSPITAL

501 N. Lansdowne Ave.
Drexel Hill, PA 19026

Beds	168
Square Feet[1]	337,393
Year Built	1925
Market Share[2]	39% | #1 PSA

(1) Includes land under a 32,315 SF MOB condo unit.
(2) Inpatient admissions for Delaware county only

Overview

Delaware County Memorial Hospital ("DCMH") is a 168-bed acute care hospital located in the suburb of Drexel Hill, PA, approximately 7 miles west of Philadelphia.

- One of the founding hospitals in the Crozer-Keystone system and part of the "hub and spoke" model with CCMC.
- Traditional community hospital that serves the local and surrounding community.
- Surrounding area has the highest population density in the Philadelphia area.
- ED has historically driven admissions, but facility is seeing an increase in direct admits from employed and affiliated physicians.
- Only hospital in the Crozer system that does not share a license with another facility.

Favorable Market Demographics

- Local population is more loyal to facility than any other facility in the system. This also applies to the physicians.
- Growing Medicaid population in the area, which is favorable due to the current rates the system receives from Medicaid.

Convenient Access to Outpatient Services Center

- DCMH is tied to Crozer-Keystone at Broomall, which is less than 12 miles away.
- Broomall is in the Crozer-Keystone network, which allows for elective OP volumes to be shifted to the OP center.
- Services include Cancer Care, Cardiology, Dialysis, Primary Care, and more.

Addition of a Transitional Care Unit

- Conversion of a former rehab unit into a 23-bed Transitional Care Unit (expected to open in the near future).
- Allows the Crozer system to further the continuum of care and keep patients within the system in a post-acute setting.

Voluntary Drug & Alcohol Rehab Unit

- 25-bed unit that is expected to begin construction in December.
- The county will reimburse the $1.4M construction costs.
- DCMH is also opening an OP Drug & Alcohol Rehab Unit in June.

Delaware County Memorial Hospital

Crozer-Keystone at Broomall (not part of MPT transaction)

Admission Stats

- Annual Admits: 10,500
- Annual ED Visits: 37,000

Key Services

- Cardiology
- General Surgery

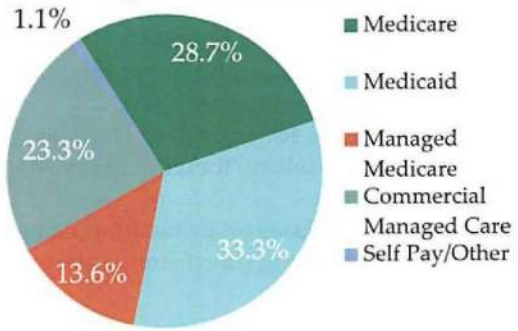
- Cancer Care
- Orthopedics

Payor Mix (by Acute Admissions)[1]



1) Facility Level payor mix for Q2 2019 YTD as presented by Prospect

MPT CONFIDENTIAL

DELAWARE COUNTY MEMORIAL HOSPITAL

Strengths	Weaknesses
1. Densely populated market is loyal to facility 2. Operating benchmarks are better than local competitors 3. Strong primary care physician base 4. Able to leverage specialty services offered by Crozer and retain patients within the system	1. Inadequate financial/accounting system at the individual hospital level 2. Historically low patient experience ratings 3. Aging primary care physician base
Opportunities	**Threats**
1. Opportunity to convert to all private beds 2. Furthering continuum of care by adding transitional services 3. Drive additional volume through cosmetic upgrades, especially in maternal health 4. Capacity to add additional services at hospital	1. Changes in government reimbursement 2. Largely unionized labor force 3. World-class academic facilities located throughout Philadelphia market

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Prospect is implementing Oracle software at the Crozer facilities at the end of 2019, which will allow the system to begin analyzing performance at the facility and service line levels.
2. Prospect has made patient experience a key focus and has recently hired two patient experience officers to help drive improvements across the facilities.
3. Prospect's experience with maintaining strong physician relationships will help the system recruit new physicians to replace physicians lost to retirement.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. Prospect has leverage in the market considering the facilities are the dominant healthcare provider in Delaware County, therefore, they should be able to avoid highly unfavorable collective bargaining agreements.
3. Prospect focuses on its facilities being "community assets," which should allow the facilities to be successful without creating direct competition with the large academic centers.

MPT CONFIDENTIAL

SPRINGFIELD HOSPITAL

190 W. Sproul Road
Springfield, PA 19064

Overview

Springfield Hospital is a 25-bed acute care hospital located in the suburb of Springfield, PA, approximately 20 miles west of Philadelphia.

- Located in the center of Delaware County with an increased number of physicians relocating and opening practices in the area.
- Most favorable payor mix in the Crozer-Keystone system, as it serves a more affluent, commercial-based population.
- Operates under the same license as with Crozer-Chester Medical Center and Taylor Hospital.

Beds	25
Square Feet[1]	91,800
Year Built	1974
Admits Market Share[2]	39% | #1 PSA

(1) Excludes land totaling 419,764 SF
(2) Inpatient admissions for Delaware county only.

Acquired Prominent Primary Care Group

- Recently acquired the primary care group Rose Tree, which was formerly with local competitor, Main Line Riddle.
- Springfield currently receives 20% of referrals from Rose Tree, but expects this number to grow as a result of the acquisition, with the goal of 70%.

Recent and Ongoing Capital Additions

- $12M spent so far with an unspecified amount budgeted for Phase 2, which is expected to start in Q3 2019.
- Completed new inpatient unit (14 beds) and finalizing new MRI. Phase 2 plans include a Telemetry addition and lobby and radiology upgrades.

Partnerships with On-Campus Sportsplex

- Springfield features a 190,000 square feet gym attached to the facility including a fitness area, basketball courts, tennis courts, yoga studio, lap pool, and more.
- The hospital is looking to create additional partnerships with the gym that would allow physical therapy services to be held using the gym amenities, potentially driving additional revenues to the main hospital.

Key Services

- Senior Care
- Joint Replacement Surgery
- Pain Management
- Ophthalmology
- Primary Care

MPT CONFIDENTIAL MPT_PROSPECT_00000116

SPRINGFIELD HOSPITAL

Strengths	Weaknesses
1. Favorable payor mix 2. Strong ortho and geriatric service lines fueled by an increasing elderly population 3. Experienced senior leadership team 4. Outpatient services provide majority of revenues	1. Inadequate financial/accounting system at the individual hospital level 2. Aging primary care physician base 3. Semi-private patient rooms
Opportunities	**Threats**
1. Diversify services by increasing specialist base 2. Incorporate large on-campus sportsplex into physical therapy and diabetic care programs 3. Increase inpatient volume from recently acquired Rose Tree primary care practice	1. Changes in government reimbursement 2. Largely unionized labor force 3. World-class academic facilities located throughout Philadelphia market

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Prospect is implementing Oracle software at the Crozer facilities at the end of 2019, which will allow the system to begin analyzing performance at the facility and service line levels.
2. Prospect's experience with maintaining strong physician relationships will help the system recruit new physicians to replace physicians lost to retirement.
3. Prospect still has close to $100M of capital commitments remaining from the Crozer-Keystone acquisition, which can be used to convert semi-private patient rooms into private rooms.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. Prospect has leverage in the market considering the system is dominant healthcare provider in Delaware County. Therefore, they should be able to avoid highly unfavorable collective bargaining agreements.
3. Prospect focuses on its facilities being "community assets," which should allow the facilities to be successful without creating direct competition with the large academic centers.

TAYLOR HOSPITAL

175 E. Chester Pike
Ridley Park, PA 19078

Beds	105
Square Feet[1]	282,681
Year Built	1971
Admits Market Share[2]	39% | #1 PSA

(1) Excludes land of 822,936 SF
(2) Inpatient admissions for Delaware County only.

Overview

Taylor Hospital is a 105-bed acute care hospital located in the suburb of Ridley Park, PA, approximately 15 miles southwest of Philadelphia.

- Located in Delaware County with a loyal patient population (outmigration for tertiary services).
- Strong focus on post-acute services.
- Operates under one license with Crozer-Chester Medical Center and Springfield Hospital.

Favorable Geographic Location

- Closest facility to Philadelphia in the Crozer-Keystone system.
- Close proximity to the airport and the local Boeing plant, which are two of the largest employers in the area.

Recent/Upcoming Capital Additions

- Taylor recently completed a renovation, which includes a renovated ED and a new CT scanner.
- There are currently additional renovations planned for the ED, which are intended to improve the cosmetics and flow of patients.

Exterior

Renovated Patient Admit Area

Exam Room

Renovated ER Lobby

Admission Stats

- Annual Admits: 6,800
- Annual ED Visits: 27,000

Key Services

- Physical Therapy and Rehabilitation

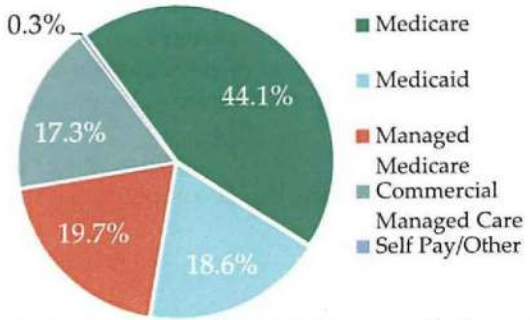
- General Surgery
- Primary Care
- Orthopedics

Payor Mix (by Acute Admissions)[1]



1) Facility Level payor mix for Q2 2019 YTD as presented by Prospect

MPT CONFIDENTIAL MPT_PROSPECT_00000118

TAYLOR HOSPITAL

Strengths	Weaknesses
1. Patient friendly building layout 2. Proximity to local Boeing plant and airport 3. Historically considered the #1 ED in Crozer's system, in terms of experience and efficiencies	1. Inadequate financial/accounting system at the individual hospital level 2. 1-star CMS rating 3. Aging primary care physician base
Opportunities	**Threats**
1. Drive ER volume through recently renovated ER space 2. Develop new service lines including colorectal surgeries and GERD program 3. Increase utilization of inpatient rehab unit	1. Changes in government reimbursement 2. Largely unionized labor force 3. World-class academic facilities located throughout Philadelphia market

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. Prospect is implementing Oracle software at the Crozer facilities at the end of 2019, which will allow the system to begin analyzing performance at the facility and service line levels.
2. Prospect has worked to improve quality data points such as patient experience, mortality, and readmissions, and believes the current run-rate will improve this rating (rating currently uses data that is 3 years old).
3. Prospect's experience with maintaining strong physician relationships will help the system recruit new physicians to replace physicians lost to retirement.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorable adjust to any potential changes in government reimbursement.
2. Prospect has leverage in the market considering the facilities are the dominant healthcare provider in Delaware County. Therefore, they should be able to avoid highly unfavorable collective bargaining agreements.
3. Prospect focuses on its facilities being "community assets," which should allow the facilities to be successful without creating direct competition with the large academic centers.

MPT CONFIDENTIAL

CHARTERCARE HEALTH PARTNERS

System Overview

Third Largest Provider in Rhode Island

- 2 acute care hospitals (532 licensed beds)
  - Roger Williams Medical Center (RWMC) – 220 beds
  - Our Lady of Fatima Hospital (OLFH) – 312 beds
- 35 OP facilities and clinics
- Prospect has 85% interest in subsidiary that owns facilities. MPT has requested the JV agreement from Prospect.
- Shared leadership team manages both hospitals
- $100M in capital improvements since Prospect acquisition

Large IPA and Strong Payor Relationships

- IPA includes over 420 physicians (65 employed physicians)
- Strong payor relationships with all major health plans

System Serves a Large Medicaid Population

- 24% of the population is low income and covered by the State Medicaid program

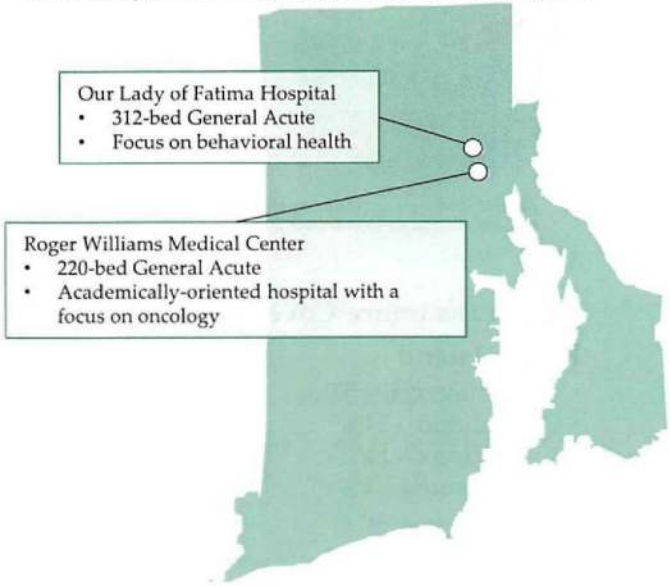
Low Cost Leader

- CharterCare Health Partner's coordinated regional care model allows them to deliver services to patients at multiple levels of care, at the right time and place and at lower costs to effectively serve Medicaid patients.

Projecting Strong Revenue and EBITDAR Growth

(in millions)	Year 1[(1)]	Year 2	Year 3
Net Revenues	$358.0	$368.7	$378.0
Expenses	$330.1	$339.4	$347.2
EBITDAR[(2)]	$27.9	$29.3	$30.8

1) Year 1 timeframe is Q4 FY19-Q3 FY20. Projections include both hospitals.
2) Adjusted EBITDA per Prospect's projections do not include rent expense.
Note: Strategic initiatives driving growth outlined on Page 105.



Roger Williams Medical Center

Our Lady of Fatima Hospital

MPT CONFIDENTIAL MPT_PROSPECT_00000120

CHARTERCARE HEALTH PARTNERS

Market Overview

- CharterCare's primary service area is Providence County, but given the small size of Rhode Island, the hospitals see patients from across the state.
- Rhode Island's primary industries are healthcare, tourism, manufacturing, financial services, and education.
- In 2018, 14% of Rhode Island's population lived below the poverty line.
- CharterCare's primary competition comes from non-profit hospitals operated by Care New England, LifeSpan, and Prime Healthcare.
- There are additional hospitals close to CharterCare's hospitals, but they are focused on obstetrics so not considered direct competition as CharterCare does not offer these services.

Rhode Island Demographics

Market Stats	PSA(1)	Rhode Island	USA
2018 Population	872k	1.1M	331.7M
0-18	20.1%	19.2%	22.6%

MPT CONFIDENTIAL MPT_PROSPECT_00000121

Strategic Initiatives

Business Development

A $4.8M EBITDAR increase is expected due to volume growth and the closure of an outpatient clinic. The anticipated volume growth is driven by the following:

- $2.0M pickup from Certified Clinical Medical Assistant (CCMA) mitigation. This initiative is to replace non-productive physicians with more productive physicians at the facilities and is not yet finalized.
- $1.3M pickup from growth of ED volume and inpatient conversions at RWMC. RWMC completed a renovation of their ED on 2/12/2019. Per Prospect, ED volumes were suppressed due to the renovation taking place so they expect volumes to increase to pre-renovation levels going forward.
- $0.5M pickup from podiatry volume growth. This initiative is based off of hiring an additional podiatrist.
- $1.0M pickup is driven by the closure of the outpatient alcohol addiction clinic at RWMC. The program lost ~$1M EBITDAR per year and was closed on 5/9/2019.

Managed Care Contracts

A $3.4M EBITDAR pickup is expected, due to favorable rate increases with managed care providers. Contracts with BCBS, Tufts, Aetna, and United Healthcare have been fully negotiated and executed. The rate increases for these contracts range from 2.10% to 8.00% and represent $3.0M of the $3.4M projected EBITDAR increase. The additional $0.4M of projected EBITDAR pickup is due to rate increases with Neighborhood and Medicaid. These contracts are not yet executed.

Expense Initiative - SWB

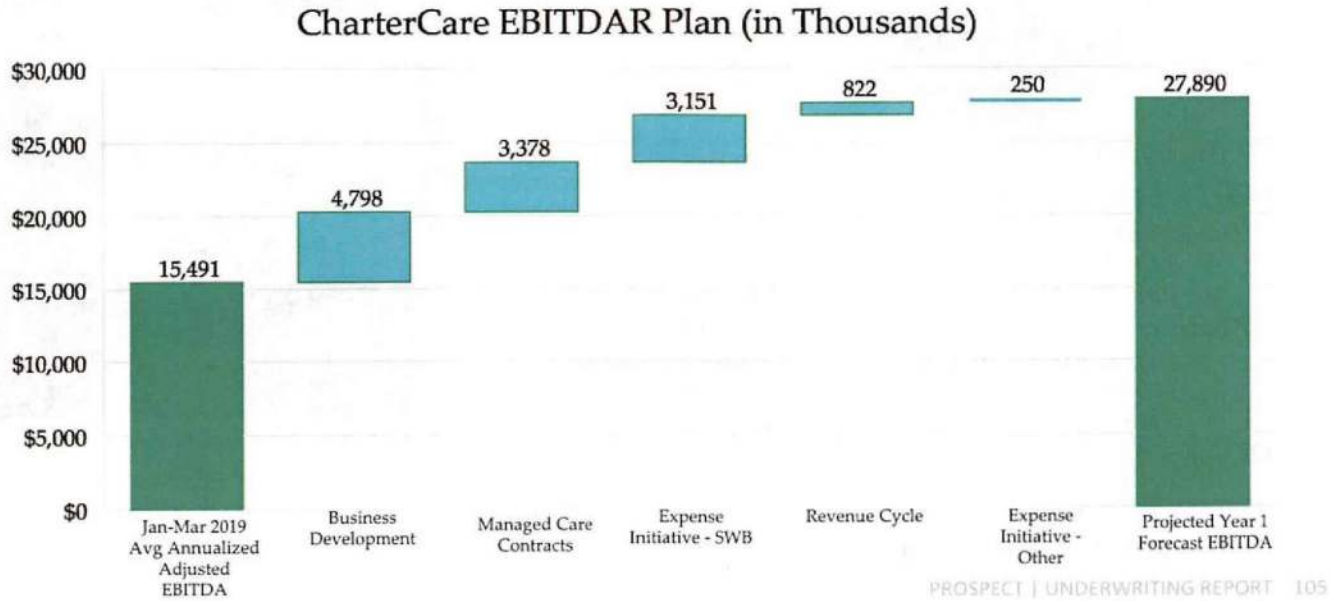
A $3.2M EBITDAR increase is expected to come from more effective seasonality staffing and the closure of an outpatient health center. More effective seasonality staffing is estimated to save $2.4M per year by staffing Fridays during the summer months to mimic Saturday staffing levels. The closure of an outpatient health center has to be approved by the state in a reverse Certificate of Need (CON) hearing so the initiative is uncertain at this point in time. It is estimated to save $0.8M.

Revenue Cycle

Prospect has various initiatives in place for CharterCare to improve revenue cycle performance. One initiative is to focus on reducing denials, which will be accomplished by making sure all claims are viewed within 48 hours to ensure any potential denials are dealt with in a timely manner. The $822k EBITDAR pickup is based off of a 1% improvement from 2018's collection rate.

Expense Initiative - Other

The final initiative driving additional EBITDAR is a medical education cap increase. This is expected to generate $250k of additional EBITDAR and become effective prior to Prospect's 2019 fiscal year end. There is no underlying data to this assumption as the initiative was not implemented at the time of this report.



MPT CONFIDENTIAL MPT_PROSPECT_00000122

ROGER WILLIAMS MEDICAL CENTER

825 Chalkstone Avenue
Providence, RI 02908

Beds	220
Square Feet[1]	399,186
Year Built	1920
Market Share[2]	10.1%

(1) *Includes the hospital, parking lots, and Medical Office Buildings ("MOBs").*
(2) *Based on discharges and excluding obstetrics market share as CharterCare does not provide these services.*

Overview

Roger Williams Medical Center is a 220-bed acute care hospital located 2 miles outside of the heart of Providence, RI.

Leading Cancer Center

- Leader in the delivery of high quality cancer care.
- The Cancer Center was recently expanded and redesigned and includes a Chemotherapy Infusion Center, Bone Marrow Transfer Clinic, Multi-Disciplinary Clinic, and a Hematology-Oncology Clinic.
- The Bone Marrow Transfer Clinic is the only one that exists in the state of Rhode Island.

Academically Oriented

RWMC has strong relationships with nearby colleges and has a reputation as a teaching hospital.

- Affiliations with Brown University and Boston University
- Fellowships in Oncology, Rheumatology, Dermatology, and Pulmonary
- Facility has 42 residents per year
- Only bone marrow therapy unit in Rhode Island

Recent/Upcoming Capital Expenditures

- $15M Emergency Department (ED) renovation was completed on 2/12/2019.
- Phase II of the ED renovation will be a locked BH unit.

Payor Mix (by Acute Admissions)[1]

OUR LADY OF FATIMA HOSPITAL

200 High Service Avenue
North Providence, RI 02904

Beds	312
Square Feet[1]	413,700
Year Built	1953
Market Share[2]	10.1%

(1) *Includes the hospital, parking lots, and Medical Office Buildings ("MOBs").*
(2) *Based on discharges and excluding obstetrics market share as CharterCare does not provide these services.*

Overview

Our Lady of Fatima Hospital is a 312-bed acute care hospital located 4 miles outside of the heart of Providence, RI and 2 miles from RWMC.

Focus on Behavioral Health

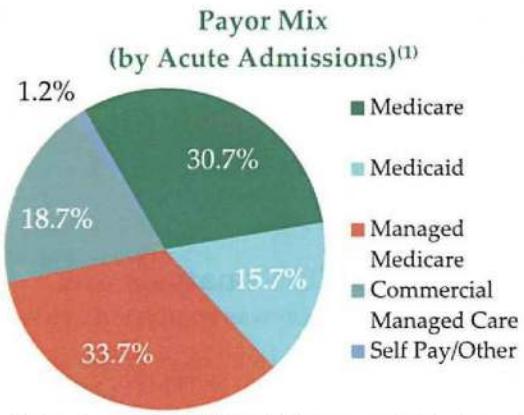
- Focus on behavioral health with a long-term behavioral health unit where the ALOS is often greater than a year. The facility is paid on a per diem basis for these patients.
- Designated six-bed behavioral health emergency department, which is separate from the rest of the emergency department.

Breast Care Center

- Breast care center that provides quality breast imaging services in a quiet and comfortable atmosphere.
- The center has state of the art equipment where imaging services such as 3D mammography, breast ultrasound, and breast biopsy can be performed.

Recent/Upcoming Capital Expenditures

- $100M in capital improvements to the CharterCare facilities were added in the five years since Prospect ownership.
- No major capital projects were discussed, but the building is aging and will require capital to maintain going forward.



1) Facility Level payor mix for Q2 2019 YTD as presented by Prospect

FY 2018 Facility Stats

- IP Cases: 5,508
  - 1,790 Internal Medicine
  - 1,671 Psychiatry

MPT CONFIDENTIAL

CHARTERCARE HEALTH PARTNERS

Strengths	Weaknesses
1. Profitable hospitals with loyal physician base and experienced leadership team 2. RWMC has strong reputation for clinical quality and oncology services 3. RWMC has the only bone marrow therapy unit in Rhode Island 4. Only Level IV addiction treatment program in RI 5. Teaching hospital affiliations with Brown University and Boston University	1. Aging facilities with significant capital needs 2. Medicaid heavy payor mix 3. No OB or Pediatrics 4. ~40% patient leakage from the system
Opportunities	**Threats**
1. Low-cost provider well-positioned for a risk-based contracting environment 2. Consolidate services between two facilities 3. Discontinue non-profitable service lines or negotiate higher rates with state to offset 4. Increase employed physician base and capitalize on disruption from Care New England divestiture	1. Changes in government reimbursement 2. Market leakage to downtown Providence; 3rd place provider in terms of market share in a competitive market 3. Market does not change to capitation payments as they hope

SWOT Mitigants

Mitigants to the weaknesses identified during the SWOT analysis are:

1. $100M capital investment since Prospect acquisition. $15M ED renovation was completed at RWMC in February 2019.
2. Building brand around oncology, orthopedics, and behavioral health. Offer services that are not found anywhere else in the state.
3. Working with the physicians to improve patient leakage. They have already seen the financial benefits of keeping the patients in the system. Direct admit programs in place with 4 hospitalists at RWMC and 7 at OLFH.

Mitigants to the threats identified during the SWOT analysis are:

1. Prospect's established payor relationships will help the facility favorably adjust to any potential changes in government reimbursement.
2. The hospitals are entrenched in the community as they have been serving the community for over 100 years. Building around their strong market position in behavioral health.
3. Indicators are pointing towards more capitation payments in the future and is a nationwide trend.

Independent Auditor's Report

Board of Directors
Prospect Medical Holdings, Inc.
Los Angeles, California

We have audited the accompanying consolidated financial statements of Prospect Medical Holdings, Inc. (the "Company"), which comprise the consolidated balance sheets as of September 30, 2016 and 2015, and the related consolidated statements of operations, statements of comprehensive (loss) income, statements of stockholder's equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Prospect Medical Holdings, Inc. and its subsidiaries as of September 30, 2016 and 2015, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

1. Organization

Prospect Medical Holdings, Inc. ("Prospect" or the "Company" or the "Parent Entity") is a Delaware corporation and a wholly-owned indirect subsidiary of Ivy Holdings Inc. ("Ivy Holdings").

The Company's operations are currently organized into four primary reportable segments: Hospital Services, Medical Group, Global Risk Management and Corporate, as discussed below.

Hospital Services Segment

The Company owns 18 acute care and behavioral hospitals and multi-level elder care facilities in Southern California, the Greater San Antonio, Texas region, Rhode Island, New Jersey and Pennsylvania with approximately 3,100 licensed beds, and a network of specialty and primary care clinics, through its subsidiaries, Southern California Healthcare System, Inc. ("SCHS"), Alta Los Angeles Hospitals, Inc. ("Alta Los Angeles Hospitals"), Alta Newport Hospital, Inc., Prospect Hospital Holdings, LLC ("Nix Health"), Prospect CharterCARE, LLC ("PCC" or "CharterCARE"), Prospect EOGH, Inc. ("East Orange"), and Prospect Crozer, LLC ("Crozer") (collectively, the "Hospital Services segment"). The Hospital Services segment subsidiaries are wholly-owned by Prospect, except for PCC, in which Prospect has an 85% interest.

The Company's three community hospitals in Hollywood, Los Angeles and Norwalk offer a comprehensive range of medical and surgical services, including general acute care hospital services, pediatrics, obstetrics and gynecology, pediatric sub-acute care, general surgery, medical-surgical services, orthopedic surgery, and diagnostic, outpatient, skilled nursing and urgent care services. The Company's psychiatric hospital in Van Nuys provides acute inpatient and outpatient psychiatric services on a voluntary basis. The Company's hospital in Culver City ("SCH Culver City") offers a comprehensive range of inpatient and outpatient services: including general surgery, orthopedic, spine, cardiology, diagnostic outpatient, rehabilitation, psychiatric and detox services. In addition, SCH Culver City has an active emergency room that plays an integral part in providing emergency services to the West Los Angeles area. Foothill Regional Medical Center ("Foothill"), located in Tustin, California, is a general acute care hospital and also operates pediatric sub-acute unit. Los Angeles Hospital at Bellflower ("Bellflower"), which opened in July 2015, operates a 32-bed voluntary adult behavioral health unit.

Nix Health provides comprehensive service offerings at various locations throughout the greater San Antonio, Texas region. These locations include Nix Medical Center, which provides inpatient acute care, geriatric psychiatry services, and emergency room services; Nix Specialty Health Center, which provides a full range of behavioral health and rehabilitation services for children, adolescents, and adults, and a range of health clinics and provider based clinics throughout San Antonio, Texas; and Nix Behavioral Health Center, which provides psychiatric emergency services and a crisis intervention unit. Nix Community General Hospital ("Nix CGH"), located in Dilley, Texas, ceased operations effective September 30, 2016 (see Note 5). Nix Physicians, Inc., a wholly-owned indirect subsidiary of Nix Health, commenced operations during the year ended September 30, 2016 and acquired a medical practice (see Note 4).

CharterCARE's operating subsidiaries include Prospect CharterCARE RWMC, LLC ("Roger Williams Medical Center"), Prospect CharterCARE SJHSRI, LLC ("St. Joseph Health Services of Rhode Island" or "SJHSRI"), Prospect CharterCARE Elmhurst, LLC ("Elmhurst Extended Care"), Prospect CharterCARE Physicians, LLC ("CharterCARE Physicians"), and New University Medical Group, LLC, which include hospitals, medical centers, a multi-level elder care facility, and a network of approximately 60 contracted primary care and specialist physicians located in Rhode Island with 785 licensed beds (collectively, "CharterCARE"). PCC is 85% owned by Prospect and 15% by CharterCARE Community Board (formerly known as CharterCARE Health Partners). Elmhurst Extended Care is included in discontinued operations in the accompanying consolidated financial statements (see Note 5).

East Orange, acquired March 1, 2016 (see Note 4), has 212 licensed beds and provides health care services, including a broad range of adult, psychiatric and intensive care services as well as outpatient ambulatory services and emergency care.

Crozer, acquired July 1, 2016 (see Note 4), provides medical services to Pennsylvania, Southern New Jersey and Northern Delaware including inpatient and outpatient acute care services, sub-acute care, emergency and trauma services, nursing and rehabilitative services, physician care services and other health care services. Crozer includes four hospitals including Crozer Chester Medical Center and Delaware County Memorial Hospital, a network of outpatient centers, a comprehensive physician network and a sports club.

Admitting physicians are primarily practitioners in the local area. The hospitals have payment arrangements with Medicare, Medicaid (Medi-Cal in California) and other third party payers, including commercial insurance carriers, health maintenance organizations ("HMOs") and preferred provider organizations ("PPOs").

Medical Group Segment

The Medical Group segment is a healthcare management services organization that provides management services to affiliated physician organizations that operate as independent physician associations ("Medical Groups" or "IPAs"). The affiliated physician organizations enter into agreements with HMOs to provide HMO enrollees with a full range of medical services in exchange for fixed, prepaid monthly fees known as "capitation" payments. The Medical Groups contract with physicians (primary care and specialist) and other healthcare providers to provide enrollees with medical services. Prospect currently manages the provision of prepaid healthcare services for its affiliated physician organizations in Southern California, Texas and Rhode Island. The network consists of the following physician organizations as of September 30, 2016 (individually referred to as an "Affiliate"):

Prospect Medical Group, Inc. ("PMG")
Prospect Health Source Medical Group, Inc. ("PHS")
Prospect Professional Care Medical Group, Inc. ("PPCM")
Genesis HealthCare of Southern California, Inc. ("Genesis")
Prospect NWOC Medical Group, Inc. ("PNW")
StarCare Medical Group, Inc. ("PSC")
AMVI/Prospect Medical Group ("AMVI/Prospect")
Nuestra Familia Medical Group, Inc. ("Nuestra")
Upland Medical Group, a Professional Medical Group ("UMG")*
Pomona Valley Medical Group, Inc. ("PVMG")*

* PVMG and UMG are collectively referred to as the "ProMed Entities."

These Affiliates are managed by the following two medical management company subsidiaries that are wholly-owned by Prospect (collectively, "MSOs"):

Prospect Medical Systems, Inc. ("PMS")
ProMed Healthcare Administrators ("PHCA")

In addition to the Affiliates and MSOs, the Medical Group segment includes Prospect Provider Group TX, Inc. ("PPGTX"), Prospect Provider Group RI, LLC ("PPGRI"), and Prospect Provider Group NJ, Inc. ("PPGNJ"), each of which are wholly-owned subsidiaries of Prospect Provider Groups, Inc. ("PPG"). PPG is a subsidiary of Prospect.

All of the Affiliates are wholly-owned by PMG, with the exception of Nuestra, which was 72.53% owned by PMG as of September 30, 2016 and 2015, and AMVI/Prospect which is a 50/50 Joint Venture between AMVI Care Health Network, Inc. ("AMVI") and PMG. The operations of all of these entities, with the exception of AMVI/Prospect, are consolidated in the accompanying consolidated financial statements. PMG is owned by a nominee physician shareholder pursuant to an assignable option agreement described below.

The AMVI Joint Venture was formed for the sole purpose of combining enrollment in order to meet minimum enrollment levels required for participation in the CalOptima Medicaid (Medi-Cal in California) program in Orange County, California. The joint venture ownership is set at 50/50 to prevent either party from exerting control over the other; however, AMVI's and PMG's businesses are operated autonomously, and enrollees, financial results and cash flows are each separately tracked and recorded. In accordance with the joint venture partnership agreement, profits and losses are not split in accordance with the partnership ownership interest, but rather, are directly tied to the results generated by each separate portion of the business. Separate from any earnings the Company generates from PMG's portion of business within the joint venture, the Company also earns fees for management services PMS provides to PMG's partner in the joint venture. The Company accounts for PMG's interest in the joint venture partnership using the equity method of accounting. The Company includes in the consolidated financial statements only the net results attributable to those enrollees specifically identified as assigned to the Company, together with the management fee that PMS charges for managing those enrollees specifically assigned to the other joint venture partner.

PMS has entered into an assignable option agreement with PMG and the nominee physician shareholder of PMG. Under the assignable option agreement, Prospect has an assignable option, obtained for a nominal amount from PMG and the nominee shareholder to designate the purchaser (successor physician) for all or part of PMG's issued and outstanding stock held by the nominee physician shareholder (the "Stock Option") in its sole discretion. The Company may also assign the assignable option agreement to any person. The assignable option agreement has an initial term of 30 years and is automatically extended for additional terms of 10 years each, as long as the term of the related management services agreement described below (the "Management Agreement") is automatically extended. Upon termination of the Management Agreement with PMG, the related Stock Option would be automatically and immediately exercised. The Stock Option may be exercised for a purchase price of $1,000. Under these nominee shareholder agreements, Prospect has the unilateral right to establish or effect a change of the nominee, at will, and without the consent of the nominee, on an unlimited basis and at nominal cost throughout the term of the Management Agreement. In addition to the Management Agreement with PMG, Prospect, through one of its management company subsidiaries, has a management agreement with each Affiliate. The term of the Management Agreements is generally 30 years. PMG is the sole shareholder of PHS, PPCM, Genesis, PNW, PSC, UMG, and PVMG. New Genesis Medical Associates, Inc. ("NGMA") is controlled through a nominee shareholder arrangement like the Stock Option structure utilized for PMG and discussed above.

The Company's Affiliates and NGMA have entered into Management Agreements with PMS or PHCA, as applicable. Each Affiliate has agreed to pay a management fee to PMS or PHCA, as applicable. The fee is based in part on the costs to the management company and on a percentage of revenues the Affiliate receives (i) for the performance of medical services by the Affiliate's employees and independent contractor physicians and physician extenders, and (ii) for all other services performed by the Affiliates. The revenue from which this fee is determined includes medical capitation (except for NGMA which provides professional and ancillary services), all sums earned from participation in any risk pools and all fee-for-service revenue earned. The management fee also includes a fixed amount for marketing and public relations services. Except in the case of Nuestra and AMVI/Prospect, the Management Agreements had initial terms of 30 years, renewable for successive 10-year periods thereafter, unless terminated by either party for cause. Effective September 1, 2013, the Managements Agreements for the ProMed Entities were consolidated under one new Management Agreement with PHCA. Effective October 1, 2013, the

Management Agreements for the rest of the Affiliates, other than Nuestra and AMVI/Prospect, were consolidated under one new Management Agreement with PMS. Those two new Management Agreements with PHCA and PMS include initial five year terms and are renewable for successive five year periods thereafter. In the case of Nuestra, its Management Agreement had an initial 10 year term renewable for successive one year terms, subsequently amended in January 15, 2009 to an initial 20 year term renewable for two 10 year periods. In the case of AMVI/Prospect, the Management Agreement has a one year term with successive one year renewal terms. The management agreement for NGMA was effective October 1, 2012 with an initial term of 30 years, renewable for successive 10-year periods thereafter, unless terminated by either party for cause. In return for payment of the management fee, Prospect (through PMS and PHCA) has agreed to provide financial management, information systems, marketing, advertising, public relations, risk management, and administrative support, including for utilization review and quality of care. At its cost, Prospect has assumed the obligations for all facilities, medical and non-medical supplies, and employment of non-physician personnel of its affiliated medical clinics.

The management fee earned by Prospect fluctuates based on the profitability of each Affiliate. Prospect is allocated a 50% residual interest in any profits after the first 8% of the profits. The remaining balance is retained by the Affiliates.

The Management Agreements are not terminable by the Affiliates except in the case of gross negligence, fraud or other illegal acts of Prospect, or bankruptcy of the Company.

Further, Prospect's rights under the Management Agreements are unilaterally saleable or transferable. Based on the provisions of the Management Agreements and the assignable option agreement with PMG, Prospect has determined that it has a controlling financial interest in the Affiliates, with the exception of AMVI/Prospect. Consequently, under applicable accounting principles, Prospect consolidates the revenues and expenses of all the Affiliates except AMVI/Prospect from the respective dates of execution of the Management Agreements. All significant inter-entity balances have been eliminated in consolidation. In the case of AMVI/Prospect, only that portion of the results which are contractually identified as Prospect's are recognized in the consolidated financial statements, together with the management fee that the Company charges AMVI for managing AMVI's share of the joint venture operations.

Prospect has also entered into management agreements with unaffiliated third parties to manage services to their HMO enrollees. These management agreements do not have characteristics that give rise to the consolidation of the entities under current accounting literature.

The affiliated physician organizations provided medical services to a combined total of approximately 307,000 and 258,900 HMO enrollees as of September 30, 2016 and 2015, respectively. The enrollees include approximately 109,000 and 63,700 enrollees that the Company manages for the economic benefit of certain independent third parties, and for which the Company earns management fee income as of September 30, 2016 and 2015, respectively. The total paid member months including managed enrollees, for the fiscal years ended September 30, 2016 and 2015 was approximately 3,600,500 and 3,067,200, respectively.

On December 19, 2013, NGMA, an Affiliate of the Company, purchased stock of Chaparral Medical Group, Inc. ("CMG"), a California medical corporation. Consideration was composed of $1,100,000 in cash at the closing, $700,000 in future cash consideration to be used for the acquired company's general corporate purposes, and 3,750 shares of Ivy Holdings common stock issued at closing to the selling shareholders. As of December 19, 2013, NGMA owned 13.44% of the stock of CMG. During June 2015, CMG repurchased shares from a physician shareholder, which increased NGMA's ownership to 13.57%. After CMG's issuance of shares to physicians recruited to join CMG, NGMA's ownership decreased to 12.99%. After payment of the entire consideration, including the future cash consideration, NGMA will own 17.64% of the stock of

CMG. Pursuant to the terms of the stock purchase agreement, NGMA will have the right and option to make additional stock investments at the same share valuations and prices and upon the same applicable terms and conditions as the initially acquired shares, to bring its aggregate ownership up to 50%. CMG is a multi-specialty group serving communities primarily in the Los Angeles and San Bernardino counties. The Company accounts for NGMA's interest in CMG using the cost method as the Company does not have the ability to exercise significant influence over the operating and financial policies of CMG.

Global Risk Management Segment

The Global Risk Management segment commenced operations during the year ended September 30, 2015 and entered into global capitation arrangements with certain unrelated third-party health plans. The Global Risk Management segment also manages the provision of care for members in coordination with the Hospital and Medical Group segments. The Global Risk Management segment includes Prospect Health Plan, Inc. ("PHP") with operations in California, Prospect Health Services TX, Inc. ("PHSTX") with operations in Texas, Prospect Health Services RI, Inc. ("PHSRI") with operations in Rhode Island, and Coordinated Regional Care Group, Inc. ("CRCG") with operations in various states. The Company has also incorporated Prospect Health Services PA, Inc. Prospect Health Services CT, Inc. and Prospect Health Services NJ, Inc., in Pennsylvania, Connecticut and New Jersey, respectively. PHP, PHSTX, and PHSRI have entered into global capitation arrangements with certain third-party health plans and manage the provision of care for members in coordination with the Hospital Services and Medical Group segments.

Corporate Segment

The Corporate segment primarily reflects certain expenses incurred at the Parent Entity not specifically allocable to the Hospital Services, Medical Group, or Global Risk Management segments. These include, but are not limited to: salaries, benefits and other compensation for corporate employees; financing expenses; insurance expenses; rent; legal fees; and accounting fees. During the current fiscal year, the Company established a captive insurance company, Prospect Medical Holding Risk Retention Group, Inc. ("RRG"), which was incorporated on June 20, 2016 in the state of Vermont. RRG was formed to provide primary insurance coverage for hospital and physician professional and general liability risks for the Company's subsidiary health care organization. RRG is a wholly owned subsidiary of the Company with all intercompany balances and transactions being eliminated upon consolidation. The Company does not allocate interest expense related to acquisition debt or income taxes to the other reporting segments.

2. Significant Accounting Policies

Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include the accounts of all controlled subsidiaries, of which control is effectuated through ownership of voting common stock or by other means, but do not include the accounts of the parent companies, Ivy Holdings and Ivy Intermediate Holding Inc. The Medical Group segment Affiliates and NGMA and its subsidiaries have been determined to be variable interest entities due to the existence of a call option under which the Company has the ability to require the holders of all of the voting common stock of the underlying subsidiaries to sell their shares at a fixed nominal price ($1,000) to another designated physician chosen by the Company. This call option agreement represents rights provided through a variable interest other than the equity interest itself that limits the returns that could be earned by the equity holders. In addition, the Company has management agreements with the Affiliates and NGMA and its subsidiaries and the holders of the voting common stock which allows the Company to direct the activities of the Affiliates and NGMA and its subsidiaries that most significantly impact their economic performance, retain the right to receive expected residual returns

and assume the obligation to absorb losses. Although the Company has disproportionately few voting rights (based on the terms of the equity), the Company is considered to be the primary beneficiary of the activities of the Affiliates and NGMA and its subsidiaries. As a result, the Affiliates and NGMA and its subsidiaries are consolidated within the accompanying consolidated financial statements.

Operating results for the CharterCARE Physicians and Nix medical practices acquisitions, Primary and Multi-Specialty Clinics of Anaheim, Inc., East Orange and Crozer are consolidated with the Company's financial statements from their acquisition dates (various dates during the years ended September 30, 2015 and 2016, December 1, 2015, March 1, 2016, and July 1, 2016, respectively) (see Note 4). All significant intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Certain reclassifications were made to the 2015 consolidated financial statements in order to conform to the 2016 presentation.

Revenues

Revenues by reportable segment are comprised of the following amounts (in thousands):

For the Years Ended September 30,	**2016** *(a)*	2015 *(b)*
Net Hospital Services *(c)*		
Inpatient	$ **826,128**	$ 713,291

(a) The revenues of Primary and Multi-Specialty Clinics of Anaheim, Inc., East Orange, Crozer and the medical practices acquired by CharterCARE Physicians and Nix Health have been included in the accompanying consolidated financial statements for the period from the acquisition date of December 1, 2015, March 1, 2016, July 1, 2016 and various dates during the year ended September 30, 2016 through September 30, 2016.

(b) The revenues of various medical practices acquired by CharterCARE Physicians have been included in the accompanying consolidated financial statements from their various dates of acquisition during the year ended September 30, 2015.

(c) Excluding revenues from discontinued operations.

Confidential LGP-SBC-000000294

Hospital Services Segment

Net Patient Service Revenues

Operating revenue of the Hospital Services segment consists primarily of net patient service revenue. The Company reports net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others in the period in which services are rendered. The Company has agreements with third-party payers, including Medicare, Medicaid (Medi-Cal in California), managed care and other insurance programs that are paid at negotiated rates. These payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges and per diem payments, as further described below. Estimates of contractual allowances are based upon the payment terms specified in the related contractual agreements. The Company accrues for amounts that it believes may ultimately be due to or from the third-party payers. Normal estimation differences between final settlements and amounts accrued in previous years are reported as changes in estimates in the current year. Outstanding receivables, net of allowances for contractual discounts and bad debts, are included in patient accounts receivable in the accompanying consolidated balance sheets.

The following is a summary of sources of patient service revenues (net of contractual allowances and discounts) before provision for bad debts and exclude revenues from discontinued operations:

September 30,	2016	2015
Medicare	$ 410,147	$ 315,545
Medicaid	437,968	367,842
Managed Care	231,146	166,465
Self Pay/Other	79,110	55,741
Capitation	94,232	98,964
Total patient service revenue	$ 1,252,603	$ 1,004,557

A summary of the payment arrangements with major third-party payers follows:

Medicare: Medicare is a federal program that provides certain hospital and medical insurance benefits to persons aged 65 and over, some persons with end-stage renal disease and certain other beneficiary categories. Most inpatient hospital services rendered to Medicare program beneficiaries are paid at prospectively determined rates per discharge, according to a patient classification system based on clinical, diagnostic, and other factors. Outpatient services are generally paid based on prospectively determined rates. The Company is also reimbursed for various disproportionate share and Medicare bad debt components at tentative rates, with final settlement determined after submission of the annual Medicare cost report and audit thereof by the Medicare fiscal intermediary. The Company also receives Medicare outlier payments on an ongoing basis during the year for cases that are unusually costly, and under certain circumstances these payments may be reconciled to more closely reflect the costs in excess of outlier thresholds after the submission and audit of the annual Medicare cost report. Normal estimation differences between filed settlements and amounts accrued are reflected in net patient service revenue.

Cost report settlement estimates are recorded based upon as-filed cost reports and are adjusted for tentative settlements, if any, and when a final Notice of Program Reimbursement ("NPR") is issued. The latest updated Supplemental Security Income ("SSI") ratios for 2014, which are used in determining disproportionate share payments, were issued on July 19, 2016. To date, the Company has received final NPRs for SCH Culver City (formerly, Brotman Medical Center) through 2012, SCHS

Confidential LGP-SBC-000000295

through 2013, Alta Los Angeles Hospitals through 2013, Nix Health through 2013, Elmhurst through 2014, East Orange through 2012, Crozer Chester Medical Center through 2011, Delaware County Memorial Hospital through 2014. No NPR has been issued for Roger Williams Medical Center or St. Joseph's Health Services of Rhode Island since their acquisition by the Company during June 2014.

Medicaid: Medicaid is a joint federal-state funded healthcare benefit program that is administered by states to provide benefits to qualifying individuals who are unable to afford care. The Company receives reimbursements under the Medicaid program at prospectively determined rates for both inpatient and outpatient services. Similar to Medicare, cost report settlements are recorded based upon as-filed cost reports (if required by the respective facility's state) and adjusted for tentative and final settlements, if any. Medi-Cal is the version of the federal Medicaid program that is applicable to California residents. Inpatient services are reimbursed under prospectively determined rates based on diagnosis related groups, subject to outlier payments. Outpatient services are paid based on prospectively determined rates per procedure provided.

The SCHS and Alta Los Angeles Hospitals are eligible to participate in the State of California Medi-Cal Disproportionate Share ("DSH") programs, under which medical facilities that serve a disproportionate number of low-income patients receive additional reimbursements. Eligibility is determined annually based on prescribed guidelines. The Company accrues revenue based on the expected total annual DSH awards. Differences between the estimated and the actual awards are recorded in the period they become known. DSH amounts are subject to retrospective revision prior to finalization and such revisions could lead to material retractions. The Company records retrospective retractions when they are estimable and probable. Retrospective additional DSH revenues are recorded when the amounts are received. The Medi-Cal DSH receivable as of September 30, 2016 and 2015 was approximately $12,146,000 and $13,787,000, respectively, and were included in due from government payers in the accompanying consolidated balance sheets. For the fiscal years ended September 30, 2016 and 2015, total Medi-Cal DSH payments received by the SCHS and Alta Los Angeles Hospitals were approximately $21,566,000 and $15,690,000, respectively, and total Medi-Cal DSH revenues recorded were approximately $19,926,000 and $19,005,000, respectively. Additionally, pursuant to an audit of Medi-Cal cost reports and notification sent to the Company, the Company accrued a cost report liability payable to Medi-Cal of $1,764,000 and $1,743,000 as of September 30, 2016 and 2015, respectively.

Certain of the Company's California hospitals also participate in *the California Hospital Fee Program* (see Note 12).

In Texas, the Medicaid program reimburses under prospectively determined rates for inpatient services and based on costs for outpatient services. Medicaid reimbursement may be subject to periodic adjustment, as well as to changes in existing payment levels and rates, based on the amount of funding available to the Medicaid program. Nix Health has also been receiving payments from the Texas Health and Human Services Commission under the Section 1115 Waiver ("the waiver") that was recently granted to the state of Texas by CMS. Under the first year of the waiver ending September 30, 2012, a transition payment was paid to Nix Health based upon prior levels of payment under the "Upper Payment Limit" ("UPL") program, which the waiver replaced. Payments for years two through five under the waiver are based upon two pools. One pool is for payments for uncompensated care ("UCC") which includes the shortfall in Medicaid reimbursement as compared to cost and the cost of providing services to uninsured patients. The other pool is the Delivery System Reform Initiative Payments ("DSRIP"), where approved programs and services are undertaken to improve access and services provided. Programs are established by regions and approved by the Texas Health and Human Services Commission and CMS. These programs are assigned a value and milestones are established to measure success and the timing and level of payment from the DSRIP funds. Nix Health recorded revenue related to the UCC pool of $12,368,000 and $8,354,000 for the years ended September 30, 2016 and

2015, respectively. Revenue recorded related to the DSRIP pool was $11,356,000 for both of the years ended September 30, 2016 and 2015. At September 30, 2016 and 2015, amounts receivable under the Section 1115 Waiver totaled $20,974,000 and $20,536,000, respectively.

Nix Health also recorded $12,965,000 and $11,804,000 during the years ended September 30, 2016 and 2015, respectively, in costs for rural community provision of services. As of September 30, 2016 and 2015, prepaid expenses related to such costs of $3,565,000 and none, respectively.

The CharterCARE hospitals are participants in the State of Rhode Island's DSH program, which was established in 1995 to assist hospitals that provide a disproportionate amount of uncompensated care. Under the program, Rhode Island hospitals, including the CharterCARE hospitals, receive federal and state Medicaid funds as additional reimbursement for treating a disproportionate share of low income patients. The CharterCARE hospitals recognized revenue and received payments related to DSH and Upper Payment Limit ("UPL") reimbursement of $20,496,000 and $16,636,000 during the years ended September 30, 2016 and 2015, respectively. The State of Rhode Island also assesses a license fee to all hospitals in Rhode Island based on each hospital's net patient revenue. The CharterCARE hospitals recorded $16,199,000 and $15,058,000 of expense during the years ended September 30, 2016 and 2015, respectively, as a result of the license fee.

The New Jersey Health Care Reform Act of 1992 established the Health Care Subsidy Funds to provide certain hospitals in New Jersey, including East Orange, with funds necessary to provide charity care and other forms of uncompensated care. East Orange recognized $8,569,000 of revenue related to Hospital Relief Funds, charity care subsidies and mental health subsidies for the period from March 1, 2016 (inception) through September 30, 2016.

Pursuant to Pennsylvania Act 49 of 2010 ("Act 49"), the Pennsylvania Department of Public Welfare, as approved by the Centers for Medicare and Medicaid Services, established a revised inpatient hospital fee-for-service payment system utilizing All Patient Refined Diagnosis-Related Groups and provided an enhanced hospital reimbursement model. Act 49 imposes a statewide hospital assessment on net inpatient revenue of Pennsylvania licensed acute care hospitals for the periods July 1, 2010 through June 30, 2016. The assessments have enabled the Commonwealth of Pennsylvania to maintain the updated inpatient payment system, make changes to existing disproportionate share/supplemental payments, and to create new payments where applicable.

Under Pennsylvania's Medicaid Modernization Assessment ("MMA"), Crozer recognized $10,293,000 of revenue and received cash payments of $11,672,000 for the period from July 1, 2016 (inception) through September 30, 2016. Amounts receivable under the MMA were $7,388,000 as of September 30, 2016. Crozer also recognized $4,181,000 of expense for the period from July 1, 2016 (inception) through September 30, 2016, which are also accrued and are included in September 30, 2016 in the accompanying consolidated balance sheets.

Crozer also recognized $14,948,000 of revenue and received $4,029,000 of cash payments related to the Pennsylvania Community Access Fund Grant and Legislative Initiative for the period from July 1, 2016 (inception) through September 30, 2016. Amounts receivable under these programs was $17,809,000 and are included in September 30, 2016 in the accompanying consolidated balance sheets.

Managed Care: The Company has also entered into payment agreements with certain commercial insurance carriers, HMOs, and PPOs. The basis for payment under these agreements is in accordance with negotiated contracted rates or at the Company's standard charges for services provided. Some of these payments are capitated, meaning that the Company receives an agreed amount per patient for providing an agreed range of services.

Confidential LGP-SBC-000000297

Self-Pay: Self-pay patients represent those patients who do not have health insurance and are not covered by some other form of third party arrangement. Such patients are evaluated, at the time of services or shortly thereafter, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid, as well as the Company's local hospital's indigent and charity care policy.

See "Concentrations of Credit Risks" below for discussion of revenues received from the Medicare and Medicaid programs.

Similar to other hospital operators, the Company is subject to audits by Recovery Audit Contractors ("RAC") and other similar programs. As of September 30, 2016 and 2015, the Company accrued $1,879,000 and $262,000, respectively, in due to government payors in the accompanying consolidated balance sheets related to such programs.

SCH Culver City Outlier Liability

Following the acquisition of a majority interest in SCH Culver City, effective April 14, 2009, the Company consolidated SCH Culver City's estimated liability to CMS arising out of outlier payments received for services provided by the hospital to Medicare eligible inpatients, primarily for the last four months of calendar year 2005 and all of calendar year 2006.

While SCH Culver City (formerly Brotman Medical Center, Inc.) reports financial statements on a fiscal year ending September 30, Medicare cost reports are filed on a calendar year basis. Acute care hospitals receive Medicare reimbursement payments pursuant to a prospective payment methodology primarily based on the diagnosis of the patient, but are entitled to receive additional payments, referred to as "outliers" for patients whose treatment is very costly. When Brotman Medical Center, Inc. acquired the hospital in 2005, CMS provided a ratio of cost to charges (the "RCC") based on the statewide average. Payments received by SCH Culver City on this basis were an interim estimate, subject to final determination upon audit of SCH Culver City's cost reports. SCH Culver City filed its Medicare cost reports, but determined that its outlier reimbursement for services provided in fiscal years 2005, 2006 and part of 2007 might be subject to adjustment based on certain outlier reconciliation rules.

On October 12, 2012, SCH Culver City received from its Medicare fiscal intermediary a proposed outlier adjustment for Medicare fiscal year 2006 in the amount of $12,785,000. SCH Culver City had previously been notified of an adjustment of $2,149,000 for 2005. As of September 30, 2015 and 2014, the Company accrued $13,834,000 of the estimated $14,934,000 liability to CMS included in the accompanying consolidated balance sheets. The difference between the $14,934,000 asserted by CMS and the $13,834,000 accrued by the Company relates to accrued interest of approximately $1,100,000. The Company does not agree, however, with the outlier reconciliation liability. Accordingly, in accordance with relevant literature related to accounting for contingencies, the Company recorded the lower end of the range of the liability.

The Company filed an appeal of the outlier issue with the Provider Reimbursement Review Board for the 2006 cost reporting period after it received the notice of program reimbursement. Mediation was held with CMS and the U.S. Department of Justice in March 2015 for settlement of fiscal years 2005 and 2006. The terms of a final settlement were approved by CMS and the Health and Human Services Office of the General Counsel in December 2015. The Company received final approval of the settlement by the U.S. Department of Justice on January 19, 2016. Pursuant to the final agreement, CMS will receive $7,457,000 from SCH Culver City, including $5,357,000 from previously withheld reimbursement and $2,100,000 through recoupment from current payments to SCH Culver City of $60,000 per month over thirty-six months, accruing interest at the current Medicare Trust Fund rate. The final settlement resulted in a gain

Confidential LGP-SBC-000000298

of $5,741,000 recognized during the year ended September 30, 2016, which is included within Net Hospital Services revenues in the accompanying consolidated statements of operations.

The following is a summary of due from and due to governmental payers at September 30 (in thousands):

September 30,	**2016**	2015
Due from government payers:		
Medicaid Disproportionate Share (DSH)	$ **12,146**	$ 13,787
Medicare cost report settlements	**5,686**	3,906
Medicaid cost report settlements	**-**	231
Medicaid Section 1115 receivable	**20,974**	20,536
	$ **38,806**	$ 38,460
Due to government payers:		
Outlier liability	$ **-**	$ 13,834
Medicare cost report settlements	**21,238**	11,501
Medicaid cost report settlements	**1,764**	1,743
	$ **23,002**	$ 27,078

The Company is not aware of any material claims, disputes, or unsettled matters with any payers that would affect revenues that have not been adequately provided for and disclosed in the accompanying consolidated financial statements.

Charity Care

The Company's California facilities provide charity care to patients whose income level is below 300% of the Federal Poverty Level. Patients with income levels between 300% and 350% of the Federal Poverty Level qualify to pay a discounted rate under the requirements of California State Assembly Bill 774 (AB 774) based on various government program reimbursement levels. Patients without insurance are offered assistance in applying for Medicaid and other programs they may be eligible for, such as state disability. Patient advocates from the Company's Medical Eligibility Program ("MEP") screen patients in the Hospital and determine potential linkage to financial assistance programs. They also expedite the process of applying for these government programs. The Company's hospitals in other states provide care to patients who meet certain criteria under their respective financial assistance policies without charge. Key elements used to determine eligibility include a patient's demonstrated inability to pay based on family size and household income related to federal income poverty guidelines.

The approximate cost of providing charity care was $2,645,000 and $1,683,000 for the years ended September 30, 2016 and 2015, respectively. The Company has estimated the cost of charity care based on a ratio of the cost to charges, with cost consisting of operating expenses, excluding depreciation, interest and management fees.

Provisions for Contractual Allowances and Bad Debts

Collection of receivables from third-party payers and patients is the Company's primary source of cash and is critical to its operating performance. The Company closely monitors its historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions for contractual allowances are made using the most accurate information available. However, due to the

Confidential LGP-SBC-000000299

complexities involved in these estimations, actual payments from payers may be materially different from the amounts management estimates and records. The Company's primary collection risks relate to uninsured patients and the portion of the bill which is the patient's responsibility, primarily co-payments and deductibles. Payments for services may also be denied due to issues over patient eligibility for medical coverage, the Company's ability to demonstrate medical necessity for services rendered and payer authorization of hospitalization.

Accounts receivable are reduced by an allowance for doubtful accounts. Valuation of the collectability of accounts receivable and provision for bad debts is based on historical collection experience, payer mix and the age of the receivables. Management routinely reviews accounts receivable balances in conjunction with these factors and other economic conditions which might ultimately affect the collectability of the patient accounts, and makes adjustments to the Company's allowances as warranted. For receivables associated with services provided to patients who have third-party coverage, management analyzes contractually due amounts and subsequently calculates an allowance for doubtful accounts and provision for bad debts once the age of the accounts reaches a specific age category based on historical experience. For receivables associated with self-pay patients, management records a significant provision for bad debts beginning in the period services were provided based on past experience that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The allowance for doubtful accounts as a percent of gross accounts receivable decreased from 27% at September 30, 2015 to 26% at September 30, 2016. The allowance for doubtful accounts was $91,723,000 and $49,822,000 as of September 30, 2016 and 2015, respectively. The decrease in the allowance for doubtful accounts as a percent of gross accounts receivable was due primarily to the acquisition of Crozer during the year ended September 30, 2016. Crozer's allowance for doubtful accounts as a percent of gross accounts receivable was 23% as of September 30, 2016.

Legislation

All of the Company's hospital facilities are subject to the Emergency Medical Treatment and Active Labor Act ("EMTALA"). This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions exists regardless of a patient's ability to pay for treatment. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay. Penalties for violations of EMTALA include civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. The Company believes that it is in compliance with EMTALA and is not aware of any pending or threatened EMTALA investigations involving allegations of potential wrongdoing that would have a material effect on the Company's consolidated financial statements.

See Note 12 regarding the *Affordable Care Act*.

Other Revenues

Other revenues consist primarily of meaningful use incentive revenue, rental revenue from operating leases, tuition revenue, and Crozer Health Club and other revenues and totaled $9,582,000 and $5,371,000 for the years ended September 30, 2016 and 2015, respectively.

A summary of other revenues recorded during the years follows:

Meaningful Use incentives: The American Recovery and Reinvestment Act of 2009 ("ARRA") established incentive payments under the Medicare and Medicaid programs for certain professionals and hospitals that meaningfully use certified electronic health record ("EHR") technology or adopt or implement such technology. The Medicare incentive payments will be paid out to qualifying hospitals over four consecutive years on a transitional schedule. To qualify for Medicare incentives, hospitals and physicians must meet EHR "meaningful use" criteria that become more stringent over three stages.

Medicaid programs and payment schedules vary from state to state. The Medicaid programs require hospitals to register for the program prior to 2016, to engage in efforts to adopt, implement or upgrade certified EHR technology in order to qualify for the initial year of participation, and to demonstrate meaningful use of certified EHR technology in order to qualify for payment for up to three additional years.

For the years ended September 30, 2016 and 2015, the Company recorded revenues of a nominal amount and $1,150,000, respectively, related to the Medicare and Medicaid Meaningful Use programs in the consolidated statements of operations. These incentives have been recognized following the grant accounting model, recognizing income ratably over the applicable reporting period as management becomes reasonably assured of meeting the required criteria. Subsequent changes to these estimates will be recognized in the consolidated statement of operations in the period in which additional information is available. Such estimates are subject to audit by the federal government, the state, or its designee.

Rental Revenue: Rental revenue from operating leases is recorded based on the fixed, minimum required rents (base rents) per the lease agreements. Rental revenue from base rents is recorded on the straight-line method over the terms of the related lease agreements. During the years ended September 30, 2016 and 2015, the Company recorded rental revenues of $3,817,000 and $2,417,000.

Tuition Revenue: St. Joseph Health Services of Rhode Island operates the St. Joseph School of Nursing and recorded tuition revenue of $1,727,000 and $1,639,000 during the years ended September 30, 2016 and 2015, respectively.

Crozer Health Club and Other Revenues: In addition to rental revenues, Crozer recognized other revenues for the period from July 1, 2016 (inception) through September 30, 2016 of $1,238,000 for health club membership dues, $1,019,000 for outside contract revenue, and $1,599,000 for other health club and miscellaneous revenues.

Medical Group Segment

Medical Group Revenues

Operating revenue of the Medical Group segment consists primarily of payments for medical services procured by the Affiliates under capitated contracts with various managed care providers including HMOs. Capitation revenue under HMO contracts is prepaid monthly to the Affiliates based on the number of enrollees electing any one of the Affiliates as their health care provider. See "Concentrations of Credit Risks" below for revenues received from the five largest contracted HMOs.

Capitation revenue (net of capitation withheld to fund risk share deficits discussed below) is recognized in the month in which the Affiliates are obligated to provide services. Minor ongoing adjustments to prior months' capitation, primarily arising from contracted HMOs' finalizing of monthly patient eligibility data for additions or subtractions of enrollees, are recognized in the month they are communicated to the Company. Additionally, Medicare pays capitation using a "Risk Adjustment model," which compensates managed care organizations and providers based on the health status (acuity) of each enrollee. Health

Confidential

plans and providers with higher acuity enrollees will receive more and those with healthier enrollees will receive less. Under Risk Adjustment, capitation is determined based on health severity, measured using patient encounter data. Capitation is paid on an interim basis based on data submitted for the enrollee for the preceding year and is adjusted in subsequent periods (generally in the Company's fourth quarter) after the final data is compiled. Positive or negative capitation adjustments are made for Medicare enrollees with conditions requiring more or less healthcare services than assumed in the interim payments. Since the Company cannot reliably predict these adjustments, periodic changes in capitation amounts earned as a result of Risk Adjustment are recognized generally in the fourth quarter when those changes are communicated by the health plans to the Company. The Company received and recorded as additional revenue, approximately $13,601,000 and $17,503,000, respectively, in positive capitation risk adjustments for the Medical Group segment during the years ended September 30, 2016 and 2015, respectively.

HMO contracts also include provisions to share in the risk for hospitalization, whereby the Affiliate can earn additional incentive revenue or incur penalties based upon the utilization of hospital services. Typically, any shared risk deficits are not payable until and unless the Company generates future risk sharing surpluses, or if the HMO withholds a portion of the capitation revenue to fund any risk share deficits. At the termination of the HMO contract, any accumulated risk share deficit is typically extinguished. Due to the lack of access to information necessary to estimate the related costs, shared-risk amounts receivable from the HMOs are only recorded when such amounts are known. Risk pools for the prior contract years are generally final settled in the third or fourth quarter of the following fiscal year. For the years ended September 30, 2016 and 2015, Medical Group revenues included approximately $11,827,000 and $8,402,000, respectively, of additional revenues due to favorable settlements on prior year risk-sharing arrangements. At September 30, 2016 and 2015, contingent liabilities for carry-forward risk-pool deficits expected to be forgiven, or offset against future surpluses were approximately $7,953,000 and $6,422,000, respectively, based on the available information from the health plans.

The Company also receives incentives under "pay-for-performance" programs for quality medical care based on various criteria. These incentives, which are included in other revenues within Medical Group revenues, are generally recorded in the third and fourth quarters of the fiscal year when such amounts are known. During the year ended September 30, 2016 and 2015, the Company recognized $3,560,000 and $9,059,000, respectively, related to a shared savings incentive program with one health plan. Pay-for-performance revenues recorded during the years ended September 30, 2016 and 2015 were $6,263,000 and $11,387,000, respectively.

Management fee revenue is earned in the month the services are rendered. Management fee arrangements with unaffiliated entities provide for compensation ranging from 6.5% to 12% of revenues. Management fee revenues recorded during the years ended September 30, 2016 and 2015 were $10,760,000 and $7,814,000, respectively.

Medical Group Cost of Revenues

The cost of health care services consists primarily of capitation and claims payments, pharmacy costs and incentive payments to contracted providers. These costs are recognized in the period incurred, or when the services are provided. Claims costs also include an estimate of the cost of services which have been incurred but not yet reported to the Company. The estimate for accrued medical costs is based on projections of costs using historical studies of claims paid and adjusted for seasonality, utilization and cost trends. These estimates are subject to trends in loss severity and frequency. Although considerable variability is inherent in such estimates, management records its best estimate of the amount of medical claims incurred at each reporting period. Estimates are continually monitored and reviewed and, as

settlements are made or estimates adjusted, differences are reflected in current operations. See Note 14 for changes in claims estimates during the years ended September 30, 2016 and 2015.

In addition to contractual reimbursements to providers, the Company also makes discretionary incentive payments to physicians, which are in large part based on the pay-for-performance and shared risk revenues and favorable senior capitation risk adjustment payments received by the Company. Since the Company records these revenues generally in the third or fourth quarter of each fiscal year when the incentives and capitation adjustments due from the health plans are known, the Company also finalizes the discretionary physician bonuses in the same periods. During the years ended September 30, 2016 and 2015, the Company recorded discretionary physician incentives expense totaling approximately $16,311,000 and $14,082,000, respectively. As of September 30, 2016 and 2015, physician bonus accruals of approximately $9,665,000 and $9,021,000, respectively, were included in accounts payable and other accrued liabilities.

The Company also periodically evaluates the need to establish premium deficiency reserves for the probability that anticipated future health care costs could exceed future capitation payments from HMOs under capitated contracts and, where appropriate, records a premium deficiency reserve.

The Company, for certain matters, maintains stop loss coverage for health care costs that are in excess of set thresholds.

Global Risk Management Segment

Global Risk Management Revenues

Operating revenue of the Global Risk Management segment consists primarily of payments for medical services procured under global capitation arrangements from third-party health plans. Capitation revenue under these global capitation contracts is prepaid monthly to the Global Risk Management segment based on the number of enrollees. Entities within the Global Risk Management segment entered into Management Services Agreements with the Hospital and Medical Group segments, under which 98% of capitation revenue received is transferred to these segments.

Similar to the Medical Group segment, capitation revenue is recognized in the month in which the Global Risk Management segment is obligated to provide services. Minor ongoing adjustments to prior months' capitation, primarily arising from contracted HMOs' finalizing of monthly patient eligibility data for additions or subtractions of enrollees, are recognized in the month they are communicated to the Company. Additionally, Medicare pays capitation using a "Risk Adjustment model," which compensates managed care organizations and providers based on the health status (acuity) of each enrollee. Health plans and providers with higher acuity enrollees will receive more and those with healthier enrollees will receive less. Under Risk Adjustment, capitation is determined based on health severity, measured using patient encounter data. Capitation is paid on an interim basis based on data submitted for the enrollee for the preceding year and is adjusted in subsequent periods (generally in the Company's fourth quarter) after the final data is compiled. Positive or negative capitation adjustments are made for Medicare enrollees with conditions requiring more or less healthcare services than assumed in the interim payments. Since the Company cannot reliably predict these adjustments, periodic changes in capitation amounts earned as a result of Risk Adjustment are recognized generally in the fourth quarter when those changes are communicated by the health plans to the Company. During the years ended September 30, 2016 and 2015, the Global Risk Management Segment recognized capitation risk adjustments of $2,108,000 and $0.

Global Risk Management Cost of Revenues

The cost of health care services consists primarily of the transfer of capitation revenue to the Hospital and Medical Group segments under the Management Services Agreements, and capitation and claims

payments. These costs are recognized in the period incurred, or when the services are provided. Claims costs also include an estimate of the cost of services which have been incurred but not yet reported to the Company. The estimate for accrued medical costs is based on projections of costs using historical studies of claims paid and adjusted for seasonality, utilization and cost trends. These estimates are subject to trends in loss severity and frequency. Although considerable variability is inherent in such estimates, management records its best estimate of the amount of medical claims incurred at each reporting period. Estimates are continually monitored and reviewed and, as settlements are made or estimates adjusted, differences are reflected in current operations.

The Company also periodically evaluates the need to establish premium deficiency reserves for the probability that anticipated future health care costs could exceed future capitation payments from HMOs under capitated contracts and, where appropriate, records a premium deficiency reserve.

The Company, for certain matters, maintains stop loss coverage for health care costs that are in excess of set thresholds.

Property, Improvements and Equipment

Property, improvements and equipment are stated on the basis of cost or, in the case of acquisitions, at their acquisition date fair values. Depreciation is provided using the straight-line method over the estimated useful lives of the assets, and amortization of leasehold improvements is provided using the straight-line basis over the shorter of the remaining lease period or the estimated useful lives of the leasehold improvements. Leasehold improvements are generally depreciated over five to ten years, buildings are depreciated over five to 28 years, equipment is depreciated over two to eight years and furniture and fixtures are depreciated over two to seven years. Equipment capitalized under capital lease obligations are amortized over the lesser of the life of the lease or the useful life of the asset.

As more fully described in Note 12, the Company is required to comply with certain seismic standards as required by the state of California by January 1, 2020. The useful life of buildings subject to seismic retrofit requirements may be limited if the Company does not make the necessary upgrades by the required compliance date.

Goodwill and Other Intangible Assets

Goodwill totaled $341,488,000 and $159,821,000 at September 30, 2016 and 2015, respectively, and arose as a result of the ProMed, Alta, SCH Culver City, Nix Health, Prospect CharterCARE Physicians medical practices, PMCA, East Orange, and Crozer acquisitions. Goodwill represents the excess of the consideration paid and liabilities assumed over the fair value of the net assets acquired, including identifiable intangible assets.

Goodwill is not amortized; rather it is reviewed annually for impairment for each reporting unit, or more frequently if impairment indicators arise. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. A two-step impairment test is used to identify potential goodwill impairment and to measure the amount of goodwill impairment loss to be recognized, if any. The Company has six reporting units with goodwill, consisting of the Southern California Hospitals (which includes SCH Hollywood, SCH Van Nuys, SCH Culver City, Los Angeles Community Hospital, Norwalk Community Hospital, Bellflower and Foothill), SCH Culver City, Nix Health, the MSOs and Medical Groups located in California ("California Medical Groups"), CharterCARE, East Orange and Crozer. The Southern California Hospitals reporting unit was a change in reporting units during the year ended September 30, 2016, and the California Medical Groups reporting unit was a change in reporting units during the year ended September 30, 2015; see Note 6.

Confidential LGP-SBC-000000304

The Company tests for goodwill impairment as of September 30 each year. In evaluating whether indicators of impairment exist, the Company considers adverse changes in market value, laws and regulations, profitability, cash flows, ability to maintain enrollment and renew payer contracts at favorable terms, among other factors. The goodwill impairment test is a two-step process. The first step consists of estimating the fair value of the reporting unit based on a weighted combination of (i) the guideline company method that utilizes revenue or earnings multiples for comparable publicly-traded companies, and (ii) a discounted cash flow model that utilizes expected future cash flows, the timing of those cash flows, and a discount rate (or weighted average cost of capital, which considers the cost of equity and cost of debt financing expected by a typical market participant) representing the time value of money and the inherent risk and uncertainty of the future cash flows. If the estimated fair value of the reporting unit is less than its carrying value, a second step is performed to compute the amount of the impairment by determining the "implied fair value" of the goodwill, which is compared to its corresponding carrying value. The Company recorded goodwill impairment related to the closure of Nix CGH and classification as discontinued operations effective September 30, 2016 (see Note 5). The Company's impairment test related to goodwill during the years ended September 30, 2016 and 2015, resulted in no additional impairment charges.

Long-Lived Assets and Amortizable Intangibles

Amortizable intangible assets totaled $41,897,000 and $28,820,000, net of accumulated amortization at September 30, 2016 and 2015, respectively, and arose as a result of the ProMed, Alta, Nix Health, NGMA, PCC, CharterCARE Physicians medical practices, East Orange and Crozer acquisitions. Intangible assets include customer relationships, trade names, favorable leasehold, and physician guarantees. The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The Company considers assets to be impaired and writes them down to fair value if estimated undiscounted cash flows associated with those assets are less than their carrying amounts. Fair value is based upon the present value of the associated cash flows. Changes in circumstances (for example, changes in laws or regulations, technological advances or changes in strategies) may also reduce the useful lives from initial estimates. Changes in planned use of intangibles may result from changes in customer base, contractual agreements, or regulatory requirements. In such circumstances, management will revise the useful life of the long-lived asset and amortize the remaining net book value over the adjusted remaining useful life. There were no impairments recorded during the years ended September 30, 2016 and 2015.

Medical Malpractice Liability Insurance

The individual physicians who contract with the Affiliates carry their own medical malpractice insurance. In the Hospital Services segment, the Company's hospitals carry professional and general liability insurance to cover medical malpractice claims under claims-made policies. Under the policies, insurance premiums cover only those claims actually reported during the policy term. Should the claims-made policy not be renewed or replaced with equivalent insurance, claims related to occurrences during the policy term but reported subsequent to the policy's termination may be uninsured. The Company's hospitals have a consolidated policy for professional and general liability insurance with separate retentions for each entity. East Orange was fully insured for professional and general liability claims with no deductible from March 1, 2016 through September 30, 2016. Crozer was insured for professional and general liability claims through Prospect Medical Holding Risk Retention Group, Inc. for primary coverage from July 1, 2016 through September 30, 2016. The Pennsylvania MCARE fund provides the $500,000 in excess of $500,000 RRG malpractice coverage for Crozer.

For the current fiscal year, the RRG provided primary malpractice insurance ($500,000 per occurrence and $2,500,000 in the aggregate) and general liability ($1,000,000 per occurrence and $2,000,000 in the

aggregate). In addition, the RRG provided coverage for losses of $4,000,000 in excess of $1,000,000 for each hospital professional liability claim with no aggregate limit. The RRG also provides additional layers of excess coverage over $5,000,000 up to $20,000,000, which are 100% reinsured by third party insurance carriers through multiple layers. The reserve for losses, which was determined with the assistance of a third party actuarial consulting firm, included estimates of claims incurred but not reported, was approximately $2,753,000 as of September 30, 2016.

GAAP requires that a health care organization record and disclose the estimated costs of medical malpractice claims in the period of the incident of malpractice, if it is reasonably possible that liabilities may be incurred and losses can be reasonably estimated. The Company has recognized an estimated liability for incurred but not reported claims and the self-insured risks (including deductibles and potential claims in excess of policy limits) based upon an actuarial valuation of the Company's historical claims experience of the Company's hospitals. At September 30, 2016 and 2015, the total gross claims liability, was $14,591,000 and $6,632,000 and reinsurance recoverable on unpaid losses were $4,107,000 and $1,406,000, respectively, and were estimated using a discount factor of 4%. In addition, with the acquisitions of East Orange and Crozer during the current fiscal year, the Company recorded IBNR related to tail coverage for both East Orange and Crozer, which were determined with the assistance of a third party actuarial consulting firm. At September 30, 2016, IBNR reserves related to tail coverage for East Orange and Crozer was $2,223,000 and $15,190,000, respectively, using a discount factor of 4%.

The claims reserve is based on the best data available to the Company. The estimate, however, is subject to a significant degree of inherent variability. The estimate is continually monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of medical malpractice liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims. Management is not aware of any potential medical malpractice claims whose settlement, if any, would have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Workers' Compensation Insurance

The workers' compensation coverage provides the statutory benefits required by law with a $250,000 deductible policy with limits of $1,000,000 per occurrence and aggregate for the Companies' entities located in California. Nix Health has opted out of the Texas Workers' Compensation system as a non-subscriber, and provides its employees with benefits for occupational injury or disease through an ERISA plan. Nix Health has an Employer's Excess Indemnity policy with a $25,000 deductible with limits of $10,000,000 per occurrence and $25,000,000 aggregate. CharterCARE was fully insured for workers' compensation claims with no deductible. East Orange was fully insured for workers' compensation claims with no deductible from March 1, 2016 through September 30, 2016. Crozer has a workers' compensation policy with a $500,000 deductible, with limits of $1,000,000 per occurrence and aggregate. At September 30, 2016 and 2015, included in accrued salaries, wages and benefits are accruals for uninsured claims and claims incurred but not reported of approximately $17,675,000 and $14,110,000 and reinsurance recoverable on unpaid losses were $5,829,000 and $5,220,000, respectively. The amounts are estimated based upon an actuarial valuation of their claims experience, using a discount factor of 4%.

The claims reserve is based on the best data available to the Company. The estimate, however, is subject to a significant degree of inherent variability. The estimate is monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of the claims liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims.

Confidential LGP-SBC-000000306

Management is not aware of any potential claims whose settlement, if any, would have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Asset Retirement Obligations

The Company recognizes the fair value of a liability for legal obligations associated with asset retirements in the period in which it is incurred, if a reasonable estimate of the fair value of the obligation can be made. Over time, the liability is accreted to its present value each period. Upon settlement of the obligation, any difference between the cost to settle the asset retirement obligation and the liability recorded is recognized as a gain or loss in the statement of operations. The Company has accrued $5,056,000 and $4,583,000 in other long-term liabilities related to asset retirement obligations for the CharterCARE and Crozer hospitals as of September 30, 2016 and 2015, respectively.

Stock Options

On December 15, 2010, the Board of Directors (the "Ivy Board") of Ivy Holdings adopted the 2010 Stock Option Plan of Ivy Holdings Inc. (the "Ivy Plan") and, on December 16, 2010, the stockholders of Ivy Holdings adopted the Ivy Plan. The Ivy Plan provides that it shall be administered by the Compensation Committee of the Ivy Board. The Ivy Plan includes an Incentive Stock Option Agreement and a Non-Qualified Stock Option Agreement to be used in connection with the grant of options under the Ivy Plan. These options granted under the Ivy Plan are exercisable into Ivy Holdings stock and vest based on a number of criteria.

On June 30, 2015, the Board of Directors of Ivy Holdings adopted the First Amendment to the Ivy Plan and concurrently, on June 30, 2015, the stockholders of Ivy Holdings approved the First Amendment to the Ivy Plan (the "Amended Ivy Plan"). Pursuant to the Amended Ivy Plan, the Board of Directors authorized the issuance of options exercisable for an additional 13,972 shares of common stock of Ivy Holdings to employees, certain consultants and independent members of the boards of directors of Ivy Holdings and its subsidiaries (including the Company and its subsidiaries). These options granted under the Amended Ivy Plan are exercisable into Ivy Holdings stock and vest based on a number of criteria, including the same criteria as options granted under the Ivy Plan as well as the occurrence of certain corporate transactions, including a change in control of Ivy Holdings, as defined in the Incentive Stock Option Agreements; see Note 10.

Compensation costs for option awards are measured and recognized in the consolidated financial statements based on their grant date fair value, net of estimated forfeitures over the awards' service period. Options subject to variable accounting treatment are subject to revaluation at the end of each reporting period. The Company uses the Black-Scholes option pricing model and a single option award approach to estimate the fair value of stock options granted. The fair value of restricted stock grants are determined on the date of grant, based on the number of shares granted and the quoted price or estimated fair market value of the Company's common stock. Equity-based compensation is classified within the same line items as cash compensation paid to employees. Compensation costs related to stock options that vest or are exercisable when certain corporate transactions occur, including a change in control, are recognized at the time that such an event occurs.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with initial maturities of 90 days or less to be cash equivalents. Cash and cash equivalents are primarily comprised of deposits with banks. The Company maintains its cash at banks with high credit-quality ratings.

Restricted Cash

At September 30, 2016 and 2015, $1,725,000 and $1,277,000 was restricted for research at CharterCARE hospitals as of September 30, 2016 and 2015, respectively. An additional $4,392,000 and $1,308,000 was restricted for various other purposes including regulatory requirements and letters of credit as of September 30, 2016 and 2015, respectively.

Restricted Investments

The Company is required to keep restricted deposits by certain HMOs for the payment of claims. Such restricted deposits are classified as a current asset in the accompanying consolidated balance sheets, as they are restricted for payment of current liabilities. Investments also include certificates of deposit with maturity dates of more than 90 days when purchased.

Inventories

Inventories of supplies are valued at the lower of amounts that approximate the weighted average cost or market. Inventories consist primarily of medical and surgical supplies and pharmaceuticals.

Deferred Financing Costs

Deferred financing costs are amortized over the period in which the related debt is outstanding using the effective interest method and are classified as a deduction from the carrying amount of the related debt.

Deferred financing costs at September 30, 2016 and 2015 are as follows (in thousands):

	2016			2015		
	Gross Book Value	Accumulated Amortization	Net Book Value	Gross Book Value	Accumulated Amortization	Net Book Value
Deferred financing costs	$ 12,251	$ 602	$11,649	$ 14,398	$ 7,165	$ 7,233

During the year ended September 30, 2016, the Company wrote off $5,587,000 of unamortized deferred financing costs and capitalized $12,251,000 related to Senior Secured Notes (see Note 9).

Income Taxes

Deferred income tax assets and liabilities are recognized for differences between financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. To the extent a deferred tax asset cannot be recognized under the preceding criteria, allowances must be established. The impact on deferred taxes of changes in tax rates and laws, if any, are applied to the years during which temporary differences are expected to be settled and reflected in the financial statements in the period of enactment. The Company recognizes interest and penalties associated with income tax matters and unrecognized tax benefits in the income tax expense line item of the statements of operations. For the years ended September 30, 2016 and 2015, the Company incurred $225,000 and $0 of interest and penalties related to incomes taxes.

An entity is required to evaluate its tax positions using a two-step process. First, the entity should evaluate the position for recognition. An entity should recognize the financial statement benefit of a tax position if it determines that it is more likely than not that the position will be sustained on examination. Next, the entity should measure the amount of benefit that should be recognized for those tax positions that meet the more-likely-than-not test.

Consolidated federal tax returns are filed, with the exception of PMG and NGMA, which file their own federal tax returns. The Company files separate state tax returns for California, Texas, Rhode Island, Pennsylvania, Connecticut and New Jersey. The Company's filed tax returns are generally subject to examination by the IRS and state tax boards for 3 to 4 years.

Sale-Leaseback Transactions

The Company evaluates sale-leaseback transactions by determining whether the transaction meets the qualifying criteria to be recognized as a sale-leaseback, including the transfer of risk and rewards of ownership as well as the absence of continuing involvement of the Company (see Note 9).

Comprehensive Income

Comprehensive income consists of net income and other gains and losses affecting stockholder's equity that, under generally accepted accounting principles, are excluded from net (loss) income attributable to the Company. For the Company such items consist primarily of unrealized gains or losses on debt and equity securities as well as changes related to pension and other postretirement liabilities that are not recognized immediately in net periodic benefit costs. See Note 11.

Fair Value of Financial Instruments

Financial instruments consist primarily of cash and cash equivalents, restricted cash, restricted investments, patient and other accounts receivables, accrued salaries and benefits, accounts payable and accrued expenses, medical claims and related liabilities, amounts due to government agencies, notes receivable and payable, capital lease obligations, debt, and other liabilities. The carrying amounts of current assets and liabilities approximate their fair value due to the relatively short period of time between the origination of the instruments and their expected realization.

Fair Value Measurement

Relevant accounting guidance establishes a framework for measuring fair value and clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants.

The guidance requires disclosure about how fair value is determined for assets and liabilities and establishes a hierarchy for which these assets and liabilities must be grouped, based on significant levels of inputs as follows: Level 1 quoted prices in active markets for identical assets or liabilities; Level 2 quoted prices in active markets for similar assets and liabilities and inputs that are observable for the asset or liability; or Level 3 unobservable inputs for the asset or liability, such as discounted cash flow models or valuations. The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The Company's Level 1 assets include cash and cash equivalents and investments (certificates of deposit and money market mutual funds). The inputs for fair value of goodwill and intangible assets (including long lived assets and intangible assets subject to amortization) would be based on Level 3 inputs as data used for such fair value calculations would be based on discounted cash flows that are not observable from the market, directly or indirectly.

Financial Items Measured at Fair Value on a Recurring Basis

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis and where they are classified within the hierarchy (in thousands):

	Total	Level 1	Level 2	Level 3
As of September 30, 2016				
Certificates of deposit	$ 1,302	$ 1,302	$ -	$ -
Mutual funds	3,266	3,266	-	-
Total	$ 4,568	$ 4,568	$	$
As of September 30, 2015				
Certificates of deposit and money market mutual funds	$ 1,266	$ 1,266	$ -	$ -

The Company's investments are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. The Company's defined benefit pension plan assets are also measured at fair value; see Note 11.

The fair values of the Company's current financial liabilities approximate their reported carrying amounts. The carrying values and the fair values of long term financial liabilities that qualify as financial instruments under the guidance are as follows (in thousands):

	2016		2015	
September 30,	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Liabilities:				
Long-term debt	$ 613,005	$ 613,005	$ 415,466	$ 445,269

As of September 30, 2016, the Company's carrying amount of long-term debt approximated the fair value. The fair value of the Company's long-term debt was determined based on market prices as of September 30, 2015.

Nonfinancial Items Measured at Fair Value on a Nonrecurring Basis

Nonfinancial assets such as goodwill and identifiable intangible assets are measured at fair value when there is an indicator of impairment and recorded at fair value only when impairment is recognized. The Company performs an annual impairment test on the goodwill, and performs an impairment test on the intangibles when there are indications of impairment.

Concentrations of Credit Risk

Cash and cash equivalents are maintained at financial institutions and, at times, balances may exceed federally insured limits of $250,000 per depositor of each financial institution. The Company has not experienced any losses to date related to these balances.

Financial instruments that potentially subject the Company to concentrations of credit risk consist of receivables due from Medicare, Medicaid (Medi-Cal in California), patients, and health plans including shared-risk arrangements.

Confidential LGP-SBC-000000310

The Company invests excess cash in liquid securities at institutions with strong credit ratings, following established guidelines relative to diversification and maturities to maintain safety and liquidity. These guidelines are periodically reviewed and modified to take into consideration trends in yields and interest rates and principal risk. Management attempts to schedule the maturities of the Company's investments to coincide with the Company's expected cash requirements. Credit risk with respect to receivables is limited since amounts are generally due from large HMOs within the Medical Group Management segment and from the Medicare and Medicaid (Medi-Cal in California) programs within the Hospital Services segment. Management reviews the financial condition of these institutions on a periodic basis and does not believe the concentration of cash or receivables results in a high level of risk.

For the years ended September 30, 2016 and 2015, the Hospital Services segment received a total of 66% and 67% of its net patient revenues from Medicare and Medicaid programs, respectively, and the Medical Group segment received a total of 65% and 59%, respectively, of their capitation revenues from its five largest HMOs, as follows (in thousands):

Years Ended September 30,	**2016**	**% of Total Revenue**		2015	% of Total Revenue
Hospital Services:					
Government Payers:					
Medicare	**$ 410,147**	**32%**		$ 315,545	31%
Medicaid	**437,968**	**34%**		367,842	36%
Total	**$ 848,115**	**66%**		$ 683,387	67%
Medical Group:					
HMO A	$ 64,346	20%	HMO A	39,759	13%
HMO B	42,417	13%	HMO B	38,934	12%
HMO F	37,137	12%	HMO C	37,900	12%
HMO C	35,300	11%	HMO D	34,806	11%
HMO E	27,898	9%	HMO E	32,239	11%
Total	$ 207,098	65%		$ 183,638	59%

The Global Risk Management segment received 100% of their revenues from four health plans during the year ended September 30, 2016.

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities at the dates, and for the periods, that the consolidated financial statements are prepared. Actual results could materially differ from those estimates. Principal areas requiring the use of estimates include third party settlements, settlements under risk sharing programs, allowances for contractual discounts and doubtful accounts, accruals for medical claims, impairment of goodwill, long-lived assets and intangible assets, share-based payments, professional and general liability claims and workers' compensation claims, reserves for pension obligations and other postretirement benefit reserves, reserves for outcome of legislation and valuation allowances against deferred tax assets.

Recently Adopted Accounting Pronouncements

In July 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-11 that requires an unrecognized tax benefit or portion of an unrecognized tax benefit to be presented as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward except when certain conditions exist. The amendment is effective for the Company for fiscal years beginning after December 15, 2014, including interim periods in 2014. The Company adopted this guidance effective October 1, 2015 with no material impact to its consolidated financial statements.

In April 2015, the FASB issued ASU No. 2015-03, "Simplifying the Presentation of Debt Issuance Costs." This ASU amends existing guidance to require the presentation of debt issuance cost on the balance sheet as a deduction from the carrying amount of the related debt, instead of an asset. This ASU is effective for reporting periods beginning after December 15, 2015 and early adoption is permitted. The Company elected early adoption of ASU No. 2015-03 effective October 1, 2014. The following table discloses the impact of the adoption of ASU No. 2015-03 on the amounts previously reported in the consolidated balance sheet (in thousands):

Balance Sheet as of September 30, 2015	As Previously Reported	Impact of ASU No. 2015-17	As Reported
Deferred financing costs, net	$ 7,233	$ (7,233)	$ -
Total assets	$ 782,851	$ (7,233)	$ 775,618
Long-term debt, net of current portion	$ 422,699	$ (7,233)	$ 415,466
Total liabilities	$ 746,411	$ (7,233)	$ 739,178

In November 2015, the FASB issued ASU No. 2015-17, "Income Taxes (Topic 740), Balance Sheet Presentation of Deferred Tax Assets and Liabilities". This ASU amends existing guidance by simplifying the presentation of deferred income taxes on a net basis as non-current deferred tax assets or liabilities. ASU No. 2015-17 did not modify the requirement that deferred tax assets and liabilities of a tax-paying component of an entity be offset and presented as a single amount. This ASU is effective for reporting reports beginning after December 15, 2017 with earlier adoption permitted. The Company elected early adoption of ASU No. 2015-17 effective October 1, 2013.

New Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (ASU 2014-09)," as amended by ASU 2015-14. The core principle of ASU 2014-09 is built on the contract between a vendor and a customer for the provision of goods and services, and attempts to depict the exchange of rights and obligations between the parties in the pattern of revenue recognition based on the consideration to which the vendor is entitled. To accomplish this objective, the standard requires five basic steps: (i) identify the contract with the customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract, (v) recognize revenue when (or as) the entity satisfies a performance obligation. Nonpublic entities will apply the new standard for annual periods beginning after December 15, 2018, including interim periods therein. Three basic transition methods are available — full retrospective, retrospective with certain practical expedients, and a cumulative effect approach. Under the third alternative, an entity would apply

the new revenue standard only to contracts that are incomplete under legacy U.S. GAAP at the date of initial application (e.g. January 1, 2019) and recognize the cumulative effect of the new standard as an adjustment to the opening balance of retained earnings. That is, prior years would not be restated and additional disclosures would be required to enable users of the financial statements to understand the impact of adopting the new standard in the current year compared to prior years that are presented under legacy U.S. GAAP. Early adoption is permitted for fiscal years beginning after December 15, 2016. The Company is currently evaluating the effect of this guidance on its consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-15, "Presentation of Financial Statements - Going Concern: Disclosures of Uncertainties about an Entity's Ability to Continue as a Going Concern." This ASU provides guidance about management's responsibility to evaluate whether there is substantial doubt about an entity's ability to continue as a going concern and to provide related footnote disclosures. Specifically, this ASU provides a definition of the term substantial doubt and requires an assessment for a period of one year after the date that the financial statements are issued (or available to be issued). It also requires certain disclosures when substantial doubt is alleviated as a result of consideration of management's plans and requires an express statement and other disclosures when substantial doubt is not alleviated. The new standard will be effective for reporting periods beginning after December 15, 2016, with early adoption permitted. The Company will apply the provisions of this standard upon adoption.

In January 2016, the FASB issued ASU No. 2016-01, "Financial Instruments" ("ASU 2016-01"). ASU 2016-01 requires all equity investments to be measured at fair value with changes in fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee). ASU 2016-01 also requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition, ASU 2016-01 eliminates the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities. ASU 2016-01 is effective for annual and interim periods beginning after December 15, 2017. The Company is currently evaluating the standard and the impact on its consolidated financial statements and footnote disclosures.

In February 2016, the FASB issued ASU No. 2016-02, "Leases" ("ASU 2016-02"). The core principle of ASU 2016-02 is that a lessee should recognize the assets and liabilities that arise from leases, including operating leases. Under the new requirements, a lessee will recognize in the statement of financial position a liability to make lease payments (the lease liability) and the right-of-use asset representing the right to the underlying asset for the lease term. For leases with a term of 12 months or less, the lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee have not significantly changed from previous GAAP. The standard is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application of the amendment is permitted. The Company is currently evaluating the standard and the impact on its consolidated financial statements and footnote disclosures.

In March 2016, the FASB issued ASU No. 2016-07, "Investments - Equity Method and Joint Ventures" ("ASU 2016-07"). ASC 2016-07 eliminates the requirement for an entity to retroactively adopt the equity method of accounting if an investment qualifies for use of the equity method as a result of an increase in the level of ownership or degree of influence. Rather, ASU 2016-07 requires that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting on a prospective basis upon adoption. The standard is effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. Early

application of the amendment is permitted. The Company is currently evaluating the standard and the impact on its consolidated financial statements and footnote disclosures.

In March 2016, the FASB issued ASU 2016-09, "Compensation – Stock Compensation (Topic 718)" ("ASU 2016-09"). The updated standard simplifies several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. ASU 2016-09 is effective for non-public business entities for annual reporting periods beginning after December 15, 2017, including interim periods within those annual reporting periods. Early adoption is permitted. The Company is currently evaluating the impact of its pending adoption of the new standard on its consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230)" ("ASU 2016-15"). The updated standard addresses eight specific cash flow issues with the objective of reducing diversity in practice. ASU 2016-15 is effective for non-public business entities for annual reporting periods beginning after December 15, 2018, including interim periods within those annual reporting periods. Early adoption is permitted. The Company is assessing the impact of the adoption of ASU 2016-15 on the Company's consolidated financial statements.

3. Property, Improvements and Equipment

Property, improvements and equipment, consisted of the following (in thousands):

September 30,	**2016**	2015
Property, improvements and equipment:		
Land and land improvements	**$ 73,675**	$ 53,327
Buildings and improvements	**277,292**	134,730
Leasehold improvements	**22,169**	20,009
Equipment	**185,045**	106,919
Furniture and fixtures	**6,926**	6,891
	565,107	321,876
Less: accumulated depreciation	**(123,755)**	(83,671)
Property, improvements and equipment, net	**$ 441,352**	$ 238,205

At September 30, 2016 and 2015, the Company had assets under capitalized leases of approximately $33,118,000 and $20,299,000, respectively, and related accumulated depreciation of $21,766,000 and $14,356,000, respectively.

Depreciation expense was approximately $40,128,000 and $27,538,000 for the years ended September 30, 2016 and 2015, respectively.

4. Acquisitions

Effective March 1, 2016, Prospect EOGH, Inc. acquired substantially all of the assets and associated real estate of East Orange General Hospital, located in East Orange, New Jersey. The acquisition of East Orange was accounted for as a business combination using purchase accounting. All assets acquired and liabilities assumed were at fair value in accordance with GAAP. The Company incurred $1,800,000 of transaction

Confidential LGP-SBC-000000314

costs during the year ended September 30, 2016, which are included in General and Administrative expenses in the accompanying consolidated statements of operations.

The following table summarizes the assets acquired and liabilities assumed in connection with the East Orange acquisition as of March 1, 2016 (in thousands):

		Purchase Price Allocation (Preliminary)
Patient accounts receivable and other receivables	$	10,064
Prepaid expenses and other current assets		2,602
Property, improvements and equipment		38,851
Intangible assets		2,423
Other assets		20
Accounts payable and other current liabilities		(25,542)
Capital leases		(1,691)
Other long-term liabilities		(7,550)
Goodwill		3,531
Cash consideration, net of cash acquired	$	22,708

As asset purchases, the goodwill and intangible assets acquired are deductible for tax purposes. The purchase price allocation is preliminary as it may be adjusted for currently unknown assets or liabilities related to the pre-acquisition period, and adjustments to the fair value of property, plant and equipment, intangible assets, and goodwill for unknown factors related to the pre-acquisition period. These adjustments may be material.

Crozer

Effective July 1, 2016, Prospect Crozer, LLC acquired certain assets and assumed certain liabilities of Crozer-Keystone Health System, located in Delaware County, Pennsylvania and the surrounding areas. The acquisition of Crozer was accounted for as a business combination using purchase accounting. All assets acquired and liabilities assumed were at fair value with the exception of the defined benefit pension liability and other post retirement employee benefits which allows for an exception to fair value accounting for business combinations in accordance with GAAP. The recognized tax bases (the amount that is attributable for tax purposes) of the assets and liabilities are compared to the financial reporting values of the acquired assets and assumed liabilities (book bases) to determine the appropriate temporary differences. The Company identified a temporary difference related to assumed pension liabilities, due primarily to differences in tax law regarding when a liability is or is not assumed in an asset acquisition; this difference in the treatment of the pension liability resulted in the recording of a deferred tax asset of approximately $40.7 million, which is reflected in the acquisition accounting. The Company incurred $4,200,000 of transaction costs during the year ended September 30, 2016, which are included in General and Administrative expenses in the accompanying consolidated statements of operations.

Confidential LGP-SBC-000000315

The following table summarizes the assets acquired (at fair value) and liabilities assumed (at fair value, except pension obligation, see above) in connection with the Crozer acquisition as of July 1, 2016 (in thousands):

		Purchase Price Allocation (Preliminary)
Patient accounts receivable	$	89,901
Other receivables, prepaid expenses and other current assets		57,147
Property, improvements and equipment		153,785
Deferred income taxes, long-term		40,746
Intangible assets		17,620
Other assets		1,272
Accounts payable and other current liabilities		(102,162)
Capital leases		(19,116)
Other long-term liabilities		(25,158)
Pension obligation		(330,331)
Goodwill		172,744
Cash consideration, net of cash acquired	$	56,448

As asset purchases, the goodwill and intangible assets acquired are deductible for tax purposes. The purchase price allocation is preliminary as it may be subject to further working capital and other adjustments under the asset purchase agreement due to currently unknown assets or liabilities related to the pre-acquisition period, income taxes, and adjustments to the fair value of property, plant and equipment, intangible assets, and goodwill for unknown factors related to the pre-acquisition period. These adjustments may be material. Of the total cash consideration of $56,488,000, $12,930,000 was accrued and included in accounts payable and other accrued liabilities in the accompanying consolidated balance sheets as of September 30, 2016.

Primary and Multi-Specialty Clinics of Anaheim

Effective December 1, 2015, NGMA entered into a Stock Purchase Agreement pursuant to which it simultaneously closed its acquisition of all issued and outstanding shares of Primary and Multi-Specialty Clinics of Anaheim, Inc. ("PMCA"). PMCA operates a medical practice consisting of primary and multi-specialty clinics in Orange County, California. The purchase price consisted of cash consideration less certain liabilities and adjustments as specified in the Stock Purchase Agreement. Included within the purchase price is $1,080,000 of future consideration which was not yet paid as of September 30, 2016. The Company elected to treat the stock acquisition as a taxable asset acquisition under Internal Revenue Code Section 338.

The following table summarizes the assets acquired (at fair value) and liabilities assumed (at fair value) in connection with the PMCA acquisition as of December 1, 2015 (in thousands):

		Purchase Price Allocation
Property, improvements and equipment	$	169
Other assets		219
Accrued expenses		(11)
Goodwill		5,050
Cash consideration, net of cash acquired	$	5,427

Confidential LGP-SBC-000000316

Medical Practices Acquisitions

During the year ended September 30, 2016, CharterCARE Physicians and Nix Physicians, Inc., a subsidiary of Nix Health, entered into three asset purchase agreements to acquire medical practices with primary care physicians as well as specialties in general surgery and orthopedic services in Rhode Island and Texas for total cash consideration of $606,000. The Nix Health acquisition includes a second closing date to be mutually determined by the seller and Nix Physicians, Inc., at which time certain additional assets will be acquired.

The acquisitions of the medical practices were accounted for as business combinations using purchase accounting. Under the purchase accounting method, assets acquired and liabilities assumed are recorded based on their estimated fair values.

The following table summarizes the assets acquired (at fair value) and liabilities assumed (at fair value) in connection with the medical practices acquisitions during the year ended September 30, 2016 (in thousands):

		Purchase Price Allocation
Inventory	$	11
Improvements and equipment		253
Goodwill		342
Net cash consideration	$	606

During the year ended September 30, 2015, CharterCARE Physicians entered into asset purchase agreements to acquire 11 medical practices with primary care physicians as well as physicians with specialties in general surgery, bariatric surgery and urology. Total cash consideration for the medical practices was $3,865,000, with cash consideration for each practice ranging from $9,000 to $2,100,000.

The acquisitions of the medical practices were accounted for as business combinations using purchase accounting. Under the purchase accounting method, assets acquired and liabilities assumed are recorded based on their estimated fair values.

The following table summarizes the assets acquired (at fair value) and liabilities assumed (at fair value) in connection with the CharterCARE Physician medical practices acquisitions during the year ended September 30, 2015 (in thousands):

		Purchase Price Allocation
Inventory	$	8
Improvements and equipment		328
Intangible assets		97
Goodwill		3,432
Net cash consideration	$	3,865

As asset purchases, the goodwill and intangible assets acquired are deductible for tax purposes.

University Medical Group

Effective December 18, 2014, New University Medical Group ("New UNMG"), a wholly-owned subsidiary of RWMC, entered into an Asset Purchase Agreement, pursuant to which New UNMG will acquire substantially all of the assets of University Medical Group ("UNMG"), a physician medical practice with approximately 35 primary care and specialist physicians with various specialties. As consideration for the acquisition, New UNMG will assume certain liabilities of UNMG.

As of December 18, 2014, New UNMG acquired certain assets of the practice and assumed certain liabilities related to the administrative functions of UNMG ("Initial Close"). At a later date, New UNMG will acquire certain additional assets and assume certain additional liabilities ("Second Close"). Concurrent with the Initial Close, UNMG and New UNMG entered into an Interim Administrative Services Agreement, which is effective until the Second Close occurs. New UNMG also entered into the First Amendment to the Interim Administrative Services Agreement effective December 18, 2014. In addition, Prospect, RWMC and CharterCARE Physicians have receivables from various transactions of $5,297,000 and $4,345,000 due from UNMG as of September 30, 2016 and 2015, respectively, which are included in other assets in the accompanying consolidated balance sheet.

Because Second Close had not occurred as of September 30, 2016, the acquisition of UNMG is not reported in the accompanying consolidated financial statements. As a result of the Asset Purchase Agreement, Interim Administrative Services Agreement (as amended), and various transactions, New UNMG has the obligation to absorb certain losses of UNMG and the right to receive certain benefits from UNMG. However, New UNMG does not have the power to direct the activities of UNMG which most significantly impact its performance based on the terms of the Interim Administrative Services Agreement (as amended) and the governance of UNMG. As a result, New UNMG is not the primary beneficiary of UNMG, and the results of UNMG are not consolidated in the accompanying consolidated financial statements.

5. Discontinued Operations

During the year ended September 30, 2016, the Company determined the operations of Elmhurst Extended Care, Nix CGH and CA ACO, LLC ("CA ACO") would be discontinued. Elmhurst Extended Care and Nix CGH are reported in the Hospital Services segment and the CA ACO is reported in the Global Risk Management segment. Elmhurst Extended Care was sold effective December 22, 2016 (see Note 16). The Company anticipates Nix CGH will be sold within the next twelve months. The Company's decision to discontinue the operations of each of the entities was based on the Company's management's strategy in their respective markets and financial results.

Summarized financial information for discontinued operations is included below (in thousands):

September 30,		**2016**		2015
Carrying amounts of major classes of assets included as part of discontinued operations				
Cash	$	910	$	(293)
Restricted cash		4,296		-
Patient accounts receivable, net of allowance for doubtful accounts and other receivables		3,039		4,118
Due from government payors		1,894		3,126
Other current assets		355		248
Total current assets		10,494		7,199
Property, plant and equipment, net		1,985		2,131
Other assets		399		2,847
Total assets of the disposal groups classified as held for sale in the consolidated balance sheets	$	12,878	$	12,177
Carrying amounts of major classes of liabilities included as part of discontinued operations				
Accounts payable and other accrued liabilities	$	2,630	$	1,972
Long-term liabilities		787		129
Total liabilities of the disposal groups classified as held for sale in the consolidated balance sheets	$	3,417	$	2,101

For the Year Ended September 30,		**2016**		2015
Major line items constituting pretax loss of discontinued operations				
Net Hospital Services revenues	$	22,520	$	24,498
Operating expenses		(28,009)		(24,544)
Depreciation and amortization		(276)		(246)
Loss on write-off of goodwill		(2,475)		-
Interest expense		(37)		(35)
Loss on discontinued operations before income taxes		(8,277)		(327)
Income tax benefit		(3,373)		(133)
Loss on discontinued operations	$	(4,904)	$	(194)

The Company's consolidated financial statements and notes to consolidated financial statements have been retrospectively reclassified for discontinued operations as of and for the year ended September 30, 2015.

6. Goodwill and Intangible Assets

As of September 30, 2016 and 2015, goodwill and intangible assets relate to the ProMed, Alta, SCH Culver City, Nix Health, NGMA, CharterCARE Physicians medical practices, East Orange and Crozer acquisitions. The Company performed its annual goodwill impairment analysis for each reporting unit that constitutes a business for which 1) discrete financial information is produced and reviewed by management, and 2) services that are distinct from the other reporting units.

During the year ended September 30, 2015, the Company reorganized its reporting structure for the Medical Group segment due to changes in financial information produced and reviewed by management and the convergence of the economic characteristics of the MSOs and Medical Groups located in California. Prior to the reorganization of the reporting structure, the Medical Group segment was comprised of two reporting units: PHCA and the ProMed Entities (collectively referred to as the "ProMed IPAs") as well as PMS and the other affiliated physician organizations, including NGMA (collectively, "Prospect IPAs"). As a result of the reorganization of reporting structure, the MSOs and Medical Groups located in California comprise a single reporting unit (collectively, "California Medical Groups").

During the year ended September 30, 2016, the Company reorganized its reporting structure for its hospitals located in Southern California. Prior to the year ended September 30, 2016, the reporting units for hospitals located in Southern California consisted of one reporting unit including the four hospitals located in Hollywood, Los Angeles, Norwalk, and Van Nuys and a second reporting unit for SCH Culver City. During the year ended September 30, 2016, the Company determined all seven hospitals located in Southern California (including the hospitals located in Tustin and Bellflower) represented a single reporting unit due to shared economic characteristics, geography and review of financial information.

During the year ended September 30, 2016, $2,475,000 of goodwill related to the Nix reporting unit was written off in conjunction with the classification of Nix CGH as discontinued operations (see Note 5).

For the Hospital Services segment, the reporting unit for the annual goodwill impairment analysis has been determined to be at the business unit level. Reporting units consist of the Southern California Hospitals, Nix Health, and CharterCARE.

The carrying value of goodwill by reporting unit is as follows (in thousands):

September 30,	**2016**	2015
Southern California Hospitals	**$ 130,912**	$ 130,912
Nix Health	**3,138**	3,138 *(a)*
CharterCARE	**3,775**	3,432
California Medical Groups	**27,388**	22,339
East Orange	**3,531**	-
Crozer	**172,744**	-
	$ 341,488	$ 159,821 *(a)*

(a) Excludes $2,475,000 of goodwill related to the Nix Health reporting unit that is reflected in assets held for sale as of September 30, 2015 that was impaired during the year ended September 30, 2016 in connection with the closure of Nix CGH (see Note 5).

Confidential LGP-SBC-000000320

The following is a roll-forward of goodwill from October 1, 2014 to September 30, 2016 (in thousands):

	Amount
Balance, October 1, 2014	$ 156,389
Acquisition of CharterCARE Physicians medical practices (see Note 4)	3,432
Balance, September 30, 2015	159,821
Acquisitions of Nix Physicians and CharterCARE Physicians medical practices	342
Acquisition of PMCA	5,050
Acquisition of East Orange	3,531
Acquisition of Crozer	172,744
Balance, September 30, 2016	$ 341,488

Identifiable intangible assets are comprised of the following (in thousands):

	September 30, 2016

During the years ended September 30, 2016 and 2015, intangibles related to physician guarantees of $990,000 and $539,000, respectively, were fully amortized and removed from intangible assets.

Confidential

Amortization is recognized on a straight-line basis (management's best estimate of the period of economic benefit) over the respective useful lives and expense for the years ended September 30, 2016 and 2015 was $6,978,000 and $6,590,000, respectively.

Estimated amortization expense for each future fiscal year is as follows (in thousands):

Years ended September 30,	
2017	$ 6,854
2018	6,459
2019	5,957
2020	4,740
2021	4,721
Thereafter	13,166
Total	$ 41,897

The following table shows the estimated useful lives for each of the intangible assets:

	Estimated useful lives
HMO membership	14 years
Trade names	3 - 20 years
Favorable leasehold	6 years
Physician guarantees	2 to 3 years
Customer relationships	7 years
Other	5 years

The weighted-average remaining useful life for the intangible assets was 7.6 years as of September 30, 2016.

7. Related Party Transactions

Jeereddi Prasad, M.D., a shareholder of Ivy Holdings, a director of Ivy Holdings and the Company, and an officer of the ProMed Entities, has ownership interests in physician medical groups that provide medical services to ProMed members, including CMG. For the years ended September 30, 2016 and 2015, the ProMed Entities paid these groups approximately $17,125,000 and $18,170,000, respectively. As of September 30, 2016 and 2015, the Company had accounts payable and other accrued liabilities due to these related parties of $392,000 and $531,000, respectively.

Pursuant to a Management Services Agreement, dated December 15, 2010 and amended on May 3, 2012 (the "LGP Management Agreement"), between the Company and Leonard Green & Partners, L.P. ("LGP"), a private equity fund with affiliated funds that collectively constitute the majority shareholder of Ivy Holdings, LGP provides to the Company, (a) certain investment banking services, (b) management, consulting and financial planning services and (c) financial advisory and investment banking services in connection with major financial transactions from time to time. In consideration for the services provided by LGP under the LGP Management Agreement, the Company pays LGP an annual fee of $1,000,000, payable in monthly installments, and reimburses LGP for its related expenses up to $50,000 annually. If approved by the unanimous consent of the Board of Directors of the Company, additional customary fees

Confidential LGP-SBC-000000322

may be due to LGP pursuant to the terms of the LGP Management Agreement for services rendered in connection with major transactions from time to time. No amounts were payable related to these related party transactions as of September 30, 2016 or 2015.

The Company is a wholly-owned indirect subsidiary of Ivy Holdings. Therefore, Ivy Holdings is the parent of an affiliated group of corporations within the meaning of Section 1504(a) of the Internal Revenue Code of 1986. On December 15, 2010, Ivy Holdings, Ivy Intermediate and the Company entered into a Tax Sharing Agreement. The Tax Sharing Agreement allows the Company to make payments to Ivy Holdings as necessary to fund their payment of any required taxes incurred due to such parent status. During the years ended September 30, 2016 and 2015, the Company made payments (net of refunds) under this arrangement of $7,460,000 and $24,977,000, respectively.

8. Income Taxes

The components of the income tax (benefit) provision for continuing operations are as follows (in thousands):

For the years ended September 30,	**2016**	2015
Current:		
Federal	**$ (23,645)**	$ 35,578
State	**(1,968)**	9,709
	(25,613)	45,287
Deferred:		
Federal	**18,897**	(12,957)
State	**1,966**	(1,051)
	20,863	(14,008)
Total:		
Federal	**(4,748)**	22,621
State	**(2)**	8,658
	(4,750)	**$** 31,279

Temporary differences and carry forward items that result in deferred income tax balances as of September 30, are as follows (in thousands):

September 30,	2016	2015
Deferred tax assets:		
State tax benefit	$ -	$ 2,306
Allowances for bad debts	21,294	7,889
Vacation accrual and other	9,693	4,800
Workers compensation	4,956	3,991
Accrued bonuses	3,783	4,837
Malpractice reserves	6,014	2,546
Deferred rent	125	139
Tax credits	2,002	1,261
Net operating losses	2,615	302
Partnership outside basis difference	6,310	8,323
Transaction Cost	4,519	-
Claims Payable	688	-
Other	229	157
Deferred tax assets	62,228	36,551
Valuation allowance	(742)	(984)
Net deferred tax assets	61,486	35,567
Deferred tax liabilities:		
Intangible assets	(5,998)	(6,448)
Fixed assets	(16,873)	(17,035)
OCI-Pension liability	(8,389)	-
State tax	(3,552)	-
Other	(1,380)	(219)
Deferred tax liabilities	(36,192)	(23,702)
Net deferred tax assets (liabilities)	$ 25,294	$ 11,865

Deferred tax assets and liabilities reflect the effect of temporary differences between the assets and liabilities recognized for financial reporting purposes and the amounts recognized for income tax purposes.

As of September 30, 2016, the Company maintains a valuation allowance of $742,000 on a certain portion of the California Enterprise credit and net operating losses of non-consolidated and separately filed entities for federal and state purposes, as it is more likely than not that the deferred tax asset will not be realized. As of September 30, 2015, valuation allowances were $984,000.

As of September 30, 2016, the Company has $1,261,000 of California Enterprise Zone credit carryforwards and $741,000 of federal and state AMT credit which can be carried over indefinitely. The Company has approximately $30,000,000 of state net operating loss carryforward for September 30, 2016, which expires through September 30, 2037.

The Company finalized an IRS examination for fiscal year 2012 during the year ended September 30, 2016 with no material impact on the consolidated financial statements. During fiscal 2016, the Company received a notice of review from the Franchise Tax Board of California for refunds claimed on its California

Confidential LGP-SBC-000000324

returns reflecting additional Enterprise tax credits. Additionally, the Company received a notice from the Internal Revenue Service in connection with the examination of fiscal 2015 federal tax return.

Generally, the Company's tax years 2011 through 2014 are open for federal and state tax examination. As of September 30, 2016, the Company does not have material unrecognized tax benefits. The Company believes that it is reasonably possible that an increase in unrecognized tax benefits may be necessary within the coming year, and these unrecognized tax benefits would primarily impact deferred taxes and taxes payable, and the expected range of potential increase in the unrecognized tax benefits is not expected to be material to the balance sheet nor the income statement.

The FASB issued ASU No. 2015-17, which requires entities to offset deferred tax assets and liabilities for each tax paying jurisdiction within each tax paying component. The deferred taxes must be reported as non-current. The Company elected early adoption of the ASU (see Note 2 under New Accounting Pronouncements).

The differences between the income tax provision at the federal statutory rate and that reflected in the accompanying consolidated statements of operations are summarized as follows:

For the years ended September 30,	**2016**	2015
Tax provision at statutory rate	**35 %**	35%
State taxes, net of federal benefit	**0 %**	7%
Non-controlling interest	**(6)%**	0%
Other	**(4)%**	6%
	25 %	48%

9. Long-Term Debt

Long-term debt consists of the following (in thousands):

Long-term debt, net of current maturities *(1)*	**$ 613,005**	$ 415,466

(1) Net of discount, premium, and deferred financing costs

Prospect's Debt:

Senior Secured Notes

On June 30, 2016, the Company entered into a six-year $625 million senior secured term loan B (the "Term Loan"), the proceeds of which were used to repay $425 million for PMH's existing 8.375% senior secured notes due during 2019; to repay $60 million for borrowings under the Company's existing revolving credit facility (the "Replaced Revolver"); to fund acquisitions, including the acquisition of Crozer; and to finance transaction fees and expenses. The Term Loan bears interest at LIBOR (subject to a 1.0% floor) plus 6.0%, and the effective interest rate was 7.00% as of September 30, 2016. The Term Loan was issued with an original discount of 1.5%, or $9,375,000.

Additionally, the Company refinanced the Replaced Revolver with a new $100 million asset-based revolving credit facility ("ABL Facility" and together with the Term Loan, the "New Senior Secured Credit Facilities"). The ABL facility was amended in August 2016 to $115 million. The ABL Facility bears interest at a variable base rate plus an applicable spread, contingent on the Company's ABL Facility availability, as defined in the ABL Facility credit agreement. The ABL Facility effective interest rate was 2.31% as of September 30, 2016. The ABL Facility balance as of September 30, 2016 was $55,000,000. As of September 30, 2016, the Company had unused letters of credit of $9,200,000, which offset the Company's ability to borrow additional funds, and the ABL Facility had unused lender commitments of $50,800,000 as of September 30, 2016.

The maturity date for the ABL Facility is June 30, 2021, and the maturity date for the Term Loan is June 30, 2022. As of September 30, 2016, the Company was in compliance with the financial covenants of the New Senior Secured Credit Facilities.

The New Senior Secured Credit Facilities are guaranteed on a senior secured basis by all assets of the Company and its subsidiaries ("Guarantors") except Prospect Health Plan, Inc., AMVI/Prospect Medical Group, Nuestra Familia Medical Group, Inc. and certain immaterial subsidiaries. The ABL Facility has a first priority security interest on the working capital assets of the Company and the Guarantors and a second priority security interest on their fixed assets. The Term Loan has a first priority security interest on fixed assets and a second priority security interest on working capital assets. The New Senior Secured Credit Facilities are effectively senior to all of the Company's existing and future indebtedness.

Capitalized deferred financing costs of $12,251,000 related to the New Senior Secured Credit Facilities are being amortized over the term of the related debt using the straight line method, which approximates the effective interest method.

Retired Senior Secured Notes

On May 3, 2012, the Company closed the offering of $325 million in 8.375% senior secured notes due May 1, 2019 ("PMH 2019 Notes"). Interest is payable semi-annually in arrears on May 1 and November 1, commencing on November 1, 2012. The offering was executed in accordance with Rule 144A and Regulation S under the Securities Act of 1933. The terms of the PMH 2019 Notes are governed by an indenture among the Company, certain of its subsidiaries and affiliates (as "Guarantors"), and U.S. Bank National Association (as trustee) (the "Indenture"). The Indenture contains certain covenants that, among other things, limit the Company's ability, and the ability of its restricted subsidiaries (as such term is defined in the Indenture) to: retire and pay dividends or distributions on capital stock or equity interests, prepay subordinated indebtedness or make other restricted payments; incur additional debt; make investments; create liens on assets; enter into transactions with affiliates; engage in other businesses; sell or issue capital stock of restricted subsidiaries; merge or consolidate with another company; transfer and sell assets; create dividend and other payment restrictions affecting subsidiaries; and designate unrestricted subsidiaries. The Credit Agreement (defined below), executed in connection with the PMH Senior Secured Credit Facility (discussed below), contains a number of customary covenants as well as covenants requiring the Company to maintain a maximum consolidated secured leverage ratio and limiting the amount of capital expenditures.

Concurrent with the issuance of the PMH 2019 Notes, the Company entered into a five year $50 million revolving senior secured credit facility (the "PMH Senior Secured Credit Facility") which replaced the existing senior secured credit facility. The PMH Senior Secured Credit Facility provides, among other things, for borrowings up to the amount of the facility with sublimits of up to (i) $20 million to be available for the issuance of letters of credit and (ii) $10 million to be available for swingline loans. The commitment under the facility may be increased by up to $10 million upon the Company's request at the discretion of

Confidential LGP-SBC-000000327

the lenders and subject to certain customary requirements. The interest rate per annum applicable to loans under the PMH Senior Secured Credit Facility will be, at the Company's option, either a rate per annum equal to (i) LIBOR plus 3.50% or (ii) an alternate base rate, which will be the higher of the administrative agent's prime rate, the federal funds rate plus 0.50%, and the 1-month LIBOR rate plus 1.00%, plus in each case, 2.50%. In August 2013, the PMH Senior Secured Credit Facility limit was increased to $60 million. As of September 30, 2015, the Company had $20 million outstanding debt related to the PMH Senior Secured Credit Facility. As of September 30, 2015, the interest rate for the PMH Senior Secured Credit Facility was 3.95%.

The terms of the PMH Senior Secured Credit Facility are governed by the Credit Agreement, dated as of May 3, 2012, (as amended in connection with the Company's November 2012 offering of additional PMH 2019 Notes - see below) among the Company, Morgan Stanley Senior Funding, Inc. (as administrative agent), Royal Bank of Canada and Credit Suisse AG, Cayman Islands Branch (as co-syndication agents) and the lenders party thereto (the "Credit Agreement").

On November 16, 2012, the Company closed the offering of $100 million in aggregate principal amount of 8.375% senior secured notes due 2019 (the "Additional 2019 Notes") at a price equal to 102% of the principal amount of the Additional 2019 Notes. The Additional 2019 Notes were issued in a private placement to qualified institutional buyers and form a part of the same series as the PMH 2019 Notes issued on May 3, 2012.

The Additional 2019 Notes were issued under the Indenture, dated May 3, 2012 and described above, as supplemented by two supplemental indentures entered into in connection with the issuance of the Additional 2019 Notes (the "Supplemental Indentures"). The Additional 2019 Notes are treated as a single series with the previously issued PMH 2019 Notes for all purposes under the Indenture, including, without limitation, restrictive covenants, waivers, amendments, redemptions and offers to purchase. Prior to closing the issuance of the Additional 2019 Notes, the Company was required to obtain the consent of the majority in interest of its PMH 2019 Notes issued on May 3, 2012 to certain amendments to the Indenture contained in the first Supplemental Indenture. The Company obtained such consent from the holders of approximately $324 million in aggregate principal amount of outstanding PMH 2019 Notes and paid an aggregate consent fee of approximately $8.9 million. The Company determined that the transaction represents a debt modification under the applicable accounting guidance and capitalized the consent fee and recorded it as a debt discount during the year ended September 30, 2013, which is being amortized over the term of the Additional 2019 Notes using the effective interest method.

In connection with the issuance of the Additional 2019 Notes, the Company entered into an amendment of its Credit Agreement governing the PMH Senior Secured Credit Facility that waived and amended certain provisions of the Credit Agreement, including certain restrictive covenants. In conjunction with the repayment of the PMH 2019 Notes, Additional 2019 Notes, and the PMH Senior Secured Credit facility, the Company recognized a loss on debt extinguishment of $26,561,000. The loss on debt extinguishment included $17,799,000 of bond redemption costs, $3,030,000 of unamortized debt discount and premium, and $5,732,000 of unamortized debt financing costs, which are included within loss on debt extinguishment in the accompanying consolidated statement of operations for the year ended September 30, 2016.

Demand Notes

During the year ended September 30, 2012, the Company obtained a commitment from a bank for a $9.3 million equipment leasing facility to finance various equipment at the Company's hospital facilities. During January 2014, the commitment was increased to $15.0 million. As of September 30, 2016 and 2015, draws under the facility are classified as capital lease arrangements. Draws represent demand notes until

Confidential LGP-SBC-000000328

conversion to capital leases, and interest accrues on such draws at the bank prime rate plus 1.5% with a floor of 4.5% and payable monthly.

Other Debt:

In connection with the Nix Health acquisition, Nix SPE, LLC ("Nix SPE") executed a Loan Assumption Agreement, effective as of February 29, 2012, pursuant to which Nix SPE assumed the obligations of the sellers of Nix Health under a mortgage loan facility provided by The Ohio National Life Insurance Company on December 27, 1999. Nix SPE assumed the obligation to pay the outstanding principal amount of the mortgage loan and interest accruing thereafter. The outstanding balance of the mortgage loan as of 2015 was $1,675,000.

Prospect Hospital Holdings, LLC, the parent company of Nix SPE, has provided a guaranty of the obligations of Nix SPE under the loan. The obligations under the loan facility are secured by a deed of trust on a neighborhood medical center known as Nix Alamo Heights. The loan is subject to a 7.0% interest rate and requires monthly installment payments of $21,000, with a balloon payment on the maturity date of November 1, 2019. Prepayment is subject to a fee and the loan contains customary covenants.

During the year ended September 30, 2016, Nix SPE entered into a Purchase and Sale Agreement with a third party ("NAH Buyer") for the sale of Nix Alamo Heights for $6,300,000. Concurrently, the Company entered into a lease with the NAH Buyer to lease Nix Alamo Heights for 13 years, with 2% annual rent increases and four consecutive options to extend the lease term for five years each. Pursuant to the terms of the lease, the Company is required to repair, maintain and replace all aspects of the Nix Alamo Heights building. The Company's ability to lease the Nix Alamo Heights for up to 33 years and the requirement to fully maintain the property constitute continuing involvement for financial reporting purposes. As a result, the transaction has been accounted for as a financing transaction and is included within long-term debt as of September 30, 2016.

The Company also entered into an Agreement of Purchase and Sale effective September 14, 2016 to sell the East Orange medical arts building for a purchase price of $11,860,000 to a third party ("East Orange MAB Buyer"). Concurrently, the Company entered into a lease with the East Orange MAB Buyer to lease the East Orange medical arts building for 10 years, with 2% annual rent increases and four consecutive options to extend the lease term for five years each. East Orange sub-leases a significant portion of the building to third parties, resulting in continuing involvement for financial reporting purposes. As a result, the transaction has been accounted for as a financing transaction and is included within long-term debt as of September 30, 2016.

Scheduled payments under the Company's current and long-term debt as of September 30, 2016 are as follows (in thousands):

Years ending September 30,	
2017	$ 6,951
2018	7,067
2019	7,067
2020	7,140
2021	7,217
Thereafter	605,147
Total scheduled payments	640,589
Less: Senior Secured Notes discount, net	(8,984)
Less: Deferred financing costs, net	(11,649)
Total long-term debt	$ 619,956

Future amortization of the Company's debt discount and deferred financing costs as of September 30, 2016 are as follows (in thousands):

Years ending September 30,	
2017	$ 3,721
2018	3,721
2019	3,721
2020	3,721
2021	3,515
Thereafter	2,234
	$ 20,633

10. Stockholder's Equity

Equity Based Compensation Plans

Effective December 15, 2010, the Board of Directors of Ivy Holdings adopted the Ivy Plan that authorized the issuance of options exercisable for up to 155,110 shares of the common stock of Ivy Holdings ("Initial Options") to employees, certain consultants and independent members of the boards of directors, of Ivy Holdings and its subsidiaries (including the Company and its subsidiaries). During the year ended September 30, 2015, the Compensation Committee of the Board of Directors of Ivy Holdings ("Compensation Committee") granted 37,814 options to certain members of the Company's management and employees. These options are exercisable into Ivy Holdings stock and vest based on a number of criteria, including time, Company and Business Unit performance based on EBITDA targets and CEO and Compensation Committee discretion. Since the Ivy Holdings stock options were granted to Company employees for their services related to the Company, the related compensation cost has been recorded in the Company's consolidated financial statements.

Effective June 30, 2015, the Board of Directors of Ivy Holdings adopted the First Amendment to the Ivy Plan, pursuant to which the Board of Directors authorized the issuance of options exercisable for an additional 13,972 shares of common stock of Ivy Holdings ("New Options") to employees, certain consultants and independent members of the boards of directors of Ivy Holdings and its subsidiaries (including the Company and its subsidiaries). Concurrently, the Compensation Committee granted 13,972

Confidential LGP-SBC-000000330

options to certain members of the Company's management and employees. The New Options are exercisable into Ivy Holdings stock and vest based on a number of criteria, including the same criteria as the Initial Options however, they only become exercisable on the occurrence of certain corporate transactions, including a change in control of Ivy Holdings, as defined in the Incentive Stock Option Agreements ("Corporate Transaction"). Because the occurrence and timing of a Corporate Transaction is not determinable as of September 30, 2016, no compensation cost has been recorded in the Company's consolidated financial statements.

Under the terms of the Ivy Plan, the exercise price of an incentive stock option ("ISO") may not be less than 100% of the fair market value of the Company's common stock on the date of grant and, if granted to a shareholder owning more than 10% of the Company's common stock, then not less than 110%. Stock options granted under the Ivy Plan have a maximum term of 10 years from the grant date, and are exercisable at such time and upon such terms and conditions as determined by the Compensation Committee. Stock options granted to employees generally vest over four years, subject to continued service, performance, and other criteria. In the case of an ISO, the amount of the aggregate fair market value of common stock with respect to which the ISO grant is exercisable, for the first time by an employee during any calendar year, may not exceed $100,000.

Stock Options Activity

The following table summarizes information about Ivy Holdings stock options outstanding as of September 30, 2016 and 2015 and activity during the years then ended for the Initial Options and the New Options:

	Shares Subject to Options	Weighted Average Exercise Price	Weighted Average Aggregate Intrinsic Value	Weighted Average Remaining Contractual Term (Months)
Outstanding as of September 30, 2014	115,475	$ 45.37	$ 74.63	84.1
Granted *(1)*	51,786	176.00	—	—
Exercised	(12,620)	31.38	—	—
Canceled/Forfeited	(4,079)	46.24	—	—
Outstanding as of September 30, 2015	150,562	91.42	436.51	88.2
Granted	-	-	—	—
Exercised	(4,063)	30.00	—	—
Canceled/Forfeited	(3,093)	134.58	—	—
Outstanding as of September 30, 2016	143,406	$ 92.30	$ 445.70	76.2

(1) The options granted include 37,814 Initial Options and 13,972 New Options.

The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and the estimated fair value of the Company's common stock for those awards that have an exercise price currently below the estimated fair value. As of September 30, 2016, the aggregate intrinsic value of outstanding shares was approximately $64,000,000. As of September 30, 2016, there were 111,638 options that are exercisable at a weighted average exercise price of $68.91.

A summary of Ivy Holdings non-vested options and the changes during the fiscal years ended September 30, 2016 and 2015 is presented as follows for the Initial Options and New Options:

	Shares	Weighted Average Grant Date Fair Value
Ivy Holdings Stock Options:		
Nonvested at September 30, 2014	13,637	$ 70.47
Granted	51,786	98.65
Vested	(19,005)	89.73
Canceled/Forfeited	(1,672)	88.79
Nonvested at September 30, 2015	44,746	94.22
Vested	(15,991)	89.10
Canceled/Forfeited	(2,279)	91.45
Nonvested at September 30, 2016	26,476	$ 97.55

Stock-Based Compensation Expense

Stock-based compensation expense for all share-based payments in exchange for employee services (including stock options and restricted stock) is measured at fair value on the date of grant, estimated using an option pricing model and is recognized in the consolidated financial statements, net of estimated forfeitures over the awards requisite service period.

The Company uses the Black-Scholes option pricing model and a single option award approach to estimate the fair value of options granted. Estimated forfeitures will be revised in future periods if actual forfeitures differ from the estimates and will impact compensation cost in the period in which the change in estimate occurs. The determination of fair value using the Black-Scholes option-pricing model is affected by the Company's estimated stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors.

Fair value for options granted during the year ended September 30, 2015 was estimated with the following assumptions for Ivy Holdings (no options were granted during the year ended September 30, 2016):

For the year ended September 30,	2015
Weighted average fair value of option grants	$ 98.65
Estimated fair market value of the Company's common stock on the date of grant	$ 176.00
Weighted average expected life of the options	9.8 years
Risk-free interest rate	1.8%
Weighted average expected volatility	45.0%
Dividend yield	0.00%

Expected Term - The expected term of options granted represents the period of time that they are estimated to be outstanding.

Confidential LGP-SBC-000000332

Risk-Free Interest Rate - The Company bases the risk-free interest rate on the implied yield in effect at the time of option grant on U.S. Treasury zero-coupon issues with equivalent remaining terms.

Expected Volatility - The Company estimates the volatility of the common stock at the date of grant based on the average of the historical volatilities of a group of peer companies. The Company has identified a group of comparable companies to calculate historical volatility from publicly available data for sequential periods approximately equal to the expected terms of the option grants. In selecting comparable companies, Management considered several factors including industry, stage of development, size and market capitalization.

Forfeitures - Share-based compensation is recognized only for those awards that are ultimately expected to vest. Compensation expense is recorded net of estimated forfeitures. Those estimates are revised in subsequent periods if actual forfeitures differ from those estimates. The Company used data since December 2010 to estimate pre-vesting option forfeitures.

Stock-based compensation expense for the Ivy Holdings stock options recognized by the Company during the years ended September 30, 2016 and 2015 was $1,119,000 and $1,184,000, respectively. At September 30, 2016, there were 26,476 unvested options, which could potentially vest over the next six fiscal years, subject to meeting the vesting requirements noted above. The remaining maximum estimated stock compensation expense to be amortized to expense in future periods is approximately $1,659,000. Options which are expected to vest based on CEO and Compensation Committee discretion are treated as variable stock options and are subject to revaluation at each reporting period. Management determined the fair value of the discretionary vested options using a Black Scholes calculation but determined that the change in compensation expense was not material to the consolidated financial statements for the years ended September 30, 2016 and 2015.

11. Retirement Benefits

In conjunction with the acquisition of certain assets and the assumption of certain liabilities of Crozer-Keystone Health System, effective July 1, 2016 (the "Effective Date"), the Company became the sponsor and assumed the Crozer-Keystone Health System ("CKHS") Employee Retirement Plan, an employee non-contributory, defined benefit pension plan (the "DB Plan") covering certain full-time employees.

Pursuant to the Asset Purchase Agreement entered into by and among the Company, Prospect Crozer, LLC and Crozer's wholly-owned subsidiary, CKHS, on January 8, 2015, as amended, (the "Agreement") at Closing, CKHS agreed to pay out of the Purchase Price (Note 4) $100 million into an escrow, which funds was subsequently used by the Company upon becoming the sponsor of the DB Plan pursuant to IRS rules and regulations to fund in part the underfunded Plan liability then outstanding. Additionally, pursuant to the Agreement, within five years after the Effective Date and subject to applicable filing and authorization by the applicable Government Entity, the Company shall adopt a plan amendment to terminate the DB Plan effective within such five year period and shall liquidate, fully fund and satisfy, and pay all benefits owed to participants and beneficiaries of the DB Plan by providing lump sum distributions to participants, purchasing annuities for participants who do not elect a lump sum distribution.

Pursuant to an amendment to the DB Plan, effective July 1, 2016, the DB Plan was frozen with all benefit accruals ceased as of July 1, 2016. With respect to each Represented Employee who is a member of the Laborers' International Union of North America, the Monthly Compensation (as defined), the Credited Service (as defined), the Eligibility Service (as defined) and the accrued benefit was frozen and determined as of July 1, 2016. No benefits will accrue on or after such date. Additionally, the DB Plan was amended to provide that for purposes of determining Vesting Service (as defined) for employees who were

employed with the Company before July 1, 2016, years of service shall include all periods of employment completed on and after July 1, 2016, subject to the Break in Service rules (as defined).

Effective September 3, 2016, the DB Plan was further amended to provide certain Qualifying Participants (as defined) the right to make a Special Benefit Election (as defined) during "2016 Lump Sum Option Window" period from October 15, 2016 through November 30, 2016 to receive or commence receiving his or her vested Accrued Benefit as of December 1, 2016 in accordance with procedures adopted by the Committee.

In conjunction with the acquisition transaction, on the Effective Date, the Company also became the sponsor and assumed CKHS postretirement benefit program (the "OPEB Plan") which is an unfunded medical care and life insurance benefit program, and a supplemental executive retirement plan (the "SERP Plan") which is an unfunded retirement plan that covers a group of current and former executives.

Pursuant to an amendment to the OPEB Plan and SERP Plan, effective July 1, 2016, the Plans were frozen with all benefit accruals ceased as of July 1, 2016. No benefits will accrue on or after such date. With respect to each Represented Employee who is a member of the Laborers' International Union of North America, benefits will continue to accrue until a settlement of an ongoing union contract negotiation is reached.

The activity of the Pension Plan and the OPEB for the period from July 1, 2016 (Crozer inception) through September 30, 2016 is as follows (in thousands):

	Pension Plan	OPEB
Changes in benefit obligations		
Projected benefit obligations, beginning of period	$ 680,724	$ 6,888
Service cost	-	20
Interest cost	5,573	51
Actuarial (gain) loss	(3,616)	118
Benefits paid	(5,759)	(236)
Projected benefit obligation (Pension Plan) and Accumulated benefit obligation (OPEB), end of period	$ 676,922	$ 6,841
Changes in plan assets		
Fair value of plan assets, beginning of period	$ 350,393	$ -
Actual return on plan assets	22,630	-
Contributions by plan sponsor	100,000	236
Benefits paid	(5,759)	(236)
Fair value of plan assets, end of period	$ 467,264	$ -
Funded status of the plan, end of period	$ (209,658)	$ (6,841)

The funded status of the Pension Plan and OPEB as of September 30, 2016 and the components of net periodic benefit cost for the period from July 1, 2016 (Crozer inception) through September 30, 2016 were as follows (in thousands):

	Pension Plan	OPEB
Amounts recognized in the consolidated balance sheets consist of:		
Current liability	$ -	$ 1,050
Non-current liability	209,658	5,791
Amount recognized, end of year	$ 209,658	$ 6,841
Components of net periodic benefit cost:		
Service cost	$ -	$ 20
Interest cost	5,573	51
Expected return on plan assets	(7,000)	-
Total net periodic benefit (credit) cost	$ (1,427)	$ 71
Other change in benefit obligations recognized in accumulated other comprehensive income:		
Liability (gain) loss due to assumption change	$ 2,116	$ -
Liability (gain) loss due to participant experience	(5,732)	117
Asset return (gain) loss	(15,630)	-
Total recognized in other comprehensive income and accumulated other comprehensive income	$ (19,246)	$ 117

The assumptions used in determining the actuarial present value of the projected benefit obligations are as follows:

	Pension Plan	OPEB
Weighted average assumptions used to determine benefit obligations at end of period		
Discount rate	3.68%	3.27%
Rate of compensation increase	0.00 %	2.00%
Weighted average assumptions used to determine net periodic benefit cost for the period from July 1, 2016 (Crozer inception) through September 30, 2016		
Discount rate	3.68%	3.27%
Rate of compensation increase	0.00%	0.00%
Expected return on the plan assets	6.50%	0.00%

Assumed health care cost trend rates for the next period used to measure the expected cost of benefits covered by the plan are as follows:

	2016
Health care trend rate assumed for next year	7.0%
Rate to which the cost trend is assumed to decline (the ultimate rate)	4.5%
Year that the rate reaches the ultimate trend rate	2025

Assumed health care cost trend rates have a significant effect on amounts reported for other postretirement benefit programs. A one-percentage-point change in assumed health care cost trends would have the following effects (in thousands):

	1% Increase	1% Decrease
Effect on other postretirement benefit obligations	$ 6,934	$ 6,754
Effect on total of service and interest cost components	$ 312	$ 290

The asset allocation percentage by major asset class for the Plan and the target allocation for 2016 follows:

	Target	2016
Asset class:		
Cash and cash equivalents	0% - 20%	- %
Fixed income	10% - 100%	87
Domestic equity	0% - 100%	-
International equity	0% - 40%	-
Real estate	0% - 30%	-
Alternative investments and hedge funds	0% - 30%	13
		100 %

The investment objectives of the Plan are to invest consistently with the fiduciary standards of ERISA, to provide for the funding and anticipated withdrawals on an ongoing basis, conserve and enhance the capital value of the Plan in real terms while maintaining a moderate risk profile, to minimize principal fluctuations over the investment cycle, and achieve a long-term level of return commensurate with contemporary economic conditions. The expected long-term rate of return with respect to the Plan is based on an aggregate of expected capital market returns within each asset category.

The following tables set forth the assets in the Plan measured at fair value, by input level (in thousands):

September 30, 2016	Level 1	Level 2	Level 3	Total
Fixed income securities:				
Short-Term Duration	$ -	$ 7,533	$ -	$ 7,533
Extended Duration	-	135,880	-	135,880
Interim Duration	-	31,614	-	31,614
Long-Term Duration	-	229,541	-	229,541
Collective trust funds:				
Real estate	-	-	8,898	8,898
Alternative investments	-	-	31,203	31,203
Hedge funds	-	-	22,295	22,295
Cash and cash equivalents	300	-	-	300
Total	$ 300	$ 404,568	$ 62,396	$ 467,264

Pension plan assets classified as Level 3 in the fair value hierarchy represent investments in which the trustee has used significant unobservable inputs in the valuation model. The hedge funds consist of equity/long/short funds and multi-strategy funds in which fair values have been estimated using the net asset value per share of the investment. The alternative investments primarily consist of investments in limited partnerships that invest in the Public-Private Investment Program which fair values have been estimated using the net asset value per share of the investment.

On an annual basis, the Company assesses the valuation hierarchy for pension assets recorded at fair value. From time to time, assets will be transferred within the fair value hierarchy as a result of changes in, among other things, inputs used, liquidity, or valuation methodologies. During the period from July 1, 2016 (inception) through September 30, 2016, there were no transfers in classification within the fair value hierarchy.

The following table is a rollforward of the Plan's assets classified within Level 3 of the fair value hierarchy (in thousands):

For the year ended September 30,	2016
July 1, 2016 (Crozer inception)	$ 69,528
Actual return on plan assets:	
Realized gain (loss)	282
Unrealized gain (loss)	1,367
Purchases	-
Sales	(8,780)
September 30, 2016	$ 62,397

Confidential

The expected long-term future benefit payments to retirees with respect to the Plan and Other Retirement Benefits are as follows (in thousands):

	Pension Plan	OPEB
2017	$ 38,520	$ 1,050
2018	39,400	570
2019	39,800	440
2020	39,570	420
2021	38,900	400
2022 - 2026	192,290	1,850
	$ 388,480	$ 4,730

The Company also sponsors three defined contribution plans covering substantially all employees who meet certain eligibility requirements. Under these plans, employees can contribute up to 50% of their compensation up to the IRS deferred annual maximum. There is currently no company match offered under the plans, except at Nix Health, PCC, and Crozer, for which the expense for the employer match was $3,417,000 and $1,865,000 for the years ended September 30, 2016 and 2015, respectively. Total expenses under the plan were approximately $509,850 and $480,000 during the years ended September 30, 2016 and 2015, respectively.

12. Commitments and Contingencies

Leases

The Company leases various office facilities and equipment from third parties under non-cancelable operating and capital lease arrangements expiring at various dates through 2030. Certain operating leases contain rent escalation clauses and renewal options, which have been factored into determining rent expense on a straight-line basis over the lease terms. Capital leases bear interest at rates ranging from 2% to 11% per annum.

The future minimum annual lease payments (net of anticipated sublease income) required under leases in effect at September 30, 2016, are as follows (in thousands):

For the Years ending September 30,	Capital Leases	Operating Leases
2017	$ 9,803	$ 20,330
2018	8,259	18,004
2019	6,413	15,291
2020	3,364	13,617
2021	3,343	10,722
Thereafter	29,919	43,722
Total minimum lease payments	61,101	$ 121,686
Less: amounts representing interest	(20,873)	
	40,228	
Less: current portion	(6,894)	
	$ 33,334	

Confidential

Rent expense for the years ended September 30, 2016 and 2015 was approximately $22,481,000 and $15,258,000, respectively. Sublease rental income was not material to the consolidated financial statements for the years ended September 30, 2016 and 2015.

Litigation

The Company is subject to a variety of claims and suits that arise from time to time in the ordinary course of its business, acquisitions, or other transactions. While the Company's management currently believes that resolving all of these matters, individually or in the aggregate, will not have a material adverse impact on the Company's consolidated financial position or results of operations, the litigation and other claims that the Company faces are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a material adverse impact on the Company's consolidated financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

Seismic Standards

The Company's SCHS Hospitals, Alta Los Angeles Hospitals, and FRMC are required to comply with California's Alfred E. Alquist Hospital Facilities Seismic Safety Act (the "Alquist Act"), which regulates the seismic performance of all aspects of hospital facilities in California. The Alquist Act imposes near-term and long-term compliance deadlines for seismic safety assessment, submission of corrective plans, and the retrofitting or replacement of medical facilities to comply with current seismic standards. The Alquist Act also requires that the California Building Standards Commission adopt earthquake performance categories, seismic evaluation procedures, standards and timeframes for upgrading certain facilities, and seismic retrofit building standards. These regulations require hospitals to meet seismic performance standards to ensure that they are capable of providing medical services to the public after an earthquake or other disaster. The Building Standards Commission completed its adoption of evaluation criteria and retrofit standards in 1998.

The Alquist Act requires that within three years after the Building Standards Commission had adopted evaluation criteria and retrofit standards:

- Hospitals in California must conduct seismic evaluation and submit these evaluations to the Office of Statewide Health Planning and Development ("OSHPD"), Facilities Development Division for its review and approval;
- Hospitals in California must identify the most critical nonstructural systems that represent the greatest risk of failure during an earthquake and submit timetables for upgrading these systems to the OSHPD, Facilities Development Division for its review and approval; and
- Hospitals in California must prepare a plan and compliance schedule for each regulated building demonstrating the steps a hospital will take to bring the hospital buildings into substantial compliance with the regulations and standards.

The Company was required to conduct engineering studies at its hospitals to determine whether and to what extent modifications to the hospital facilities will be required. Management believes that SCH Culver City meets all current requirements; however, it may be required to make significant capital expenditures in the future to comply with the seismic standards, which could impact its earnings. The cost at September 30, 2016, is unknown at this time but could be material. In addition, such modifications to the hospital facilities could potentially result in environmental remediation liabilities which may be material to the Company.

The OSHPD has a voluntary program to re-evaluate the seismic risk of hospital buildings classified as Structural Performance Category ("SPC") 1. These buildings are considered hazardous and at risk of collapse in the event of an earthquake and they were required to be retrofitted, replaced or removed from providing acute care services by 2013, unless granted an extension. OSHPD is using HAZARDS U.S. ("HAZUS"), a state-of-the-art methodology, to reassess the seismic risk of SPC-1 buildings and those that are determined to pose a low seismic risk may be reclassified to SPC-2. The SPC-2 buildings would have until 2030 to comply with the structural seismic safety standards. Participation in the HAZUS program is optional for hospital owners wishing to have their SPC-1 building(s) re-evaluated. Applications for a HAZUS re-evaluation of the seismic risk were submitted for SCH Hollywood, SCH Culver City and Los Angeles Community Hospital, but there is no assurance they will result in extensions.

In addition, in 2011, the California Legislature enacted Senate Bill 90, which permitted some hospitals to apply for up to an additional seven year extension to the seismic retrofit deadlines, not to extend beyond January 1, 2020. SB 90 also permits OSHPD to extend until January 1, 2018 the date by which the hospitals must obtain a building permit and commence the required retrofit project. OSHPD has discretion to approve or disapprove SB 90 extension requests, and to determine the length of the extension (up to the maximum seven years), based on eligibility factors including seismic risks associated with the affected buildings (which can be impacted by the updated HAZUS findings), community access to essential hospital services in the area and financial hardships facing the applicant.

SCH Culver City and Los Angeles Community Hospitals both applied for the SB 90 extension from OSHPD. Two of the multi-story buildings owned by SCH Culver City were granted SB 90 extensions until January 1, 2019 or July 1, 2019. An additional single-story building is classified as SPC-2. Also, the facility operated by Los Angeles Community Hospital received an SB 90 extension until January 1, 2019.

The Company is in the process of pursuing Non-Structural Performance Category ("NPC") 2 classification and SB 499 Item 2 extensions of the compliance deadlines that would result for Foothill. Bellflower is not currently subject to the requirements of SB90 as the facility currently only provides psychiatric services.

These requirements can result in significant operational changes and capital outlays. Management is continuing to assess its options and the methods of financing the required retrofits. Based on management's evaluation, the costs of renovation needed to comply with the California seismic safety standards for its acute-care facilities, including asbestos abatement, are not estimable at this time.

Legislation and HIPAA

The healthcare industry is subject to numerous laws and regulations of federal, state and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government healthcare program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity has continued with respect to investigations and allegations concerning possible violations of fraud and abuse statutes and regulations by healthcare providers. Violations of these laws and regulations could result in expulsion from government healthcare programs together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed.

The Company believes that it is in compliance with fraud and abuse regulations as well as other applicable government laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation as well as regulatory actions unknown or unasserted at this time.

The Health Insurance Portability and Accountability Act ("HIPAA") assures health insurance portability, reduces healthcare fraud and abuse, guarantees security and privacy of health information, and enforces standards for health information. The Health Information Technology for Economic and Clinical Health Act ("HITECH Act") expanded upon HIPAA in a number of ways, including establishing notification requirements for certain breaches of protected health information. In addition to these federal rules, California has also developed strict standards for the privacy and security of health information as well as for reporting certain violations and breaches. The Company may be subject to significant fines and penalties if found not to be compliant with these state or federal provisions.

Affordable Care Act

The Patient Protection and Affordable Care Act ("PPACA") will substantially reform the United States health care system. The legislation impacts multiple aspects of the health care system, including many provisions that change payments from Medicare, Medicaid and insurance companies. Starting in 2014, the legislation requires the establishment of health insurance exchanges, which will provide individuals without employer-provided health care coverage the opportunity to purchase insurance. It is anticipated that some employers currently offering insurance to employees will opt to have employees seek insurance coverage through the insurance exchanges. It is possible that the reimbursement rates paid by insurers participating in the insurance exchanges may be substantially different than rates paid under current health insurance products. Another significant component of the PPACA is the expansion of the Medicaid program to a wide range of newly eligible individuals. In anticipation of this expansion, payments under certain existing programs, such as Medicare disproportionate share, will be substantially decreased. Each state's participation in an expanded Medicaid program is optional.

Future changes to the Affordable Care Act and in other federal and state legislation could have a material impact on the operations of the Company. The Company is continuing to monitor the legislative environment for risks and uncertainties.

California Hospital Fee Program

The State of California enacted Assembly Bill 1383 ("AB 1383") effective January 1, 2010, as amended by Assembly Bill 1653 (collectively, the "Program"), to provide supplemental payments to certain hospitals such as the hospitals owned and operated by the Company's subsidiaries. The Program requires participating hospitals to pay fee assessments into a pool of funds to which the federal government contributes matching funds. Most of these funds, including the federal matching funds, are then distributed to qualifying hospitals. In addition, on April 13, 2011 SB 90 was signed into law and provided for a six-month extension of the Hospital Fee Program for dates of service from January 1, 2011 through June 30, 2011. CMS granted final approval of SB 90 on December 29, 2011, at which point the revenue and expense was recognized for the retroactive period. In September 2011, the State of California enacted Senate Bill 335 ("SB 335") which provides a 30-month hospital fee program for dates of service from July 1, 2011 through December 31, 2013. The elements of SB 335 related to the fee for service payments were approved by CMS on June 22, 2012. The payments due under the managed care component were made in three cycles, the last of which was approved by CMS during the year ended September 30, 2015. Certain technical changes to the legislation required by CMS are included in Senate Bill 920.

Governor Brown signed Senate Bill 239 ("SB 239") in October 2013. SB 239 enacted a hospital fee program for a program period beginning January 1, 2014 and ending December 31, 2016, contained language for the continuation of a hospital fee program thereafter, but provided that the program would terminate on December 31, 2016. In November 2016, the California voters approved Proposition 52, which made the hospital fee program permanent so that it continues after December 31, 2016. The hospital fee program is operated in cycles known as program periods. The next program period will begin on January 1, 2017

and end on June 30, 2019. Subsequent program periods will be of a duration not to exceed three years. The fee for service component of SB 239 for the period January 1, 2014 through December 31, 2016 was approved by CMS during December 2014, and the first cycle of the managed care component from January 2014 through June 2014 was approved by CMS during July 2015. In November 2016, Proposition 52 was approved in California, extending the existing hospital fee program and continuing the program on an on-going basis. Proposition 52 also prohibits lawmakers from diverting Medi-Cal funds to pay for anything other than their intended purpose.

Management of SCH Culver City estimated that SCH Culver City would be a "net" payer under the Program for AB 1383 and SB 90, since the fee assessments on SCH Culver City exceeded the supplemental payments by approximately $1,074,000 and $4,000,000, respectively. Accordingly, on October 6, 2010, the Company notified the California Department of Healthcare Services ("DHCS") that SCH Culver City was opting out of the Program.

SCH Culver City did not pay the required fee assessments under the Program. As of September 30, 2012, SCH Culver City recorded a liability of approximately $5,494,000, representing the accrued loss above, as well as deferred recognition of payments received from managed care plans. On November 15, 2012 the Company entered into a settlement agreement with DHCS with regards to SCH Culver City's liability under AB 1383, SB 90 and SB 335, as discussed above. Under the terms of the agreement, the DHCS agreed to forgive approximately $2,000,000 of the fees due under AB 1383, which was recorded by the Company during the year ended September 30, 2013. The remaining liability due to DHCS of $4,605,000 will be repaid by the Company monthly over a 10-year period without interest or penalties. The Company recorded a net liability of $3,233,000 as of the settlement date, which represents the net present value of the liability due to DHCS discounted at an effective interest rate of 7.5%. As of September 30, 2016 and 2015, the unamortized balance of the liability amounted to $2,268,000 and $2,547,000, respectively. The DHCS will no longer withhold against any other amounts due to SCH Culver City unless the Company is delinquent on payments owed under the agreement.

As of September 30, 2016 and 2015, the Company had a receivable related to the California Hospital Fee Program of $43,039,000 and $32,285,000, respectively, in the accompanying consolidated balance sheets. As of September 30, 2016 and 2015, the Company had a liability related to the California Hospital Fee Program of $18,684,000 and $15,022,000, respectively, in the accompanying consolidated balance sheets.

Total California Hospital Fee program revenues and expenses recognized during the years ended September 30, 2016 and 2015 were as follows (in thousands):

Years Ended September 30,	**2016**	2015
Hospital services revenues	**$ 91,929**	$ 134,604
Hospital operating expenses	**60,376**	91,325
Net pre-tax impact	**$ 31,553**	$ 43,279

Collective Bargaining Agreements

A small group of employees at SCH Hollywood, which is one of the hospitals under the consolidated group of Southern California Healthcare System, Inc., and Service Employees International Union, United Healthcare Workers-West ("SEIU") are currently parties to a collective bargaining agreement which expires May 2019. In addition, approximately 950 employees at SCH Culver City are part of a collective bargaining agreement with the SEIU or the California Nurses Association ("CNA"). SCH Culver City and CNA

are currently parties to a collective bargaining agreement which expires March 2019. SEIU and SCH Culver City are currently parties to a three-year term agreement that expires on April 27, 2017.

Approximately 300 employees at Our Lady of Fatima Hospital ("Fatima") are subject to a collective bargaining agreement with United Nurses and Allied Professionals ("UNAP"), which expired July 31, 2016. The parties are currently negotiating a new collective bargaining agreement. During April 2015, a hospital unit consisting of approximately 400 service employees of Fatima elected to be represented by UNAP. The parties entered into a new collective bargaining agreement which expires October 2018. A small number of employees are subject to a collective bargaining agreement with the Federation of Nurses and Health Professionals ("FNHP"), which expires April 30, 2017.

East Orange and the International Union of Operating Engineers are party to a collective bargaining agreement expiring December 2016 for the hospital's maintenance unit, consisting of approximately 15 employees.

Approximately 1,000 employees of Crozer are subject to seven collective bargaining agreements expiring on various dates from October 2017 through December 2019. Crozer is also negotiating certain new and expired collective bargaining agreements as of September 30, 2016.

Tangible Net Equity ("TNE") Requirement

The Company's affiliated physician organizations and PHP must comply with a minimum working capital requirement, Tangible Net Equity ("TNE") requirement, cash-to-claims ratio and claims payment requirements prescribed by the California Department of Managed Health Care ("DMHC"). Additionally, PHP has a TNE requirement as prescribed by the California Department of Managed Health Care. TNE is defined as net assets, less intangibles and amounts due from affiliates, plus subordinated obligations. As of September 30, 2016, PHP was in compliance with these regulatory requirements.

The California DMHC determined that, as of March 31, 2015, PMG, on a consolidated basis with its subsidiaries, was not in compliance with the California DMHC's positive TNE requirement for a Risk Bearing Organizations ("RBO"). As a result, the California DMHC required PMG to develop and implement a six-month corrective action plan ("CAP") for such deficiency. Such six-month period has expired, and PMG believes that it has fully complied with all related requirements. As of the date of this report, PMG has not yet received the California DMHC's official release of the CAP.

The Company contributed $2,000,000 of cash and $300,000 of Restricted Investments to PHP in conjunction with PHP's commencement of operations during the year ended September 30, 2015.

Employee Health Plans

Effective January 1, 2013 the Company offered self-insured EPO/HMO and PPO plans to all eligible employees. CharterCARE had a separate low-deductible employee health plan from the date of acquisition through December 31, 2014. Effective January 1, 2015, CharterCARE changed to self-insured EPO/HMO and PPO plans for all eligible employees. Effective March 1, 2016, East Orange offered self-insured EPO/HMO and PPO plans for all eligible employees. Effective July 1, 2016, Crozer offered self-insured EPO/HMO and PPO plans for all eligible employees.

Employee health benefits are administered by a third party claims administrator, based on plan coverage and eligibility guidelines determined by the Company, as well as by collective bargaining agreements (as reflected above). Commercial insurance policies cover per occurrence losses in excess of $750,000 for Crozer, $160,000 for East Orange, $275,000 for CharterCARE, $250,000 for all other hospitals and $175,000

Confidential LGP-SBC-000000343

for the Medical Group and Corporate segments. An actuarially and internally-estimated liability of approximately $4,157,000 and $3,850,000 for incurred but not reported claims has been included in accrued salaries, wages, and benefits as of September 30, 2016 and 2015, respectively. As of September 30, 2016, approximately $1,009,000 of the total liability for incurred but not reported claims was estimated using an internally-developed model.

Provider Contracts

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

14. Accrued Medical Claims and Other Healthcare Costs Payable

The following table presents the roll-forward of incurred but not reported ("IBNR"), claims reserves (Medical Group segment, Global Risk Management segment, and full risk contracts) as of and for each of the fiscal years ended September 30, 2016 and 2015 (in thousands):

September 30,	**2016**	2015
IBNR as of beginning of year	**$ 53,531**	$ 39,314
Claim expenses incurred during the year:		
Related to current year	**226,431**	203,400
Related to prior year	**2,715**	1,606
Total incurred	**229,146**	205,006
Claims paid during the year:		
Related to current year	**(179,457)**	(156,485)
Related to prior year	**(50,459)**	(34,304)
Total paid	**(229,916)**	(190,789)
IBNR as of end of year	**$ 52,761**	$ 53,531

Following is a table showing the details of the Medical Group and Global Risk Management segments cost of revenues per the consolidated statements of operations (in thousands):

Years Ended September 30,	**2016**	2015
Capitation expense	**$ 100,673**	$ 93,340
Fee-for-service claims expense	**142,674**	118,529
Other physician compensation	**20,436**	14,082
Other cost of revenues	**1,941**	1,196
Total cost of revenues	**$ 265,724**	$ 227,147

Confidential LGP-SBC-000000344

15. Joint Ventures and Unconsolidated Equity Investments

AMVI

The Company (through Prospect Medical Group, Inc.) and an unrelated third party, AMVI Care Health Network, Inc. ("AMVI") are partners in a joint venture initially formed to service Medi-Cal members under the CalOptima program in Orange County, California. Healthy Families and OneCare members were subsequently added to the joint venture arrangement. Effective January 1, 2013, all Healthy Family participants were transferred to the Company's Medi-Cal line of business and therefore no longer part of the joint venture. The Company does not consolidate the joint venture. The Company includes in its consolidated financial statements only the net results attributable to those enrollees specifically identified as assigned to it, together with the management fee that it charges the joint venture partner for managing those enrollees specifically assigned to AMVI. Costs incurred by the Company in managing the joint venture are included in general and administrative expenses in the accompanying consolidated financial statements. As of September 30, 2016 and 2015, the net liability balances of the Company investment in the joint venture under the equity method were approximately $181,000 and $1,944,000, respectively, and were included in accounts payable and other accrued liabilities in the accompanying consolidated financial statements.

Summarized unaudited financial information for the unconsolidated joint venture as of and for each of the years ended September 30, 2016 and 2015 is as follows (in thousands):

September 30,		**2016**		2015
Cash	$	**646**	$	(96)
Receivables		**626**		2,344
Total assets	$	**1,272**	$	2,248
Accrued medical claims	$	**144**	$	1,652
Other payables		**179**		158
Other partner's capital		**844**		437
Prospect's capital		**106**		1
Total liabilities and partner's capital	$	**1,273**	$	2,248

Years Ended September 30,		**2016**		2015
Revenues	$	**9,179**	$	19,817
(Loss) Income before income taxes	$	**(1,103)**	$	4,532
Prospect's equity (loss) income	$	**(1,303)**	$	5,867
Management fees earned by Prospect	$	**437**	$	1,106

RWRT and SNERCC

Roger Williams Medical Center and an unrelated third party are owners of Roger Williams Radiation Therapy ("RWRT") and Southern New England Regional Cancer Center, LLC ("SNERCC"), which provide radiation therapy services. As of September 30, 2014, RWMC owned 29% of RWRT and 20% of SNERCC. On January 6, 2015, RWMC sold a 9% interest in RWRT for $1,233,000, reducing its ownership in RWRT from 29% to 20%. Also on January 6, 2015, RWMC increased its investment in SNERCC by $1,600,000 in

connection with SNERCC's acquisition of a radiation oncology business. RWMC's interest in SNERCC remained at 20% after the additional investment as RWMC's additional investment was its pro rata portion of the radiation oncology business purchase price. Roger Williams accounts for these investments using the equity method of accounting.

RWMC is not liable for any obligations insured by RWRT or SNERCC nor is it obligated to make any further capital contributions or lend funds to RWRT or SNERCC. As of September 30, 2016 and 2015, RWMC's investments in RWRT and SNERCC under the equity method were approximately $4,281,000 and $4,217,000, respectively, and are included in equity method investments in the accompanying consolidated balance sheets. For the years ended September 30, 2016 and 2015, the Company recognized approximately $448,000 and $455,000, respectively, as its share of the financial results of RWRT and SNERCC and received $320,000 and $423,000, respectively, in distributions.

Summarized combined unaudited financial information for RWRT and SNERCC as of September 30, 2016 and 2015 and for the year ended September 30, 2016 and for the period from June 20, 2014 (inception) through September 30, 2015 is as follows (in thousands):

September 30,	2016	2015
Cash	$ 2,567	$ 1,299
Receivables	1,265	1,547
Other current assets	271	274
Total current assets	4,103	3,120
Property, improvements and equipment, net	6,495	7,432
Goodwill	7,142	7,142
Intangible assets	912	943
Other long-term assets	1,641	1,663
Total assets	$ 20,293	$ 20,300
Accounts payable and accrued liabilities	$ 1,251	$ 1,618
Other long-term liabilities	378	345
Equity	18,664	18,337
Total liabilities and partner's capital	$ 20,293	$ 20,300

Years ended September 30,	2016	2015
Revenues	$ 15,007	$ 14,626
Net income	$ 1,927	$ 2,000
Roger Williams Medical Center's income from equity method investments	$ 448	$ 455

16. Subsequent Event (Unaudited)

The Company has evaluated subsequent events through December 29, 2016, the date the Company's consolidated financial statements were available for issuance.

Effective October 1, 2016, a wholly-owned subsidiary of the Company, Prospect ECHN, Inc. (and affiliated wholly-owned subsidiaries), acquired substantially all of the assets, and certain liabilities, of Eastern

Confidential LGP-SBC-000000346

Connecticut Health Network, Inc. and certain of its subsidiaries in exchange for cash consideration of $105 million (subject to certain adjustments). The acquired assets include a network of hospitals, outpatient service centers and providers and specialists serving eastern Connecticut. The acquired hospitals are The Manchester Memorial Hospital and The Rockville General Hospital. Results of operations for the acquired assets will be included in the results of the Hospital Services segment from the date of acquisition and are not included in the results of operations for the year ended September 30, 2016.

Also effective October 1, 2016, a wholly-owned subsidiary of the Company, Prospect Waterbury, Inc. (and affiliated wholly-owned subsidiaries), acquired substantially all of the assets, and certain liabilities, of Greater Waterbury Health Network, Inc. and certain of its subsidiaries in exchange for cash consideration of $31.8 million (subject to certain adjustments). The acquired assets include Waterbury Hospital, an acute-care hospital with 357 licensed beds, and a network of outpatient centers and affiliated physicians. Waterbury Hospital provides a comprehensive range of inpatient, outpatient and ancillary services for residents of Waterbury, Connecticut, and its surrounding community. Results of operations for the acquired assets will be included in the results of the Hospital Services segment from the date of acquisition and are not included in the results of operations for the year ended September 30, 2016.

Effective December 22, 2016, Prospect CharterCare RWMC, LLC and Prospect CharterCare Elmhurst, LLC ("Elmhurst") sold assets related to its Elmhurst Extended Care 206 bed nursing facility, including certain real property, to Valley Stream Property, LLC. (an affiliate of Tryko Partners, and its health care subsidiary, Marquis Health Services) for cash consideration of approximately $15 million. Results of operations of Elmhurst, and the related sold assets, are included in discontinued operations for the year ended September 30, 2016 and 2015.

Office of Health Care Access

Final Decision

Applicants: Eastern Connecticut Health Network, Inc.
[redacted]
Manchester, CT 06040

Prospect Medical Holdings, Inc.
[redacted]
Los Angeles, CA 90025

Docket Number: 15-32016-486

Project Title: Transfer of assets of Eastern Connecticut Health Network, Inc. to Prospect Medical Holdings, Inc.

Procedural History: On July 16, 2015, the Applicants filed with the Office of Health Care Access ("OHCA") and the Office of the Attorney General ("OAG") the Certificate of Need ("CON") Determination Letter proposing the transfer of assets of Eastern Connecticut Health Network, Inc. and affiliates ("ECHN") to Prospect Medical Holdings, Inc. ("PMH"). The Applicants filed the application for the proposal on October 13, 2015. On January 13, 2016, OHCA and the OAG deemed the application complete, and on January 21, 2016 OHCA and the OAG jointly published a Summary of the proposal in the *Journal Inquirer*.

On February 19, 2016, OHCA and the OAG notified the Applicants of the date, time and place of the public hearing. On March 10, 2016, OHCA and the OAG notified the Applicants of the revised date, time and place of the public hearing. On March 11, 2016, a notice to the public announcing the hearing was published in the *Journal Inquirer*. Thereafter, pursuant to Conn. Gen. Stat. §19a-639a and §19a-486, a public hearing regarding this application was held on March 29 and 30, 2016, jointly by OHCA and the OAG.

Attorney Redacted was designated as the hearing officer in this matter. The hearing was conducted in accordance with the provisions of the Uniform Administrative Procedures Act (Chapter

CONFIDENTIAL BUSINESS INFORMATION

54 of the Conn. Gen. Stat.) and Conn. Gen. Stat. §19a-639a(f). The public hearing record was closed on June 9, 2016.

In making her decision, Deputy Commissioner Brancifort reviewed the entire record in this matter.

To the extent the findings of fact actually represent conclusions of law, they should be so considered, and vice versa. *SAS Inst., Inc. v. S & H Computer Systems, Inc.*, 605 F. Supp. 816 (Md. Tenn. 1985).

CONFIDENTIAL BUSINESS INFORMATION

Findings of Fact

1. ECHN is a not-for-profit health care system that is the parent company of two acute care hospitals in Connecticut, Manchester Memorial Hospital ("MMH") located in Manchester and Rockville General Hospital ("RGH") located in Vernon (at times collectively referred to as the "Hospitals"). Ex. G, p. 24

2. ECHN's care network consists of the following wholly owned entities:
   - MMH
   - RGH
   - ECHN ElderCare Services, Inc. ("Woodlake at Tolland")
   - Visiting Nurse and Health Services of Connecticut, Inc.
   - A Caring Hand, LLC
   - Clinically Integrated Network of Eastern Connecticut, LLC
   - Connecticut Healthcare Insurance Company
   - ECHN Corporate Services, Inc.
   - Medical Practice Partners, LLC
   - ECHN Enterprises, Inc.
   - Haynes Street Property Management, LLC
   - Eastern Connecticut Medical Professionals Foundation, Inc.
   - ECHN Community HealthCare Foundation, Inc.

   Ex. G, pp. 24-25

3. Additionally, ECHN or an ECHN affiliate has ownership interests in the following joint ventures: Evergreen Endoscopy Center, LLC, WBC Connecticut East, LLC, Aetna Ambulance Service, Inc., Metro Wheelchair Service, Inc., Ambulance Service of Manchester, LLC, Connecticut Occupational Medicine Partners, LLC, Eastern Connecticut Physician Hospital Organization, Inc., Northeast Regional Radiation Oncology Network, Inc., Tolland Imaging Center, LLC, Haynes Street Medical Associates, LLC, Haynes Street Medical Associates II, LLC, Evergreen Medical Associates, LLC, and Evergreen Medical Associates II, LLC (collectively, the "Joint Ventures"). Ex. G, p. 25

4. The chart on the following page depicts ECHN's current organizational structure. Ex. G, p. 1836

5. ECHN serves the following nineteen towns in eastern Connecticut: Andover, Bolton, Coventry, Ellington, Manchester, South Windsor, Tolland, Vernon, Willington, Ashford, Columbia, East Hartford, East Windsor, Glastonbury, Hebron, Mansfield, Somers, Stafford, and Union (the "Service Area"). Ex. G, p. 24

6. ECHN's financial condition has been strained since 2001, limiting its access to the capital required to improve infrastructure and recruit physicians. ECHN lost more than $9 million from operations over the last 15 years and its pension liability has grown from $9 million to $63 million over the same span. Ex. Z, Prefiled Testimony of [redacted], President and CEO, ECHN, p. 3341; Ex. BB, pp. 3955, 3957; Ex. G. pp. 25, 1921-23

7. ECHN has attempted to improve its financial situation through various initiatives, including hiring freezes, wage freezes, reductions in workforce, and a reduced workweek. This has included a reduction of 200 positions in recent years. Despite these measures, a large portion of ECHN's cash flow has been required to fund debt service and pension obligations, making capital investments difficult. Ex. G, p. 35; Tr., Testimony of [redacted] on 3/30/16, p. 21; Ex. BB, p. 3955

8. In 2011, ECHN began exploring whether potential affiliations with another health care system would enable ECHN to better serve the community. At the time, ECHN believed it had five years until its financial circumstances would become dire. Ex. G, p. 36; Tr., Testimony of [redacted] [redacted], M.D., Chairman of ECHN Board of Trustees, on 3/30/16, p. 15

9. In November of 2012, ECHN conducted a request for proposal ("RFP") process and a transaction committee was established by the ECHN Board of Trustees to evaluate the proposals ("Transaction Committee"). As a result of this RFP process, a regulatory approval process was initiated in June of 2014 for the acquisition of ECHN's assets by a joint venture to be formed by Yale New Haven Health System and Tenet Healthcare. However, Tenet Healthcare informed ECHN in December of 2014 that it was withdrawing from the process. Ex. G, pp. 38-39

10. In 2015, the Transaction Committee conducted a second RFP process. The Transaction Committee evaluated the three proposals received against selection criteria and requested further information from each respondent. The Transaction Committee then reviewed financial, quality and corporate compliance data for each respondent. Each proposal was evaluated for its ability to satisfy ECHN's financial needs and liabilities, any antitrust considerations, and state regulatory requirements for a hospital conversion. The Transaction Committee also made site visits to hospitals recently merged with or acquired by the respondents. Ex. G, pp. 39-42

11. In June of 2015, the Transaction Committee decided to negotiate solely with PMH. After reviewing the Letter of Intent and the draft Asset Purchase Agreement ("APA") negotiated with PMH, the Transaction Committee recommended that the ECHN Board of Trustees accept the proposal. On June 25, 2015, a unanimous vote of the ECHN Board of Trustees approved the Letter of Intent and APA, and on July 29, 2015 ECHN's Corporators approved the APA. Ex. G, pp. 42-43, 107-120, 122-214, 396

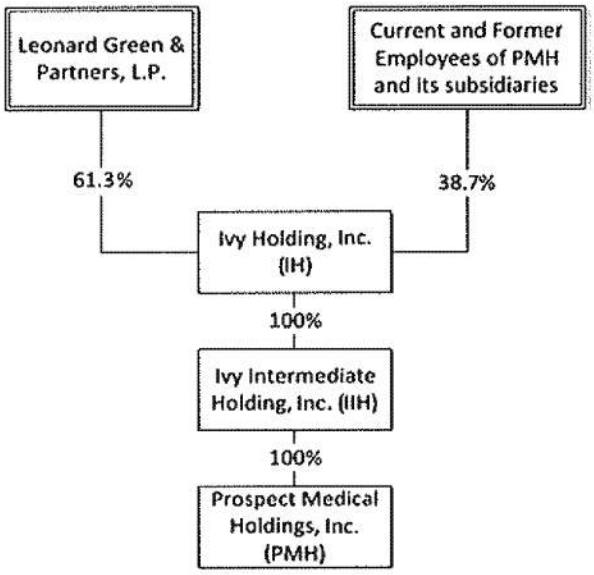
12. The Applicants are requesting approval of the proposed asset purchase (the "Asset Purchase") as a solution to ECHN's long-standing challenges that offers the Service Area continued access to its services and facilities. Ex. G, p. 26

13. PMH is a for-profit, privately owned national healthcare services company with its principal place of business in Los Angeles, California. PMH owns fourteen acute care and behavioral hospitals in California, New Jersey, Rhode Island and Texas. It also owns a network of specialty and primary care clinics in each of these regions. Ex. G, pp. 25, 27; Ex. Z, Prefiled Testimony of Von Crockett, Senior Vice President of Corporate Development, PMH, p. 3355

14. Through PMH's medical group segment, PMH also manages the provision of physician services in each of its markets through a network of approximately 8,900 physicians. The physician networks operate as independent practice associations ("IPAs") that contract with PMH-owned management service organizations ("MSOs"). The IPAs are comprised of both PMH-employed and independent community physicians and other allied health professionals. Ex. G, p. 25; Ex. K, p. 2159; Ex. N, p. 3231

15. PMH aligns its hospitals and physician networks under a model called Coordinated Regional Care ("CRC"). CRC provides for clinical integration of hospitals, physicians and community providers with health plans and other payers through value driven and risk-based reimbursement systems. PMH believes that the CRC model improves quality, efficiency and financial performance while providing its patients with quality, affordable healthcare. Ex. G, p. 26

16. The chart below shows PMH's ownership structure.



Ex. K, p. 2205

17. ECHN selected PMH as the proposed purchaser because its financial resources and access to capital are anticipated to maintain ECHN's assets as economically viable and vibrant parts of the healthcare system in Eastern Connecticut by permitting capital investments, better preparing MMH and RGH to participate in new value-based delivery models, offering enhanced practice options for physicians, strengthening its network of providers and allowing for other improvements in operations. Ex. Z, Prefiled Testimony of [redacted] p. 3333

18. In its audited financial statements for FY 2015, PMH reported total revenues of over $1.3 billion from its operations on a consolidated basis. As of fiscal year end 2015, PMH reported free cash flow of over $112 million and close to $75 million in cash from operations. The company also received credit upgrades by both Moody's and S&P in 2015, with Moody's rating PMH's bonds as B1 and S&P rating PMH's bonds as B. These ratings still stand as of May 3, 2016. Ex N, pp. 3245, 3249-59; Tr., Testimony of Steven Aleman, Chief Financial Officer, PMH, on 5/3/2016, p. 113

19. Under the APA, PMH will pay $105 million for substantially all the assets of ECHN, including both Hospitals (a) plus any excess of net working capital over $24 million or minus any net working capital under $24 million; (b) minus the value of certain ECHN liabilities assumed by PMH (including ECHN's unfunded pension obligations, captive insurer liability, capital leases and workers' compensation liability); (c) minus asbestos abatement liability of up to $1 million; and (d) in the event that ECHN is unable to assign and transfer its interest in any ECHN Joint Venture to PMH, minus a dollar amount to be fixed in advance for each ECHN Joint Venture. Ex. G, pp. 29, 145

20. Certain assets of ECHN will be excluded from the sale, including certain cash and cash equivalents of ECHN, all short-term and long-term investments other than ECHN's investments in the Joint Ventures, board-designated, restricted and trustee-held or escrowed funds, beneficial interests in charitable assets and accrued earnings on all of the foregoing. These assets will be transferred to a new, independent charitable entity (the "New Foundation") established by ECHN. The New Foundation will use the charitable assets for appropriate charitable health care purposes in the communities traditionally served by ECHN. Ex. G, pp. 29, 49, 312-13; Ex. BB, p. 3338

21. There is no financing contingency with respect to the transaction. PMH anticipates funding the transaction using its existing cash and also has access to a pre-approved $40 million revolving line of credit with Morgan Stanley. In order to draw on this line, PMH provides a 24 hour advance verbal notice to the lenders. Ex. G., p. 78; Ex. K, p. 2191

22. The transaction is estimated to require $28 million in cash from PMH at closing. PMH currently has in excess of $65 million in cash and is anticipated to have close to $100 million in cash on hand by the time the Asset Purchase closes, as a result of its growth in revenues that is generating between $10-15 million of free cash flow on a monthly basis. PMH currently has less cash than previously reported due to the recent acquisition of East Orange General Hospital in New Jersey. The revolving line of credit, which PMH recently drew down to $10 million to finance its purchase of East Orange General Hospital, is also expected to be restored

to $30 million by the time of closing. Ex. K, p. 2192; Ex. UU; Tr., Testimony of Steven Aleman, on 3/29/2016, p. 152-53

23. The proceeds from the Asset Purchase will be used first to settle all of ECHN's indebtedness not otherwise assumed by PMH, then to fund the indemnity reserve for payment of ECHN liabilities to PMH that may arise post-closing. Any funds remaining in the reserve after a specified period will be transferred as directed by the OAG. Ex. G, p. 30

24. Table 1 summarizes the net proceeds and flow of funds associated with the Asset Purchase as of March 31, 2016 compared to September 30, 2015, including ECHN's anticipated plan for payment of debt and pension obligations as well as payment of other liabilities. The amounts are subject to adjustment at the closing date ("Closing Date").

TABLE 1
APA PROJECTED NET PROCEEDS AND FLOW OF FUNDS

			Actual 9/30/2015	Actual 3/31/2016
ACQUISITION PRICE (EV)	A		105,000,000	105,000,000
ASSUMED ASSETS & LIABILITIES: Pension & Retiree Medical			(62,598,000)	(67,598,000)
Captive & Workers Comp.			(1,705,000)	(1,705,000)
Net Working Capital True-up			(9,107,000)	(8,275,000)
RGH Eating Disorder Loan			0	0
Seller's Reimbursable Costs			(424,000)	(424,000)
Capital Leases			(6,764,000)	(5,922,000)
Asbestos Abatement			(1,000,000)	(1,000,000)
TOTAL ACQ LIABILITIES	B		(81,598,000)	(84,924,000)
THRESHOLD on LIABILITIES	C		(77,000,000)	(77,000,000)
GUARANTEED NET PROCEEDS	D	A-C	28,000,000	28,000,000
CASH & INVESTMENTS (ECHN) *	E		58,454,000	54,968,000
TOTAL CASH for DEBT PAYOFF	F	D+E	86,454,000	82,968,000
LONG TERM DEBT	G		(78,420,000)	(75,896,000)
SURPLUS after DEBT DEFEASANCE	H	F-G	8,034,000	7,072,000
Post-Closing Pool "Wind Down" Funds			1,000,000	1,000,000
Excess Liabilities Assumed		B-C	(4,598,000)	(7,924,000)
Funds Remaining after PMH Reimbursed	K	H-I+J	2,436,000	(1,852,000)

Deduction to Capital Commitment**	L		0	1,852,000
Available for Indemnity Reserve	M	K+L	2,436,000	0
Legacy ECHN ***			2,229,000	2,139,000

* PMH is assuming a $5 million loan for the RGH Eating Disorder Unit without a price deduction. To the extent that cash is available beyond the $1 million for post-closing costs and $4.5 million for the indemnity reserve, ECHN can mitigate a deduction to the capital commitment up to $5 million.
** If line K is less than zero, then there was not sufficient ECHN cash left to make PMH whole on additional liabilities assumed, thus a dollar for dollar reduction to the $75 million capital commitment applies.
*** Estimated value of future settlements on funds due from Medicare and Medicaid less funds due to Medicare and Medicaid for prior years that are still pending final review. The amounts are net of various balance sheet accounts that will not be part of the acquisition.
Late File 8, dated Apr. 20, 2016; Ex. TT

25. After the closing of the proposed Asset Purchase, the assets of ECHN will be transferred to Prospect ECHN, Inc. or one or more of its affiliates ("New ECHN"). New ECHN will serve as the health system parent company and sole shareholder of the PMH affiliates that will hold the hospital licenses for MMH and RGH after the closing of the proposed Asset Purchase (the post-closing for-profit hospitals will be referred to individually as "New MMH" and "New RGH" and collectively as "New Hospitals"). Ex. G, p.1838; Late File 13, dated Apr. 20, 2016

26. For at least three years after the Closing Date, PMH will continue operating New MMH and New RGH in their current locations as acute care hospitals with emergency departments, will maintain an ownership interest in ECHN's current post-acute care continuum of care network and will require any wholly owned entity involved with such post-acute care continuum of care network to maintain appropriate service lines. Ex. G, pp. 32, 110

27. PMH has no plans to eliminate any currently offered services at MMH or RGH after the Closing Date. No service line or service location changes are currently planned in connection with the proposed Asset Purchase, although it is expected that the ECHN ambulatory network will be expanded and services configured to promote the most efficient delivery of coordinated care following the closing. Ex. K, p. 2189

28. Following the closing, New MMH and New RGH will each maintain an advisory board subordinate to PMH's Board of Directors and comprised of community representatives, physicians on the medical staffs of New MMH and New RGH, and the New Hospitals' CEO (the "Local Board"). The initial members of the Local Board will include at least five members of ECHN's Board of Trustees. PMH plans to appoint the same individuals to the Local Board of New MMH and the Local Board of New RGH and to have the boards meet concurrently to encourage interaction within the system. PMH will schedule regular standing meetings to update the Local Board. Ex. G, p. 30; Ex. K, p. 2165

29. The Local Board will serve as a resource for PMH with respect to investment of the $75 million commitment amount set forth in the APA (the "Commitment Amount"), assist with

maintenance and implementation of a strategic business plan for the New Hospitals, and assist with medical staff credentialing, quality assurance programs and accreditation at the New Hospitals. Ex. G, p. 30

30. During such periods that PMH operates the New Hospitals, it has agreed to maintain ECHN's commitment to quality, safety and patient satisfaction, including maintaining appropriate enrollment, certifications, and accreditations necessary to receive reimbursement under government payment programs. Ex. G, p. 181

31. PMH has had to significantly modify its own Quality Assurance and Performance Improvement ("QAPI") as a result of recent surveys of two of PMH's California hospitals, Los Angeles Community Hospital and Southern California Hospital, resulting in the California Department of Health imposing Immediate Jeopardy citations. Ex. Z, Prefiled Testimony of Von Crockett, pp. 3355-57; Ex. K, pp. 2684-2808, 2835-3020; Ex. Z, pp. 3402-77, 3479-3645

32. ECHN's representatives learned of the Immediate Jeopardy citations on February 1, 2016. In response, the ECHN Board of Trustees appointed a Quality Evaluation Team to investigate whether there were systemic problems suggesting PMH might be an unreliable buyer from a quality and patient safety perspective. The team members visited PMH's CharterCare hospitals in Rhode Island to review their quality program and met with quality personnel at various PMH hospitals, including California and Rhode Island. ECHN concluded that the compliance issues were isolated and that PMH demonstrated a strong commitment to remediate the problems. Based on this information, on March 23, 2016, the ECHN Board of Trustees confirmed its commitment to proceed with the transaction. Tr., Testimony of Redacted on 3/29/16, p. 101; Late File 1, dated Apr. 20, 2016; Ex. Z, Prefiled Testimony of Redacted, Vice Chair, ECHN Board of Trustees, p. 3352

33. On March 28, 2016, the parties entered into a letter pursuant to which PMH agreed to maintain certain ECHN quality programs for the first two years after the Closing Date and not modify them without approval of the Local Board ("Quality Assurance Commitment Letter"). The Quality Assurance Commitment Letter also requires that PMH maintain QAPI programs consistent with best practices and those currently implemented in PMH's Rhode Island facilities while also acknowledging that the Local Board shall oversee quality programs at the New Hospitals. Tr, Testimony of Redacted Senior Vice President of Mergers and Acquisitions, PMH, on 3/30/16, p. 80; Ex. EE

34. With respect to quality activities, ECHN currently functions as a high reliability organization ("HRO") committed to empowering all levels of employees to notify administrators of any patient care issues and fixing processes, leading to consistent delivery care and improved outcomes. PMH is supportive of ECHN's HRO status. Tr., Testimony of Von Crockett on 3/29/2016, p. 49; Tr., Testimony of Redacted, President, PMH, on 3/29/2016, pp. 68-69

35. Additionally, as a result of the Immediate Jeopardy citations, PMH has hired a corporate level Chief Quality Officer, Chief Clinical Officer, Chief Nursing Officer and an Associate Vice President of Regulatory and Patient Safety to assist in providing necessary resources to

implement all quality programs at its local hospitals and share best practices among the hospitals. Ex. Z, Prefiled Testimony of Von Crockett, pp. 3355-57

36. PMH is also establishing an Eastern region quality team and will hire a regional Director of Quality by the time of closing of the Asset Purchase. This regional team will serve as a resource for the New Hospitals, as well as PMH hospitals located in New Jersey, Rhode Island and Pennsylvania. When one of the New Hospitals has a question about a corporate practice or policy, the Eastern region quality team will have the ability to be on-site in order to assist the local team. Tr., Testimony of Redacted on 3/30/2016, pp. 144-47

37. Other PMH initiatives include retaining a national consulting firm and legal counsel to assist in preparedness and responses to Centers for Medicare & Medicaid Services ("CMS") surveys. Under PMH's draft QAPI program, a Hospital Quality & Patient Safety Committee will be developed at each of the New Hospitals, with oversight over subcommittees and workgroups that address the hospital's unique needs. These committees will report to a Regional Quality and Patient Safety Steering Council, which will report to the Corporate Quality and Patient Safety Steering Council. Tr., Testimony of Von Crockett on 3/29/15, pp. 93-94; Ex. Z, Prefiled Testimony of Von Crockett, pp. 3356-57; Ex. Z, pp. 3402-03; Late File 1, dated Apr. 20, 2016; Late File 10, dated Apr. 20, 2016

38. The APA commits PMH to expend the Commitment Amount on capital projects to upgrade the New Hospitals' facilities and services over the next five years. However, the APA also provides that the Commitment Amount is subject to a dollar-for-dollar reduction if ECHN has more than $77 million of liabilities on the Closing Date other than long-term debt and there is not enough available cash or money in the indemnity reserve established under Section 9.8 of the APA to cover the excess liabilities being assumed by PMH. Ex. G, pp. 146-47, 181, 199

39. PMH intends to fund its capital commitments through the operations of ECHN, PMH's existing cash at the time of expenditure or, if necessary, PMH's corporate level credit facility. Ex. G, p. 78

40. The APA provides that the Commitment Amount will be spent on (a) capital projects, including routine and non-routine capital expenditures for the improvement of facilities and/or the acquisition, development, expansion and improvement of hospital, ambulatory or other health care services; (b) de novo development, expansion or acquisition of a department, program, service or facility; (c) upgrades or renovations generally; (d) deferred maintenance items; and (e) recruitment of medical staff. Ex. G, pp. 181-82

41. The Commitment Amount has not been specifically apportioned to each hospital or its affiliates. Allocations of the Commitment Amount will be made by PMH after it receives input from the Local Board and medical staff. Ex. E, p. 78

42. After closing, PMH and the Local Board will develop a strategic capital plan. The capital projects in Table 2 below have been identified by ECHN management as priority capital projects. The projects will require PMH approval with input of the Local Board. Ex. G, pp. 31, 82

TABLE 2
CAPITAL PRIORITY PROJECTS IDENTIFIED BY ECHN (IN MILLIONS)

Description	Estimated Cost (In Millions)
1. Upgrades to emergency department for behavioral health patients (MMH)	$1.1
2. Electronic medical record system replacement (MMH & RGH)	$20
3. Upgrades to nursing units (RGH)	$6.6
4. Upgrades to nursing units (MMH)	$11
5. Vessel sealing systems (MMH & RGH)	$0.6
6. MRI replacement (MMH)	$1.6
7. SPECT scanner replacement (MMH)	$0.4
Total Estimated Cost	**$41.3**

Ex. E, p. 82; Ex. H, p. 2193

43. PMH has also provided a list of immediate estimated capital expenditures at the New Hospitals, as well as the Woodlake at Tolland nursing and rehabilitation facility, that it plans to address within 3 years of closing at a total estimated cost of approximately $11.8 million. Table 3 below shows the timeline for these expenditures, which are mainly comprised of deferred maintenance to the physical plants of these facilities.

TABLE 3
PRIORITY FACILITY CAPITAL NEEDS OF ECHN

Facility	Year 1	Year 2	Year 3	Total
Manchester Memorial Hospital	$3,455,000	$2,225,000	$2,020,000	$7,700,000
Rockville General Hospital	$727,000	$916,000	$1,370,000	$3,013,000
Woodlake at Tolland	$439,700	$137,000	$487,500	$1,064,200
Total estimated expenditures				**$11,770,200**

Late File 12, dated Apr. 20, 2016

44. In recent years, ECHN reported that it has spent very little on capital improvements other than required expenditures to repair or replace plant and equipment. Additionally, creditors have become reluctant to work with ECHN on large projects that would require financing until it is acquired. Ex. G, p. 83; Tr., Testimony of Redacted CFO, ECHN, on 3/29/2016, p. 161

45. After the Asset Purchase, capital will be available to ECHN for replacements and upgrades to systems and the infrastructures of ECHN's facilities; investments to improve the sharing of electronic medical records in order to improve the collection and documentation of information and to enhance the availability of information for critical treatment decisions for patients;

upgrades to medical equipment and technology to provide patients access to state-of-the-art technology for diagnosis, care and treatment; and program development to attract and retain physicians. Ex. G, p. 57

46. As of the closing, PMH or its affiliates will offer employment to substantially all ECHN employees who are in good standing, in positions and at salaries at least equal to those then being provided by ECHN and with benefits packages comparable to those offered to similarly-situated employees at other hospitals operated by PMH. Ex. G, pp. 31, 171

47. PMH will maintain and support financially ECHN's University of New England medical student and other health profession teaching programs, as well as ECHN's graduate medical education programs, while operating at a level not to exceed the Indirect Medical Education and Direct Graduate Medical Education caps that may be established by CMS. Ex. G, pp. 32, 181

48. In addition to continued support of its teaching programs, ECHN believes that PMH's CRC model will help overcome challenges in retaining and recruiting physicians that it has faced in recent years. PMH has developed significant experience in other markets regarding ways hospitals can attract more primary care providers and improve access to care. Recently, PMH succeeded in establishing an IPA in Rhode Island with 105 primary care practitioners and 270 specialist physicians. Of the 105 primary care practitioners participating in PMH's Rhode Island physician network at the end of 2015, only 18 were employed by the CharterCare System when PMH acquired its two hospitals in mid-2014. Ex. G, p. 75; Ex. K, p. 2177-78

49. In order to implement the CRC strategy, PMH has established an IPA entity in Connecticut (Prospect Provider Group CT-ECHN, LLC, or "PPGCTE") and a preferred provider network/health system risk taking entity, Prospect Health Services, CT, Inc., that will contract with payers on behalf of PPGCTE physicians. These two organizations, through management services agreements with PMH, will manage physician participation, risk contracting and care management activities for participating members. Ex. K, p. 2158

50. The goal of the CRC model is to reduce the overall cost of health care by increasing preventive care and early readmissions, reducing inpatient utilization and reducing emergency room visits. PMH will achieve these goals by developing a healthcare delivery network encompassing the entire continuum of patient care, including inpatient services, home health, clinics, independent physicians, nursing homes, ambulatory surgical centers, out-patient diagnostic services and other health related services. Ex. K, p. 2192; Ex. G, pp. 76, 107

51. PMH has demonstrated the efficacy of the CRC model in Southern California, Texas and Rhode Island. In these regions, PMH has improved clinical outcomes, increased quality scores, increased patient satisfaction, reduced readmission rates, reduced average lengths of stay, and reduced medical-cost ratios. For example, from 2012 to 2014 in California and Texas, where PMH participates in HMO contracts for seniors, PMH reduced hospital bed days per thousand from 1,260 to 720. Additionally, length of hospital stay for this population has been reduced from 5.1 to 3.9 days, admissions per thousand have dropped from 245 per thousand to 182 per thousand and hospital readmissions within thirty days has dropped from 19% to 13%. The

CRC model has also enabled PMH to attract more primary care providers and has improved access to care. Ex. G, pp. 73, 75-76

52. Subject to changes in legal requirements or governmental guidelines or policies, PMH will ensure that New MMH and New RGH maintain and adhere to ECHN's current policies regarding charity care, bad debt, indigent care, community volunteer services and community benefits or adopt other policies that are at least as favorable to the indigent and uninsured in the aggregate as ECHN's current policies. ECHN's policies are generally comparable to such policies at PMH's other hospitals. Ex. G, pp. 32, 75, 93, 181, 1912-19; Ex. K, p. 3233; Ex. Z, Prefiled Testimony of Redacted p. 3379

53. PMH will continue to provide financial support for community benefit and community building activities in the Manchester/Rockville area to the same degree as ECHN did in FY 2014. The spending by PMH for community building activities post-closing is projected to increase 1% each year through FY 2019, and the spending for both community benefit and community building activities post-closing assumes no change in the Medicaid population served or the complement of community benefit programs offered by New MMH and New RGH. Ex. G, pp. 96, 99.

54. Table 4 below describes the socioeconomic condition of the ECHN Service Area towns in comparison to the state of Connecticut as a whole and shows the areas most in need of such programs.

TABLE 4
SOCIOECONOMIC STATUS OF THE SERVICE AREA

	Town	Poverty Rate[1]	Median Household Income[1]	Unemployment Rate[2]	Median Age[1]
PSA	Andover	4.9%	$97,762	6.4%	43
	Bolton	2.1%	$87,885	6.0%	47
	Coventry	3.5%	$92,308	7.1%	43
	Ellington	2.7%	$84,934	6.0%	40
	Manchester	8.9%	$63,656	7.4%	37
	South Windsor	4.3%	$91,519	5.9%	42
	Tolland	3.7%	$103,358	5.5%	41
	Vernon	9.2%	$61,848	7.5%	41
	Willington	18.1%	$70,013	5.5%	35
SSA	Ashford	4.2%	$75,242	7.2%	38
	Columbia	3.8%	$92,973	6.4%	47
	East Hartford	15.3%	$48,438	9.8%	39
	East Windsor	5.0%	$71,310	7.4%	42
	Glastonbury	2.6%	$106,872	5.3%	43

Hebron	0.9%	$114,286	5.4%	42
Mansfield	17.9%	$67,615	7.2%	21
Somers	4.8%	$100,100	7.2%	42
Stafford	6.7%	$63,672	8.1%	40
Union	1.1%	$83,500	5.5%	42
State	10.0%	$69,519	7.8%	40

(1)2012

(2)2013

Ex. G, p. 63 (Source: Connecticut Economics Resource Center Town Profile Oct. 2014)

55. The Rockville section of Vernon, where RGH is located, has been designated as a Medically Underserved Population by the Health Resources and Services Administration, and the northwestern part of Mansfield has been designated as a Health Professional Shortage Area for Primary Medical Care. RGH, MMH and ECHN affiliates currently provide safety net services to this region. This proposal will support the availability of health care services to the vulnerable populations in the Service Area. Ex. G, p. 63

56. In 2013, MMH and RGH collaborated to conduct a Community Health Needs Assessment ("CHNA") which identified the current and future health care needs of the community. The four priority health needs identified were heart disease incidence, cancer incidence, diabetes incidence and arthritis incidence. An implementation plan was developed to respond to the identified health needs. Ex. G, pp. 70, 1781-87, 1789-95

57. PMH and its affiliates will support the priority needs identified by the CHNA with physician alignment and population health management strategies, enhanced through implementation of CRC, which focuses on the health of vulnerable populations. PMH has committed to implement and support the current CHNA through 2016 and to conduct another CHNA for the Service Area over the next two years and implement the recommendations of such study as deemed necessary and appropriate. Ex. G, pp. 70-71; Ex. Z, Prefiled Testimony, Von Crockett, p. 3362

58. PMH has stated that New MMH and New RGH will be in compliance with the following general community benefit standards for at least the first three years: (a) the New Hospitals shall provide public health programs to the community and generally promote the welfare of the community; (b) the New Hospitals shall have open medical staffs and not restrict the use of facilities to a particular group of physicians and surgeons to the exclusion of other qualified doctors; (c) the New Hospitals shall participate in the Medicare and Medicaid programs; and (d) the New Hospitals shall operate 24/7 emergency departments and provide emergency services to patients regardless of their ability to pay. Tr. Testimony of Redacted, President, PMH East, on 5/3/16, pp. 103-04

59. PMH and ECHN representatives have already met with leadership for Connecticut's Medicaid Program at the Department of Social Services ("DSS") and expressed their desire to work under a risk-based arrangement to provide care to Medicaid recipients. PMH is currently working with officials in Rhode Island to pilot a Medicaid risk-based program in that state. In addition, PMH will actively work with other providers in the community such as federally qualified health centers or community health centers to meet the needs of uninsured and underinsured individuals in the Service Area, including Medicaid recipients. Ex. G, pp. 74-75

60. The patient populations currently served by the Hospitals is not expected to change as a result of the Asset Purchase. PMH will accept all existing contracts with payers and will complete a change of ownership process with commercial payers, as well as Medicare and the Connecticut Medical Assistance Program (Medicaid). Table 5 below describes the current patient population/payer mix for MMH and RGH, as well as the projected mix for the New Hospitals. Ex. G, p. 85

TABLE 5

CONFIDENTIAL BUSINESS INFORMATION

PATIENT POPULATION/PAYER MIX

Manchester Memorial	Current FY 2015	Projected FY 2016	Year 1 FY 2017	Year 2 FY 2018	Year 3 FY 2019

(1) Includes managed care activity
(2) Includes managed care activity and other medical assistance
Ex. G, p. 84-85

61. PMH's acquisitions of other health systems and hospitals have resulted in improved financial performance at many of the systems. Table 6 below illustrates the financial performance of some of PMH's hospitals after they were acquired by PMH.

TABLE 6
PMH'S RECENT ACQUISITIONS FINANCIAL PERFORMANCE (in Thousands)

Entity	EBITDA			Working Capital			Stockholder's Equity		
	Year prior to acquisition	FY 2014	FY 2015	Year prior to acquisition	FY 2014	FY 2015	Year prior to acquisition	FY 2014	FY 2015
Nix Health System (a)	$14,905	$18,411	$8,043	$5,937	$36,785	$35,449	$13,122	$20,468	$63,789
Roger Williams Medical Center (b)	$3,942	$1,582	$9,080	($1,860)	$1,114	$6,230	$37,184	$34,099	$38,256
Our Lady of Fatima Hospital(c)	($893)	$509	$6,485	$1,904	$2,040	$3,432	($57,150)	$27,513	$28,107

(a) Nix is a Health System based in Texas. Nix's Earnings Before Interest, Taxes, Depreciation and amortization (EBITDA) is based on reported trailing twelve months ended on 1/31/2011. Declines in EBITDA between 2014 and 2015 were due to the fluctuation in net reimbursement related to payments made to the Service Organization of San Antonio "SOSA". Funding to SOSA is voluntary but it is projected to average approximately $12M a year based on budgeted spending initiatives of the service organization. In 2014 the funding requirements were $5.7M (lower by approximately $6.3M) and in 2015 funding requirements returned to $12M. The remaining difference was comprised of lower volume at the facility as services were reconfigured and medical staff turnover. Working Capital of Nix prior to acquisition is as of 1/31/2011 and includes cash which was not part of assets acquired by Prospect.

(b) EBITDA for Roger Williams Medical Center ("RWMC"), located in Providence , Rhode Island, for year prior to acquisition is only for-8 months ending on May 31, 2014 and EBITDA for FY2014 is only for three months post acquisition for FYE 9/30/2014. Working capital is for prior to acquisition as of 5/31/2014 and includes cash which was not part of the assets acquired by PMH as prior to the acquisition RWMC was a non-profit organization. Therefore, net assets were used as a substitute for stockholder's equity.

(c) EBITDA for Our Lady of Fatima Hospital ("OLFH") in Rhode Island is for year prior to acquisition and is only for 8 months ending on May 31, 2014 and for FY2014 is only for three months post acquisition. Working capital prior to acquisition is as of 5/31/2014 and includes cash which was not part of the assets acquired by PMH as prior to the acquisition OLFH was a non-profit organization. Therefore, net assets were used as a subsitiute for stockholder's equity.
Late File 19, dated Apr. 20, 2016; Ex. QQ, dated May 9, 2016

62. Financial benefits associated with this proposal include: operational efficiencies and economies of scale, participation in PMH's purchasing power, supply chain benefits, employee benefits savings and streamlined revenue collection. PMH also makes available to its hospitals subject matter consultants who are employed by PMH, saving its hospitals the cost of hiring consultants in those areas. Ex. G, p. 57; Ex. Z, Prefiled Testimony of Redacted, p. 3379; Ex. Z, Prefiled Testimony of Von Crockett, pp. 3358-59; Ex. N, p. 3236

63. Tables 7 and 8 below represent MMH's projected revenues and expenses from operations with and without this proposal, projecting gains from operations for MMH with the CON at $11.6 million (before income taxes) by FY 2019, as opposed to $6.7 million without the CON.

TABLE 7
MMH PROJECTED REVENUES AND EXPENSES WITH CON

	FY 2017	FY 2018	FY 2019
Total Operating Revenue	$191,485,686	$196,943,847	$202,818,436
Total Operating Expenses	$181,570,103	$186,486,220	$191,183,170
Gain/Loss from Operations	**$9,915,583**	**$10,457,627**	**$11,635,266**
Provision for Income Taxes	**$4,254,950**	**$4,482,606**	**$5,030,134**
Gain/Loss from Operations	**$5,660,633**	**$5,975,021**	**$6,605,133**

Ex. K, p. 2314

TABLE 8
MMH PROJECTED REVENUES AND EXPENSES WITHOUT CON

	FY 2017	FY 2018	FY 2019
Total Operating Revenue	$189,022,494	$192,255,217	$195,904,378
Total Operating Expenses	$183,683,229	$186,432,862	$189,232,208
Gain/Loss from Operations*	**$5,339,265**	**$5,823,000**	**$6,672,170**

*Provision for income taxes doesn't apply to not-for-profit entities.

Ex. K, p. 2314

64. Tables 9 and 10 represents RGH's projected revenues and expenses from operations with and without this proposal, projecting gains from operations for RGH with the CON at $1.6 million (before income taxes) by FY 2019, as opposed to $114,525 without the CON.

TABLE 9
RGH PROJECTED REVENUES AND EXPENSES WITH CON

	FY 2017	FY 2018	FY 2019
Total Operating Revenue	$70,634,865	$72,732,353	$74,987,275
Total Operating Expenses	$69,632,163	$71,490,737	$73,368,375
Gain/Loss from Operations	**$1,002,702**	**$1,241,616**	**$1,618,900**
Provision for Income Taxes	**$419,357**	**$607,900**	**$766,359**
Gain/Loss from Operations	**$583,345**	**$633,715**	**$852,541**

Ex. K, p. 2316

TABLE 10
RGH PROJECTED REVENUES AND EXPENSES WITHOUT CON

	FY 2017	FY 2018	FY 2019
Total Operating Revenue	$69,583,227	$70,771,104	$72,116,415
Total Operating Expenses	$69,891,198	$70,937,011	$72,001,890
Gain/Loss from Operations*	**($307,971)**	**($165,907)**	**$114,525**

*Provision for income taxes doesn't apply to not-for-profit entities.
Ex. K, p. 2316

65. OHCA is currently in the process of establishing its policies and standards as regulations. Therefore, OHCA has not made any findings as to this proposal's relationship to any regulations not yet adopted by OHCA. Conn. Gen. Stat. §19a-639(a)(1)

66. The application is consistent with the overall goals of the Statewide Health Care Facilities and Services Plan. Conn. Gen. Stat. § 19a-639(a)(2)

67. The Applicants have established that there is a clear public need for the proposal. Conn. Gen. Stat. §19a-639(a)(3)

68. The Applicants have demonstrated that the proposal will improve the overall financial strength of the health care system and that it is financially feasible. Conn. Gen. Stat. §19a-639(a)(4)

CONFIDENTIAL BUSINESS INFORMATION

69. Subject to the conditions below, the Applicants have satisfactorily demonstrated that the proposal will maintain quality, accessibility and cost effectiveness of health care delivery in the region. Conn. Gen. Stat. §19a-639(a)(5)

70. Subject to the conditions below, the Applicants have shown that there would be no adverse change in the provision of health care services to the relevant populations and payer mix, including access to services by Medicaid recipients and indigent persons. Conn. Gen. Stat. §19a-639(a)(6)

71. The Applicants have satisfactorily identified the population to be affected by this proposal. Conn. Gen. Stat. §19a-639(a)(7)

72. The historical utilization of ECHN's services in the Service Area support this proposal. Conn. Gen. Stat. §19a-639(a)(8)

73. The Applicants have satisfactorily demonstrated that this proposal would not result in an unnecessary duplication of existing services in the area. Conn. Gen. Stat. §19a-639(a)(9)

74. Subject to the conditions below, the Applicants have demonstrated that there will be no reduction in access to services by Medicaid recipients or indigent persons. Conn. Gen. Stat. §19a-639(a)(10)

75. The Applicants have satisfactorily demonstrated that the proposal will not have a negative impact on the diversity of health care providers in the area. Conn. Gen. Stat. §19a-639(a)(11)

76. The Applicants have satisfactorily demonstrated that the proposal will not result in any consolidation that would affect health care costs or accessibility to care. Conn. Gen. Stat. §19a-639(a)(12)

CONFIDENTIAL BUSINESS INFORMATION

Discussion

CON applications are decided on a case-by-case basis and do not lend themselves to general applicability due to the uniqueness of the facts in each case. In rendering its decision, OHCA considered the factors set forth in Connecticut General Statutes § 19a-639(a) and 19a-486d. The Applicants bear the burden of proof in this matter by a preponderance of the evidence. *Jones v. Connecticut Medical Examining Board,* 309 Conn. 727 (2013).

ECHN is a not-for-profit health care system that is the parent company of two acute care hospitals in Connecticut, MMH located in Manchester and RGH located in Vernon. *FF1* ECHN's Service Area is comprised of the following nineteen towns in eastern Connecticut: Andover, Bolton, Coventry, Ellington, Manchester, South Windsor, Tolland, Vernon, Willington, Ashford, Columbia, East Hartford, East Windsor, Glastonbury, Hebron, Mansfield, Somers, Stafford, and Union. *FF5* PMH is a for-profit, privately owned national healthcare services company with its principal place of business in Los Angeles, California. PMH owns fourteen acute care and behavioral hospitals in California, New Jersey, Rhode Island and Texas. It also owns a network of specialty and primary care clinics in each of its regions. *FF13* ECHN's financial condition has been strained since 2001 and its mission impeded by various factors, including limited access to capital required to improve infrastructure and recruit physicians and mounting pension liabilities. *FF6* ECHN has attempted to improve its financial situation through various initiatives, including hiring freezes, wage freezes, reductions in workforce, and a reduced workweek. Despite these measures, a large portion of ECHN's cash flow has been required to fund debt service and pension obligations, making capital investments difficult. *FF7* As a result, the Applicants are requesting approval of the proposed Asset Purchase as a solution to ECHN's long-standing challenges while ensuring the Service Area continued access to ECHN's services and facilities. *FF12*

Under the APA, PMH has committed to spend a Commitment Amount of $75,000,000 towards capital projects over the next five years. However, the APA also provides that the Commitment Amount is subject to a dollar-for-dollar reduction if ECHN has more than $77 million of liabilities on the Closing Date other than long-term debt and there is not enough available cash or money in the indemnity reserve to cover the excess liabilities (for amounts over $77 million) being assumed by PMH. *FF38* The APA provides that the $75 million Commitment Amount will be spent on (a) capital projects, including routine and non-routine capital expenditures for the improvement of facilities and/or the acquisition, development, expansion and improvement of hospital, ambulatory or other health care services; (b) de novo development, expansion or acquisition of a department, program, service or facility; (c) upgrades or renovations generally; (d) deferred maintenance items; and (e) recruitment of medical staff. *FF40*

For at least three years after the Closing Date, PMH will continue operating New MMH and New RGH in their current locations as acute care hospitals with emergency departments, will maintain an ownership interest in ECHN's current post-acute care continuum of care network and will require any wholly owned entity involved with such post-acute care continuum of care network to maintain appropriate service lines. *FF26* PMH has no plans to eliminate any services at MMH or RGH. No service line or service location changes are currently planned in connection with the proposed transaction, although it is expected that the ECHN ambulatory network will be expanded and services configured to promote the most efficient delivery of coordinated care following the closing. *FF27*

Following closing, New MMH and New RGH will each maintain a Local Board, an advisory board made up of community representatives, physicians on the respective hospital's medical staff, and the CEO of the respective hospital, that will be subordinate to PMH. The initial members of the Local Board will include at least five members of ECHN's Board of Trustees. The Local Board will serve as a resource for PMH with respect to investment of the Commitment Amount, assist with maintenance and implementation of a strategic business plan for the New Hospitals, and assist with medical staff credentialing, quality assurance programs and accreditation at the New Hospitals. *FF29*

After closing, PMH and the Local Board will develop a strategic capital plan. The following capital projects have been identified by ECHN management as priority capital projects:

Description	**Estimated Cost (In Millions)**
1. Upgrades to emergency department for behavioral health patients (MMH)	$1.1
2. Electronic medical record system replacement (MMH & RGH)	$20
3. Upgrades to nursing units (RGH)	$6.6
4. Upgrades to nursing units (MMH)	$11
5. Vessel sealing systems (MMH & RGH)	$0.6
6. MRI replacement (MMH)	$1.6
7. SPECT scanner replacement (MMH)	$0.4
Total Estimated Cost	**$41.3**

The projects will require PMH approval with input of the Local Board. *FF42* After the Asset Purchase, capital will be available to ECHN for replacements and upgrades to systems and the infrastructures of ECHN's facilities; investments to improve the sharing of electronic medical records in order to improve the collection and documentation of information and to enhance the availability of information for critical treatment decisions for patients; upgrades to medical equipment and technology to provide patients access to state-of-the-art technology for diagnosis, care and treatment; and program development to attract and retain physicians. *FF45*

PMH intends to fund its capital commitments through the operations of ECHN, PMH's existing cash at the time of expenditure or, if necessary, PMH's corporate level credit facility. *FF39* The Commitment Amount has not been specifically apportioned to each hospital or its affiliates. Allocations of the commitment will be made by PMH after it receives input from the Local Board and medical staff. *FF41*

With respect to the quality of services offered by PMH, during the course of negotiations between ECHN and PMH, it became known that PMH had to significantly modify its QAPI as a result of surveys of PMH's Southern California Hospitals as well as the survey of Los Angeles Community Hospital that resulted in the California Department of Health imposing Immediate Jeopardy citations. *FF31* As a result of these citations, PMH has hired a corporate level Chief Quality Officer, Chief Clinical Officer, Chief Nursing Officer and an Associate Vice President of Regulatory and Patient Safety to assist in providing necessary resources to implement all quality programs at its local hospitals and share best practices among hospitals. *FF35* ECHN concluded that the compliance issues were isolated and that PMH demonstrated a strong commitment to remediate the problems. Based on this information, the ECHN Board of Trustees confirmed its commitment to proceed with the transaction and the parties entered into a Quality Assurance Commitment Letter pursuant to which PMH agreed to maintain certain quality programs of ECHN for the first two years after the Closing Date and not modify them without approval of the Local Board. The Quality Assurance Commitment Letter also requires that PMH maintain QAPI programs consistent with best practices and those currently implemented in PMH's Rhode Island facilities while also acknowledging that the Local Board shall oversee quality programs at the New Hospitals. *FF32-33*

PMH aligns its hospitals and physician networks under a model called CRC. CRC provides for clinical integration of hospitals, physicians and community providers with health plans and other payers through value driven and risk-based reimbursement systems. The CRC model is intended to improve quality, efficiency and financial performance while providing its patients with quality, affordable healthcare. *FF15* ECHN believes that PMH's CRC model will help overcome the challenges in retaining and recruiting physicians that it has faced in recent years. PMH has developed significant experience in other markets regarding ways hospitals can attract more primary care providers and improve access to care. Recently, PMH succeeded in establishing an IPA in Rhode Island with 105 primary care practitioners and 270 specialist physicians. Of the 105 primary care practitioners participating in PMH's Rhode Island physician network at the end of 2015, only 18 were employed by the CharterCare System when PMH acquired its two hospitals in mid-2014. *FF48* In order to implement the CRC strategy, PMH has established an IPA entity in Connecticut, PPGCTE, and a preferred provider network/health system risk taking entity, Prospect Health Services, CT, Inc., that will contract with payers on behalf of PPGCTE physicians. These two organizations, through management services agreements with PMH, will manage physician participation, risk contracting and care management activities for participating members. *FF49* The goal of the CRC model is to reduce the overall cost of health care by increasing preventive care and early readmissions, reducing inpatient utilization and reducing emergency room visits. PMH will achieve these goals by developing a healthcare delivery network encompassing the entire continuum of patient care, including inpatient services, home health, clinics, independent

physicians, nursing homes, ambulatory surgical centers, out-patient diagnostic services and other health related services. *FF50* PMH has demonstrated the efficacy of the CRC model in Southern California, Texas and Rhode Island. In these regions, PMH has improved clinical outcomes, increased quality scores, increased patient satisfaction, reduced readmission rates, reduced average lengths of stay, and reduced medical-cost ratios. For example, from 2012 to 2014 in California and Texas where PMH participates in HMO contracts for seniors, PMH reduced hospital bed days per thousand patients from 1,260 to 720. Additionally, length of hospital stay for this population has been reduced from 5.1 to 3.9 days, admissions per thousand have dropped from 245 per thousand to 182 per thousand and hospital readmissions within thirty days has dropped from 19% to 13%. The CRC model has also enabled PMH to attract more primary care providers and has improved access to care. *FF51* The CRC approach not only benefits the patient population through better care and outcomes, but also from a cost perspective. PMH expects its approach to population management services to harness the efficiencies of facilities to enhance care at lower costs. It is anticipated that these cost savings will be passed on to consumers. Consequently, the Applicants have demonstrated that PMH will continue to offer access to high quality services in the same manner that ECHN has been providing them.

In 2013, MMH and RGH collaborated to conduct a CHNA, which identified the current and future health care needs of the community. The four priority health needs identified were heart disease incidence, cancer incidence, diabetes incidence, and arthritis incidence. An implementation plan was developed to respond to the identified health needs. *FF56* PMH and its affiliates will support the priority needs identified by the CHNA with physician alignment and population health management strategies, enhanced through implementation of the CRC, which focuses on the health of vulnerable populations. PMH has committed to implement and support the current CHNA through 2016 and to conduct another CHNA for the Service Area over the next two years and implement the recommendations of such study as deemed necessary and appropriate. *FF57* PMH and ECHN representatives met with leadership for Connecticut's Medicaid Program at DSS and expressed their desire to work under a risk-based arrangement to provide care to Medicaid recipients. PMH is currently working with officials in Rhode Island to pilot a Medicaid risk-based program in that state. In addition, PMH will actively work with other providers in the community such as federally qualified health centers or community health centers to meet the needs of uninsured and underinsured individuals in the Service Area, including Medicaid recipients. *FF59* The patient populations currently served by the Hospitals is not expected to change as a result of the Asset Purchase. PMH will accept all existing contracts with payers and will complete a Change of Ownership process with commercial payers, as well as Medicare and the Connecticut Medical Assistance Program (Medicaid). *FF60* Based upon the aforementioned, the Applicants have satisfactorily identified a clear public need for the proposed Asset Purchase and demonstrated how the proposed Asset Purchase could satisfy the need.

PMH's acquisitions of other health systems and hospitals have resulted in improved financial performance at many of the systems. PMH will bring to ECHN its operational efficiencies and economies of scale that will help to reduce ECHN's expenses. ECHN will be able to participate in PMH's purchasing power, supply chain benefits, employee benefits savings and streamlined revenue collection. PMH also makes available to its hospitals subject matter consultants who are employed by PMH, saving its hospitals the cost of hiring consultants in those areas. *FF62* This proposal will lead to a stronger and more financially secure ECHN. As the financial strength of Connecticut's hospitals significantly contributes to the financial strength of the state's entire health care system, this proposal will improve the financial strength of the state of Connecticut's health care system.

In its audited financial statements for FY 2015, PMH reported total revenues of over $1.3 billion from its operations on a consolidated basis. As of fiscal year end 2015, PMH reported free cash flow of over $112 million. The company also received credit upgrades by both Moody's and S&P in 2015 with Moody's rating PMH's bonds as B1, while S&P rates PMH's bonds as B. *FF18* PMH's financial resources and access to capital are anticipated to maintain ECHN's assets as economically viable and vibrant parts of the healthcare system in Eastern Connecticut by permitting capital investments, better preparing MMH and RGH to participate in new value-based delivery models, offering enhanced practice options for physicians, strengthening its network of providers and allowing for other improvements in operations.

Based upon the aforementioned discussion of the evidence provided by the Applicants in this matter, the Applicants have satisfactorily demonstrated that PMH has made a commitment to provide health care to the uninsured and the underinsured; safeguard procedures are in place to avoid a conflict of interest in patient referral; and certificate of need authorization is justified in accordance with the principles and guidelines set forth in Connecticut General Statutes § 19a-639; those being, access to healthcare services, quality of the healthcare services, public need for the proposed project, and the financial feasibility of the proposed project.

Order

Based upon the foregoing Findings of Fact and Discussion, the Applicants' request for the sale of substantially all of the assets of ECHN and its controlled affiliates to PMH or one or more affiliates of PMH is hereby **Approved** under Conn. Gen. Stat. §§ 19a-486 and 19a-639 subject to the enumerated conditions (the "Conditions") set forth below

Unless expressly provided otherwise, all Conditions of this Order shall, to the extent applicable, be binding on the Applicants, their affiliates, successors and assigns, regardless of whether New ECHN remains the parent company and sole shareholder of the New MMH and New RGH. OHCA and any successor agency shall have the right to enforce the Conditions by all means and remedies available to it under law and equity, including, but not limited to, Conn. Gen. Stat. § 19a-486g and the right to impose and collect a civil penalty under Conn. Gen. Stat. § 19a-653 against any person or health care facility or institution that fails to file required data or information within the prescribed time periods set forth in this Order. All references to days in these Conditions shall mean calendar days.

1. Within twenty (20) days following the Closing Date of the Asset Purchase authorized by this Order, Applicants shall submit schedules to OHCA setting forth each of MMH's and RGH's inpatient bed allocation and the location and hours of operation for all outpatient services, by department, as of the Decision Date and publish this same information on the applicable websites of each Hospital. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(8) & (11); FF 18, 26- 27*

2. Within twenty (20) days following the Closing Date of the Asset Purchase authorized by this Order, Applicants shall identify and provide the Certificates of Incorporation for the PMH affiliated entities that shall directly own, operate and hold the hospital licenses of the New MMH and New RGH, respectively, post-closing. These entities shall be duly organized and validly existing under the laws of Connecticut and New ECHN shall be their parent company and sole shareholder as proposed in the CON application. OHCA is imposing this Condition to verify that safeguard procedures are in place to avoid a conflict of interest in patient referral. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(8) & (11); FF 18, 26- 27*

3. Applicants shall notify OHCA in writing of the Closing Date of the Asset Purchase authorized by this Order within twenty (20) days of such closing and shall supply final execution copies of all agreements related to same, including but not limited to:

    a. the APA, including any and all schedules and exhibits; and

    b. Bylaws or similar governance documents for New ECHN, as well as for New MMH and New RGH.

    The Applicants may redact from the APA any information that is exempt from disclosure under Conn. Gen. Stat. § 1-210. If the Applicants redact materials in accordance with the

previous sentence, the Applicants shall provide a list to OHCA, which identifies in general terms the nature of the redacted material and why it is claimed to be exempt for public record purposes.

OHCA is imposing this Condition to verify that safeguard procedures are in place to avoid a conflict of interest in patient referral. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a) & 19a-613(b); FF 12*

4. Within one hundred and eighty (180) days following the Closing Date, PMH shall submit a plan (the "Health Needs Plan") for continuing to support and implement ECHN's 2016 CHNA and for conducting the New Hospitals' next comprehensive study of community health needs in the Service Area (the "Community Health Needs Study" or "Study"). The Health Needs Plan shall describe in detail at least the following:

   (i) the data that will be collected and analyzed to systematically assess health status indicators of the Service Area;
   (ii) the identity of key community stakeholders and health organizations, unaffiliated with PMH, including without limitation, representatives of medically underserved populations, that will be enlisted to participate in the Study and the manner and extent of such participation by stakeholders in both the development of health priorities and planned implementation;
   (iii) the qualifications of consultants experienced in performing community health needs assessments who will be retained by PMH to ensure that the priority health needs of the community are accurately determined;
   (iv) the frequency with which the Study will be repeated;
   (v) the manner in which results of the Study and the implementation strategy to address the priority health needs identified therein (the "Implementation Strategy") will be distributed to the community; and
   (vi) the manner in which the Study will complement the population health management objectives of PMH and the New Hospitals.

   OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(3) & (7); FF 56-57*

5. Within three (3) years following the Closing Date, PMH shall participate with New ECHN and the New Hospitals, and the key community stakeholders and health organizations identified pursuant to Condition 4, in conducting a Community Health Needs Study and shall provide a copy of such Study and its Implementation Strategy to OHCA within thirty (30) days of completion. PMH and the participants shall utilize Healthy Connecticut State Health Improvement Plan data and priorities as the starting point for the Study (available at http://www.ct.gov/dph/lib/dph/state_health_planning/ship/hct2020/hct2020_state_hlth_impv_032514.pdf), as well as any applicable community

health improvement plan issued by any local health department in the Service Area.[1] The Implementation Strategy shall also adopt the evidence-based interventions identified in the Centers for Disease Control 6/18 initiative (available at http://www.cdc.gov/sixeighteen) to the extent the health priorities identified in the Study correlate to the health conditions identified by the CDC and provide information on how any patient outcomes related to the Implementation Strategy will be measured and reported to the community. PMH shall publish the Community Health Needs Study and the Implementation Strategy on the website pages of New MMH and New RGH. Until such time as the Community Health Needs Study and Implementation Strategy are submitted to OHCA, PMH shall continue to support and implement ECHN's current CHNA for MMH and RGH. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a) 19a-613(b), 19a-639(a)(3) & (7); FF 56-57*

6. Within one hundred and eighty (180) days following the Closing Date, PMH shall submit a plan demonstrating how health care services will be provided by the New Hospitals for the first three years following the Asset Purchase, including any consolidation, reduction, or elimination of existing services or introduction of new services (the "Services Plan"). The Services Plan will be provided in a format mutually agreed upon by OHCA and the Applicants. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Stat. §§ 19a-486(a), 19a-613(b), 19a-639(a)(5),(6) (7),(8),(9),(11) & (12); FF 18, 26-27*

7. Until such time as the Services Plan is submitted, PMH shall provide OHCA with notice of any reallocation of inpatient beds and relocation of outpatient services for the New MMH or New RGH specific to those services that existed at each of the Hospitals as of the Decision Date. Such notice shall be provided within ten (10) days of any such reallocation or relocation and published on the website pages of the New Hospitals. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486(a), 19a-613(b), 19a-639(a)(5),(6) (7),(8),(9),(11) & (12); FF 18, 26-27*

8. Within one hundred and eighty (180) days following the Closing Date and thereafter on the same semi-annual schedule as set forth in Conditions 9 and 10 below until the capital commitment is satisfied, PMH shall submit to OHCA a report on the capital investments ("Capital Investment Report") it has made in the New MMH, New RGH and their affiliates from the $75 million Commitment Amount. The Capital Investment Report shall include the following in a format to be agreed upon:

    a. A list of the capital expenditures that have been made in the prior one hundred and eighty (180) days with descriptions of each associated project; and

[1] Other tools and resources which the Applicants are encouraged to consider include County Health Rankings and CDC Community Health Improvement Navigator in order to assist with the Study process in terms of an understanding of social, behavioral, and environmental conditions that affect health, identifying priorities, and the use of evidence-based interventions.

b. An explanation of why each expenditure was made and a timeframe for the roll out of the associated capital project (including estimated beginning, ending and startup/operation dates); and

c. The dates and amounts of withdrawals from each of the New Hospitals' operating account and/or any other sources of funding used to fulfill the Capital Commitment.

The reports shall be signed by PMH ECHN's Chief Financial Officer. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(3),(4) & (5); FF 38-45*

9. For three (3) years following the Closing Date, PMH shall file the following information with OHCA on a semi-annual basis for New ECHN, New MMH and New RGH, respectively:

a. The cost saving totals achieved in the following Operating Expense Categories for New ECHN, New MMH and New RGH: Salaries and Wages, Fringe Benefits, Contractual Labor Fees, Medical Supplies and Pharmaceutical Costs, Depreciation and Amortization, Interest Expense, Malpractice Expense, Utilities, Business Expenses and Other Operating Expenses. The categories shall be consistent with the major operating expense categories (Categories A, B, C, D, E, G, H, I, J, and K) which are in use at the time of reporting in the OHCA Hospital Reporting System ("HRS") Report 175 or successor report. The semi-annual submission shall also contain narratives describing:

1. the major cost savings achieved for each expense category for the semi-annual period; and

2. the effect of these cost savings on the clinical quality of care.

b. A consolidated Balance Sheet, Statement of Operations, and Statement of Cash Flows for New ECHN, New MMH and New RGH. The format shall be consistent with that which is in use at the time of reporting in OHCA's HRS Reports 100/150, 300/350 or successor reports.

For purposes of this Order, semi-annual periods are October 1-March 31 and April 1 – September 30. The required information is due no later than two (2) months after the end of each semi-annual period. Due dates are May 31st and November 30th, beginning November 30, 2016. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(4) & (5); FF 51, 60-63*

10. For three (3) years following the Closing Date, PMH shall submit to OHCA a financial measurement report. This report shall be submitted on a semi-annual basis and show current month and year-to-date data and comparable prior year period data for New ECHN, New MMH and New RGH, respectively. The required information is due no later than two (2)

months after the end of each semi-annual period. Due dates are May 31st and November 30th, beginning November 30, 2016. The following financial measurements/indicators should be addressed in the report:

Financial Measurement/Indicators

A. Operating Performance
1. Operating Margin
2. Non-Operating Margin
3. Total Margin
B. Liquidity
1. Current Ratio
2. Days Cash on Hand
3. Days in Net Accounts Receivables
4. Average Payment Period
C. Leverage and Capital Structure
1. Long-term Debt to Equity
2. Long-term Debt to Capitalization
3. Unrestricted Cash to Debt
4. Times Interest Earned Ratio
5. Debt Service Coverage Ratio
6. Equity Financing Ratio
D. Additional Statistics
1. Income from Operations
2. Revenue Over/(Under) Expense
3. Cash from Operations
4. Cash and Cash Equivalents
5. Net Working Capital
6. Free Cash Flow (and the elements used in the calculation)
7. Unrestricted Assets/Retained Earnings
8. Bad Debt as % of Gross Revenue
9. Credit Ratings (S&P, FITCH or Moody's)

CONFIDENTIAL BUSINESS INFORMATION

OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(4) & (5); FF 51, 60-63*

11. PMH shall ensure that New MMH and New RGH maintain and adhere to ECHN's current policies regarding charity care, indigent care and community volunteer services after the Closing Date, or adopt other policies that are at least as generous and benevolent to the community as ECHN's current policies, consistent with state and federal law. These policies shall be posted on the website pages of the New MMH and New RGH, respectively, and as additionally required by applicable law. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 52-55, 59*

12. For three (3) years following the Closing Date, PMH shall provide written notice to OHCA of any modification, amendment or revision to the charity care, indigent care and community volunteer services of New MMH and New RGH within thirty (30) days of such change. The notice of these changes shall be accompanied by copies of any revised policies and the notice and revised policies shall be posted on the website pages of the New Hospitals simultaneously with their submission to OHCA. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 52-55, 59*

13. PMH shall maintain community benefit programs and community building activities for New MMH and New RGH for three (3) years after the Closing Date consistent with the MMH and RGH most recent Schedule H of IRS Form 990 or shall provide such other community benefit programs and community building activities that are at least as generous and benevolent to the community as ECHN's current programs, and PMH shall apply a 1% increase per year for the next three (3) years toward community building activities in terms of dollars spent.

    In determining the New MMH and New RGH participation and investment in both community benefits and community building activities, PMH shall address the health needs identified by the applicable CHNA or Study in effect at the time and the population health management objectives, including social determinants of health, contained in the related Implementation Strategy.

    a. On an annual basis, the Applicants shall identify the amounts and uses related to community benefits and community building and shall discuss how such investments and support are being applied toward the health needs identified in the CHNA or Study and population health management objectives. Such reporting shall be filed within thirty days of the anniversary date of the closing for three years and shall be posted on the applicable Hospital website. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 52-55, 59*

14. New MMH and New RGH agree to comply with the following general community benefit standards for at least the first three years: (a) the New Hospitals shall provide public health programs to the community and generally promote the welfare of the community; (b) the New

Hospitals shall have open medical staffs and not restrict the use of facilities to a particular group of physicians and surgeons to the exclusion of other qualified doctors; (c) the New Hospitals shall participate in the Medicare and Medicaid programs; and (d) the New Hospitals shall operate 24/7 emergency departments and provide emergency services to patients regardless of their ability to pay. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); Tr., Testimony of* Redacted*, President. PMH East on 5/3/16, pp. 103-04*

15. New MMH and New RGH shall work toward making culturally and linguistically appropriate services available and integrated throughout their hospital operations. Specifically, New MMH and New RGH shall take reasonable steps to provide meaningful access to each individual with limited English proficiency eligible to be served or likely to be encountered in its health programs and activities, in accordance with the implementing regulations of Section 1557 of the Patient Protection and Affordable Care Act. Additionally, New MMH and New RGH shall provide appropriate insurance navigator services for patients and, where appropriate, English as a second language and cultural competency training for employees. In complying with this Condition, New MMH and New RGH shall be guided by the National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care published by the U.S. Department of Health and Human Services' Office of Minority Health. For three (3) years following the Closing Date, PMH shall submit a written report on its activities directed at meeting this Condition. Such reporting shall be filed within thirty days of the anniversary date of the closing for three years and shall be posted on the applicable Hospital website. OHCA is imposing this Condition so as to ensure continued access to health care services for the patient population. *Legal and Factual Basis: 45 C.F.R. §92.201; Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 52-55, 59*

16. Within sixty (60) days after the Closing Date, the Applicants shall contract with an Independent Monitor who has experience in hospital administration and regulation, including maintaining quality control in an HRO. The Independent Monitor shall be retained at the sole expense of PMH, at a cost which shall not exceed $300,000 in the aggregate. Representatives of OHCA and the Facility Licensing and Investigations ("FLIS") section of the Department of Public Health ("DPH") will approve the Independent Monitor's appointment. The Independent Monitor shall be engaged for a minimum period of two (2) years following the Closing Date, which may be extended for another year at OHCA's and/or FLIS's discretion. The Independent Monitor will be responsible for monitoring the Applicants' compliance with the Conditions set forth in this Order. PMH shall provide the Independent Monitor with appropriate access to New Hospitals and their applicable records in order to enable the Independent Monitor to fulfill its functions hereunder. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify and monitor compliance with the Conditions set forth herein. *Legal and Factual Basis: Conn. Gen. §§ Stat. 19a-486(a), 19a-613(b), 19a-639(a)(1),(2),(4),(5),(6),(7),(11) & (12); FF 26-27, 30-45, 52-57, 59*

17. The Independent Monitor will report to both OHCA and FLIS. The Independent Monitor shall conduct on-site visits of New Hospitals on no less than a semi-annual basis to assess PMH's modified QAPI program, each facility's efforts to remain an HRO, and compliance with the Quality Assurance Commitment Letter. The Independent Monitor shall furnish a written

report of his or her assessment to OHCA and FLIS within thirty (30) days of the completion of each on-site review. PMH will have the opportunity to review and provide written responses to the report. As OHCA deems necessary, the Independent Monitor shall meet with OHCA and FLIS personnel to discuss the written report and will perform additional periodic reviews and reviews of other PMH affiliated sites of service. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify and monitor compliance with the Conditions set forth herein. *Legal and Factual Basis: Conn. Gen. §§ Stat. 19a-486(a), 19a-613(b), 19a-639(a)(1),(2),(4),(5),(6),(7),(11) & (12); FF 26-27, 30-45, 52-57, 59*

18. If, at any time within three (3) years following the Closing Date, the New Hospitals' Local Board agrees with PMH to change any of the Seller Quality Programs described in the Quality Assurance Commitment Letter other than to make any changes necessary to address (i) an immediate issue of patient safety; (ii) changes in federal, state, and local laws; or (iii) as mandated or recommended in guidance by a governmental agency, PMH shall notify OHCA and the Health Systems Branch in writing within thirty (30) days of any such change going into effect. If the Independent Monitor disagrees with the change, OHCA may require that a request for modification be submitted and approved as required by C.G.S. §4-181a to make the change. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify and monitor compliance with the Conditions set forth herein. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-613(b), 19a-639(a)(1),(2),(5) & (6); FF 30-37*

19. For three (3) years following the Closing Date, PMH shall hold a joint meeting of the Board of Directors of each of New MMH and New RGH and the Local Board of New MMH and New RGH ("Joint Board Meetings") at least twice annually with one occurring in Manchester and the other occurring in Vernon. Such Joint Board Meetings shall be followed by a meeting to which the public is invited in advance and at which the public is informed of the New Hospitals' activities and afforded an opportunity to ask questions and make comments. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-613(b), 19a-639(a)(2),(3),(5),(7),(8),(11) & (12); FF 28-30*

20. For three (3) years following the Closing Date, PMH shall allow for two (2) community representatives to serve as voting members of the New MMH and New RGH Local Board with rights and obligations consistent with other voting members under the Local Board Bylaws. The community representatives shall be selected in consultation with the Mayors of Manchester and Vernon in order to ensure the appointment of two unbiased persons who will fairly represent the interests of the communities served by MMH and RGH, respectively. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-613(b), 19a-639(a)(2),(3),(5),(7),(8),(11) & (12); FF 28-30*

21. PMH, New ECHN, New MMH and New RGH shall abide by all requirements of licensure that may be imposed by DPH's Health Systems Branch ("HSB") in any Pre-Licensing Consent Order or similar agreement that HSB may enter into with these parties. OHCA is imposing this Condition to ensure that quality health care services are provided to the patient

population. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-490, 19a-493, 19a-639(a)(1),(2),(5) & (6); FF 30-37*

All of the foregoing constitutes the final order of the Office of Health Care Access in this matter.

Final Decision

Applicants: Greater Waterbury Health Network, Inc.
[redacted]
Waterbury, CT 06708

Prospect Medical Holdings, Inc.
[redacted]
Los Angeles, CA 90025

Docket Number: 15-32017-486

Project Title: Transfer of assets of Greater Waterbury Health Network, Inc. to Prospect Medical Holdings, Inc.

Procedural History: On July 16, 2015, the Applicants filed with the Office of Health Care Access ("OHCA") and the Office of the Attorney General ("OAG") the Certificate of Need ("CON") Determination Letter proposing the transfer of assets of Greater Waterbury Health Network, Inc. and affiliates ("GWHN") to Prospect Medical Holdings, Inc. ("PMH"). The Applicants filed the application for the proposal on October 28, 2015. On March 4, 2016, OHCA and the OAG deemed the application complete.

On April 8, 2016, OHCA and the OAG notified the Applicants of the date, time and place of the public hearing. A notice to the public announcing the hearing was published in the *Republican American*. Thereafter, pursuant to Conn. Gen. Stat. §19a-639a and §19a-486, a public hearing regarding this application was held on May 3, 2016, jointly by OHCA and the OAG.

Phone: (860) 418-7001 • Fax: (860) 418-7053

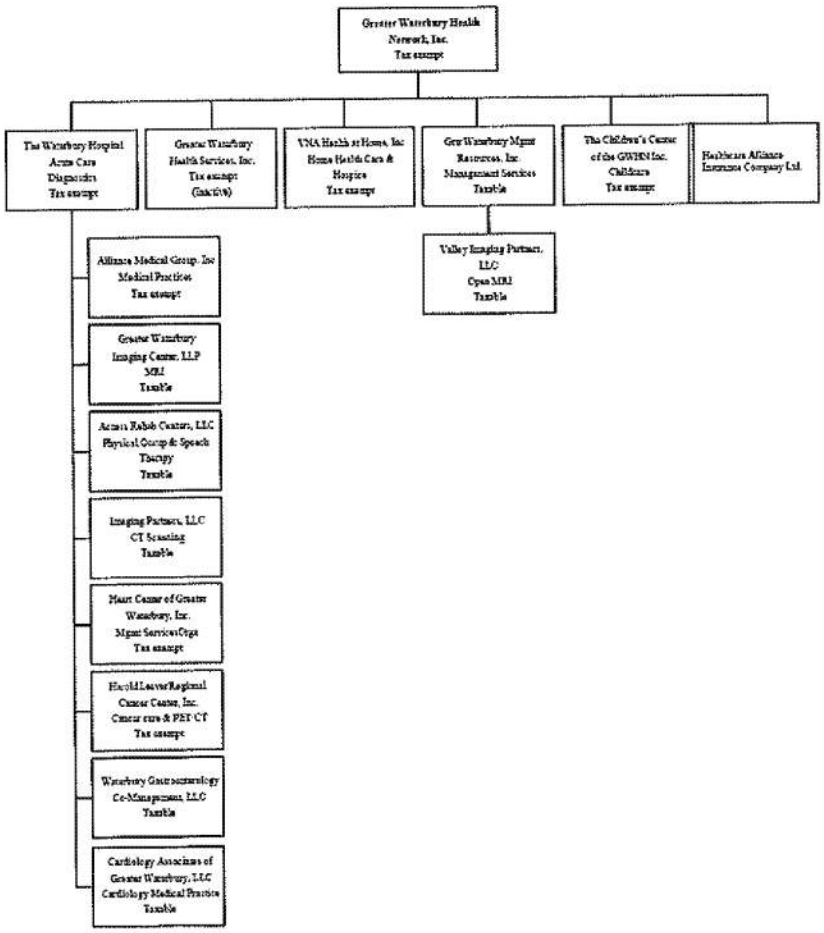
Attorney [redacted] was designated as the hearing officer in this matter. The hearing was conducted in accordance with the provisions of the Uniform Administrative Procedures Act (Chapter 54 of the Conn. Gen. Stat.) and Conn. Gen. Stat. §19a-639a(f). The public hearing record was closed on July 11, 2016. Deputy Commissioner Brancifort reviewed the entire record in this matter, including the public comments received by OHCA after the issuance of the Proposed Final Decision.

To the extent the findings of fact actually represent conclusions of law, they should be so considered, and vice versa. *SAS Inst., Inc. v. S & H Computer Systems, Inc.*, 605 F. Supp. 816 (Md. Tenn. 1985).

Findings of Fact

1. GWHN is a non-stock, 501(c)(3) corporation that is the parent company to The Waterbury Hospital ("Hospital"), an acute care teaching hospital with 357 licensed beds plus 36 bassinets located in Waterbury, Connecticut. GWHN also holds interests in other entities, joint ventures, and affiliates. The chart below describes GWHN's current organizational structure:



Ex. E, p. 13

2. In addition to the Hospital, which is wholly owned by GWHN, GWHN is also an equity holder in the following entities: Healthcare Alliance Insurance Company, Ltd. ("HAIC," of which GWHN is a 50% owner), Greater Waterbury Health Services, Inc. ("GWHS," which is wholly-owned by GWHN), VNA Health at Home, Inc. (wholly-owned by GWHN), Greater Waterbury Management Resources, Inc. (wholly-owned by GWHN;

this company also has a 49% ownership in Valley Imaging, LLC), and Children's Center of Greater Waterbury Health Network, Inc. ("CCGWHN," which is wholly-owned by GWHN). Ex. E, pp. 15-16

3. The Hospital has ownership interests in the following entities: Alliance Medical Group, Inc. (wholly-owned by the Hospital), Greater Waterbury Imaging Center Limited Partnership (64% owned by the Hospital), Access Rehab Centers LLC (65% owned by the Hospital), Imaging Partners, LLC (85% owned by the Hospital), Waterbury Gastroenterological Co-Management Company, LLC (the Hospital is the sole Class H Member and has certain management rights), and Cardiology Associates of Greater Waterbury, LLC (wholly-owned by the Hospital). Ex. E, pp. 15-17

4. Additionally, the Hospital is a corporate member of two not-for-profit joint ventures with Saint Mary's Hospital ("SMH"): the Harold Leever Regional Cancer Center, Inc. and the Heart Center of Greater Waterbury, Inc. Ex. E, p. 17

5. The Hospital is GWHN's primary asset. It is a "safety net" hospital, treating a large number of Medicare, Medicaid and uninsured patients. Discharges for these three payers represent approximately 80% of the total patient days and 75.6% of emergency room outpatient visits. Ex. E, pp. 13, 15-16

6. The Hospital serves the following towns: Beacon Falls, Bethlehem, Cheshire, Middlebury, Morris, Naugatuck, Oakville, Oxford, Plantsville, Plymouth, Prospect, Seymour, Southbury, Southington, Terryville, Thomaston, Torrington, Waterbury, Watertown, Wolcott, and Woodbury (the "Service Area"). Ex. E, p. 51

7. The Hospital has experienced consecutive years of losses due to poor economic conditions in the Service Area, declining government and commercial reimbursement, the increasing complexity of health care treatment, and national health care reform. Additionally the recession in 2008 led to GWHN defaulting on its bond covenants in 2009. In 2010, a consulting firm, Kaufman Hall, identified over $50 million in capital improvements required over five years to keep the Hospital operational. Ex. E, pp. 22-24, 333-434; Ex. R, Prefiled Testimony of Redacted Chairman of the Board, GWHN, p. 1509

8. In 2010, the Executive Committee of the GWHN Board of Directors (the "Board") recommended that the Hospital seek a capital partner and a task force was formed (the "Task Force"). Ex. E, p. 24

9. In 2011, the GWHN Board voted to authorize the negotiation of an agreement with LHP Hospital Group ("LHP") and SMH, but LHP ultimately terminated the proposed venture, citing the costs of building a replacement hospital and issues related to the Ethical and Religious Directives for Catholic Health Care Services. Ex. E, pp. 24-25

10. On September 4, 2012, the Board authorized the Task Force to pursue other opportunities, ultimately leading to the submission of proposals by Vanguard Health Systems, Inc. ("Vanguard") and PMH. PMH proposed an asset purchase transaction, while Vanguard proposed both an asset purchase transaction and a joint venture arrangement. Preferring a joint venture, GWHN pursued a relationship with Vanguard, and a Conversion Application and a CON Application were submitted. The OAG and OHCA issued decisions placing a number of conditions on the transaction, and Tenet Health Corporation (which had acquired Vanguard) withdrew the application. Ex. E, pp. 25-26, 29-30, 88-119

11. In early 2015, the Task Force requested that Cain Brothers, an investment advisory firm, look for new prospective partners. PMH was one of two candidates to indicate interest and, despite GWHN's declining financial performance, agreed to a deal similar to the proposed Tenet transaction. The Task Force approved PMH's proposed letter of intent and the Board authorized its execution, which occurred on May 1, 2015. After conducting due diligence, the Board adopted resolutions approving the transaction and the filing of the CON, as well as recommending to the various members of GWHN that they approve the transaction. On October 2, 2015, the GWHN members approved the transaction and authorized the Board to take all action to consummate the transaction. Ex. E, pp. 31-33, 88-119

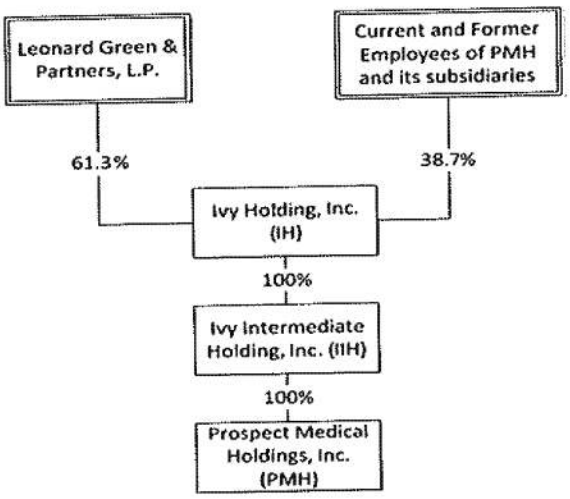
12. The Applicants are requesting approval of the proposed asset purchase (the "Asset Purchase") as a solution to GWHN's long-standing challenges that offers the Service Area continued access to its services and facilities. Ex. R, Prefiled Testimony of Redacted p. 1510

13. PMH is a for-profit, privately owned national healthcare services company with its principal place of business in Los Angeles, California. PMH owns fourteen acute care and behavioral hospitals in California, New Jersey, Rhode Island and Texas. It also owns a network of specialty and primary care clinics in each of these regions. Ex. E, pp. 18, 171-72

14. Through PMH's medical group segment, PMH also manages the provision of physician services in each of its markets through a network of approximately 8,900 physicians. The physician networks operate as independent practice associations ("IPAs") that contract with PMH-owned management service organizations ("MSOs"). The IPAs are comprised of both PMH-employed and independent community physicians. Ex. E, p. 18; Ex. R, Prefiled Testimony of Redacted President, PMH, pp. 1605, 1607-08; Testimony of Redacted Redacted on 5/3/2016, pp. 37-38

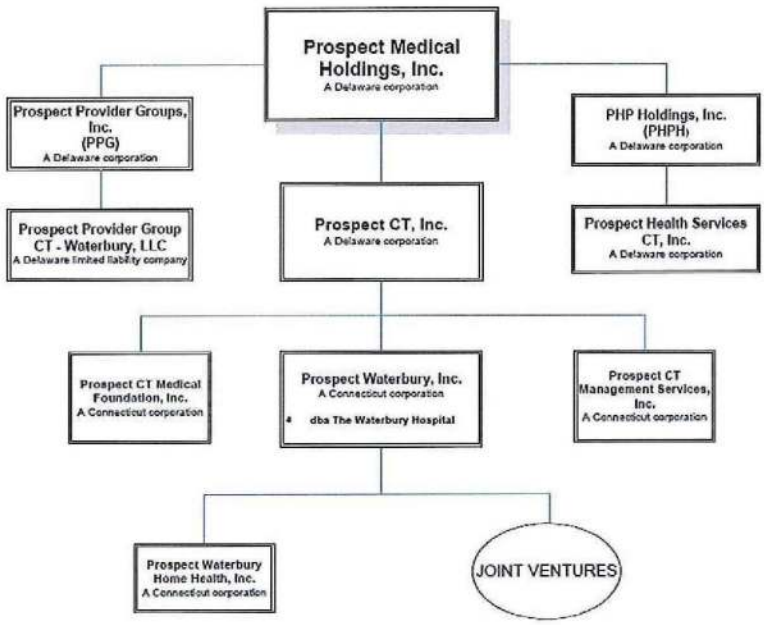
15. PMH aligns its hospitals and physicians under a model called Coordinated Regional Care ("CRC"). CRC provides for clinical integration of hospitals, physicians and community providers with health plans and other payers through value driven and risk-based reimbursement systems. PMH believes that the CRC model improves quality, efficiency and financial performance while providing its patients with quality, affordable healthcare. Ex. E, pp. 89

16. The chart below shows PMH's current ownership structure:



Ex. H, p. 1413

17. The chart below shows PMH's proposed organizational structure below the holding company level after the proposed transaction:



Ex. E, p. 68

18. GWHN selected PMH as the proposed purchaser because its financial resources and access to capital are anticipated to maintain GWHN's assets as economically viable and vibrant parts of the healthcare system in the Service Area by permitting capital investments, better preparing the Hospital to participate in new value-based delivery models, offering enhanced practice options for physicians, strengthening its network of providers and allowing for other improvements in operations. Ex. R, Prefiled Testimony of Redacted, p. 1606; of Ex. R, Prefiled Testimony of Redacted, President & CEO, GWHN, pp. 1516-20; Ex. R, Prefiled Testimony of Von Crockett, Senior Vice President of Corporate Development, PMH, pp. 1537-39

19. In its audited financial statements for FY 2015, PMH reported total revenues of over $1.3 billion from its operations on a consolidated basis. As of fiscal year end 2015, PMH reported free cash flow of over $112 million and close to $75 million in cash from operations. The company also received credit upgrades by both Moody's and S&P in 2015, with Moody's rating PMH's bonds as B1 and S&P rating PMH's bonds as B. These ratings still stand as of May 3, 2016. Ex. R, Prefiled Testimony of Steven Aleman, Chief Financial Officer, PMH, p. 1620; Testimony of Steven Aleman, Tr. on 5/3/2016, p. 113; Docket#15-32016-486, Ex. N, pp. 3245, 3249-59; Ex. K, pp. 1445-46

20. Under the proposed Asset Purchase Agreement ("APA"), PMH will pay a total purchase price of approximately $43.3 million for the assets of GWHN, which includes a purchase price of $31.8 million plus a net working capital adjustment of $18.3 million, as of April 30, 2016, minus capital lease obligations in excess of $6.5 million, unfunded pension liabilities, asbestos abatement liability, the amounts of certain GWHN liabilities assumed by PMH, and for the value of any joint venture interest that GWHN is unable to assign or transfer. Ex. E, pp. 12, 20, 71, 147; Ex. F, p.1419; Late File 3, pp. 1848-49

21. PMH will commit to spend within seven years no less than $55 million, less (a) the amount not to exceed $3.5 million of capital lease obligations assumed by PMH at Closing in excess of $3 million, (b) the cash shortfall at closing (defined in the APA as the "Negative Amount"), (c) the Purchase Price Adjustment Shortfall, provided that the aggregate of the amounts in (b) and (c) are not to exceed $5.0 million in aggregate, and (d) unpaid indemnification losses of PMH (defined in the APA as the "Unpaid Losses") of up to $4.5 million, (the "Commitment Amount"). (Revised APA draft dated June 10, 2016, pages 1861and 1977).

22. There is no financing contingency with respect to this transaction. PMH anticipates funding this acquisition using its existing cash. PMH also has access to a preapproved $40 million revolving line of credit with Morgan Stanley and, as shown below, PMH has provided data showing that its debt leverage ratio is lower than other for-profit hospital systems.

Industry Debt Leverage Ratio Comparison	
Entity	**Ratio**
Prospect	2.71X
Hospital Corporation of America	3.7X
Community Health Systems	5.4X
Tenet	6.3X

Ex. R, Prefiled Testimony of Steven Aleman, p. 1621; Ex. E, p. 69, Ex, K, p.1445; Docket#15-32016-486, Ex. K, p. 2191

23. Closing the transaction is estimated to require only $27 million in cash from PMH. By the closing date (the "Closing" or "Closing Date"), PMH anticipates it will have close to $100 million in cash on hand as a result of its growth in revenues, which are generating $10-15 million of free cash flow on a monthly basis. The $40 million revolving line of credit, which PMH recently drew down to $10 million to finance its purchase of East Orange General Hospital in New Jersey, is also expected to be restored to $30 million by the Closing. Ex. F, p. 1419; Late File 3, p. 1849; Testimony of Steven Aleman, Tr. on 3/29/16, pp. 151-53

24. The following GWHN assets will be excluded from the transaction:

- All cash and cash equivalents;
- All short-term and long-term investments other than GWHN's investments in the joint ventures;
- Board-designated, restricted, and trustee-held or escrowed funds (such as funded depreciation, debt service reserves, working capital trust assets, and assets and investments restricted as to use), beneficial interests in charitable trusts, and accrued earnings on all of the foregoing;
- Prepaid expenses not assumed by PMH;
- All insurance proceeds arising in connection with the operation of the assets or the facilities for periods prior to Closing to the extent that all damage to the assets has been repaired;
- All amounts due or to become due to GWHN from the Medicare, Medicaid or other payor programs in respect of cost report periods ended on or prior to Closing; and
- Interests in and assets of GWHS, CCGWHN and HAIC.

Ex. E, pp. 19, 142

25. GWHN's debt and pension obligations will also be addressed as a result of the transaction. At the time of the Closing and as permitted thereafter, the purchase price (less adjustments) together with GWHN's cash, investments and debt service reserve funds (but excluding charitable funds) will be used to satisfy GWHN's obligations. GWHN's unfunded pension liabilities with respect to its multi-employer defined benefit health plan are estimated to be at least $27 million and, with respect to its cash balance plan, are approximately $12 million. Ex. F, pp. 76, 1419; Prefiled Testimony, Steven Aleman, p. 1620

26. Table 1 summarizes the net proceeds and flow of funds associated with the Asset Purchase as of April 30, 2016 compared to September 30, 2015, including GWHN's anticipated plan for payment of debt and pension obligations as well as payment of other liabilities. The amounts are subject to adjustment at Closing.

TABLE 1
APA PROJECTED NET PROCEEDS AND FLOW OF FUNDS

Proceeds Calculation	As of 9/30/2015	As of 4/30/2016*
Proceeds		
Enterprise Value	$31,800,000	$25,000,000
Working Capital Adjustment	$4,601,512	$18,258,911
Total Gross Proceeds	**$36,401,512**	**$43,258,911**

PM Assumed Liabilities		
Asbestos Abatement	($2,896,529)	($2,898,529)
Nurses Pension	($27,000,000)	($27,000,000)
Hospital Cash Balance Plan	($11,613,917)	($12,363,507)
Total Assumed Liabilities	**($41,512,446)**	**($42,262,036)**
Net Proceeds	**($5,110,934)**	**($996,875)**
Unrestricted Cash	$35,767,106	$35,174,646
Total Unrestricted Cash and Net Proceeds	**$30,656,172**	**$36,171,521**
Cash Needs at Closing		
Estimated Transaction Costs	($1,450,000)	($1,450,000)
Bank Debt	($24,094,638)	($23,783,297)
Debt Swap	($1,512,596)	($1,851,544)
Total Cash Needs at Closing	**($27,057,234)**	**($27,084,841)**
Net Cash Post Closing Liabilities & Expenses	**$3,598,937**	**$9,086,680**

*All figures are current through April 30, 2016, with the exception of the Children's Center, which is current through March 31, 2016.
Ex. E. pp 1419 and Ex. AA, Late File 3.

27. After Closing, the assets of GWHN will be transferred to Prospect Connecticut, Inc. ("New GWHN") or one or more of its affiliates. New GWHN will serve as the health system parent company and sole shareholder of Prospect Waterbury, Inc., which will hold the Hospital's license after Closing (the post-closing hospital will be referred to as "New Hospital"). Ex. E, p. 21

28. The Commitment Amount will be funded through GWHN's operating income, and any shortfall will be funded by PMH's existing cash or through PMH's corporate level credit facility. Ex. E, p. 69

29. The Commitment Amount will be dedicated to continued improvement in quality and safety, expansion of services, new services, physician and service integration, and improvements in access to service. Ex. E, p. 57

30. PMH does not currently plan to change any service lines or locations as a result of the Asset Purchase. Ex. E, p. 48

31. There is currently no capital plan related to the transaction. After Closing, PMH, in consultation with the Local Board (defined in paragraph 38 below), will develop a strategic capital plan with respect to the New Hospital and associated affiliates and joint ventures. Ex. E, p.70; Ex. R., p. 1641

32. The capital projects in Table 2 below have been identified by GWHN management as priority capital projects to be addressed within the first three years after Closing. Ex. E, p. 72

TABLE 2
CAPITAL PRIORITY PROJECTS IDENTIFIED BY GWHN

Description	Estimated Cost (In Millions)	Estimated Timeframe (In Months)
Facility – Main Campus		
Expansion of ED/Development of urgent care*	$3.75	24-36
Upgrade OB/Women's health	$2.0	6-18
Upgrade outpatient surgery**	$2.0	6-18
Equipment		
Replace interventional radiology equipment	$1.7	12-18
Upgrade surgical/anesthesia equipment	$1.5	12-18
Outpatient Centers (Southbury, Naugatuck and Waterbury)* **	N/A	N/A
Physician Recruitment	N/A	N/A
Information Technology		
Continue IT Plan	N/A	N/A
Implement outpatient/physician practice strategy	N/A	N/A
Patient Safety****	$3.24	12-36
Total Estimated Cost	**$14.2**	

No dollars have yet been assigned to outpatient centers, physician recruitment and information technology.

* The Hospital's emergency department was built to accommodate 35,000 patients annually, while actual utilization is about 50,000, resulting in lengthy patient wait times and higher than average "Left Without Being Seen" rates. Additionally, hallways are consistently used as patient rooms. Expanding the emergency department will improve access to care, decrease LWOS, and improve patient privacy. Ex. Ex. H, pp. 1416-17

** There is no separate area for outpatient surgery. Accordingly, patients are currently being redirected to outpatient surgery centers in the community. Ex. H, p. 1417

*** The Hospital currently provides several health care services in Southbury, Naugatuck, and Waterbury. PMH intends to co-locate services by developing outpatient centers in each of these towns, creating a central environment with adequate parking and convenient access for patients. Ex. H, p. 1417

**** Immediate capital needs required over the first two to three years following Closing are: monitors in the ER ($600,000), ER architects/plan ($200,000), nuclear med ($450,000), fetal monitors ($145,000), EKG ($550,000), defibrillators ($240,000), two Jackson tables ($200,000), nurse call/ED ($220,000), bed replacements ($360,000), med cart replacements ($150,000), and beginning anesthesia update ($120,000). Ex. R, p. 1640

33. Because of GWHN's poor financial condition, the projects identified in Table 2 cannot be accomplished without this transaction. Ex. R., Prefiled Testimony of Redacted p. 1510; Testimony of Redacted, Tr. on 5/3/2016, p. 30; Ex. R, Prefiled Testimony, Redacted Vice President of Mergers and Acquisitions, PMH, pp. 1626-27

34. With the proposed Asset Purchase, the parties expect that PMH will provide sufficient capital to meet deferred, current and future capital needs for the Hospital's physical plant to ensure state of the art health care delivery services through an upgrade of facilities, equipment and technology. With PMH's access to capital, New Hospital will have the financial resources to purchase new technology, upgrade its facilities, attract skilled providers, and upgrade electronic health records, in addition to investing in service line development, physician alignment and recruitment and development of increasing ambulatory access. Ex. R, Prefiled Testimony, Redacted p. 1627

35. Table 3 below represents GWHN's projected incremental operating revenues, earnings before interest, taxes, depreciation and amortization (EBITDA) and gain/losses from operations and provisions for income taxes with this proposal.

TABLE 3
GWHN PROJECTED INCREMENTAL OPERATING REVENUE, EBITDA, INCOME FROM OPERATIONS, AND PROVISION FOR INCOME TAXES WITH THE PROPOSAL

	FY 2016	FY 2017	FY 2018
Operating Revenue	$324,151	$3,702,750	$6,827,192
Earnings Before Interest, Taxes, Depreciation & Amortization (EBITDA)	$1,408,798	$3,620,294	$4,425,395
Gain/Loss from Operations	$962,989	$1,868,015	$2,256,121
Provision for Income Taxes	$785,217	$2,172,366	$2,050,340

Ex. E, p.1167

36. PMH has restored the financial position of other health systems by applying its data-driven operating strategies, leveraging its corporate capabilities and investing in system growth. Ex. R, Prefiled Testimony, Redacted p. 1627

37. Table 4 below illustrates the financial performance of the Texas and Rhode Island hospitals after they were acquired by PMH:

TABLE 4
PMH'S RECENT ACQUISITIONS FINANCIAL PERFORMANCE (in Thousands)

Entity	EBITDA			Working Capital			Stockholder's Equity		
	Year prior to acquisition	FY 2014	FY 2015	Year prior to acquisition	FY 2014	FY 2015	Year prior to acquisition	FY 2014	FY 2015
Nix Health System (a)	$14,905	$18,411	$8,043	$5,937	$36,785	$35,449	$13,122	$20,468	$63,789
Roger Williams Medical Center (b)	$3,942	$1,582	$9,080	($1,860)	$1,114	$6,230	$37,184	$34,099	$38,256
Our Lady of Fatima Hospital(c)	($893)	$509	$6,485	$1,904	$2,040	$3,432	($57,150)	$27,513	$28,107

(a) Nix is a Health System based in Texas. Nix's Earnings Before Interest, Taxes, Depreciation and amortization (EBITDA) is based on reported trailing twelve months ended on 1/31/2011. Declines in EBITDA between 2014 and 2015 were due to the fluctuation in net reimbursement related to payments made to the Service Organization of San Antonio "SOSA". Funding to SOSA is voluntary but it is projected to average approximately $12M a year based on budgeted spending initiatives of the service organization. In 2014 the funding requirements were $5.7M (lower by approximately $6.3M) and in 2015 funding requirements returned to $12M. The remaining difference was comprised of lower volume at the facility as services were reconfigured and medical staff turnover. Working Capital of Nix prior to acquisition is as of 1/31/2011 and includes cash which was not part of assets acquired by PMH.

(b) EBITDA for Roger Williams Medical Center ("RWMC"), located in Providence , Rhode Island, for year prior to acquisition is only for 8 months ending on May 31, 2014 and EBITDA for FY2014 is only for three months post acquisition for FYE 9/30/2014. Working capital is for prior to acquisition as of 5/31/2014 and includes cash which was not part of the assets acquired by PMH as prior to the acquisition RWMC was a non-profit organization. Therefore, net assets were used as a substitute for stockholder's equity.

(c) EBITDA for Our Lady of Fatima Hospital ("OLFH") in Rhode Island is for year prior to acquisition and is only for 8 months ending on May 31, 2014 and for FY2014 is only for three months post acquisition. Working capital prior to acquisition is as of 5/31/2014 and includes cash which was not part of the assets acquired by PMH as prior to the acquisition OLFH was a non-profit organization. Therefore, net assets were used as a substitute for stockholder's equity.

Docket#15-32016-486, Late File 19, dated Apr. 20, 2016; Docket#15-32016-486, Ex. QQ, dated May 9, 2016

38. After Closing, the New Hospital will be governed by a board of directors controlled by PMH (the "New Hospital Board"). The New Hospital Board will have oversight and ultimate authority over the affairs of the New Hospital and the purchased assets. The New Hospital Board will be composed of executives of PMH and local employed executives of GWHN. There are currently no actual or proposed bylaws for the New Hospital Board. Ex. E, p. 20; Ex. H, p. 1422

39. The New Hospital Board will be advised by a local advisory board, anticipated to be comprised of five current members of the GWHN Board, five physicians, and the CEO of the New Hospital (the "Local Board"). The Local Board will serve as a resource for PMH with respect to development and review of strategic plans, assist with maintenance and implementation of a strategic business plan for the New Hospital, and assist with medical staff credentialing, quality assurance programs and accreditation at the New Hospital. There are currently no actual or proposed Bylaws for the Local Board. Ex. E, pp. 20-21, 190; Ex. H, pp. 1422-23

40. As of the Closing Date, PMH or an affiliate will offer employment to substantially all GWHN employees who are in good standing, in positions and at salaries at least equal to those then being provided by GWHN and with benefits packages comparable to those offered to similarly-situated employees at other hospitals operated by PMH. Ex. E, pp. 86, 90, 176

41. PMH plans to establish a strong physician network by recruiting high quality physicians to GWHN's medical staff. PMH has developed significant experience in other markets regarding methods of attracting more primary care providers and improving access to care. Recently, PMH succeeded in establishing an IPA in Rhode Island with 105 primary care practitioners and 270 specialist physicians. Of the 105 primary care practitioners participating in PMH's Rhode Island physician network at the end of 2015, only 18 were employed by the CharterCare System when PMH acquired its two hospitals (RWMC and OLFH) in mid-2014. Ex. E, p. 89; Docket#15-32016-486, Ex. G, p. 75; Ex. K, p. 2177-78

42. In order to implement the CRC strategy, PMH has established an IPA entity in Connecticut (Prospect Provider Group CT-Waterbury, LLC, or "PPGCTW") and a preferred provider network/health system risk taking entity, Prospect Health Services CT, Inc., that will contract with payers on behalf of PPGCTW physicians. These two organizations, through management services agreements with PMH, will manage physician participation, risk contracting and care management activities for participating members. Ex. E, p. 87; Ex. H, p. 1430; Ex. R, Prefiled Testimony of Redacted p. 1605; Testimony of Redacted Tr. on 5/3/2016, pp. 37-38

43. The goal of the CRC model is to reduce the overall cost of health care by increasing preventive care and reducing readmissions, inpatient utilization and emergency room visits. PMH will achieve these goals by developing a healthcare delivery network encompassing the entire continuum of patient care, including inpatient services, home health, clinics, independent physicians, nursing homes, ambulatory surgical centers, out-patient diagnostic services and other health related services. Ex. E, pp. 62, 89; Ex. R, Prefiled Testimony of Redacted pp. 1607, 1609, 1611-12

44. PMH has demonstrated the efficacy of the CRC model in Southern California, Texas and Rhode Island. In these regions, PMH has improved clinical outcomes, increased quality scores, increased patient satisfaction, reduced readmission rates, reduced average lengths of stay, and reduced medical-cost ratios. For example, from 2012 to 2014 in California and Texas, where PMH participates in HMO contracts for seniors, PMH reduced hospital bed days per thousand patients from 1,260 to 720. Additionally, length of hospital stay for this population has been reduced from 5.1 to 3.9 days, admissions per thousand have dropped from 245 per thousand to 182 per thousand and hospital readmissions within thirty days has dropped from 19% to 13%. The CRC model has also enabled PMH to attract more primary care providers and has improved access to care. Ex. E, p. 65-66; Ex. R, Prefiled Testimony of Redacted pp. 1608, 1610, 1615

45. PMH has agreed to adhere to GWHN's charity care policies for at least the first five years after Closing. For the first five years, PMH has also agreed to participate in the Medicare and Medicaid programs and accept all Medicare and Medicaid patients, provide public health programs of educational benefit to the community, and to generally promote public health, wellness, and welfare to the community by operating the New Hospital with quality standards consistent with other hospitals owned by PMH. Ex. E, pp. 61-63, 81, 1226-28; Ex. H, p. 1437; Testimony of Von Crockett, Tr. on 5/3/2016, p. 98; Tr., Testimony of Redacted Redacted President, PMH East on 5/3/16, pp. 103-04

46. PMH will continue to provide financial support for community benefit and community building activities in the Waterbury area to the same degree as GWHN did in FY 2014. The spending by PMH for community building activities post-closing is projected to increase 1% each year through FY 2019, and the spending for both community benefit and community building activities post-closing assumes no change in the Medicaid population served or the complement of community benefit programs offered by the New Hospital. Ex. E, pp. 83-84; Testimony of Redacted, Tr. on 5/3/2016, p. 104

47. Table 5 below describes the socioeconomic condition of the Service Area towns in comparison to the state of Connecticut as a whole and shows the areas most in need of such programs.

TABLE 5
SOCIOECONOMIC STATUS OF THE SERVICE AREA

Data				
Town	Poverty Rate	Medium Household Income	Unemployment Rate	Medium Age
Primary Service Area				
Beacon Falls	3.8%	$ 79,207	7.0%	39
Bethlehem	4.4%	$ 80,884	5.8%	50
Cheshire	2.8%	$ 110,587	6.2%	41
Middlebury	2.6%	$ 97,996	5.9%	45
Naugatuck	8.6%	$ 62,574	9.4%	39
Prospect	3.2%	$ 95,325	6.7%	44
Southbury	6.4%	$ 67,195	6.6%	50
Thomaston	2.7%	$ 67,426	7.8%	43
Waterbury	21.9%	$ 40,867	12.5%	35
Watertown	3.4%	$ 80,899	7.7%	44
Wolcott	3.4%	$ 80,655	7.8%	44
Woodbury	4.6%	$ 80,167	5.9%	48
Secondary Service Area				
Harwinton	4.6%	$ 89,429	6.1%	47
Morris	5.6%	$ 89,688	6.4%	45
Oxford	4.5%	$ 107,308	6.0%	43
Plymouth	6.7%	$ 73,603	8.9%	41
Seymour	6.8%	$ 73,099	7.7%	42

Torrington	11.2%	$ 50,548	8.5%	43
State	**10.0%**	**$ 69,519**	**7.8%**	**40**

Ex. E, p. 54

48. Central Waterbury is designated as a Medically Underserved Area and a Health Professionals Shortage Area. The Hospital currently provides safety net services in this area. The Applicants anticipate that the proposed Asset Purchase will support the availability of health care services to vulnerable populations in the Service Area. Ex. E, p. 54

49. In 2013, the Hospital conducted a Community Health Needs Assessment ("CHNA"), which identified current and future health care needs of the community. The priority areas identified for the greater Waterbury community were access to care, mental health/substance abuse, overweight/obesity, and smoking/tobacco use. An implementation plan was developed to respond to the identified health needs, which PMH has agreed to support. Additionally, the Hospital has traditionally taken a lead role in developing the CHNA, and PMH has agreed to maintain GWHN's current level of involvement in developing and implementing the CHNA for five years from Closing. Ex. E, pp. 60, 62, 1075-1129, 1130-49; Ex. H, p. 1439; Testimony of Von Crockett, Tr. on 5/3/2016, pp. 90-91

50. PMH has also stated that the New Hospital will be in compliance with the following general community benefit standards for at least the first three years after the Closing: (a) the New Hospital will have an open medical staff and not restrict the use of facilities to a particular group of physicians and surgeons to the exclusion of other qualified doctors and (b) the New Hospital will operate a 24/7 emergency department and provide emergency services to patients regardless of their ability to pay. Testimony of Redacted, Tr. on 5/3/16, pp. 103-04

51. PMH and GWHN representatives have already met with leadership for Connecticut's Medicaid Program at the Department of Social Services ("DSS") and expressed their desire to work under a risk-based arrangement to provide care to Medicaid recipients. PMH is currently working with officials in Rhode Island to pilot a Medicaid risk-based program in that state. In addition, PMH will actively work with other providers in the community such as federally qualified health centers or community health centers to meet the needs of uninsured and underinsured individuals in the Service Area, including Medicaid recipients. Ex. E, pp. 63-65

52. The patient population currently served by the Hospital is not expected to change as a result of the Asset Purchase. PMH will accept all existing contracts with payers and will complete a change of ownership process with commercial payers, as well as Medicare and the Connecticut Medical Assistance Program (Medicaid). Table 6 below describes the current and projected patient population and payer mix for the Hospital with respect to discharges.

TABLE 6
PATIENT POPULATION/PAYER MIX

Hospital	YTD 8/31/15	Projected 2015	Projected FY 2016	Project FY 2017	Projected FY 2018
Medicare	5,002	5,457	5,312	5,312	5,312
Medicaid	3,021	3,296	3,196	3,196	3,196
CHAMPUS or TriCare	18	19	18	18	18
Total Government Payers	8,041	8,771	8,526	8,526	8,526
Commercial Insurers	2,527	2,757	2,681	2,681	2,681
Self-Pay	113	123	64	64	64
Workers Compensation	61	67	73	73	73
Total Non-Government Payers	2,701	2,947	2,818	2,818	2,818
Total Payer Mix	**10,742**	**11,718**	**11,344**	**11,344**	**11,344**

Ex. E, pp. 74, 76

53. Financial benefits associated with this proposal include: operational efficiencies and economies of scale, the New Hospital's participation in PMH's purchasing power, supply chain benefits, employee benefits savings and streamlined revenue collection. PMH also makes available to its hospitals subject matter consultants who are employed by PMH, saving its hospitals the cost of hiring consultants in those areas. Ex. R, Prefiled Testimony of Von Crockett, p. 1535; Docket#15-32016-486, Ex. N., p. 3236

54. PMH has agreed to maintain GWHN's quality program for at least two years following the transaction. Ex. T, p. 1826; Ex. R., Prefiled Testimony of Von Crockett, p. 1533

55. PMH has had to significantly modify its own Quality Assurance and Performance Improvement ("QAPI") as a result of recent surveys of two PMH hospitals in California, Los Angeles Community Hospital and Southern California Hospital, resulting in the California Department of Health imposing Immediate Jeopardy citations. Ex. K, p. 1459-61; Ex. R, Prefiled Testimony of Von Crockett, pp. 1530-33

CONFIDENTIAL BUSINESS INFORMATION

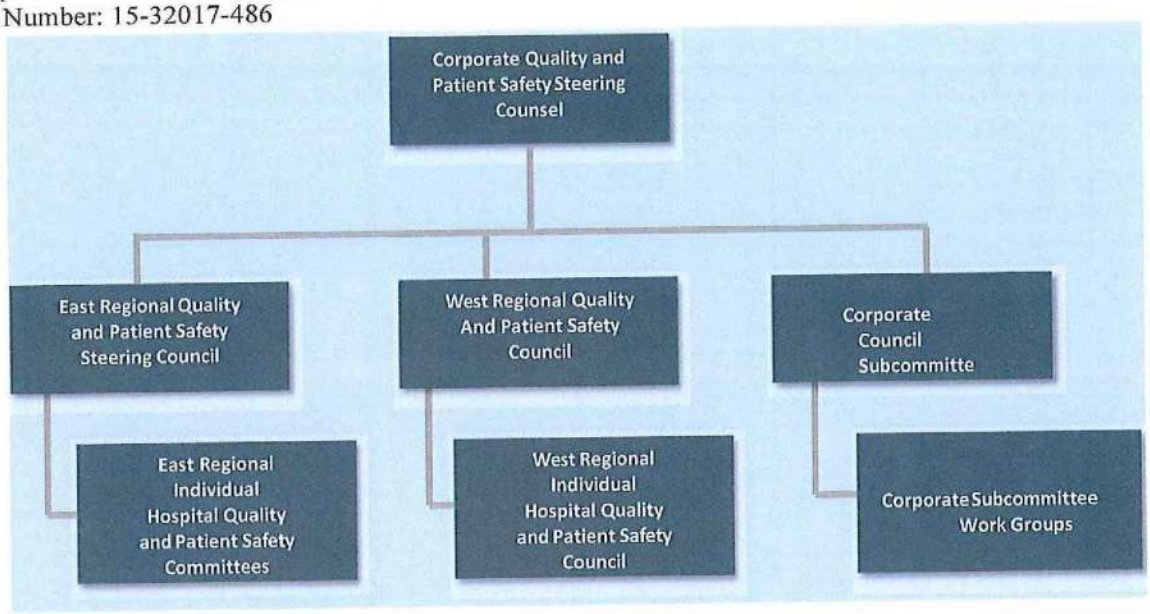
56. GWHN representatives learned of the Immediate Jeopardy citations on February 11, 2016. In response, the GWHN Board appointed a task force to review the citations and corrective actions taken and to recommend whether or not to proceed with the transaction. The task force reviewed the deficiencies and corrective action plans, conducted interviews, and made site visits to PMH-owned hospitals in both California and Rhode Island. The task force determined that PMH was committed to quality and proposed that GWHN obtain certain assurances from PMH and move forward with the transaction. Ex. R, pp. 1635-36; Testimony, Redacted, Director of Performance Improvement, GWHN, Tr. on 5/3/2016, pp. 25-31

57. Accordingly, on April 27, 2016 the parties entered into a Quality Assurance Commitment Letter pursuant to which PMH agreed to maintain certain GWHN quality programs for the first two years after the Closing Date and to not modify them without approval of the Local Board. The Quality Assurance Commitment Letter also requires that PMH maintain QAPI programs consistent with best practices and those currently implemented in PMH's Rhode Island facilities while also acknowledging that the Local Board shall oversee quality programs at the New Hospital. Ex. T, p. 1826

58. Based on the information learned and protections gained, the task force recommended, and the Board confirmed, GWHN's commitment to proceed with the transaction. Ex. R, pp. 1635-36; Testimony, Redacted, Tr. on 5/3/2016, pp. 30-31

59. Additionally, as a result of the Immediate Jeopardy citations, PMH has hired a corporate level Chief Quality Officer, Chief Clinical Officer, Chief Nursing Officer and an Associate Vice President of Regulatory and Patient Safety to assist in providing necessary resources to implement all quality programs at its local hospitals and share best practices among the hospitals. Ex. K, p. 1459; Ex. R, Prefiled Testimony of Von Crockett, pp. 1530-32

60. Other PMH initiatives include retaining a national consulting firm and legal counsel to assist in preparedness and responses to Centers for Medicare and Medicaid Services ("CMS") surveys. Under PMH's draft QAPI program, a Hospital Quality & Patient Safety Committee will be developed at the New Hospital, with oversight over subcommittees and workgroups that address the New Hospital's unique needs. These committees will report to a Regional Quality and Patient Safety Steering Council, which will report to the Corporate Quality and Patient Safety Steering Council, as described below:



Testimony of Redacted Chief Quality Officer, PMH, pp. 57-59; Ex. R, pp. 1692, 1696; Docket#15-32016-486, Tr., Testimony of Von Crockett on 3/29/15, pp. 93-94; Docket#15-32016-486, Ex. Z, Prefiled Testimony of Von Crockett, pp. 3356-57; Docket#15-32016-486, Ex. Z, pp. 3402-03; Docket#15-32016-486, Late File 1, dated Apr. 20, 2016; Docket#15-32016-486, Late File 10, dated Apr. 20, 2016

61. OHCA is currently in the process of establishing its policies and standards as regulations. Therefore, OHCA has not made any findings as to this proposal's relationship to any regulations not yet adopted by OHCA. Conn. Gen. Stat. § 19a-639(a)(1)

62. The application is consistent with the overall goals of the Statewide Health Care Facilities and Services Plan. Conn. Gen. Stat. § 19a-639(a)(2)

63. The Applicants have established that there is a clear public need for the proposal. Conn. Gen. Stat. §19a-639(a)(3)

64. The Applicants have demonstrated that the proposal will improve the overall financial strength of the health care system and that it is financially feasible. Conn. Gen. Stat. §19a-639(a)(4)

65. Subject to the conditions below, the Applicants have satisfactorily demonstrated that the proposal will maintain quality, accessibility and cost effectiveness of health care delivery in the region. Conn. Gen. Stat. §19a-639(a)(5)

66. Subject to the conditions below, the Applicants have shown that there would be no adverse change in the provision of health care services to the relevant populations and payer mix, including access to services by Medicaid recipients and indigent persons. Conn. Gen. Stat. §19a-639(a)(6)

67. The Applicants have satisfactorily identified the population to be affected by this proposal. Conn. Gen. Stat. §19a-639(a)(7)

68. The historical utilization of GWHN's services in the Service Area support this proposal. Conn. Gen. Stat. §19a-639(a)(8)

69. The Applicants have satisfactorily demonstrated that this proposal would not result in an unnecessary duplication of existing services in the area. Conn. Gen. Stat. §19a-639(a)(9)

70. Subject to the conditions below, the Applicants have demonstrated that there will be no reduction in access to services by Medicaid recipients or indigent persons. Conn. Gen. Stat. §19a-639(a)(10)

71. The Applicants have satisfactorily demonstrated that the proposal will not have a negative impact on the diversity of health care providers in the area. Conn. Gen. Stat. §19a-639(a)(11)

72. The Applicants have satisfactorily demonstrated that the proposal will not result in any consolidation that would affect health care costs or accessibility to care. Conn. Gen. Stat. §19a-639(a)(12)

Discussion

CON applications are decided on a case-by-case basis and do not lend themselves to general applicability due to the uniqueness of the facts in each case. In rendering its decision, OHCA considered the factors set forth in Connecticut General Statutes § 19a-639(a) and 19a-486d. The Applicants bear the burden of proof in this matter by a preponderance of the evidence. *Jones v. Connecticut Medical Examining Board,* 309 Conn. 727 (2013).

GWHN is a non-stock, 501(c)(3) corporation that is the parent company to The Waterbury Hospital ("Hospital"), an acute care teaching hospital with 357 licensed beds plus 36 bassinets located in Waterbury, Connecticut. GWHN also holds interests in other entities, joint ventures, and affiliates. *FF1* GWHN serves the following towns: Beacon Falls, Bethlehem, Cheshire, Middlebury, Morris, Naugatuck, Oakville, Oxford, Plantsville, Plymouth, Prospect, Seymour, Southbury, Southington, Terryville, Thomaston, Torrington, Waterbury, Watertown, Wolcott, and Woodbury. *FF6* PMH is a for-profit, privately owned national healthcare services company with its principal place of business in Los Angeles, California. PMH owns fourteen acute care and behavioral hospitals in California, New Jersey, Rhode Island and Texas. It also owns a network of specialty and primary care clinics in each of these regions. *FF13* The Hospital has experienced consecutive years of losses due to poor economic conditions in the Service Area, declining government and commercial reimbursement, the increasing complexity of health care treatment, and national health care reform. Additionally the recession in 2008 led to GWHN defaulting on its bond covenants in 2009. In 2010, a consulting firm, Kaufman Hall, identified over $50 million in capital improvements required over five years to keep the Hospital operational. *FF7* The Applicants are requesting approval of the proposed asset purchase (the "Asset Purchase") as a solution to GWHN's long-standing challenges that offers the Service Area continued access to its services and facilities. *FF12*

Under the proposed Asset Purchase Agreement ("APA"), PMH will pay a total purchase price of approximately $43.3 million for the assets of GWHN, which includes a purchase price of $31.8 million plus a net working capital adjustment of $18.3 million, as of April 30, 2016, minus capital lease obligations in excess of $6.5 million, unfunded pension liabilities, asbestos abatement liability, the amounts of certain GWHN liabilities assumed by PMH, and for the value of any joint venture interest that GWHN is unable to assign or transfer. *FF20* PMH will commit to spend within seven years no less than $55 million, less (a) the amount not to exceed $3.5 million of capital lease obligations assumed by PMH at Closing in excess of $3 million, (b) the cash shortfall at closing (defined in the APA as the "Negative Amount"), (c) the Purchase Price Adjustment Shortfall, provided that the aggregate of the amounts in (b) and (c) are not to exceed $5.0 million in aggregate, and (d) unpaid indemnification losses of PMH (defined in the APA as the "Unpaid Losses") of up to $4.5 million, (the "Commitment Amount"). *FF21* GWHN's debt and pension obligations will also be addressed as a result of the transaction. At the time of the Closing and as permitted thereafter, the purchase price (less adjustments) together with GWHN's cash, investments and debt service reserve funds (but excluding charitable funds) will be used to satisfy GWHN's obligations. GWHN's unfunded pension liabilities with respect to its multi-

CONFIDENTIAL BUSINESS INFORMATION PMH00002158

employer defined benefit health plan are estimated to be at least $27 million and, with respect to its cash balance plan, are approximately $12 million. *FF25*

With the proposed Asset Purchase, the parties expect that PMH will provide sufficient capital to meet deferred, current and future capital needs for the Hospital's physical plant to ensure state of the art health care delivery services through an upgrade of facilities, equipment and technology. With PMH's access to capital, the post-closing New Hospital will have the financial resources to purchase new technology, upgrade its facilities, attract skilled providers, and upgrade electronic health records, in addition to investing in service line development, physician alignment and recruitment and development of increasing ambulatory access. *FF34* On the Closing Date, the assets of GWHN will be transferred to Prospect Connecticut, Inc. ("New GWHN") or one or more of its affiliates. New GWHN will serve as the health system parent company and sole shareholder of Prospect Waterbury, Inc., which will hold the Hospital's license after Closing (the post-closing hospital will be referred to as "New Hospital"). *FF27*

Following Closing, the New Hospital will be governed by a board of directors controlled by PMH (the "New Hospital Board"). The New Hospital Board will have oversight and ultimate authority over the affairs of the New Hospital and the purchased assets. The New Hospital Board will be composed of executives of PMH and local employed executives of GWHN. *FF38* The New Hospital Board will be advised by a local advisory board, anticipated to be comprised of five current members of the GWHN Board, five physicians, and the CEO of the New Hospital (the "Local Board"). The Local Board will serve as a resource for PMH with respect to development and review of strategic plans, assist with maintenance and implementation of a strategic business plan for the New Hospital, and assist with medical staff credentialing, quality assurance programs and accreditation at the New Hospital. *FF39*

The capital projects in the table below have been identified by GWHN management as priority capital projects to be addressed within the first three years after Closing. *FF32*

CAPITAL PRIORITY PROJECTS IDENTIFIED BY GWHN

Description	Estimated Cost (In Millions)	Estimated Timeframe (In Months)
Facility – Main Campus		
Expansion of ED/Development of urgent care*	$3.75	24-36
Upgrade OB/Women's health	$2.0	6-18
Upgrade outpatient surgery**	$2.0	6-18
Equipment		
Replace interventional radiology equipment	$1.7	12-18
Upgrade surgical/anesthesia equipment	$1.5	12-18
Outpatient Centers (Southbury, Naugatuck and Waterbury)* **	N/A	N/A
Physician Recruitment	N/A	N/A
Information Technology		
Continue IT Plan	N/A	N/A

Implement outpatient/physician practice strategy	N/A	N/A
Patient Safety****	$3.24	12-36
Total Estimated Cost	**$14.2**	

PMH plans to establish a strong physician network by recruiting high quality physicians to GWHN's medical staff. PMH has developed significant experience in other markets regarding methods of attracting more primary care providers and improving access to care. Recently, PMH succeeded in establishing an IPA in Rhode Island with 105 primary care practitioners and 270 specialist physicians. Of the 105 primary care practitioners participating in PMH's Rhode Island physician network at the end of 2015, only 18 were employed by the CharterCare System when PMH acquired its two hospitals (RWMC and OLFH) in mid-2014. *FF41*

With respect to its quality of health care services, PMH has had to significantly modify its Quality Assurance and Performance Improvement ("QAPI") as a result of recent surveys of two PMH hospitals in California, Los Angeles Community Hospital and Southern California Hospital, resulting in the California Department of Health imposing Immediate Jeopardy citations. *FF55* GWHN representatives learned of the Immediate Jeopardy citations on February 11, 2016. In response, the GWHN Board appointed a task force to review the citations and corrective actions taken and to recommend whether or not to proceed with the transaction. The task force reviewed the deficiencies and corrective action plans, conducted interviews, and made site visits to PMH-owned hospitals in both California and Rhode Island. The task force determined that PMH was committed to quality and proposed that GWHN obtain certain assurances from PMH and move forward with the transaction. *FF56* Accordingly, on April 27, 2016 the parties entered into a Quality Assurance Commitment Letter pursuant to which PMH agreed to maintain certain GWHN quality programs for the first two years after the Closing and to not modify them without approval of the Local Board. The Quality Assurance Commitment Letter also requires that PMH maintain QAPI programs consistent with best practices and those currently implemented in PMH's Rhode Island facilities while also acknowledging that the Local Board shall oversee quality programs at the New Hospital. *FF57*

PMH aligns its hospitals and physicians under a model called Coordinated Regional Care ("CRC"). CRC provides for clinical integration of hospitals, physicians and community providers with health plans and other payers through value driven and risk-based reimbursement systems. PMH believes that the CRC model improves quality, efficiency and financial performance while providing its patients with quality, affordable healthcare. *FF15* The goal of the CRC model is to reduce the overall cost of health care by increasing preventive care and reducing readmissions, inpatient utilization and emergency room visits. PMH will achieve these goals by developing a healthcare delivery network encompassing the entire continuum of patient care, including inpatient services, home health, clinics, independent physicians, nursing homes, ambulatory surgical centers, out-patient diagnostic services and other health related services. *FF43* PMH has demonstrated the efficacy of the CRC model in Southern California, Texas and Rhode Island. In these regions, PMH has improved clinical outcomes, increased quality scores, increased patient satisfaction, reduced readmission rates, reduced average lengths of stay, and reduced medical-cost ratios. For example, from 2012 to 2014 in California and Texas, where

PMH participates in HMO contracts for seniors, PMH reduced hospital bed days per thousand patients from 1,260 to 720. Additionally, length of hospital stay for this population has been reduced from 5.1 to 3.9 days, admissions per thousand have dropped from 245 per thousand to 182 per thousand and hospital readmissions within thirty days has dropped from 19% to 13%. The CRC model has also enabled PMH to attract more primary care providers and has improved access to care. *FF44*

In addition to addressing any quality issues, PMH has also agreed to adhere to GWHN's charity care policies for at least the first five years after Closing. For the first five years, PMH has also agreed to participate in the Medicare and Medicaid programs and accept all Medicare and Medicaid patients, provide public health programs of educational benefit to the community, and to generally promote public health, wellness, and welfare to the community by operating the New Hospital with quality standards consistent with other hospitals owned by PMH. *FF45* PMH will continue to provide financial support for community benefit and community building activities in the Waterbury area to the same degree as GWHN did in FY 2014. The spending by PMH for community building activities post-closing is projected to increase 1% each year through FY 2019, and the spending for both community benefit and community building activities post-closing assumes no change in the Medicaid population served or the complement of community benefit programs offered by the New Hospital. *FF46*

In 2013, the Hospital conducted a Community Health Needs Assessment ("CHNA"), which identified current and future health care needs of the community. The priority areas identified for the greater Waterbury community were access to care, mental health/substance abuse, overweight/obesity, and smoking/tobacco use. An implementation plan was developed to respond to the identified health needs, which PMH has agreed to support. Additionally, the Hospital has traditionally taken a lead role in developing the CHNA, and PMH has agreed to maintain GWHN's current level of involvement in developing and implementing the CHNA for five years from the Closing. *FF49* PMH has also stated that the New Hospital will be in compliance with the following general community benefit standards for at least the first three years after the Closing: (a) the New Hospital will have an open medical staff and not restrict the use of facilities to a particular group of physicians and surgeons to the exclusion of other qualified doctors and (b) the New Hospital will operate a 24/7 emergency department and provide emergency services to patients regardless of their ability to pay. *FF50* PMH and GWHN representatives have already met with leadership for Connecticut's Medicaid Program at the Department of Social Services ("DSS") and expressed their desire to work under a risk-based arrangement to provide care to Medicaid recipients. PMH is currently working with officials in Rhode Island to pilot a Medicaid risk-based program in that state. In addition, PMH will actively work with other providers in the community such as federally qualified health centers or community health centers to meet the needs of uninsured and underinsured individuals in the Service Area, including Medicaid recipients. *FF51*

Financial benefits associated with this proposal include: operational efficiencies and economies of scale, the New Hospital's participation in PMH's purchasing power, supply chain benefits, employee benefits savings and streamlined revenue collection. PMH also makes available to its

hospitals subject matter consultants who are employed by PMH, saving its hospitals the cost of hiring consultants in those areas. *FF53*

In its audited financial statements for FY 2015, PMH reported total revenues of over $1.3 billion from its operations on a consolidated basis. As of fiscal year end 2015, PMH reported free cash flow of over $112 million and close to $75 million in cash from operations. The company also received credit upgrades by both Moody's and S&P in 2015, with Moody's rating PMH's bonds as B1 and S&P rating PMH's bonds as B. These ratings still stand as of May 3, 2016. *FF19*

Based upon the aforementioned discussion of the evidence provided by the Applicants in this matter, the Applicants have satisfactorily demonstrated that PMH has made a commitment to provide health care to the uninsured and the underinsured; safeguard procedures are in place to avoid a conflict of interest in patient referral; and certificate of need authorization is justified in accordance with the principles and guidelines set forth in Connecticut General Statutes § 19a-639; those being, access to healthcare services, quality of the healthcare services, public need for the proposed project, and the financial feasibility of the proposed project.

CONFIDENTIAL BUSINESS INFORMATION

Order

Based upon the foregoing Findings of Fact and Discussion, the Applicants' request for the sale of the assets of GWHN and its controlled affiliates to PMH or one or more affiliates of PMH is hereby **Approved** under Conn. Gen. Stat. §§ 19a-486 and 19a-639 subject to the enumerated conditions (the "Conditions") set forth below.

Unless expressly provided otherwise, all Conditions of this Order shall, to the extent applicable, be binding on the Applicants, their affiliates, successors and assigns, regardless of whether New GWHN remains the parent company and sole shareholder of the New Hospital. OHCA and any successor agency shall have the right to enforce the Conditions by all means and remedies available to it under law and equity, including, but not limited to, Conn. Gen. Stat. § 19a-486g and the right to impose and collect a civil penalty under Conn. Gen. Stat. § 19a-653 against any person or health care facility or institution that fails to file required data or information within the prescribed time periods set forth in this Order. All references to days in these Conditions shall mean calendar days.

1. Within twenty (20) days following the Closing of the Asset Purchase authorized by this Order, Applicants shall submit a schedule to OHCA setting forth Waterbury Hospital's inpatient bed allocation and the location and hours of operation for all outpatient services, by department, as of the Decision Date and publish this same information on the website of the Hospital. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(8) & (11); FF 18, 30*

2. Within twenty (20) days following the Closing of the Asset Purchase authorized by this Order, Applicants shall identify and provide the Certificate of Incorporation for the PMH affiliated entity that shall directly own, operate and hold the hospital license of the New Hospital post-closing. This entity shall be duly organized and validly existing under the laws of Connecticut and New GWHN shall be its parent company and sole shareholder as proposed in the CON application. OHCA is imposing this Condition to verify that safeguard procedures are in place to avoid a conflict of interest in patient referral. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(8) & (11); FF 27*

3. Applicants shall notify OHCA in writing of the Closing of the Asset Purchase authorized by this Order within twenty (20) days of such closing and shall supply final execution copies of all agreements related to same, including but not limited to:

    a. the APA, including any and all schedules and exhibits; and

    b. Bylaws or similar governance documents for New GWHN, as well as for the New Hospital.

The Applicants may redact from the APA any information that is exempt from disclosure under Conn. Gen. Stat. § 1-210. If the Applicants redact materials in accordance with the previous sentence, the Applicants shall provide a list to OHCA which identifies in general terms the nature of the redacted material and why it is claimed to be exempt for public record purposes.

OHCA is imposing this Condition to verify that safeguard procedures are in place to avoid a conflict of interest in patient referral. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a) & 19a-613(b); FF 20, 21, 38, 39*

4. Within one hundred and eighty (180) days following the Closing Date, PMH shall submit a plan (the "Health Needs Plan") for continuing to support and implement GWHN's 2016 CHNA and for conducting the New Hospital's next comprehensive study of community health needs in the Service Area (the "Community Health Needs Study" or "Study"). The Health Needs Plan shall describe in detail at least the following:

   (i) the data that will be collected and analyzed to systematically assess health status indicators of the Service Area;
   (ii) the identity of key community stakeholders and health organizations, unaffiliated with PMH, including without limitation, representatives of medically underserved populations, that will be enlisted to participate in the Study and the manner and extent of such participation by stakeholders in both the development of health priorities and planned implementation;
   (iii) the qualifications of consultants experienced in performing community health needs assessments who will be retained by PMH to ensure that the priority health needs of the community are accurately determined;
   (iv) the frequency with which the Study will be repeated;
   (v) the manner in which results of the Study and the implementation strategy to address the priority health needs identified therein (the "Implementation Strategy") will be distributed to the community; and
   (vi) the manner in which the Study will complement the population health management objectives of PMH and the New Hospital.

   OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Gen. Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(3) & (7); FF 49*

5. Within three (3) years following the Closing, PMH shall participate with New GWHN and the New Hospital, and the key community stakeholders and health organizations identified pursuant to Condition 4, in conducting a Community Health Needs Study and shall provide a copy of such Study and its Implementation Strategy to OHCA within thirty (30) days of completion. PMH and the participants shall utilize Healthy Connecticut State Health Improvement Plan data and priorities as the starting point for the Study (available at http://www.ct.gov/dph/lib/dph/state_health_planning/ship/hct2020/hct2020_state_hlth_impv_032514.pdf), as well as any applicable community health improvement plan issued by any local health department in the Service Area.[1] The Implementation Strategy shall also adopt the evidence-based interventions identified in the Centers for Disease Control 6/18 initiative (available at http://www.cdc.gov/sixeighteen) to the extent the health priorities identified in the Study correlate to the health conditions identified by the CDC and provide information on how any patient outcomes related to the Implementation Strategy will be measured and reported to the community. PMH shall publish the Community Health Needs Study and the Implementation Strategy on New Hospital's website. Until such time as the Community Health Needs Study and Implementation Strategy are submitted to OHCA, PMH shall continue to support and implement GWHN's current CHNA for the Hospital. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a) 19a-613(b), 19a-639(a)(3) & (7); FF 49*

6. Within one hundred and eighty (180) days following the Closing Date, PMH shall submit a plan demonstrating how health care services will be provided by the New Hospital for the first three years following the Asset Purchase, including any consolidation, reduction, or elimination of existing services or introduction of new services (the "Services Plan"). The Services Plan will be provided in a format mutually agreed upon by OHCA and the Applicants. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Conn. Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) (7),(8),(9),(11) & (12); FF 18, 30, 34, 43, 46*

7. Until such time as the Services Plan is submitted, PMH shall provide OHCA with notice of any reallocation of inpatient beds and relocation of outpatient services for the New Hospital specific to those services that existed at the Hospital as of the Decision Date. Such notice shall be provided within ten (10) days of any such reallocation or relocation and published on the website of the New Hospital. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) (7),(8),(9),(11) & (12); FF 18, 30*

[1] Other tools and resources which the Applicants are encouraged to consider include County Health Rankings and CDC Community Health Improvement Navigator in order to assist with the Study process in terms of enhancing the understanding of social, behavioral, and environmental conditions that affect health, identifying priorities, and using evidence-based interventions.

8. Within one hundred and eighty (180) days following the Closing Date and thereafter on the same semi-annual schedule as set forth in Conditions 9 and 10 below until the capital commitment is satisfied, PMH shall submit to OHCA a report on the capital investments ("Capital Investment Report") it has made in the New Hospital and its affiliates from the Commitment Amount. The Capital Investment Report shall include the following in a format to be agreed upon:

    a. A list of the capital expenditures that have been made in the prior one hundred and eighty (180) days with descriptions of each associated project;

    b. An explanation of why each expenditure was made and a timeframe for the roll out of the associated capital project (including estimated beginning, ending and startup/operation dates); and

    c. The dates and amounts of withdrawals from the New Hospital's operating account and/or any other sources of funding used to fulfill the Capital Commitment.

    The reports shall be signed by the New GWHN's Chief Financial Officer. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(3),(4) & (5); FF 29, 31-34*

9. For three (3) years following the Closing Date, PMH shall file the following information with OHCA on a semi-annual basis for New GWHN and the New Hospital, respectively:

    a. The cost saving totals achieved in the following Operating Expense Categories for New GWHN and New Hospital: Salaries and Wages, Fringe Benefits, Contractual Labor Fees, Medical Supplies and Pharmaceutical Costs, Depreciation and Amortization, Interest Expense, Malpractice Expense, Utilities, Business Expenses and Other Operating Expenses. The categories shall be consistent with the major operating expense categories (Categories A, B, C, D, E, G, H, I, J, and K) which are in use at the time of reporting in the OHCA Hospital Reporting System ("HRS") Report 175 or successor report. The semi-annual submission shall also contain narratives describing:

        1. the major cost savings achieved for each expense category for the semi-annual period; and

        2. the effect of these cost savings on the clinical quality of care.

    b. A consolidated Balance Sheet, Statement of Operations, and Statement of Cash Flows for New GWHN and New Hospital. The format shall be consistent with that which is in use at the time of reporting in OHCA's HRS Reports 100/150, 300/350 or successor reports.

For purposes of this Order, semi-annual periods are October 1-March 31 and April 1 – September 30. The required information is due no later than two (2) months after the end of each semi-annual period. Due dates are May 31st and November 30th, beginning November 30, 2016. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(4) & (5); FF 29, 31-34*

10. For three (3) years following the Closing Date, PMH shall submit to OHCA a financial measurement report. This report shall be submitted on a semi-annual basis and show current month and year-to-date data and comparable prior year period data for New GWHN and New Hospital, respectively. The required information is due no later than two (2) months after the end of each semi-annual period. Due dates are May 31st and November 30th, beginning November 30, 2016. The following financial measurements/indicators should be addressed in the report:

Financial Measurement/Indicators

A. Operating Performance
1. Operating Margin
2. Non-Operating Margin
3. Total Margin
B. Liquidity
1. Current Ratio
2. Days Cash on Hand
3. Days in Net Accounts Receivables
4. Average Payment Period
C. Leverage and Capital Structure
1. Long-term Debt to Equity
2. Long-term Debt to Capitalization
3. Unrestricted Cash to Debt
4. Times Interest Earned Ratio
5. Debt Service Coverage Ratio
6. Equity Financing Ratio
D. Additional Statistics
1. Income from Operations
2. Revenue Over/(Under) Expense

CONFIDENTIAL BUSINESS INFORMATION

3. Cash from Operations
4. Cash and Cash Equivalents
5. Net Working Capital
6. Free Cash Flow (and the elements used in the calculation)
7. Unrestricted Assets/Retained Earnings
8. Bad Debt as % of Gross Revenue
9. Credit Ratings (S&P, FITCH or Moody's)

OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify the continued financial feasibility of the project. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(4) & (5); FF 18, 36*

11. PMH shall ensure that the New Hospital maintains and adheres to GWHN's current policies regarding charity care, indigent care and community volunteer services after the Closing Date, or adopt other policies that are at least as generous and benevolent to the community as GWHN's current policies consistent with state and federal law. These policies shall be posted on the website of the New Hospital and as additionally required by applicable law. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 45, 46*

12. For three (3) years following the Closing Date, PMH shall provide written notice to OHCA of any modification, amendment or revision to the charity care, indigent care and community volunteer services of the New Hospital within thirty (30) days of such change. The notice of these changes shall be accompanied by copies of any revised policies and the notice and revised policies shall be posted on the website of the New Hospital simultaneously with its submission to OHCA. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 45, 46*

13. PMH shall maintain community benefit programs and community building activities for the New Hospital for three (3) years after the Closing Date consistent with the Hospital's most recent Schedule H of IRS Form 990 or shall provide such other community benefit programs and community building activities that are at least as generous and benevolent to the community as GWHN's current programs, and PMH shall apply a 1% increase per year for the next three (3) years toward community building activities in terms of dollars spent.

In determining the New Hospital's participation and investment in both community benefits and community building activities, PMH shall address the health needs identified by the applicable CHNA or Study in effect at the time and the population health management objectives, including social determinants of health, contained in the related Implementation Strategy.

a. On an annual basis, the Applicants shall identify the amounts and uses related to community benefits and community building and shall discuss how such investments and support are being applied toward the health needs identified in the CHNA or Study and population health management objectives. Such reporting shall be filed within thirty days of the anniversary date of the Closing for three years and shall be posted on New Hospital's website. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 46*

14. The New Hospital agrees to comply with the following general community benefit standards for at least the first three years following the Closing: (a) the New Hospital shall provide public health programs to the community and generally promote the welfare of the community; (b) the New Hospital shall have an open medical staff and not restrict the use of facilities to a particular group of physicians and surgeons to the exclusion of other qualified doctors; (c) the New Hospital shall participate in the Medicare and Medicaid programs; and (d) the New Hospital shall operate a 24/7 emergency department and provide emergency services to patients regardless of their ability to pay. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 45, 50*

15. The New Hospital shall work toward making culturally and linguistically appropriate services available and integrated throughout its hospital operations. Specifically, the New Hospital shall take reasonable steps to provide meaningful access to each individual with limited English proficiency eligible to be served or likely to be encountered in its health programs and activities, in accordance with the implementing regulations of Section 1557 of the Patient Protection and Affordable Care Act. Additionally, the New Hospital shall provide appropriate insurance navigator services for patients and, where appropriate, English as a second language and cultural competency training for employees. In complying with this Condition, the New Hospital shall be guided by the National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care published by the U.S. Department of Health and Human Services' Office of Minority Health. For three (3) years following the Closing, PMH shall submit a written report on its activities directed at meeting this Condition. Such reporting shall be filed within thirty days of the anniversary date of the Closing for three years and shall be posted on the New Hospital's website. OHCA is imposing this Condition so as to ensure continued access to health care services for the patient population. *Legal and Factual Basis: 45 C.F.R. §92.201; Stat. §§ 19a-486d(a), 19a-613(b), 19a-639(a)(5),(6) & (11); FF 45-50*

16. Within sixty (60) days after the Closing Date, the Applicants shall contract with an Independent Monitor who has experience in hospital administration and regulation, including maintaining quality control in an HRO. The Independent Monitor shall be retained at the sole expense of PMH, at a cost which shall not exceed $300,000 in the aggregate. Representatives of OHCA and the Facility Licensing and Investigations ("FLIS") section of the Department of Public Health ("DPH") will approve the Independent Monitor's appointment. The Independent Monitor shall be engaged for a minimum period of two (2) years following the Closing, which may be extended for another year at OHCA's and/or FLIS's discretion. The Independent Monitor will be responsible for monitoring the Applicants' compliance with the Conditions set forth in this Order. PMH shall provide the Independent Monitor with appropriate access to the New Hospital and its applicable records in order to enable the Independent Monitor to fulfill its functions hereunder. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify and monitor compliance with the Conditions set forth herein. *Legal and Factual Basis: Conn. Gen. §§ Stat. 19a-486d(a), 19a-613(b), 19a-639(a)(1),(2),(4),(5),(6),(7),(11) & (12); FF 18, 34, 45-50, 57*

17. The Independent Monitor will report to both OHCA and FLIS. The Independent Monitor shall conduct on-site visits of the New Hospital on no less than a semi-annual basis to assess PMH's modified QAPI program and compliance with the Quality Assurance Commitment Letter. The Independent Monitor shall furnish a written report of his or her assessment to OHCA and FLIS within thirty (30) days of the completion of each on-site review. PMH will have the opportunity to review and provide written responses to the report. As OHCA deems necessary, the Independent Monitor shall meet with OHCA and FLIS personnel to discuss the written report and will perform additional periodic reviews and reviews of other PMH affiliated sites of service. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify and monitor compliance with the Conditions set forth herein. *Legal and Factual Basis: Conn. Gen. §§ Stat. 19a-486d(a), 19a-613(b), 19a-639(a)(1),(2),(4),(5),(6),(7),(11) & (12); FF 18, 34, 45-50, 57*

18. If at any time within three (3) years following the Closing Date, the New Hospital's Local Board agrees with PMH to change any of GWHN's Post Closing Quality Practices described in the Quality Assurance Commitment Letter other than to make any changes necessary to address (i) an immediate issue of patient safety; (ii) changes in federal, state, and local laws; or (iii) as mandated or recommended in guidance by a governmental agency, PMH shall notify OHCA and FLIS in writing within thirty (30) days of any such change going into effect. If the Independent Monitor disagrees with the change, OHCA may require that a request for modification be submitted and approved as required by C.G.S. §4-18la to make the change. OHCA is imposing this Condition to ensure continued access to health care services for the patient population and to verify and monitor compliance with the Conditions set forth herein. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-613(b), 19a-639(a)(1),(2),(5) & (6); FF 57*

19. For three (3) years following the Closing Date, PMH shall hold a meeting of the New Hospital Board and the Local Board ("Joint Board Meetings") at least twice annually. Such Joint Board Meetings shall be followed by a meeting to which the public is invited in advance and at which the public is informed of the New Hospital's activities and afforded an opportunity to ask questions and make comments. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-613(b), 19a-639(a)(2),(3),(5),(7),(8),(11) & (12); FF 38, 39*

20. For three (3) years following the Closing Date, PMH shall allow for one (1) community representative to serve as a voting member of the Local Board with rights and obligations consistent with other voting members under the Local Board Bylaws. The community representative shall be selected in consultation with the Mayor of Waterbury in order to ensure the appointment of an unbiased person who will fairly represent the interests of the community served by the Hospital. OHCA is imposing this Condition to ensure continued access to health care services for the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-613(b), 19a-639(a)(2),(3),(5),(7),(8),(11) & (12); FF 38, 39*

21. PMH, New GWHN and the New Hospital shall abide by all requirements of licensure that may be imposed by FLIS in any Pre-Licensing Consent Order or similar agreement that FLIS may enter with these parties. OHCA is imposing this Condition to ensure that quality health care services are provided to the patient population. *Legal and Factual Basis: Stat. §§ 19a-486d, 19a-490, 19a-493, 19a-639(a)(1),(2),(5) & (6); FF 54, 57*

All of the foregoing constitutes the final order of the Office of Health Care Access in this matter.

STATE OF RHODE ISLAND
OFFICE OF ATTORNEY GENERAL

June 1, 2021

DECISION

Re: Initial Application of Chamber Inc.; Ivy Holdings Inc.; Ivy Intermediate Holdings, Inc.; Prospect Medical Holdings, Inc.; Prospect East Holdings, Inc.; Prospect East Hospital Advisory Services, LLC; Prospect CharterCARE, LLC; Prospect CharterCARE SJHSRI, LLC; Prospect CharterCARE RWMC, LLC

The Office of Attorney General has considered the above-referenced application pursuant to the Hospital Conversions Act, R.I. Gen. Laws Section 23-17.14-1 *et seq*. In accordance with the reasons outlined herein, the application is **APPROVED WITH CONDITIONS**.

I. INTRODUCTION

The Office of Attorney General ("Attorney General") issues this Decision pursuant to its statutory obligation to review any proposed conversion as defined by the Hospital Conversions Act ("HCA"), R.I. Gen. Laws Section 23-17.14-1, *et seq*.

This proposed conversion involves a for-profit corporation. Therefore, the Attorney General is required to review the conversion subject to the following section of the Act:

> Any approval of a conversion involving a for-profit corporation as an acquiror shall be subject to any conditions as determined by the attorney general, provided those conditions relate to the purposes of this chapter. The conditions may include, but not be limited to, the acquiror's adherence to a minimum investment to protect the assets, financial health, and well-being of the new hospital and for community benefit.

R.I. Gen. Laws § 23-17.14-28(c).

The review conducted by the Attorney General in order to arrive at this Decision required an investigation into the current owners of a national company, Prospect Medical Holdings, Inc.

Confidential LGP-SBC-000000826

(hereinafter, "Prospect" or "PMH").[1] PMH owns hospitals and physician services in five states, including two hospitals and related healthcare services here in Rhode Island. The Rhode Island hospitals owned by PMH are Roger Williams Medical Center ("RWMC") and Our Lady of Fatima ("OLF") (collectively referred to herein as the "Rhode Island Hospitals" or "Hospitals").[2]

Our investigation revealed a company whose principals and investors have issued millions of dollars in dividends from a business responsible for the safety-net hospitals and services they own, which has translated into debt held by the entire system, such that liabilities now exceed assets by over $1 billion. In an ever-changing healthcare market, this debt-to-asset ratio raises a concern for the Attorney General that the national company that owns these Rhode Island Hospitals can become unstable, disrupting and even threatening Rhode Island's third largest hospital system. In other words, PMH is a system that is at risk of developing a lack of financial ability to respond to the volatility of the healthcare market, putting every hospital in its system including our Rhode Island Hospitals at risk of reduction in services, sale, or closure.

The Attorney General must respond to this risk by protecting the Rhode Island Hospitals. With this Decision the Attorney General is requiring the current owners address the financial uncertainty facing RWMC and OLF by imposing Conditions that include the creation of three escrow accounts[3] that total $80 million, and will exist for the sole benefit of these Rhode Island Hospitals. The precise Conditions placed on these funds create a backstop, allowing the funds to

---

[1] The reference to Prospect and PMH throughout this decision refers to Prospect Medical Holdings, Inc., Ivy Holdings Inc. ("Ivy"), and Ivy Intermediate Holdings, Inc. ("IIH"), although almost all actions are taken by Prospect Medical Holdings, as Ivy and IIH operate only as holding companies for Prospect Medical Holdings. As such, Ivy and IIH have no operations other than taking required corporate actions, and no financial activities outside of loaning funds to Prospect Medical Holdings. *See* Response to Initial Application Question 16; Supplemental Response S-24.

[2] PMH also owns a number of non-hospital healthcare entities in Rhode Island.

[3] This financial commitment is initially in the form of escrow accounts created by Prospect and Leonard Green. Prospect's escrows will be converted to letters of credit by August 15, 2021. Leonard Green will make reasonable commercial efforts to also convert its escrows to letters of credit by that same date.

Confidential LGP-SBC-000000827

be accessed in the event PMH fails to comply with its ongoing obligation under this Decision to meet the Rhode Island Hospitals' operating expenses and capital needs, or in the event of insolvency, and then only subject to the approval of the Attorney General. In other words, these are not funds on which PMH itself can draw for the ongoing operation of these Hospitals. Instead, the funds will serve as security for the Rhode Island Hospitals—protection from the financial risk Prospect's owners have introduced into the system to which the Hospitals belong. Such funds shall be entirely out of the reach of Prospect's owners and creditors, and will be protected in the event of insolvency. The Attorney General considers this condition absolutely necessary to ensure the ongoing operation of the Hospitals and their ability to serve the health care needs of Rhode Islanders.

The fact that PMH adhered to conditions placed upon it here in Rhode Island—conditions that permitted its purchase of the Rhode Island Hospitals in 2014—does not change the fact that the decisions made by PMH and its owners at the national level now require this response. The 2014 purchase of the Rhode Island Hospitals by PMH was subject to the regulatory approval of both the Attorney General and the Rhode Island Department of Health ("DOH"), pursuant to the HCA and specifically Section 23-17.14-28. The approval of PMH's purchase was therefore subject to conditions that required PMH to make specified investments in the Rhode Island Hospitals. The Attorney General monitored PMH to assure the mandated financial conditions were satisfied. The financial conditions imposed by the regulators, compliance of which was confirmed by the Attorney General, have protected the Rhode Island Hospitals from underfunding and, specifically, the loss of assets experienced by other hospitals in the PMH system. Again, the fact that Rhode Island's regulatory oversight has succeeded in providing some degree of protection to our local Hospitals does not eliminate the need for the protective Conditions included in this Decision.

Confidential LGP-SBC-000000828

Discrete and identifiable decisions made by PMH's owners led to its current financial condition. Details of the Transacting Parties'[4] financial decisions and resulting circumstances are described in the reports prepared by financial experts on behalf of the Attorney General and DOH, the Carris and PYA Reports, respectively.[5] These are among the materials upon which this Decision relies. Specific financial details are also discussed below in the context of relevant statutory criteria. However, these comprehensive Reports and the Attorney General's consideration of criteria as well as the Conditions to which this Approval with Conditions is subject are best understood in the context of the Transacting Parties' overall financial condition and the most significant decisions that contributed to that condition.

The Transacting Parties provided the audited financial statements (sometimes referred to as "AFS") of PMH for fiscal years ending September 30, 2015, through September 30, 2020. In 2017, Prospect's assets exceeded its liabilities by approximately $67 million. PYA Report 12. As of their most recent, Fiscal Year 2020, audited financial statement, PMH had total assets of $2,042,389,000 and total liabilities of $3,102,004,000—the latter exceeding the former by over $1 billion.[6] *Id; see* Table 1, *infra*. In Fiscal Year 2018,[7] PMH borrowed money and thereby assumed

---

[4] "Transacting Parties" is defined in Section II below.

[5] The expert report filed by Redacted, CPA, ("Redacted Report") is attached to this Decision as Appendix C. The expert report filed by PYA, P.C. is attached to this Decision as Appendix D.

[6] Consideration of the effects of COVID-19 on PMH's financial condition is highly relevant. As noted by the Report of Attorney General's financial expert Redacted:

> For the year ended 9/30/20, PMH recognized approximately $117 million in Pandemic relief grant income. While PMH reported comprehensive loss of approximately $90 million for FY 2020, the loss would have been over $200 million without this programmatic support.

Redacted Report 10.

Overall, based on PMH's audited financial statements, its financial condition was improved in the short term, not worsened, by the pandemic. *See* PYA Report 19.

[7] PMH FY2018 & 2019 AFS. CIIH16-000942-001003.

Confidential LGP-SBC-000000829

$1.12 billion in debt obligations. PYA Report at 15. Also in 2018, the PMH Board of Directors authorized $457 million of these borrowed funds to be distributed as dividends ("2018 Dividend"). *Id*. This type of transaction where money is borrowed to pay shareholders is called a leveraged dividend recapitalization. The primary beneficiaries of the dividend were Leonard Green, David Topper, and Sam Lee. In the immediate term, the 2018 Dividend was equal to approximately 60 days of operating expenses, leaving PMH cash and cash equivalents equal to approximately 1 day of operating expenses. *Id*. As noted in the Redacted Report, "the 2018 [leveraged dividend recapitalization] transaction substantially weakened the balance sheet of PMH, benefitting the shareholders while providing minimal or no funds to any of the local operating entities." Redacted Report 2-3.

In 2019, PMH increased its liabilities by selling certain of its hospital real estate assets in California, Connecticut, and Pennsylvania, and then leasing them back.[8] *Id.* at 9. Proceeds from this "sale/lease-back" transaction were used to pay debt assumed in 2018. PYA Report 15. Also in 2019, PMH entered into a promissory note (the "TRS" note) and received approximately $113 million. *Id.* at 11. According to the terms of that note, if it matured without being paid or renegotiated, the Rhode Island Hospitals would have been subject to a sale/lease-back.[9] *Id.*

Since 2019, PMH has assumed additional debt that is significant to the review by and Decision of the Attorney General. Specifically, PMH received approximately $276 million in federal funds under the CARES Act as advances on Medicare reimbursement, which will be recouped by the federal government from Medicare reimbursements due to the hospitals under the

[8] PMH FY2018 & 2019 AFS. CIIH16-000942-001003.

[9] The Conditions place upon this Approval have eliminated sale of the Rhode Island Hospitals as a means of satisfying this Note for at least the next five (5) years. In any event, such a transaction would constitute a conversion and could not proceed unless approved by the Attorney General. *See* R.I. Gen. Laws § 23-17.14-4(6).

Confidential LGP-SBC-000000830

Centers for Medicare and Medicaid Services ("CMS"), under CMS's Accelerated and Advance Payment Program or Medicare Advance Payment Program (the "MAAP Program"). *Id.* at 16. $27.5 million of these "MAAP" funds are due to be recouped from the Rhode Island Hospitals. *Id.* at 9.

Both financial experts who evaluated the Proposed Transaction[10] for the State of Rhode Island, Redacted for the Attorney General and PYA for DOH, discuss PMH's financial decisions dating back to 2018 as relevant to Prospect's current financial status. PYA concludes: "These patterns in operational performance and recapitalization are relevant because PMH has somewhat limited ability, in the form of current liquidity especially after recoupment of MAAP funds, to weather additional or continued financial challenges. *Id.* at 16, *see also* Redacted Report 11-12.

This Decision is also based on a review of decisions by the relevant boards of directors, in light of the multiple board-specific criteria set forth in the HCA. The Attorney General notes a theme of transparency in these criteria. That is, the HCA criteria direct a probing of conversion-related decisions that should provide the opportunity to test assumptions and expectations that will ultimately come to roost on the involved Rhode Island Hospitals. Here, the Transacting Parties employed no objective criteria, no outside or independent consultants, and no discernible analyses in the process of deciding upon the transaction we review. These decisions by the Transacting Parties are concerning to the Attorney General and further support conditions which will protect the Rhode Island Hospitals going forward.

Finally, and again in accord with the Attorney General's statutory duties under the HCA, the character, competence, commitment, and standing in the community of the Transacting Parties

[10] "Proposed Transaction" is defined in Section II below.

Confidential LGP-SBC-000000831

was reviewed. For this purpose, the Attorney General took into account the matters discussed above as well as reports from people 'on the ground' at these hospitals. The Transacting Parties financial decisions and choices remain a decisive factor, revealing as they do a focus on wealth that puts at risk the well-being of institutions and people who communities in five states rely upon for care, often (as is the case with healthcare) at the time of greatest need. These 'character' criteria likewise informed the Conditions which the Attorney General imposes in this Decision.

Approval of a transaction that permits a 60% owner to exit a system of safety-net hospitals, when that system includes two key healthcare institutions in our State, gives this Attorney General great pause when that owner has realized hundreds of millions of dollars and would leave behind a system that is highly leveraged, that is, where liabilities greatly exceed assets. However, to permit that owner to remain would, in effect, maintain the status quo and would in no way protect these Rhode Island Hospitals in the long term nor "[a]ssure the viability of a safe, accessible and affordable healthcare system that is available to all of the citizens of the state." R.I. Gen. Laws §23-17.14-3(1). And it is that purpose the Attorney General is directed to pursue. Therefore, the Attorney General has concluded that the transaction can proceed only if the following Conditions are met – conditions imposed to assure financially secure, continually operating, and better governed healthcare institutions here in Rhode Island, subject to effective monitoring to the full extent of the Attorney General's statutory authority.

For reasons set forth more fully herein, the Attorney General is issuing a DECISION TO APPROVE WITH CONDITIONS, which Conditions include (but are not limited to) requirements that Prospect and Leonard Green: (1) immediately set aside $80 million in either escrow or letter of credit for the sole benefit of the Rhode Island Hospitals, payable at closing, which funds can only be accessed if PMH fails to comply with Conditions requiring payment of operating losses

Confidential LGP-SBC-000000832

and capital expenditures, or in the event of insolvency; (2) pay all operating losses over the next five (5) years; (3) invest $72 million in capital expenditures through the end of fiscal year 2026 based on the schedule set forth in the Conditions below (at a minimum of $10 million each year); (4) forego any management fees; (5) amend the TRS Note to extend its maturity date and remove the sale/leaseback option for the Rhode Island Hospitals during such an extension, and thereafter only with the approval of the Attorney General; (6) assume payment of the MAAP and PACE liabilities of the Rhode Island Hospitals; (7) maintain essential health services throughout the PCC System; (8) take actions to reform Board practices and constitute the local Board with community members; and (9) provide monitoring and reporting to the Attorney General to ensure oversight and compliance with all Conditions.

II. BACKGROUND

A review under the Hospital Conversions Act begins with the filing of an initial application with the Attorney General and DOH. The parties filed their initial application ("Initial Application") with the Attorney General on December 13, 2019 (resubmitted on February 4, 2020). The parties (collectively, "Transacting Parties") to the Initial Application are identified below:

- **Chamber Inc.** ("Chamber") is a Delaware corporation. Chamber is a newly formed entity that will become the parent of IIH after the close of the Proposed Transaction. The two shareholders of Chamber will be Samuel Lee ("Lee") and David Topper, through his family trust, ("Topper").

- **Ivy Holdings Inc.** ("Ivy") is a Delaware corporation and the current parent of IIH and will remain the parent of IIH after the close of the Proposed Transaction. Ivy current shareholders are Green Equity Investors V, L.P. Green Equity Investor Side V, L.P. (together, "Leonard Green"), Lee, Topper, and less than 10% minority shareholders.

- **Ivy Intermediate Holding Inc.** ("IIH") is a Delaware corporation and the current parent of PMH and will remain the parent of PMH after the close of the Proposed Transaction.

Confidential LGP-SBC-000000833

care entities and manages the provision of health care service for managed care enrollees through its network of specialists and primary care physicians.

- **Prospect East Holdings, Inc.** ("Prospect East") a Delaware corporation which is a wholly-owned subsidiary of PMH. Prospect East holds PMH's interest in Prospect CharterCARE, LLC.

- **Prospect East Hospital Advisory Services, LLC** ("Prospect Advisory"), a Delaware limited liability company, which is a wholly-owned subsidiary of PMH. Prospect Advisory oversees and assists in the management of the day-to-day operations of Prospect CharterCARE, LLC.

- **Prospect CharterCARE, LLC**, ("PCC or Prospect CharterCARE") a Rhode Island limited liability company, which will own the entities that own and operate and hold licensure for the hospitals, RWMC and OLF. Prospect CharterCARE, LLC is currently owned 85% by Prospect East and 15% by CharterCARE Community Board ("CCCB"), however, a buy-out of CCCB's interest by PCC is contemplated as more fully described below.

- **Prospect CharterCARE RWMC, LLC** ("RWMC"), is a Rhode Island limited liability company, which owns and hold the licensure for Roger Williams Medical Center. RWMC is wholly-owned by Prospect CharterCARE, LLC. RWMC is a 220-bed acute care, community hospital located in Providence, Rhode Island.

- **Prospect CharterCARE SJHSRI, LLC** ("OLF") is a Rhode Island limited liability company, which owns and holds the licensure for Our Lady of Fatima Hospital. Fatima is wholly-owned by Prospect CharterCARE, LLC. Fatima is a 278-bed acute care, community hospital located in North Providence, Rhode Island.

See Response to Initial Application Question 1, Tab 6 and Appendix A (Organizational Charts pre- and post-transaction).

In its simplest form, the structure of the transaction outlined in the Initial Application (the "Proposed Transaction") is a buy-out of Leonard Green and the minority shareholders (approximately 60% the company) by Lee and Topper (the current approximately 40% owner) for a total of $11,940,992.00 for their shares. *See* Appendices A & B.

Confidential LGP-SBC-000000834

III. REVIEW CRITERIA

The Attorney General has the statutory duty and authority under the Hospital Conversions Act, R.I. Gen. Laws § 23-17.14-1, *et seq.* to:

- Review a conversion as defined by the HCA and as proposed by the Transacting Parties; and
- Issue a Decision that shall
- Approve, Disapprove, or Approve with Conditions.

The application of this statutory duty and authority in the context of this for-profit conversion directs a review pursuant to an established process, *see id.* § 23-17.14-28(c), and § 23-17.14-3, and a development of Conditions that relate to the purpose of the HCA, *see id.* § 23-17.14-28(c), as discussed below.

The HCA states that "[a]ny approval of a conversion involving a for-profit corporation as an acquiror shall be subject to any conditions as determined by the attorney general, provided those conditions relate to the purpose of this chapter." *Id.* § 23-17.14-28(c). The statute also says that these conditions "may include, but not be limited to, the acquiror's adherence to a minimum investment to protect the assets, financial health, and well-being of the new hospital and for community benefit." *Id.*

The conversion currently under review involves a "for-profit corporation as an acquiror," namely, Chamber Inc. Hospital Conversion Application 1, *see id.* § 23-17.14-4(2) ("'Acquiror' means the person or persons which gain(s) an ownership or control in the new hospital as a result of a conversion . . . ."). According to Section 23-17.14-28(c), this conversion is therefore "subject to any conditions as determined by the attorney general, provided those conditions relate to the purpose of this chapter." The purpose of the HCA is, *inter alia*, to:

Confidential LGP-SBC-000000835

> (1) Assure the viability of a safe, accessible and affordable healthcare system that is available to all of the citizens of the state;
>
> (2) To establish a process to review whether for-profit hospitals will maintain, enhance, or disrupt the delivery of healthcare in the state and to monitor hospital performance to assure that standards for community benefits continue to be met;
>
> (3) To establish a review process and criteria for review of hospital conversions . . . .

Id. § 23-17.14-3.

This purpose has, as required by Section 23-17.14-28(c), guided the Attorney General's review of the Proposed Transaction. To ensure that the conditions the Attorney General imposes on its approval of this conversion "relate to the purpose of [the HCA]," the Attorney General has reviewed the entire record using the criteria found in the HCA that pertain to for-profit hospitals. These criteria are located at R.I. Gen. Laws Section 23-17.14-7(c), specifically its subsections (3)–(9), (11)–(18), (20)–(25), and (27)–(30).[11] They are:

> (3) Whether the board established appropriate criteria in deciding to pursue a conversion in relation to carrying out its mission and purposes;
>
> (4) Whether the board formulated and issued appropriate requests for proposals in pursuing a conversion;
>
> (5) Whether the board considered the proposed conversion as the only alternative or as the best alternative in carrying out its mission and purposes;
>
> (6) Whether any conflict of interest exists concerning the proposed conversion relative to members of the board, officers, directors, senior management, experts or consultants engaged in connection with the proposed conversion including, but not limited to, attorneys, accountants, investment bankers, actuaries, health care experts, or industry analysts;
>
> (7) Whether individuals described in subdivision (c)(6) were provided with contracts or consulting agreements or arrangements which included pecuniary

[11] Subsections (1), (2), (10), (19), and (26) regard charitable assets and other concerns related to non-profits. Because all Transacting Parties are for-profit entities and do not maintain charitable assets, these conditions were not applicable to the Attorney General's review. These criteria are included in Section 7 to apply in the event a for-profit entity purchases a non-profit hospital, which is not the case here.

Confidential LGP-SBC-000000836

rewards based in whole, or in part on the contingency of the completion of the conversion;

(8) Whether the board exercised due care in engaging consultants with the appropriate level of independence, education, and experience in similar conversions;

(9) Whether the board exercised due care in accepting assumptions and conclusions provided by consultants engaged to assist in the proposed conversion;

…

(11) Whether the board exposed an inappropriate amount of assets by accepting in exchange for the proposed conversion future or contingent value based upon success of the new hospital;

(12) Whether officers, directors, board members or senior management will receive future contracts in existing, new, or affiliated hospital or foundations;

(13) Whether any members of the board will retain any authority in the new hospital;

(14) Whether the board accepted fair consideration and value for any management contracts made part of the proposed conversion;

(15) Whether individual officers, directors, board members or senior management engaged legal counsel to consider their individual rights or duties in acting in their capacity as a fiduciary in connection with the proposed conversion;

(16) Whether the proposed conversion results in an abandonment of the original purposes of the existing hospital or whether a resulting entity will depart from the traditional purposes and mission of the existing hospital such that a cy pres proceeding would be necessary;

(17) Whether the proposed conversion contemplates the appropriate and reasonable fair market value;

(18) Whether the proposed conversion was based upon appropriate valuation methods including, but not limited to, market approach, third party report or fairness opinion;

…

(20) Whether the conversion is proper under applicable state tax code provisions;

(21) Whether the proposed conversion jeopardizes the tax status of the existing hospital;

(22) Whether the individuals who represented the existing hospital in negotiations avoided conflicts of interest;

Confidential LGP-SBC-000000837

(23) Whether officers, board members, directors, or senior management deliberately acted or failed to act in a manner that impacted negatively on the value or purchase price;

(24) Whether the formula used in determining the value of the existing hospital was appropriate and reasonable which may include, but not be limited to factors such as: the multiple factor applied to the "EBITDA" – earnings before interest, taxes, depreciation, and amortization; the time period of the evaluation; price/earnings multiples; the projected efficiency differences between the existing hospital and the new hospital; and the historic value of any tax exemptions granted to the existing hospital;

(25) Whether the proposed conversion appropriately provides for the disposition of proceeds of the conversion that may include, but not be limited to:

(i) Whether an existing entity or a new entity will receive the proceeds;

(ii) Whether appropriate tax status implications of the entity receiving the proceeds have been considered;

(iii) Whether the mission statement and program agenda will be or should be closely related with the purposes of the mission of the existing hospital;

(iv) Whether any conflicts of interest arise in the proposed handling of the conversion's proceeds;

(v) Whether the bylaws and articles of incorporation have been prepared for the new entity;

(vi) Whether the board of any new or continuing entity will be independent from the new hospital;

(vii) Whether the method for selecting board members, staff, and consultants is appropriate;

(viii) Whether the board will comprise an appropriate number of individuals with experience in pertinent areas such as foundations, health care, business, labor, community programs, financial management, legal, accounting, grant making, and public members representing diverse ethnic populations and the interests of the affected community; and

(ix) Whether the size of the board and proposed length of board terms are sufficient;

…

(27) Whether a right of first refusal to repurchase the assets has been retained;

(28) Whether the character, commitment, competence and standing in the community, or any other communities served by the transacting parties are satisfactory;

Confidential LGP-SBC-000000838

(29) Whether a control premium is an appropriate component of the proposed conversion; and

(30) Whether the value of assets factored in the conversion is based on past performance or future potential performance.

An application of these criteria to this conversion was also necessary to the Attorney General's identification of those facts in the record material to the Attorney General's statutory mandate to "subject [this conversion] to any conditions [that] . . . relate to the purpose of this chapter." *Id.* § 23-17.14-28(c). That is to say, the identified criteria provided the Attorney General the requisite lens with which to view the record, assuring that all the Conditions imposed herein relate to the HCA's purpose, as required by Section 23-17.14-28(c).

The Attorney General's authority under the HCA includes the authority to "adopt rules and regulations to accomplish the purpose of this chapter." R.I. Gen. Laws § 23-17.14-32. This authority is relevant to the Attorney General's construction of the HCA provisions discussed above and elsewhere in this Decision. The construction of various HCA provisions is also provided with an awareness that Rhode Island law "accord[s] great deference to an agency's interpretation of its rules and regulations and its governing statutes, provided that the agency's construction is neither clearly erroneous nor unauthorized." *Endoscopy Assocs., Inc. v. R.I. Dep't of Health*, 183 A.3d 528, 533 (R.I. 2018).[12]

IV. RECORD

The record the Attorney General reviewed and considered in rendering this Decision includes the Transacting Parties' Initial Application; supplemental responses and information

[12] As the seat of the Office of Health Care Advocate, the Attorney General also has the power "[t]o take all necessary and appropriate action . . . to secure and insure compliance with the provisions of title[] 23," which includes the HCA. *Id.* § 42-9.1-2(a)(5).

Confidential LGP-SBC-000000839

provided thereto; and relevant, publicly available information. Also included in the record are the statements under oath taken by the Attorney General and DOH of the following individuals:

Prospect CharterCARE

1. [redacted] CEO of Prospect CharterCARE
2. [redacted], CFO of Prospect CharterCARE
3. [redacted], Vice President of Finance Operations, Prospect CharterCARE
4. [redacted] RN, Chief Nursing Officer - OLF
5. [redacted], DNP, RN, CENP, NEA-BC, Chief Nursing Officer - RWMC
6. [redacted] Prospect CharterCARE - former PCC Category A board member
7. [redacted] Esq., Prospect CharterCARE -former PCC Category A board member
8. [redacted] MD, Prospect CharterCARE former PCC Category A board member
9. [redacted], Prospect CharterCARE - former PCC Category A board member

Prospect Medical Holdings[13]

10. Samuel Lee, CEO of Prospect Medical Holdings
11. David Topper, Senior Vice President, Prospect Medical Holdings
12. Mark Johnson, CFO of Prospect Medical Holdings
13. George Pillari, Senior Vice President of Integration and Operations of Prospect Medical Holdings

Leonard Green

14. Alyse Wagner, Partner, Leonard Green
15. John Baumer, Partner, Leonard Green

United Nurses & Allied Professionals ("UNAP")

16. Redacted General Counsel, UNAP

The record, moreover, includes comments submitted during the public informational meeting required by the HCA. *See* R.I. Gen. Laws § 23-17.14-7(b)(3)(iv). A public notice was published regarding this informational meeting, as well as a solicitation of written comments

Confidential LGP-SBC-000000840

regarding the Proposed Transaction. The Attorney General and DOH jointly held this meeting, virtually via Zoom, on December 10, 2020, from 5 p.m. to 7 p.m.[14] At the beginning of the session, the Transacting Parties were provided an opportunity to give a presentation regarding the Proposed Transaction; afterwards, public comment was taken. Over the course of the meeting, 17 speakers provided public comment.

V. PROCEDURAL HISTORY

Hospital conversions involving RWMC and OLF have been approved by the Attorney General twice before. In 2009, RWMC and OLF (St. Joseph Health System of Rhode Island at the time) affiliated through the creation of CharterCARE Health Partners ("CCHP"). See Attorney General HCA Decision dated October 28, 2009 ("2009 Decision"). Both hospitals were suffering losses at the time, and the purpose of the affiliation was to stem those losses through efficiencies in a combined system. *Id.* at 15-16. The affiliation was approved, with conditions, by Attorney General Patrick Lynch in 2009. *Id.*

Despite the efficiencies achieved through the CCHP affiliation, the system was still struggling with significant operating losses, aging plants, and capital needs. *See* Attorney General HCA Decision dated May 16, 2014 at 7 ("2014 Decision"). In 2011, CCHP began looking for a partner. *Id.* at 9. Ultimately, CCHP selected PMH and contemplated a joint venture whereby PMH owned 85% and CCHP owned 15% of the newly-formed joint venture, called Prospect CharterCARE. *Id.* at 3. The governing structure of the new entity was split equally—50% of the PCC board is appointed by PMH's ownership interest and 50% is appointed by CCHP's ownership interest. *Id.* Importantly, this transaction contemplated a $50 million long-term

[14]The meeting took place virtually because, at the time, CDC Guidelines did not allow for in-person meetings, on account of the COVID-19 pandemic.

Confidential LGP-SBC-000000841

capital commitment[15] to be funded directly by PMH and an annual $10 million routine commitment by PCC. *Id.* at 21. The joint venture was approved, with conditions, by Attorney General Peter F. Kilmartin in 2014. *Id.*

Prospect CharterCARE operates two hospitals in Rhode Island, RWMC and OLF. Prospect CharterCARE also operates a number of other non-hospital healthcare facilities in Rhode Island. Prospect, the ultimate parent company to the 85% owner of PCC, operates 17 hospitals in 5 states, as well as many non-hospital healthcare facilities. Prospect was formed in 1996 and started with hospitals in California. Since 2014, Prospect has expanded outside of California to Rhode Island, Connecticut, Pennsylvania, Texas, and New Jersey.[16]

In the years following the 2014 transaction, the Attorney General monitored compliance with the conditions by Prospect, CCHP, and the CharterCARE Foundation through an independent monitor, Affiliated Monitors Inc. ("AMI"). Overall, AMI found that Prospect was compliant. *See* AMI First Report on Compliance by Prospect CharterCARE, CharterCARE Community Board, and CharterCARE Foundation with Conditions of Certification Pertaining to the Acquisition of Roger Williams Medical Center, St. Joseph Health Services of Rhode Island, Our Lady of Fatima Hospital and Other Entities dated December 20, 2018 ("AMI First Report"); AMI Second Interim Report on Compliance by Prospect CharterCARE, CharterCARE Community Board, and CharterCARE Foundation with Conditions of Certification Pertaining to the Acquisition of Roger Williams Medical Center, St. Joseph Health Services of Rhode Island, Our Lady of Fatima Hospital and Other Entities dated March 20, 2020 ("AMI Second Report"); AMI Final Report on Compli-

[15] This amount was later increased to approximately $62 million after the sale of Elmhurst Rehab & Healthcare Center and some of smaller properties. A more complete explanation of this matter is provided in AMI's Final Report on Compliance dated December 23, 2020.

[16] Prospect has since closed the hospitals in Texas and is in the process of selling the New Jersey hospital.

Confidential LGP-SBC-000000842

ance by Prospect CharterCARE, CharterCARE Community Board, and CharterCARE Foundation with Conditions of Certification Pertaining to the Acquisition of Roger Williams Medical Center, St. Joseph Health Services of Rhode Island, Our Lady of Fatima Hospital and Other Entities dated December 23, 2020 ("AMI Final Report"). However, it was often difficult to timely receive information, and AMI noted "the entity did not seem to be focused on collecting and organizing the information necessary to demonstrate its compliance with the conditions set forth in the HCA Decision until pressed by the Attorney General." *See* AMI Second Report at 26. Late last year, AMI concluded its monitoring of Prospect's financial commitments and found that overall Prospect had spent $63,815,932.22 on long-term capital expenditures and PCC had spent $51,398,707.77 during the four-year monitoring period for routine expenses. *See* AMI Final Report at 35.

However, through this review, the Attorney General discovered that RWMC and OLF subsequently entered into Property Assessed Clean Energy ("PACE")[17] financing agreements totaling approximately $60 million. The financing attaches to the respective property as a tax lien—essentially an encumbrance on the property. The PACE financing funds completed in-flight and new projects. [redacted]. Ison SUO 110:18-111:6, March 15, 2021. This is problematic, as loans taken out by PMH remain as liens on the Rhode Island Hospitals, a matter addressed by the Conditions imposed by this Decision.

Another issue that emerged in the first years after the 2014 transaction was the St. Joseph Health System's pension liability. This pension liability was a looming concern for CCHP when it pursued a partner in 2011. *See* 2014 Decision at 9. In 2017, the severely underfunded St. Joseph's

[17] The PACE program provides financing for clean and renewable energy improvements.

Confidential LGP-SBC-000000843

pension went into receivership. *See St. Joseph Health Services of Rhode Island, Inc. v. St. Josephs Health Services of Rhode Island Retirement Plan, as amended,* PC-2017-3865 (R.I Super. Ct 2017). While the pension was not assumed by Prospect as part of the PCC joint venture, litigation ensued with a number of claims—including fraud and misrepresentation—asserted against PMH, Leonard Green, and others regarding the handling of the pension. Ultimately, a settlement was reached, after years of contentious litigation. PMH agreed to a payment of $27,250,000 with no admission of liability.

In the fall of 2019, the Attorney General was notified of the Proposed Transaction, which is described as a buy-out of the private equity investor, Leonard Green & Partners ("Leonard Green"). Initial Application Response to Question 1. The ultimate parent company, Ivy Holdings Inc., would undergo a change of ownership. Ivy is a holding company that owns PMH. Approximately 60% of Ivy is currently owned by Leonard Green and most of the remaining, approximately 40%, is currently owned by the CEO of PMH, Sam Lee, and another its executives, David Topper. The Proposed Transaction consists of Lee and Topper creating a new entity, Chamber Inc., that will take full control of Ivy, PMH, and, by extension, RWMC and OLF. In other words, Lee and Topper will come to own 100% of Ivy and PMH by buying out Leonard Green's share for approximately $12 million. *Id.*

Leonard Green initially invested in PMH in 2010 in a "going private" transaction by purchasing a majority of PMH's then-publicly traded shares for approximately $150 million and assuming PMH's liabilities (although Leonard Green never paid those liabilities). *See* Supplemental Response S5-3; *see also* Baumer SUO I 102:5-11, February 9, 2021. Since then, Leonard Green has held a majority of the board seats on Prospect and Ivy—[redacted]. *See* Wagner SUO I 26:25-27:5; 28:2-4, February 8,

Confidential LGP-SBC-000000844

2021; Baumer SUO I 35:19-36:14. The impetus for the Proposed Transaction is that the Leonard Green wants to divest its investment in Prospect. *See* Wagner I 88:10–25; *id.* at 89:25–90:10. This investment has had a significant return: in 2018 alone, Prospect shareholders received $457 million in dividends, most of which went to Leonard Green. Baumer SUO I at 93:7–17.

An Initial Application was submitted by the Transacting Parties on December 13, 2019 and resubmitted on February 4, 2020. On March 4, 2020, the Attorney General informed the Transacting Parties that there were deficiencies to the Initial Application and requested additional information. On March 25, 2020, the Attorney General received a letter addressing the deficiencies within the Initial Application. Thereafter, on April 8, 2020, the Attorney General and DOH issued the Transacting Parties a notice of completeness letter, starting the 120-day review process. During the review, 7 sets of Supplemental Questions consisting of 279 questions were sent to and responded to by the Transacting Parties.

Three months into the initial 120-days, it became clear to both the Attorney General and DOH that this review would not be complete—healthcare was changing as a result of the COVID-19 global pandemic, the parties had delayed providing relevant information, and there were still many unanswered questions related to the purchase price and other impacts of the Proposed Transaction. *See* Joint Attorney General & DOH Letter to Transacting Parties dated July 3, 2020. On July 3, 2020, the Attorney General and DOH notified the Transacting Parties that the decision deadline would be extended by 90 days. *Id.* As the months unfolded, it became clear to the Attorney General and DOH that they would need additional time to complete a thorough review of the Proposed Transaction, so they notified the Transacting Parties on October 20, 2020 that the decision deadline would be extended to January 29, 2021. *See* Joint Attorney General & DOH Letter to Transacting Parties dated October 20, 2020. On January 18, 2021, the Attorney General

Confidential LGP-SBC-000000845

and DOH again informed the Transacting Parties that the deadline would need to be extended and no new date was provided. *See* Joint Attorney General & DOH Letter to Transacting Parties dated January 18, 2021. This extra time was necessary to complete a thorough and robust review of the Proposed Transaction.

VI. DISCUSSION

As outlined above, the review criteria contained in the Hospital Conversions Act applicable to the Proposed Transaction are found at R.I. Gen. Laws Section 23-17.14-7(c). For organizational purposes we have addressed them grouped by topic below.

A. FINANCIAL CRITERIA

The following section discusses the financial criteria and conditions applicable to the HCA conversion under review.

The first group of these concern the value of the proposed transaction, *see* R.I Gen. Laws § 23-17.14-7 (c)(17), (18), (24); the second group consider the Transacting Parties' financial decisions and how those decisions affected both the Proposed Transaction's value, *see id.* § 23-17.14-7 (c)(23), as well as the Attorney General's decision to impose financial Conditions on its approval of the Proposed Transaction, *see id.* § 23-17.14-28(c). As with the other criteria discussed in this Decision, the Attorney General addresses these criteria and conditions upon consideration of the entire record before it.

1. Value of the Transaction

As it reviewed the Proposed Transaction, the Attorney General considered whether its value is one that is fair and that has been reasonably derived. In particular, R.I Gen. Laws Sections 23-17.14-7 (c)(17), (18), and (24) ask the Attorney General to consider the following:

> (17) Whether the proposed conversion contemplates the appropriate and reasonable fair market value;

Confidential LGP-SBC-000000846

> (18) Whether the proposed conversion was based upon appropriate valuation methods including, but not limited to, market approach, third-party report, or fairness opinion;
>
> (24) Whether the formula used in determining the value of the existing hospital was appropriate and reasonable . . . .

The Attorney General considers these criteria to set an expectation that the value of a proposed conversion will be capable of objective review by a regulator through examination of valuation methods, outside opinions, and valuation formulas. It is important to note at the outset that no objective valuation methods were used by the Transacting Parties. *See* Response to Initial Application Question 23.

The Proposed Transaction contemplates Lee and Topper (through his family trust) buying out Leonard Green's current ~60% stake in PMH's holding company, Ivy Holdings Inc., as well as that of various minority shareholders'. Response to Initial Application Questions 1–2; Redacted Report 1–2; PYA Report 22. Lee and Topper plan to pay Leonard Green and the other shareholders a total of $11,940,992.00 for their shares.[18] Response to Initial Application Question 1. But rather than use their own money to facilitate the transaction, Lee and Topper anticipate taking the $11.9 million out of PMH to secure the buyout. Redacted Report 1–2. In addition to the cash consideration, Leonard Green will benefit from the Proposed Transaction by being relieved of its responsibility for PMH's approximately $3.1 billion in current liabilities. PYA Report 18.

The valuation of the Proposed Transaction's concerns the Attorney General for many reasons, the first of which is the source of its $11.9 million capital cost. The Transacting Parties' testimony on this point evinced a willingness to conflate PMH's assets with the individual assets

[18] Pursuant to Condition 1, "$10,000,000 payable to Leonard Green pursuant to the Merger Agreement shall be contributed by Leonard Green to the funding of the Escrow Accounts set forth in Condition 6."

Confidential LGP-SBC-000000847

of Lee and Topper. The protection and treatment of assets of a safety-net hospital system should be viewed differently from an individual's own wealth.[19] [redacted]." Topper SUO 158:14–15, Dec. 16, 2020. [redacted]." Lee SUO I 124:6–7, Feb. 25, 2021. From Leonard Green's perspective, [redacted] Baumer SUO I 126:25–14. [redacted] Wagner SUO I 171:2–9, Feb. 8, 2021. Such testimony reveals a troubling perspective held by the Transacting Parties and Leonard Green, namely, that no difference exists between the money belonging to a company that operates over a dozen safety-net hospitals and the money located in the personal bank accounts and investment vehicles of Lee and Topper.

Moving to "[w]hether the proposed conversion contemplates the appropriate and reasonable fair market value," R.I Gen. Laws § 23-17.14-7 (c)(17), the Attorney General notes that the $11.9 million price for approximately 60% of PMH is a startingly low sum for a company owning 17 hospitals in 5 states—especially considering that Leonard Green's portion of these shares sold for approximately $150 million in 2010. *See* Baumer SUO I 101:15-102:11. If credited, this marks a 92% loss in PMH's value in just over a decade, and indicates that PMH is now worth, in total, around just $20 million. Redacted Report 2. Such a precipitous drop is at least in part a function of the debt burden Leonard Green and Lee participated in placing on PMH in 2018 to pay a $457 million dividend benefiting themselves and other shareholders. *See* Lee SUO I 120:11–19. But

[19] Noteworthy is the fact that neither Lee nor Topper consider the company's $3 billion in liabilities as their individual obligation.

Confidential LGP-SBC-000000848

even with PMH's significant debt, there are indications that the company is worth more than its principals acknowledge; in November 2019, the chief executive at another healthcare company, Prime Healthcare Services ("Prime"), offered $50 million for PMH. *See, e.g.*, Howard Fine, *Prospect Fights Hostile Offer*, L.A. Bus. J., Dec. 6, 2019, https://labusinessjournal.com/news/2019/dec/06/prospect-fights-hostile-offer/. [redacted] Lee SUO I 118:2-13.

Aside from comments regarding Prime's offer, the Transacting Parties have provided the Attorney General nothing to substantiate the $11.9 million capital cost. Response to Initial Application Question 23 ("[N]o reports were prepared in connection with the negotiations and ultimate execution of the transaction agreement."); *see* Redacted Report 2 ("[W]e have no way of determining if the $12 million acquisition price is fair and reasonable."). They failed to subject the sale to the valuation methods mentioned Section 23-17.14-7 (c)(18), i.e., a "market approach, third-party report, or fairness opinion." *See* Lee SUO I 120:2–6 [redacted] According to Sam Lee's testimony, [redacted] Lee SUO I 118:2–13.

Rather than by the methods statutorily recognized in Section 23-17.14-7 (c)(18), $11.9 million was a number arrived at via [redacted] Pillari SUO 51:12–16; 56:23–57:1; March 22, 2021; Baumer SUO I 119:7–15. [redacted] *See* Wagner SUO I 127:6–129:7. [redacted]

[redacted] *Id.* And Wagner believes [redacted] *Id.* Leonard Green also looked to [redacted] Baumer SUO I 109:5–17. [redacted] Again, this [redacted] falls far short of the independent and objective methods contemplated by the Hospital Conversions Act.

Given the foregoing, the Attorney General determines that the HCA criteria concerning valuation have not been met. No objective measures of valuation were employed to arrive at the sale price for 60% of the company. Any claim that the Proposed Transaction "contemplates the appropriate and reasonable fair market value" of PMH is belied by [redacted] Moreover, executives at both PMH and Leonard Green indicated that neither a "market approach, third-party report, [n]or [a] fairness opinion" were undertaken to substantiate the proposed value of PMH. The Transacting Parties' insistence on evasion and mystification in response to inquiries into valuation—Baumer's testimony, for example, [redacted]," Baumer SUO 109:9–17—means the Attorney General cannot say that the Transacting Parties used "appropriate valuation methods" or that "the formula used in determining the value of [PMH] was appropriate and reasonable."

2. Further Predicates for Financial Conditions

Other of the Transacting Parties' financial decisions are relevant to the Attorney General's HCA review when viewed through the lens of the following two applicable statutory sections:

Confidential LGP-SBC-000000850

> Whether officers, board members, directors, or senior management deliberately acted or failed to act in a manner that impacted negatively on the value or purchase price.[20]
>
> ...
>
> Any approval of a conversion involving a for-profit corporation as an acquiror shall be subject to any conditions as determined by the attorney general, provided those conditions relate to the purposes of this chapter. The conditions may include, but not be limited to, the acquiror's adherence to a minimum investment to protect the assets, financial health, and well-being of the new hospital and for community benefit.

R.I. Gen. Laws § 23-17.14-7(c)(23); 23-17.14-28(c).

a. PMH's Relationship to the Rhode Island Hospitals

Founded in 1996, PMH currently owns 17 hospitals in 5 states. These include RWMC and OLF, both of which PMH purchased in mid-2014. PMH FY2020 AFS 15; *see generally* 2014 Decision. Although intermediate entities exist between PMH and the Rhode Island Hospitals, PMH is the company to whose financial fortunes the Rhode Island Hospitals are most tethered: PMH deploys its standard practice through which [redacted] Johnson SUO 94:11–95:1, [redacted] *id.*; the Rhode Island Hospitals' [redacted] Johnson SUO 35:18–36:12; [redacted] *see id.* at 95:5–22; Lee

[20] Both Lee and Baumer admitted as much under oath: When the Attorney General asked Lee [redacted] Lee SUO I 120:11–14. And he provided the following explanation: [redacted] Lee SUO I 120:16–19. In other words, [redacted] Lee SUO I 121:14–15. Mr. Baumer [redacted] Baumer SUO I 109:23–110:6. The $457-million, debt-financed shareholder dividend and this testimony regarding same is sufficient evidence to support the Attorney General's conclusion that PMH's board "deliberately acted or failed to act in a manner that impacted negatively on the value or purchase price." R.I. Gen. Laws § 23-17.14-7(c)(23). This criterion has not been satisfied.

SUO I 141:22–142:1. *See* Topper SUO 116:23–117:4; Redacted Report 3 ("PMH manages all cash flow and determines what items will be paid and when they will be paid."). Despite its dependence on PMH, PCC's CFO testified that he has no access to and has never seen PMH's financial statements. Ragosta SUO I 31:20–32:1 Dec. 14, 2020; *see also* DiStefano SUO 96:11–18, Nov. 9, 2020 ("I have never seen a financial statement from [PMH], at least not maybe since 2014.").

This difference PMH has had to make up between the Rhode Island Hospitals' revenue and expenses has not been insignificant: Between Fiscal Year 2015 and Fiscal Year 2019, the cumulative loss experienced by RWMC was $16.6 million. Redacted Report 5. That number for OLF was $8.7 million. *Id.* at 3. RWMC and OLF's local parent company, PCC, has run even further in the red, having lost a cumulative $88.2 million from Fiscal Year 2015 to Fiscal Year 2020. *Id.* at 6. These deficits are why auditors for RWMC, OLF, and PCC have repeatedly stated that they are "financially dependent on [their] parent company." *Id.* 4, 5–7 ("[PCC]" is not substantially viable without support from PMH."); *see* PCC FY2020 AFS ("As of September 30, 2020, the Company had a receivable of approximately $32 million due from PMH and its subsidiaries . . . and the Company is dependent on this receivable settling in order to maintain its current liquidity."). The average annual amount that PMH has contributed to the Rhode Island Hospitals over and above what the Rhode Island Hospitals themselves earned in revenue is $14.7 million.[21] There seem to be no signs that this need will soon abate: PCC's vice president of finance operations, Daniel Ison, testified [redacted] Ison SUO 175:20–176:22.

[21] This total number includes a management fee with a yearly average of $6,977,000. *See* PCC FY2015-2020 AFS. The Attorney General has made it a Condition of this transaction that the management fee be discontinued, which is consistent with the stated plans of the Transacting Parties.

Confidential LGP-SBC-000000852

Whether PMH will continue to subsidize PCC and its Rhode Island Hospitals is a major concern. Topper's testimony on this point was less than reassuring: [redacted] In his words, [redacted] Topper SUO 95:4-16; 103:10-18, 104:22-105:10; 140:25-141:8. Asked, [redacted] Topper answered, [redacted] 103:10-15.[22]

Prospect has made such "hard choices" with respect to other hospital systems it owns. In 2019 and 2020 PMH shuttered Nix Health System in Texas. PMH is currently trying to sell its East Orange General Hospital in New Jersey because [redacted] Topper SUO 104:12–105:10.

The Attorney General asked Topper about his financial commitment to PMH's Rhode Island hospitals in particular. [redacted] Topper SUO 141:5–7. The Attorney General is concerned that the continued financial struggles at PMH's Rhode Island Hospitals—described above and documented in the expert reports—will soon cause PMH to view them as no longer "an investment that is worthwhile." *See* Johnson SUO 146:2–7 Feb. 11, 2021 [redacted] Lee SUO I 83:15–18 [redacted]; Topper SUO 135:15–17 [redacted]

[22] As with other financial conclusions reached by Lee and Topper, most notably the purchase price of ~60% of the company's shares, no objective analyses or benchmarks appear to be relied upon to define the [redacted]

[redacted] The Attorney General is also concerned that without long-term financial planning—PMH's CFO [redacted] Johnson SUO 142:15–143:8—PMH will be left without a turnaround strategy if and when the light starts (or continues) flickering in Rhode Island.

PYA wonders too that "if PCC operations do not improve to a point where they are contributing to the profitability and/or growth of PMH, it remains unclear whether the new board of IH and PMH would continue funding those portfolio investments." PYA Report 19. Of further concern is a situation where the only thing keeping crucial Rhode Island healthcare facilities from being underfunded or closing is Lee and Topper's undefined view of "the numbers." *See* Lee SUO I 132:18–133:8 [redacted] Quinlan SUO 120:22–24, Jan. 7, 2020 (stating that the PCC board of directors had no role in making sure PMH provided the Rhode Island Hospitals with adequate resources).

The relevant financial statements do make clear, however, that PMH has tried to improve "the numbers" at the Rhode Island Hospitals. One of the most effective initiatives in this regard has regrettably been to cut costs by way of reducing the Rhode Island Hospitals' respective workforces: In Fiscal Year 2018, RWMC had 997.86 full-time equivalents, which dropped to 935.21 by the end of Fiscal Year 2019. Change in Effective Control Application of Prospect et al. ("CEC Application") App. A I. During the same time period, the number of full-time equivalents at OLF fell from 990.26 to 926.02. *Id.* App. A II. Eliminating these jobs saved RWMC and OLF 3% and 8% on their respective wage and salary expenditures. *See* PMH FY2018-2019 AFS.

Despite these force reductions, and as mentioned above, [redacted] Ison SUO 175:20-176:11.

PMH has also saved money by failing to cover annual depreciation of the Rhode Island Hospitals' capital: For example, from Fiscal Year 2017 through Fiscal Year 2020, PCC only replaced approximately 66% of the annual depreciated value of its assets. PYA Report 10. *Contra* Lee SUO II 20:18-23, March 9, 2021 (stating that PCC has replaced 100% of depreciated capital). The ideal amount of capital investment is typically closer to 100%. PYA Report 10; *see also* Lee SUO II 20:4–11. [redacted] Johnson SUO 100:13–101:20. The amounts PCC has expended on charity care—0.15% and 0.3% of its operating expenses in Fiscal Year 2019 and Fiscal Year 2020, respectively—is also below some industry standards. PYA Report 10, 14.

b. Overview of PMH's Finances

Money problems have not been limited to PMH's subsidiaries; PMH itself has and continues to struggle financially. *See, e.g.*, PYA Report 19 (explaining that "PMH has reported limited liquidity and a highly leveraged position in recent fiscal years"); Redacted Report 11-12.[23] During the 6-year period from Fiscal Year 2015 to Fiscal Year 2020, the company took a cumulative comprehensive loss of $603 million, and has seen its long-term debt increase from $451 million in Fiscal Year 2015 to almost $1.6 billion in Fiscal Year 2020. *See* Redacted Report 7–9 ("Growth has been primarily funded through debt and the sale-leaseback of certain properties to MPT."). By the end of Fiscal Year 2020, PMH's assets exceeded its liabilities by more than $1

[23] This assessment is not shared by Leonard Green partner Wagner. *See* Wagner SUO I 149:19–21 (claiming that PMH "continues to do . . . very well").

Confidential LGP-SBC-000000855

billion. *Id.* at 8; *see* PYA Report 13 (showing share of liabilities to total assets growing from Fiscal Year 2017 to Fiscal Year 2020).

The company's debt has not been cheap: PMH has had to make approximately $478 million in interest payments from Fiscal Year 2015 through Fiscal Year 2020. *See* Moody's Investor Service, *Rating Action: Moody's places ratings of Prospect Medical Holdings on review for downgrade*, Feb. 12, 2019, https://www.moodys.com/research/Moodys-places-ratings-of-Prospect-Medical-Holdings-on-review-for--PR_395207 (noting that, "[a]t [PMH's] current leverage levels," tens of millions of dollars of California Quality Assurance Fee ("QAF") reimbursement payments "must be used to repay term loan borrowings. As a result, even when QAF payments are received, they will not be a source of ongoing liquidity for the company."). What is more, the company's ballooning debt has not always translated into enough liquidity to pay its bills: In 2019, PMH needed a $41-million capital contribution from Leonard Green, Lee, and Topper. PYA Report 15; *see* Redacted Report 11 ("[PMH] cannot continue to have significant operating losses and fund necessary capital projects and expect to survive long-term."). The accumulated debt has, as discussed below, turned PMH into a highly leveraged concern. *See* Redacted Report 8, 11 ("[PMH's] rapid growth and increase in debt have strained the company's balance sheet. . . . PMH is a highly leveraged company that continues to have large annual losses."); *see also* Moody's Investors Service, *Rating Action: Moody's downgrades Prospect Medical Holdings, Inc.'s CFR to B3; outlook changed to* negative, Mar. 28, 2019, https://www.moodys.com/research/Moodys-downgrades-Prospect-Medical-Holdings-Incs-CFR-to-B3-outlook--PR_397518 (citing PMH's "very high financial leverage, shareholder-friendly financial policies, and a history of failing to meet projections" as reasons for downgrading the company's creditworthiness).

Confidential LGP-SBC-000000856

A considerable portion of the approximately $3.1 billion in liabilities currently on PMH's books is the result of three transactions PMH entered into with Medical Properties Trust, Inc. ("MPT") in 2019. Redacted Report 9. In the first of these, PMH sold its hospitals in Connecticut, Pennsylvania, and all but one of its hospitals in California to MPT for approximately $1.4 billion. *Id.* MPT then leased these hospitals back to PMH. *Id.* PMH, according to its agreement with MPT, will pay rent for at least the next 15 years in order to continue operating in facilities it owned until recently. *Id.* In the second transaction, PMH took out a ~$51 million mortgage on one of its California hospitals; this mortgage is at a 7.5% interest rate per annum and matures in 2034. *Id.* And in the third transaction, PMH signed a promissory note in exchange for $113 million from MPT, referred to herein as the "TRS Note." *Id.* Interest on the note is 7.5% per annum and subject to an annual escalation clause. *Id.* PMH must pay back the full note amount by July 2022. *Id.* Alternatively, and subject to approval by the Attorney General and DOH pursuant to the HCA, PMH could discharge the note by selling to and leasing back the Rhode Island Hospitals from MPT. *Id.* [redacted] *See, e.g.*, Liebman SUO 178:16–18; 179:7–11; 214:24–215:1, Oct. 29, 2020. In their statements under oath, [redacted] *See, e.g.*, Johnson SUO 78:3–10; 79:13–20; Lee SUO I 183:5–9 [redacted]

The Attorney General has addressed this threat to the Rhode Island Hospitals' real estate by prohibiting it from being pledged or used as collateral unless approved by the Attorney General. *See* Conditions 9 and 17. Such prohibition stems from the recognition that the Rhode Island Hospitals' real property, each and together, constitutes a significant proportion of the assets of

Confidential LGP-SBC-000000857

PCC—a finding based upon the fact that the Hospital properties constitute a significant proportion of PCC's real property; that they each and together house and support a significant proportion of the services provided by PCC; and that a significant proportion of PCC's employees work at the Hospitals. The assets of PCC do not include the cash generated by PCC, which is swept up daily to Prospect, making the Rhode Island Hospitals' real property a greater proportion of PCC's assets than it otherwise would be.

In addition to the indebtedness created by the TRS Note, PMH in 2020—when it was no longer subject to the conditions of the 2014 Decision—obtained a $42 million Property Assisted Clean Energy ("PACE") loan to pay for improvements to RWMC. Redacted Report 10. The loan has a 5.75% annual interest rate and is secured by a lien on RWMC itself. *Id.*; PYA Report 11. An $18 million PACE loan with the same rate of interest was taken out in early 2021. Redacted Report 10. This money is for improvements to, and is secured by, a lien on, OLF. Redacted Report 10, PYA Report 11.

PMH recently tapped another temporary source of cash by applying for and receiving money from the federal government pursuant to the Coronavirus Aid, Relief and Economic Security Act ("CARES Act") and the Paycheck Protection Program and Health Care Enhancement Act ("PPPHCE Act"). Redacted Report 10–11. PMH-owned hospitals, including those in Rhode Island, also received relief money from their respective state governments. *Id.* In total, PMH and its affiliates have received approximately $459 million in COVID-19 relief from the federal government. *See* PYA Report 16. Approximately $183 million of this money is a grant to PMH and will not need to be paid back. *Id.* PMH will, however, have to find a way to return approximately $276 million of this government aid over the next 17 months, pursuant to the

MAAP Program. Redacted Report 10-11, PYA Report 16. PCC itself is due to return $27.5 million of the $276 million total. PYA Report 9.

Like the TRS Note, the debts attached to the Rhode Island Hospitals by the PACE and MAAP borrowing are the subject of Conditions imposed pursuant to this Approval with Conditions. In order to ensure the MAAP liability does not remain with the Rhode Island Hospitals in the event of a sale or insolvency, the Conditions require PMH to fund a $27 million escrowto be used if PMH does not make these payments, so that this obligation is never left on the Rhode Island Hospitals. The Financial Conditions further require PMH to assume all payments for the PACE debt while it owns the Hospitals, an obligation also protected by millions of dollars in cash escrow.

c. Leonard Green's Role in PMH

The financial performance of the Rhode Island Hospitals and PMH sketched above has occurred while both have been under the ultimate control of Leonard Green, the company with the largest share of PMH stock and the majority of PMH board seats, *see, e.g.*, Wagner SUO I 37:13–21, and the one which is seeking an exit in this conversion. [redacted] *E.g.*, Wagner SUO I 55:12–57:11. Leonard Green typically uses these funds to buy stakes, some majority others minority, in various companies. Baumer SUO I 96:20–97:24. [redacted] Baumer SUO I 49:10–11; 91:8–12; Wagner SUO I 56:4–6; 97:16–98:23; *see also* Wagner SUO I 35:21–23 [redacted]

A large portion of that return on investment is expected [redacted] *See* Wagner SUO I 88:3–6; 94:15–95:21. The latter method for extracting a return on Leonard Green's investments—used in the case of PMH—is known as a dividend recapitalization. [redacted] Report 2-3; Wagner SUO I 25:7–23, 83:24–84:13; *see* Lee SUO I 66:11–14 [redacted] Leonard Green also makes money by [redacted] *E.g.,* Wagner SUO I 131:6–16; 134:7–135:7.

[redacted] Baumer SUO I 88:20–24. [redacted] *See Id.* at 101:15–102:11. [redacted] *id.* at 107:17–108:2; Supplemental Response S-46 ("[T]he [Leonard Green] entities purchased shares at the [] time it became a private equity investor."). Except for the approximately $25 million it contributed in 2019 as part of an $41-million capital contribution to PMH, which was returned to Leonard Green in under a year, Leonard Green has never put any of its own money into PMH. Supplemental Response S-46 [redacted] Wagner SUO I 139:21–42; 176:8–12.

But it has taken money out: As mentioned above, in 2012, while under the control of Leonard Green, PMH paid Leonard Green and other PMH shareholders (primarily Lee and Topper) a $188-million dividend from the proceeds of bonds that PMH issued. *See* PMH FY2013 AFS at 50. And in 2018, PMH paid Leonard Green and PMH shareholders (again, primarily Lee

and Topper) a total of $457 million in dividends. Redacted Report 8. These funds, like those in 2012, came from placing debt on the company, and were paid [redacted] *See, e.g.*, DiStefano SUO 98:3–24; Doyle SUO 124:3–129:14. The absence of oversight by board members is concerning to the Attorney General and, in accord with the criteria contained within the Hospital Conversions Act, is addressed with Conditions that require proper training for board members and install proper board by-laws.

The scale and timing of the 2018 Dividend is especially troubling: When it was paid, the $457 million represented approximately 60 days of PMH's operating expenses. PYA Report 15; Lee SUO II 101:9–16. And it came at a time when PMH had only 1 day's worth of cash on hand. Redacted Report 8; *cf.* Lee SUO II 72:15–73:18 [redacted] Fiscal Year 2018, moreover, was the year that PMH had a net loss of over $240 million and in which its total liabilities exceeded its total assets by over $620 million. PYA Report 12. That year the company reported approximately $260 million in unfunded pension obligations in the national system. PMH FY2018 AFS. Despite these realities, [redacted]. Lee SUO II 97:10–12, March 9, 2021.

2018 was also the year, as mentioned above, when a significant number of employees at the Rhode Island Hospitals were terminated. Ragosta SUO II 32:12–33:9, March 19, 2021. [redacted] During this period, and also mentioned above, PMH's capital investments were not keeping up with depreciation at the Rhode Island Hospitals. Notwithstanding these struggles, Wagner testified [redacted] Wagner SUO I 144:1-

145:2; *see also* Supplemental Response S2-10 ("The Company's senior management determined that the Company had sufficient surplus and that the making of the dividend was in the [C]ompany's best interest."); Lee SUO I 135:10–136:14 [redacted]

PMH's CEO Sam Lee personally received approximately [redacted] of this 2018 dividend, Lee SUO 137:2–4; Topper (via his family trust) took home between [redacted] Topper SUO 150:21–23. These numbers likely account for why this dividend was [redacted] Baumer SUO I 141:12–15; Lee SUO I 136:9–11 [redacted] All told, from 2012 to 2020, Leonard Green, Lee, and Topper have together paid themselves over half a billion dollars in cash from debt that went onto PMH's books—this while the company took the aforementioned $603 million cumulative comprehensive loss from Fiscal Year 2015 to Fiscal Year 2020. *See* Wagner SUO I 140:16–21 [redacted] The disconnect between investor returns and financial performance contradicts, among other of the Transacting Parties' representations, PMH's CFO Mark Johnson's testimony that "[t]here are really not" major difference between PMH's business model and that of non-profit hospitals. Johnson SUO 22:9–12.

The reason provided under oath for paying these huge dividends is almost as alarming as their size and timing: the dividends were taken because, in Leonard Green's estimation, [redacted] Wagner SUO I 83:24-85:7; *see* Redacted Report 7-8. Instead of using what Wagner called PMH's "extra earnings" to further pay down existing debt, invest in its facilities, or contribute to a rainy-day fund, she and Leonard Green saw them as a nuisance that was [redacted] Wagner SUO I 84:14–24

[redacted] Wagner testified, [redacted] Wagner SUO I 85:1–15. Baumer [redacted] Baumer SUO I139:23–140:3. Lee testified that if PMH [redacted]

Regarding this rationale, the Attorney General notes as an initial matter that adding debt to a company in order to simultaneously avoid taxes and enrich private investors is particularly concerning given that the company in question, PMH, owns safety-net hospitals, whose main source of income are government (i.e., Medicare and Medicaid) payments. *See* Johnson SUO 112:16–19 [redacted] As Baumer himself stated, [redacted] Baumer SUO I 158 13–18; *see* Ragosta SUO II 51:12–20 [redacted] And as previously stated, PMH and its subsidiaries received hundreds of millions of dollars in financial aid from federal and state governments in 2020, [redacted] *See* Johnson SUO 50:3–11; Lee SUO II 82:1–6 [redacted]

In the bigger picture, high earnings and low debt strike the Attorney General as a goal for most companies, especially for hospital companies, whose margins tend to be low even in the best of times, and where keeping a financial cushion can mean the difference between the ability to maintain and having to shutter public-health pillars, particularly in unforeseen downturns.[24] *See*

[24] PYA lists some of the "many risks faced by the healthcare provider industry, including but not limited to, public policy and regulatory changes, macro-economic shifts, payer reimbursement changes, impacts of public health

Wagner SUO I 166:8–9 [redacted] Moody's Investors Service, Mar. 28, 2019, *supra* ("Moody's believes that hospital industry-wide challenges to growth and margin expansion, including weak patient volume trends and increasing cost pressures, will constrain organic earnings and cash flow growth going forward."). As PYA wrote in its report, PMH currently "has somewhat limited ability, in the form of current liquidity especially after recoupment of [funds advanced to PMH by the federal government during the COVID-19 pandemic], to weather additional or continued financial challenges." PYA Report 16; *see also* Redacted Report 7 ("COVID-19 adversely affected [PMH's] operations in FY 2020"). "That, in turn," said PYA, "is a risk to the ongoing financial viability of PCC as a PMH subsidiary." *Id.*; Redacted Report 11 ("While pandemic relief from governmental entities has provided PMH with some short-term liquidity, that liquidity will evaporate as governmental funds are repaid and accounts payable becomes normalized.").

Adding to the Attorney General's concern is the Transacting Parties' own characterizations of PMH's financial condition, both historically and currently. *See, e.g.*, Lee SUO I 143:23–144:2, 144:16–18 [redacted] Johnson SUO 33:18–21 [redacted] Topper SUO 89:13–14 [redacted] *Contra* Lee SUO II 106:7–11 [redacted] The Transacting Parties sometimes contradictory representations about the condition of PMH have hurt their credibility in the Attorney General's assessment of the transaction.

---

emergencies and natural disasters, skilled labor availability, supply chain continuity, [and] regulatory compliance investigations." PYA Report 18.

Besides the dividends it took, Leonard Green also made money from PMH by charging it [redacted] from Fiscal Year 2010 through Fiscal Year 2018.[25] Supplemental Response S5-4. Leonard Green partners and PMH executives testified that [redacted]. *See* Wagner SUO I 135:19–136:8. In fact, Baumer, the Leonard Green partner most involved with PMH, testified that he spends [redacted] Baumer SUO I 35:21–2. All told, Leonard Green made [redacted] initial investment in PMH. Baumer SUO I 93:7–17; Wagner SUO I 98:24–99:15; *see* Wagner SUO I 106:25–107:1 [redacted]

d. PMH's Financial Stability

PMH's "financial health . . . is of vital importance to [PCC] and its subsidiaries and affiliates." Redacted Report 7. Which is why it is concerning that in March 2019, Moody's Investors Service downgraded its assessment of PMH's creditworthiness by giving the company a B3 rating. Moody's Investors Service, Mar. 28, 2019, *supra.* This rating indicates the company's degree of financial instability is such that lending it money would be "considered speculative and . . . subject to high credit risk." Moody's Investors Service, *What is a credit rating?*, https://ratings.moodys.io/ratings. Moody's cited PMH's "very high financial leverage, shareholder-friendly financial policies, and a history of failing to meet projections" as reasons for downgrading the company's creditworthiness. Moody's Investors Service, Mar. 28, 2019, *supra*;

[25] Two separate management fees are discussed in this Decision and should be distinguished. Leonard Green charged [redacted]. In addition, PMH 'charged' a management fee to PCC which was reflected in the Audited Financial Statements as part of operating expenses. PMH has agreed, and the Attorney General in Condition 11 has required, that upon the buy-out of the 15% CCCB ownership, no management fees will be assessed.

see Wagner SUO I 165:11–22 [redacted]

In July 2019, after PMH had announced its deal with MPT, Moody's commented that "the sale-leaseback transaction does not address the company's continuing operating challenges and lease-adjusted leverage will likely remain high." Moody's Investors Service, *Announcement: Moody's: Prospect Medical's sale-leaseback improves liquidity, however operating challenges remain*, Jul. 16 2019, https://www.moodys.com/research/Moodys-Prospect-Medicals-sale-lease-back-improves-liquidity-however-operating-challenges--PR_405116. The Service went on to say that there was "no immediate impact on Prospect Medical's B3 Corporate Family Rating or its negative rating outlook." *Id*. The Attorney General notes that it was around this time that, by Leonard Green's lights, [redacted] Wagner SUO I 88:7-25.

Various ratios are used by Moody's and others to gauge a company's financial health. *See* Moody's Investors Service, Mar. 28, 2019, *supra*. The following sections record the values of two ratios calculated by the Attorney General's financial expert—measures of PMH's solvency and liquidity, respectively. Each section then compares the values for PMH with those of publicly traded hospital companies.[26] PYA provided similar comparisons, to similar effect, in its report. PYA Report 14. Again, the Attorney General notes a contradiction between financial reality as depicted in PMH's financial statements and how it is represented in testimony by PMH, including by PMH's CFO, who testified that when compared to other participants in the industry, PMH's financial position [redacted] Johnson SUO 86:5–13; Lee SUO II 27:17–20 [redacted]

[26] [redacted] Wagner SUO 127:23–129:7.

Confidential LGP-SBC-000000866

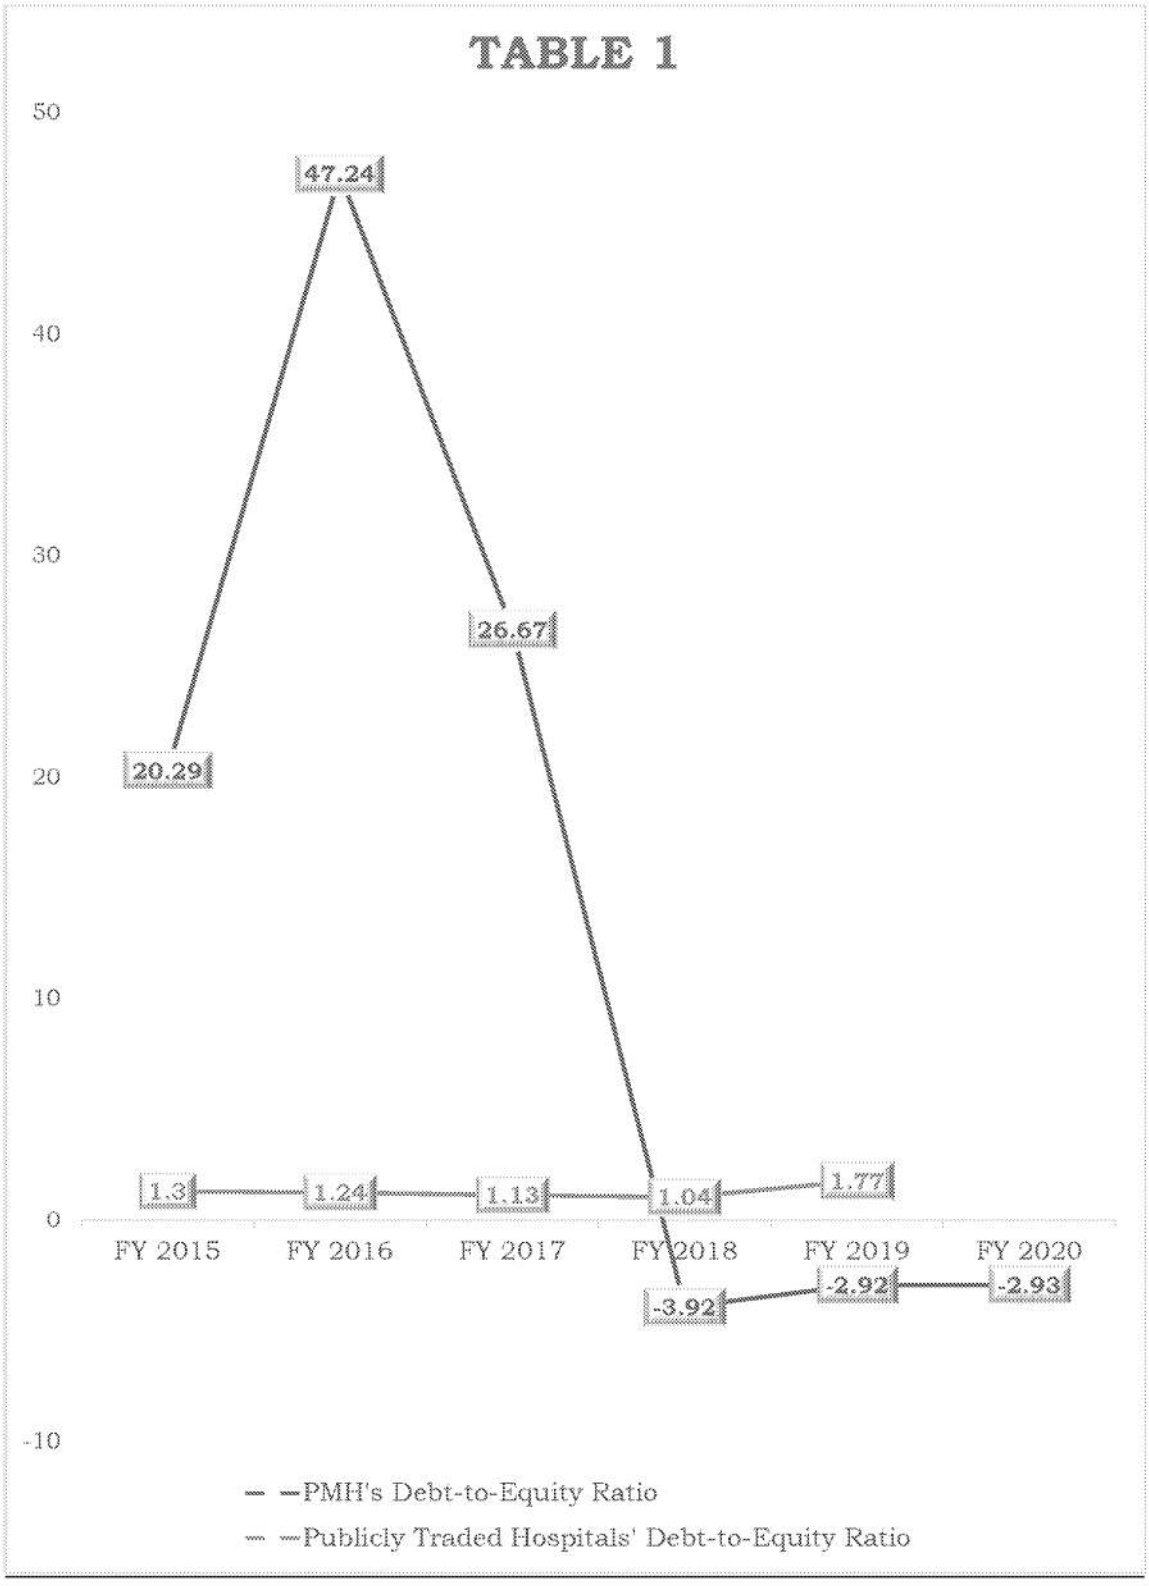
i. Solvency

The debt-to-equity ratio measures a company's solvency, that is, the company's ability to meet its debt and other financial obligations for the foreseeable future. The lower the value of this ratio, the more solvent the company. A negative debt-to-equity ratio means a company's liabilities outnumber its assets.

The following chart ("Table 1") plots PMH's debt-to-equity ratios from Fiscal Year 2015 through Fiscal Year 2020, which are based on PMH's audited financial statements and calculated by the Attorney General's financial expert. Also plotted are the median debt-to-equity ratios of publicly traded, for-profit hospital companies (*i.e.*, those assigned Standard Industrial Classification 806 by the federal government) for Fiscal Year 2015 through Fiscal Year 2019.[27]

[27] Source: https://www.readyratios.com/sec/industry/806/. The Attorney General recognizes that the for-profit, hospital companies used as comparators are not all of similar size to Prospect; however, as companies in the same industry, the comparisons are useful.

Confidential LGP-SBC-000000867



Confidential LGP-SBC-000000868

Table 1 shows that PMH had a debt-to-equity value well over 1.0 for Fiscal Years 2015, 2016, and 2017, after which the ratio became negative for the rest of the period. Redacted Report 8 ("The debt-to-equity ratio has been negative for the past three years because of large losses and the $500 million in dividend payments."). The Attorney General takes particular note of the fact that the plunge in this ratio's value coincided with the $457-million dividend taken in Fiscal Year 2018. *Accord* Redacted Report 2–3 ("[T]he 2018 transaction substantially weakened the balance sheet of PMH, benefitting the shareholders while providing minimal or no funds to any of the local operating entities."). Moody's Investors Service, Mar. 28, 2019, *supra* ("Since completing a debt-funded sponsor dividend in early-2018, Prospect's leverage has increased significantly."). These values and their trend line indicate that PMH's ability to meet its medium- and long-term debt obligations are becoming more uncertain with each passing year. *See* PYA Report 17 ("PMH is in a highly leveraged position."). Table 1 also shows that PMH's debt-to-equity ratios do not compare favorably with those of its publicly traded, for-profit peers, which have hovered between 1.0 and 2.0, and never dipped below 0.0.

ii. Liquidity

Another metric used to gauge a company's financial health is the quick ratio. *See* Redacted Report 8. This ratio measures a company's liquidity, that is, its ability to cover short-term financial obligations such as payroll, vendor invoices, and outstanding or impending interest payments. Higher values of the quick ratio indicate a company able to meet its short-term obligations; lower values mean the opposite.

A quick ratio of 1.0, for example, means that a company has a dollar of liquid assets for every dollar in current liabilities. A ratio less than 1.0 indicates that a company has less than a dollar available to pay every dollar in short-term obligations. A ratio of 0.5 would mean a company

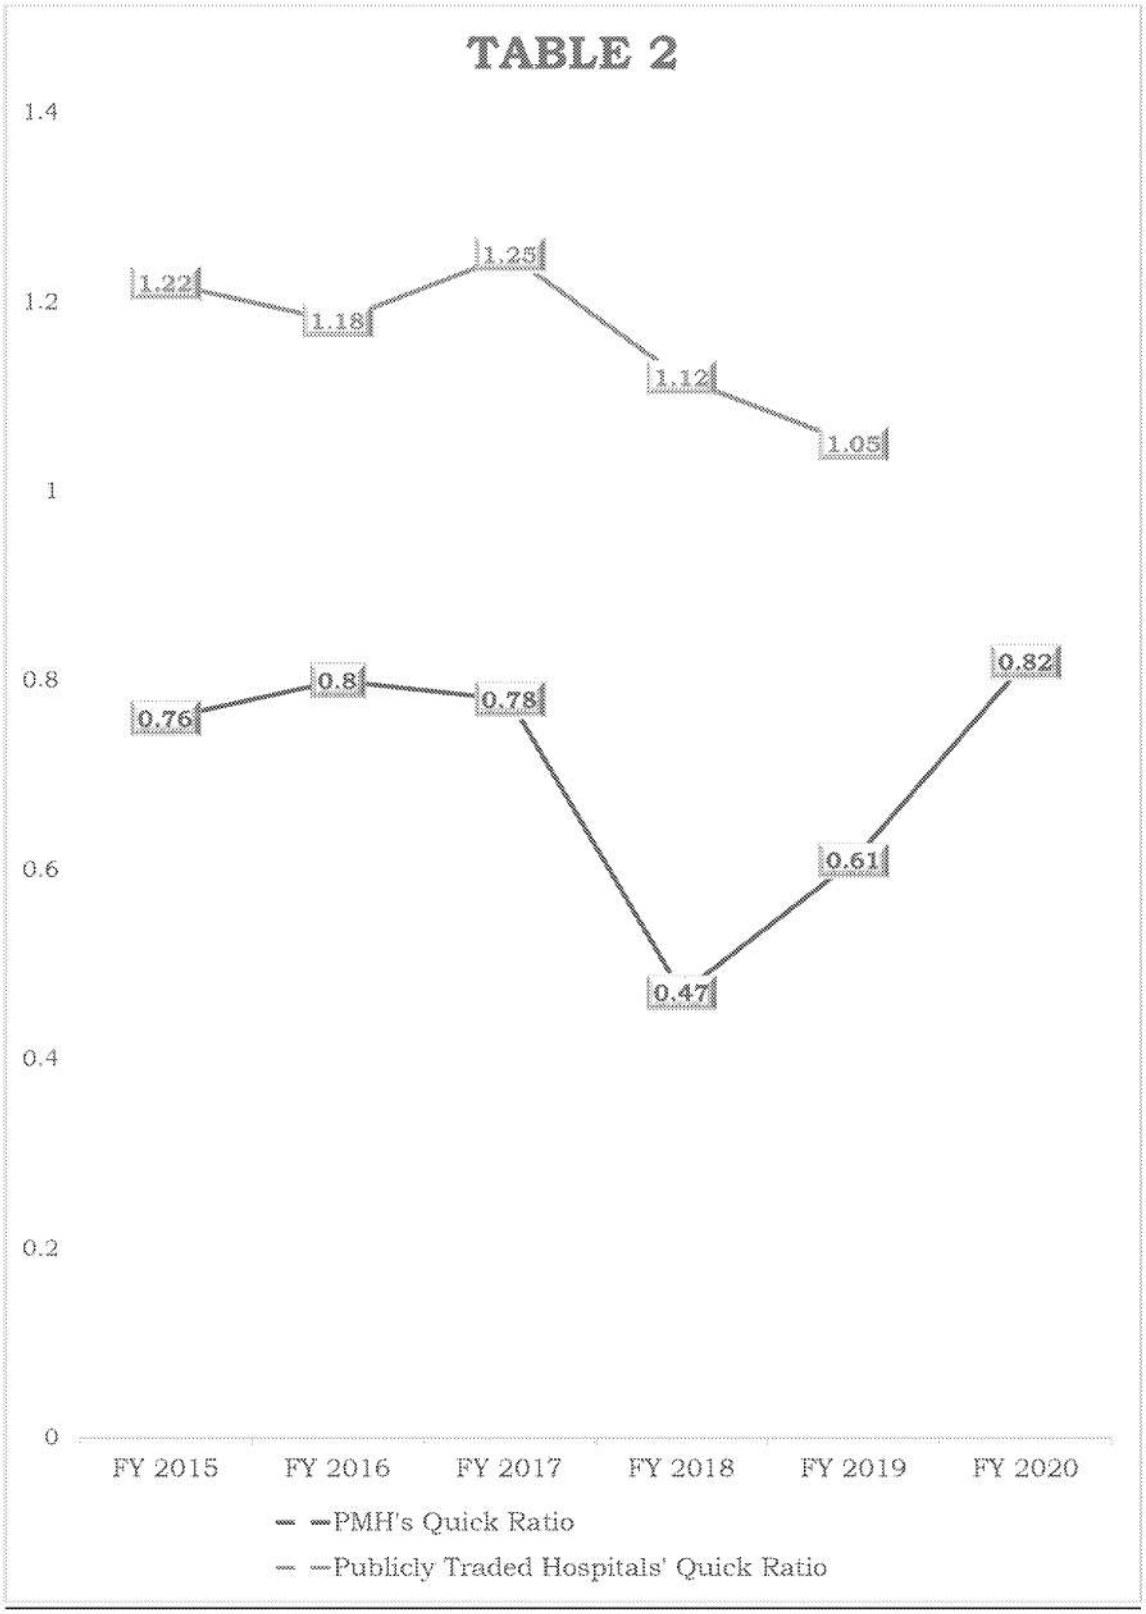
Confidential LGP-SBC-000000869

has only 50 cents to cover every $1 in short-term obligations. In essence, the lower the value of this ratio, the more likely it is that a company will be unable to pay its bills. This could force the company to make up for the shortfall by selling illiquid assets at a steep discount or seeking protection in bankruptcy.

The following chart ("Table 2") plots PMH's quick ratios from Fiscal Year 2015 through Fiscal Year 2020, which are based on PMH's audited financial statements and calculated by the Attorney General's financial expert. Also plotted are the median quick ratios of publicly traded, for-profit hospital companies (i.e., those assigned Standard Industrial Classification 806 by the federal government) for Fiscal Year 2015 through Fiscal Year 2019.[28]

[28] Source: https://www.readyratios.com/sec/industry/806/.

Confidential LGP-SBC-000000870



Confidential

As Table 2 shows, PMH's quick ratio was under 1.0 at the end of every Fiscal Year from 2015 to 2020, meaning that the company had less than $1 to cover every $1 in short-term financial obligations. *See* Redacted Report 11 (expressing concern about liquidity crisis at PMH "within 18 to 24 months"). *Contra* Wagner SUO I 149:23–105:1 [redacted] Like the value of its debt-to-equity ratio, PMH's quick ratio dipped significantly in Fiscal Year 2018, the year of the $457-million dividend, and the year when Wagner testified [redacted] Wagner SUO I144:11–145:2. This despite Wagner's acknowledgment that [redacted] *Id.* at 80:8–10. Although these dividends were issued three years ago, with two of the same owners remaining after the transaction, concerns remain and the Conditions imposed by the Attorney General are necessary.

The drop in the value of PMH's quick ratio illustrates the cash shortfall that precipitated the $41 million capital contribution made to PMH by its shareholders in Fiscal Year 2019. *See* Wagner SUO I 146:14–22 [redacted] Moody's Investors Service, Mar. 28, 2019, *supra* ("Prospect exited its first quarter ending December 31, 2018 without any unrestricted cash and $20 million of availability on its ABL facility (unrated), thereby limiting financial flexibility. In response to this, Prospect's sponsor and certain members of management provided the company with a $41 million cash infusion on January 25, 2019."). PYA's report suggests that PMH's operational performance, assets to serve as collateral, and soon the absence of Leonard Green as a financial partner leaves unclear PMH's ability to access capital going forward to help paper over future liquidity crises.

Confidential LGP-SBC-000000872

See PYA Report 17. The Attorney General sees this as creating a circumstance where PMH will not be able to find operational cash when it is needed. *See* Redacted Report 9 ("PMH has sold substantially all its real property . . . . There is very little left to leverage to provide liquidity.") Moody's Investors Service, Mar. 28, 2019, *supra* (referring to PMH's "cash flow cycle" as "typically volatile").

The uptick in the value of PMH's quick ratio for Fiscal Year 2020 is due in large part to the federal government's COVID-19 relief money that flooded in last year to buoy PMH's balance sheets. Redacted Report 10-11 ("Most of the increase [in PMH's cash on hand] appears to be from these government programs."); *see* Baumer SUO I 128:22–129:2 [redacted] As discussed previously, much of this relief money will be recovered by the federal government via reduced Medicare reimbursement rates. Redacted Report 11 ("While pandemic relief from governmental entities has provided PMH with some short-term liquidity, that liquidity will evaporate as governmental funds are repaid and accounts payable becomes normalized."). And, PYA says, if "delays in economic recovery continues, such delays could have negative impacts on PMH's and PCC's liquidity and ability to meet obligations to third parties." PYA Report 19.

Table 2 above also shows that PMH's ratio lagged the median ratio of publicly traded hospital companies, which remained over 1.0 from Fiscal Year 2015 to Fiscal Year 2019. This indicates that PMH was at a relatively higher risk of running out of cash or other liquid assets to meet its short-term financial obligations than its publicly traded counterparts.

* * *

As evidenced above, PMH has a history of prioritizing shareholder returns over stable balance sheets. *Accord* Redacted Report 11 ("My overall conclusion is that PMH is a highly leveraged

Confidential LGP-SBC-000000873

company that continues to have large annual losses. . . . [T]he current owners issued $500 million in dividends which benefitted the shareholders and weakened the financial position of PMH."). The company's commitment to realizing short-term, debt-financed dividends has likely been, in part, the product of Leonard Green's desire to make back its initial investment plus a return before selling the company, all in just a few years. As opposed to the wellbeing of Rhode Islanders, [redacted] Wagner SUO I 95:8–9. PMH will hopefully adopt a steadier, less-leveraged, longer-term business plan once Leonard Green exits.

But hope is not enough when it comes to ensuring the continued viability and development of critical Rhode Island healthcare services, particularly when the keys to the company will be handed over to two men who have supported and implemented many of the decisions that kept PMH walking a financial tightrope for years. *See* Baumer SUO I 78:15–18 [redacted] Wagner SUO I 57:12–18 (same); *see also* Wagner SUO I 19:9–13 [redacted] Topper SUO 34:16–19 [redacted] Topper SUO 167:2–4 [redacted]

In order to protect RWMC and OLF from PMH's practice of operating with substantial leverage, little liquidity, and sizable interest payments, the Attorney General has decided to impose long-term, bankruptcy-shielded monetary conditions that ensure "the acquiror's adherence to a minimum investment to protect the assets, financial health, and well-being of the new hospital and for community benefit." § 23-17.14-28(c); *accord* Redacted Report 11-12 (suggesting imposition of

financial conditions with similar characteristics). These conditions will secure a future where PMH continues to help its Rhode Island Hospitals meet their operating and non-operating expenses. The conditions also require that PMH increase its capital investment in the Rhode Island Hospitals, both to make up for deferred capital expenditures and to prevent further deferments.

The Conditions mandate that funds necessary for the PCC system be secured up front by $80 million in either cash escrows or irrevocable standby letters of credit. *See* Redacted Report 12 (recommending that financial conditions "be pre-funded or otherwise protected in the event of a restructuring by PMH"). There are two primary reasons for this requirement: The first is to guarantee that operations at the Rhode Island Hospitals will be protected if PMH's financial position tips into an "Insolvency Event," as that term is defined in the Conditions below. The second reason for the escrows/letters of credit—as well as a reason for requiring that PMH pay all future costs of the PACE loans—is to dissuade PMH management from treating its Rhode Island Hospitals like it has those in other states: as assets available for encumbrance by PMH in order to forestall a liquidity crunch or insolvency crisis brought on by a business model that has prioritized returns on investment over the needs of safety-net hospitals.

Rhode Islanders can ill afford their healthcare infrastructure serving as a private bank for private investors. The financial conditions the Attorney General imposes here are necessary to protect the State and its citizens from the fallout of such previous practices and from the practices themselves going forward.

B. BOARDS OF DIRECTORS

Numerous provisions of R.I. Gen. Laws Section 23-17.14-7(c) involve a review of the actions of the board of directors of the existing hospital, the acquiree.[29] Applying these criteria to

[29] *See e.g.*, Hospital Conversions Act, R. I. Gen. Laws §§ 23-17.14-7(c) (3), (4), (5), (8), (9), (10), (11), (13), (14), (15), and (23).

Confidential LGP-SBC-000000875

the instant review, the Attorney General reviewed the actions of the boards of directors with respect to their decision to pursue this the Proposed Transaction, the board's use of consultants, and the structure of the board post-conversion. In addition, the Attorney General makes observations of the functioning of both the PMH and the local boards that pertain to Section 23-17.14-28(c) and the purpose of Chapter 23-17.14. Where board-specific criteria direct consideration of a criterion "in relation to carrying out its mission and purposes," the Attorney General includes in his consideration the mission and purpose of Prospect CharterCARE which, of course, PMH as the owner of those hospitals is likewise obligated to advance.

1. Board Decision to Pursue a Conversion[30]

The first criteria of the Hospital Conversions Act guiding the review of the actions of the board of directors in pursuing a conversion is found at R.I. Gen. Laws Section 23-17.14-7(c)(3):

> Whether the board established appropriate criteria in deciding to pursue a conversion in relation to carrying out its mission and purposes.

Here, the board of directors did not establish any criteria in the context of pursuing the conversion. *See* Response to Initial Application Question 7. This absence of articulated criteria interferes with the Attorney General's ability to conduct a meaningful evaluation of the bases for the transaction, such as any goals or plans associated with it, including whether such bases are "appropriate." This vacuum also undercuts the ability to consider the reasons for the transaction in relation to the mission and purpose of either the PMH board or the Rhode Island Hospitals. Thus, the board's decision not to establish such criteria is concerning.

Notwithstanding the absence of established criteria, the Transacting Parties offered an explanation for the transaction in the context of their Initial Application. The transaction is

---

[30] For purposes of this section, the reference to "board of directors" means the board of Prospect Medical Holdings, Inc. and Ivy Holdings, Inc.

Confidential LGP-SBC-000000876

described as a buy-out of the private equity investors Leonard Green—essentially an in-house transaction—such that criteria in the traditional sense were not applied. *See* Response to Initial Application Question 1. Unlike the traditional third-party transaction, Leonard Green as seller is familiar with the buyers, particularly Lee, who had been operating the company for the entirety of Leonard Green's investment in Prospect. Leonard Green representatives on the Prospect board testified that, overall, [redacted] *See* Baumer SUO I 164:14-23; Wagner SUO I 70: 6-25. Additionally, while not "criteria" in the traditional sense, Leonard Green did require certain terms to be made part of the Merger Agreement in order to effectuate the buy-out because [redacted] *See* Baumer SUO I 118:16-24 (referencing Section 6.09 of the Merger Agreement, a requirement that no dividends be paid for two (2) years or until Prospect fulfilled a $50 million mandated pension payment (in addition to a $70 million pension payment that was made initially *see* Section 4.07)); *see also* Supplemental Response S2-5.

As this applicable section of the HCA directs consideration of whether the decision to pursue a conversion relates to the "mission and purpose," the Attorney General evaluated the decision on those terms, as well. The entity closest to the delivery of health care in Rhode Island and owned by the Transacting Parties is PCC. Its purpose is stated as follows:

> The purposes of the Company are: (i) to provide and promote the growth of health care services in the greater Providence, Rhode Island metropolitan service area (including charitable care and community health services); (ii) to provide efficient and cost-effective rendering of health care services for the benefit of health care consumers in the greater Providence, Rhode Island metropolitan service area; (iii) to provide quality medical care at competitive charges; (iv) to provide consumers of health care choice in providers of care; (v) to own, manage, operate, lease or take any other action in connection with operating the Hospitals and other health care related services and businesses; (vi) to acquire (through asset acquisition, stock acquisition, lease or otherwise) and develop other property, both real and personal, in connection with providing health care related services, include, without limitation, general acute care hospitals, specialty care hospitals, diagnostic imaging

> centers, ambulatory surgery centers, nursing homes, clinics, home health care agencies, psychiatric facilities and other health care providers; (vii) to deploy ambulatory locations of care; (viii) to recruit and integrate physicians; (ix) to institute safety and quality improvement initiatives; and (x) generally to engage in such other business activities and to do any and all other acts and things that the Board of Directors deems necessary, appropriate or advisable from time to time in furtherance of the purposes of the Company as set forth in this Section 3.1.

Amended & Restated Limited Liability Company of Prospect CharterCARE, LLC dated June 20, 2014 ("LLC Agreement") Section 3.1.

It is concerning that, as described by the Transacting Parties, the Proposed Transaction was not contemplated "in relation to" these purposes. It is notable to the Attorney General that the purpose for which PCC is organized is closely aligned with the purpose of the Hospital Conversion Act found at § 23-17.14-3(1)—"Assure the viability of a safe, accessible and affordable healthcare system that is available to all the citizens of the State"—to which the Attorney General is directed in § 23-17.14-28(c).

The criterion found at R.I. Gen. Laws Section 23-17.14-7(c)(4) states: "Whether the board formulated and issued appropriate requests for proposals in pursuing a conversion." There were no requests for proposals—appropriate or otherwise—formulated by the board, again precluding a full review of factors relevant to the decision to pursue the Proposed Transaction. As this was an in-house buy-out of majority stockholders where the sellers comprise 60% of the board, what the Transacting Parties took into account when negotiating the purchase price may be considered "requests for proposals." In that regard, the Transacting Parties described the following factors:

1. The enterprise value of PMH;
2. The equity value of PMH;
3. The dividend recapitalization transaction which occurred in fiscal year 2018;[31]
4. Future obligations of PMH; and
5. Future capital needs of PMH.

[31] The dividend recapitalization was a board-approved dividend payment of $458 million that was made by Prospect to its shareholders in February 2018.

Confidential LGP-SBC-000000878

See Initial Application, Tab 23.

While in the context of the Proposed Transaction the above factors were outlined in the Transacting Parties' responses to requests and referenced in testimony, [redacted] *See* Baumer I 110:24-111:6; Lee I 120:12-19. In other words, there is no independent objective evidence based on which the Attorney General can evaluate the factors the Transacting Parties say they considered.

Section R.I. Gen. Laws § 23-17.14-7(c)(5) states: "Whether the board considered the proposed conversion as the only alternative or as the best alternative in carrying out its mission and purposes." Here, the board considered no alternatives to the Proposed Transaction. In fact, when another offer came in from Prime, [redacted] Lee SUO I 118:2-12. Nor is there any evidence that, in deciding to consider only this form of Conversion, the parties accounted for "mission and purpose."

The criterion at R.I. Gen. Laws § 23-17.14-7(c)(11) states: "Whether the board exposed an inappropriate amount of assets by accepting in exchange for the proposed conversion future or contingent value based upon success of the new hospital." The Merger Agreement does not include consideration that is based upon future or contingent value based upon success of Prospect or the Rhode Island Hospitals. In fact, Prospect has been funding losses at the Rhode Island Hospitals since the joint venture in 2014. PYA Report 7. Through testimony, Prospect management [redacted] *See* Johnson SUO 147:9-12 [redacted] Pillari SUO 102:1-6, March 22, 2021 [redacted] With respect to the future security (and thus the future value) of the Rhode Island Hospitals, the post-conversion 33% owner David Topper testified [redacted]

[redacted] The current and post-conversion owner Lee testified that he [redacted] Lee SUO II 41:2-11. While it may seem at first reassuring that the prospective new owners are prepared to commit their own wealth to the Rhode Island Hospitals, [redacted] However, this is consistent with the evaluation of the Attorney General's financial expert Redacted, who notes in his report that he anticipates a liquidity crisis for Prospect within 18 to 24 months. Redacted Report 11.

To the extent it is the purpose of these criteria to allow meaningful and objective regulatory review of transfers of interest in Rhode Island hospitals, the Attorney General finds that purpose frustrated by the lack of independent, professional, and appropriate criteria; appropriate requests for proposal; and consideration of alternatives in relation to the Proposed Transaction.

2. Board Use of Consultants[32]

Two criteria in the Hospital Conversions Act deal with a board's use of consultants. *See* R.I. Gen. Laws §§ 23-17.14-7(c)(8) and (9). These read as follows:

> (8) Whether the board exercised due care in engaging consultants with the appropriate level of independence, education, and experience in similar conversions; and
>
> (9) Whether the board exercised due care in accepting assumptions and conclusions provided by consultants engaged to assist in the proposed conversion.

[32] For purposes of this section, the reference to "board of directors" means the boards of Prospect Medical Holdings, Inc. and Ivy Holdings, Inc.

Confidential LGP-SBC-000000880

The Transacting Parties offered a limited rationale for the process they followed in arriving at the transaction. Specifically, the parties said they are sophisticated and did not need outside assistance for valuation. *See* Initial Application, Tab 23.[33] However, no consultants, other than corporate and outside counsel, were engaged by the board related to the proposed conversion. *See id.* at Responses to Question 8; Question 9. This is concerning to the Attorney General. These criteria direct consideration not simply of whether or not consultants were used by the Transacting Parties in evaluating the Proposed Transaction. The statute directs an evaluation of whether consultants were independent of the parties, brought sufficient training and experience to their review, whether the transacting parties accepted assumptions and conclusions of these qualified and independent reviewers, and, overall, whether due care was exercised by the Board with respect to each of these factors. As is evident from the precise language of these criteria, in a transaction involving a for-profit entity, the ability to see objective and reviewable bases for the conversion is key to the regulator's Decision. Arguably, objectivity is even more important where, as here, the parties are engaged in an in-house transaction without even market forces to pressure a transaction of value to the overall company.

Here, there was no independent eye on this transaction, leaving no basis to conclude that Prospect exercised due care in engaging consultants. R.I. Gen. Laws § 23-17.14-7(c)(8).

3. Remaining Board Criteria

Additional criteria in the Hospital Conversions Act deal with the structure of the board post-conversion. *See* 23-17.14-7(c)(25)(vi)–(ix).[34] These read as follows:

---

[33] Aside from the manner by which the Transacting Parties arrived at the valuation, concerns about the resulting valuation itself are addressed in Section A above.

[34] Another consideration is whether the new entity has bylaws and articles of incorporation. *Id.* § 23-17.14-7(c)(25)(i). Here, both have. The new corporate entity that will purchase Leonard Green and the minority owners' shares is Chamber. Chamber is a Delaware corporation incorporated on September 17, 2019. CEC Application Tab 26. Chamber was created for the purposes of effecting the Proposed Transaction. Initial Application 1. Chamber's bylaws were provided by the Transacting Parties and essentially mirror Ivy's bylaws. CEC Application Tab 26.

Confidential LGP-SBC-000000881

(vi) whether the board of any new or continuing entity will be independent from the new hospital;

(vii) Whether the method for selecting board members, staff, and consultants is appropriate;

(viii) Whether the board will comprise an appropriate number of individuals with experience in pertinent areas such as foundations, health care, business, labor, community programs, financial management, legal, accounting, grant making, and public members representing diverse ethnic populations and the interests of the affected community; and

(ix) Whether the size of the board and proposed length of board terms are sufficient.

As is evident, with respect to a transaction involving a for-profit purchase of a Rhode Island hospital or hospital system, the legislature points the Attorney General to consideration of the process by which a board is composed and the skills and diversity of the people who populate the board.

The criterion at R.I. Gen. Laws § 23-17.14-7(c)(14) provides: "Whether the board accepted fair consideration and value for any management contracts made part of the proposed conversion." The Attorney General evaluated the two management service agreements Prospect has assumed to date since it purchased the Rhode Island Hospitals and does not find a basis to conclude the management services were provided for "fair consideration and value."

As part of Leonard Green's investment in Prospect in 2010, a ten-year Management Services Agreement ("LG Management Agreement") was entered into between Prospect and Leonard Green. *See* C-CIIH-007669-007675. The Transacting Parties asserted that this type of fee "is a standard private equity fee intended to compensate Leonard Green for its time and resources spent working with PMH." *See* Supplemental Response S3-11. The fee is no longer being collected and "[f]ollowing the closing of the Proposed Transaction, this fee will be eliminated and not

Confidential LGP-SBC-000000882

replaced with anything equivalent from any other party." *Id.* It appears from the testimony that nothing is needed to replace those services, as Prospect used the services infrequently, if at all. *Id.* The conclusion of this arrangement raises the question as to the value of the services paid for given they were rarely used and are not being replaced.

The other management agreement that was considered during this review is the Management Services Agreement that operates between Prospect CharterCARE and Prospect Advisory. *See* 2014 Decision at 15 f. 39 (citing Initial Application Exhibit 18). As part of the 2014 Prospect CharterCARE joint venture, Prospect East, as the managing member of Prospect CharterCARE, LLC, delegated its day-to-day management of the Rhode Island Hospitals to Prospect Advisory under the Management Services Agreement ("PCC Management Agreement"), which provides for a number of services, including assistance with operational activities. *Id.* Under the PCC Management Agreement, Prospect Advisory works with senior leadership team members of Prospect CharterCARE, LLC to run the day-to-day operations of the Rhode Island Hospitals. This type of agreement is unique to Prospect CharterCARE because of the joint venture; Prospect does not have these types of agreements with its other hospital subsidiaries. As discussed below, the parties contemplate that the Prospect CharterCARE joint venture will be dissolved, and Prospect will gain 100% ownership in Prospect CharterCARE. Prospect plans to eliminate the PCC Management Agreement once the St. Joseph's pension settlement is approved. *See* Supplemental Response S7-9. As is already contemplated by the Transacting Parties, the Attorney General will require that the Management Services Agreement be terminated as a condition of approval. The Attorney General will also require that no accrued management fees be assessed against, or collected from, PCC.

4. Other Board Issues

Confidential LGP-SBC-000000883

Throughout the Attorney General's review of the Proposed Transaction, there were a number of other board related issues and concerns that surfaced as to both the Prospect and Ivy boards of directors, as well as the Prospect CharterCARE board of directors. Given the recurring attention in the Hospital Conversions Act to the conduct, composition, and professionalism of boards of directors of for-profit acquirors, the Attorney General includes these observations in this Decision in fulfillment of his duties under the Act.

a. Duty of a Healthcare Board

Throughout this review, the Attorney General has focused on the duty of a healthcare board, especially in the face of the Prospect and Ivy boards permitting new debt in order to issue large dividends, leading, as it has, to a significantly untenable debt-to-asset ratio and financial risk, in a sector that not only employs thousands of Rhode Islanders but on which we often must rely for care at our most vulnerable moments. As discussed above, by passing the Hospital Conversions Act, the legislature accounted for and balanced the risks associated with for-profit ownership of hospitals and hospital systems by requiring the Attorney General to "protect the assets, financial health, and well-being of the new hospital …" R.I. Gen. Laws § 23-17.14-2(c).

Towards that end, and specifically with respect to the functioning of the boards of directors, the Attorney General has addressed elsewhere in this Decision the extent to which the Transacting Parties exhibit a conflict between a drive to maximize their own income and the duty to protect safe, viable, accessible healthcare. Here, it was concerning that a board member did not differentiate between the duties associated with membership on a healthcare board from any other board, [redacted] *See* Baumer SUO I 41:10-15. Also concerning is that another board

Confidential LGP-SBC-000000884

member testified [redacted] *See* Wagner SUO I 35:21-25; 36-1.

b. Additional Concerns: Prospect CharterCARE Board

Under the terms of the 2014 transaction, it was contemplated that the governing board of Prospect CharterCARE, LLC would be a 50/50 board (the "PCC Board") with half of its members selected by and through Prospect East's ownership (Category B members) and the other half of the members selected by and through CCCB's ownership (Category A members). *See* 2014 Decision at 36. The PCC Board was intended to be the organized governing body responsible for the management and control of the operations of the Rhode Island Hospitals, and governed by the terms of the LLC Agreement. *Id.* The LLC Agreement specifically charges the PCC board with "overall oversight and ultimate authority over the affairs of the Company and the Company Subsidiaries," and defines 24 actions that require approval of the PCC Board. *See* LLC Agreement Section 12.1.; Section 8.3. Included in those 24 actions are "[d]evelopment and approval of a strategic plan for the Company" and "[a]pproving the annual operating and capital budgets of the Company." *Id.* at Section 8.3(b) & (c).

Throughout the review, the Attorney General discovered that the PCC board members were not observing best practices expected of the governing body. Board members did not seem to have a basic working knowledge of the financials of the Prospect CharterCARE. One Category A board member was not aware of Prospect sweeping the cash of PCC daily, *see* [redacted] or the structure of the PCC board. Another board member was not aware of Category A and Category B members, *see* [redacted] At least two of the four Category A board members had never seen or were not familiar with the LLC Agreement. *See* [redacted]

Confidential LGP-SBC-000000885

Additionally, and of particular concern, [redacted] *See* DiStefano SUO 138:17–140:6; Doyle SUO 67:16-68:5. Through testimony, it was reported that [redacted] *See* Ison SUO 51:16-24, 52:7-15. [redacted] *See* Doyle SUO 83:4-84:3. It appears to the Attorney General that the PCC board was simply putting a "rubber stamp" on the actions of Prospect. This is especially concerning when half the PCC board was comprised of representatives (by voting rights) of CCCB. Finally, a long-time member of the PCC board was being compensated under a consulting agreement with Prospect beginning in 2018, a clear and direct conflict of interest. *See* C-CIIH-008520.

It was also concerning that the PCC board was not provided with information regarding the Proposed Transaction until months after the Merger Agreement was signed, when the Transacting Parties were preparing to re-file the HCA Initial Application in February 2020 and needed signed Conflict of Interest Statements from the PCC board members. *See* Supplemental Response S-4; *see* also [redacted] While the PCC board would not have a vote as to whether its parent company entered into a transaction, in order to perform their mandated functions, members of the PCC board should, at a minimum, have been provided with a presentation and an opportunity to inquire into the reason for the departure of the 60% private equity owner.

During the pendency of the HCA review, in July 2020, the Liquidating Receiver of CCCB removed and replaced the existing Category A board members. *See* C-CIIH-007827-007828. That

change prompted a dispute between Prospect and CCCB that resulted in suspension of meetings of the PCC board after June 2020 (except for a special meeting to approve a settlement related to the St. Joseph pension plan litigation). It is highly concerning that the governing body with obligations to oversee two Rhode Island safety-net hospitals was not meeting during the COVID-19 pandemic.

Thereafter, in December 2020, Prospect entered into a Settlement Agreement to resolve all litigation related to the pension (hereinafter referred to as "Pension Settlement"). *See* Case No. 1:18-cv-00328-WES/PC-2017-3856. As part of the Pension Settlement, the LLC Agreement was amended to remove the requirement that the actions listed in Section 8.3 of the LCC Agreement require the approval of the Category A board members. *See* Pension Settlement ¶15. There was also an agreement that the newly appointed Category A board members would not attend any PCC board meeting during the pendency of the proceedings for the settlement agreement. *Id.* at ¶ 19 Agreement. Both of these provisions are concerning to the Attorney General. Certainly, the Attorney General appreciates the complex and contentious litigation that resulted from the St. Joseph pension plan and the enormous amount of time and effort all parties put into a resolution to the matter. To address his concerns, the Attorney General imposes Conditions requiring the LLC Agreement to be amended to require a majority vote of the board members, which will continue to have 40-49% community representation, for all matters in Section 8.3 after the proceedings are complete. Additionally, since approval of the settlement and subsequent buy-out is expected to occur after this Decision, any and all changes to terms of the settlement must be reported to and approved by the Attorney General.

Once Prospect becomes the 100% owner of Prospect CharterCARE, it will have the authority to nominate both Category A and Category B members and/or further amend the LLC

Confidential LGP-SBC-000000887

Agreement to remove the Category A members altogether. While Prospect has stated they intend to maintain the Category A members post buy-out, there is currently no requirement to do so. The Attorney General continues to recognize the importance of maintaining local representation on the PCC board, especially with an out-of-state parent, but the board members must be fully engaged and honor their fiduciary duties. Therefore, appropriate conditions will be put in place to ensure the continuance of a locally represented board with meaningful representation that lacks any conflicts of interest and has the tools it needs to fulfill its fiduciary duties.

C. CHARACTER, COMMITMENT, COMPETENCE AND STANDING IN THE COMMUNITY

R.I. Gen. Laws Section 23-17.14-7(c)(28) asks "Whether the character, commitment, competence and standing in the community, or any other communities served by the transacting parties are satisfactory. Section 7(c)(28) is an important and encompassing portion of the Hospital Conversions Act review criteria. Here, the relevant parties under review are Prospect, as well as Lee and Topper, who will become the sole owners of Prospect as a result of the Proposed Transaction. The character, commitment, competence, and standing in the community of Prospect, Lee, and Topper raise serious concerns that must be addressed in a manner to ensure the continued viability of the hospitals.

1. Important Community Asset

Before discussing the character, commitment, competence, and standing in the community of Prospect, Lee, and Topper, the Attorney General wants to recognize the importance of RWMC and OLF in the landscape of Rhode Island healthcare. Both hospitals provide vital services to their surrounding communities. RWMC, an academic medical center, has the state's only bone marrow transplant program and dedicated behavioral health emergency department. Both hospitals serve

Confidential LGP-SBC-000000888

crucial populations, including psychiatric, cancer, and geriatric patients, to name a few. Throughout this review, the Attorney General has seen the dedicated services of the frontline workers that make it possible for these facilities to run and provide care to Rhode Islanders. And it would be neither fair nor accurate to ignore the fact that many of these improvements have occurred under Prospect's ownership. Capital investments in RWMC and OLF since 2014 have revived aging physical plants, expanded services, and attracted new physicians. *See* AMI Final Report at 35. Even this year, RWMC opened "Rhode Island's first completely dedicated emergency room unit to treat mental health, drug and alcohol medical emergencies"—certainly an essential need in the state.[35]

2. Character, Commitment, Competence, and Community Standing as Evidenced by Quality, Employee Relations, Regulatory Failures, and Closed Hospitals

In Rhode Island, the Center for Medicare & Medicaid Services ("CMS") mediocre star ratings of these hospitals have not improved since 2014 (both were rated at a 3 in 2014).[36] In fact, OLF's star rating has decreased and is most recently at a 2.[37] RWMC and OLF are in the bottom half of the state's hospitals overall based on CMS ratings.[38] The Rhode Island Hospitals have been penalized by CMS since 2014 by a reduction in Medicare payments under a program that measures

[35]https://www.chartercare.org/news/roger-williams-medical-center-opens-behavioral-health-and-substance-use-emergency-treatment-unit/.

[36] Henry Powderly, *CMS updates hospital star ratings, more than 500 earn top marks*, Healthcare IT News, July 23, 2015, https://www.healthcareitnews.com/news/cms-updates-hospital-start-ratings-more-500-earn-top-marks (search "Roger Williams Medical Center" and "Our Lady of Fatima"); https://www.medicare.gov/care-compare/details/hospital/410004?city=Providence&state=RI ("Roger Williams Medical Center" as of April 23, 2021).

Confidential LGP-SBC-000000889

rates of infections, blood clots, and other preventable complications that occur at hospitals.[39] The Attorney General received a 2017 consulting report that outlines findings of inspection of the equipment in operating rooms at OLF and identifies priority items to address as well as an action plan. *See* C-CIIH-008262-008316. Litigation ensued when Prospect refused to provide an internal report associated with this issue. *See NLRB v. Prospect CharterCARE*, No. 19-2289 (1st Cir. 2019).

We heard from hospital employees that supply shelves are often empty, the equipment and supplies are "substandard," and old equipment is left unreplaced. *See* Public Meeting, testimony of [Redacted] 89:13-90:18, Dec. 10, 2020; *see also* testimony of [Redacted] 79:2-22; 79:23-80:5 (noting assault of employees by behavioral health patients due to lack of security guards and larger turnover rate of employees). In March 2020, there was a COVID outbreak in the geriatric psychiatric unit at OLF that infected 19 of the 21 patients. *Id.* at 92:9-13. Unfortunately, 6 later died. *Id.* While the Attorney General appreciates that hospitals across the State and nation were grappling with preparedness for the pandemic early on, these numbers are startling. PCC management has vigorously disputed these criticisms and asserts that the quality of care provided at these hospitals is high. *See* Milo SUO 95:14-23, October 27, 2020; Leahey SUO 64:18-66:7, 143:16-146:15; 147:14-148:8, October 26, 2020.

These concerns are not limited to Rhode Island. Prospect was under a Certificate of Need settlement agreement with the Connecticut Department of Public Health ("DPH") related to its acquisitions of three Connecticut hospitals in 2016.[40] Despite meeting all conditions of the

Confidential

settlement agreement, DPH extended that consent order for 18 months due to clinical and quality concerns.[41] We are informed that the consent order is due to expire in May 2021.

Another consideration here is the relationship among Prospect, the Rhode Island nurses, and other essential front-line workers.[42] United Nurses and Allied Professionals ("UNAP"), representing roughly 600 employees at OLF, raised concerns about Prospect and registered objections to the Proposed Transaction throughout the entirety of the Attorney General's review. As mentioned above, the Attorney General heard from union leadership about lack of appropriate and quality medical equipment, staffing shortages, and morale issues. *See* Callaci SUO 86:12-88:21 (identifying inadequate staffing, inadequate equipment, and lack of trust of Prospect as the three major concerns that UNAP has with the operations of OLF). Since Prospect's acquisition of PCC, roughly 400 ancillary employees formed a union because they were "unhappy with the pressure that comes with inadequate staffing," among other things. *Id*. at 91:9-22. According to Redacted, counsel for United Nurses and Allied Professionals which represents staff at Prospect hospitals, roughly 50 to 70 employees at Prospect Rhode Island Home Health and Hospice are voting on whether to organize a union because they are unhappy with Prospect as an employer. *Id*. at 29:5-23. The Attorney General is concerned that labor relations at these two safety net hospitals appear to be fraught. Hopefully, with the resolution of the St. Joseph's pension case,

https://www.courant.com/news/connecticut/hc-news-waterbury-manchester-rockville-hospitals-scrutiny-20191210-ina3iijrzzdj3atlwi2lokyqhq-story.html.

[41] Josh Kovner, *Oversight of for-profit owner of Waterbury, Manchester, Rockville hospital continued for 18 months after suicide, string of medical errors,* Hartford Courant, Dec. 10, 2019,
At the time of writing of this decision, a final report on compliance has not been completed.

[42] The Attorney General notes that a number of physicians have given statements at the Public Meeting and Health Services Council meetings and none have raised concerns about Prospect's ownership. In fact, many have praised Prospect. With that said, several (though by no means all) of those physicians were recruited under Prospect's ownership or have formed relationships with Lee, Topper and other Prospect executives, which has not been the experience for the nurses and other frontline workers.

Confidential LGP-SBC-000000891

as well as the departure of the private equity owner, the new owners can work on repairing and stabilizing this relationship in the future.

In recent years, Prospect made plans to sell, and later closed, some of its other hospitals. *See* CIIH16-000976. In 2019, Prospect decided to close the Nix Hospital System ("Nix") in Texas (selling some of its assets to real-estate investors) and sell the East Orange General Hospital ("EOGH") in New Jersey, as both were "going concern" businesses. *Id*. The sale of EOGH is currently pending. The Attorney General understands that Prospect's business model of acquiring distressed hospitals with a plan to make them profitable cannot always be successful, but Prospect did not close or sell a hospital during the course of the first twenty years it had been in this business. The recent pattern is concerning. *See* 2014 Decision p. 45.

Further, it cannot go without saying that other conduct discussed herein (*see supra*, Sections A. Board of Directors) weigh heavily against the character, commitment, competence, and standing in the community of these parties. The dysfunctional board, the conflicts, and the failure of the Transacting Parties to meaningfully vet the Proposed Transaction all must be considered and not ignored.

3. Financial Decisions and Priorities of the Transacting Parties

It is significant that the Hospital Conversions Act includes character, competence, commitment, and community standing among the criteria used to review a transaction involving a for-profit acquiror. Clearly the legislature contemplated that, notwithstanding the fact that for-profit companies are permitted to purchase hospitals in Rhode Island, they must be judged not merely based on their ability to meet their own goal of making a profit; both DOH and the Attorney General are directed to consider for-profit acquirors based on higher and more universal measures.

Confidential LGP-SBC-000000892

Before addressing the Transacting Parties larger financial decisions, it must be noted that that, while Prospect has made the capital investments required under the 2014 Decision, it has nonetheless failed to keep up with depreciation at the PCC hospitals. *See* PYA Report 10. These equipment concerns [redacted] *See* C-CIIH-013996.

The Transacting Parties have left a hospital system described in the PYA Report as in a financial condition that "absent governmental assistance associated with the COVID-19 public health emergency, could raise questions regarding the ongoing financial viability of PMH to support its subsidiaries, including PCC." PYA Report 12. They have also realized over half a billion dollars in dividends that is now carried on the PMH books as debt. *See* Section A, and references therein. Given their course of conduct, it should come as no surprise that the two post-closing owners [redacted] Topper SUO 140:25-141:8; Lee SUO II 41:2-11.

E. <u>Tax Implications of the Proposed Transaction</u>

There are three criteria in the Hospitals Conversions Act that deal with the tax implications of the Proposed Transaction. [43] These criteria have historically been viewed through the lens of a non-profit corporation converting to a for-profit corporation. For instance, considering "[w]hether the conversion is proper under applicable state tax code provisions" (and "[w]hether the proposed conversion jeopardizes the tax status of the existing hospital") hinges on a non-profit losing its status, which has important tax and other implications. Likewise, "[w]hether appropriate tax status implications of the entity received the proceeds of have been considered" is applicable to a for-profit entity receiving proceeds from a non-profit, which may be charitable or otherwise restricted.

[43] *See* R.I. Gen. Laws §§ 23-17.14-7(c)(20), (21) and (25)(ii).

Confidential LGP-SBC-000000893

As the Transacting Parties are already for-profit corporations and for-profit limited liability companies, these criteria were not applicable to the Attorney General's review.

G. MISCELLANEOUS

There are several additional HCA criteria the Attorney General considers applicable to this conversion and that do not fit neatly into the above categories. Those criteria are discussed below. Also discussed below are the HCA's monitoring requirements.

1. Right of First Refusal

The HCA requires the Attorney General to consider "[w]hether a right of first refusal to repurchase the assets has been retained." R.I Gen. Laws § 23-17.14-7 (c)(27). The Proposed Transaction does not include a right of first refusal, nor is one necessary.

2. Control Premium

The HCA includes a criterion asking "[w]hether a control premium is an appropriate component of the proposed conversion." R.I Gen. Laws § 23-17.14-7 (c)(27). The Transacting Parties did not indicate that the buyer will be paying a control premium for Leonard Green's shares. The Attorney General finds that a control premium would be inappropriate in any case, given the already-significant amount of control Lee exercises over PMH and its subsidiaries. *See, e.g.*, Lee I SUO 47:9-20; 172-3-173:20 (describing his responsibilities as CEO of PMH); Baumer SUO I 22:23–25:18; 30:10–20; 35:17–36:14 [redacted]

3. Monitoring

The HCA mandates that "[f]or a period of five (5) years following the effective date of the conversion . . . [t]he department of health and the department of attorney general shall monitor,

Confidential LGP-SBC-000000894

assess, and evaluate the acquiror's compliance with all of the conditions of approval, as well as annually review the impact of the conversion on healthcare costs and services within the communities served." R.I. Gen. Laws § 23-17.14-28(d).

The HCA also compels the acquiror—here, Chamber, Inc.— to "pay for the costs" of such "monitoring, evaluation, and assessment in an amount to be determined by the attorney general or the director as they deem appropriate." *Id.* The money to pay these costs is to be "placed in escrow during the term of the monitoring period." *Id.*

The Attorney General has conditioned its approval of this conversion on a requirement that Chamber, Inc. enter all agreements with the Attorney General necessary to fulfill its statutory duty to fund the Attorney General's post-conversion monitoring, evaluation, and assessment. Because the Attorney General expects to choose an entity to begin undertaking these functions soon following the issuance of this Decision, the Attorney General will prompt Chamber, Inc. to enter the required agreements forthwith.

V. CONCLUSION

The overall financial risk created by the financial condition of the Rhode Island Hospitals' parent company, PMH, threatens to overwhelm the benefits the Hospitals have realized under PMH's ownership, which is especially concerning because RWMC and OLF are both valued community assets. The financial choices of the Transacting Parties and the condition in which those choices have left the company that owns these Rhode Island healthcare institutions is at odds with the future security of these local hospitals, and the Attorney General does not hesitate to conclude that significant financial conditions are required as a "minimum investment to protect the assets, financial health, and well-being of the new hospital and for community benefit." R.I. Gen. Laws § 23-17.14-28(c).

Confidential LGP-SBC-000000895

Wherefore, based upon the information provided above in this Decision, the Proposed Transaction is **APPROVED WITH CONDITIONS.** These conditions are outlined below.

VI. CONDITIONS

All of the following Conditions are directly related to the proposed conversion and the purposes of the Hospital Conversions Act. The Attorney General's APPROVAL WITH CONDITIONS is contingent upon the satisfaction of the Conditions. The Proposed Transaction shall not take place until CERTAIN CONDITIONS have been satisfied. The Attorney General shall enforce compliance with these Conditions pursuant to the Hospital Conversions Act, including R.I. Gen. Laws Section 23-17.14-30.

DEFINITIONS

The following definitions shall apply to the terms used in these Conditions[44]:

(1) "Agent/Trustee" as that term is used in these Conditions shall mean a third party, selected by the Attorney General, who, in the event that any escrow or letter of credit funds are delivered to the Agent/Trustee pursuant to Conditions 6.5 or 6.6, respectively: (a) shall act as a fiduciary for the Rhode Island Hospitals and other PCC providers included in these Conditions, (b) who shall hold the funds from the Escrow Accounts and/or Letters of Credit, as applicable, in trust for the Rhode Island Hospitals and other PCC providers included in these Conditions, and (c) shall have duties and powers specific to the holding and distribution of funds delivered to the Agent/Trustee pursuant to Conditions 6.5 and 6.6 as set forth in the Trustee Agreement. The Agent/Trustee may be replaced at any time at the direction of, or with the approval of, the Attorney General.

(2) "Agent/Trustee Agreement" as that term is used in these Conditions shall mean the document that sets forth the Agent/Trustee's powers and duties specific to the holding and distribution of any funds delivered to the Agent/Trustee pursuant to Condition 6. The Agent/Trustee Agreement and any amendments or modifications thereto shall be subject to the approval of the Attorney General. The Agent/Trustee Agreement shall be approved by the Attorney General no more than sixty (60) days after the closing.

(3) "CAPEX" shall mean routine and strategic capital investments recognized by GAAP that are limited to the following, unless otherwise approved by the Attorney

[44] Terms not defined below shall be defined in accordance with the Decision.

Confidential LGP-SBC-000000896

General: new equipment, equipment replacement, facility renovation, new facilities, construction in progress, medical office space, implementation of new services, information systems and licenses, physician practice acquisitions up to but no greater than $5 million during the Conditions and Monitoring Period, and shall include commitments incurred pursuant to capital financing leases.

(4) "Community Director" shall be defined as an individual who resides or works within the Prospect CharterCARE Service Area and has the appropriate skill sets to serve on a hospital board of directors. *See* R.I. Gen. Laws § 23-17.14-7(25)(viii).

(5) "Conditions" shall mean Conditions 1-34 and all subparts as set forth herein.

(6) "Conditions and Monitoring Period" shall begin upon issuance of the Decision and extend through September 30, 2026 of Fiscal Year 2026 and such time thereafter up to reversion of funds pursuant to Condition 6.

(7) "Essential Health Care Services" to be provided by PCC and its subsidiaries shall mean the following:

a) A 24-hour emergency department;
b) Medical/Surgical Services and Intensive/Coronary Care Unit;
c) Acute Dialysis Services;
d) Inpatient and Outpatient Rehabilitation Services, including Sub-acute;
e) Ambulatory Care Services;
f) Emergency Services, including emergency behavioral health services;
g) Inpatient and Outpatient Psychiatric/Mental Health/Addiction Medicine Services;
h) Diagnostic Imaging and Interventional/Radiology Services, including diagnostic Cardiac Catheterization;
i) Laboratory/Pathology;
j) Inpatient and Outpatient Cancer Services including Blood and Marrow Transplantation/ Surgical and Radiation Oncology;
k) Sleep Lab;
l) Wound Care/Hyperbaric Services;
m) Homecare/Hospice services; and,
n) Any other primary care service, as defined by R.I. Gen. Laws § 23-17.14-18 and under Rhode Island Department of Health regulations related to said statute, not listed herein.

(8) An "Insolvency Event" shall occur if Prospect or any of its subsidiaries and/or affiliates shall: (a) file a voluntary bankruptcy petition, (b) be the subject of an involuntary bankruptcy petition that is not dismissed within forty-five days of its filing, (c) suffer, request or acquiesce in the appointment of a receiver, guardian, conservator, trustee, custodian, liquidator or other similar official over such entity or substantially all of the property or assets of such entity that is not reversed or

Confidential LGP-SBC-000000897

vacated within forty-five days of such appointment, or (d) make an assignment for the benefit of creditors, or (e) seek or be the subject of any case seeking relief under any federal, state or other statute, law or regulation relating to the creditor/debtor relationship other than as is described in clauses (a) to (d) above (each, a "Proceeding"); provided, however, that it shall not be an Insolvency Event hereunder if the aggregate revenues of the entity or entities subject to the Proceeding (each, an "Affected Entity") do not exceed 5% of the consolidated revenues of Prospect and all of its consolidated subsidiaries for any of the preceding three fiscal years; and provided further, that the preceding proviso shall not be applicable if, as a direct or indirect result of the Proceeding, Prospect or any of its other subsidiaries or affiliates either (i) lose access to cash in the ordinary course of business in an amount greater than the revenues of the Affected Entity or Entities, or (ii) suffer a material disruption to their operations in the ordinary course of business, in each case, for a period greater than seven (7) days.

(9) "Leonard Green" shall mean Green Equity Investors V, L.P. ("GEI V"), Green Equity Investors Side V, L.P. ("GEI Side V"), and Ivy LGP Co-Invest LLC ("LGP Co-Invest").

(10) "MAAP Obligations" shall mean PCC's obligations under the **CMS Accelerated and Advance Payment** Program or Medicare **Advance Payment** Program, including all recoupments, fines, penalties and any other related costs and expenses.

(11) "PCC" or "Prospect CharterCARE" shall mean, collectively, Prospect CharterCARE, LLC and its subsidiaries in existence as of as of the date of the Decision; provided that neither Prospect CharterCARE Elmhurst, LCC nor Prospect CharterCARE Ancillary Services, LLC, shall be included in the definition of PCC or Prospect CharterCARE.

I. TRANSACTION

1. The transaction shall be implemented as outlined in the Initial Application, including all Exhibits and Supplemental Responses and as modified and/or amended consistent with these conditions, provided that $10,000,000 payable to Leonard Green pursuant to the Merger Agreement shall be contributed by Leonard Green to the funding of the Escrows set forth in Condition 6.

2. For the duration of the Conditions and Monitoring Period, upon any change in what was represented by the Transacting Parties in the Initial Application, Merger Agreement, or any supplemental responses describing post-closing actions of the Transacting Parties in connection with the approval of this transaction, notice shall be provided to the Attorney General no fewer than thirty (30) days prior to the implementation of any such change.

3. For the duration of the Conditions and Monitoring Period:

   (a) Provide notice to the Attorney General identifying any post-closing contracts, material amendments to existing contracts, or termination of contracts, among any

of the Transacting Parties and any of the current officers, directors, board members, members, or senior management of Prospect CharterCARE and its subsidiaries, no fewer than thirty (30) days prior to the implementation of any such change; and

(b) Provide notice to the Attorney General identifying any post-closing contracts, material amendments to existing contracts, or termination of contracts, among any of the Transacting Parties and any of the current officers, directors, board members, members, or senior management of Prospect Medical Holdings, except for changes to employment contracts, compensation or distribution agreements, no fewer than thirty (30) days prior to the implementation of any such change.

4. Prospect shall pay all costs and expenses due from the Transacting Parties pursuant to the Reimbursement Agreement dated January 28, 2020 in full prior to the closing of the Proposed Transaction.

II. FINANCIAL CONDITIONS

5. **Financial Commitment:** Leonard Green, solely with respect to Condition 5.1, and Prospect shall provide the following support (collectively, the "Financial Commitment") to PCC:

5.1 Provide for the Escrows and/or Letters of Credit as set forth in Condition 6.

5.2 Ensure payment of all of PCC's operating expenses and pay the difference between PCC's total net revenue and total operating expenses (net operating loss) on an ongoing basis.

5.3 Beginning in Fiscal Year 2020 through the end of Fiscal Year 2026, spend not less than $72.0 million on CAPEX for the Rhode Island Hospitals only, unless otherwise approved by the Attorney General, which shall be spent according to the following schedule:

(a) For the period covering Fiscal Year 2020 and the first three quarters of fiscal year 2021, not less than $12.0 million; and

(b) For the period between October 1, 2021 and September 30, 2026, not less than $60 million shall be spent as follows:

i. not less than $10.0 million during each fiscal year;
ii. not less than $24 million in CAPEX shall be spent by September 30, 2023; and
iii. not less than $48 million in CAPEX shall be spent by September 30, 2025.

5.4 No more than $27 million of PACE financing may be applied against the minimum CAPEX requirement.

6. Escrow/Letters of Credit: Prospect, its parent entities and/or principal shareholders shall fund the following escrow accounts (collectively the "Escrows") and provide the following irrevocable standby letters of credit (the "Letters of Credit"):

6.1 Interim Escrows. Pursuant to one or more escrow agreements acceptable to the Attorney General, Prospect, its parent entities and/or principal shareholders and Leonard Green shall, prior to Closing of the Proposed Transaction, fund three (3) escrow accounts as follows (collectively the "Interim Escrows"):

(a) The amount of $12,000,000, of which Prospect shall fund $4,000,000 and Leonard Green shall fund $8,000,000 ("the Global Conditions Escrow");

(b) The amount of $41,000,000 (the "CAPEX Escrow"), of which Prospect shall fund $14,200,000 and Leonard Green shall fund $26,800,000;

(c) The amount of $27,000,000, funded entirely by Prospect ("MAAP Escrow");

(d) The Interim Escrows shall comply with, among other things, the terms set forth in Condition 6.5;

(e) All funds that Leonard Green is required to provide for the Interim Escrows shall be paid directly by Leonard Green; and

(f) The Interim Escrows shall remain in place until replaced as set forth in Conditions 6.2 and 6.3, and the Attorney General shall provide written instructions to the escrow agent for the Interim Escrows to release the funds in the Interim Escrows for the purpose of providing the Letters of Credit and/or Escrows required by Conditions 6.2 and 6.3.

(g) In the event a draw or a reduction is required from the Interim Escrows, such draw or reduction shall take place in accordance with the provisions of Conditions 6.4 or 6.5 as applicable.

6.2 Prospect Letters of Credit. Prospect, its parent entities and/or principal shareholders shall, on or before August 15, 2021, provide three (3) irrevocable standby letters of credit (collectively the "Prospect Letters of Credit"), in accordance with and subject to Condition 6.6, as follows:

(a) A $4,000,000 letter of credit that shall not expire until the Attorney General has determined that Prospect has complied with all Conditions through September 30, 2026 ("Prospect Global Conditions LOC").

(b) A $14,200,000 letter of credit (the "Prospect CAPEX LOC") that shall be reduced in accordance with the CAPEX Escrow/LOC Reduction Schedule set forth in Condition 6.4.

(c) A $27,000,000 letter of credit (the "MAAP LOC") that shall not expire until the Attorney General has determined that all of PCC's MAAP Obligations have been satisfied in full. The MAAP LOC shall, among other things, secure Prospect's guaranty of PCC's MAAP Obligations (see Condition 9). The MAAP LOC shall be reduced quarterly, only upon the written determination of the Attorney General, by the amount of the PCC's MAAP obligations that have been satisfied in the preceding quarter.

6.3 Leonard Green Obligations. Leonard Green shall, on or before August 15, 2021, either fund Escrows or provide irrevocable standby Letters of Credit, in accordance with and subject to Conditions 6.5 and 6.6, provided that Leonard Green shall use reasonable commercial efforts to obtain the Letters of Credit as set forth in this Condition 6.3.

(a) Provide an Escrow or a Letter of Credit in the amount of $8,000,000 that shall not expire until the Attorney General has determined that Prospect has complied with all Conditions through September 30, 2026 ("LG Global Conditions Escrow/LOC").

(b) Provide an Escrow or a Letter of Credit in the amount of $26,800,000 (the "LG CAPEX Escrow/LOC") that that shall be reduced in accordance with the CAPEX Escrow/LOC Reduction Schedule set forth in Condition 6.4.

6.4 "CAPEX Escrow/LOC Reduction Schedule" shall mean the following reductions in the Prospect CAPEX LOC and the LG CAPEX Escrow/LOC (collectively the "CAPEX Funds") based on the following conditions:

(a) An $8 million reduction in the CAPEX Funds, with 40% of the reduction returning to Prospect and 60% of the reduction returning to Leonard Green, on the later to occur of September 30, 2021, or the date upon which all of the following conditions have been satisfied: (a) the Attorney General has determined in writing, based upon documentation provided by Prospect no later than July 30, 2021, that Prospect has spent not less than $12.0 million in CAPEX for the Rhode Island Hospitals between October 1, 2019, and June 30, 2021, (provided that none of the foregoing CAPEX payments shall be included in the calculation of the minimum CAPEX requirement set forth in Condition 5.3(b)); (b) Prospect has provided Letters of Credit in accordance with Condition 6.2; and (c) Leonard Green has provided Escrows or Letters of Credit in accordance with Condition 6.3.

(b) A $6.0 million reduction in the CAPEX Funds upon the written determination by the Attorney General that Prospect has complied with all Conditions through September 30, 2022, with the reduction prorated between Prospect and Leonard Green based on the Reduction Percentages.

(c) A $7.0 million reduction in the CAPEX Funds upon the written determination by the Attorney General that Prospect has complied with all Conditions through

September 30, 2023, with the reduction prorated between Prospect and Leonard Green based on the Reduction Percentages.

(d) A $7.0 million reduction in the CAPEX Funds upon the written determination by the Attorney General that Prospect has complied with all Conditions through September 30, 2024, with the reduction prorated between Prospect and Leonard Green based on the Reduction Percentages.

(e) A $7.0 million reduction in the CAPEX Funds upon the written determination by the Attorney General that Prospect has complied with all Conditions through September 30, 2025, with the reduction prorated between Prospect and Leonard Green based on the Reduction Percentages.

(f) A $6.0 million reduction in the CAPEX Funds upon the written determination by the Attorney General that Prospect has complied with all Conditions through September 30, 2026, with the reduction prorated between Prospect and Leonard Green based on the Reduction Percentages.

(g) If Prospect fails to comply with a mandated condition in a given fiscal year, the scheduled reduction for that fiscal year shall not occur until the Attorney General has determined in writing that Prospect has remedied the failure.

(h) The term "Reduction Percentages" shall mean 66.67% to the LG CAPEX Escrow/LOC and 33.3% to the Prospect CAPEX LOC.

6.5 The following terms, among others, shall apply to the Escrows:

(a) The Escrows shall not be funded by PCC's revenue, funded by a loan secured by PCC's assets, or collateralized by PCC's assets;

(b) The funds in the Escrows shall, at the written direction of the Attorney General, be distributed to the Agent/Trustee, if, as determined by the Attorney General (i) Prospect fails to comply with its obligations under II. Financial Conditions (Conditions 5-11) or Condition 22 (Continuity of Services), and/or (ii) an Insolvency Event occurs;

(c) The Attorney General shall provide written instructions, in accordance with these Conditions, to the escrow agent regarding the distribution of funds from the Escrows;

(d) The Escrows shall not be reflected as a liability of PCC or the Hospitals on their financials;

Confidential LGP-SBC-000000902

(e) The Escrows, with the exception of the Interim Escrows set forth in Condition 6.1, shall be (i) with an entity that conducts business in the State of Rhode Island, (ii) be subject to Rhode Island law, and (iii) be subject to an agreement that provides, among other things, for disputes to be resolved in the courts of Rhode Island;

(f) The agreements governing the Escrows shall be approved by the Attorney General; and

(g) The escrow agent shall be approved by the Attorney General.

6.6 The following terms, among others, shall apply to the Letters of Credit:

(a) The Letters of Credit shall not be funded by PCC's revenue, funded by a loan secured by PCC's assets, or collateralized by PCC's assets;

(b) The Letters of Credit shall list the Agent/Trustee as the beneficiary;

(c) The Letters of Credit shall be irrevocable standby letters of credit in a form acceptable to the Attorney General;

(d) The Letters of Credit may be drawn upon by the Agent/Trustee, at the written direction of the Attorney General, if, as determined by the Attorney General: (i) Prospect fails to comply with its obligations under II. Financial Conditions (Conditions 5-11) or Condition 22 (Continuity of Services) and/or (ii) an Insolvency Event occurs;

(e) The Attorney General shall provide written instructions, in accordance with these Conditions, to the financial institution issuing the Letters of Credit regarding the reduction in the Letters of Credit;

(f) The Letters of Credit shall not be reflected as a liability of PCC or the Hospitals on their financials;

(g) The Letters of Credit shall be (i) with an entity that conducts business in the State of Rhode Island, (ii) be subject to Rhode Island law, and (iii) be subject to an agreement that provides, among other things, for disputes to be resolved in the courts of Rhode Island;

(h) The agreements governing the Letters of Credit shall be approved by the Attorney General; and

Confidential LGP-SBC-000000903

(i) The Letters of Credit shall be issued by one or more financial institutions approved by the Attorney General.

6.7 Reduction determinations with respect to the CAPEX Escrows and the Letters of Credit, as applicable, will be made by the Attorney General within thirty (30) days after documentation provided by Prospect to support a reduction is deemed complete by the Attorney General, such completeness determination not to be unreasonably withheld.

6.8 (a) If the Attorney General determines in writing, as provided in Condition 6.7, that Prospect has failed to comply with any of the required Conditions at any time in a given fiscal year, the Attorney General shall provide Prospect with written notice specifying in reasonable detail the Condition(s) that the Attorney General has determined has not been satisfied and the reasons therefor, and Prospect shall have thirty business days to cure any and all deficiencies with respect to such specified Condition(s). If Prospect has cured any and all deficiencies with respect to such Condition(s) within thirty (30) days of such written notice, the Attorney General shall make the scheduled reduction determination as provided in Condition 6.7.

(b) The Attorney General shall notify Prospect ten (10) days prior to any draw of the Escrows or Letters of Credit pursuant to Conditions 6.5(b) or 6.6(d), respectively, such notification to specify in reasonable detail the Condition(s) that the Attorney General has determined has not been satisfied and the reasons therefor, unless exigent circumstances exist, including but not limited to significant service disruptions or imminent closure of either of the Rhode Island Hospitals which require an immediate draw, in which case the Attorney General shall so inform Prospect, and may proceed with the draw within two (2) business days.

6.9 Prospect and Leonard Green shall pay all fees and costs associated with the Escrows and Letters of Credit.

6.10 Agent/Trustee Agreement. Any of the funds from the Escrows and/or the Letters of Credit that are delivered to the Agent/Trustee shall be governed by the Agent/Trustee Agreement. Prospect and Leonard Green shall execute the Agent/Trustee Agreement within five (5) business days of its approval by the Attorney General.

7. Operating Covenants

7.1 PCC shall ensure all payroll, including salaries, retirement contributions and benefits, payroll taxes, property taxes, sales taxes, hospital taxes and fees and workers compensation is paid on a timely basis. In the event that any such payments are delinquent by more than 15 days, PMH shall provide funding in an amount equal to the delinquency and cure the delinquency within thirty (30) days upon notification of the delinquency.

7.2 PCC shall ensure its vendors are paid on a timely basis. In the event accounts payable days outstanding is greater than 90 days, PMH shall provide funding to PCC so that accounts payable are less than 90 days at the next quarterly measurement.

8. **PACE Obligation**: Prospect shall guarantee the satisfaction of, and pay, all obligations owed by the Rhode Island Hospitals for PACE financing, including all debt service payments, fines, penalties and any other PACE related costs and expenses during the period of Prospect's ownership of Prospect CharterCARE and the Rhode Island Hospitals, and shall enter into an agreement prior to closing of the Proposed Transaction to meet this obligation.

9. **MAAP Obligation**

9.1 Prospect shall guarantee the satisfaction of, and pay, all MAAP Obligations of the provider organizations within PCC, including the Rhode Island Hospitals and shall enter into an agreement prior to closing of the Proposed Transaction to meet this obligation.

9.2 Prospect shall use its best efforts to obtain favorable terms for the repayment of all of the MAAP Obligations of all the provider organizations within PCC, including the Rhode Island Hospitals, and provide the Attorney General with the terms of any such agreement.

10. **TRS Note and MPT Amendments:** Prospect shall extend the maturity of the TRS Note[45] to five (5) years from April 30, 2021, and none of the PCC assets shall be used to satisfy the TRS Note during said five (5) year period, including through a sale/lease-back of said assets. Thereafter, any transfer of the PCC assets, including through a sale/lease-back, shall not occur unless and until approved by the Attorney General pursuant to the Hospital Conversion Act, R.I. Gen. Laws § 23-17.14-1 *et seq*. Prospect shall amend the TRS Note to reflect these Conditions and execute it prior to the closing of the Proposed Transaction.

11. **Management Fees:** Upon consummation of the contemplated buy-out of the 15% CCCB ownership in Prospect CharterCARE as approved by the courts or September 30, 2021, whichever is sooner, the Prospect CharterCARE Management Services Agreement shall be terminated and no management fees shall be assessed to or collected from PCC, including prior accrued management fees. During the Conditions and Monitoring Period, no management fees or other similar charges and assessments of any type pertaining to Prospect's central office functions shall be levied against Prospect CharterCARE or the Rhode Island Hospitals.

III. MONITORING AND NOTICE

12. Prospect shall comply with all necessary agreements for payment of reasonable costs associated with the expert(s) to assist the Attorney General with monitoring and enforcing compliance with the Conditions pursuant to R.I. Gen. Laws § 23-17.14-28(d)(3) and for payment of the fees of the Agent/Trustee during the Conditions and Monitoring Period. Escrow accounts shall be established and funded pursuant to these agreements prior to the closing of the Proposed Transaction.

13. Not later than the fiftieth (50th) day after the end of each fiscal quarter, Prospect shall provide the Monitor and the Attorney General with quarterly financial statements, quarterly

[45] The TRS Note is defined herein on pp. 5 and 32.

Confidential LGP-SBC-000000905

balance sheet, quarterly statement of operations and quarterly statement of cash flows (including accounts payable and any amounts due to or due from affiliates), for Prospect Medical Holdings and Prospect CharterCARE and any other evidence documenting compliance with II. Financial Conditions (Conditions 5-11) and Condition 22 for the preceding quarter, which documents shall be certified as accurate by Prospect's Chief Financial Officer, and the PCC board minutes (Condition 29).

14. Not later than February 15th of each year, Prospect shall furnish the Monitor and the Attorney General with the audited annual financial statements of Prospect Medical Holding and Prospect CharterCARE, including but not limited to: (a) documentation of compliance with II. Financial Conditions (Conditions 5-11) and Conditions 16-29 for the preceding fiscal year, including any and all supporting documents for expenditures, including but not limited to general ledgers, current contracts, invoices, receipts, and (b) providing a projected capital budget for PCC for the next three (3) years.

15. During the Conditions and Monitoring Period, Prospect shall provide the Attorney General with evidence of a board vote of the Boards of Prospect and PCC, each accepting the audited financial statements of both Prospect and PCC.

16. **MPT, TRS Merger Agreement, PACE, MAAP, and Insolvency Event Notice:** During the Conditions and Monitoring Period, provide the Attorney General with:

16.1 notice of any proposed change to the documents related to the MPT Transaction[46] to the extent the changes concern, will by their terms apply to, or will materially impact any Rhode Island entities, no fewer than thirty (30) days prior to the implementation of any such change;

16.2 notice of any activity concerning the TRS Note, including but not limited to, repayment, refinancing, default and/or waiver, no fewer than thirty (30) days prior to the implementation of any such change;

16.3 copies of any and all notices provided to or received by a party under the Merger Agreement;

16.4 notice of any proposed change to the documents related to the obligations owed by the Rhode Island Hospitals for PACE financing, no fewer than thirty (30) days prior to the implementation of any such change;

16.5 notice of any proposed change to the documents related to the MAAP obligations of the provider organizations within PCC, including the Rhode Island Hospitals, no fewer than thirty (30) days prior to the implementation of any such change; and

16.6 notice of any and all Insolvency Event(s) of Prospect and/or any of its subsidiaries. For purposes of this Condition, the exclusion of Proceedings for Affected Entities whose

[46] The MPT Transaction is defined herein on p. 32.

Confidential LGP-SBC-000000906

aggregate revenues do not exceed 5% of the consolidated revenues of Prospect and all of its consolidated subsidiaries for any of the preceding three fiscal years, shall not apply.

17. During the Conditions and Monitoring Period provide sixty (60) days' written advance notice to the Attorney General of any terminations or material amendments to the internal agreements between the Rhode Island entities and Prospect and its affiliates (e.g., Management Agreement).

18. During the Conditions and Monitoring Period provide sixty (60) days' written advance notice to the Attorney General of any and all new proposed organizational agreements between the Rhode Island entities and Prospect and its affiliates.

19. During the Conditions and Monitoring Period, real or personal property, including any lines of service, owned by PCC with a value in excess of $100,000 shall not be sold, transferred or encumbered without prior notice of at least sixty (60) days and approval by the Attorney General. This condition shall not be construed to limit the authority of the Attorney General under R.I. Gen. Laws § 23-17.14-1, *et seq*.

20. Prospect shall provide any and all notifications related to the Settlement Agreement in Case # 1:18-cv-00328-WES/PC-2017-3856, including but not limited to, all court approvals and implementation of the contemplated buy-out of the 15% CCCB ownership in Prospect CharterCARE.

21. During the Conditions and Monitoring Period, Prospect and Prospect CharterCARE shall provide:

    (a) Any and all notices of investigation, violations, adverse findings, determinations and actions including fines and penalties, or complaints from the Office of Inspector General, Securities and Exchange Commission, Internal Revenue Service, Centers for Medicare and Medicaid Services, United States Department of Justice, any state attorney general, the Rhode Island Department of Health, Rhode Island Medicaid, any other Rhode Island regulatory body, or any hospital accreditation organizations, as well as any and all documents related to the resolution of any notices or complaints;

    (b) Any and all notices or complaints received from the state of Rhode Island or a Rhode Island municipality for violations, or potential violations, of state tax law, including but not limited to, any notice for delinquency in payments of taxes; and

    (c) All notices, complaints, or other documents shall be provided to the Attorney General within fifteen (15) days of receipt by Prospect and/or Prospect CharterCARE.

IV. BENEFITS, GOVERNANCE AND CONTINUITY OF SERVICES

22. During the Conditions and Monitoring Period, Prospect and PCC shall keep the Rhode Island Hospitals open and operational and maintain and continue to provide at each Hospital and all non-hospital settings the full complement of Essential Health Care Services. PCC shall continue to provide access to quality healthcare services and maintain good standing status with all state and federal licensing and regulatory requirements and shall meet all accreditation standards. There shall be no suspension, termination, or material reduction of Essential Health Care Services currently provided by PCC without the prior approval by the Rhode Island Department of Health.

23. During the Conditions and Monitoring Period, PMH shall guarantee funding of the PCC 401K retirement plan(s) matching contributions in accordance with the methodology in place as of the most recent plan year. Nothing herein shall impair the right of any union now existing, or to be formed at any of the PCC entities in the future, to negotiate changes to existing collective bargaining agreements and/or to enter new collective bargaining agreement provisions with respect to 401K retirement plan(s).

24. For the six (6) months following the issuance of the Decision, Prospect shall make no changes to benefits currently provided under PCC's current plans, including vacation, sick leave, holiday, health insurance, life insurance, and continued COBRA coverage, at current levels. Thereafter and during the Conditions and Monitoring Period, Prospect shall continue to provide benefits, including vacation, sick leave, holiday, health insurance, life insurance, and continued COBRA coverage. Nothing herein shall impair the right of any union now existing, or to be formed at any of the PCC entities in the future, to negotiate changes to existing collective bargaining agreements and/or to enter new collective bargaining agreement provisions with respect to benefits.

25. During the Conditions and Monitoring Period Prospect and/or Prospect CharterCARE shall provide written notice to the Attorney General (i) within ten (10) days upon the adoption of any resolution or plan to implement a reduction in workforce, layoff, furlough, or other restructuring of the workforce that will lower the number of employed FTEs by thirty (30) or more in the course of a fiscal year at PCC, or by ten (10) or more clinical staff (physicians and/or nurses) at either of the Rhode Island Hospitals; and (ii) again no fewer than thirty (30) days prior to the implementation date thereof.

26. During the Conditions and Monitoring Period, Prospect CharterCARE shall continue to provide charity care consistent with its current charity care policy and consistent with all applicable laws and Rhode Island Department of Health Regulations 216-RICR-40-10-23, and provide the Attorney General with supporting documentation evidencing its charitable and uncompensated care expenditures.

27. Prospect and Chamber shall notify the Attorney General of the initial board members prior to closing of the Proposed Transaction and, during the Conditions and Monitoring Period, shall notify the Attorney General of any change in the boards within thirty (30) days of such change.

28. Within thirty (30) days of Prospect's buyout of the 15% CCCB ownership in Prospect CharterCARE, the corporate document that functions as bylaws for Prospect CharterCARE shall be amended to require approval of the majority of all board members, for all matters that were previously listed in Section 8.3 of the Prospect CharterCARE LLC Agreement, dated June 20, 2014.

29. Following Prospect's buyout of the 15 % CCCB ownership in Prospect CharterCARE, and through completion of the Conditions and Monitoring Period, the board shall include Samuel Lee, a licensed and practicing physician, and consist of 40-49% Community Directors. All of the Community Directors shall: (1) be independent of and not employed by or affiliated with Prospect or its affiliates; and (2) not be an elected official or an individual that is subject to the Code of Ethics. The corporate document that functions as the bylaws shall be amended to reflect this Condition within thirty (30) days of Prospect's buyout of the 15% CCCB ownership in Prospect CharterCARE. Prospect shall produce all PCC board minutes to the Attorney General with the quarterly reporting set forth in Condition 13.

30. Prospect CharterCARE shall notify the Attorney General of the initial board members within thirty (30) days of the implementation of Condition 29 and, during the Conditions and Monitoring Period, shall notify the Attorney General of any change in board members board within thirty (30) days of such change.

31. During the Conditions and Monitoring Period, all board members of Prospect, Chamber, and Prospect CharterCARE shall be required to complete fiduciary training on an annual basis and provide certification of completion to the Attorney General.

32. During the Conditions and Monitoring Period, all board members of Chamber, Prospect and Prospect CharterCARE shall file annual conflict of interest statements on a form provided by the Attorney General no later than May 31 of each year. Additionally, any newly appointed board member must file a conflict of interest statement within thirty (30) days of appointment.

33. Prospect, Prospect CharterCARE, and any and all subsidiaries shall provide, within a reasonable time, any and all information requested by the Attorney General and/or the Attorney General's monitor(s) to confirm compliance with all Conditions stated herein.

34. If Prospect and PCC seek a determination by the Attorney General that any information submitted pursuant to the above Conditions should be deemed confidential and/or proprietary under R.I. Gen. Laws § 23-17.14-32, they shall submit such information clearly labeled "Request for Confidentiality" and shall including the legal citation and/or explanation for the reason that the information should be deemed confidential.

Providence, RI 02903

Dear Ms. [redacted]

In accordance with our retainer agreement dated May 13, 2020, I was engaged by your office to provide financial advisory services in your review of the Chamber/Ivy application under the Hospital Conversion Act.

I have reviewed the documentation provided by the transacting parties, including the statements under oath of the key participants. I reviewed the financial statements and other information provided only in the context of the proposed transaction and this report should not be used by any of the parties for any other purpose. Additionally, this report is not an audit of Prospect Medical Holdings, Inc. (PMH) or any of its subsidiaries or affiliates. The attached Exhibits are an integral part of this document.

Transaction:

As described by the transacting parties, the proposed transaction is to effectuate a buyout of the private equity investors (Leonard Green) and other minor shareholders of PMH resulting in the original co-founders (Lee and Topper) as sole shareholders of PMH. There is no change in corporate ownership proposed for any of the Rhode Island entities. In other words, the change in control is at the ultimate parent level (Chamber & Ivy Holdings).

If approved, Prospect CharterCare SJHSRI, LLC and Prospect Charter Care RWMC, LLC will continue to be owned by Prospect CharterCare, LLC. As of September 30, 2020, Prospect CharterCare, LLC was owned 85% by Prospect East Holdings, Inc. (Prospect East), a wholly owned subsidiary of PMH and 15% by CharterCare Community Board (CCCB). Subsequent to September 30, 2020, PMH entered into a settlement agreement, part of which, when effective, will result in Prospect East purchasing CCCB's 15% ownership interest. This settlement agreement is outside the scope of my report, but the amount of the settlement is included in the FY 2020 audited financial statements.

The agreed upon purchase price is approximately $12 million and is to be accounted for as a share buyback directly from PMH.

The parties have stipulated that the purchase price was the result of negotiations between the transacting parties taking into account the following factors:

1. The enterprise value of PMH
2. The equity value of PMH
3. The dividend recapitalization transaction which occurred in FY 2018
4. Future obligations of PMH, and
5. Future capital needs of PMH

Further, the parties have stipulated that they are sophisticated investors in the healthcare industry and did not require the assistance of external consultants. As such, no reports or valuation analyses were provided for our review.

They also stated PMH will not incur any additional debt nor distribute any dividends to the acquiror as a result of this transaction.

Analysis:

I will get into greater detail later in this report when I discuss the financial statements of PMH and the Rhode Island entities, but a couple of items should be highlighted here. First, we have no way of determining if the $12 million acquisition price is fair and reasonable. [redacted] To put it into context, if 60% of the company is worth $12 million, then 100% of the company is worth $20 million. That is for a company whose FY 2020 audited financial statements report over $2.7 billion in net revenues and over $2.0 billion in total assets.

For $12 million, the acquirors (Lee & Topper) will own 100% of PMH including the $2.0 billion in assets as well as assuming all of PMH's debt and other liabilities (approximately $3.1 billion at 9/30/20), including all MPT obligations. While the debt will remain with PMH, neither Lee nor Topper are personally guaranteeing any of the existing debt or liabilities of PMH. All Lee and Topper have at risk are the amounts currently invested in PMH. No other personal assets are being pledged or collateralized.

Secondly, the $12 million purchase price is to be accounted for as a share buy-back. While no additional debt or dividend is contemplated, the cash is still coming from the company and not the co-founders. This will further weaken the balance sheet (less cash on hand) and reduce the current ratio of PMH. This may potentially benefit the co-founders, since company rather than personal funds are being used, at the expense of the subsidiary hospitals.

Finally, the transacting parties acknowledge that the leveraged dividend recapitalization transaction in fiscal 2018 was a factor in determining the purchase price. An argument could be made that this change of control exit strategy began in 2018 with this $456 million leveraged dividend recapitalization. As I will discuss further, the 2018 transaction substantially weakened

the balance sheet of PMH, benefitting the shareholders while providing minimal or no funds to any of the local operating entities.

By definition, a dividend recapitalization is a type of leveraged recapitalization that involves the issuing of new debt that is later used to pay a special dividend to shareholders. This reduces a company's equity financing in relation to its debt financing. The source of the dividends distributed as a result of dividend recapitalization is newly incurred debt, not the company's earnings. The recapitalization directly impacts the company's capital structure since its leverage increases.

Financial Statement Review:

During the course of my review, I had access to all documents provided by the transacting parties. This report focuses primarily on the financial statements provided as well as interviews under oath of senior management (both PMH and local) and the local board members.

Rhode Island Entities:

Prospect CharterCare SJHSRI, LLC

The transacting parties provided audited financial statements for Prospect CharterCare SJHSRI, LLC (SJHSRI)for the fiscal years ended September 30, 2015, 2016, 2017, 2018, 2019 and 2020. As can be seen in Exhibit 1, Comparative Statement of Operations, net revenue was basically flat during the five-year period, FY 2015 through FY 2019 ranging from a low of $141.2 million to a high of $144.9 million. Total operating expenses for the same period varied slightly more than revenues from a low of $140.5 million to a high of $148.8 million. Net income ranged from a high of $1.8 million to a loss of $6.1 million. The cumulative loss over the five-year period was $8.7 million.

For FY 2020, net revenue decreased $21.3 million (14.8%) from FY 2019. This decrease in net revenue was offset by $18 million in pandemic relief funds. Operating expenses increased $9.3 million from FY 2019. The increase includes the legal settlement of $22.3 million discussed above. The overall net loss for FY 2020 was $11 million. Without the legal settlement, SJHSRI would have had net income of $ $11.2 million in FY 2020.

The comparative Balance Sheet for the six years is shown in Exhibit 2. There are a few significant items to point out on the balance sheet. First, little or no cash is shown on the local entities [redacted] PMH manages all cash flow and determines what items will be paid and when they will be paid. Second, Property, Plant and Equipment (PPE), net is essentially flat over the six-year period. That means acquisitions or additions to PPE effectively equal the amount of deprecation on an annual basis. It does not

appear that any major new capital projects have occurred at SJHSRI since the original transaction in 2014.

In FY 2015 through FY 2019, a due to affiliated companies (meaning funds were due back to PMH or other PMH affiliates) was reported on the SJHSRI balance sheets ranging from a low of $744,000 to a high of $5.7 million. The FY 2020 audited financial statements report a due from affiliates of $21.6 million. This represents a one-year change of $26.8 million from FY 2019, meaning PMH or its other affiliates transferred $26.8 million from SJHSRI to fund other operations. The primary driver of this change were the pandemic relief funds which were received by SJHSRI [redacted] At 9/30/20, SJHSRI reports a total refund liability for various pandemic funds of $10.2 million. Of the total, $2.3 million is in current liabilities (due within 12 months and $7.9 million is in long-term liabilities (due after 12 months). [redacted]

I will discuss this further in the Covid -19 section of this report.

Subsequent to 9/30/20, SJHSRI entered into an agreement with a third party that specializes in property assessed clean energy financing (PACE) to finance qualifying renovations. This will be discussed later in this report.

Finally, in the auditor's opinion of the annual financial statements for FY 2015 through 2019, they emphasize that "*the Company is financially dependent on its parent companies which have agreed to provide the financial support necessary for the operations of the Company. The accompanying financial statements do not reflect any adjustments or disclosures that would be required should the parent companies discontinue their financial support*".

In FY 2020, the liquidity footnote addresses the $21.6 million due from affiliates and states, *"the Company is dependent on this receivable settling in order to maintain its current liquidity"*.

Unlike a not-for-profit hospital which might have an endowment or other fundraising methodology to fund losses, SJHSRI is totally dependent on its parent and other affiliates and is not substantially viable without support from Prospect CharterCare, LLC and ultimately PMH.

Prospect CharterCare RWMC, LLC

The transacting parties provided audited financial statements for Prospect CharterCare RWMC, LLC (RWMC) for the fiscal years ended September 30, 2015, 2017, 2018, 2019 and 2020. They did not provide audited financial statements for FY 2016. The lack of these financial statements has no material impact on my overall analysis. As can be seen in Exhibit 3, Comparative Statement of Operations, net revenue increased from $171.1 million in FY 2015 to $183.3 million in FY 2019. Total operating expenses were $167.6 million in FY 2015 and $181.6

Confidential LGP-SBC-000000919

million in FY 2019. Net income ranged from a high of $3.9 million to a loss of $12.0 million. The cumulative loss through FY 2019 was $16.6 million.

For FY 2020, net revenue decreased $13.4 million (7.3%) from FY 2019. This decrease in net revenue was offset by $16.7 million in pandemic relief funds. Operating expenses decreased $1.7 million from FY 2019. Overall net income for FY 2020 was $7.5 million, resulting in cumulative net losses of $9.1 million through the end of FY 2020.

The comparative Balance Sheet for FY 2015 through FY 2020 (excluding FY 2016) is shown in Exhibit 4. As with Prospect CharterCare SJHSRI, little or no cash is reported on the balance sheet since cash [redacted] Property, Plant and Equipment (PPE), net increases from $25.5 million in FY 2015 to $35.2 million in FY 2020. [redacted]

In FY 2015 through FY 2019, a due to affiliated companies was reported on the RWMC balance sheets ranging from a low of $5.1 million to a high of $25.8 million. The FY 2020 audited financial statements report a due from affiliates of $31.3 million. This represents a one-year change of $57.1 million from FY 2019, meaning PMH or its other affiliates transferred $57.1 million from RWMC to fund other operations. Approximately $35 million of this change results from pandemic relief funds which were received by RWMC [redacted] In addition to the $18 million in pandemic relief grants, at 9/30/20, RWMC reports a total refund liability for various pandemic funds of $16.8 million ($3.8 current, $13.0 long-term). [redacted]

I will discuss this further in the Covid -19 section of this report.

During FY2020, RWMC entered into an agreement with a third party that specializes in property assessed clean energy financing (PACE) to finance approximately $42 million qualifying renovations. This will be discussed later in this report.

The same auditor's opinion applies to RWMC's FY 2015 – FY 2019 (excluding FY 2016) annual financial statements, where they emphasize that *"the Company is financially dependent on its parent companies which have agreed to provide the financial support necessary for the operations of the Company. The accompanying financial statements do not reflect any adjustments or disclosures that would be required should the parent companies discontinue their financial support"*.

In FY 2020, the liquidity footnote addresses the $31.3 million due from affiliates and states, *"the Company is dependent on this receivable settling in order to maintain its current liquidity"*.

Once again, unlike a not-for-profit hospital which might have an endowment or other fundraising methodology to fund losses, RWMC is totally dependent on its parent and other affiliates and is not substantially viable without support from Prospect CharterCare, LLC and ultimately PMH

Confidential

Prospect CharterCare, LLC

The transacting parties provided audited financial statements for Prospect CharterCare, LLC (PCC) for the fiscal years ended September 30, 2015, 2016, 2017, 2018, 2019 and 2020. Prospect CharterCare, LLC is the parent company of Prospect CharterCare SJHSRI, LLC and Prospect CharterCare RWMC, LLC. It also includes other health care entities (such as physician group practices) under the CharterCare umbrella. As can be seen in Exhibit 5, Comparative Statement of Operations, net revenue increased from $318.3 million in FY 2015 to $356.7 in FY 2019. As further discussed in the Covid 19 section of this report, net revenue decreased $34.5 million (9.7%) in FY2020 to $322.2 million. Total operating expenses for the same period varied slightly more than revenues from a low of $319.1 million to a high of $372.7 million. Net losses ranged from $.6 million $36.2 million. The cumulative loss over the six-year period was $88.2 million.

For FY 2020, the decrease in net revenues is offset by $36.1 million in pandemic relief grants. Additionally, operating expenses include the $22.2 million in legal settlement discussed earlier. If the legal settlement is excluded, PCC has net income of $7.6 million instead of the reported loss of $14.6 million.

The comparative Balance Sheet for the six years is shown in Exhibit 6. [redacted] For FY 2015 through FY 2019, PCC reported a significant due to affiliated companies. This ranged from a low of $16.7 million to a high of $28 during the five-year period. These were amounts due to PMH and/or other affiliates primarily for funding operating losses, capital equipment purchases and acquisitions of physician group practices.

At 9/30/20, there is a $32.5 million due from affiliates which primarily relates to Covid -19 funds received by the Rhode Island hospitals from various governmental entities. This represents a one-year change of $49.2 million from FY 2019, meaning PMH or its other affiliates transferred $49.2 million from PCC to fund other operations. The primary driver of this change were the pandemic relief funds which were received by PCC [redacted] At 9/30/20, in addition to the $36.1 million in pandemic relief grant, PCC reports a total refund liability for various pandemic funds of $27.5 million ($6.2 current, $21.3 long-term). [redacted]

I will discuss this further in the Covid -19 section of this report.

The same auditor's opinion applies to Prospect CharterCare's FY 2015 – FY2019 annual financial statements, where they emphasize that *"the Company is financially dependent on its parent company which has agreed to provide the financial support necessary for the operations*

of the Company. The accompanying financial statements do not reflect any adjustments or disclosures that would be required should the parent company discontinue their financial support".

Similarly, in FY 2020, the liquidity footnote addresses the $21.6 million due from affiliates and states, *"the Company is dependent on this receivable settling in order to maintain its current liquidity".*

In other words, Prospect CharterCare, LLC is not substantially viable without support from PMH.

Obviously, the continued financial health of PMH is of vital importance to Prospect CharterCare and its subsidiaries and affiliates. [redacted] While the functions of the local board were beyond the scope of this report, most properly functioning boards should be concerned about the viability of on-going operations as well as how to fund any shortfalls and necessary capital improvements. This lack of basic financial oversight should be addressed.

The last few sections of this report have detailed why the financial health of PMH is of vital importance to Prospect CharterCare and its subsidiaries and affiliates. Exhibit 7 shows that Prospect CharterCare is important to PMH. PMH's assets and net revenues have grown substantially since the original transaction in 2014. Even after all the growth and acquisitions of the past few years, Prospect CharterCare still accounts for 11.79% of PMH's net revenue and 7.84% of PMH's total assets in FY 2020.

PMH Financials:

The transacting parties provided audited financial statements for Prospect Medical Holdings, Inc. for the fiscal years ended September 30, 2015, 2016, 2017, 2018, 2019 and 2020. Exhibit 8 details the Comparative Statement of Operations for FY 2015 through FY 2020.

Total net revenues increased from $1.3 billion in FY 2015 to $2.73 billion in FY 2020 (a 207% increase). PMH has added hospitals and related entities in a number of states during that time. Also, as outlined later in this report, COVID-19 adversely affected operations in FY2020. This added growth has increased the top line (revenues) but has not made the company more profitable. In fact, operating income has decreased from $108.3 million in FY 2015 to $ 15.6 million in FY 2020 (an 86% decrease).

Growth has been primarily funded through debt and the sale-leaseback of certain properties to MPT.

Not all of the acquisitions were successful, as the loss from discontinued operations (net of taxes) has totaled $206 million for the six-year period FY 2015 to FY 2020.

Confidential

This results in PMH's annual comprehensive gain or loss going from a gain of $34 million (2.6% of net revenue) in FY 2015 to a loss of $90 million (- 3.3% of net revenue) in FY 2020. The cumulative comprehensive loss for the six-year period was $603 million.

The comparative Balance Sheet for the six years is shown in Exhibit 9. The rapid growth and increase in debt have strained the company's balance sheet.

Long-term debt (excluding capital leases) has increased from $451 million in FY 2015 to almost $1.6 billion in FY 2020. Not all the additional debt went to fund operations or acquisitions. As previously noted, PMH executed a leveraged dividend recapitalization in February 2018. At that time, PMH closed a $1.12 billion debt financing, paid off their existing debt and issued a $457 million dividend to the shareholders. The primary beneficiaries of the dividend were Leonard Green (and its partners and investors), Lee and Topper. PMH issued an additional dividend of $44 million in FY 2019. As a consequence, $500 million is no longer available to any of the existing operating entities.

[redacted]

Between the $500 million in dividends and $603 million in comprehensive losses, PMH had a $1.06 billion deficit in stockholder equity. Put another way, liabilities exceed assets by more than $1 billion at the end of FY 2020.

Exhibit 10 details some key ratios for PMH for FY2015 through FY2020. Days cash on hand was approximately 20 days in FY 2015. It dropped into single digits for FY2016 through FY2019 with a low of 1 day cash on hand at the end of FY 2018 (the year of the large dividend). For FY 2020, days cash on hand increases to almost 52 days. However, as I discuss in the COVID-19 section of this report, that increase is primarily due to increase funding of COVID relief programs. Much of that cash will need to be paid back.

The current ratio currently exceeds 1.0 so PMH has marginal liquidity. PMH also had an available line of credit of approximately $211 million as of 9/30/20 which could be used to fund operations. The quick ratio is below 1.0 for all six years. Liquidity is discussed further in the COVID-19 section of this report.

The debt-to-equity ratio has been negative for the past three years because of large losses and the $500 million in dividend payments.

If the transaction is approved and Leonard Green exits its investment in PMH, that will remove an additional capital source for new equity. However, since its original investment in 2010, Green has not infused any substantial equity into PMH. Keeping them in the ownership structure is no guarantee that they will add equity, if needed.

Confidential

MPT Transaction:

On August 23, 2019, PMH closed a series of transactions with affiliates of Medical Properties Trust, Inc. (MPT), a publicly traded Real Estate Investment Trust (REIT). The footnotes to PMH's audited financial statements provide a detailed summary of the transactions. To summarize, there were three separate transactions between PMH and MPT.

The first transaction involved the sale to MPT of all PMH's hospital buildings in California (excluding Foothill Regional Medical Center (Foothill)), Connecticut and Pennsylvania for a purchase price of approximately $1.4 billion. The initial lease term is 15 years with three potential extensions for a total of another 15 years. The specific master lease, rent, options to purchase, cross guarantees and escalation clauses are detailed in the financial statements. The important point is these PMH facilities are now owned by MPT.

Under the second transaction, MPT provided PMH with a mortgage of approximately $51 million on the Foothill property. The mortgage has an interest rate of 7.5% per annum and matures in August 2034.

In the third transaction, PMH entered into a promissory note (the "TRS" note), under which MPT advanced PMH approximately $113 million. Interest on this note is 7.5% per annum and is subject to an annual escalation clause. The maturity date of this note is the earlier of July 2022 or, if it occurs, a sale-leaseback of the properties in Rhode Island. At 9/30/20, the balance due under the TRS note was approximately $105.5 million.

All three transactions are cross-collateralized and cross defaulted among the parties (but no personal guarantees of Green, Lee or Topper) and the assets included therein. The applicant has stipulated and the footnotes to the financials state that neither the hospital operating entities nor the real properties in Rhode Island are included in the cross-collateral or cross default agreements.

Two key takeaways from the MPT transaction are:

1. PMH has sold substantially all its real property except for Foothill and the Rhode Island properties. There is very little left to leverage to provide liquidity.

2. It is possible that another change of control may be sought prior to July 2022, to satisfy the TRS note using the Rhode Island properties in a sale-leaseback arrangement.

Confidential

PACE Financing:

Property assessed clean energy (PACE) programs allow a property owner to finance the up-front cost of energy or other eligible improvements on a property and then pay the costs back over time through a voluntary assessment. A unique characteristic of PACE assessments is that the assessment is attached to the property rather than an individual or company.

As noted in the PCC audited financial statements, in May 2020, PCC entered into an agreement with a third party that specializes in (PACE) financing to finance approximately $42 million for qualifying renovations for the property located at RWMC.

The full amount was deposited into an escrow account managed by a third-party administrator. The annual interest rate is 5.75% and the financing has a maturity date of April 30, 2045. Payments are collected through property tax bills as a non-ad valorem assessment. Payments begin in July 2020. As of 9/30/20, PCC recorded a liability of approximately $27 million and had approximately $15 million left to spend on qualifying renovations.

In January 2021, PCC entered into a similar PACE arrangement for qualifying renovations at SJHSRI for approximately $18 million. The annual interest rate is 5.75% and has a maturity date of July 31, 2046.

It is unclear how, if at all, these PACE arrangements effect any potential sale-leaseback of the Rhode Island properties under the TRS note mentioned above.

FY 2020 and COVID-19:

PMH:

The operations of PMH, similar to all other healthcare entities, were adversely affected by the spread and impact of COVID-19. According to PMH management, a number of steps were taken to mitigate the impact. Additionally, the federal and various state governments instituted legislation to assist healthcare entities with the financial ramifications.

The two primary sources of relief for healthcare institutions were the Coronavirus Aid, Relief and Economic Security Act (the CARES Act) and Paycheck Protection Program and Health Care Enhancement Act (the PPPHCE Act). The details of the two acts are beyond the scope of this report. However, PMH took advantage of both CARES and PPPHCE, as well as some state programs funding during FY2020.

For the year ended 9/30/20, PMH recognized approximately $117 million in Pandemic relief grant income. While PMH reported a comprehensive loss of approximately $90 million for FY 2020, the loss would have been over $200 million without this programmatic support.

Confidential

Additionally, funding from these programs helped stabilize the balance sheet, at least temporarily. At 9/30/20, PMH reported cash on hand of approximately $387 million. While approximately $120 million appears to relate to extending accounts payable, most of the increase appears to be from these government programs. Ultimately, approximately $276 million will need to be repaid so the cash cushion is not permanent.

PCC:

The operating results of PCC were also adversely impacted by COVID-19. Similar to PMH, PCC took steps to minimize the impact and also took advantage of CARES, PPPHCE and state programs.

For the year ended 9/30/20, PCC recognized approximately $36 million ($18 @ SJHSRI, $16.7 @RWMC and $1.3 other) in Pandemic relief grant income. PCC also reports liabilities approximately $27.5 million ($10.2 at SJHSRI, $16.8 at RWMC and $.5 other) under these various programs. $6.2 million is due during FY2021 and $21.3 million is classified as long-term (greater than 12 months). [redacted]

Conclusion:

My overall conclusion is that PMH is a highly leveraged company that continues to have large annual losses. Liabilities exceed assets by over $1 billion and the cumulative losses exceed $600 million for the six-year period under review. Additionally, the current owners issued over $500 million in dividends since PMH purchased the Rhode Island entities which benefitted the shareholders and weakened the financial position of PMH.

While pandemic relief from governmental entities has provided PMH with some short-term liquidity, that liquidity will evaporate as governmental funds are repaid and accounts payable becomes normalized.

If the transaction is approved, Leonard Green with be out and will not be available for additional equity contributions. Even if they remained in PMH, Green has been a net drain on Company assets. [redacted] Management seems to be relying on debt and the $200 million line of credit to fund the Company. This is mentioned in the footnotes to the FY 2020 audited financial statements and was reiterated by certain members of management during their interviews. However, there is no guarantee that lending institutions will leave that facility in place if losses continue to mount and there is no profitability forecasted.

While I do not believe that PMH faces a liquidity crisis in the next twelve months, I believe it will come sooner rather than later, probably within 18 to 24 months. They cannot continue to have significant operating losses and fund necessary capital projects and expect to survive long-term. The situation is complicated by the TRS note which is due in July 2022 and the fact that

most of the real property has already been sold to MPT. Unless PMH improves their operating results, they will eventually need an equity infusion or some type of debt restructuring.

In the meantime, if you approve the transaction, your office will need to impose certain conditions to ensure the continued operations of PCC, RWMC and SJHSRI. While any conditions are beyond the scope of my report, at a minimum, I would recommend continued funding of operations, capital improvements, repayment of pandemic relief funds and maintenance of all required service levels to maintain these safety-net facilities. I would also recommend that at least some of these required amounts be pre-funded or otherwise protected in the event of a restructuring by PMH.

Respectfully submitted:

Re: Hospital Conversion Initial Application of Chamber Inc.; Ivy Holdings Inc.; Ivy Intermediate Holdings, Inc.; Prospect Medical Holdings, Inc.; Prospect East Holdings, Inc.; Prospect East Hospital Advisory Services, LLC; Prospect CharterCARE, LLC; Prospect CharterCARE SJHSRI, LLC; Prospect CharterCARE RWMC, LLC (the "Transacting Parties") 2020

Dear Ms. [redacted]

As outlined in the Memorandum of Agreement dated December 14, 2020, PYA, P.C. ("PYA") was engaged by the Rhode Island Department of Health ("RIDOH") to provide consulting services concerning the proposed hospital conversion application as resubmitted February 19, 2020 ("Application"), and relating to a transaction ("Proposed Transaction") involving the Transacting Parties. RIDOH is authorized and directed to review the conversion application pursuant to the provision of Chapter 23-17.14 of the Rhode Island General Laws, as amended (the "Act" or "HCA"). We have prepared the following summary report ("Report") solely to assist RIDOH with its review of the Application. Our engagement was conducted in accordance with consulting standards established by the American Institute of Certified Public Accountants ("AICPA"). The terms of this engagement were established in advance and PYA's services to RIDOH are detailed in ***Appendix A***. We make no representation regarding the sufficiency of the procedures performed or analysis detailed herein either for the purpose for which this Report has been requested or for any other purpose. The results of our engagement are summarized in the following report.

The procedures used in preparation of this Report do not constitute an audit, examination, or review of any of the Transacting Parties' historical financial statements in accordance with auditing standards generally accepted in the United States of America. Furthermore,

the procedures used do not constitute an examination or compilation of prospective financial statements, nor did we apply agreed-upon procedures to such information, in accordance with attestation standards established by the AICPA. Additionally, the procedures used in our analysis do not address the effectiveness of internal controls over financial reporting under Section 404 of the Sarbanes Oxley Act, nor is PYA responsible for testing for, evaluating, or identifying any occurrences of fraud or other illegal acts, if any. In performing our analysis, PYA relied upon information provided by the Transacting Parties' legal counsel and we have not validated the accuracy or completeness of such information. Accordingly, we express no opinion, or any other form of assurance related to this information, including historical financial information and Transacting Parties' management representations. Had we performed additional procedures beyond those established in advance, other matters might have come to our attention that would have been reported to you.

This report is intended solely for the information and use of RIDOH and is not intended to be, and should not be used by anyone other than the specified party. Accordingly, PYA assumes no liability for any unauthorized use of this Report.

This Report was prepared under the direction of RIDOH, containing PYA's objective observations regarding the financial information provided by the Transacting Parties for analysis. The content of this Report is meant to assist RIDOH as it assesses the Transacting Parties' Proposed Transaction pursuant to the Act. The decision whether to approve the Application resides solely with RIDOH, and our Report or other work products include observations but do not in any way constitute a recommendation whether to approve the Application. The information also does not constitute a valuation of the Proposed Transaction. Additional details regarding our analysis and observations are contained in our work papers. PYA has no responsibility to update our analysis or this Report for events and circumstances arising after the date of this Report. We appreciate the opportunity to assist RIDOH with this important matter.

Respectfully,

PYA, P.C.

PYA, P.C.

ENGAGEMENT OVERVIEW

PYA INTRODUCTION

For the past 38 years, PYA has provided clients objective accounting and healthcare consulting services. Ranked as the 16th largest healthcare management consulting firm in the United States by *Modern Healthcare*, a Top 15 largest auditor of the American Hospital Association's top U.S. multi-hospital systems according to Ames Research Group, and a Top 100 accounting firm by *Inside Public Accounting*, PYA has significant experience providing transaction advisory, due diligence, and regulatory support services related to healthcare transactions. As a national professional services firm with 33 Principals, our team of resources is more than 200 strong and continually growing. Our consultants have backgrounds and degrees in nursing, healthcare administration, public health, medicine, economics, finance, management, accounting, tax, and law. Several have extensive prior experience with other healthcare-related organizations, and have specialized training in strategic planning, financial analysis, and quality of earnings.

SCOPE OF WORK, LIMITING FACTORS, AND KEY INFORMATION RECEIVED AND ANALYZED

Per the MOA with RIDOH, PYA was engaged to provide consulting services to RIDOH related to RIDOH's review of the Application. The following listing presents a summary of the services provided by PYA in the course of our engagement:

- Conducted an initial meeting with RIDOH to confirm engagement scope and purpose;
- Analyzed relevant information provided by the Transacting Parties;
- Requested supplemental information from the Transacting Parties;
- Analyzed supplemental information provided by the Transacting Parties and Transacting Parties' representatives;
- Attended SUOs conducted by RIDOH and the Office of the RIAG, as applicable to the financially focused scope of work;
- Facilitated at least weekly meetings with RIDOH representatives to discuss engagement progress; and
- Prepared report documenting results of PYA's engagement.

A summary of our original scope of work is included in ***Appendix A.*** Additionally, a listing of relevant information received from the Transacting Parties and analyzed by PYA is also included in ***Appendix A.***

Confidential

PROPOSED TRANSACTION OVERVIEW

TRANSACTING PARTIES' REQUEST

The Application seeks approval for a change in ownership of RWMC's and OLF's ultimate parent organization, IH, in order to effectuate a buy-out of the private equity investors and other minority stockholders of IH. Specifically, the proposed change of ownership will be completed through the establishment of a newly formed entity, Chamber Inc. Chamber Inc. will become the parent of IH and be solely owned by Mr. Lee and Mr. Topper (through his Family Trust), both of whom are current stockholders of IH.

TRANSACTING PARTIES' CURRENT LEGAL STRUCTURE

PCC wholly owns RWMC, OLF, and Prospect Blackstone Valley Surgicare, LLC a licensed freestanding ambulatory surgery center. In addition, RWMC wholly owns PRIHHH, a home healthcare provider, which wholly owns PCCHHH a licensed home nursing care provider. All PCC entities are located in Rhode Island and are subject to the provisions of the Act. PCC is currently owned 85% by PEH and 15% by CCCB; however, associated with a settlement in December 2020, PEH is acquiring the remaining 15% interest in PCC from CCCB.

PEH and PEHAS are wholly owned by PMH. PMH is wholly owned by Ivy Intermediate Holding Inc., which is wholly owned by IH. IH is currently primarily owned by a combination of GEI, Mr. Lee, and Mr. Topper (through his Family Trust). Other PMH management own a small minority of shares. A copy of the current and proposed organization structures, as submitted in the Application, can be found in ***Appendices B and C***, respectively.

PROPOSED TRANSACTION SUMMARY

Per the Application, "The capital costs of the transaction are eleven million nine hundred forty thousand nine-hundred ninety-two dollars ($11,940,992.00). After the transaction, GEI and the other minority management shareholders will no longer retain any ownership in IH. The transaction funds will not come from or affect any of the [PCC] entities; instead, the transaction funds consist entirely of available PMH corporate cash."

The Application goes on to state, "Following the Transaction, all existing entities described above will remain as surviving corporations. There will be no change whatsoever to any of the existing entities that will in any way impact the operations or governance of the licensed facilities including RWMC and OLF. Specifically, PMH will continue to own PEH and PEHAS, PEH will continue to own PCC, and PCC will continue to own and operate RWMC and OLF."

PCC HOSPITAL ENTITY SUMMARY

The following is excerpted from the Application and provides an overview of the PCC hospital entities:

"[RWMC] is a licensed acute care hospital (license number HOSP00133) located in Providence, Rhode Island. RWMC provides a wide array of high quality and cost-effective services to its patients, including emergency department services, ambulatory care services, and inpatient and outpatient services including cancer care, elder care, and gastroenterology…. RWMC is an academic medical center affiliated with Boston University School of Medicine and is accredited by the Joint Commission."

"[OLF] is a licensed acute care hospital (license number HOSP00132) located in North Providence, Rhode Island. OLF provides a wide array of high quality and cost-effective services to its patients, including emergency department services, ambulatory care services, and inpatient and outpatient services including psychiatric, mental health and addiction medicine services."

Additional detail related to the transaction and Transacting Parties are disclosed in the publicly available Application.[1]

OBSERVATIONS SUMMARY

CONSIDERATIONS RELATED TO STATUTORY REVIEW CRITERIA

PYA began our analysis by gaining an understanding of the Act established by the state of Rhode Island. The purpose of the provisions of the Act includes assuring the viability of a safe, accessible, and affordable healthcare system; establishing a process to review whether for-profit hospitals will maintain, enhance or disrupt the delivery of healthcare in the state and to monitor hospital performance; and establish a review process and criteria for review of hospital conversions. RIDOH considers the following nine statutory criteria in their assessment when reviewing applications pursuant to the Act.

- *Whether the character, commitment, competence, and standing in the community, or any other communities served by the proposed transacting parties, are satisfactory*;
- *Whether sufficient safeguards are included to assure the affected community continued access to affordable care;*
- *Whether the transacting parties have provided clear and convincing evidence that the new hospital will provide health care and appropriate access with respect to traditionally underserved populations in the affected community;*
- *Whether procedures or safeguards are assured to insure that ownership interests will not be used as incentives for hospital employees or physicians to refer patients to the hospital;*

[1] https://drive.google.com/drive/folders/1JfBOMFAUGGropxncVEZh8GaBWbEFAWO3

- *Whether the transacting parties have made a commitment to assure the continuation of collective bargaining rights, if applicable, and retention of the workforce*;
- *Whether the transacting parties have appropriately accounted for employment needs at the facility and addressed workforce retraining needed as a consequence of any proposed restructuring*;
- *Whether the conversion demonstrates that the public interest will be served considering the essential medical services needed to provide safe and adequate treatment, appropriate access and balanced health care delivery to the residents of the state; and*
- *Whether the acquiror has demonstrated that it has satisfactorily met the terms and conditions of approval for any previous conversion pursuant to an application submitted under § 23-17.14-6.*

Related to the particulars of this specific Application and PYA's engagement scope (which is financially focused) as shown in ***Appendix A***, PYA identified the following specific criteria ("Applicable Criteria") as most relevant:

1. *Whether sufficient safeguards are included to assure the affected community continued access to affordable care;*
2. *Whether the transacting parties have provided clear and convincing evidence that the new hospital will provide health care and appropriate access with respect to traditionally underserved populations in the affected community;*
3. *Whether the transacting parties have appropriately accounted for employment needs at the facility and addressed workforce retraining needed as a consequence of any proposed restructuring; and*
4. *Whether the acquiror has demonstrated that it has satisfactorily met the terms and conditions of approval for any previous conversion pursuant to an application submitted under § 23-17.14-6.*

PYA analyzed the financially related documentation in context of these Applicable Criteria. This analysis, along with the interviews from various SUOs, forms the basis for our observations.

In summary, we observed that PCC, since the acquisition by PMH in 2014, has consistently been dependent upon PMH to fund operational shortfalls and capital investments. Additionally, we observed that PMH has reported limited liquidity and a highly leveraged position in recent fiscal years. Therefore, as a result of PCC's economic dependency on PMH, any element of the Proposed Transaction that may result in a deterioration in the ability of PMH to continue supporting PCC would impact the Applicable Criteria. Examples of economic impacts or limitations the Proposed Transaction may have on PMH, which in turn may affect PCC, include the following:

- **PMH's ability to access capital cost effectively;**

- **Direct and Indirect Financial Impact to PMH via:**
  - **reduction in PMH's equity and liquidity;**
  - **higher future costs borne by PMH due to replacement of services provided by an exiting owner; and/or**
  - **decreased PMH net income and/or cash flow.**

The remainder of this "Observations Summary" report section identifies the key financial characteristics of PCC and PMH, as well as the potential impacts of the Proposed Transaction on the financial condition of these entities. Additional detail to these key observations, and other analysis and work products, are contained in PYA's work papers.

KEY PCC FINANCIAL OBSERVATIONS

PCC has been dependent upon PMH to fund its operational shortfalls since its acquisition by PMH in 2014. In PCC's FY2019 AFS, the independent auditor's report included an Emphasis of Matter paragraph, stating that "[PCC] is financially dependent on its parent company which has agreed to provide the financial support necessary for the operations of [PCC]." This Emphasis of Matter did not appear in the FY2020 PCC AFS. PYA observed through our analysis of information provided by the Transacting Parties that the cash flows generated from PCC's stand-alone operations do not appear to be sufficient to fund both PCC's operational obligations and its necessary capital reinvestment.

Certain financial information from PCC's FY2017 through FY2020 financial statements are presented within the following tables. PCC's performance is not necessarily atypical to many hospital organizations in the country, particularly those which are members of an integrated system and/or serving populations with high concentrations of individuals covered by Medicare and Medicaid, and/or service areas with higher concentrations of populations without a third-party payer source.

Table 1

(Dollars in Thousands)	FY2017	FY2018	FY2019	FY2020

Based on information provided from FY2015 – FY2020, PCC has accumulated net losses of $88.1 million in the aggregate during this time. From the acquisition by PMH in 2014 to FY2019, these losses were funded by PMH and recorded as a liability presented on the PCC balance sheet as Due to PMH. As of September 30, 2019, the AFS presented a $16.7 million amount Due to PMH. That amount, however, is net of prior intercompany liability forgiveness from PMH to PCC, such as the debt to equity conversion of $24.7 million that occurred during FY2019.[2] Therefore, the intercompany liability presented as of FY2019 was not representative of the amount necessary to fund the cumulative operational losses of PCC since acquisition.

During FY2020, two separate one-time events, among other operational impacts, affected the intercompany balance between PCC and PMH. First, PCC received approximately $41 million in PRF distributions as a result of the CARES Act. Additionally, PCC received approximately $27.5 million in MAAP funding (see additional details regarding PRF and MAAP in the "Key PMH Financial Observations" section of this Report). This total amount of one-time funding ($68.5 million) was transferred from PCC to PMH. As a result, the FY2019 balance of the Due to PMH liability was satisfied in full, and the remaining amount of one-time funding transferred to PMH was reflected as an asset on the PCC FY2020 balance sheet, presented as Due from PMH ($32 million). While we were not provided detail regarding the components of this account balance, we observe that, absent these one-time events, the change in the account balance suggests approximately $19.8 million in additional, unsatisfied liability of PCC to PMH in FY2020.

Table 3 (Dollars in Thousands)		FY2020
Due to PMH October 1, 2019	$	(16,700)
Due from PMH September 30, 2020		32,000
Year Over Year Change		48,700
One-time funding for PRF and MAAP		68,500
Additional support from PMH to PCC	$	(19,800)

Additional relevant PCC financial observations include:

- Neither PCC nor the two individual hospitals hold any cash or cash equivalents, as reported on their balance sheets. The treasury function is centralized within PMH. Prior to FY2020, PCC appears to have benefited from this approach, as operational cash flows produced by other PMH subsidiaries, whose treasury functions were also consolidated within PMH, were used to subsidize PCC's operations and capital needs.

[2] During FY2019, a noncash equity contribution of $24.7 million was recorded related to the forgiveness of accrued and unpaid management fees, which were recorded in the Due to PMH account on PCC's balance sheet.

This is a standard practice for integrated health systems. However, the cumulative liability incurred by PCC from FY2015 through FY2019 demonstrates its dependency on PMH to fund operations and capital needs.

- PMH charges a management fee to PCC for centralized administrative and support services. In FY2019, these management fees approximated 2.0% of NPSR. Based on PYA experience, this management fee is not materially inconsistent with rates charged to operating entities by integrated health systems for centralized support services.
- Per the PCC FY2020 AFS, its FY2020 and FY2019 direct and indirect expenses for the provision of charity care approximated $1,094,000 and $501,000, respectively, or 0.3% and 0.15% of total operating expenses.[3] Based on our experience, this level of reported charity care, even for investor owned hospital companies, is low. See ***Table 7*** for a comparison to other investor owned hospital companies. However, relevant also to this observation is the fact that Rhode Island has expanded its Medicaid program, known as Rhode Island Medical Assistance Program, under the ACA. This expansion, in theory, reduces the number of residents who are deemed eligible for charity care. The auditor notes PCC provides services to other medically indigent patients under various state Medicaid programs; however, the costs for those services which was not fully reimbursed from the Medicaid programs was not defined.

  As presented within the statement of cash flows of PCC's AFS, purchases of property, improvements, and equipment by PCC for FY2017 through FY2020 averaged $7.8 million, which equated to replacing approximately 66% of the annual depreciated value of PCC assets. This suggests there is a potential level of deferred capital investment in recent fiscal years, as high performing and growing health systems reinvest at levels closer to average annual depreciation so as to support growth. A comparison of this capital spending to depreciation expense for other investor owned hospital companies is included in ***Table 7***.

  A summary of PCC's historical capital expenditures as shown in the AFS is included in the below table:

Table 4
Prospect CharterCARE

	FY2017	FY2018	FY2019	FY2020	Average
Capital Expenditures	$ 7,043,000	$ 8,973,000	$ 9,926,000	$ 5,273,000	$ 7,803,750
Depreciation Expense	$ 12,200,000	$ 13,222,000	$ 13,100,000	$ 8,815,000	$ 11,834,250
Capital Expenditures as a % of Depreciation Expense	57.73%	67.86%	75.77%	59.82%	65.94%

[3] PCC's charity costs are estimated by calculating a ratio of cost to gross charges and then multiplying that ratio by the gross uncompensated charges associated with providing care to charity patients.

LGP-SBC-000000953

However, Mr. Lee asserted in his SUO that PMH has invested over $100 million in the PCC facilities since the acquisition. PYA was not provided with the information prior to FY2017 necessary to analyze this claim. Mr. Lee referenced significant emergency room, oncology services, and behavioral health facility investments within his SUO.

The independent monitor for the 2014 HCA decision, AMI, indicated in their December 23, 2020 report that the information submitted by PCC to evidence routine capital expenditures was sufficient to support that PCC had complied with the $10 million per year routine capital expenditure requirement for FY2015 through FY2018 as required in the May 16, 2014 HCA decision. Furthermore, AMI indicated that the documentation submitted by PCC demonstrated that PCC complied with and exceeded the revised long-term capital commitment of $62.5 million.

Per information provided by PCC, its FY2021 capital budget is $17.9 million. Approximately $10 million of the budget is associated with facility capital expenditures funded through PACE financing (see below observation for details). PACE financing is debt assumed by PCC for which proceeds must be used for certain facility related expenditures. Therefore, the FY2021 capital budget for routine capital replacement and other facility investment needs, after adjusting for the PACE financing, is commensurate with prior periods analyzed.

- RWMC entered into the PACE financing agreement in May 2020 to improve energy efficiency, financing up to $42 million for property renovations. Per the PMH FY2020 AFS, as of September 30, 2020, $27 million had been expended and recognized as a liability with $15 million remaining in escrow. In January 2021, PCC entered into another PACE agreement to finance approximately $18 million of qualified renovations at OLF. The financed amounts are to be repaid through non-ad valorem assessments collected through PCC property tax bills through 2046. Security on the loan includes a levy and lien against certain real property of RWMC and OLF.
- PCC real property assets were excluded from the MPT transaction. (see "Key PMH Financial Observations" for more detail related to the MPT transaction). However, as a part of the MPT transaction, PMH entered into a promissory note (the "TRS Note"), with an original principal amount approximating $113 million. The promissory note carried an initial interest rate of 7.5%, which increases annually between 2% and 4%. The promissory note also has a balloon payment due on August 31, 2022 and must be either: (i) paid in full at that date, (ii) amended to extend the maturity date, or (iii) satisfied through the sale and subsequent leaseback of the RWMC and OLF real property assets which is contractually allowed per the agreement. However, the TRS Note is not secured by any PCC real or personal property.[4] No evidence was provided to PYA which illustrates how repayment of the TRS Note will be addressed. If the PCC facilities are sold to meet this obligation, PCC's ability, in and of itself, to access additional sources of capital could be limited as collateralizing assets would be significantly reduced.

[4] E. Samuels confirmation of facts letter dated July 22, 2020, as provided by Applicants.

- Even though pension obligations were not assumed by PMH in the original 2014 transaction, in December 2020, various IH subsidiaries entered into a settlement agreement to pay $27.5 million in exchange for release from ongoing litigation regarding pension funding. PCC does not hold the ongoing pension liability and, of the $27.5 million, approximately $22.5 million was expensed in the year ended September 30, 2020 and approximately $5 million was allocated to the purchase price of the 15% residual ownership in PCC held by CCCB. It appears this settlement suggests no further claims will be brought related to the Rhode Island pensions.

KEY PMH FINANCIAL OBSERVATIONS

Observations regarding the Proposed Transaction's impact on PMH's financial statements and its ability to access capital are relevant considerations in the context of the Applicable Criteria. The financial results reported by PMH from FY2017 through FY2020 are erratic. Operational performance declined through FY2019, as quantified in net income/(loss) and EBITDA, per the AFS. Several factors contribute to these erratic operational results during the four-year period, including events characterized as non-recurring in nature such as an EMR system conversion in FY2019 and the impacts, including non-recurring governmental assistance associated with the nationwide COVID-19 public health emergency. That stated, PMH's financial condition, absent governmental assistance associated with the COVID-19 public health emergency, could raise questions regarding the ongoing financial viability of PMH to support its subsidiaries, including PCC. The following information summarizes PMH's recent financial results over the last four years:

Table 5

(Dollars in Thousands)	FY2017	FY2018	FY2019	FY2020
Income Statement				
Total Net Revenue	$ 2,914,497	$ 2,893,888	$ 2,849,198	$ 2,733,388

The following observations report events and circumstance affecting PMH's financial results, liquidity, and capital structure as noted in our analysis of the information provided and within the SUOs:

- In FY2018[5], the PMH Board of Directors authorized dividends to be paid to stockholders of approximately $457 million ("2018 Dividend"). PMH recorded operating income (before interest expense and other financing related costs) of approximately $8 million and a net loss before income taxes of approximately $127 million during FY2018. The 2018 Dividend was financed via a recapitalization whereby PMH entered into new debt obligations approximating $1.12 billion. In addition to funding the 2018 Dividend, this new debt was used to refinance prior debt facilities, pay certain expenses associated with the refinance, prefund approximately $40 million of pension liabilities to PMH's subsidiaries (none of which related to PCC), make payments to certain option holders under the dividend recapitalization, and to finance certain working capital and operational needs of PMH and its subsidiaries. These actions contributed to the resulting FYE2018 stockholders' deficit balance of approximately $623 million, compared to stockholders' equity at FYE2017 of approximately $67 million. Also, the FYE2018 financial statements reported a working capital deficit of approximately $137 million, compared to a working capital surplus of approximately $28 million for FYE2017. The 2018 Dividend extracted cash from PMH equivalent to 60 days of operating expenses.[6] At September 30, 2018, PMH cash and cash equivalents of $7.7 million was sufficient to cover approximately 1 day of PMH's operating expenses. At that date, PMH had an outstanding balance on the amended revolving credit facility of approximately $208 million, with an available balance on the line of credit of approximately $41 million (sufficient to cover approximately 5 days of PMH's operating expenses).
- On August 23, 2019, PMH closed a series of transactions with MPT, a publicly traded REIT, whereby PMH sold to MPT hospital real estate assets in California, Connecticut, and Pennsylvania for an aggregate purchase price approximating $1.386 billion[7]. Proceeds from the sale were utilized, in part, to extinguish the long-term debt assumed in FY2018. Concurrent with the real estate transactions, PMH entered into two master lease agreements whereby the assets sold to MPT were leased back for an initial 15-year term with options to extend. These long-term lease arrangements are recorded on the PMH balance sheet as liabilities. No Rhode Island facilities were included in the MPT sale/leaseback transactions. In addition to this sale/leaseback transaction and other transactions between MPT and PMH involving PMH real property assets, MPT and PMH entered into the aforementioned TRS Note which can be satisfied, among other alternatives, by entering into a sales/leaseback transaction for the PCC facilities.
- During FY2019[8], an additional $44.0 million was paid to stockholders, which was mostly offset by capital contributions from stockholders during FY2019 of $41 million. We understand this $41 million was to inject capital into PMH to support operations during a transition to a new EMR. Also, during FY2019, PMH also agreed with lenders to expand its maximum revolving credit facility from $250 million to $285 million,

[5] FY2018 PMH AFS.
[6] Operating expenses in days cash on hand calculations exclude interest, depreciation, and amortization expense.
[7] FY2019 PMH AFS.
[8] FY2019 PMH AFS.

with subsequent reductions totaling $30 million upon closures of two hospital facilities. At September 30, 2019, the outstanding balance and available balance on the revolving credit facility approximated $70 million and $176 million, respectively, per the FY2019 AFS.

- In response to the global COVID-19 pandemic, the CARES Act afforded healthcare providers with liquidity in the form of stimulus payments to offset qualifying and substantiated expenses incurred in response to the pandemic, in addition to revenues lost by providers as a result of certain care being eliminated or postponed for public health reasons. The CARES Act also provided the opportunity for healthcare providers to receive advances on Medicare reimbursement via the MAAP. Per the 2020 PMH AFS, PMH received approximately $183 million in PRF stimulus payments and approximately $276 million associated with MAAP. Repayments are not required on PRF distributions to the extent the provider recipient can justify, report, and support that the distributions were used to offset qualifying expenses and lost revenue as defined in pronouncements from HHS.

  Per the PMH FY2020 AFS, all but $10.4 million of the PRF stimulus payments were recognized into operating income during FY2020. The MAAP will be recovered via withholdings of future Medicare reimbursement due to providers over a 17-month period beginning at the one-year anniversary of the provider's initial MAAP recipients.

  These two one-time funding sources contributed to a dramatic increase in PMH's cash and cash equivalent balance, increasing $334 million over the reported FY2019 balance to a total balance of $387 million at September 30, 2020. As a result of this increase, PMH's cash available to cover operating expenses as of September 30, 2020 increased to approximately 52 days. However, as noted, the full $276 million in cash held by PMH at September 30, 2020 associated with MAAP will be recovered via reduced reimbursement from Medicare starting in April 2021. If the $276 million is removed from the reported FY2020 cash and cash equivalents, the remaining funds cover approximately 15 days of operating expenses. Per the 2020 PMH AFS, at September 30, 2020, PMH did not have an outstanding balance on its revolving line of credit, and the available balance to borrow was approximately $211 million (which amounts to approximately 28 days of operating expenses).

These patterns in operational performance and recapitalization are relevant because PMH has somewhat limited ability, in the form of current liquidity especially after recoupment of MAAP funds, to weather additional or continued financial challenges. That, in turn, is a risk to the ongoing financial viability of PCC as a PMH subsidiary. Such challenges can be mitigated by accessing additional sources of capital; however, PMH is already extremely leveraged and has limited unencumbered assets to collateralize additional debt financing. If the effects of the Proposed Transaction have material impacts on PMH's financial position, or creates additional challenges with respect to its ability to access capital, the financial risk associated with the ability to fund ongoing operations and capital needs of the PCC entities is also increased.

KEY PROPOSED TRANSACTION OBSERVATIONS

PYA analyzed how the Proposed Transaction could impact the Applicable Criteria. The most relevant considerations appear to be twofold: 1) what impact does the Proposed Transaction have on the ability of IH and its related subsidiaries, including PMH, to access capital and 2) how does the Proposed Transaction's consummation affect IH's and its related entities' financial condition, including liquidity, cash flow, operating results, and net asset balance. Our observations related to these matters are as follows:

Access to Capital

A key financial consideration is whether the Proposed Transaction will impact PMH's ability to access capital to fund operations and investments. PYA was provided no information suggesting that LGP, and specifically GEI as the owners in IH, has invested additional capital in IH, as PMH's corporate parent entity, since the acquisition of PCC in 2014, with the exception of capital contributions equal to GEI's portion of the $41 million capital call in FY2019. That contribution appears to be essentially a shareholder loan to provide short term liquidity during the 2019 system conversion and was subsequently returned in the form of dividends. Per the SUOs from Mr. Baumer and Ms. Wagner, no additional investments beyond the initial 2010 capital investment in IH in an amount approximating $151 million have been made by GEI in IH.[9] As described previously in this Report, some, perhaps most, of the dividends received by GEI from IH resulted from the $457 million 2018 Dividend to IH shareholders as a part of a dividend recapitalization. At that time, we understand GEI held a majority of the stock in IH.

Furthermore, while PYA was not provided information pertaining to GEI, Ms. Wagner and Mr. Baumer stated in their respective SUOs that the GEI funds are at the end of their life and are contractually required per the terms of the investor agreements to liquidate held investments. IH has utilized the two automatic extensions allowing IH extended use of the funds per the investor agreement, and IH must now close the funds.

The ability of any entity to access capital is impacted by several considerations, including, but not limited to, operational performance, assets to serve as collateral, personal guarantees, etc. As discussed previously in this Report, PMH is in a highly leveraged position. As a result, it remains unclear whether PMH would be able to obtain incremental capital investments and/or access debt funds. The sale/leaseback transaction(s) described previously remains as an option available to PMH to access funding. The amount of capital available through this mechanism is unknown, however, as the value of the collateral necessary for such a transaction has not been quantified. Whether or not GEI remains an investor in IH going forward is only one variable when evaluating the amount of capital IH and PMH are able to access. Indeed, the ability of the IH, PMH, or their collective subsidiaries to produce positive operating results, and as a result, positive returns on any invested funds would be a key consideration for any lender or investor.

[9] Ms. Wagner and Mr. Baumer are Partners with Leonard Green & Partners and Board members of IH and PMH.

Financial Impact of Proposed Transaction on Transacting Parties

Per the Merger Agreement, the agreed upon cash consideration at close of the Proposed Transaction is $11,940,992. PYA was provided no further analysis to substantiate this amount, such as third-party fair market value analyses or fairness opinions. Furthermore, in their respective SUOs, Mr. Baumer, Ms. Wagner and Mr. Lee asserted that the amount was agreed upon between the Transacting Parties.[10] In addition to the cash to be paid upon closing the Proposed Transaction, the Merger Agreement also appears to, in effect, release GEI from any portion of existing liabilities and future obligations related to IH and its subsidiaries. As stated in the FY2020 PMH AFS, total current and long-term liabilities held by PMH approximated $3.1 billion. As a result of the Proposed Transaction, our understanding is IH will fund the cash payment, via the merger, for the net purchase price of approximately $11.9 million, and will retain all other assets and liabilities of IH and its subsidiaries. This component of the Proposed Transaction marginally, but directly, impacts PMH's net assets, cash flow, and liquidity.

Existing stockholders, Mr. Lee and Mr. Topper, held approximately 34% of the stock in IH at time of the Application, and will hold 100% if the Proposed Transaction is approved and consummated.[11] Furthermore, those proposed sole owners are also operators and leaders in the operating entities. This is a different dynamic than a sale of all or the majority of the stock to an external investor, as this transaction should have more continuity in leadership and less disruption on operations. The transaction will result in a change in the board governance, with LGP vacating 3 of the 5 IH board seats.[12] It is yet to be determined how this change in board composition may positively or negatively impact governance and leadership of PMH.

OTHER CONSIDERATIONS RELEVANT TO PMH AND PCC

There are many risks faced by the healthcare provider industry, including but not limited to, public policy and regulatory changes, macro-economic shifts, payer reimbursement changes, impacts of public health emergencies and natural disasters, skilled labor availability, supply chain continuity, regulatory compliance investigations, etc. The scope of this Report is not to consider all those risks. But, specific to observations relevant to the Proposed Transaction and its impact on the ongoing support and viability of PCC to provide essential healthcare services to the residents of Rhode Island, some risks exist in any change of majority ownership of an entity, not specifically this circumstance. We are not able to make observations regarding whether any of these risks could materialize under this particular Proposed Transaction, as we have no information on management's prior actions, and it was not in our scope to evaluate the efficacy or motives of management. But we recognize, agnostic to particular industries or individual entities, majority owners do have legal rights and ability to affect change in an organization. In this particular case, certain minority owners (who are also executive leaders and operators of the business) will become majority owners, increasing their legal ability to make changes. Therefore, these observations simply recognize the changing dynamics which could occur in any change in majority stockholders. Based on our limited information, the following could influence decisions on how PCC is funded going forward:

[10] Mr. Sam Lee is Chief Executive Officer of PMH and a Board member of IH, PMH, and PCC, among other entities.
[11] Derived from the Application, page 1154.
[12] Derived from the Application, page 1154.

- PMH is a conglomerate of various healthcare operations across multiple states. Some operations will generate positive operational results which are used, to some extent, to offset losses in other segments of the business, including PCC. There is risk to continuity to the aforementioned support provided by PMH to PCC if operations of the more successful components of the PMH provider portfolio suffer. PYA was not provided financial information for each of the PMH regions. However, there is risk to continuity of the aforementioned support provided by PMH to PCC if operations of the more successful components of the PMH provider portfolio suffer. Similarly, if PCC operations do not improve to a point where they are contributing to the profitability and/or growth of PMH, it remains unclear whether the new board of IH and PMH would continue funding those portfolio investments.
- At present, any lingering financial impact to the healthcare industry as a result of the COVID-19 pandemic remains unclear. Some of the PMH facilities are located in geographic regions which experienced high rates of infection, hospitalizations, and fatalities from COVID-19, and some locations continue to have state-imposed restrictions which affect the timing of economic recovery. Therefore, if continued delays in economic recovery continues, such delays could have negative impacts on PMH's and PCC's liquidity and ability to meet obligations to third parties. PMH management members' interviews identified the pandemic as their greatest economic concern.

SUMMARY OF PROPOSED TRANSACTION IMPLICATIONS

We have observed through our analyses that both PCC and its parent, PMH, face long-term financial viability challenges. We observed that PCC, since the acquisition by PMH in 2014, has consistently been dependent upon PMH to fund operational shortfalls and capital investments. In addition, based on our observations, PMH has reported limited liquidity and a highly leveraged position in recent fiscal years. Threats to long-term viability might jeopardize the healthcare access for Rhode Island residents who depend on PCC health services, including those populations who are traditionally underserved.

In addition to the $11.9 million of proceeds GEI would receive as a result of the Proposed Transaction, GEI would also be released from any portion of existing and future obligations related to IH and its subsidiaries. At September 30, 2020, current and long-term liabilities held by PMH approximated $3.1 billion. Based on our observations, GEI has not made significant investments in IH or PMH since the initial capitalization in 2010 nor do they appear to be instrumental in assisting PMH with obtaining access to capital going forward.

However, despite these general observations, utilizing the information made available to us by the Transacting Parties, we did not observe impacts from the Proposed Transaction, whereby GEI would divest of its majority stake in IH, which directly affect the financial condition of PCC. We do note that PCC may be impacted indirectly as a result of any potential material effects to PMH caused by the Proposed Transaction.

APPENDIX A: SCOPE OF WORK

Scope of Work	Key Information Utilized
Project Initiation	
Conduct kick-off call with relevant individuals of RIDOH to ensure RIDOH's objectives are clearly understood and to confirm timeline, process for interviews with the Transacting Parties, and form of anticipated deliverables.	
Perform an inventory of relevant information provided to-date by the Transacting Parties to identify additional information needs.	
Discuss with parties already engaged by the state of Rhode Island (e.g., Attorney General's financial expert) to understand analyses already performed.	
Issue information request to obtain data and information not yet provided by the Transacting Parties.	
Understand Key Terms of the Proposed Transaction	
Obtain an overview of the Transacting Parties' organizational structure before and after the Proposed Transaction.	- Pre-transaction and proposed Post Transaction Organizational Charts - Listing of Board Members and Officers - Governing Documents - 2014 Asset Purchase Agreement - PMH HCA Application
Read the purchase agreement for Chambers, Inc.'s purchase of the shares in Ivy Holdings, Inc.	- Agreement and Plan of Merger Agreement between Chamber Inc., Ivy Holdings, Inc., and Green Equity Investors
Obtain and comment on audited financial statements* from calendar years 2015 through 2019, and requested supporting information, for Chambers, Inc., Ivy Holdings, Inc., Ivy Immediate Holding, Inc., and Prospect Medical Holdings, Inc.	- Audited Financial Statements - Unaudited Quarterly Financial results for FY2020 - Unaudited Monthly Financial Statements for October and November 2020

Confidential
LGP-SBC-000000964

Scope of Work	Key Information Utilized
After understanding the terms of the purchase agreement and existing financial statements of Chambers, Inc., Ivy Holdings, Inc., Ivy Intermediate Holdings, Inc., and Prospect Medical Holdings, Inc., analyze implications which the transaction by Chamber's Inc. purchase in the shares of Ivy Holdings, Inc. may have on the continued financial viability and access to capital of the Prospect CharterCARE S.11-15111, LLC and Prospect CharterCARE RWMC, LLC entities (collectively, "PCC").	- Audited Financial Statements - Listing of auditor's comments for FY2018-FY2020 for PCC - Unaudited Quarterly Financial Results for FY2020 for PCC - Unaudited Monthly Financial Statements for October and November 2020
Provide observations at a high level of the $12 million purchase price for approximately 60% of the interests in Prospect Medical Holdings, Inc, as they may relate to industry standards and norms.[13]	- N/A
Provide observations regarding prior relevant transactions with major investors in the equity of Ivy Holdings, Inc., Ivy Intermediate Holdings, Inc., and Prospect Medical Holdings, Inc. during the period from 2015 through the current period, and specifically how those transactions impacted these entities' ability to invest in healthcare services, including at PCC.	- Various Board of Directors' Meeting Minutes that outline distributions and other major relevant transactions
Provide observations regarding relevant, major transactions in healthcare real estate assets by Ivy Holdings, Inc., Ivy Intermediate Holdings, Inc., and Prospect Medical Holdings, Inc. during the period from 2015 through the current period, and specifically how those transactions impacted these entities' ability to invest in healthcare services, including at PCC.	- Real Property Asset Purchase Agreement between PMH and MPT dated July 10, 2019 - ChambersProspectCharterCARE-LTR E. Potential Need for Capital for Working Capital and Physical Plan Investment Purposes	
Obtain and comment on a schedule of PCC capital spending over the past three years.	- Summary of Routine Capital Expenditures for 2017 - 2020
Obtain and comment on PCC provided capital budgets for future periods compared against historical levels of depreciation and relevant benchmarks.	- Capital Projection Schedule for 2020-2022 - Capital Budget 2021 - IT Commitment summary for 2018 – 2030 - Audited Financial Statements - Unaudited Quarterly Financial Results for FY2020 for PCC - Unaudited Monthly Financial Statements for October and November 2020
Interviews of Relevant Parties	
Upon request by RIDOH, participate in and/or assist with the facilitation of interviews under oath with selected members relevant to the proposed transaction (estimated total of 20 to 25 hours) for enhanced understanding of purpose and impact of the Proposed Transaction.	
Preparation and Provision of Report	
Document in a written executive summary report, key findings of our analysis for consideration by RIDOH in its assessment of the Transacting Parties Application. This report will contain a list of relevant observations through our analyses and considerations for RIDOH.	
Presentation to Rhode Island Health Services Council	
Prepare and deliver presentation of key observations and considerations to the Health Services Council at the conclusion of the engagement. This presentation will be provided remotely and will not require travel to Rhode Island for an in-person meeting.	

Scope of Work	Key Information Utilized
Communication with RIDOH	
Throughout the engagement, provide regular updates to RIDOH leadership on the progress of the analysis, any complicating issues in completing the scope of work, updates to timeline, and sharing of significant observations.	

*Audited Financial Statements analyzed include:

- 2016-2020 Audited Financial Statements of PMH
- 2016-2020 Audited Financial Statements of PCC
- 2016-2019 Audited Financial Statements of OLF
- 2017-2019 Audited Financial Statements of RWMC

APPENDIX B: ORGANIZATIONAL CHART PRIOR TO CONVERSION

PCC wholly owns RWMC, OLF, and Prospect Blackstone Valley Surgicare, LLC a licensed freestanding ambulatory surgery center. In addition, RWMC wholly owns PRIHHH, a home healthcare provider, which wholly owns PCCHHH a licensed home nursing care provider. All PCC entities are located in Rhode Island and are subject to the provisions of the Act. PCC is currently owned 85% by PEH and 15% by CCCB; however, associated with a settlement in December 2020, PEH is acquiring the remaining 15% interest in PCC from CCCB.

PEH and PEHAS are wholly owned by PMH. PMH is wholly owned by Ivy Intermediate Holding Inc., which is wholly owned by IH. IH is currently primarily owned by a combination of GEI, Mr. Lee, and Mr. Topper (through his Family Trust). Other PMH management own a small minority of shares. The current organization structure, as submitted in the Application, can be found below.

Independent Auditor's Report

Board of Directors
Prospect Medical Holdings, Inc.
Los Angeles, California

We have audited the accompanying consolidated financial statements of Prospect Medical Holdings, Inc. (the "Company"), which comprise the consolidated balance sheets as of September 30, 2018 and 2017, and the related consolidated statements of operations, statements of comprehensive (loss) income, statements of stockholder's (deficit) equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Prospect Medical Holdings, Inc. and its subsidiaries as of September 30, 2018 and 2017, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

BDO USA, LLP

January 25, 2019

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

1. Organization

Prospect Medical Holdings, Inc. ("Prospect" or the "Company" or the "Parent Entity") is a Delaware corporation and a wholly-owned indirect subsidiary of Ivy Holdings Inc. ("Ivy Holdings").

The Company's operations are currently organized into four primary reportable segments: Hospital Services, Medical Group, Global Risk Management and Corporate, as discussed below.

Liquidity

The Company had a net working capital deficit of $136,886,000 as of September 30, 2018 compared to net working capital surplus of $27,932,000 as of September 30, 2017, respectively. Additionally, the Company had a net loss before income taxes of $187,117,000 for the year ended September 30, 2018 compared to net income before income taxes of $30,901,000 for the year ended September 30, 2017. As of September 30, 2018, the Company has a stockholder's deficit of $622,349,000 compared to stockholder's equity of $67,316,000, as of September 30, 2017. Cash and cash equivalents generated by operations declined to $35,705,000 from $50,239,000 for the years ended September 30, 2018 and 2017, respectively, and total change in cash and cash equivalents decreased year on year from a decline of $2,478,000 for the year ended September 30, 2017 to a decline of $19,415,000 for the year ended September 30, 2018. Total debt, net of discount/ premiums and deferred finance charges increased to $1,117,870,000 at September 30, 2018 compared to $638,228,000 at September 30, 2017. Such increase was primarily due to the Company's entry into New Senior Secured Credit Facilities during the year ended September 30, 2018 (Note 9). As part of the New Senior Secured Credit Facilities, the Company entered into a restated and amended revolving credit facility with a maximum revolving commitment of $250.0 million, which is expandable to $325.0 million. The balance outstanding at September 30, 2018 on the amended revolving credit facility was $207,645,000 comparable to $113,061,000 on the existing revolving credit facility at September 30, 2017. At September 30, 2018, the available balance on the line was approximately $41.0 million. Cash and cash equivalents declined from approximately $27.1 million at September 30, 2017 to approximately $7.7 million at September 30, 2018. The Company has various initiatives in place to generate positive cash flows from operations. From a revenue generating perspective, these include a focus on improving charge capture, improving the success rate on denials, and increasing reimbursements through rate negotiations with managed care payors, as well as improving volumes. From a cost cutting perspective, the initiatives include improvements to labor productivity and the reduction in overtime and use of registry, as well as better controls on supply and pharmacy contracts. Further, there are initiatives to focus on improving both productivity and volumes from the Company's physician groups. The Company is currently investigating new sources of liquidity which may include discussions with both the Company's investors and lenders in relation to additional borrowings. On January 25, 2019, Ivy Holdings made an equity contribution in the amount of $40 million (see Note 15). The Company believes that it will have sufficient cash flows from operations and available revolving facilities to provide sufficient capital resources to sustain operations, investing activities and financing for at least the next twelve months from the date these financial statements were available to be issued.

Hospital Services Segment

As of September 30, 2018, through its subsidiaries the Company owns 20 acute care and behavioral hospitals and multi-level elder care facilities in Southern California, Texas, Rhode Island, New Jersey, Pennsylvania and Connecticut with approximately 3,700 licensed beds, and a network of specialty and primary care clinics. The Hospital Services segment subsidiaries are wholly-owned by Prospect, except for the facilities in Rhode Island, in which Prospect has an 85% interest in the subsidiary that owns such facilities.

Confidential LGP-SBC-000000630

Admitting physicians are primarily practitioners in the local area. The hospitals have payment arrangements with Medicare, Medicaid and other third party payers, including commercial insurance carriers, health maintenance organizations ("HMOs") and preferred provider organizations ("PPOs").

Medical Group Segment

The Medical Group segment is a healthcare management services organization that provides management services to affiliated physician organizations that operate as independent physician associations ("Medical Groups" or "IPAs"). The affiliated physician organizations enter into agreements with HMOs to provide HMO enrollees with a full range of medical services in exchange for fixed monthly fees ("Capitation"). The Medical Groups contract with physicians (primary care and specialist) and other healthcare providers to provide enrollees with medical services. Prospect currently manages the provision of healthcare services for its affiliated physician organizations in California, Texas, Rhode Island, Connecticut, Pennsylvania and New Jersey. The California network consists of various physician organizations that are generally wholly-owned by Prospect Medical Group, Inc. ("PMG") and managed by the two medical management company subsidiaries that are wholly-owned by Prospect. The Medical Group segment also owns clinic facilities through New Genesis Medical Association ("NGMA") that operates by employing physicians to serve its patients. PMG and NGMA are owned by a nominee physician shareholder pursuant to an assignable option agreement, under which Prospect has an assignable option, obtained for a nominal amount from PMG and the nominee shareholder, to designate the purchaser (successor physician) for all or part of PMG's issued and outstanding stock held by the nominee physician shareholder (the "Stock Option") in its sole discretion.

Most of the physician organizations have entered into Management Service Agreements ("MSA") with Prospect Medical Systems Inc., ("PMS"), and have agreed to pay a management fee to PMS, which is based in part on the costs to the management company and on a percentage of revenues. In return for payment of the management fee, PMS has agreed to provide financial management, information systems, marketing, advertising, public relations, risk management, and administrative support, including for utilization review and quality of care. At its cost, PMS has assumed the obligations for all facilities and employs physician and non-physician personnel for administrative services. The management fee is earned based on a combination of percentage of revenue and share of pre-tax income. The management fees fluctuate based on the revenue and profitability of each physician organization. The Management Agreements are not terminable by the physician organization except in the case of gross negligence, fraud or other illegal acts, or bankruptcy, of PMS.

Prospect consolidates the revenues and expenses of all the physician organizations (except for one entity that is a 50/50 joint venture, which is accounted for under the equity method) from the respective dates of execution of the Management Agreements. All significant inter-entity balances have been eliminated in consolidation. In the case of the joint venture, only that portion of the results which are contractually identified as Prospect's are recognized in the consolidated financial statements, together with the management fee that the Company charges the joint venture for managing the other owners' share of the joint venture operations.

Prospect has also entered into management services agreements with unaffiliated third parties to manage services to their HMO enrollees. These management agreements do not have characteristics that give rise to the consolidation of the entities under current accounting literature. These management services agreements are terminable in accordance with the agreements.

The affiliated physician organizations provided medical services to a combined total of approximately 442,000 and 355,000 enrollees as of September 30, 2018 and 2017, respectively. The enrollees include approximately 255,000 and 159,000 enrollees that the Company manages for the economic benefit of certain independent third parties, and for which the Company earns management fee income as of September 30, 2018 and 2017, respectively. The total paid member months including managed enrollees, for the years ended September 30, 2018 and 2017 was approximately 5,360,000 and 3,991,000, respectively.

Global Risk Management Segment

The Global Risk Management segment has entered into global capitation arrangements with certain unrelated third-party health plans. The Global Risk Management segment also manages the provision of care for members in coordination with the Hospital Services and Medical Group segments.

Corporate Segment

The Company established a captive insurance company, Prospect Medical Holding Risk Retention Group, Inc. ("RRG") on June 20, 2016 in the state of Vermont. RRG was formed to provide primary insurance coverage for hospital and physician professional and general liability risks for the Company's subsidiary health care organizations located in Pennsylvania on a claims-made basis. RRG is wholly owned by Prospect Penn, LLC, which is wholly-owned directly by the Company. All intercompany balances and transactions are eliminated upon consolidation.

Additionally, the Company has a captive insurance company based in the Cayman Islands, Connecticut Healthcare Insurance Company ("CHIC"), which provides hospital and physician professional and general liability coverage to all of the Company's hospitals and affiliated subsidiaries except for Crozer and its Pennsylvania subsidiaries (Covered by RRG above). Effective January 1, 2018, ownership of CHIC was transferred from Prospect ECHN, Inc. to make CHIC a direct wholly-owned subsidiary of the Company. CHIC is an exempted Company with limited liability under the Companies Law of the Cayman Islands and it holds a Class "B(i)" Insurer's License under Section 4(3)(b) of the Cayman Islands Insurance Law 2010. CHIC's principal activity is to issue primary policies for hospital liabilities covering Prospect, its subsidiaries and employees, on a claims-made basis. The Company procured excess healthcare professional liability and umbrella liability insurance policy on a claims-made basis covering healthcare professional liability, general liability, automobile liability, employer's liability, helipad liability and non-owned aircraft liability of the Company and its affiliates. This excess coverage is purchased entirely from unrelated commercial insurers. CHIC also provides a deductible reimbursement policy for workers compensation to the Company's California and Connecticut hospital facilities all of which have high deductible program structures or are qualified self-insureds.

On January 1, 2018, CHIC began providing an employee benefit stop-loss policy to all Company subsidiaries. Unlimited excess coverage is purchased from unrelated reinsurance companies.

The Company does not allocate interest expense related to acquisition debt or income taxes to the other reporting segments.

2. Significant Accounting Policies

Principles of Consolidation and Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include the accounts of all controlled subsidiaries, of which control is effectuated through ownership of voting common stock or by other means, but do not include the accounts of the parent companies, Ivy Holdings Inc. and Ivy Intermediate Holding Inc. The Company has a variable interest in various entities under the Medical Group segment due to the existence of two call options, under which the Company has the ability to require the holders of all of the voting common stock of the underlying subsidiaries to sell their shares at a fixed nominal price ($1,000) to another designated physician chosen by the Company. This call option agreement represents rights provided through a variable interest other than the equity interest itself that limits the returns that could be earned by the equity holders. In addition, the Company has management agreements with the physician organizations under the Medical Group segment which allows the Company to direct the activities of such physician organizations that most significantly impact their economic performance, retain the right to receive expected residual returns and assume the obligation to absorb losses. Accordingly, the Company is considered to be the primary beneficiary and these entities are consolidated within the accompanying consolidated financial statements.

Operating results for acquisitions are consolidated with the Company's financial statements from their acquisition dates. All significant intercompany balances and transactions have been eliminated in consolidation. Non-controlling interests in less-than-wholly-owned consolidated subsidiaries of the Company are presented as a component of total equity to distinguish between the interests of the Company and the interests of the non-controlling owners.

The consolidation of these entities does not change any legal ownership, and does not change the assets or the liabilities and equity of the Parent Entity as a stand-alone entity. These entities had total revenues of approximately $310,720,000 and $413,866,000 and total net loss of approximately $2,184,000 and net income of approximately $20,298,000 for the years ended September 30, 2018 and 2017, respectively.

The assets and liabilities of the variable interest entities are as follows (in thousands):

September 30,		**2018**		2017
Assets				
Total current assets	$	**89,882**	$	177,525
Total non-current assets		**90,465**		18,044
Total assets	$	**180,347**	$	195,569
Liabilities				
Total current liabilities	$	**69,097**	$	82,082
Total long-term liabilities		**730**		700
Total liabilities	$	**69,827**	$	82,782

Confidential

Reclassifications

Certain reclassifications were made to the prior year consolidated financial statements in order to conform to the current year presentation.

Revenues

Revenues by reportable segment are comprised of the following amounts (in thousands):

For the Years Ended September 30,	2018	2017
Net Hospital Services		
Inpatient	$ 1,625,187	$ 1,423,273
Outpatient	958,715	955,543
Capitation	157,622	110,330
Other	25,405	49,549
Total Hospital Services revenues	2,766,929	2,538,695
Less: Provision for bad debts	(119,414)	(91,203)
Total net Hospital Services revenues less provision for bad debts	2,647,515	2,447,492
Medical Group		
Capitation	307,444	369,185
Management fees	10,501	7,977
Other	16,463	13,958
Total Medical Group revenues	334,408	391,120
Global Risk Management		
Capitation	23,095	13,097
Other	10,768	7,655
Total Global Risk Management revenue	33,863	20,752
Other revenues	53,848	55,133
Total net revenues	$ 3,069,634	$ 2,914,497

The revenues of acquisitions have been included in the accompanying consolidated financial statements for the period from their respective acquisition dates. These revenues also exclude revenues from discontinued operations.

Hospital Services Segment

Net Patient Service Revenues

Operating revenue of the Hospital Services segment consists primarily of net patient service revenue. The Company reports net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others in the period in which services are rendered. The Company has agreements with third-party payers, including Medicare, Medicaid, managed care and other insurance programs that

Confidential LGP-SBC-000000634

are paid at negotiated rates. These payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges and per diem payments, as further described below. Estimates of contractual allowances are based upon the payment terms specified in the related contractual agreements. The Company accrues for amounts that it believes may ultimately be due to or from the third-party payers. Normal estimation differences between final settlements and amounts accrued in previous years are reported as changes in estimates in the current year. Outstanding receivables, net of allowances for contractual discounts and bad debts, are included in patient accounts receivable in the accompanying consolidated balance sheets.

The following is a summary of sources of patient service revenues (net of contractual allowances and discounts) before provision for bad debts and exclude revenues from discontinued operations (in thousands):

Years ended September 30,	**2018**	2017
Medicare	**$ 850,197**	$ 848,221
Medicaid	**905,322**	699,340
Managed Care	**631,209**	607,362
Self-Pay/Other	**197,174**	223,893
Capitation	**157,622**	110,330
Other	**25,405**	49,549
Total patient service revenue	**$ 2,766,929**	$ 2,538,695

A summary of the payment arrangements with major third-party payers follows:

Medicare: Medicare is a federal program that provides certain hospital and medical insurance benefits to persons aged 65 and over, some persons with end-stage renal disease and certain other beneficiary categories, including eligible disabled persons. Most inpatient hospital services rendered to Medicare program beneficiaries are paid on a fee-for-service basis at prospectively determined rates per discharge, according to a patient classification system based on clinical, diagnostic, and other factors. Most outpatient services also are paid on a fee-for-service basis generally using prospectively determined rates. The Company receives, as appropriate, Medicare disproportionate share hospital ("DSH") and bad debt payments at tentative rates, with final settlement determined after submission of the annual Medicare cost report and audit thereof by the Medicare Administrative Contractor. The Company also receives, as appropriate, Medicare uncompensated care DSH payments, which are generally not subject to cost report audit except to determine eligibility for Medicare DSH. The Company also receives Medicare outlier payments on an ongoing basis during the year for cases that are unusually costly, and under certain circumstances these payments may be reconciled to more closely reflect the costs in excess of outlier thresholds after the submission and audit of the annual Medicare cost report. Normal estimation differences between filed settlements and amounts accrued are reflected in net patient service revenue.

The Company is reimbursed by Medicare for cost reimbursable items at a tentative rate with final settlement determined after submission of annual cost reports and audits thereof by the Medicare Administrative Contractor. The estimated amounts due to or from the program are reviewed and adjusted annually based on the status of such audits and any subsequent appeals. Differences between final settlements and amounts accrued in previous years are reported as adjustments to net patient service revenue in the year that examination is substantially completed.

Confidential LGP-SBC-000000635

Although services for most Medicare beneficiaries are paid by the Federal government on a fee-for-service basis, approximately one-third of Medicare beneficiaries are enrolled in a "Medicare Advantage" plan, which is a type of health plan that contracts with the Medicare program to provide hospital and medical benefits to Medicare beneficiaries. Medicare Advantage Plans include Health Maintenance Organizations, Preferred Provider Organizations, Private Fee-For-Service Plans, Special Needs Plans, and Medicare Medical Savings Account Plans. For Medicare beneficiaries enrolled in a Medicare Advantage plan, most Medicare services are covered by the plan and are not paid for under fee-for-service Medicare. Certain Medicare Advantage plans make capitation payments to the Company using a "Risk Adjustment model," which compensates providers based on the health status (acuity) of each enrollee. Providers with higher acuity enrollees generally will receive more and those with healthier enrollees will receive less.

Medicaid: Medicaid is a joint federal-state funded healthcare benefit program that is administered by states to provide benefits to qualifying individuals who are unable to afford care. The Company receives reimbursements under the Medicaid programs in each state in which it operates at prospectively determined rates for inpatient services and a mixture of fee schedules and cost reimbursement methodologies for outpatient services depending on the specific state regulations. Cost report settlements are recorded based upon as-filed cost reports (if required by the respective facility's state) and adjusted for tentative and final settlements, if any.

The various states in which the Company operates have additional programs in which certain of the Company's facilities participate in, related to medical facilities serving a disproportionate number of low-income patients. The following table shows the revenues generated by these programs during the years ended September 30, 2018 and 2017 (in thousands), which are reflected in Net Hospital Services revenues in the accompanying consolidated statements of operations:

For the years ended September 30,	**2018**	2017
California Medi-Cal Disproportional Share ("CA DSH") *(a)*	**$ 13,761**	$ 21,460
Texas Section 1115 Waiver - UCC Pool *(b)*	**(7,324)**	10,492
Texas Section 1115 Waiver - DSRIP Pool *(b)*	**12,712**	12,712
Rhode Island DSH and UPL *(c)*	**19,035**	24,402
New Jersey Health Care Subsidy Funds *(d)*	**900**	9,040
Pennsylvania State Programs *(e)*	**40,344**	30,719
Connecticut Medicaid DSH revenue *(f)*	**33,152**	14,301
	$ 112,580	$ 123,126

(a) Revenues are accrued based on the expected total annual awards. Differences between the estimated and the actual awards are recorded in the period they become known, and are subject to retrospective revision prior to finalization, which could lead to material retractions. The Company records retrospective retractions when they are estimable and probable. Retrospective additional revenues are recorded when the amounts are received.

(b) The program has consisted of three major components: statewide Medicaid managed care, the Uncompensated Care ("UC") pool, and "Delivery System Reform Incentive Payment" (DSRIP). The UC pool contains $3.1 billion in annual funding to cover, among other things, "shortfall" between the cost of providing care to an uninsured patient and the reimbursement amount that Medicaid would pay for that service. DSRIP is an incentive pool with another $3.1 billion in annual funding that allows providers to earn payments for meeting certain CMS and HHSC-approved reporting and

Confidential LGP-SBC-000000636

performance metrics for "a wide range of innovative projects. Historically, Nix Health has received payments from both the DSRIP and UC pools. Texas' Medicaid Section 1115 Waiver that CMS approved in December 2017 (the "2017 Waiver") extended the program for an additional five years from October 2017 through September 2022 but made significant changes to the pools. The UC pool will remain at $3.1 billion until September 2019 and will subsequently be adjusted based on aggregate provider data concerning charity care cost in 2017. Widespread failure by providers to report accurate charity care data will result in a "default" pool size of $2.3 billion. The DSRIP program will be phased out during the five-year period as federal matching funds of DSRIP activities will be reduced each year until it ceases entirely in 2021. Some of these funds might be available to support other programs, or if the original DSRIP projects will be continued or incorporated into managed care. Moreover, the impact of UC pool changes, particularly in relation to charity care hospitals, while currently uncertain, will become more evident with each passing deadline over the new Waiver's five-year term.

At September 30, 2017, the Company had recorded a net receivable of approximately $17 million (net of reserves of approximately $5 million) related to State fiscal years 2015 through 2017 in respect of UC monies owed to the Company. As a result of a lawsuit by a hospital in Texas against CMS in relation to the calculation of uncompensated care, the Texas Health and Human Services Commission set aside reserves as a contingency against a reallocation of those funds, pending the outcome of the lawsuit. During the year ended September 30, 2018, the hospital won the lawsuit and it is under appeal. At September 30, 2018, given the additional uncertainty, the Company has recorded a reduction to revenue of approximately $17 million. Accordingly, the net revenues recorded under the UC program for the year ended September 30, 2018 are negative.

(c) Rhode Island hospitals receive federal and state Medicaid funds as additional reimbursement for treating a disproportionate share of low income patients. The State of Rhode Island also assesses a license fee to all hospitals in Rhode Island based on each hospital's net patient revenue. The Company recorded $16,925,000 and $20,137,000 of expense during the years ended September 30, 2018 and 2017, respectively, as a result of the license fee.

(d) The New Jersey Health Care Reform Act of 1992 established Health Care Subsidy Funds to provide certain hospitals in New Jersey with funds necessary to provide charity care and other forms of uncompensated care.

(e) The Company's Pennsylvania hospitals are participants in Pennsylvania statewide hospital assessment, Medicaid Modernization Assessment ("MMA"), which has been extended through June 30, 2023. The assessments have enabled the Commonwealth of Pennsylvania to maintain the updated inpatient payment system, make changes to existing disproportionate share/supplemental payments, and to create new payments where applicable. The Company has also recognized revenues from the Pennsylvania Community Access Fund ("CAF").

(f) The Company's hospitals in Connecticut participate in its Medicaid DSH program and receive additional reimbursement for treating a disproportionate share of low income patients. Connecticut assesses a provider tax based on total net revenue received by a hospital for the provision of inpatient hospital services and outpatient hospital services. The amount of the provider tax is currently the subject of litigation. The state's two-year budget adopted in late 2017 provides for an increase in the provider tax, as well as additional supplemental payments to be paid to hospitals. CMS has approved both parts of the arrangement: the increase in the provider tax, and the additional supplemental payments to be paid to certain hospitals. The state has noted

the potential that further negotiations may be needed between the hospital association and the state given that increases in a portion of the state payments may exceed federal limits.

Managed Care: The Company has also entered into payment agreements with certain commercial insurance carriers, HMOs, and PPOs. The basis for payment under these agreements is in accordance with negotiated contracted rates or at the Company's standard charges for services provided. Some of these payments are capitated, meaning that the Company receives an agreed amount per patient for providing an agreed range of services.

Self-Pay: Self-pay patients represent those patients who do not have health insurance and are not covered by some other form of third party arrangement. Such patients are evaluated, at the time of services or shortly thereafter, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid, as well as the Company's local hospital's indigent and charity care policy.

Laws and regulations governing the third-party payor arrangements are extremely complex and subject to interpretation. As a result, there is at least a reasonable possibility that recorded estimates will change by a material amount in the near term. Normal estimation differences between subsequent cash collections on patient accounts receivable and net patient accounts receivable estimated in the prior year are reported as adjustments to net patient service revenue in the current period.

The following is a summary of due from and due to governmental payers at September 30, 2018 and 2017 (in thousands):

September 30,	**2018**	2017
Due from government payers:		
Medicaid Disproportionate Share (DSH)	$ **16,673**	$ 20,414
Medicare cost report settlements	**5,877**	7,707
Medicaid Section 1115 receivable	**10,283**	23,031
	$ **32,833**	$ 51,152
Due to government payers:		
Medicare cost report settlements	$ **21,616**	$ 17,712
Medicaid cost report settlements	**8,999**	6,042
	$ **30,615**	$ 23,754

The Company is not aware of any material claims, disputes, or unsettled matters with any payers that would affect revenues that have not been adequately provided for and disclosed in the accompanying consolidated financial statements.

California Hospital Fee Program

The Company recognizes revenues related to supplemental Medi-Cal payments under California provider fee programs. These programs are funded by quality assurance fees paid by participating hospitals and matching federal funds.

Based on formulas contained in the legislation as well as modeling done by the California Hospital Association, the Company recognized supplemental payments, included in net patient service revenue, and quality assurance fee expense, included in general and administrative expenses in the accompanying consolidated statements of operations as follows (in thousands):

Years Ended September 30,	**2018**	2017
Hospital services revenues	**$ 284,122**	$ 70,620
General and administrative expenses	**123,996**	46,127
Net pre-tax impact	**$ 160,126**	$ 24,493

As of September 30, 2018 and 2017, the Company had receivables related to the California Hospital Fee Program of approximately $211,454,000 and $59,209,000, respectively, and had liabilities related to the California Hospital Fee Program of approximately $65,967,000 and $1,968,000, respectively, in the accompanying consolidated balance sheets.

Legislation approved by the State of California in October 2013 created the framework for the hospital fee program to continue in perpetuity without requiring further legislation from the State. In November 2016, California voters approved Proposition 52, which made the hospital fee program permanent and prohibits lawmakers from diverting Medi-Cal funds to pay for anything other than their intended purpose. In December 2017, CMS approved the fee-for-service inpatient and outpatient payments and taxes for the period from January 1, 2017 to June 30, 2019 ("QAF 5"). The increased payments to the Medi-Cal managed plans for the current California Hospital Fee Program period are anticipated to occur the first half of Calendar 2019 when it is anticipated CMS will approve the amended Health Plan contracts. During the year ended September 30, 2018, the Company recorded revenues under the QAF 5 program of $111.9 million related to periods prior to the current fiscal year. Additionally, the Company recorded revenues related to previous hospital fee programs prior to QAF 5 of $14.6 million during the year ended September 30, 2018.

Charity Care

The Company provides charity care to patients who lack financial resources and are deemed to be medically indigent based on criteria established under the Company's charity care policy. This care is provided without charge or at amounts less than the Company's established rates. Because the Company does not pursue collection of amounts determined to qualify as charity care, such amounts are not reported as revenue. The direct and indirect costs related to this care totaled approximately $10,623,000 and $10,653,000 for the years ended September 30, 2018 and 2017, respectively. Direct and indirect costs for providing charity care are estimated by calculating a ratio of cost to gross charges and then multiplying that ratio by the gross uncompensated charges associated with providing care to charity patients. In addition, the Company provides services to other medically indigent patients under various state Medicaid programs. Such programs pay amounts that are less than the cost of the services provided to the recipients. The Company has not changed its charity care or uninsured discount policies during the years ended September 30, 2018 and 2017.

Provisions for Contractual Allowances and Bad Debts

Collection of receivables from third-party payers and patients is the Company's primary source of cash and is critical to its operating performance. The Company closely monitors its historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions for contractual allowances are made using the most accurate information available. However, due to the complexities involved in these estimations, actual payments from payers may be materially different from the amounts management estimates and records. The Company's primary collection risks relate to uninsured patients and the portion of the bill which is the patient's responsibility, primarily co-payments and deductibles. Payments for services may also be denied due to issues over patient eligibility for medical coverage, the Company's ability to demonstrate medical necessity for services rendered and payer authorization of hospitalization.

Accounts receivable are reduced by an allowance for doubtful accounts. Valuation of the collectability of accounts receivable and provision for bad debts is based on historical collection experience, payer mix and the age of the receivables. Management routinely reviews accounts receivable balances in conjunction with these factors and other economic conditions which might ultimately affect the collectability of the patient accounts, and makes adjustments to the Company's allowances as warranted. For receivables associated with services provided to patients who have third-party coverage, management analyzes contractually due amounts and subsequently calculates an allowance for doubtful accounts and provision for bad debts once the age of the accounts reaches a specific age category based on historical experience. For receivables associated with self-pay patients, management records a significant provision for bad debts beginning in the period services were provided based on past experience that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The allowance for doubtful accounts as a percent of gross accounts receivable was 36% and 28% at September 30, 2018 and September 30, 2017, respectively. The allowance for doubtful accounts was $193,439,000 and $141,775,000 as of September 30, 2018 and 2017, respectively.

Legislation

All of the Company's hospital facilities are subject to the Emergency Medical Treatment and Active Labor Act ("EMTALA"). This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions exists regardless of a patient's ability to pay for treatment. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay. Penalties for violations of EMTALA include civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. The Company believes that it is in compliance with EMTALA and is not aware of any pending or threatened EMTALA investigations involving allegations of potential wrongdoing that would have a material effect on the Company's consolidated financial statements.

Medical Group Segment

Medical Group Revenues

Operating revenue of the Medical Group segment consists primarily of payments for medical services procured by the Affiliates under capitated contracts with various managed care providers including HMOs. Capitation revenue under HMO contracts is prepaid monthly to the Affiliates based on the number of enrollees electing any one of the Affiliates as their health care provider. See "Concentrations of Credit Risks" below for revenues received from the five largest contracted HMOs.

Capitation revenue (net of capitation withheld to fund risk share deficits discussed below) is recognized in the month in which the physician organizations are obligated to provide services. Minor ongoing adjustments to prior months' capitation, primarily arising from contracted HMOs' finalizing of monthly patient eligibility data for additions or subtractions of enrollees, are recognized in the month they are communicated to the Company. Additionally, Medicare pays capitation using a "Risk Adjustment model," which compensates managed care organizations and providers based on the health status (acuity) of each enrollee. Health plans and providers with higher acuity enrollees will receive more and those with healthier enrollees will receive less. Under Risk Adjustment, capitation is determined based on health severity, measured using patient encounter data. Capitation is paid on an interim basis based on data submitted for the enrollee for the preceding year and is adjusted in subsequent periods (generally in the Company's fourth quarter) after the final data is compiled. Positive or negative capitation adjustments are made for Medicare enrollees with conditions requiring more or less healthcare services than assumed in the interim payments. Since the Company cannot reliably predict these adjustments, periodic changes in capitation amounts earned as a result of Risk Adjustment are recognized generally in the fourth quarter when those changes are communicated by the health plans to the Company. During the years ended September 30, 2018 and 2017, the Company returned and recognized as a reduction in revenue, approximately $3,220,000 and $13,105,000, respectively, as a result of the final Hierarchical Condition Category ("HCC") reconciliation.

HMO contracts also include provisions to share in the risk for hospitalization, whereby the physician organization can earn additional incentive revenue or incur penalties based upon the utilization of hospital services. Typically, any shared risk deficits are not payable until and unless the Company generates future risk sharing surpluses, or if the HMO withholds a portion of the capitation revenue to fund any risk share deficits. At the termination of the HMO contract, any accumulated risk share deficit is typically extinguished. Due to the lack of access to information necessary to estimate the related costs, shared-risk amounts receivable from the HMOs are only recorded when such amounts are known. Risk pools for the prior contract years are generally final settled in the third or fourth quarter of the following fiscal year. For the years ended September 30, 2018 and 2017, Medical Group revenues included approximately $7,125,000 and $73,454,000, respectively, relating to risk-sharing profit. At September 30, 2018 and 2017, contingent liabilities for carry-forward risk-pool deficits expected to be forgiven, or offset against future surpluses were approximately $92,700,000 and $30,543,000, respectively, based on the available information from the health plans.

The Company also receives incentives under "pay-for-performance" programs for quality medical care based on various criteria. These incentives, which are included in other revenues within Medical Group revenues, are generally recorded in the third and fourth quarters of the fiscal year when such amounts are known. Performance and incentive revenues recorded during the years ended September 30, 2018 and 2017 were $5,751,000 and $4,469,000, respectively.

Management fee revenue is earned in the month the services are rendered. Management fee arrangements with unaffiliated entities provide for compensation ranging from 6.5% to 10% of revenues. Management fee revenues recorded during the years ended September 30, 2018 and 2017 were $5,656,000 and $6,261,000, respectively. Management fees for revenue for entities that are consolidated are eliminated on consolidation.

Medical Group Cost of Revenues

The cost of health care services consists primarily of capitation and claims payments, pharmacy costs and incentive payments to contracted providers. These costs are recognized in the period incurred, or when the services are provided. Claims costs also include an estimate of the cost of services which have been incurred but not yet reported to the Company. The estimate for accrued medical costs is based on projections of costs using historical studies of claims paid and adjusted for seasonality, utilization and cost trends. These estimates are subject to trends in loss severity and frequency. Although considerable variability is inherent in such estimates, management records its best estimate of the amount of medical claims incurred at each reporting period. Estimates are continually monitored and reviewed and, as settlements are made or estimates adjusted, differences are reflected in current period. See Note 13 for changes in claims estimates during the years ended September 30, 2018 and 2017.

The Company has contractual reimbursement obligations to providers and discretionary incentive payment obligations to physicians. These payments are in large part predicated on the pay-for-performance, shared risk revenues, and favorable senior capitation risk adjustment payments received by the Company from the health plans. The Company records these revenues generally in the third or fourth quarter of each fiscal year when the incentives and capitation adjustments due from the health plans are known. During this period, the Company also finalizes the physician discretionary incentive.

The Company recorded physician incentives expense of approximately $21,669,000 and $41,808,000 for the year ended September 30, 2018 and 2017, respectively. As of September 30, 2018 and 2017, physician incentive accruals of approximately $17,396,000 and $31,193,000, respectively, were included in accounts payable and other accrued liabilities in the accompanying consolidated financial statements.

The Company also periodically evaluates the need to establish premium deficiency reserves for the probability that anticipated future health care costs could exceed future capitation payments from HMOs under capitated contracts and, where appropriate, records a premium deficiency reserve. There were no such premium deficiencies recorded at September 30, 2018 and 2017, respectively.

The Company, for certain matters, maintains stop loss coverage for health care costs that are in excess of set thresholds.

Global Risk Management Segment

Global Risk Management Revenues

Operating revenue of the Global Risk Management segment consists primarily of payments for medical services procured under global capitation arrangements from third-party health plans. Capitation revenue under these global capitation contracts is prepaid monthly to the Global Risk Management segment based on the number of enrollees. Entities within the Global Risk Management segment entered into Management Services Agreements with the Hospital Services and Medical Group segments, under which 98% of capitation revenue received is transferred to these segments.

Confidential LGP-SBC-000000642

Similar to the Medical Group segment, capitation revenue is recognized in the month in which the Global Risk Management segment is obligated to provide services. Minor ongoing adjustments to prior months' capitation, primarily arising from contracted HMOs' finalizing of monthly patient eligibility data for additions or subtractions of enrollees, are recognized in the month they are communicated to the Company. Additionally, Medicare pays capitation using a "Risk Adjustment model," which compensates managed care organizations and providers based on the health status (acuity) of each enrollee. Health plans and providers with higher acuity enrollees will receive more and those with healthier enrollees will receive less. Under Risk Adjustment, capitation is determined based on health severity, measured using patient encounter data. Capitation is paid on an interim basis based on data submitted for the enrollee for the preceding year and is adjusted in subsequent periods (generally in the Company's fourth quarter) after the final data is compiled. Positive or negative capitation adjustments are made for Medicare enrollees with conditions requiring more or less healthcare services than assumed in the interim payments. Since the Company cannot reliably predict these adjustments, periodic changes in capitation amounts earned as a result of Risk Adjustment are recognized generally in the fourth quarter when those changes are communicated by the health plans to the Company. During the years ended September 30, 2018 and 2017, the Global Risk Management Segment recognized capitation risk adjustments of $5,155,000 and $3,234,000, respectively.

Global Risk Management Cost of Revenues

The cost of health care services consists primarily of the transfer of capitation revenue to the Hospital Services and Medical Group segments under the Management Services Agreements, and capitation and claims payments. These costs are recognized in the period incurred, or when the services are provided. Claims costs also include an estimate of the cost of services which have been incurred but not yet reported to the Company. The estimate for accrued medical costs is based on projections of costs using historical studies of claims paid and adjusted for seasonality, utilization and cost trends. These estimates are subject to trends in loss severity and frequency. Although considerable variability is inherent in such estimates, management records its best estimate of the amount of medical claims incurred at each reporting period. Estimates are continually monitored and reviewed and, as settlements are made or estimates adjusted, differences are reflected in current operations.

The Company also periodically evaluates the need to establish premium deficiency reserves for the probability that anticipated future health care costs could exceed future capitation payments from HMOs under capitated contracts and, where appropriate, records a premium deficiency reserve. There were no such premium deficiencies recorded at September 30, 2018 or 2017.

The Company, for certain matters, maintains stop loss coverage for health care costs that are in excess of set thresholds.

Property, Improvements and Equipment

Property, improvements and equipment are stated on the basis of cost or, in the case of acquisitions, at their acquisition date fair values. Depreciation is provided using the straight-line method over the estimated useful lives of the assets, and amortization of leasehold improvements is provided using the straight-line basis over the shorter of the remaining lease period or the estimated useful lives of the leasehold improvements. Leasehold improvements are generally depreciated over 5 to 40 years, buildings are depreciated over 5 to 40 years, equipment is depreciated over 2 to 15 years and furniture and fixtures are depreciated over 2 to 20 years. Equipment capitalized under capital lease obligations are amortized over the lesser of the life of the lease or the useful life of the asset.

Confidential LGP-SBC-000000643

As more fully described in Note 12, the Company is required to comply with certain seismic standards as required by the state of California by January 1, 2020 (subject to possible extension of up to 30 months to July 1, 2022, as described in Note 12). The useful life of buildings subject to seismic retrofit requirements may be limited if the Company does not make the necessary upgrades by the required compliance date.

Goodwill

Goodwill represents the excess of the consideration paid and liabilities assumed over the fair value of the net assets acquired, including identifiable intangible assets.

Goodwill is not amortized; rather it is reviewed annually for impairment for each reporting unit, or more frequently if impairment indicators arise. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value.

Through the year ended September 30, 2017, the Company tested for goodwill impairment as of September 30 each year. During the year ended September 30, 2018, the Company changed the date of the annual goodwill impairment test to July 1. The Company does not believe that the change in assessment date represents a material change in the application of applicable accounting literature. Impairment of goodwill is tested at the reporting unit level, by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. The fair value of the reporting units are estimated. In evaluating whether indicators of impairment exist, the Company considers adverse changes in market value, laws and regulations, profitability, cash flows, ability to maintain enrollment and renew payer contracts at favorable terms, among other factors. The Company has adopted new literature during the year ended September 30, 2018 which changes the goodwill impairment test from a two-step process to a one-step process, which consists of estimating based on a weighted combination of (i) the guideline company method that utilizes revenue or earnings multiples for comparable publicly-traded companies, and (ii) a discounted cash flow model. If the estimated fair value of the reporting unit is less than its carrying value, this indicates that goodwill is impaired, and impairment is recorded based on the deficiency of fair value compared to the carrying value. The Company's impairment test related to goodwill during the year ended September 30, 2018 resulted in a full impairment of goodwill related to the Chartercare and East Orange facilities. There were no impairment charges during the year ended September 30, 2017.

Intangible Assets

Intangible assets include customer relationships, trade names, favorable leasehold, and physician guarantees. The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The Company considers assets to be impaired and writes them down to fair value if estimated undiscounted cash flows associated with those assets are less than their carrying amounts. Fair value is based upon the present value of the associated cash flows. Changes in circumstances (for example, changes in laws or regulations, technological advances or changes in strategies) may also reduce the useful lives from initial estimates. Changes in planned use of intangibles may result from changes in customer base, contractual agreements, or regulatory requirements. In such circumstances, management will revise the useful life of the long-lived asset and amortize the remaining net book value over the adjusted remaining useful life. There were no impairments recorded during the years ended September 30, 2018 and 2017.

Insurance Reserves

Medical Malpractice Liability Insurance

The individual physicians who contract with the physician organizations carry their own medical malpractice insurance, some of which may be purchased from RRG or CHIC. In the Hospital Services segment, the Company's hospitals carry professional and general liability insurance to cover medical malpractice claims under claims-made policies. Under the policies, insurance premiums cover only those claims actually reported during the policy term. Should the claims-made policy not be renewed or replaced with equivalent insurance, claims related to occurrences during the policy term but reported subsequent to the policy's termination may be uninsured. The Company's hospitals have a consolidated policy for professional and general liability insurance with separate retentions for each entity. The Pennsylvania MCARE fund provides the $500,000 in excess of $500,000 RRG malpractice coverage for Crozer.

For the current fiscal year, RRG provided primary malpractice insurance ($500,000 per occurrence and $2,500,000 in the aggregate) and general liability ($1,000,000 per occurrence and $2,000,000 in the aggregate). In addition, the RRG provided coverage for losses of $4,000,000 in excess of $1,000,000 for each hospital professional liability claim with no aggregate limit. The RRG also provides additional layers of excess coverage over $5,000,000 up to $20,000,000, which are 100% reinsured by third party insurance carriers through multiple layers. The excess coverage provided for general liability is over $10,000,000 up to $50,000,000, which is also 100% reinsured by third party carriers.

CHIC provided malpractice ($3,000,000 per occurrence and $9,000,000 in the aggregate) and general liability ($1,000,000 per occurrence and $3,000,000 in the aggregate) coverage for ECHN for the year ended September 30, 2017. During the year ended September 30, 2018, CHIC provided malpractice and general liability ($2,000,000 per occurrence) coverage for all facilities except Crozer. CHIC also provided an excess healthcare professional liability and umbrella liability insurance policy on a claims-made basis covering healthcare professional liability, general liability, automobile liability, employers' liability, helipad liability and non-owned aircraft liability. The limit provided was $60,000,000 for each loss event and in the annual aggregate excess of the primary coverage layers described above. This coverage was fully reinsured by third party carriers.

GAAP requires that a health care organization record and disclose the estimated costs of medical malpractice claims in the period of the incident of malpractice, if it is reasonably possible that liabilities may be incurred and losses can be reasonably estimated. The Company has recognized an estimated liability for incurred but not reported claims and the self-insured risks (including deductibles and potential claims in excess of policy limits) based upon an actuarial valuation of the Company's historical claims experience of its hospitals. At September 30, 2018 and 2017, the total gross claims liability, was $77,280,000 and $60,722,000 and reinsurance recoverable on unpaid losses were $12,834,000 and $9,059,000, respectively, included in other assets on the accompanying consolidated balance sheets, and were estimated using a discount factor ranging from 3.5% to 4%.

Confidential LGP-SBC-000000645

Workers' Compensation Insurance

The workers' compensation coverage provides the statutory benefits required by law with a $500,000 deductible reimbursement policy provided by CHIC for the Company's entities located in California and Connecticut. The facilities in Texas have opted out of the Texas Workers' Compensation system as non-subscribers, and provide their employees with benefits for occupational injury or disease through an ERISA plan, and have an Employer's Excess Indemnity policy with a $25,000 deductible with limits of $10,000,000 per occurrence and $25,000,000 aggregate. The facilities in Rhode Island were fully insured for workers' compensation claims with no deductible. East Orange was fully insured for workers' compensation claims with no deductible from March 1, 2017 through September 30, 2018. Crozer has a workers' compensation policy with a $500,000 deductible. At September 30, 2018 and 2017, included in accrued salaries, wages and benefits are accruals for uninsured claims and claims incurred but not reported of approximately $27,776,000 and $28,329,000 and reinsurance recoverable on unpaid losses of $8,557,000 and $7,246,000, respectively, included in other assets on the accompanying consolidated balance sheets. The amounts are estimated based upon an actuarial valuation of claims experience, using a discount factor of 4%.

Reserve Methodology

The claims reserve is based on the best data available to the Company. The estimate, however, is subject to a significant degree of inherent variability. The estimate is continually monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of the medical malpractice and workers' compensation claims liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims. Management is not aware of any potential claims whose settlement, if any, would have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Stock Options

Ivy Holdings has a stock option plan (the "Ivy Plan"), which is administered by the Compensation Committee of the Ivy Holdings Board. The plan includes an Incentive Stock Option Agreement and a Non-Qualified Stock Option Agreement to be used in connection with the grant of options under the plan. These options granted under the Ivy Plan are exercisable into Ivy Holdings stock and vest based on a number of criteria.

Compensation costs for option awards are measured and recognized in the consolidated financial statements based on their grant date fair value, net of estimated forfeitures over the awards' service period. Options subject to variable accounting treatment are subject to revaluation at the end of each reporting period. The Company uses the Black-Scholes option pricing model and a single option award approach to estimate the fair value of stock options granted. The fair value of restricted stock grants are determined on the date of grant, based on the number of shares granted and the quoted price or estimated fair market value of the Company's common stock. Equity-based compensation is classified within the same line items as cash compensation paid to employees. Compensation costs related to stock options that vest or are exercisable when certain corporate transactions occur, including a change in control, are recognized at the time that such an event occurs.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with initial maturities of 90 days or less to be cash equivalents. Cash and cash equivalents are primarily comprised of deposits with banks. The Company maintains its cash at banks with high credit-quality ratings.

Restricted Cash

Some of the Company's cash is restricted for various purposes including research, regulatory requirements and letters of credit. The Company is also required to keep restricted deposits by certain HMOs for the payment of claims. Such restricted deposits are classified as a current asset in the accompanying consolidated balance sheets, as they are restricted for payment of current liabilities. Restricted cash also include certificates of deposit with maturity dates of more than 90 days when purchased.

Restricted Investments

Investments in marketable securities, primarily mutual funds, and are classified as available for sale and are stated at fair value. Adjustments are recorded in the statements of other comprehensive income. Investment securities are exposed to various risk, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities, it is possible that changes in values of investment securities could occur in the near term and such changes could materially affect investment. These investments are held in the Company's captive insurance companies and are shown as restricted because the state/local regulators require their approval before dividends or return of capital to the Parent Entity.

Inventories

Inventories of supplies are valued at the lower of amounts that approximate the weighted average cost or market. Inventories consist primarily of medical and surgical supplies and pharmaceuticals.

Deferred Financing Costs

Deferred financing costs are amortized over the period in which the related debt is outstanding using the effective interest method and are classified as a deduction from the carrying amount of the related debt.

Income Taxes

Deferred income tax assets and liabilities are recognized for differences between financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. To the extent a deferred tax asset cannot be recognized under the preceding criteria, allowances must be established. The impact on deferred taxes of changes in tax rates and laws, if any, are applied to the years during which temporary differences are expected to be settled and reflected in the financial statements in the period of enactment. The Company recognizes interest and penalties associated with income tax matters and unrecognized tax benefits in the income tax expense line item of the statements of operations. For the years ended September 30, 2018 and 2017, the Company incurred $2,405,000 and $960,000 of interest and penalties related to income taxes, respectively.

An entity is required to evaluate its tax positions using a two-step process. First, the entity should evaluate the position for recognition. An entity should recognize the financial statement benefit of a tax position if it determines that it is more likely than not that the position will be sustained on examination. Next, the entity should measure the amount of benefit that should be recognized for those tax positions that meet the more-likely-than-not test.

A consolidated federal tax return is filed for Ivy Holdings, with the exception of Nuestra Familia Medical Group Inc., ("Nuestra"), which files its own federal tax returns. The Company files separate state tax returns for California, Texas, Rhode Island, Pennsylvania, Connecticut, New Jersey and Florida. The Company's filed tax returns are generally subject to examination by the IRS and state tax boards for 3 to 4 years.

Sale-Leaseback Transactions

The Company evaluates sale-leaseback transactions by determining whether the transaction meets the qualifying criteria to be recognized as a sale-leaseback, including the transfer of risk and rewards of ownership as well as the absence of continuing involvement of the Company. When the qualifying criteria for a sale-leaseback transaction are not met, the Company accounts for the transaction as a financing (see Note 9).

Comprehensive Income (Loss)

Comprehensive income consists of net income and other gains and losses affecting stockholder's equity that, under generally accepted accounting principles, are excluded from net income (loss) attributable to the Company. For the Company, such items consist primarily of unrealized gains or losses on debt and equity securities as well as changes related to pension and other postretirement liabilities that are not recognized immediately in net periodic benefit costs (see Note 11).

Fair Value of Financial Instruments

Financial instruments consist primarily of cash and cash equivalents, restricted cash, restricted investments, patient and other accounts receivables, accrued salaries and benefits, accounts payable and accrued expenses, medical claims and related liabilities, amounts due to government agencies, notes receivable and payable, capital lease obligations, debt, and other liabilities. The carrying amounts of current assets and liabilities approximate their fair value due to the relatively short period of time between the origination of the instruments and their expected realization.

Fair Value Measurement

Relevant accounting guidance establishes a framework for measuring fair value and clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants.

The guidance requires disclosure about how fair value is determined for assets and liabilities and establishes a hierarchy for which these assets and liabilities must be grouped, based on significant levels of inputs as follows: Level 1 quoted prices in active markets for identical assets or liabilities; Level 2 quoted prices in active markets for similar assets and liabilities and inputs that are observable for the asset or liability; or Level 3 unobservable inputs for the asset or liability, such as discounted cash flow models or valuations. The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The Company's Level 1 assets include cash and cash equivalents and investments (certificates of deposit and money market mutual funds). The inputs for fair value of goodwill and intangible assets (including long lived assets and intangible assets subject to amortization) would be based on Level 3 inputs as data used for such fair value calculations would be based on discounted cash flows that are not observable from the market, directly or indirectly.

Financial Items Measured at Fair Value on a Recurring Basis

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis and where they are classified within the hierarchy (in thousands):

	Total	Level 1	Level 2	Level 3
As of September 30, 2018				
Mutual funds	$ 23,779	$ 23,779	$ -	$ -
Total	$ 23,779	$ 23,779	$ -	$ -
As of September 30, 2017				
Certificates of deposit	$ 850	$ 850	$ -	$ -
Mutual funds	14,960	14,960	-	-
Total	$ 15,810	$ 15,810	$ -	$ -

The Company's investments are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices. The Company's defined benefit pension plan assets are also measured at fair value (see Note 11).

The Company's carrying amount of long-term debt approximated fair value as of September 30, 2018 and 2017, respectively.

Nonfinancial Items Measured at Fair Value on a Nonrecurring Basis

Nonfinancial assets such as goodwill and identifiable intangible assets are measured at fair value when there is an indicator of impairment and recorded at fair value only when impairment is recognized. The Company performs an annual impairment test on the goodwill, and performs an impairment test on the intangible assets when there are indications of impairment.

During the year ended September 30, 2018, the Company recorded approximately $18.8 million of impairment relating to goodwill, which is reflected in the accompanying consolidated statements of operations.

The Company uses the discounted cash flow approach, the guideline public company approach and the guideline transactions approach to estimate the residual value of the Company's goodwill. The measurement of goodwill is a Level 3 measurement.

The following table provides quantitative information related to the significant unobservable inputs to determine fair value and impairment of goodwill as of September 30, 2018:

Residual Value of Goodwill	Valuation Technique	Unobservable Input	Rates
$ -	Discounted Cash Flow	Weighted average cost of capital	9.3%
		Revenue growth rate	(1.8)% - 11.2%
	Guideline Public Company	LTM revenue multiple	0.5x
		NTM EBITDA multiple	7.0x

There were no nonrecurring measurements as of September 30, 2017.

Confidential LGP-SBC-000000649

Concentrations of Credit Risk

Cash and cash equivalents are maintained at financial institutions and, at times, balances may exceed federally insured limits of $250,000 per depositor of each financial institution. The Company has not experienced any losses to date related to these balances.

Financial instruments that potentially subject the Company to concentrations of credit risk consist of receivables due from Medicare, Medicaid, patients, and health plans including shared-risk arrangements.

The Company invests excess cash in liquid securities at institutions with strong credit ratings, following established guidelines relative to diversification and maturities to maintain safety and liquidity. These guidelines are periodically reviewed and modified to take into consideration trends in yields and interest rates and principal risk. Management attempts to schedule the maturities of the Company's investments to coincide with the Company's expected cash requirements. Credit risk with respect to receivables is limited since amounts are generally due from large HMOs within the Medical Group segment and from the Medicare and Medicaid programs within the Hospital Services segment. Management reviews the financial condition of these institutions on a periodic basis and does not believe the concentration of cash or receivables results in a high level of risk.

For the years ended September 30, 2018 and 2017, the Hospital Services segment received a total of 64% and 61% of its net patient revenues from Medicare and Medicaid programs, respectively, and the Medical Group segment received a total of 63% and 64% for the years ended September 30, 2018 and 2017, respectively, of their capitation revenues from its five largest HMOs, as follows (in thousands):

Years Ended September 30,	2018	% of Total Revenue		2017	% of Total Revenue
Hospital Services:					
Government Payers:					
Medicare	$ 850,197	31%		$ 848,221	33%
Medicaid	905,322	33%		699,340	28%
Total	$ 1,755,519	64%		$ 1,547,561	61%
Medical Group:					
HMO A	$ 60,506	20%	HMO A	61,624	21%
HMO B	35,705	12%	HMO F	34,950	12%
HMO F	32,934	11%	HMO B	32,923	11%
HMO D	32,357	11%	HMO D	29,617	10%
HMO C	27,051	9%	HMO C	28,585	10%
Total	$ 188,553	63%		$ 187,699	64%

The Global Risk Management segment received all of their revenues from seven health plans during the years ended September 30, 2018 and 2017.

Confidential

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities at the dates, and for the periods, that the consolidated financial statements are prepared. Actual results could materially differ from those estimates. Principal areas requiring the use of estimates include third party settlements, settlements under risk sharing programs, allowances for contractual discounts and doubtful accounts, accruals for medical claims, impairment of goodwill, long-lived assets and intangible assets, share-based payments, professional and general liability claims and workers' compensation claims, reserves for pension obligations and other postretirement benefit reserves, reserves for outcome of legislation and valuation allowances against deferred tax assets.

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)" which defers the effective date of the revenue standard ASU 2015-14. The core principle of ASU 2014-09 is built on the contract between a vendor and a customer for the provision of goods and services, and attempts to depict the exchange of rights and obligations between the parties in the pattern of revenue recognition based on the consideration to which the vendor is entitled. To accomplish this objective, the standard requires five basic steps: (i) identify the contract with the customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract, (v) recognize revenue when (or as) the entity satisfies a performance obligation. Nonpublic entities will apply the new standard for annual periods beginning after December 15, 2018, including interim periods therein. Three basic transition methods are available — full retrospective, retrospective with certain practical expedients, and a cumulative effect approach. Under the third alternative, an entity would apply the new revenue standard only to contracts that are incomplete under legacy U.S. GAAP at the date of initial application (e.g. October 1, 2019) and recognize the cumulative effect of the new standard as an adjustment to the opening balance of retained earnings. That is, prior years would not be restated and additional disclosures would be required to enable users of the financial statements to understand the impact of adopting the new standard in the current year compared to prior years that are presented under legacy U.S. GAAP. The Company is currently evaluating the effect of this guidance on its consolidated financial statements.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments (Subtopic 825-10)". ASU 2016-01 requires all equity investments to be measured at fair value with changes in fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee). ASU 2016-01 also requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition, ASU 2016-01 eliminates the requirement to disclose the fair value of financial instruments measured at amortized cost for entities that are not public business entities. ASU 2016-01 is effective for annual and interim periods beginning after December 15, 2017. The Company is currently evaluating the standard and the impact on its consolidated financial statements and footnote disclosures.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)". The core principle of ASU 2016-02 is that a lessee should recognize the assets and liabilities that arise from leases, including operating leases. Under the new requirements, a lessee will recognize in the statement of financial position a liability to make lease payments (the lease liability) and the right-of-use asset representing the right to the underlying asset for the lease term. For leases with a term of 12 months or less, the lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. The recognition, measurement, and presentation of expenses and cash flows arising from a lease by a lessee have not significantly changed from previous GAAP. The standard is effective for nonpublic entities for fiscal years beginning after December 15, 2019. The Company is currently evaluating the standard and the impact on its consolidated financial statements and footnote disclosures.

In March 2016, the FASB issued ASU 2016-09, "Compensation - Stock Compensation (Topic 718)". The updated standard simplifies several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. ASU 2016-09 is effective for non-public business entities for annual reporting periods beginning after December 15, 2017, including interim periods within those annual reporting periods. The Company is currently evaluating the impact of its pending adoption of the new standard on its consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230)". The updated standard addresses eight specific cash flow issues with the objective of reducing diversity in practice. ASU 2016-15 is effective for non-public business entities for annual reporting periods beginning after December 15, 2018, including interim periods within those annual reporting periods. Early adoption is permitted. The Company is assessing the impact of the adoption of ASU 2016-15 on its consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, "Business Combinations (Topic 805): Clarifying the Definition of a Business." These amendments clarify the definition of a business. The amendments affect all companies and other reporting organizations that must determine whether they have acquired or sold a business. The definition of a business affects many areas of accounting including acquisitions, disposals, goodwill, and consolidation. The amendments are intended to help companies and other organizations evaluate whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. This update is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. Early adoption is permitted under certain circumstances. The amendments should be applied prospectively as of the beginning of the period of adoption. The Company is evaluating the effect that this update will have on its consolidated financial statements and related disclosures.

In January 2017, the FASB issued ASU 2017-04, "Intangibles-Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment)". The new guidance is effective for fiscal years beginning after December 15, 2019 and interim periods within those fiscal years, and should be applied on a prospective basis. Early adoption is permitted for interim or annual goodwill impairment tests performed on testing dates after January 1, 2017. The new guidance simplifies the current two-step goodwill impairment test by eliminating Step 2 of the test. The new guidance requires a one-step impairment test in which an entity compares the fair value of a reporting unit with its carrying amount and recognizes an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, if any. The Company early adopted this standard in the current fiscal year.

Confidential LGP-SBC-000000652

In March 2017, the FASB issued ASU 2017-07, "Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost. The ASU amends ASC Topic 715, Compensation — Retirement Benefits, to require employers that present a measure of operating income in their statements of income to include only the service cost component of net periodic pension costs and net periodic postretirement benefit cost in operating expenses. The ASU also stipulates that only the service cost component of net benefit cost is eligible for capitalization. This guidance is effective for fiscal years beginning after December 15, 2018. Early adoption is permitted as of the beginning of an annual period for which financial statements have not been issued or made available for issuance. Disclosures of the nature of and reason for the change in accounting principle are required in the first interim and annual periods of adoption. The Company is currently evaluating the provisions of ASU 2017-07 and its impact on the Company's consolidated financial position, results of operations and cash flows.

In May 2017, the FASB issued ASU 2017-09, "Modification Accounting for Share-Based Payment Arrangements (Topic 718)", which identifies and provides guidance on the types of changes to share-based payment awards that an entity would be required to apply modification accounting under ASU 2016-09, Stock Compensation (Topic 718). Specifically, an entity would not apply modification accounting if the fair value, vesting conditions and classification of the awards are the same immediately before and after the modification. ASU 2017-09 is effective for annual periods beginning after December 15, 2017 and will be applied prospectively to awards modified on or after the effective date. The Company is currently evaluating the provisions of ASU 2017-09 and its impact on the Company's consolidated financial position, results of operations and cash flows.

In February 2018, the FASB issued ASU 2018-02, "Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income", which allows a reclassification from accumulated other comprehensive income to retained earnings for the standard tax effects in accumulated other comprehensive income resulting from enactment of the comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the "Tax Act") and corresponding accounting treatment recorded in the fourth quarter of 2017. The ASU is effective for all entities for fiscal years beginning after December 15, 2018. Early adoption of the amendments in this ASU is permitted. The Company is currently evaluating the provisions of ASU 2018-02 and its impact on the Company's consolidated financial position, results of operations and cash flows.

In August 2018, the FASB issued ASU 2018-14, "Compensation - Retirement Benefits - Defined Benefit plans - General (Topic 715-20): Disclosure Framework - Changes to the Disclosure Requirements for Defined Benefit Plans", which amends ASC 715 to add, remove and clarify disclosure requirements related to defined benefit pension and other postretirement plans. This ASU is effective for fiscal years ending after December 15, 2021. Early adoption is permitted. The Company is currently evaluating the provision of ASU 2018-14 and its impact on its consolidated financial statements and related disclosures.

In August 2018, the FASB issued ASU 2018-15, "Intangibles - Goodwill and Other - Internal - Use Software (Subtopic 350-40): Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract", which provides guidance on implementation costs incurred in a cloud computing arrangement that is a service contract. Specifically, it amends ASC 350 to include in its scope implementation costs of a cloud computing arrangement that is a service contracts and clarifies that a customer should apply ASC 350-40 to determine which implementation costs should be capitalized in such a cloud computing arrangement. The Company has early adopted this literature for the year ended September 30, 2018.

Confidential LGP-SBC-000000653

3. Property, Improvements and Equipment

Property, improvements and equipment, consisted of the following (in thousands):

September 30,	2018	2017
Land and land improvements	$ 83,446	$ 86,214
Buildings and improvements	386,278	352,194
Leasehold improvements	28,971	26,641
Equipment	331,426	274,577
Furniture and fixtures	5,259	5,184
	835,380	744,810
Less: accumulated depreciation	(304,139)	(219,093)
	531,241	525,717
Construction in Progress	92,722	51,216
Property, improvements and equipment, net	$ 623,963	$ 576,933

At September 30, 2018 and 2017, the Company had assets under capitalized leases of approximately $_____ and $30,986,000, respectively, and related accumulated depreciation of $26,320,000 and $22,960,000, respectively.

Depreciation expense was approximately $91,385,000 and $96,143,000 for the years ended September 30, 2018 and 2017, respectively.

4. Acquisitions

For the years ended September 30, 2018 and 2017, the Company entered into the following material acquisitions. All business combinations were consistent with the Company's strategic growth plan and were accounted for using the acquisition method of accounting. Operating results for each of the acquisitions have been included in the accompanying consolidated financial statements from the date of acquisition. Goodwill arising is primarily attributable to the synergies expected to arise after the acquisitions, and is expected to be deductible for tax purposes for entities that were asset acquisitions.

All assets acquired and liabilities assumed were at fair value with the exception of the defined benefit pension liabilities and other post retirement employee benefits, which allows for an exception to fair value accounting for business combinations in accordance with GAAP. The recognized tax bases (the amount that is attributable for tax purposes) of the assets and liabilities are compared to the financial reporting values of the acquired assets and assumed liabilities (book bases) to determine the appropriate temporary differences. The Company identified temporary differences related to assumed pension liabilities, due primarily to differences in tax law regarding when a liability is or is not assumed in an asset acquisition; this difference in the treatment of the pension liabilities resulted in the recording of deferred tax assets which are reflected in the acquisition accounting and noted in the tables below.

Confidential LGP-SBC-000000654

The Company incurred approximately $3.1 million transaction costs during the year end September 30, 2017, which are included in general and administrative expenses in the accompanying consolidated statements of operations. Transaction costs incurred during the year ended September 30, 2018 were immaterial.

2018 acquisitions

In December 2017, New University Medical Group LLC ("New UMG") entered into a Second Closing to acquire the remaining assets of University Medical Group ("UMG") that were not acquired in the initial acquisition in December 2014. As consideration for the acquisition, New UMG has assumed certain designated liabilities of the practice, which consists of various loans payable to subsidiaries of the Company, totaling approximately $7.5 million. Post-acquisition, these liabilities are eliminated on consolidation. There was no cash consideration related to the transaction. The remaining assets and liabilities acquired were immaterial and no value was assigned to them in the purchase price allocation, and accordingly goodwill of $7.5 million arises from the acquisition. New UMG's parent company, Prospect CharterCARE Physicians, LLC, dba CharterCARE Medical Associates ("CCMA"), entered into a Post Closing Administrative Services Agreement pursuant to which CCMA and its affiliates provide services to the seller of the practice in connection with its termination of all operations and the wind up its affairs and operations.

The Company completed the acquisitions of four physician practice acquisitions in Connecticut for an aggregate purchase price of approximately $2.6 million, one physician multi-specialty practice in Pennsylvania for a purchase price of $1.6 million (net of working capital adjustments), three physician medical practices in California for an aggregate purchase price of approximately $800,000, and one physician family practice in Rhode Island for $180,000. All acquisitions were asset acquisitions, except for one stock purchase acquisition in Connecticut for a purchase price of $800,000, and accordingly goodwill arising from that acquisition is not deductible for tax purposes.

2017 acquisitions

On October 1, 2016, the Company acquired substantially all of the assets, and certain liabilities, of Eastern Connecticut Health Network, Inc. and certain of its subsidiaries (collectively, "ECHN") in exchange for cash consideration of $105 million (subject to certain adjustments). The acquired assets include a network of hospitals, outpatient service centers and providers and specialists serving eastern Connecticut. The acquired hospitals are The Manchester Memorial Hospital and The Rockville General Hospital.

On October 1, 2016, the Company acquired substantially all of the assets, and certain liabilities, of Greater Waterbury Health Network, Inc. and certain of its subsidiaries (collectively, "Waterbury") in exchange for cash consideration of $31.8 million (subject to certain adjustments). The acquired assets include Waterbury Hospital, an acute-care hospital with 357 licensed beds, and a network of outpatient centers and affiliated physicians.

Confidential LGP-SBC-000000655

The following table summarizes the assets acquired and liabilities assumed in connection with each of the acquisitions in 2017 (in thousands):

	ECHN	Waterbury
Cash and cash equivalents	$ 5,292	$ 3,010
Patient accounts receivable and other receivables	31,238	23,442
Prepaid expenses and other current assets	8,893	4,100
Property, improvements and equipment	100,002	46,298
Intangible assets	3,440	2,870
Other assets	24,071	6,108
Accounts payable and other current liabilities	(39,122)	(24,639)
Capital leases and long term debt	(15,307)	(3,646)
Other long-term liabilities	(15,286)	(7,354)
Deferred tax liabilities ("DTL")	(5,474)	(13,360)
Pension obligations	(66,902)	(11,850)
Noncontrolling interests	(421)	(2,504)
Bargain gains, net of DTL of $5,474 and $13,360, respectively	(8,722)	(21,288)
Consideration	$ 21,702	$ 1,187

In connection with the acquisitions of ECHN and Waterbury, the Company recorded bargain gains (net of deferred tax liabilities) of $30,010,000 which are included in gain on bargain purchase in the accompanying consolidated statements of operations for the year ended September 30, 2017. The bargain gains arose primarily because of the future capital commitment requirements associated with the acquisitions. During the year ended September 30, 2018, the Company identified further adjustments to the purchase price allocations, which resulted in charges to the accompanying consolidated statements of operations of $3,020,000. Such adjustments related primarily to additional liabilities, offset by lower deferred tax liabilities, at Waterbury.

On May 1, 2017, the Company's wholly-owned subsidiary, Prospect Blackstone Valley Surgicare, LLC ("Prospect Blackstone"), completed an asset acquisition of a freestanding ambulatory surgery center located near the facilities in Rhode Island, in exchange for cash consideration of $1.5 million, of which $100,000 is subject to a one-year indemnification escrow hold-back.

5. Discontinued Operations

During the year ended September 30, 2016, the Company determined that it would discontinue the operations of Prospect CharterCARE Elmhurst Extended Care LLC (dba Elmhurst Extended Care), Nix Community General Hospital LLC ("Nix CGH") and Prospect ACO CA, LLC ("CA ACO"). Elmhurst Extended Care and Nix CGH are reported in the Hospital Services segment and the CA ACO is reported in the Global Risk Management segment. During the year ended September 30, 2017, the assets of Elmhurst Extended Care were sold (effective December 22, 2016) and Nix CGH ceased operations (effective October 1, 2016). The Company closed and sold the Elmhurst Extended Care business for proceeds of $13,722,000. Effective April 1, 2017, the Company made a decision to no longer discontinue operations of CA ACO and its onward activities are classified as part of the continuing operations on the consolidated financial statements. The

Company's decision to discontinue the operations of each of the entities was based on the strategy of the Company's management in their respective markets and financial results.

Summarized financial information for discontinued operations is included below (in thousands):

For the Years Ended September 30,	**2018**	2017
Net Hospital Services revenues	$ -	$ 10,178
Operating expenses	-	(6,941)
Depreciation and amortization	-	(80)
Interest expense	-	(24)
Income on discontinued operations before income taxes	-	3,133
Gain from sale of discontinued operations	-	4,605
Income tax provision	-	2,966
Income on discontinued operations	$ -	$ 4,772

6. Goodwill and Intangible Assets

The carrying value of goodwill by reporting unit is as follows (in thousands):

September 30,	**2018**	2017
Southern California Hospitals	$ **130,912**	$ 130,912
Nix Health	**3,138**	3,138
CharterCARE	**-**	5,822
California Medical Groups	**28,222**	27,420
East Orange	**-**	4,572
Crozer	**140,216**	138,831
ECHN	**483**	-
Waterbury	**2,155**	-
Total	$ **305,126**	$ 310,695

The changes in the carrying amount of goodwill for the years ended September 30 are as follows (amounts in thousands):

September 30,	**2018**	2017
Balance, beginning of year	$ **310,695**	$ 341,488
Acquisitions	**13,231**	2,047
Impairment	**(18,800)**	-
Adjustments to prior year acquisitions	**-**	(32,840)
Balance, end of year	$ **305,126**	$ 310,695

Identifiable intangible assets are comprised of the following (in thousands):

September 30,	Useful lives	**2018**	2017
HMO membership	14 years	**$ 25,200**	$ 25,200
Trade names, net of impairment	3 - 20 years	**52,583**	52,583
Physician guarantees	2 to 3 years	**-**	723
Customer relationships	7 years	**350**	350
Other	5 - 6 years	**97**	117
Gross carrying value		**78,230**	78,973
Accumulated amortization		**(44,611)**	(38,179)
Intangible assets, net		**$ 33,619**	$ 40,794

Amortization is recognized on a straight-line basis (management's best estimate of the period of economic benefit) over the respective useful lives and expense for the years ended September 30, 2018 and 2017 was $6,429,000 and $8,205,000, respectively. There are no expected residual values related to these intangible assets.

Estimated amortization expense for each future fiscal year is as follows (in thousands):

Years ending September 30,	
2019	$ 6,523
2020	5,350
2021	5,331
2022	3,542
2023	3,022
Thereafter	9,851
	$ 33,619

The weighted-average remaining useful life for the intangible assets was approximately 7 years as of September 30, 2018.

7. Related Party Transactions

Jeereddi Prasad, M.D., a shareholder of Ivy Holdings, a director of Ivy Holdings and the Company, and an officer of the Upland Medical Group, a Professional Medical Group and Pomona Valley Medical Group, Inc (collectively "ProMed Entities"), has ownership interests in physician medical groups that provide medical services to ProMed members, including Chaparral Medical Group, Inc., (in which the Company beneficially owns a 13.2% interest). For the years ended September 30, 2018 and 2017, the ProMed Entities paid these groups approximately $19,760,000 and $17,216,000, respectively. As of September 30, 2018 and 2017, the Company had accounts payable and other accrued liabilities due to these related parties of $1,266,000 and $473,000, respectively.

Confidential LGP-SBC-000000658

Pursuant to a Management Services Agreement, dated December 15, 2010 and amended on May 3, 2012 (the "LGP Management Agreement"), between the Company and Leonard Green & Partners, L.P. ("LGP"), a private equity fund with affiliated funds that collectively constitute the majority shareholder of Ivy Holdings, LGP provides to the Company, (a) certain investment banking services, (b) management, consulting and financial planning services and (c) financial advisory and investment banking services in connection with major financial transactions from time to time. In consideration for the services provided by LGP under the LGP Management Agreement, the Company pays LGP an annual fee of $1,000,000, payable in monthly installments, and reimburses LGP for its related expenses up to $50,000 annually. If approved by the unanimous consent of the Board of Directors of the Company, additional customary fees may be due to LGP pursuant to the terms of the LGP Management Agreement for services rendered in connection with major transactions from time to time. No amounts were payable related to these related party transactions as of September 30, 2018 or 2017.

The Company is a wholly-owned indirect subsidiary of Ivy Holdings. Therefore, Ivy Holdings is the parent of an affiliated group of corporations within the meaning of Section 1504(a) of the Internal Revenue Code of 1986. On December 15, 2010, Ivy Holdings, Ivy Intermediate and the Company entered into a Tax Sharing Agreement. The Tax Sharing Agreement allows the Company to make payments to Ivy Holdings as necessary to fund their payment of any required taxes incurred due to such parent status. Under this agreement, the Company received refunds (net of payments) of $5,463,000 and $26,378,000 for the years ended September 30, 2018 and September 30, 2017, respectively.

8. Income Taxes

The components of the income tax (benefit) provision for continuing operations are as follows (in thousands):

For the years ended September 30,	2018	2017
Current:		
Federal	$ (27,738)	$ 42,836
State	(8,547)	8,057
	(36,285)	50,893
Deferred:		
Federal	86,922	(41,809)
State	10,860	(8,529)
	97,782	(50,338)
Total:		
Federal	59,184	1,026
State	2,313	(472)
	$ 61,497	$ 554

Confidential

Temporary differences and carry forward items that result in deferred income tax balances as of September 30, are as follows (in thousands):

September 30,	2018	2017
Deferred tax assets:		
Accrued medical claims	$ 4,344	$ 11,317
Malpractice reserves	3,727	9,020
Accounts receivable	24,654	26,693
Accrued salaries & wages	12,562	22,920
Pension obligation	82,697	133,960
Net operating losses	55,231	6,617
Tax Credits	2,870	2,174
Outside basis differences	762	9,706
UTP & other	12,552	5,512
Deferred tax assets	199,399	227,919
Valuation allowance	(119,544)	(10,308)
Net deferred tax assets	79,855	217,611
Deferred tax liabilities:		
Property, plant & equipment	(55,058)	(96,490)
Intangible assets	(8,601)	(7,317)
Prepaid expenses	(2,809)	(3,543)
Other comprehensive income	(11,412)	(5,938)
Deferred tax liabilities	(77,880)	(113,288)
Net deferred tax assets	$ 1,975	$ 104,323

Deferred tax assets and liabilities reflect the effect of temporary differences between the assets and liabilities recognized for financial reporting purposes and the amounts recognized for income tax purposes.

Management assesses the available positive and negative evidence to estimate whether sufficient future pretax income will be generated to permit use of the existing deferred tax assets. A significant piece of objective negative evidence evaluated was the cumulative pretax losses incurred over the three year period ended September 30, 2018. Such objective evidence limits the ability to consider other subjective evidence, such as the Company's projections for future growth. On the basis of this evaluation, at September 30, 2018, a valuation allowance of approximately $119.5 million has been recorded to recognize only the portion of the deferred tax asset that is more likely than not to be realized. The amount of the deferred tax asset considered realizable, however, could be adjusted if estimates of future taxable income during the carryforward period are reduced or increased or if negative objective evidence in the form of cumulative losses is no longer present and additional weight is given to subjective evidence such as the Company's projections for growth.

During fiscal 2018, the Company completed an IRS examination for Prospect Medical Group, Inc. & Subsidiaries' fiscal year 2014 federal income tax return. The Company's IRS examination for Ivy Holdings, Inc. & Subsidiaries fiscal 2014 through 2016 federal income tax returns are also ongoing. No adjustments have been proposed thus far for any of the years under audit. We do not have any ongoing examinations

Confidential LGP-SBC-000000660

in states. We do not currently anticipate any changes to our unrecognized tax benefits for the next twelve months related to these examinations.

Generally, the Company's tax years 2014 through 2017 are open for federal and state tax examination. As of September 30, 2018, the Company has recorded a liability in the amount of $12.7 million related to uncertain tax positions ("UTP") with respect to impermissible accounting methods for federal income tax purposes, which is recorded in other long-term liabilities in the accompanying consolidated balance sheets. The Company believes that it is reasonably possible that an increase in unrecognized tax benefits may be necessary within the coming year, and these unrecognized tax benefits would primarily impact deferred taxes and taxes payable, and the expected range of potential increase in the unrecognized tax benefits is not expected to be material to the balance sheet nor the income statement.

On December 22, 2017, the Tax Cuts and Jobs Act of 2017 (the "Act") was signed into law making significant changes to the Internal Revenue Code. Changes include, but are not limited to, a corporate tax rate decrease from 35% to 21% effective for tax years beginning after December 31, 2017, limitations on various business deductions such as executive compensation under Internal Revenue Code §162(m), the transition of U.S international taxation from a worldwide tax system to a territorial system, and a one-time transition tax on the mandatory deemed repatriation of cumulative foreign earnings as of December 31, 2017. The United States federal income tax rate reduction was effective as of January 1, 2018. Accordingly, the Company's federal statutory income tax rate for fiscal 2018 reflected a blended rate of approximately 24.5%. The Company has calculated the impact of the Act in its year end income tax provision in accordance with its understanding of the Act and guidance available as of the date of this filing. As a result, the Company has reduced net U.S. deferred tax assets by $25,660,000. As the Company does not have profitable foreign subsidiaries, it does not anticipate any impacts as a result of the mandatory deemed repatriation of cumulative foreign earnings.

On December 22, 2017, Staff Accounting Bulletin No. 118 ("SAB 118") was issued to address the application of US GAAP in situations when an entity does not have the necessary information available, prepared, or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the Act. Pursuant to SEC Staff Accounting Bulletin ("SAB") 118 (regarding the application of ASC740 associated with the enactment of the Tax Act), the Company believes the accounting under ASC 740 for the provisions of the Tax Act is complete.

The differences between the income tax provision at the federal statutory rate and that reflected in the accompanying consolidated statements of operations are summarized as follows:

For the years ended September 30,	**2018**	2017
Tax provision at statutory rate	**25%**	35%
State taxes, net of federal benefit	**12%**	(1)%
Impact of US Tax Reform	**(11)%**	-
Bargain purchase gain	**-**	(34)%
Valuation allowance	**(55)%**	-
UTP	**(1)%**	-
Other	**(2)%**	2%
	(32)%	2%

9. Long-Term Debt

Long-term debt consists of the following (in thousands):

	2018	2019
Senior secured credit facility (net of discount of $20,085 and $7,374, respectively)	$ 1,094,315	$ 609,813
Other debt *(1)*	39,769	38,321
Less: Deferred financing costs, net ("DFC")	(16,214)	(9,906)
Total Debt, net of discount, premium and DFC	1,117,870	638,228
Less: current maturities	(18,429)	(12,509)
Long-term debt, net of current maturities	$ 1,099,441	$ 625,719

(1) Other debt also includes financing obligations related to sales-leaseback transactions. The financing obligations related to sales-leaseback transactions were $24,614,000 and $26,027,000 for years ended September 30, 2018 and 2017, respectively.

Senior Secured Credit Facilities

On June 30, 2016, the Company entered into a six-year $625 million senior secured term loan B (the "Original Term Loan"), the proceeds of which were used to repay $425 million of PMH's existing 8.375% senior secured notes due during 2019; to repay $60 million of borrowings under the Company's existing revolving credit facility (the "Replaced Revolver"); to fund acquisitions, including the acquisition of Crozer; and to finance transaction fees and expenses. The Original Term Loan bore interest at LIBOR (subject to a 1.0% floor) plus 6.0%. The Original Term Loan was issued with an original discount of 1.5%, or $9,375,000. Additionally, the Company refinanced the Replaced Revolver with a new $100 million asset-based revolving credit facility ("Original ABL Facility" and together with the Original Term Loan, the "New Senior Secured Credit Facilities"). Pursuant to various amendments from August 2016 through October 2017, the aggregate commitment amount under the Original ABL facility was increased in stages to $175 million. The maturity date for the Original ABL Facility was June 30, 2021, and the maturity date for the Term Loan was June 30, 2022.

On February 22, 2018, the Company refinanced and replaced both the Original Term Loan and the Original ABL Facility, and entered into an Amended and Restated Term Loan Credit Agreement (the "Amended TL Agreement"), by and among the Company (as the borrower), the lenders party thereto and JPMorgan Chase Bank, N.A. ("JPMorgan"), as administrative agent and collateral agent. The Amended TL Agreement replaced the Original Term Loan with a new Term B-1 Loan ("Term B-1 Loan"). The principal amount of the Term B-1 Loan is $1,120 million and such loan bears interest at LIBOR (subject to a 1.0% floor) plus 5.5%, which as of September 30, 2018 was 7.625%. The Term B-1 Loan was issued with an original discount of 2% and matures on February 22, 2024.

Additionally, on February 22, 2018, the Company entered into an Amended and Restated ABL Credit Agreement (the "Amended ABL Agreement"), by and among the Company (as the borrower), the lenders party thereto and JPMorgan, as administrative agent and collateral agent. The Amended ABL Agreement replaced the Original ABL Facility. Under the Amended ABL Agreement, the maximum revolving

Confidential LGP-SBC-000000662

commitment is $250.0 million with ability to expand the facility to $325.0 million, and the new ABL facility (the "New ABL Facility") bears interest at a variable base rate plus an applicable spread that is based on excess availability under the New ABL Facility, as further described in the Amended ABL Agreement, which was 3.875% as of September 30, 2018. The New ABL Facility matures on February 22, 2023. As of September 30, 2018, the available balance on the new ABL facility was $41.0 million.

The proceeds of the Term B-1 Loans and the New ABL Facility (the "New Senior Secured Credit Facilities") were used to refinance the Original Term Loan and the Original ABL Facility, to pay a dividend of $457.0 million to the Company's stockholders, to pay certain expenses associated with the refinancing, to prefund approximately $40 million of pension liabilities of the Company's subsidiaries, to make payments to certain option holders as a result of the Dividend Recapitalization, and to finance certain working capital and other operational needs of the Company and its subsidiaries.

Under applicable accounting literature, deferred financing costs of $11.7 million and outstanding debt discount of $6.7 million as of February 22, 2018 were expensed and presented within loss on debt extinguishment in the accompanying consolidated statements of operations, and new costs of approximately $18.0 million incurred in connection with the refinancing have been capitalized to offset the new long-term debt in the accompanying consolidated balance sheets, and are being amortized over the term of the related debt using the effective interest method.

The New Senior Secured Credit Facilities are guaranteed on a senior secured basis by all assets of the Company and its wholly-owned subsidiaries ("Guarantors") except PHP, CHIC, RRG, Prospect Health Access Network, Inc. and certain immaterial subsidiaries. The New ABL Facility is secured by a first priority security interest on the working capital assets of the Company and the Guarantors and a second priority security interest on their fixed assets. The Term B-1 Loan is secured by a first priority security interest on fixed assets and a second priority security interest on working capital assets. The New Senior Secured Credit Facilities are effectively senior to all of the Company's existing and future indebtedness. The New Term B-1 loan has no financial covenants. However, the consolidated total leverage ratio is required to be calculated and reported on a quarterly basis. If such ratio is above 3.5, then receipts under the QAF 5 program are required to be utilized to pay down principal on the New Term B-1 loan. The Company currently expects to receive QAF 5 payments of approximately $83 million in May 2019, and these are the only expected payments to be received in fiscal 2019 based on current information from the California Hospital Association. The Company has made an accounting election to present all receivables under QAF 5 as current, and to not reflect expected paydowns of debt related to the collection of QAF 5 monies in fiscal 2019 as current debt as the timing is an estimate. The Amended ABL Agreement does not have any financial maintenance covenants. The Amended ABL Agreement has a "springing" fixed charge ratio covenant that applies if excess availability is less than the greater of 10% of the maximum borrowing amount and $22 million. The fixed charge ratio covenant was not required to be tested for the fiscal quarter ended September 30, 2018. The Company was in compliance with all of its debt covenants at September 30, 2018 or obtained a waiver.

Demand Notes

The Company has a commitment from a bank for a $15 million equipment leasing facility to finance various equipment at the Company's hospital facilities. As of September 30, 2018 and 2017, draws under the facility are classified as capital lease arrangements. Draws represent demand notes until conversion to capital leases, and interest accrues on such draws at the bank prime rate plus 1.5% with a floor of 4.5% and payable monthly. As of September 30, 2018, approximately $15 million had been drawn under the line.

Total long-term debt	$ 1,099,441

10. Stockholder's Equity

Equity Based Compensation Plans

Effective December 15, 2010, the Board of Directors of Ivy Holdings adopted the Ivy Plan that initially authorized the issuance of options exercisable for up to 155,110 shares of the common stock of Ivy Holdings ("Initial Options") to employees, certain consultants and independent members of the boards of directors, of Ivy Holdings and its subsidiaries (including the Company and its subsidiaries). These options are exercisable into Ivy Holdings stock and vest based on a number of criteria, including time, Company and Business Unit performance based on EBITDA targets and CEO and Compensation Committee discretion. Since the Ivy Holdings stock options were granted to Company employees for their services related to the Company, the related compensation cost has been recorded in the Company's consolidated financial statements. Effective June 30, 2015, the Board of Directors of Ivy Holdings adopted the First Amendment to the Ivy Plan. Under the First Amendment, and subsequent amendments, a further 63,704 shares of common stock of Ivy Holdings ("New Options") can be issued.

The New Options are exercisable into Ivy Holdings stock and vest based on a number of criteria, including the same criteria as the Initial Options. However, they only become exercisable on the occurrence of certain corporate transactions, including a change in control of Ivy Holdings, as defined in the Incentive Stock Option Agreements ("Corporate Transaction"). Because the occurrence and timing of a Corporate Transaction is not determinable as of September 30, 2018 and 2017 no compensation cost has been recorded in the Company's consolidated financial statements for the years then ended.

Under the terms of the Ivy Plan, the exercise price of an incentive stock option ("ISO") may not be less than 100% of the fair market value of the Company's common stock on the date of grant and, if granted to a shareholder owning more than 10% of the Company's common stock, then not less than 110%. Stock options granted under the Ivy Plan have a maximum term of 10 years from the grant date, and are exercisable at such time and upon such terms and conditions as determined by the Compensation Committee. Stock options granted to employees generally vest over four years, subject to continued service, performance, and other criteria. In the case of an ISO, the amount of the aggregate fair market

Confidential LGP-SBC-000000664

value of common stock with respect to which the ISO grant is exercisable, for the first time by an employee during any calendar year, may not exceed $100,000.

Stock Options Activity

The following table summarizes information about Ivy Holdings stock options outstanding as of September 30, 2018 and 2017 and activity during the years then ended for the Initial Options and the New Options:

	Shares Subject to Options	Weighted Average Exercise Price	Weighted Average Aggregate Intrinsic Value	Weighted Average Remaining Contractual Term (Months)
Outstanding as of October 1, 2016	143,201	$ 92.94	$ 445.06	76.2
Granted	29,141	568.55	—	—
Exercised	(100)	30.00	—	—
Canceled/Forfeited	(3,367)	107.81	—	—
Outstanding as of September 30, 2017	168,875	174.91	663.09	73.4
Granted	26,516	418.21	—	—
Exercised	(22,608)	37.74	—	—
Canceled/Forfeited	(9,530)	322.72	—	—
Outstanding as of September 30, 2018 *(1)*	163,253	$ 140.47	$ 156.53	70.5

(1) The number of options outstanding at September 30, 2018 were modified in connection with the Adjusted Exercise Price of the options (see below).

The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and the estimated fair value of the Company's common stock for those awards that have an exercise price currently below the estimated fair value. As of September 30, 2018, the aggregate intrinsic value of outstanding shares was approximately $25,554,000. As of September 30, 2018, there were 104,496 options that are exercisable at a weighted average exercise price of $47.40.

A summary of Ivy Holdings non-vested options and the changes during the fiscal years ended September 30, 2018 and 2017 is presented as follows for the Initial Options and New Options:

	Shares	Weighted Average Grant Date Fair Value
Ivy Holdings Stock Options:		
Nonvested at October 1, 2016	26,424	$ 97.55
Granted	29,141	299.00
Vested	(17,834)	178.49
Canceled/Forfeited	(3,367)	107.81
Nonvested at September 30, 2017	34,364	225.09
Granted	26,516	188.98
Vested	(17,054)	269.50
Canceled/Forfeited	(9,530)	206.09
Nonvested at September 30, 2018	34,296	$ 181.07

Stock-Based Compensation Expense

Stock-based compensation expense for all share-based payments in exchange for employee services (including stock options and restricted stock) is measured at fair value on the date of grant, estimated using an option pricing model and is recognized in the consolidated financial statements, net of estimated forfeitures over the awards requisite service period.

The Company uses the Black-Scholes option pricing model and a single option award approach to estimate the fair value of options granted. Estimated forfeitures will be revised in future periods if actual forfeitures differ from the estimates and will impact compensation cost in the period in which the change in estimate occurs. The determination of fair value using the Black-Scholes option-pricing model is affected by the Company's estimated stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors.

Fair value for options granted during the years ended September 30, 2018 and 2017 was estimated with the following assumptions for Ivy Holdings:

For the years ended September 30,	**2018**	2017
Weighted average fair value of option grants	**$ 188.98**	$ 299.00
Estimated fair market value of the Company's common stock on the date of grant	**$ 390.14**	$ 568.55
Weighted average expected life of the options	**5 years**	10 years
Risk-free interest rate	**0.85%**	1.79%
Weighted average expected volatility	**60.0%**	43.8%
Dividend yield	**0.00%**	0.00%

Confidential

Expected Term - The expected term of options granted represents the period of time that they are estimated to be outstanding.

Risk-Free Interest Rate - The Company bases the risk-free interest rate on the implied yield in effect at the time of option grant on U.S. Treasury zero-coupon issues with equivalent remaining terms.

Expected Volatility - The Company estimates the volatility of the common stock at the date of grant based on the average of the historical volatilities of a group of peer companies. The Company has identified a group of comparable companies to calculate historical volatility from publicly available data for sequential periods approximately equal to the expected terms of the option grants. In selecting comparable companies, Management considered several factors including industry, stage of development, size and market capitalization.

Forfeitures - Share-based compensation is recognized only for those awards that are ultimately expected to vest. Compensation expense is recorded net of estimated forfeitures. Those estimates are revised in subsequent periods if actual forfeitures differ from those estimates. The Company used data since December 2010 to estimate pre-vesting option forfeitures.

Stock-based compensation expense for the Ivy Holdings stock options recognized by the Company during the years ended September 30, 2018 and 2017 was $710,000 and $1,118,000, respectively. At September 30, 2018, there were no unvested options, which could potentially vest over the next nine fiscal years, subject to meeting the vesting requirements noted above. There were no remaining maximum estimated stock compensation expense to be amortized to expense in future periods. Options which are expected to vest based on CEO and Compensation Committee discretion are treated as variable stock options and are subject to revaluation at each reporting period. Management determined the fair value of the discretionary vested options using a Black Scholes calculation but determined that the change in compensation expense was not material to the consolidated financial statements for the years ended September 30, 2018 and 2017.

Dividends

The Company distributed approximately $457.0 million in connection with the issuance of “New Senior Secured Credit Facilities” during the year ended September 30, 2018, which was recorded against retained earnings, and was ultimately paid to the common stockholders of Ivy Holdings Inc (see Note 9).

On February 22, 2018, the Board of Directors of Ivy Holdings, Inc. (“the Board”) approved special cash in the amount of approximately $33 million in bonus payments were made (“the Bonuses”) to Option Holders in connection with the dividend provided that any Bonus with respect to an unvested portion of an option shall be payable upon the date such unvested portion becomes vested and exercisable, subject to the Optionee’s continued employment with Prospect through such date. At September 30, 2018 approximately $2.3 million was accrued for bonuses in connection with this. To reflect the Dividend and pursuant to the terms of the Option Plan, the Board further resolved to equitably adjust the Options by reducing the per-share exercise price of the Options to an amount determined with reference to the Bonus amount payable by Prospect Medical with respect to such Option (the “Adjusted Exercise Price”).

11. Retirement Benefits

The Company sponsors various employee non-contributory, defined benefit pension plans covering certain full-time employees of Crozer, ECHN and Waterbury.

In connection with the acquisition of Crozer, $100 million of the purchase price was put into an escrow and subsequently used by the Company, as the new sponsor of the Crozer pension plan pursuant to IRS rules and regulations, to fund in part the underfunded plan liability then outstanding. Additionally, within five years after acquisition and subject to applicable filing and authorization by the applicable government agency or entity, the Company will adopt a plan amendment to terminate the plan effective within such five year period and will liquidate, fully fund and satisfy, and pay all benefits owed to participants and beneficiaries of the plan by providing lump sum distributions to participants, purchasing annuities for participants who do not elect a lump sum distribution.

Also in connection with the Crozer acquisition, the plan was frozen with all benefit accruals ceased as of July 1, 2016. With respect to each Represented Employee who is a member of the Laborers' International Union of North America, the Monthly Compensation (as defined), the Credited Service (as defined), the Eligibility Service (as defined) and the accrued benefit was frozen and determined as of July 1, 2016. No benefits accrue since that date. Additionally, the plan was amended to provide that for purposes of determining Vesting Service (as defined) for employees who were employed with the Company before July 1, 2016, years of service shall include all periods of employment completed on and after July 1, 2016, subject to the Break in Service rules (as defined).

On September 3, 2016, the DB Plan was further amended to provide certain Qualifying Participants (as defined) the right to make a Special Benefit Election (as defined) during "2016 Lump Sum Option Window" period from October 15, 2016 through November 30, 2016 to receive or commence receiving his or her vested Accrued Benefit as of December 1, 2016 in accordance with procedures adopted by the Committee.

In conjunction with the acquisition the Company also became the sponsor and assumed CKHS postretirement benefit program (the "OPEB Plan") which is an unfunded medical care and life insurance benefit program, and a supplemental executive retirement plan (the "SERP Plan") which is an unfunded retirement plan that covers a group of current and former executives. These plans were frozen with all benefit accruals ceased as of July 1, 2016. No benefits will accrue since that date. With respect to each Represented Employee who is a member of the Laborers' International Union of North America, benefits will continue to accrue until a settlement of an ongoing union contract negotiation is reached.

ECHN has a defined benefit pension plan that covered substantially all of its employees. The benefits were based upon years of service and compensation for the five highest years during the employee's last 10 years of service. Effective December 31, 2013, ECHN froze the defined-benefit for all remaining participants. During September 2013, the Board passed a resolution to freeze all benefits related to the Defined benefit pension plan. On December 31, 2008, ECHN implemented a soft freeze on the defined benefit pension plan. All qualified employees were eligible to enter into the defined contribution plan, ECHN contributed 3% of eligible employees' salaries. This contribution was non-guaranteed for all employees, except certain union workers covered under a collective bargaining agreement.

ECHN also sponsors a postretirement benefit plan that provides health care benefits to those employees who retired. The criteria to receive this benefit is to be vested in the pension plan, attain age 55 or older and start collecting under the defined benefit plan described above once retired. The retiree must be enrolled into the medical plan on the date of retirement to be eligible for the continuation. Full-time registered nurse retirees from ECHN's Manchester facility (retired prior to October 1, 2005 and were

Confidential LGP-SBC-000000668

eligible per the collective bargaining agreement) were grandfathered and required to pay at least 50% of the total cost of the medical and dental coverage they elect for themselves under the plan.

Waterbury has a noncontributory defined benefit cash balance plan. It is Waterbury's policy to make contributions to the plan sufficient to meet the minimum funding requirements of applicable laws and regulations. The plan was frozen to non-union participants effective June 30, 2015. Participants who are part of the Connecticut Healthcare Associates Technical Unit remain active in the plan. Non-union employees no longer accrue additional employer contribution credits in the plan. These participants will continue to receive interest credits based on their account balances in accordance with the terms of the plan. They will be entitled to their account balance (the retirement benefit they have earned up to June 30, 2015) plus applicable interest credits after the Plan were frozen.

The activity of the pension plans for the years ended September 30, 2018 and 2017 is as follows (in thousands):

	2018	2017
Changes in benefit obligations		
Projected benefit obligations, beginning of period	$ 864,293	$ 953,983
Service cost	194	292
Interest cost	27,695	33,193
Plan participant contributions	461	367
Actuarial loss	(48,654)	(31,788)
Benefits paid	(134,185)	(91,045)
Lump sum benefits paid and annuity purchase	(49,628)	-
Plan changes	-	(709)
Projected benefit obligation, end of year	$ 660,176	$ 864,293
Changes in plan assets		
Fair value of plan assets, beginning of year	$ 556,590	$ 656,074
Actual return on plan assets	(14,437)	(15,980)
Contributions by plan sponsor	41,667	7,174
Plan participant contributions	461	367
Benefits paid	(134,185)	(91,045)
Lump sum benefits paid and annuity purchase	(49,628)	-
Fair value of plan assets, end of year	$ 400,468	$ 556,590
Funded status of the plan, end of year	$ (259,708)	$ (307,703)
Accumulated benefit obligation, end of year	$ (259,708)	$ (307,703)

The funded status of the pension plans as of September 30, 2018 and 2017 is as follows (in thousands), split between the pension plans and the post retirement plans:

	2018 Pensions	2018 OPEBs	2017 Pensions	2017 OPEBs
Amounts recognized in the consolidated balance sheets consist of:				
Current liability	$ -	$ 600	$ -	$ 820
Non-current liability	254,121	4,987	300,364	6,519
Amount recognized, end of year	$ 254,121	$ 5,587	$ 300,364	$ 7,339

The components of net periodic benefit cost for the years ended September 30, 2018 and 2017 are as follows (in thousands):

	2018	2017
Components of net periodic benefit cost:		
Service cost	$ 194	$ 292
Interest cost	27,695	33,193
Expected return on plan assets	(16,045)	(19,477)
Effect of settlement	1,457	(2,479)
Amortization of prior service credit	(48)	-
Total net periodic benefit cost	$ 13,253	$ 11,529
Other change in benefit obligations recognized in accumulated other comprehensive income:		
Gain due to assumption change	$ (64,429)	$ (23,922)
Liability (gain) loss due to participant experience	14,118	(7,865)
Asset return loss	30,483	35,456
Prior service cost credit	-	(708)
Amount recognized due to settlement	-	2,479
Total recognized in other comprehensive loss (income) and accumulated other comprehensive loss (income)	$ (19,828)	$ 5,440

The assumptions used in determining the actuarial present value of the projected benefit obligations for pension plans as of September 30, 2018 and 2017 and for the years ended September 30, 2018 and 2017 are as follows:

	2018	2017
Weighted average assumptions used to determine benefit obligations at end of period		
Discount rate	**3.23-4.48 %**	3.23-3.68 %
Rate of compensation increase	**0.00-2.00 %**	0.00-2.00 %
Weighted average assumptions used to determine net periodic benefit cost for the period ended		
Discount rate	**3.49-4.41 %**	3.18-4.01 %
Rate of compensation increase	**0.00-2.00 %**	0.00-2.00 %
Expected return on the plan assets	**0.00-4.50 %**	0.00-5.00 %

Assumed health care cost trend rates for the next period used to measure the expected cost of benefits covered by the plan are as follows:

	2018	2017
Health care trend rate assumed for next year	**7.0%**	7.0%
Rate to which the cost trend is assumed to decline (the ultimate rate)	**4.5%**	4.5%
Year that the rate reaches the ultimate trend rate	**2026**	2025

Assumed health care cost trend rates have a significant effect on amounts reported for other postretirement benefit programs. A one-percentage-point change in assumed health care cost trends would have the following effects (in thousands):

	1% Increase	1% Decrease
Effect on other postretirement benefit obligations	$ 5,701	$ 5,486
Effect on total of service and interest cost components	$ 239	$ 228

The asset allocation percentage by major asset class for the plans and the target allocation for 2018 follows:

	Target	2018
Asset class:		
Cash and cash equivalents	0% - 20%	
Fixed income	10% - 100%	**94 %**
Domestic equity	0% - 100%	
International equity	0% - 40%	
Real estate	0% - 30%	**1 %**
Alternative investments and hedge funds	0% - 30%	**5 %**
		100 %

Confidential

The investment objectives of the plans are to invest consistently with the fiduciary standards of ERISA, to provide for the funding and anticipated withdrawals on an ongoing basis, conserve and enhance the capital value of the plans in real terms while maintaining a moderate risk profile, to minimize principal fluctuations over the investment cycle, and achieve a long-term level of return commensurate with contemporary economic conditions. The expected long-term rate of return with respect to the plans is based on an aggregate of expected capital market returns within each asset category.

The following tables set forth the assets in the plans measured at fair value, by input level (in thousands):

September 30, 2018	Level 1	Level 2	Level 3	Net asset value	Total
Fixed income securities:					
Short-Term Duration	$ -	$ 35,100	$ -	$ -	$ 35,100
Extended Duration	-	125,562	-	-	125,562
Interim Duration	-	41,193	-	-	41,193
Long-Term Duration	-	174,162	-	-	174,162
Real estate	-	-	2,962	-	2,962

Cash and cash equivalents	-	-	-	2,832	2,832
Total	$ -	$ 530,016	$ 23,742	$ 2,832	$ 556,590

Pension plan assets classified as Level 3 in the fair value hierarchy represent investments in which the trustee has used significant unobservable inputs in the valuation model. The hedge funds consist of equity/long/short funds and multi-strategy funds in which fair values have been estimated using the net asset value per share of the investment. The alternative investments primarily consist of investments in limited partnerships that invest in the Public-Private Investment Program which fair values have been estimated using the net asset value per share of the investment.

Confidential LGP-SBC-000000672

On an annual basis, the Company assesses the valuation hierarchy for pension assets recorded at fair value. From time to time, assets will be transferred within the fair value hierarchy as a result of changes in, among other things, inputs used, liquidity, or valuation methodologies. During the years ended September 30, 2018 and 2017, there were no transfers in classification within the fair value hierarchy.

The following table is a rollforward of the plans' assets classified within Level 3 of the fair value hierarchy (in thousands):

September 30,	2018	2017
Balance, beginning of year	$ 23,742	$ 62,397
Actual return on plan assets:		
Realized loss	-	(445)
Unrealized (loss) gain	(2,187)	2,283
Purchases	-	5,434
Sales	-	(45,927)
Balance, end of year	$ 21,555	$ 23,742

The expected long-term future benefit payments to retirees with respect to the plans and are as follows (in thousands):

2019	$ 46,620
2020	44,230
2021	43,040
2022	43,270
2023	42,920
2024 - 2028	206,460
	$ 426,540

Waterbury participates in multi-employer pension plans that cover substantially all union employees. Contributions to the plans are based upon a percentage of each participant's total salary. The risks of participating in these multi-employer plans are different from single employer plans in the following aspects:

- Assets contributed to the multi-employer plan by one employer may be used to provide benefits to employees of another participating employer.
- If a participating employer stops contributing to the plan, the unfunded obligation of the plan may be borne by the remaining participating employers.
- If Waterbury chose to stop participating in the multi-employer plans, Waterbury may be required to pay those plans an amount based on the underfunded status of the plans, referred to as a withdrawal liability.

Confidential LGP-SBC-000000673

The following table presents Waterbury's participation in these plans as of and for the years ended September 30, 2018 and 2017.

Pension Trust Fund	EIN / Pension Plan	Pension Protection Act ("PPA") Certified Zone Status (1) 2018	2017	FIP / RP Status Pending / Implemented (2)	Contributions 2018	2017	Surcharge Imposed	Exp. Date of CBA (3)
Connecticut Health Care Associates Pension Fund	06-1313462	**Red**	Green	Implemented	**$2,140,000**	$ 2,018,000	No	9/30/18
New England Health Care Employees Pension Fund	22-3071963	**Green**	Green	NA	**821,000**	939,000	No	2/28/17
Total contributions					**$2,961,000**	$ 2,957,000		

(1) The most recent PPA zone status available in 2018 is for the plan's year-ending during 2017. The zone status is based on information received from the plan and is certified by the plan's actuary. Among other factors, plans in the red zone are generally less than 65 percent funded, plans in the orange zone are less than 80 percent funded and have an accumulated funding deficiency in the current year or projected in the next six years, plans in the yellow zone are less than 80 percent funded, and plans in the green zone are at least 80 percent funded.

(2) The "FIP/RP Status Pending/Implemented" column indicates plans for which a financial improvement plan ("FIP") or a rehabilitation plan ("RP") is either pending or has been implemented. As it relates to the Connecticut Health Care Associates ("CHCA") Pension Plan, the trustees adopted the attached Rehabilitation Plan on May 7, 2018. The Rehabilitation Period, as defined, commences on January 1, 2019 and ends on December 31, 2028.

(3) These agreements are currently under negotiations.

During the years ended September 30, 2018 and 2017, Waterbury's contributions to the CHCA Pension Plan and the New England Health Care Employees Pension Plan represented 98.2% and 2.6% and 98.3% and 2.4% of the total contributions made to the plans by all participating employers, respectively.

Governmental regulations impose certain requirements relative to union-sponsored pension plans. In the event of plan termination or employer withdrawal, an employer may be liable for a portion of the plan's unfunded vested benefits. As of September 30, 2018, Waterbury has not recorded any liabilities for future withdrawal obligations related to the multi-employer plans.

Defined contribution plans

The Company previously sponsored five defined contribution plans covering substantially all employees who meet certain eligibility requirements. Effective May 1, 2018, the plans covering employees at ECHN, Waterbury and Crozer were merged into the plan covering employees at CharterCARE, and the two remaining plans were renamed and segregated between union and non-union employees. Under these plans, employees can contribute up to 50% of their compensation up to the IRS deferred annual maximum. There is currently no company match offered under the plans, except at certain facilities in Texas, Rhode

Confidential LGP-SBC-000000674

Island, Pennsylvania, for which the expense for the employer match was $19,723,000 and $18,088,000 for the years ended September 30, 2018 and 2017, respectively.

12. Commitments and Contingencies

Leases

The Company leases various office facilities and equipment from third parties under non-cancelable operating and capital lease arrangements expiring at various dates through 2030. Certain operating leases contain rent escalation clauses and renewal options, which have been factored into determining rent expense on a straight-line basis over the lease terms. Capital leases bear interest at rates ranging from 2.5% to 19.5% per annum.

The future minimum annual lease payments required under leases in effect at September 30, 2018, are as follows (in thousands):

For the Years ending September 30,	Capital Leases	Operating Leases
2019	$ 16,475	$ 27,031
2020	12,517	24,802
2021	7,384	21,604
2022	3,891	18,515
2023	3,670	16,361
Thereafter	23,733	57,518
Total minimum lease payments	67,670	$ 165,831
Less: amounts representing interest	(17,469)	
	50,201	
Less: current portion	(14,348)	
	$ 35,853	

Rent expense for the years ended September 30, 2018 and 2017 was approximately $47,190,000 and $49,965,000, respectively. Sublease rental income was not material to the consolidated financial statements for the years ended September 30, 2018 and 2017.

Litigation

The Company is subject to a variety of claims and suits that arise from time to time in the ordinary course of its business, acquisitions, or other transactions. While the Company's management currently believes that resolving all of these matters, individually or in the aggregate, will not have a material adverse impact on the Company's consolidated financial position or results of operations, the litigation and other claims that the Company faces are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a material adverse impact on the Company's consolidated financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

Seismic Standards

The Company's California Hospitals (with the exception of Bellflower, which currently only provides psychiatric services) are required to comply with laws that regulate the seismic performance of all aspects of hospital facilities in California and imposes near-term and long-term compliance deadlines for seismic safety assessment, submission of corrective plans, and retrofitting or replacement of medical facilities to comply with current seismic standards. These laws and regulations require hospitals to meet seismic performance standards to ensure that they are capable of providing medical services to the public after an earthquake.

The Company was required to conduct engineering studies at its hospitals to determine whether and to what extent modifications to the hospital facilities will be required. Two buildings at Southern California Hospital at Culver City ("SCH Culver City") and one building at Los Angeles Community Hospital ("LACH") do not currently meet the applicable seismic requirements. The three buildings are currently classified at Structural Performance Category 1 ("SPC-1") and, subject to possible deadline extensions discussed below, they must be upgraded to at least SPC-2 by January 1, 2020. That deadline date was set pursuant to an extension granted upon the Company's application submitted in accordance with California Senate Bill 90 (SB 90) and approved by the Office of Statewide Health Planning and Development ("OSHPD").

OSHPD has a voluntary program to re-evaluate the seismic risk of hospital buildings classified as SPC-1. These buildings are considered hazardous and at high risk of collapse in the event of an earthquake and they were required to be retrofitted, replaced or removed from providing acute care services by the applicable deadline. OSHPD is using Hazards U.S. ("HAZUS"), a state-of-the-art methodology, to reassess the seismic risk of SPC-1 buildings. Once the SPC-1 buildings have been seismically upgraded to SPC-2, they are no longer considered a significant risk to occupants, but they may not be repairable or functional after an earthquake. Participation in the HAZUS program is optional for hospital owners wishing to have their SPC-1 buildings evaluated.

Applications for HAZUS evaluation of seismic risk were submitted for all five of the Company's California acute care facilities: Southern California Hospital at Hollywood ("SCH Hollywood"); SCH Culver City; Los Angeles Community Hospital; Los Angeles Community Hospital at Norwalk ("LACH Norwalk"); and Foothill Regional Medical Center ("Foothill"). All buildings at these five facilities obtained SPC-2 reclassification using HAZUS, except for the aforementioned three buildings at SCH Culver City and LACH which are still classified as SPC-1. Currently, failure to obtain SPC-2 reclassification for the three remaining SPC-1 buildings by January 1, 2020 would mean that the buildings would not be allowed to provide acute care services starting on that date.

Recently enacted Assembly Bill 2190 (AB-2190) could potentially provide an additional extension of up to 30 months (July 1, 2022) to obtain SPC-2 reclassification. Such extension must be requested by April 1, 2019. If granted, any required construction must be begun by April 1, 2020 and final seismic compliance must be achieved by July 1, 2022.

The Company will also be required to make significant capital expenditures in the future to comply with 2030 seismic standards (i.e., upgrade to SPC-4D) for any buildings that will be utilized for hospital facilities beyond January 1, 2030. Such modifications to the hospital facilities could potentially result in environmental remediation liabilities which may be material to the Company.

Confidential LGP-SBC-000000676

These requirements can result in significant operational changes and capital outlays. Management is continuing to assess its options and the methods of financing the required retrofits. Based on management's evaluation, the costs of renovation needed to comply with the California seismic safety standards for its acute-care facilities, including asbestos abatement, are not estimable at this time.

Legislation and HIPAA

The healthcare industry is subject to numerous laws and regulations of federal, state and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government healthcare program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity has continued with respect to investigations and allegations concerning possible violations of fraud and abuse statutes and regulations by healthcare providers. Violations of these laws and regulations could result in expulsion from government healthcare programs together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed.

The Company believes that it is in compliance with fraud and abuse regulations as well as other applicable government laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation as well as regulatory actions unknown or unasserted at this time.

The Health Insurance Portability and Accountability Act ("HIPAA") assures health insurance portability, reduces healthcare fraud and abuse, guarantees security and privacy of health information, and enforces standards for health information. The Health Information Technology for Economic and Clinical Health Act ("HITECH Act") expanded upon HIPAA in a number of ways, including establishing notification requirements for certain breaches of protected health information. In addition to these federal rules, states have also developed their own standards for the privacy and security of health information as well as for reporting certain violations and breaches (for example, California's Confidentiality of Medical Information Act and Lanterman-Petris Short Act) which in some cases are more stringent. Other federal privacy laws may also apply to certain services provided by the Company, including 42 C.F.R. Part 2, which addresses the confidentiality of substance use disorder records. The Company may be subject to significant fines and penalties if found not to be compliant with these state or federal provisions.

Affordable Care Act

The Patient Protection and Affordable Care Act ("PPACA") has made significant changes to the United States health care system. The legislation impacted multiple aspects of the health care system, including many provisions that change payments from Medicare, Medicaid and insurance companies. Under this legislation, 33 states have expanded their Medicaid programs to cover previously uninsured childless adults, and four additional states voted in 2018 to expand Medicaid or to elect a governor that pledged to expand Medicaid. In addition, many uninsured individuals have had the opportunity to purchase health insurance via state-based marketplaces, state-based marketplaces using a federal platform, state-partnership marketplaces or the federally-facilitated marketplace. PPACA also implemented a number of health insurance market reforms, such as allowing children to remain on their parents' health insurance until age 26 or prohibiting certain plans from denying coverage based on pre-existing conditions. Nationally, these reforms have reduced the number of uninsured individuals.

It is unclear what changes may be made to PPACA with the divided Congress, current presidential administration, and pending litigation over the validity of PPACA. The Administration has promulgated rules to broaden the availability of coverage options that do not comply with the full range of PPACA requirements for individual market coverage, namely Association Health Plans and Short-Term Limited-Duration Insurance. The Administration has also provided additional guidance on state PPACA waivers. These executive actions have been or may be challenged in court. In addition, the Tax Cuts and Jobs Act ("TCJA"), passed in December 2017, eliminates the individual mandate penalty under PPACA, effective January 1, 2019. The individual mandate penalty was included in PPACA to address concerns that other market reforms expanding access to coverage might produce adverse selection and higher premiums. The extent to which the repeal of the individual mandate penalty will impact the uninsured rate and 2019 premiums is unclear at this juncture. On December 14, 2018, the United States District Court for the Northern District of Texas ruled that the individual mandate without the penalty is unconstitutional and that PPACA is therefore invalid in its entirety. Litigation on this issue is ongoing, with the Administration indicating it will continue implementing PPACA pending any appeals, the court ordering expedited briefing on a potential stay and certification of an interlocutory appeal, and pending litigation in the United States District Court for the District of Maryland to ensure continued implementation of PPACA. This litigation along with any future legislative changes to PPACA or other federal and state legislation could have a material impact on the operations of the Company. The Company is continuing to monitor the legislative environment and developments in pending litigation for risks and uncertainties.

Collective Bargaining Agreements

As of September 30, 2018, the Company had approximately 18,300 employees, of whom approximately 5,500 employees or 30% are represented by various labor organizations. Of those, approximately 1,800 employees or 10% of the Company's employees are employed under union contracts that have expired or will expire before September 30, 2019.

Tangible Net Equity ("TNE") Requirement

The Company's affiliated California physician organizations and licensed healthcare service plans may be subject to one or more of the following requirements: minimum working capital, Tangible Net Equity ("TNE"), cash-to-claims ratio and claims payment requirements as prescribed by the California Department of Managed Health Care ("DMHC"). TNE is defined as net assets, less intangibles and amounts due from affiliates, plus subordinated obligations. As of September 30, 2018, the Company's affiliated California physician organizations were in compliance with these regulatory requirements. In January 2019, the Company received inquiries from DMHC related to the calculation of certain receivables for PHP and PMG. The Company is currently responding to the inquiries; however, the conclusion and potential effect on compliance with the requirements are unknown at this time.

Employee Health Plans

The Company offers self-insured EPO/HMO and PPO plans to all eligible employees.

Employee health benefits are administered by a third party claims administrator, based on plan coverage and eligibility guidelines determined by the Company, as well as by collective bargaining agreements (as reflected above). Prior to January 1, 2018, commercial insurance policies covered per occurrence losses in excess of $750,000 for Crozer, $160,000 for East Orange, $275,000 for CharterCARE, $225,000 for ECHN, $350,000 for Waterbury, $250,000 for all other hospitals and $175,000 for the Medical Group and Corporate segments. Effective January 1, 2018, all locations were covered by insurance policies with CHIC

Confidential LGP-SBC-000000678

for per occurrence losses in excess of $350,000, except for Crozer for which the limit is $750,000. CHIC maintains reinsurance coverage above $500,000 for all locations except for Crozer, for which the limit is $750,000. An actuarially and internally-estimated liability of approximately $16,566,000 and $10,985,000 for incurred but not reported claims has been included in accrued salaries, wages, and benefits as of September 30, 2018 and 2017, respectively.

Provider Contracts

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

13. Accrued Medical Claims and Other Healthcare Costs Payable

The following table presents the roll-forward of incurred but not reported ("IBNR") claims reserves (Medical Group segment, Global Risk Management segment, and full risk contracts) as of and for each of the fiscal years ended September 30, 2018 and 2017 (in thousands):

September 30,	**2018**	2017
IBNR as of beginning of year	$ **54,283**	$ 52,761
Claim expenses incurred during the year:		
Related to current year	**301,598**	235,207
Related to prior year	**7,969**	2,841

14. Joint Ventures and Unconsolidated Equity Investments

The Company has invested in several joint ventures with unrelated third parties, which are accounted for under the equity method of accounting. As of September 30, 2018 and 2017, CharterCARE owned: 20% of Roger Williams Radiation Therapy and 20% of Southern New England Regional Cancer Center, LLC. ECHN owned: 50% of NRRON, LLC; 50% of Aetna Ambulance Service, Inc.; 50% of Ambulance Service of Manchester, LLC; and 50% of Evergreen Endoscopy Center, LLC. Waterbury owned: 50% of Harold Leever Regional Cancer Center Inc. Crozer owned: 50% of University Technology Park, Inc.; 35% of DCMH MOB Associates; and 21.25% of Delaware Valley Sleep Management Company, LLC. Prospect Medical Group, Inc. owned: 50% of AMVI/Prospect Medical Group. These joint ventures under the equity method are included in the other assets in the accompanying consolidated balance sheets as of September 30, 2018 and 2017 are $24,627,000 and $17,371,000, respectively. For the years ended September 30, 2018 and 2017, the Company received $1,746,000 and $1,636,000, respectively, in distributions for equity method investments, and $404,000 and $453,000, respectively, for cost method investments.

Summarized combined unaudited financial information for the Company's joint ventures as of September 30, 2018 and 2017 for the years then ended is as follows (in thousands):

September 30,	**2018**	2017
Cash	**$ 17,226**	$ 16,440
Receivables	**8,060**	7,590
Other current assets	**23,654**	23,852

15. Subsequent Events (Unaudited)

The Company has evaluated subsequent events through January 25, 2019, the date the Company's consolidated financial statements were available for issuance.

On January 25, 2019, Ivy Holdings made an equity contribution in the amount of $40 million to Ivy Intermediate Holding Inc., which was then contributed as equity to the Company.

Independent Auditor's Report

Board of Directors
Prospect Medical Holdings, Inc.
Los Angeles, California

We have audited the accompanying consolidated financial statements of Prospect Medical Holdings, Inc., which comprise the consolidated balance sheets as of September 30, 2013 and 2012, and the related consolidated statements of income, statements of stockholder's (deficit) equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Prospect Medical Holdings, Inc. as of September 30, 2013 and 2012, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

As discussed in Note 2 to the consolidated financial statements, Prospect Medical Holdings, Inc. adopted an update to accounting standards which requires certain health care entities to present the provision for bad debts as a reduction from net Hospital services revenues. Accordingly, Prospect Medical Holdings, Inc.'s provision for bad debts associated with net Hospital services revenues has been reclassified from Hospital operating expenses to deductions from net Hospital services revenues for the year ended September 30, 2013 with retrospective application for the year ended September 30, 2012.

December 17, 2013

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Confidential LGP-SBC-000002782

1. Organization

Prospect Medical Holdings, Inc. ("Prospect" or the "Company" or the "Parent Entity") is a Delaware corporation and a wholly owned indirect subsidiary of Ivy Holdings Inc. ("Ivy Holdings"). The Company's operations are organized into three primary reportable segments: Hospital Services, Medical Group, and Corporate, as discussed below. During the year ended September 30, 2013, the Company incorporated Prospect Health Plan, Inc. ("PHP"), a Delaware corporation and a wholly owned indirect subsidiary of Prospect. PHP has filed an application with the California Department of Managed Health Care ("DMHC") to operate as a Knox-Keene Health Care Service Plan for the purpose of managing "plan-to-plan" contracts with the fully licensed Medicare Advantage ("MA") health plans.

The Company's operations are currently organized into three primary reportable segments: Hospital Services, Medical Group and Corporate, as discussed below.

Hospital Services Segment

The Company owns and operates eight acute care and behavioral hospitals in Southern California and the Greater San Antonio, Texas region, with a total of 1,082 licensed beds, and a network of specialty and primary care clinics, through its three wholly-owned subsidiaries, SCHS, Alta Los Angeles Hospitals and Nix Health (collectively, the "Hospital Services segment").

On February 1, 2012 the Company acquired substantially all of the assets of MHS San Antonio, LLC (dba Nix Health Care System) located in San Antonio, Texas which is now operated under the following subsidiaries: Nix Hospitals System, LLC, Nix Services, LLC, and Nix SPE, LLC (collectively "Original Nix Health"). On April 16, 2013, the Company acquired Community General Hospital of Dilley, Texas Inc., through its newly created subsidiary, Nix Community General Hospital, LLC ("Nix CGH" and, together with Original Nix Health, "Nix Health"). Nix CGH operates a hospital with 18 licensed beds located in the city of Dilley, Texas.

Effective January 1, 2013, the Company merged the Brotman subsidiary into the Alta Hollywood Hospitals, Inc. subsidiary. The surviving entity was renamed Southern California Healthcare System, Inc. ("SCHS") on June 26, 3013. In connection with the merger, the Company changed the names of the hospitals owned by SCHS to Southern California Hospital at Hollywood ("SCH Hollywood") fka Hollywood Community Hospital, Southern California Hospital at Van Nuys ("SCH Van Nuys") fka Van Nuys Community Hospital, and Southern California Hospital at Culver City ("SCH Culver City") fka Brotman Medical Center.

The Company's three community hospitals in Hollywood, Los Angeles and Norwalk offer a comprehensive range of medical and surgical services, including general acute care hospital services, pediatrics, obstetrics and gynecology, pediatric sub-acute care, general surgery, medical-surgical services, orthopedic surgery, and diagnostic, outpatient, skilled nursing and urgent care services. The Company's psychiatric hospital in Van Nuys provides acute inpatient and outpatient psychiatric services on a voluntary basis. SCH Culver City offers a comprehensive range of inpatient and outpatient services, including general surgery, orthopedic, spine, cardiology, diagnostic outpatient, rehabilitation, psychiatric and detox services. In addition, SCH Culver City has an active emergency room that plays an integral part in providing emergency services to the West Los Angeles area. Nix Health provides comprehensive service offerings at various locations throughout the greater San Antonio, Texas region. These locations include Nix Medical Center, which provides inpatient acute care, geriatric psychiatry services, and emergency room services,

Confidential LGP-SBC-000002783

Nix Specialty Health Center, which provides a full range of behavioral health and rehabilitation services for children, adolescents, and adults, and a range of health clinics and provider based clinics throughout San Antonio, Texas, and Nix CGH, which operates an inpatient acute hospital in Dilley, Texas and a medical clinic in Pearsall, Texas.

Admitting physicians are primarily practitioners in the local area. The hospitals have payment arrangements with Medicare, Medicaid (Medi-Cal in California) and other third party payers, including some commercial insurance carriers, health maintenance organizations ("HMOs") and preferred provider organizations ("PPOs").

Medical Group Segment

The Medical Group segment is a healthcare management services organization that provides management services to affiliated physician organizations that operate as independent physician associations ("Medical Groups"). The affiliated physician organizations enter into agreements with HMOs to provide HMO enrollees with a full range of medical services in exchange for fixed, prepaid monthly fees known as "capitation" payments. The Medical Groups contract with physicians (primary care and specialist) and other healthcare providers to provide enrollees with all medical services. Prospect currently manages the provision of prepaid healthcare services for its affiliated physician organizations in Southern California. The network consists of the following physician organizations as of September 30, 2013 (stand alone or individually referred to as, an "Affiliate"):

Prospect Medical Group, Inc. ("PMG")
Prospect Health Source Medical Group, Inc. ("PHS")
Prospect Professional Care Medical Group, Inc. ("PPCM")
Genesis HealthCare of Southern California, Inc. ("Genesis")
Prospect NWOC Medical Group, Inc. ("PNW")
StarCare Medical Group, Inc. ("PSC")
AMVI/Prospect Medical Group ("AMVI/Prospect")
Nuestra Familia Medical Group, Inc. ("Nuestra")
Upland Medical Group, a Professional Medical Group ("UMG")*
Pomona Valley Medical Group, Inc. ("PVMG")*

* PVMG and UMG are collectively referred to as the "ProMed Entities."

These Affiliates are managed by the following two medical management company subsidiaries that are wholly-owned by Prospect:

Prospect Medical Systems, Inc. ("PMS")
ProMed Healthcare Administrators ("PHCA")

All of the Affiliates are wholly-owned by PMG, with the exception of Nuestra, which was 62% owned by PMG as of September 30, 2013 and September 30, 2012, and AMVI/Prospect which is a 50/50 Joint Venture between AMVI Care Health Network, Inc. ("AMVI") and PMG. See Subsequent Events (Note 15) for a description of a share repurchase by Nuestra which raised PMG's interest to 66.95% as of October, 7, 2013. PMG is owned by a nominee physician shareholder pursuant to an assignable option agreement described below. The operations of all of these entities, with the exception of AMVI/Prospect, are consolidated in the accompanying consolidated financial statements.

Confidential LGP-SBC-000002784

The AMVI Joint Venture was formed for the sole purpose of combining enrollment in order to meet minimum enrollment levels required for participation in the CalOptima Medicaid (Medi-Cal in California) program in Orange County, California. The joint venture ownership is set at 50/50 to prevent either party from exerting control over the other; however, AMVI's and PMG's businesses are operated autonomously, and enrollees, financial results and cash flows are each separately tracked and recorded. In accordance with the joint venture partnership agreement, profits and losses are not split in accordance with the partnership ownership interest, but rather, are directly tied to the results generated by each separate portion of the business. Separate from any earnings the Company generates from PMG's portion of business within the joint venture, the Company also earns fees for management services PMS provides to PMG's partner in the joint venture. The Company accounts for PMG's interest in the joint venture partnership using the equity method of accounting. The Company includes in the consolidated financial statements only the net results attributable to those enrollees specifically identified as assigned to the Company, together with the management fee that PMS charges for managing those enrollees specifically assigned to the other joint venture partner.

PMS has entered into an assignable option agreement with PMG and the nominee physician shareholder of PMG. Under the assignable option agreement, Prospect has an assignable option, obtained for a nominal amount from PMG and the nominee shareholder to designate the purchaser (successor physician) for all or part of PMG's issued and outstanding stock held by the nominee physician shareholder (the "Stock Option") in its sole discretion. The Company may also assign the assignable option agreement to any person. The assignable option agreement has an initial term of 30 years and is automatically extended for additional terms of 10 years each, as long as the term of the related management services agreement described below (the "Management Agreement") is automatically extended. Upon termination of the Management Agreement with PMG, the related Stock Option would be automatically and immediately exercised. The Stock Option may be exercised for a purchase price of $1,000. Under these nominee shareholder agreements, Prospect has the unilateral right to establish or effect a change of the nominee, at will, and without the consent of the nominee, on an unlimited basis and at nominal cost throughout the term of the Management Agreement. In addition to the Management Agreement with PMG, Prospect, through one of its management company subsidiaries, has a management agreement with each Affiliate. The term of the Management Agreements is generally 30 years. PMG is the sole shareholder of PHS, PPCM, PNW, PSC, Genesis, PVMG, and UMG.

The Company's Affiliates have entered into Management Agreements with PMS or PHCA, as applicable (each of which is a wholly-owned subsidiary of Prospect). Each Affiliate has agreed to pay a management fee to PMS or PHCA, as applicable. The fee is based in part on the costs to the management company and on a percentage of revenues the Affiliate receives (i) for the performance of medical services by the Affiliate's employees and independent contractor physicians and physician extenders, and (ii) for all other services performed by the Affiliates. The revenue from which this fee is determined includes medical capitation, all sums earned from participation in any risk pools and all fee-for-service revenue earned. The management fee also includes a fixed amount for marketing and public relations services. Except in the case of Nuestra and AMVI/Prospect, the Management Agreements had initial terms of 30 years, renewable for successive 10-year periods thereafter, unless terminated by either party for cause. Effective September 1, 2013, the Managements Agreements for the ProMed Entities were consolidated under one new Management Agreement with PHCA. Effective October, 1, 2013, the Management Agreements for the rest of the Affiliates, other than Nuestra and AMVI/Prospect, were consolidated under one new Management Agreement with PMS. Those two new Management

Confidential LGP-SBC-000002785

Agreements with PHCA and PMS include initial five year terms and are renewable for successive five year periods thereafter. In the case of Nuestra, its Management Agreement had an initial 10 year term renewable for successive one year terms, subsequently amended in January 15, 2009 to an initial 20 year term renewable for two 10 year periods. In the case of AMVI/Prospect, the Management Agreement has a one year term with successive one year renewal terms. In return for payment of the management fee, Prospect (through PMS and PHCA) has agreed to provide financial management, information systems, marketing, advertising, public relations, risk management, and administrative support, including for utilization review and quality of care. At its cost, Prospect has assumed the obligations for all facilities, medical and non-medical supplies, and employment of non-physician personnel of its affiliated medical clinics.

The management fee earned by Prospect fluctuates based on the profitability of each wholly-owned Affiliate. Prospect is allocated a 50% residual interest in any profits after the first 8% of the profits. The remaining balance is retained by the Affiliates.

The Management Agreements are not terminable by the Affiliates except in the case of gross negligence, fraud or other illegal acts of Prospect, or bankruptcy of the Company.

Further, Prospect's rights under the Management Agreements are unilaterally saleable or transferable. Based on the provisions of the Management Agreements and the assignable option agreement with PMG, Prospect has determined that it has a controlling financial interest in the Affiliates, with the exception of AMVI/Prospect. Consequently, under applicable accounting principles, Prospect consolidates the revenues and expenses of all the Affiliates except AMVI/Prospect from the respective dates of execution of the Management Agreements. All significant inter-entity balances have been eliminated in consolidation. In the case of AMVI/Prospect, only that portion of the results which are contractually identified as Prospect's are recognized in the consolidated financial statements, together with the management fee that the Company charges AMVI for managing AMVI's share of the joint venture operations.

Prospect has also entered into management agreements with unaffiliated third parties to manage services to their HMO enrollees. These management agreements do not have characteristics that give rise to the consolidation of the entities under current accounting literature.

The affiliated physician organizations provided medical services to a combined total of approximately 186,100 and 184,700 HMO enrollees as of September 30, 2013 and 2012, respectively. The enrollees include approximately 34,400 and 34,100 enrollees that the Company manages for the economic benefit of five independent third parties, and for which the Company earns management fee income as of September 30, 2013 and 2012, respectively. The total paid member months including managed enrollees, for the fiscal years ended September 30, 2013 and 2012 was 2,193,000 and 2,187,000, respectively.

Effective October 1, 2012, the Company, through its newly created affiliate, New Genesis Medical Associates, Inc. ("NGMA"), dba Genesis Medical Clinic, acquired substantially all of the assets in Orange County, California. NGMA is controlled through a nominee shareholder arrangement like the Stock Option structure utilized for PMG and discussed above. NGMA was consolidated with the operating results of the Medical Groups since its acquisition date (see Note 4). All intercompany balances were eliminated upon consolidation.

Confidential LGP-SBC-000002786

Corporate Segment

The Corporate segment reflects certain expenses incurred at the Parent Entity not specifically allocable to the Hospital Services or Medical Group segments. These include, but are not limited to: salaries, benefits and other compensation for corporate employees; financing expenses; insurance expenses; rent; legal fees; and accounting fees. The Company does not allocate interest expense related to acquisition debt or income taxes to the other reporting segments.

2. Significant Accounting Policies

Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include the accounts of all controlled subsidiaries, which control is effectuated through ownership of voting common stock or by other means, but do not include the accounts of the parent companies, Ivy Holdings and Ivy Intermediate. The Medical Group entities (subsidiaries) have been determined to be variable interest entities due to the existence of a call option under which the Company has the ability to require the holders of all of the voting common stock of the underlying subsidiaries to sell their shares at a fixed nominal price ($1,000) to another designated physician chosen by the Company. This call option agreement represents rights provided through a variable interest other than the equity interest itself that caps the returns that could be earned by the equity holders. In addition, the Company has a management agreement with the subsidiaries and the holders of the voting common stock of the subsidiaries which allows the Company to direct all of the activities of the subsidiaries, retain all of the economic benefits and assume all of the risks associated with ownership of the subsidiaries. In this manner, the Company has all of the economic benefits and risks associated with the subsidiaries but has disproportionately few voting rights (based on the terms of the equity). As the Company retains all of the economic benefits and assumes all of the risks associated with ownership of the subsidiaries, the Company is considered to be the primary beneficiary of the activities of the subsidiaries and therefore must consolidate the underlying subsidiaries. Operating results for Nix Health, NGMA and Nix CGH are consolidated with the Company's financial statements from their acquisition dates (February 1, 2012, October 1, 2012 and April 16, 2013, respectively (see Note 4). All significant intercompany balances and transactions have been eliminated in consolidation.

Reclassifications

Certain reclassifications were made to the 2012 consolidated financial statements in order to conform to the 2013 presentation.

Confidential LGP-SBC-000002787

Revenues

Revenues by reportable segment are comprised of the following amounts (in thousands):

For the Years Ended September 30,	2013 (b)	2012 (a)
Net Hospital Services		
Inpatient	$ 403,183	$ 392,756
Outpatient	63,382	43,702
Capitation	44,923	35,767
Other	6,718	5,177
Total Hospital Services revenues	518,206	477,402
Less: Provision for bad debts	(34,067)	(32,355)
Total net Hospital Services revenues less provision for bad debts	484,139	445,047
Medical Group		
Capitation	215,971	199,415
Management fees	2,352	2,334
Other	3,420	2,057
Total Medical Group revenues	221,743	203,806
Other revenues	7,700	9,897
Total net revenues	$ 713,582	$ 658,750

(a) Nix Health revenues have been included in the accompanying consolidated financial statements for the period from acquisition, February 1, 2012 through September 30, 2012.

(b) NGMA and Nix CGH revenues have been included in the accompanying consolidated financial statements for the period from acquisition, October 1, 2012 and April 16, 2013, respectively, through September 30, 2013.

Hospital Services Segment

Net Patient Service Revenues

Operating revenue of the Hospital Services segment consists primarily of net patient service revenue. The Company reports net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others in the period in which services are rendered. The Company has agreements with third-party payers, including Medicare, Medicaid (Medi-Cal in California), managed care and other insurance programs that are paid at negotiated rates. These payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges and per diem payments, as further described below. Estimates of contractual allowances are based upon the payment terms specified in the related contractual agreements. The Company accrues for amounts that it believes may ultimately be due to or from the third-party payers. Normal estimation differences between final settlements and

Confidential LGP-SBC-000002788

amounts accrued in previous years are reported as changes in estimates in the current year. Outstanding receivables, net of allowances for contractual discounts and bad debts, are included in patient accounts receivable in the accompanying consolidated balance sheets.

The following is a summary of sources of patient service revenues (net of contractual allowances and discounts) before provision for doubtful accounts:

September 30,	**2013**	2012
Medicare	**$ 205,849**	$ 178,838
Medicaid	**152,102**	175,554
Managed Care	**89,019**	73,211
Self Pay / Other	**19,595**	8,855
Capitation	**44,923**	35,767
Other	**6,718**	5,177
Total	**$ 518,206**	$ 477,402

A summary of the payment arrangements with major third-party payers follows:

Medicare: Medicare is a federal program that provides certain hospital and medical insurance benefits to persons aged 65 and over, some disabled persons with end-stage renal disease and certain other beneficiary categories. Inpatient services rendered to Medicare program beneficiaries are paid at prospectively determined rates per discharge, according to a patient classification system based on clinical, diagnostic, and other factors. Outpatient services are paid based on a blend of prospectively determined rates and cost-reimbursed methodologies. The Company is also reimbursed for various disproportionate share and Medicare bad debt components at tentative rates, with final settlement determined after submission of the annual Medicare cost report and audit thereof by the Medicare fiscal intermediary. Normal estimation differences between filed settlements and amounts accrued are reflected in net patient service revenue.

Cost report settlement estimates are recorded based upon as-filed cost reports and are usually not adjusted until a final Notice of Program Reimbursement ("NPR") is issued. Due to litigation in class action suits over the determination of the Supplemental Security Income ("SSI") percentage which affects the disproportionate share reimbursement, the Centers for Medicare and Medicaid Services ("CMS") suspended issuing any NPRs for 2007 cost reporting years and forward. On March 16, 2012, CMS began issuing updated SSI ratios for 2006 through 2009, and on October 17, 2012, CMS issued updated SSI ratios for 2010. The latest updated SSI ratios for 2011 were issued on June 13, 2013. To date, the Company has received final NPRs for 2006 through 2009 for the Company's SCHS Hospitals, Alta Los Angeles Hospitals, and Nix Health. The issuance of final NPRs resulted in changes to existing cost reporting estimates. Accordingly the Company updated its estimates relating to open cost reporting of prior years using the revised SSI ratios and recorded a charge of $42,000 for 2011 cost reports during the year ended September 30, 2013 and a charge of $3,562,000 for 2010 and prior years cost reports during the year ended September 30, 2012. Additionally, the Company has joined a second round of litigation relating to Medicare's recent settlement with providers relating to the manner in which CMS handled the budget neutrality adjustment associated with the rural floor wage index in setting the Medicare inpatient

Confidential LGP-SBC-000002789

prospective system rates ("Rural Floor"). The Company has not yet recorded any settlement revenue relating to the Rural Floor litigation.

Medicaid: Medicaid is a joint federal-state funded healthcare benefit program that is administered by states to provide benefits to qualifying individuals who are unable to afford care. The Company receives reimbursements under the Medicaid program at prospectively determined rates for both inpatient and outpatient services. Medi-Cal is the version of the federal Medicaid program that is applicable to California residents. Inpatient services rendered to Medi-Cal fee-for-service program beneficiaries in California are in the process of a three-year transition to payment at prospectively determined rates based on diagnosis related groups from a contracted per diem rate. Outpatient services are paid based on prospectively determined rates per procedure provided. Inpatient and outpatient services rendered to Medi-Cal managed care beneficiaries in California are paid at either contracted rates or at the Medi-Cal fee-for-service rates. The SCHS and Alta Los Angeles Hospitals are eligible to participate in the State of California Medi-Cal Disproportionate Share ("DSH") programs, under which medical facilities that serve a disproportionate number of low-income patients receive additional reimbursements. Eligibility is determined annually based on prescribed guidelines. Prior to the merger of SCH Culver City with the SCH Hollywood and SCH Van Nuys Hospitals, SCH Culver City did not participate in the program. The Company accrues a receivable each month based on the expected total annual DSH payments. Differences between the estimated and the actual award are recorded in the period they become known. DSH amounts are subject to retrospective revision prior to finalization and such revisions could lead to material retractions. The Company records retrospective retractions when they are estimable and probable. Retrospective additional DSH revenues are recorded when the amounts are probable and have been received. The Medi-Cal DSH receivable as of September 30, 2013 and 2012 totaled approximately $5,437,000 (including SCH Culver City) and $5,399,000, respectively, and were included in due from government program payers in the accompanying consolidated balance sheets. For fiscal years ended September 30, 2013 and 2012, total Medi-Cal DSH payments received by the SCHS and Alta Los Angeles Hospitals were approximately $11,618,000 (including SCH Culver City) and $11,758,000, respectively, and total Medi-Cal DSH revenues recorded were approximately $11,218,000 (including SCH Culver City) and $9,151,000, respectively. Additionally, pursuant to an audit of Medi-Cal cost reports and notification sent to the Company, the Company accrued a cost report liability payable to Medi-Cal of $1,316,000 and $1,341,000 as of September 30, 2013 and 2012, respectively.

During the fourth quarter of fiscal 2011, the Company's SCHS and Alta Los Angeles Hospitals received notification that the DSH amounts received related to the State fiscal year 2009-2010 were being re-examined and that the DSH amounts to be received for State fiscal years 2010-2011 would be significantly reduced. The notification was the result of legislation that extended payments under Senate Bill 90 ("SB 90"). During the years ended September 30, 2013 and 2012, the Company recorded reductions of $2,146,000 and $2,661,000, respectively, in Medi-Cal DSH revenue related to this matter.

In Texas, the Medicaid program reimburses under prospectively determined rates for both inpatient and outpatient services. Medicaid reimbursement may be subject to periodic adjustment, as well as to changes in existing payment levels and rates, based on the amount of funding available to the Medicaid program. Nix Health has also been receiving payments from the Texas Health and Human Services Commission under the Section 1115 Waiver ("the waiver") that was recently granted to the state of Texas by CMS. Under the first year of the

Confidential LGP-SBC-000002790

waiver ending September 30, 2012, a transition payment was paid to Nix Health based upon prior levels of payment under the "Upper Payment Limit" ("UPL") program, which the waiver replaced. Payments for years two through five under the waiver are based upon two pools. One pool is for payments for uncompensated care which includes the shortfall in Medicaid reimbursement as compared to cost and the cost of providing services to uninsured patients. The other pool is the Delivery System Reform Initiative Payments ("DSRIP"), where approved programs and services are undertaken to improve access and services provided. Programs are established by regions and approved by the Texas Health and Human Services Commission and CMS. These programs are assigned a value and milestones are established to measure success and the timing and level of payment from the DSRIP funds. Nix Health recorded $19,882,000 in revenue associated with the Section 1115 Waiver program during the year ended September 30, 2013, and $13,298,000 in revenue associated with the UPL program during the period from February 1, 2012 (acquisition date) through September 30, 2012. During the same periods, Nix Health recorded $9,477,000 and $7,658,000, respectively, in costs for rural community provision of services associated with the program. The UPL payments are subject to audit by Texas Health and Human Services. At September 30, 2013 and 2012 amounts receivable under the section 1115 waiver amounted to $14,781,000 and $4,987,000, respectively, and amounts payable amounted to $4,754,000 and $1,889,000, respectively.

Managed Care: The Company has also entered into payment agreements with certain commercial insurance carriers, HMOs, and PPOs. The basis for payment under these agreements is in accordance with negotiated contracted rates or at the Company's standard charges for services provided. Some of these payments are capitated, meaning that the Company receives an agreed amount per patient for providing an agreed range of services.

Self-Pay: Self-pay patients represent those patients who do not have health insurance and are not covered by some other form of third party arrangement. Such patients are evaluated, at the time of services or shortly thereafter, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid, as well as the Company's local hospital's indigent and charity care policy.

See "Concentrations of Credit Risks" below for discussion of revenues received from the Medicare and Medicaid programs.

Similar to other hospital operators, the Company is currently undergoing audits under the Recovery Audit Contractor ("RAC") and other similar programs. As of September 30, 2013 and 2012 the Company had accrued $895,000 and $662,000, respectively, related to such liabilities.

SCH Culver City Outlier Liability

Following the acquisition of a majority stake in SCH Culver City, effective April 14, 2009, the Company consolidated SCH Culver City's estimated liability to CMS arising out of outlier payments received for services provided by the hospital to Medicare eligible inpatients, primarily for the last four months of calendar year 2005 and all of calendar year 2006.

While SCH Culver City reports financial statements on a fiscal year ending September 30, Medicare cost reports are filed on a calendar year basis. Acute care hospitals receive Medicare reimbursement payments pursuant to a prospective payment methodology primarily based on the diagnosis of the patient, but are entitled to receive additional payments, referred to as "outliers"

Confidential LGP-SBC-000002791

for patients whose treatment is very costly. When Brotman Medical Center, Inc. acquired the hospital in 2005, CMS provided a ratio of cost to charges (the "RCC") based on the statewide average. Payments received by SCH Culver City on this basis were an interim estimate, subject to final determination upon auditing of SCH Culver City's cost reports. SCH Culver City filed its Medicare cost reports, but determined that its outlier reimbursement for services provided in fiscal years 2005, 2006 and part of 2007 might be subject to adjustment based on certain outlier reconciliation rules. On October 12, 2012, SCH Culver City received from its Medicare fiscal intermediary a proposed outlier adjustment for Medicare fiscal year 2006 in the amount of $12,785,000. SCH Culver City had previously been notified of an adjustment of $2,149,000 for 2005. As of September 30, 2013 and 2012, the Company has accrued $13,834,000 of the estimated $14,934,000 liability to CMS included in the accompanying consolidated balance sheets as of September 30, 2013 and 2012. The difference between the $14,934,000 asserted by CMS and the $13,834,000 accrued by the Company relates to accrued interest of approximately $1,100,000. The Company does not agree, however, with the outlier reconciliation liability. Accordingly, in accordance with relevant literature related to accounting for contingencies, the Company has recorded to the lower end of the range. The Medicare fiscal intermediary has placed the recoupment on hold while the Company is currently in discussions with CMS to resolve this issue. The ultimate resolution of this item is unknown at this stage. In March 2013, the Company received a notice of program reimbursement for the 2006 cost report year which approximated the October 2012 adjustment. The Company has also filed an appeal of the outlier issue with the Provider Reimbursement Review Board for the 2006 cost reporting period since it received a notice of program reimbursement for the 2006 cost report. The ultimate resolution of this appeal is unknown at this stage.

The following is a summary of due from and due to governmental payers at September 30 (in thousands):

September 30,	**2013**	2012
Due from government payers:		
Medi-Cal Disproportionate Share (DSH)	**$ 5,437**	$ 5,339
Medicare cost report settlements	**7,191**	3,922
Medicaid Section 1115 receivable	**14,780**	4,987
	$ 27,408	$ 14,248
Due to government payers:		
Outlier liability	**$ 13,834**	$ 13,834
Medi-Cal Disproportionate Share (DSH)	**-**	1,649
Medicare cost report settlements	**4,484**	4,613
Medi-Cal cost report settlements	**1,316**	1,341
	$ 19,634	$ 21,437

The Company is not aware of any material claims, disputes, or unsettled matters with any payers that would affect revenues that have not been adequately provided for and disclosed in the accompanying consolidated financial statements.

Confidential LGP-SBC-000002792

Charity Care

The Company provides charity care to patients whose income level is below 300% of the Federal Poverty Level. Patients with income levels between 300% and 350% of the Federal Poverty Level qualify to pay a discounted rate under the requirements of California State Assembly Bill 774 (AB 774) based on various government program reimbursement levels. Patients without insurance are offered assistance in applying for Medicaid and other programs they may be eligible for, such as state disability. Patient advocates from the Company's Medical Eligibility Program ("MEP") screen patients in the Hospital and determine potential linkage to financial assistance programs. They also expedite the process of applying for these government programs. The approximate cost of providing charity care was approximately $4,320,000 and $4,178,000 for the years ended September 30, 2013 and 2012, respectively. The Company has estimated the cost of charity care based on a ratio of the cost to charges of operating expenses, excluding depreciation, interest and management fees.

Provisions for Contractual Allowances and Doubtful Accounts

Collection of receivables from third-party payers and patients is the Company's primary source of cash and is critical to its operating performance. The Company closely monitors its historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions for contractual allowances are made using the most accurate information available. However, due to the complexities involved in these estimations, actual payments from payers may be materially different from the amounts management estimates and records. The Company's primary collection risks relate to uninsured patients and the portion of the bill which is the patient's responsibility, primarily co-payments and deductibles. Payments for services may also be denied due to issues over patient eligibility for medical coverage, the Company's ability to demonstrate medical necessity for services rendered and payer authorization of hospitalization.

Accounts receivable are reduced by an allowance for doubtful accounts. Valuation of the collectability of accounts receivable and provision for bad debts is based on historical collection experience, payer mix and the age of the receivables. Management routinely reviews accounts receivable balances in conjunction with these factors and other economic conditions which might ultimately affect the collectability of the patient accounts, and makes adjustments to the Company's allowances as warranted. For receivables associated with services provided to patients who have third-party coverage, management analyzes contractually due amounts and subsequently calculates an allowance for doubtful accounts and provision for bad debts once the age of the accounts reaches a specific age category based on historical experience. For receivables associated with self-pay patients, management records a significant provision for bad debts beginning in the period services were provided based on past experience that many patients are unable or unwilling to pay the portion of their bill for which they are financially responsible. The allowance for doubtful accounts was $28,050,000 and $34,470,000 for the years ended September 30, 2013 and 2012, respectively. The decrease was mostly realized at SCH Culver City where a significant number of self-pay accounts that were 180 days or older were deemed uncollectible and written off to bad debt expense. The allowance for doubtful accounts greater than 180 days at SCH Culver City was $6,412,000 and $17,513,000 for the years ended September 30, 2013 and 2012, respectively.

All of the Company's hospital facilities are subject to the Emergency Medical Treatment and Active Labor Act ("EMTALA"). This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who

Confidential LGP-SBC-000002793

presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions exists regardless of a patient's ability to pay for treatment. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay. Penalties for violations of EMTALA include civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. The Company believes that it is in compliance with all applicable laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing that would have a material effect on the Company's financial statements.

Other Revenues

Other revenues consist primarily of meaningful use incentive payments and rental revenue from operating leases, and totaled $7,700,000 and $9,897,000 for the years ended September 30, 2013 and 2012, respectively.

A summary of other revenues recorded during the year follows:

Meaningful Use incentives: The American Recovery and Reinvestment Act of 2009 ("ARRA") established incentive payments under the Medicare and Medicaid programs for certain professionals and hospitals that meaningfully use certified electronic health record ("EHR") technology or adopt or implement such technology. The Medicare incentive payments will be paid out to qualifying hospitals over four consecutive years on a transitional schedule. To qualify for Medicare incentives, hospitals and physicians must meet EHR "meaningful use" criteria that become more stringent over three stages that have yet to be finalized by CMS.

Medicaid programs and payment schedules vary from state to state. The Medicaid programs require hospitals to register for the program prior to 2016, to engage in efforts to adopt, implement or upgrade certified EHR technology in order to qualify for the initial year of participation, and to demonstrate meaningful use of certified EHR technology in order to qualify for payment for up to three additional years.

For the years ended September 30, 2013 and 2012 (including Nix Health from February 1, 2012 (acquisition date) through September 30, 2012), the Company recorded revenues of $5,872,000 and $8,662,000, respectively, related to the Medicare and Medicaid programs in the consolidated statements of income. These incentives have been recognized following the grant accounting model, recognizing income ratably over the applicable reporting period as management becomes reasonably assured of meeting the required criteria. Subsequent changes to these estimates will be recognized in the consolidated statement of operations in the period in which additional information is available. Such estimates are subject to audit by the federal government, the state, or its designee. As of September 30, 2013, there have been no notifications from Medicare or Medicaid requiring an audit.

Rental Revenue: Rental revenue from operating leases, which commenced with the Nix Health acquisition, is recorded based on the fixed, minimum required rents (base rents) per the lease agreements. Rental revenue from base rents is recorded on the straight-line

Confidential LGP-SBC-000002794

method over the terms of the related lease agreements and is included in other revenue on the consolidated statements of income. During the years ended September 30, 2013 and 2012, the Company recorded rental revenues of $1,600,000 and $1,235,000, respectively.

Medical Group Segment

Medical Group Revenues

Operating revenue of the Medical Group segment consists primarily of payments for medical services procured by the Affiliates under capitated contracts with various managed care providers including HMOs. Capitation revenue under HMO contracts is prepaid monthly to the Affiliates based on the number of enrollees electing any one of the Affiliates as their health care provider. See "Concentrations of Credit Risks" below for revenues received from the five largest contracted HMOs.

Capitation revenue (net of capitation withheld to fund risk share deficits discussed below) is recognized in the month in which the Affiliates are obligated to provide services. Minor ongoing adjustments to prior months' capitation, primarily arising from contracted HMOs' finalizing of monthly patient eligibility data for additions or subtractions of enrollees, are recognized in the month they are communicated to the Company. Additionally, Medicare pays capitation using a "Risk Adjustment model," which compensates managed care organizations and providers based on the health status (acuity) of each individual enrollee. Health plans and providers with higher acuity enrollees will receive more and those with healthier enrollees will receive less. Under Risk Adjustment, capitation is determined based on health severity, measured using patient encounter data. Capitation is paid on an interim basis based on data submitted for the enrollee for the preceding year and is adjusted in subsequent periods (generally in the Company's fourth quarter) after the final data is compiled. Positive or negative capitation adjustments are made for Medicare enrollees with conditions requiring more or less healthcare services than assumed in the interim payments. Since the Company cannot reliably predict these adjustments, periodic changes in capitation amounts earned as a result of Risk Adjustment are recognized generally in the fourth quarter when those changes are communicated by the health plans to the Company. The Company received and recorded as additional revenue, approximately $6,145,000 and $2,751,000, respectively, in positive capitation risk adjustments during the years ended September 30, 2013 and 2012, respectively.

HMO contracts also include provisions to share in the risk for hospitalization, whereby the Affiliate can earn additional incentive revenue or incur penalties based upon the utilization of hospital services. Typically, any shared risk deficits are not payable until and unless the Company generates future risk sharing surpluses, or if the HMO withholds a portion of the capitation revenue to fund any risk share deficits. At the termination of the HMO contract, any accumulated risk share deficit is typically extinguished. Due to the lack of access to information necessary to estimate the related costs, shared-risk amounts receivable from the HMOs are only recorded when such amounts are known. Risk pools for the prior contract years are generally final settled in the third or fourth quarter of the following fiscal year. For the years ended September 30, 2013 and 2012, Medical Group revenues included approximately $2,880,000 and $4,245,000, respectively, of additional revenues due to favorable settlements on prior year risk-sharing arrangements. At September 30, 2013 and 2012, contingent liabilities for carry-forward risk-pool deficits expected to be forgiven, or offset against future surpluses were approximately $6,365,000 and $7,170,000, respectively, based on the available information from the health plans.

Confidential LGP-SBC-000002795

The Company also receives incentives under "pay-for-performance" programs for quality medical care based on various criteria. These incentives, which are included in other revenues, are generally recorded in the third and fourth quarters of the fiscal year when such amounts are known. Pay-for-performance revenues recorded during the years ended September 30, 2013 and 2012, were $2,375,000 and $1,923,000, respectively.

Management fee revenue is earned in the month the services are rendered. Management fee arrangements with unaffiliated entities provide for compensation ranging from 7.5% to 12.5% of revenues. Management fee revenue recorded during the years ended September 30, 2013 and 2012, were $2,352,000 and $2,334,000, respectively.

Medical Group Cost of Revenues

The cost of health care services consists primarily of capitation and claims payments, pharmacy costs and incentive payments to contracted providers. These costs are recognized in the period incurred, or when the services are provided. Claims costs also include an estimate of the cost of services which have been incurred but not yet reported to the Company. The estimate for accrued medical costs is based on projections of costs using historical studies of claims paid and adjusted for seasonality, utilization and cost trends. These estimates are subject to trends in loss severity and frequency. Although considerable variability is inherent in such estimates, management records its best estimate of the amount of medical claims incurred at each reporting period. Estimates are continually monitored and reviewed and, as settlements are made or estimates adjusted, differences are reflected in current operations. See Note 12 for changes in claims estimates during the years ended September 30, 2013 and 2012.

In addition to contractual reimbursements to providers, the Company also makes discretionary incentive payments to physicians, which are in large part based on the pay-for-performance and shared risk revenues and favorable senior capitation risk adjustment payments received by the Company. Since the Company records these revenues generally in the third or fourth quarter of each fiscal year when the incentives and capitation adjustments due from the health plans are known, the Company also finalizes the discretionary physician bonuses in the same periods. During the years ended September 30, 2013 and 2012, the Company recorded discretionary physician incentives expense totaling approximately $3,993,000 and $5,738,000, respectively. As of September 30, 2013 and 2012, bonus accruals of approximately $2,623,000 and $4,011,000, respectively, were included in accounts payable and other accrued liabilities.

The Company also periodically evaluates the need to establish premium deficiency reserves for the probability that anticipated future health care costs could exceed future capitation payments from HMOs under capitated contracts and, where appropriate, records a premium deficiency reserve.

The Company, for certain matters, maintains stop loss coverage for health care costs that are in excess of set thresholds. The Company, through two of its affiliated medical groups, was in dispute with its previous stop loss carrier with respect to amounts owed on claims under the 2007-2009 policy years. In November 2012, pursuant to a settlement agreement, the previous stop loss carrier agreed to pay the Company $225,000, in exchange for a mutual release of all claims and liabilities between the parties. As a result, the Company wrote off $679,000, which has been reflected in the consolidated financial statements at September 30, 2012.

Confidential LGP-SBC-000002796

Property, Improvements and Equipment

Property, improvements and equipment are stated on the basis of cost or, in the case of acquisitions, at their acquisition date fair values. Depreciation is provided using the straight-line method over the estimated useful lives of the assets, and amortization of leasehold improvements is provided using the straight-line basis over the shorter of the remaining lease period or the estimated useful lives of the leasehold improvements. Leasehold improvements are generally depreciated over five to ten years, buildings are depreciated over 14 to 28 years, equipment is depreciated over two to five years and furniture and fixtures are depreciated over two to seven years. Equipment capitalized under capital lease obligations are amortized over the life of the lease.

As more fully described in Note 10, the Company is required to comply with certain seismic standards as required by the state of California by January 1, 2020. The useful life of buildings subject to seismic retrofit requirements may be limited if the Company does not make the necessary upgrades by the required compliance date.

Goodwill and Other Intangible Assets

Goodwill totaled approximately $158,864,000 and $156,545,000 at September 30, 2013 and 2012, respectively, and arose as a result of the ProMed, Alta, SCH Culver City, and Nix Health (including Nix CGH) acquisitions. Goodwill represents the excess of the consideration paid and liabilities assumed over the fair value of the assets acquired, including identifiable intangible assets.

Goodwill is not amortized; rather it is reviewed annually for impairment for each reporting unit, or more frequently if impairment indicators arise. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. A two-step impairment test is used to identify potential goodwill impairment and to measure the amount of goodwill impairment loss to be recognized, if any. The Company has five reporting units, consisting of the Alta Hospitals, SCH Culver City (fka Brotman), Nix Health, ProMed and Prospect (which includes all other affiliated physician organizations).

The Company tests for goodwill impairment as of September 30 each year. In evaluating whether indicators of impairment exist, the Company considers adverse changes in market value, laws and regulations, profitability, cash flows, ability to maintain enrollment and renew payer contracts at favorable terms, among other factors. The goodwill impairment test is a two-step process. The first step consists of estimating the fair value of the reporting unit based on a weighted combination of (i) the guideline company method that utilizes revenue or earnings multiples for comparable publicly-traded companies, and (ii) a discounted cash flow model that utilizes expected future cash flows, the timing of those cash flows, and a discount rate (or weighted average cost of capital, which considers the cost of equity and cost of debt financing expected by a typical market participant) representing the time value of money and the inherent risk and uncertainty of the future cash flows. If the estimated fair value of the reporting unit is less than its carrying value, a second step is performed to compute the amount of the impairment by determining the "implied fair value" of the goodwill, which is compared to its corresponding carrying value. The Company's impairment test related to goodwill at September 30, 2013 resulted in no impairment charge.

Confidential LGP-SBC-000002797

Long-Lived Assets and Amortizable Intangibles

Amortizable intangible assets totaled approximately $31,325,000 and $38,080,000, net of accumulated amortization at September 30, 2013 and 2012, respectively, and arose as a result of the ProMed, Alta, Brotman, Nix Health (including Nix CGH), and NGMA acquisitions. Intangible assets include customer relationships, covenants not-to-compete, trade names, provider networks, favorable leasehold, and net physician guarantees. The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The Company considers assets to be impaired and writes them down to fair value if estimated undiscounted cash flows associated with those assets are less than their carrying amounts. Fair value is based upon the present value of the associated cash flows. Changes in circumstances (for example, changes in laws or regulations, technological advances or changes in strategies) may also reduce the useful lives from initial estimates. Changes in planned use of intangibles may result from changes in customer base, contractual agreements, or regulatory requirements. In such circumstances, management will revise the useful life of the long-lived asset and amortize the remaining net book value over the adjusted remaining useful life. During the year ended September 30, 2013, the Company changed the original names of the SCHS Hospitals and expects to transition into the new names over the next three years. As a result of the change, the Company recorded an impairment charge of $3,476,000 at September 30, 2013 related to the trade names (see Note 5). There were no impairments recorded at September 30, 2012.

Medical Malpractice Liability Insurance

The individual physicians who contract with the Affiliates carry their own medical malpractice insurance. In the Hospital Services segment, the Company's hospitals carry professional and general liability insurance to cover medical malpractice claims under claims-made policies. Under the policies, insurance premiums cover only those claims actually reported during the policy term. Should the claims-made policy not be renewed or replaced with equivalent insurance, claims related to occurrences during the policy term but reported subsequent to the policy's termination may be uninsured. From August 31, 2012 through October 1, 2013, the SCHS Hospitals and Alta Los Angeles Hospitals were covered under one professional and general liability insurance policy, and Nix Health was covered under a separate policy. Effective October 1, 2013, the hospitals renewed the professional and general liability insurance under one consolidated policy with separate retentions for each entity that runs through September 30, 2014. The Company is not subject to claims arising prior to the acquisition of Nix Health (February 1, 2012) as the former owner purchased an extended claims reporting policy (tail insurance) covering the incidents that have occurred up through January 31, 2012.

Accounting principles generally accepted in the United States of America require that a health care organization record and disclose the estimated costs of medical malpractice claims in the period of the incident of malpractice, if it is reasonably possible that liabilities may be incurred and losses can be reasonably estimated. The Company has recognized an estimated liability for incurred but not reported claims and the self-insured risks (including deductibles and potential claims in excess of policy limits) based upon an actuarial valuation of the Company's historical claims experience of the Company's hospitals. At September 30, 2013 and 2012, the total claims liability was approximately $3,173,000 and $2,197,000 (net of insurance recoveries of $1,487,000 and $32,000), respectively, and was estimated using a discount factor of 4%.

Confidential LGP-SBC-000002798

The claims reserve is based on the best data available to the Company. The estimate, however, is subject to a significant degree of inherent variability. The estimate is continually monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of medical malpractice liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims. Management is not aware of any potential medical malpractice claims whose settlement, if any, would have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Workers' Compensation Insurance

The workers' compensation coverage provides the statutory benefits required by law and that the employer's liability limits are $1,000,000 (excluding Nix Health). Nix Health has opted out of the Texas Workers' Compensation system as a non-subscriber, and provides its employees with benefits for occupational injury or disease through an ERISA plan. Nix has an Employer's Excess Indemnity policy with a $25,000 deductible policy with limits of $10,000,000 per occurrence and $25,000,000 aggregate. From October 1, 2011 to September 30, 2012 the Company's (excluding Brotman and Nix) workers' compensation coverage was a written on a $250,000 incurred loss retro program without an aggregate loss limitation. From October 1, 2012 to present, the Company's (excluding Nix Health only) workers' compensation coverage is written on a $250,000 incurred loss retro program without an aggregate loss limitation. At September 30, 2013 and 2012, included in accrued salaries, wages and benefits are accruals for uninsured claims and claims incurred but not reported of approximately $4,409,000 and $2,808,000, respectively. The amounts are estimated based upon an actuarial valuation of their claims experience, using a discount factor of 4%.

The claims reserve is based on the best data available to the Company; however, the estimate is subject to a significant degree of inherent variability. The estimate is monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of the claims liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims. Management is not aware of any potential claims whose settlement, if any, would have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Stock Options

On December 15, 2010, the Board of Directors (the "Ivy Board") of Ivy Holdings adopted the 2010 Stock Option Plan of Ivy Holdings Inc. (the "Ivy Plan") and, on December 16, 2010, the stockholders of Ivy Holdings adopted the Ivy Plan. The Ivy Plan provides that it shall be administered by the Compensation Committee of the Ivy Board. The Ivy Plan includes an Incentive Stock Option Agreement and a Non-Qualified Stock Option Agreement to be used in connection with the grant of options under the Ivy Plan. These options granted under the Ivy Plan are exercisable into Ivy Holdings stock and vest based on a number of criteria, including time, performance and CEO discretion.

Compensation costs for option awards are measured and recognized in the consolidated financial statements based on their grant date fair value, net of estimated forfeitures over the awards' service period. The fair value of restricted stock grants are determined on the date of grant, based on the number of shares granted and the quoted price or estimated fair market value of the Company's common stock. The Company uses the Black-Scholes option pricing model and a single

Confidential LGP-SBC-000002799

option award approach to estimate the fair value of stock options granted. Equity-based compensation is classified within the same line items as cash compensation paid to employees.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with initial maturities of 90 days or less to be cash equivalents. Cash and cash equivalents are primarily comprised of deposits with banks. The Company maintains its cash at banks with high credit-quality ratings.

Restricted Cash

At September 30, 2013 and 2012, $233,000 was held in a restricted account in connection with workers compensation arrangements, $30,000 was restricted related to a capitation agreement, and $300,000 was restricted in connection with a statutory deposit required by the Department of Managed Care for Knox-Keene licensing.

Restricted Investments

The Company is required to keep restricted deposits by certain HMOs for the payment of claims. Such restricted deposits are classified as a current asset in the accompanying consolidated balance sheets, as they are restricted for payment of current liabilities. Investments also include certificates of deposit with maturity dates of more than 90 days when purchased.

Inventories

Inventories of supplies are valued at the lower of amounts that approximate the weighted average cost or market. Inventories consist primarily of medical and surgical supplies and pharmaceuticals.

Deferred Financing Costs

Deferred financing costs are amortized over the period in which the related debt is outstanding using the effective interest method. During the year ended September 30, 2012, the Company completed an offering of $325 million in 8.375% senior secured notes ("PMH 2019" Notes) (see Note 8), whereby the proceeds were partially used to repay $151.8 million in outstanding 12.75% senior secured notes due 2014 ("PMH 2014 Notes"). Deferred financing costs related to the PMH 2014 Notes of $3,944,000 were written off and deferred financing costs of $10,208,000 related to the PMH 2019 Notes were capitalized and included in deferred financing costs during the year ended September 30, 2012. On November 16, 2012, the Company issued an additional $100 million of PMH 2019 Notes and capitalized deferred financing costs of $3,948,000 and $61,000 associated with the offering during the years ended September 30, 2013 and 2012, respectively, which are reflected in deferred financing costs in the accompanying consolidated balance sheets. The Company determined that the transaction represents a debt modification under the applicable accounting guidance.

Confidential LGP-SBC-000002800

Deferred financing costs at September 30, 2013 and 2012 are as follows (in thousands):

September 30,	**2013**			2012		
	Gross Book Value	**Accumulated Amortization**	**Net Book Value**	Gross Book Value	Accumulated Amortization	Net Book Value
Deferred financing costs	**$14,345**	**$2,720**	**$11,625**	$10,397	$649	$9,748

Income Taxes

Deferred income tax assets and liabilities are recognized for differences between financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. To the extent a deferred tax asset cannot be recognized under the preceding criteria, allowances must be established. The impact on deferred taxes of changes in tax rates and laws, if any, are applied to the years during which temporary differences are expected to be settled and reflected in the financial statements in the period of enactment. The Company recognizes interest and penalties associated with income tax matters and unrecognized tax benefits in the income tax expense line item of the statements of operations. For the years ended September 30, 2013 and 2012, no interest and/or penalties related to incomes taxes were accrued and/or expensed.

An entity is required to evaluate its tax positions using a two-step process. First, the entity should evaluate the position for recognition. An entity should recognize the financial statement benefit of a tax position if it determines that it is more likely than not that the position will be sustained on examination. Next, the entity should measure the amount of benefit that should be recognized for those tax positions that meet the more-likely-than-not test.

Consolidated and separate income tax returns are filed with the U.S. Federal jurisdiction and in the State of California and Texas. The Company's filed tax returns are subject to examination by the IRS for tax years ended September 30, 2010 and the period from October 1, 2010 to December 15, 2010. The IRS completed its audit of PMG for the year ended September 30, 2010 with no adjustments. No material tax liabilities have been asserted to date with respect to the PMH audits (see Note 7).

The net deferred tax liabilities are primarily comprised of temporary differences between book and tax bases for intangible and capital assets acquired and net operating loss carryforwards.

Fair Value of Financial Instruments

Financial instruments consist primarily of cash and cash equivalents, restricted cash investments, patient and other accounts receivables, accrued salaries and benefits, accounts payable and accrued expenses, medical claims and related liabilities, amounts due to government agencies, notes receivable and payable, capital lease obligations, debt, and other liabilities. The carrying amounts of current assets and liabilities approximate their fair value due to the relatively short period of time between the origination of the instruments and their expected realization.

Confidential LGP-SBC-000002801

Fair Value Measurement

Accounting literature establishes a hierarchal disclosure framework which prioritizes and ranks the level of market price observability used in measuring investments at fair value. Market price observability is affected by a number of factors, including the type of investment, the characteristics specific to the investment and the state of the marketplace including the existence and transparency of transactions between market participants. Investments with readily available active quoted prices or for which fair value can be measured from actively quoted prices in an orderly market generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Investments measured and reported at fair value are classified and disclosed in one of the following categories.

- Level I - Quoted prices are available in active markets for identical investments as of the reporting date. The type of investments in Level I include listed equities and listed derivatives.

- Level II - Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Investments which are generally included in this category include corporate bonds and loans, less liquid and restricted equity securities and certain over-the-counter derivatives.

- Level III - Pricing inputs are unobservable for the investment and includes situations where there is little, if any, market activity for the investment. The inputs into the determination of fair value require significant management judgment or estimation. Investments that are included in this category generally include general and limited partnership interests in corporate private equity and real estate funds, credit-oriented funds, funds of hedge funds, distressed debt and non-investment grade residual interests in securitizations and collateralized debt obligations.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the determination of which category within the fair value hierarchy is appropriate for any given investment is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment.

The Company's Level 1 assets include cash and cash equivalents and investments (certificates of deposit and money market mutual funds). The inputs for fair value of goodwill and intangible assets (including long lived assets and intangible assets subject to amortization) would be based on Level 3 inputs as data used for such fair value calculations would be based on discounted cash flows that are not observable from the market, directly or indirectly.

Financial Items Measured at Fair Value on a Recurring Basis

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis and where they are classified within the hierarchy (in thousands):

	Total	Level 1	Level 2	Level 3
As of September 30, 2013				
Certificates of deposit and money market mutual funds	$ 637	$ 637	$ -	$ -
As of September 30, 2012				
Certificates of deposit and money market mutual funds	$ 633	$ 633	$ -	$ -

The Company's investments are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices.

Nonfinancial Items Measured at Fair Value on a Nonrecurring Basis

The following table presents the fair value of intangible assets subject to amortization measured at fair value during the year ended September 30, 2013 and remaining on the Company's balance sheets as of September 30, 2013 (in thousands):

		Fair Value Measurement Using			Total
	Total	Level 1	Level 2	Level 3	impairment
Trade names	$ 1,940	$ -	$ -	$ 1,940	$ (3,476)

During the year ended September 30, 2013, the Company recorded $3,476,000 of impairment relating to intangible assets subject to amortization, which is reflected in the accompanying consolidated statements of income. No impairment was recorded during the year ended September 30, 2012.

The Company uses the discounted cash flow approach to estimate the fair value of the Company's trade names. The following table provides quantitative information related to the significant unobservable inputs to determine fair value as of September 30, 2013:

Fair value of trade names	Valuation Technique	Unobservable Input	Rates
$1,940,000	Discounted cash flow	Weighted average cost of capital	13.0% - 13.5%
		Revenue growth rate	2% - 3%
		Reduction of revenue attributable to trade names	(30%) - (70%)
		Royalty rate	1.0%

Significant increases or decreases in the Company's weighted average cost of capital may result in a significantly lower or higher fair value measurement, respectively. Significant increases or

Confidential LGP-SBC-000002803

decreases in the revenue growth rate and royalty rates in isolation may result in a significantly higher or lower fair value measurement, respectively.

Nonfinancial assets such as goodwill and identifiable intangible assets are measured at fair value when there is an indicator of impairment and recorded at fair value only when impairment is recognized. The Company performs an annual impairment test on the goodwill, and performs an impairment test on the intangibles as and when there are indications of impairment.

The fair values of the Company's current financial assets and liabilities approximate their reported carrying amounts. The carrying values and the fair values of non-current financial assets and liabilities that qualify as financial instruments under the guidance are as follows (in thousands).

	2013		2012	
September 30,	**Carrying Amount**	**Fair Value**	Carrying Amount	Fair Value
Liabilities:				
Long-term debt	**$ 421,067**	**$ 449,339**	$ 326,958	$346,463

The fair value of the Company's long-term debt was determined based on market prices.

Concentrations of Credit Risk

Cash and cash equivalents are maintained at financial institutions and, at times, balances may exceed federally insured limits of $250,000 per depositor of each financial institution. The Company has not experienced any losses to date related to these balances.

Financial instruments that potentially subject the Company to concentrations of credit risk consist of receivables due from Medicare, Medicaid (Medi-Cal in California), patients, health plans including shared-risk arrangements, and notes receivable.

The Company invests excess cash in liquid securities at institutions with strong credit ratings, following established guidelines relative to diversification and maturities to maintain safety and liquidity. These guidelines are periodically reviewed and modified to take into consideration trends in yields and interest rates and principal risk. Management attempts to schedule the maturities of the Company's investments to coincide with the Company's expected cash requirements. Credit risk with respect to receivables is limited since amounts are generally due from large HMOs within the Medical Group Management segment and from the Medicare and Medicaid (Medi-Cal in California) programs within the Hospital Services segment. Notes receivable are fully secured by collateral of equal or greater value. Management reviews the financial condition of these institutions on a periodic basis and does not believe the concentration of cash or receivables results in a high level of risk.

Confidential LGP-SBC-000002804

For the years ended September 30, 2013 and 2012, the Hospital Services segment received a total of 69% and 74%, respectively, of its net patient revenues from Medicare and Medicaid programs, and the Medical Group segment received a total of 69% and 73%, respectively, of their capitation revenues from its five largest HMOs, as follows (in thousands):

Years Ended September 30,	2013	% of Total Revenue	2012	% of Total Revenue
Hospital Services:				
Government Payers:				
Medicare	$ 205,849	40%	$ 178,838	37%
Medicaid	152,102	29%	175,554	37%
Total	$ 357,951	69%	$ 354,392	74%
Medical Group:				
HMO A	$ 36,194	17%	$ 35,936	18%
HMO B	31,735	15%	31,862	16%
HMO C	28,754	13%	26,818	13%
HMO D	28,346	13%	27,587	14%
HMO E	23,159	11%	23,664	12%
Totals	$ 148,188	69%	$ 145,867	73%

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities at the dates, and for the periods, that the consolidated financial statements are prepared. Actual results could materially differ from those estimates. Principal areas requiring the use of estimates include third party settlements, settlements under risk sharing programs, allowances for contractual discounts and doubtful accounts, accruals for medical claims, impairment of goodwill, long-lived assets and intangible assets, share-based payments, professional and general liability claims and workers' compensation claims, reserves for outcome of legislation and valuation allowances against deferred tax assets.

Recently Adopted Accounting Pronouncements

In December 2010, the Financial Accounting Standards Board ("FASB") issued an update to the existing goodwill impairment accounting standards which modified the goodwill impairment test for reporting units with zero or negative carrying amounts, of which SCH Culver City had a negative carrying value as of September 30, 2012. Effective October 1, 2012, the Company implemented this new guidance and determined that there was no impairment of goodwill relating to SCH Culver City at that date.

Effective October 1, 2012, the Company adopted an update to accounting standards which requires certain health care entities to present the provision for bad debts relating to patient

Confidential LGP-SBC-000002805

service revenue as a deduction from patient service revenue in the statement of operations rather than as an operating expense. Additional disclosures relating to sources of patient revenue and the allowance for doubtful accounts related to patient accounts receivable are also required. The adoption of this update did not have a material impact on the Company's consolidated financial position, results of operations or cash flows; however, it did change the presentation of the Company's revenues on its consolidated statements of income as well as required additional disclosures.

Effective October 1, 2012, the Company adopted an accounting standards update related to goodwill impairment testing. Previously, entities were required to test goodwill for impairment, on at least an annual basis, by first comparing the fair value of a reporting unit with its carrying amount, including goodwill. If the resulting fair value of a reporting unit was less than its carrying amount, then the second step of the test would be performed to measure the amount of the impairment loss, if any. This update permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step goodwill impairment test is unnecessary. An entity has the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. Additionally, this update permits an entity to resume performing the qualitative assessment in any subsequent period. The adoption of this accounting guidance did not have a material impact on the Company's consolidated financial statements as of September 30, 2013.

New Accounting Pronouncements

In June 2011, the FASB issued an accounting standards update that specifies that the liability for the annual fee imposed on certain health insurers under the recently enacted Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act, should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. This update is effective for calendar years beginning after December 31, 2013, when the fee initially becomes effective. The Company is currently evaluating the effect of this guidance on its consolidated results of operations and consolidated financial position.

In July 2013, the FASB issued an accounting standards update that requires an unrecognized tax benefit or portion of an unrecognized tax benefit to be presented as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward except when certain conditions exist. The amendment is effective for the Company for fiscal years beginning after December 15, 2014, including interim periods in 2014. The Company is currently evaluating the effect of this guidance on its consolidated results of operations and consolidated financial position.

3. Property, Improvements and Equipment

Property, improvements and equipment, consisted of the following (in thousands):

September 30,	2013	2012
Property, improvements and equipment:		
Land and land improvements	$ 34,985	$ 34,428
Buildings and improvements	59,270	55,974
Leasehold improvements	950	2,215
Equipment	67,889	46,164
Furniture and fixtures	5,759	4,650
	168,863	143,431
Less: accumulated depreciation	(42,331)	(30,016)
Property, improvements and equipment, net	$ 126,532	$ 113,415

On July 18, 2013, Nix Health entered into a lease agreement to rent land and building located in the city of San Antonio, Texas, where the Company plans to invest significantly for the development of a hospital facility. The Company determined that the lease qualified as a capital lease and recorded fixed assets of $5,675,000 and a capital lease liability of $6,902,000; the difference of $1,227,000 relates to tenant improvement allowance from the landlord, which was recorded as other receivables in the accompanying consolidated balance sheets.

During the year ended September 30, 2013, the Company made investments of $6,200,000 in equipment related to implementation of EHR technology and new hospital systems and $8,600,000 in medical equipment at the Company's hospitals.

At September 30, 2013 and 2012, the Company had assets under capitalized leases of approximately $17,288,000 and $13,015,000, respectively, and related accumulated depreciation of $7,350,000 and $3,792,000, respectively.

Depreciation expense was approximately $12,443,000 and $8,692,000 for the years ended September 30, 2013 and 2012, respectively.

4. Acquisitions

Nix Health

Effective February 1, 2012, the Company acquired substantially all of the assets and assumed certain liabilities of MHS San Antonio, LLC (dba Nix Health Care System), a hospital system with 297 licensed beds, which offers San Antonio, Texas and the surrounding communities an array of medical services ranging from primary care and surgical services to behavioral and rehabilitation services. This acquisition adds further geographic and payor mix diversification consistent with the Company's growth strategy. The assets were acquired from subsidiaries of Merit Health Systems, LLC, principally Accord Medical Management, LP and Accord Properties, LP. The consideration for the Nix Health acquisition included approximately $44,000,000 in cash and assumption of approximately $4,000,000 in loans and capital leases, for total consideration of approximately $48,000,000. The acquisition of Nix Health was accounted for as a business combination using

Confidential LGP-SBC-000002807

purchase accounting. Under the purchase accounting method, the amount of consideration paid is allocated to assets acquired and liabilities assumed based on their estimated fair values.

The following table summarizes the assets acquired and liabilities assumed in connection with the Nix Health acquisition, as of February 1, 2012 (in thousands):

	Purchase Price Allocation (Adjusted)	Purchase Price Allocation (Original)
Patient accounts receivable	$ 9,766	$ 9,766
Prepaid expenses and other current assets	11,514	11,514
Property, improvements and equipment	40,167	40,167
Goodwill	3,138	3,295
Intangible assets	3,362	3,362
Accounts payable and other liabilities	(21,142)	(21,142)
Capital leases	(1,801)	(1,801)
Long-term debt	(2,300)	(2,300)
Net cash consideration subject to working capital adjustment	42,704	42,861
Working capital adjustment	1,319	1,162
Net cash consideration	$ 44,023	$ 44,023

During the year ended September 30, 2013, the Company recorded an additional working capital adjustment of $157,000, which reduced the goodwill balance by the same amount.

New Genesis Medical Associates

On October 1, 2012, the Company, through its newly created affiliate, New Genesis Medical Associates, Inc. (dba Genesis Medical Clinic), a California professional medical corporation, acquired substantially all of the assets of a physician medical practice located in Orange County, California. The consideration for the NGMA acquisition included approximately $400,000 in cash. The acquisition of NGMA is accounted for as a business combination using purchase accounting. Under the purchase accounting method, the amount of consideration paid is allocated to assets acquired and liabilities assumed based on their estimated fair values.

The following table summarizes the assets acquired and liabilities assumed in connection with the NGMA acquisition, as of October 1, 2012 (in thousands):

	Purchase Price Allocation
Property, improvements and equipment	$ 50
Intangible assets	350
Net cash consideration	$ 400

Confidential LGP-SBC-000002808

Nix Community General Hospital

On April 16, 2013, the Company acquired substantially all of the assets and assumed certain liabilities of Community General Hospital of Dilley, Texas Inc. dba Community General Hospital, a hospital with 18 licensed beds, which offers Dilley, Texas and the surrounding communities an array of medical services including primary care. Upon close of the transaction, the hospital was renamed to Nix Community General Hospital. The consideration for the Community General Hospital acquisition included approximately $2,705,000 in cash, contingent cash consideration of $250,000 and assumption of approximately $795,000 in liabilities, for total consideration of approximately $3,750,000. The acquisition of Community General Hospital is accounted for as a business combination using purchase accounting. Under the purchase accounting method, the amount of consideration paid is allocated to assets acquired and liabilities assumed based on their estimated fair values.

The following table summarizes the assets acquired and liabilities assumed in connection with the Community General Hospital acquisition, as of April 16, 2013 (in thousands):

	Purchase Price Allocation
Current assets	$ 7
Property, improvements and equipment	1,267
Goodwill	2,476
Contingent cash consideration	(250)
Accounts payable and other liabilities	(795)
Net cash consideration	$ 2,705

As an asset purchase, the goodwill and the intangible assets acquired in the Nix Health, NGMA and Nix CGH acquisitions are deductible for tax purposes.

5. Goodwill and Intangible Assets

As of September 30, 2013 and 2012, goodwill and intangible assets relate to the ProMed, Alta, SCH Culver City, Nix Health, NGMA, and Nix CGH acquisitions. The Company performed its annual goodwill impairment analysis for each reporting unit that constitutes a business for which 1) discrete financial information is produced and reviewed by management, and 2) services that are distinct from the other reporting units.

For the Medical Group segment, the Company has determined that PHCA and the ProMed Entities (collectively referred to as "ProMed"), as well as PMS and the other affiliated physician organizations as a group (collectively referred to as "Prospect") each constitutes a separate reporting unit. NGMA is consolidated within the Prospect reporting unit.

For the Hospital Services segment, the reporting unit for the annual goodwill impairment analysis is determined to be at the business unit level. A separate analysis was prepared for Alta Hospitals, SCH Culver City and Nix Health. Nix CGH is consolidated within the Nix Health business unit.

Confidential LGP-SBC-000002809

During the year ended September 30, 2013, the Company recorded additional goodwill of $2,476,000 related to the Nix CGH acquisition. In addition, the Company recorded a working capital adjustment of $157,000 against the goodwill balance related to the Nix Health acquisition.

The carrying value of goodwill for Alta Hospitals, SCH Culver City, Nix Health (including Nix CGH), and ProMed at September 30, 2013 and 2012 was $106,539,000, $24,373,000, $5,613,000 and $22,339,000, respectively.

The following is a rollforward of goodwill from October 1, 2011 to September 30, 2013 (in thousands):

	Amount
Balance, October 1, 2011	$ 153,250
Acquisition of Nix Health	3,295
Balance, September 30, 2012	156,545
Acquisition of Nix CGH	2,476
Working capital adjustments - Nix Health (see Note 4)	(157)
Balance, September 30, 2013	$ 158,864

Identifiable intangible assets are comprised of the following (in thousands):

	September 30, 2013					
	Alta	SCH Culver City	Nix Health	Prospect	Promed	Total

	September 30, 2012					
	Alta	SCH Culver City	Nix Health	Prospect	Promed	Total

Confidential LGP-SBC-000002810

HMO membership	$ -	$ -	$ -	$ -	$ 25,200	$ 25,200
Covenants not-to-compete	2,240	-	120	-	940	3,300
Trade names	14,140	3,000	2,740	-	9,450	29,330
Favorable leasehold	-	-	20	-	-	20
Physician guarantees	-	-	793	-	-	793
Provider networks	-	-	-	-	1,200	1,200
Gross carrying value	16,380	3,000	3,673	-	36,790	59,843
Accumulated amortization	(5,879)	(516)	(586)	-	(14,782)	(21,763)
Intangible assets, net	$ 10,501	$ 2,484	$ 3,087	-	$ 22,008	$ 38,080

During the year ended September 30, 2013, the Company changed the names of the hospitals owned by SCHS to SCH Hollywood, SCH Van Nuys, and SCH Culver City. The fair value of the original trade names at September 30, 2013 was estimated using the relief-from-royalty method and their remaining useful lives were reduced to three years based on the Company's planned use of the trade names. As a result of the valuation, the trade names were valued at $1,940,000 and the Company recorded an impairment charge of $3,476,000 at September 30, 2013, which is presented as part of operating expenses in the accompanying consolidated statements of income. The Company adjusted the cost basis of the trade names to the new fair value, which resulted in writing off $5,510,000 of gross intangibles and accumulated amortization of $2,034,000. There were no impairments recorded at September 30, 2012.

During the year ended September 30, 2013, fully amortized intangibles related to covenants not-to-compete and provider networks of $3,300,000 and $1,200,000, respectively, were fully amortized and removed from intangibles assets.

Amortization is recognized on a straight-line basis (management's best estimate of the period of economic benefit) over the respective useful lives and expense for the years ended September 30, 2013 and 2012 was approximately $4,371,000 and $3,884,000, respectively.

Estimated amortization expense for each future fiscal year is as follows (in thousands):

Years ended September 30,	
2014	$ 4,583
2015	4,445
2016	4,246
2017	3,098
2018	2,914

Confidential LGP-SBC-000002811

Thereafter		12,039
Total	$	31,325

The following table shows the estimated useful lives for each of the intangible assets:

	Estimated useful lives
HMO membership	14 years
Covenants not-to-compete	18 months to 6 years
Trade names	3 - 20 years
Favorable leasehold	6 years
Physician guarantees	2 to 3 years
Provider networks	3 years
Customer relationships	7 years

The weighted-average remaining useful life for the intangible assets was 8.71 years as of September 30, 2013.

6. Related Party Transactions

Jeereddi Prasad, M.D., a significant shareholder of Ivy Holdings, a director of Ivy Holdings and the Company, and an officer of the ProMed Entities, has ownership interests in physician medical groups that provide medical services to ProMed members. For the years ended September 30, 2013 and 2012, the ProMed Entities paid these groups approximately $16,742,000 and $16,474,000, respectively. On December ____, 2013, the Company entered into a stock purchase agreement (the "CMG Purchase Agreement") to acquire a minority interest in one of these physician medical groups, Chaparral Medical Group, Inc. ("CMG") (See Note 15).

Effective November 3, 2011, the Promed Entities entered into an Exclusivity and Non- Solicitation Agreement with CMG and certain of its physicians (the "CMG Exclusivity Agreement"). The amount paid for this agreement amounted to $1,000,000. On December ____, 2013, concurrently with the execution of the CMG Purchase Agreement, the CMG Exclusivity Agreement was amended and its exclusivity terms were extended through December 31, 2018 in exchange for the payment of an additional $300,000 divided among the exclusive physicians.

Pursuant to a Management Services Agreement, dated December 15, 2010 and amended on May 3, 2012 (the "LGP Management Agreement"), between the Company and LGP, LGP provides to the Company, (a) certain investment banking services, (b) management, consulting and financial planning services and (c) financial advisory and investment banking services in connection with major financial transactions from time to time. In consideration for the services provided by LGP under the LGP Management Agreement, the Company pays LGP an annual fee of $1,000,000, payable in monthly installments, and reimburses LGP for its related expenses up to $50,000 annually. If approved by the unanimous consent of the Board of Directors of the Company, additional customary fees may be due to LGP pursuant to the terms of the LGP Management Agreement for services rendered in connection with major transactions from time to time.

The Company is a wholly-owned indirect subsidiary of Ivy Holdings. Therefore, Ivy Holdings is the parent of an affiliated group of corporations within the meaning of Section 1504(a) of the Internal

Confidential LGP-SBC-000002812

Revenue Code of 1986. On December 15, 2010, Ivy Holdings, Ivy Intermediate and the Company entered into a Tax Sharing Agreement. The Tax Sharing Agreement allows the Company to make payments to Ivy Holdings as necessary to fund their payment of any required taxes incurred due to such parent status. During the years ended September 30, 2013 and 2012, the Company made payments under this arrangement of $17,477,000 and $2,702,000, respectively.

7. Income Taxes

The components of the income tax provision are as follows (in thousands):

For the years ended September 30,	2013	2012
Current:		
Federal	$ 8,000	$ 10,188
State	2,184	3,325
	10,184	13,513
Deferred:		
Federal	(318)	(9,150)
State	(56)	(1,765)
	(374)	(10,915)
Total:		
Federal	7,682	1,038
State	2,128	1,560
	$ 9,810	$ 2,598

Temporary differences and carry forward items that result in deferred income tax balances as of September 30 are as follows (in thousands):

September 30,	2013	2012
Deferred tax assets:		
State tax benefit	$ 2,103	$ 2,042
Allowances for bad debts	4,304	11,161
Vacation accrual and other	4,434	3,954
Workers compensation	1,889	1,203
Accrued physician bonuses	4,847	3,552
Malpractice reserves	1,204	837
Deferred rent	105	105
Other	379	356
Net operating losses	8,798	15,807
Capital loss carryforward	2,255	2,255
Deferred tax assets	30,318	41,272
Valuation allowance	(10,742)	(17,099)
Net deferred tax assets	19,576	24,173
Deferred tax liabilities:		
Intangible assets	(8,211)	(10,549)
Fixed assets	(20,038)	(21,691)
Non-stockholder capital contribution	-	(2,142)
Prepaid expenses	(581)	(384)
Deferred tax liabilities	(29,830)	(34,766)
Net deferred tax liabilities	$ (10,254)	$ (10,593)

Deferred tax assets and liabilities reflect the effect of temporary differences between the assets and liabilities recognized for financial reporting purposes and the amounts recognized for income tax purposes.

Between January and April 2012, the Company increased its ownership in SCH Culver City from 78.28% to 100%, following which, the Company now includes SCH Culver City in its consolidated federal income tax return. Based on the available objective evidence, the Company believes it is more likely than not that certain SCH Culver City deferred tax assets will be fully realizable. Accordingly, the Company reversed approximately $8,000,000 of deferred tax valuation allowances for the year ended September 30, 2012. For the year ended September 30, 2013, the Company released an additional $8,000,000 of deferred tax valuation allowance in connection with net operating losses that became available for use due to the Brotman and Alta Hollywood merger. At September 30, 2013, the Company had federal and state net operating loss carryovers of approximately $17,935,383 and $34,038,681 which, if not utilized, will expire beginning 2033 and 2023, respectively. A substantial portion of these net operating loss carryforwards are subject to limitations under Internal Revenue Code Section 382, and their use may be severely limited in the future.

During the year ended September 30, 2013, the Internal Revenue Service ("IRS") concluded its audit of SCH Culver City for the years ended September 30, 2008 through 2010 with a minor tax impact. PMH is under audit by the IRS for the year ended September 30, 2010 and the period from October 1, 2010 to December 15, 2010. The IRS completed its audit of PMG for the year ended September 30, 2010 with no adjustments. No material tax liabilities have been asserted to date with respect to the PMH audits. At September 30, 2013 and 2012, the Company has approximately $970,000 of unrealized excess tax benefits related to employee stock options. This amount is not included in the table of deferred tax assets above and the benefit will be recorded as an increase to additional paid in capital if and when realized.

The differences between the income tax provision at the federal statutory rate and that reflected in the accompanying consolidated statements of operations are summarized as follows:

For the years ended September 30,	**2013**	2012
Tax provision at statutory rate	**35%**	35%
State taxes, net of federal benefit	**6%**	5%
Permanent and other items	**3%**	2%
Change in valuation allowances	**(19)%**	(28)%
Other	**(2)%**	(5)%
	23%	9%

Long-term debt, net of current maturities	$ 420,889	$ 326,957

Prospect's Debt:

Senior Secured Notes

On May 3, 2012, the Company closed the offering of $325 million in 8.375% senior secured notes due May 1, 2019 ("PMH 2019 Notes"). Interest is payable semi-annually in arrears on May 1 and November 1, commencing on November 1, 2012. The offering was executed in accordance with Rule 144A and Regulation S under the Securities Act of 1933. The terms of the PMH 2019 Notes are governed by an indenture among the Company, certain of its subsidiaries and affiliates (as "Guarantors"), and U.S. Bank National Association (as trustee) (the "Indenture"). The Indenture contains certain covenants that, among other things, limit the Company's ability, and the ability of its restricted subsidiaries (as such term is defined in the Indenture) to: retire and pay dividends or distributions on capital stock or equity interests, prepay subordinated indebtedness or make

Confidential LGP-SBC-000002816

other restricted payments; incur additional debt; make investments; create liens on assets; enter into transactions with affiliates; engage in other businesses; sell or issue capital stock of restricted subsidiaries; merge or consolidate with another company; transfer and sell assets; create dividend and other payment restrictions affecting subsidiaries; and designate unrestricted subsidiaries. The Credit Agreement (defined below), executed in connection with the PMH Senior Secured Credit Facility (discussed below), contains a number of customary covenants as well as covenants requiring the Company to maintain a maximum consolidated secured leverage ratio and limiting the amount of capital expenditures.

Concurrent with the issuance of the PMH 2019 Notes, the Company entered into a five year $50 million revolving senior secured credit facility (the "PMH Senior Secured Credit Facility") which replaced the existing senior secured credit facility. The PMH Senior Secured Credit Facility provides, among other things, for borrowings up to the amount of the facility with sublimits of up to (i) $20 million to be available for the issuance of letters of credit and (ii) $10 million to be available for swingline loans. The commitment under the facility may be increased by up to $10 million upon the Company's request at the discretion of the lenders and subject to certain customary requirements. The interest rate per annum applicable to loans under the PMH Senior Secured Credit Facility will be, at the Company's option, either a rate per annum equal to (i) LIBOR plus 3.50% or (ii) an alternate base rate, which will be the higher of the administrative agent's prime rate, the federal funds rate plus 0.50%, and the 1-month LIBOR rate plus 1.00%, plus in each case, 2.50%. In August 2013, the PMH Senior Secured Credit Facility limit was increased to $60 million, all of which remains undrawn as of September 30, 2013.

The PMH 2019 Notes and the PMH Senior Secured Credit Facility are jointly and severally guaranteed on a senior secured basis by all of the Company's subsidiaries (as such term is defined in the Indenture) other than AMVI/Prospect Medical Group, Nuestra and certain immaterial subsidiaries. The PMH 2019 Notes are secured pari passu with the PMH Senior Secured Credit Facility by first-priority Liens and security interests on substantially all of the tangible and intangible assets of the Guarantors, including, but not limited to, the accounts receivable, inventories, other personal property, real property, fixtures and equipment, in each case now owned or hereafter acquired by the Company and the Subsidiary Guarantors, with certain exceptions. The PMH 2019 Notes are effectively senior to all of the Guarantors' existing and future Indebtedness.

The terms of the PMH Senior Secured Credit Facility are governed by the Credit Agreement, dated as of May 3, 2012, among the Company, Morgan Stanley Senior Funding, Inc. (as administrative agent), Royal Bank of Canada and Credit Suisse AG, Cayman Islands Branch (as co-syndication agents) and the lenders party thereto (the "Credit Agreement").

The Company, at its option, may redeem all or part of the notes at a redemption price equal to 106.281%, 104.188%, 102.094% and 100.0% on or after May 1, 2015, 2016, 2017 and 2018, respectively. Prior to May 1, 2015, the Company, at its option, may (i) redeem up to 35% of the original principal amount of the notes with the proceeds of certain equity offerings at a redemption price of 108.375% (ii) redeem up to 10% of the original principal amount of the PMH 2019 Notes during each 12-month period, commencing on May 1 in each of 2012, 2013 and 2014, at a redemption price of 103.0% of the principal amount thereof (this redemption option was terminated in connection with the Company's November 2012 offering of additional PMH 2019 Notes) or (iii) redeem the PMH 2019 Notes, in whole, but not in part, at a redemption price of 100.0% of the aggregate principal plus a make-whole premium. There are no required principal payments on the PMH 2019 Notes until maturity.

Confidential LGP-SBC-000002817

On November 16, 2012, the Company closed the offering of $100 million in aggregate principal amount of 8.375% senior secured notes due 2019 (the "Additional 2019 Notes") at a price equal to 102% of the principal amount of the Additional 2019 Notes. The Additional 2019 Notes were issued in a private placement to qualified institutional buyers and form a part of the same series as the PMH 2019 Notes issued on May 3, 2012.

The Additional 2019 Notes were issued under the Indenture, dated May 3, 2012 and described above, as supplemented by two supplemental indentures entered into in connection with the issuance of the Additional 2019 Notes (the "Supplemental Indentures"). The Additional 2019 Notes are treated as a single series with the previously issued PMH 2019 Notes for all purposes under the Indenture, including, without limitation, restrictive covenants, waivers, amendments, redemptions and offers to purchase. Prior to closing the issuance of the Additional 2019 Notes, the Company was required to obtain the consent of the majority in interest of its PMH 2019 Notes issued on May 3, 2012 to certain amendments to the Indenture contained in the first Supplemental Indenture. The Company obtained such consent from the holders of approximately $324 million in aggregate principal amount of outstanding PMH 2019 Notes and paid an aggregate consent fee of approximately $8.9 million. The Company determined that the transaction represents a debt modification under the applicable accounting guidance and recorded the consent fee as a debt discount during the year ended September 30, 2013, which is being amortized over the term of the Additional 2019 Notes using the effective interest method. As of September 30, 2013, the aggregate outstanding principal balance of the PMH 2019 Notes was $425,000,000, net of unamortized original issue discount of $7,641,000 and unamortized original issue premium of $1,729,000.

The proceeds from the offering, together with approximately $10.9 million of the Company's available cash, were utilized to pay a dividend to the stockholders of the Company's indirect parent, Ivy Holdings Inc., in an aggregate amount equal to $100 million, to pay the aforementioned $8.9 million consent fee and to pay approximately $2.5 million for other fees and expenses related to the offering.

In connection with the issuance of the Additional 2019 Notes, the Company entered into an amendment of its Credit Agreement governing the PMH Senior Secured Credit Facility that waived and amended certain provisions of the Credit Agreement, including certain restrictive covenants.

As of September 30, 2013, the Company was in compliance with the financial covenants of the Indenture and Credit Agreement.

Retired Senior Secured Notes

On July 29, 2009, the Company closed the offering of $160 million in 12.75% senior secured notes due 2014 at an issue price of 92.335% with interest payable semi-annually in arrears on January 15 and July 15 ("PMH 2014 Notes"). Concurrent with the issuance of the PMH 2014 Notes, the Company entered into a three year $15 million revolving credit facility ("2009 Credit Facility") which was undrawn at closing, with any future borrowings bearing interest at London Interbank Offered Rate ("LIBOR") plus 7.00%, with a LIBOR floor of 2.00%.

In connection with the Company's acquisition of Nix Health, effective February 1, 2012, the Company entered into an amended credit agreement with Royal Bank of Canada (as administrative agent) and in accordance with which the available loan commitments were increased to $25 million, certain covenants were relaxed and the interest rate was changed to the higher of (1) RBC

Confidential LGP-SBC-000002818

prime rate, (2) the Federal funds rate plus 0.5% and (3) the 30-day LIBOR indexed rate. Also on February 1, 2012, the Company borrowed $15 million of the available loan commitment, of which on March 26, 2012 approximately $10 million was repaid. Pursuant to the further Amendment of the 2009 Credit Facility dated March 7, 2012, an additional incremental loan commitment of $15 million was obtained, bringing the total loan commitment to $40 million.

Pursuant to its definitive Prospectus filed with the SEC via Form S-4 on October 26, 2009, the Company offered to exchange (the "Exchange Offer") up to $160 million of its 12.75% Senior Secured Notes, Series B, due 2014 (the "Exchange Notes" and together with the Original Notes, the "PMH 2014 Notes") for an equal amount of the PMH 2014 Notes issued on July 29, 2009 (the "Original Notes"). The Exchange Offer was finalized on December 3, 2009, at which time $159 million of the $160 million aggregate principal amount of private notes had been tendered and accepted for exchange. Pursuant to a post-effective amendment to the Form S-4 filed with the SEC on December 3, 2010, the Company removed from registration the Exchange Notes that were not issued because the corresponding Original Notes were not tendered for exchange.

On April 18, 2012, the Company commenced a cash tender offer, subject to the consummation of the PMH 2019 Notes offering and certain other conditions, to repurchase any and all of the Company's PMH 2014 Notes and a related consent solicitation to proposed amendments to the PMH 2014 Notes indenture and collateral documents to, among other things, permit the grant of liens on the Guarantors assets to secure the notes and subsidiary guarantees. The total consideration for the PMH 2014 Notes under the Tender Offer was equal to $1,087.95 per $1,000 principal amount of the PMH 2014 Notes, which included a consent payment of $30.00 per $1,000 principal amount of PMH 2014 Notes for those holders who tendered and consented to the proposed amendments by the early consent date, plus accrued and unpaid interest to the purchase date. Holders that tendered after the early consent date, but on or before the expiration date, received consideration equal to $1,057.95 per $1,000 principal amount of the PMH 2014 Notes, plus accrued and unpaid interest to the purchase date.

Upon the completed issuance of the PMH 2019 Notes, the proceeds of the issuance were used to repay $151.8 million owing on the PMH 2014 Notes (plus accrued interest), $5 million outstanding on the 2009 Credit Facility, and the call premium of $13.3 million, which is recorded within Prepayment penalty on debt refinance within the consolidated statements of operations. In addition, the Company wrote off the unamortized debt discount of approximately $6.4 million and unamortized debt financing costs of approximately $3.9 million related to the PMH 2014 Notes and 2009 Credit Facility.

Demand Notes

During the year ended September 30, 2012, the Company obtained a commitment from a bank for a $9.3 million equipment leasing facility to finance various equipment at the Company's hospital facilities. As of September 30, 2013, amounts totaling $8.4 million have been drawn under the facility and are classified as capital lease arrangements. On September 30, 2012, a total of $4.9 million was drawn under the facility. Approximately $4.1 million was converted to equipment leases and was classified as capital lease arrangements (see Note 1). Pending its conversion to equipment leases, the remaining $804,000 was classified as current debt as of September 30, 2012, pursuant to certain demand notes. Interest accrued on these notes at the bank prime rate plus 1.5% with a floor of 4.5% and was payable monthly. Effective December 15, 2012, pursuant to certain equipment financing agreements, the amount was converted to equipment leases.

Confidential LGP-SBC-000002819

Nix Health's Debt:

Mortgage Debt

In connection with the Nix Health acquisition, Nix SPE, LLC ("Nix SPE") executed a Loan Assumption Agreement, effective as of February 29, 2012, pursuant to which Nix SPE assumed the obligations of the sellers of Nix Health under a mortgage loan facility provided by The Ohio National Life Insurance Company on December 27, 1999. Nix SPE assumed the obligation to pay the outstanding principal amount of the mortgage loan and interest accruing thereafter. The outstanding balance of the mortgage loan as of September 30, 2013 and 2012 was $1,919,000 and $2,028,000, respectively.

Prospect Hospital Holdings, LLC, the parent company of Nix SPE, has provided a guaranty of the obligations of Nix SPE under the loan. The obligations under the loan facility are secured by a deed of trust on a neighborhood medical center known as Nix Alamo Heights. The loan is subject to a 7.0% interest rate and requires monthly installment payments of $20,674, with a balloon payment on the maturity date of November 1, 2019. Prepayment is subject to a fee and the loan contains customary covenants.

Note Payable

Nix Health entered into a note payable due in March of 2014. Interest accrues on this note at 8.96% and is payable monthly. The outstanding balance of this note as of September 30, 2013 and 2012 was $39,000 and $140,000, respectively.

Scheduled payments under the Company's current and long-term debt as of September 30, 2013 are as follows (in thousands):

Years ending September 30,	
2014	$ 178
2015	126
2016	135
2017	145
2018	155
Thereafter	420,328
	$ 421,067

9. Stockholder's (Deficit) Equity

Equity Based Compensation Plans

Effective December 15, 2010, the Board of Directors of Ivy Holdings adopted the Ivy Plan that authorized the issuance of options exercisable for up to 155,110 shares of the common stock of Ivy Holdings to employees, certain consultants and independent members of the boards of directors, of Ivy Holdings and its subsidiaries (including the Company and its subsidiaries). During the years ended September 30, 2013 and 2012, Ivy Holdings granted 18,462 and 18,987 options to certain members of the Company's management and employees. These options are exercisable into Ivy Holdings stock and vest based on a number of criteria, including time, Company and Business Unit performance and CEO and Compensation Committee discretion. Since the Ivy Holdings stock

Confidential LGP-SBC-000002820

options were granted to Company employees for their services related to the Company, the related compensation cost has been recorded in the Company's consolidated financial statements.

Under the terms of the Ivy Plan, the exercise price of an incentive stock option ("ISO") may not be less than 100% of the fair market value of the Company's common stock on the date of grant and, if granted to a shareholder owning more than 10% of the Company's common stock, then not less than 110%. Stock options granted under the Ivy Plan have a maximum term of 5 - 10 years from the grant date, and are exercisable at such time and upon such terms and conditions as determined by the Compensation Committee. Stock options granted to employees generally vest over four years, subject to continued service, performance, and other criteria. In the case of an ISO, the amount of the aggregate fair market value of common stock with respect to which the ISO grant is exercisable, for the first time by an employee during any calendar year, may not exceed $100,000.

Stock Options Activity

The following table summarizes information about Ivy Holdings, Inc stock options outstanding as of September 30, 2013 and 2012 and activity during the years then ended:

	Shares Subject to Options	Weighted Average Exercise Price	Weighted Average Aggregate Intrinsic Value	Weighted Average Remaining Contractual Term (Months)
Outstanding as of September 30, 2011	122,094	$ 100.00	$ —	112.8
Granted	18,987	100.00	—	—
Exercised	(853)	100.00	—	—
Forfeited	(27,935)	100.00	—	—
Expired	—	—	—	—
Outstanding as of September 30, 2012	112,293	100.00	20.00	104.2
Granted(1)	127,590	43.02		
Exercised	(3,513)	30.00		
Canceled/ Forfeited(1)	(117893)	97.27		
Expired	—			
Outstanding as of September 30, 2013	118,477	$ 44.02	$ 76.56	95.8

The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and the estimated fair value of the Company's common stock for those awards that have an exercise price currently below the estimated fair value. As of September 30, 2013, the aggregate intrinsic value of outstanding shares was approximately $9,071,000.

Confidential LGP-SBC-000002821

A summary of Ivy Holdings, Inc non-vested options and the changes during the fiscal years ended September 30, 2013 and 2012 is presented as follows:

	Shares	Weighted Average Grant Date Fair Value
Ivy Holdings, Inc. Stock Options:		
Granted	127,349	$ 50.73
Vested	(27,917)	50.73
Forfeited	(5,255)	50.73
Nonvested at September 30, 2011	94,177	50.73
Granted	18,987	50.73
Vested	(26,518)	50.73
Forfeited	(24,222)	50.73
Nonvested at September 30, 2012	62,424	50.73
Granted(1)	127,590	67.51
Vested	(29,903)	92.58
Canceled/ Forfeited(1)	(117,073)	62.83
Nonvested at September 30, 2013	43,038	$ 66.28

(1) The number of options granted and canceled/forfeited includes options granted and canceled in connection with the Repricing (see below).

On April 5, 2013, the Board of Directors of Ivy Holdings approved the repricing of the exercise price of all outstanding stock options as of that date. Pursuant to such resolution, as of the effective date, all of the previously granted options were exchanged for new options with a lower exercise price granted on a one-for-one basis. As a result of this repricing, the Company repriced 49,380 vested options and 59,748 unvested options from an original exercise price of $100.00 per share to a new exercise price of $30.00 per share. Other than the exercise price, all other terms of the repriced options, such as vesting and contractual life, remained the same. The Company has accounted for the repricing as a modification and recorded any net incremental fair value related to vested awards as compensation expense on the date of modification. In addition, the Company is recording the incremental fair value related to the unvested awards, together with unamortized stock-based compensation expense associated with the unvested awards, over the remaining requisite service period of the option holders. In connection with the repriced options, the Company recorded stock compensation expense of $1,454,000 on the date of the modification. Incremental compensation cost resulting from the modification was $548,000 during the six-month period ended September 30, 2013.

The actual fair value of the options granted ranges from $50.73 to $68.31 per option. In connection with the repricing, the stock compensation expense related to the stock options granted prior to April 5, 2013 is calculated based on a fair value of $97.75.

Confidential LGP-SBC-000002822

Stock-Based Compensation Expense

Stock-based compensation expense for all share-based payments in exchange for employee services (including stock options and restricted stock) is measured at fair value on the date of grant, estimated using an option pricing model and is recognized in the consolidated financial statements, net of estimated forfeitures over the awards requisite service period.

The Company uses the Black-Scholes option pricing model and a single option award approach to estimate the fair value of options granted. Estimated forfeitures will be revised in future periods if actual forfeitures differ from the estimates and will impact compensation cost in the period in which the change in estimate occurs. The determination of fair value using the Black-Scholes option-pricing model is affected by the Company's estimated stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors.

Fair value for options granted during the years ended September 30, 2013 and 2012 was estimated with the following assumptions for Ivy Holdings Inc.

For the years ended September 30,	**2013**	2012
Weighted average fair value of option grants	**$67.51**	$50.73
Estimated fair market value of the Company's common stock on the date of grant	**$120.00**	$100.00
Weighted average expected life of the options	**7** years	5.78 years
Risk-free interest rate	**1.12%**	0.66% - 2.85%
Weighted average expected volatility	**52.94%**	49.42%
Dividend yield	**0.00%**	0.00%

Expected Term - The expected term of options granted represents the period of time that they are estimated to be outstanding.

Risk-Free Interest Rate - The Company bases the risk-free interest rate on the implied yield in effect at the time of option grant on U.S. Treasury zero-coupon issues with equivalent remaining terms.

Expected Volatility—The Company estimates the volatility of the common stock at the date of grant based on the average of the historical volatilities of a group of peer companies. The Company has identified a group of comparable companies to calculate historical volatility from publicly available data for sequential periods approximately equal to the expected terms of the option grants. In selecting comparable companies, Management considered several factors including industry, stage of development, size and market capitalization.

Forfeitures—Share-based compensation is recognized only for those awards that are ultimately expected to vest. Compensation expense is recorded net of estimated forfeitures. Those estimates are revised in subsequent periods if actual forfeitures differ from those estimates. The Company used data since May 2005 to estimate pre-vesting option forfeitures.

Confidential LGP-SBC-000002823

Stock-based compensation expense for the Ivy Holdings Inc. stock options recognized during the years ended September 30, 2013 and 2012 was approximately $3,595,000 and $1,294,000, respectively. At September 30, 2013, there were 43,038 unvested options which could potentially vest over the next three fiscal years, subject to meeting various vesting requirements which include time, discretion, and various performance targets as defined. The remaining maximum estimated stock compensation expense to be amortized to expense in future periods is approximately $3,412,000. The stock-based compensation expense is based on a number of criteria, including time, achievement of Company and Business Unit EBITDA targets and CEO and Compensation Committee discretion. Options which are expected to vest based on CEO and Compensation Committee discretion, are treated as variable stock options and are subject to revaluation at each reporting period. Management determined the fair value of the discretionary vested options using a Black Scholes calculation but determined that the change in compensation expense was not material to the consolidated financial statements for the year ended September 30, 2013.

Dividends

The Company distributed $100 million in connection with the issuance of the Additional 2019 Notes, during the year ended September 30, 2013, which was recorded against retained earnings, and was ultimately paid to the common stockholders of Ivy Holdings, Inc.

The Company distributed $88.1 million in connection with the issuance of the 2019 Notes, during the year ended September 30, 2013. This was used to redeem the preferred stock at Ivy Holdings, Inc., and is accounted for as a return of capital. Accordingly, this distribution was recorded as a reduction of additional paid in capital.

10. Commitments and Contingencies

Leases

The Company leases various office facilities and equipment from third parties under non-cancelable operating and capital lease arrangements expiring at various dates through 2026. Certain operating leases contain rent escalation clauses and renewal options, which have been factored into determining rent expense on a straight-line basis over the lease terms. Capital leases bear interest at rates ranging from 2% to 11% per annum.

Confidential LGP-SBC-000002824

The future minimum annual lease payments (net of anticipated sublease income) required under leases in effect at September 30, 2013, are as follows (in thousands):

For the Years ending September 30,	Capital Leases	Operating Leases
2014	$ 6,081	$ 2,751
2015	4,669	2,685
2016	2,123	2,655
2017	1,552	2,268
2018	1,564	2,138
Thereafter	8,366	3,629
Total minimum lease payments	24,355	$ 16,126
Less: amounts representing interest	(7,110)	
	17,245	
Less: current portion	(5,429)	
	$ 11,816	

Rent expense for the years ended September 30, 2013 and 2012 was approximately $7,365,000 and $6,720,000, respectively. Sublease rental income of approximately $209,000 and $233,000, for the years ended September 30, 2013 and 2012, respectively, was recorded as a reduction to rental expense.

Litigation

The Company is subject to a variety of claims and suits that arise from time to time in the ordinary course of its business, acquisitions, or other transactions. While the Company's management currently believes that resolving all of these matters, individually or in the aggregate, will not have a material adverse impact on the Company's consolidated financial position or results of operations, the litigation and other claims that the Company faces are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a material adverse impact on the Company's consolidated financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

Following the announcement of the Merger with controlled entities of LGP, two putative class action complaints were filed against the Company, each of the Company's special committee members, Ivy Holdings, LGP, and certain other parties. These complaints, which were consolidated into a single action, allege generally that defendants breached their fiduciary duties, or aided and abetted others' breaches of their fiduciary duties, in connection with the transaction with the Company by, among other things, authorizing the transaction for what plaintiffs claim to be inadequate consideration and pursuant to what plaintiffs claim to be an inadequate process and with inadequate disclosures. An amended complaint was filed in July 2011 alleging the same general facts.

Confidential LGP-SBC-000002825

On December 30, 2010, another lawsuit was filed in Delaware Chancery Court by Terrier Partners and five related entities against the same defendants identified above. The complaint alleges generally that the consideration offered to shareholders in connection with the transaction with us was inadequate in light of the revenue received under AB 1383 (see California Hospital Fee Program below), and that defendants breached their fiduciary duties, or aided and abetted others' breaches of their fiduciary duties by not obtaining a higher price in light of this additional revenue.

In May 2012, the Court of Chancery granted motions to consolidate the Terrier Partners case and the class action cases, and for class certification, certifying the class as a non-opt out class. The Court also entered a schedule permitting the plaintiffs to file a new amended complaint, and on June 11, 2012, plaintiffs filed their Verified Consolidated Third Amended Class Action Complaint. On July 26, 2012, the director defendants answered the Third Amended Complaint. That same day, Prospect moved to dismiss itself as a party to the Third Amended Complaint. The Court granted the motion to dismiss the Company as a defendant, leaving only the individuals as defendants in the case.

The Court of Chancery subsequently entered into a stipulated Scheduling Order, under which trial is scheduled to commence in May 2014.

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

Seismic Standards

Our SCHS Hospitals and Alta Los Angeles Hospitals are required to comply with the Hospital Seismic Safety Act ("SB 1953"), which regulates the seismic performance of all aspects of hospital facilities in California. SB 1953 imposes near-term and long-term compliance deadlines for seismic safety assessment, submission of corrective plans, and the retrofitting or replacement of medical facilities to comply with current seismic standards. In addition to SB 1953, California's Alfred E. Alquist Hospital Facilities Seismic Safety Act (the "Alquist Act") requires that the California Building Standards Commission adopt earthquake performance categories, seismic evaluation procedures, standards and timeframes for upgrading certain facilities, and seismic retrofit building standards. These regulations require hospitals to meet seismic performance standards to ensure that they are capable of providing medical services to the public after an earthquake or other disaster. The Building Standards Commission completed its adoption of evaluation criteria and retrofit standards in 1998.

The Alquist Act requires that within three years after the Building Standards Commission had adopted evaluation criteria and retrofit standards:

- Hospitals in California must conduct seismic evaluation and submit these evaluations to the Office of Statewide Health Planning and Development ("OSHPD"), Facilities Development Division for its review and approval;

Confidential LGP-SBC-000002826

- Hospitals in California must identify the most critical nonstructural systems that represent the greatest risk of failure during an earthquake and submit timetables for upgrading these systems to the OSHPD, Facilities Development Division for its review and approval; and
- Hospitals in California must prepare a plan and compliance schedule for each regulated building demonstrating the steps a hospital will take to bring the hospital buildings into substantial compliance with the regulations and standards.

The Company was required to conduct engineering studies at its hospitals to determine whether and to what extent modifications to the hospital facilities will be required. Management believes that SCH Culver City meets all current requirements; however, it may be required to make significant capital expenditures in the future to comply with the seismic standards, which could impact its earnings. The cost at September 30, 2013, is unknown at this time but could be material. In addition, such modifications to the hospital facilities could potentially result in environmental remediation liabilities which may be material to the Company.

The OSHPD is currently implementing a new voluntary program to re-evaluate the seismic risk of hospital buildings classified as Structural Performance Category ("SPC") 1. These buildings are considered hazardous and at risk of collapse in the event of an earthquake and must be retrofitted, replaced or removed from providing acute care services by 2013. OSHPD is using HAZARDS U.S. ("HAZUS"), a state-of-the-art methodology, to reassess the seismic risk of SPC-1 buildings and those that are determined to pose a low seismic risk may be reclassified to SPC-2. The SPC-2 buildings would have until 2030 to comply with the structural seismic safety standards. Participation in the HAZUS program is optional for hospital owners wishing to have their SPC-1 building(s) re-evaluated. Applications for a HAZUS re-evaluation of the seismic risk have been submitted for SCH Hollywood, SCH Culver City and Los Angeles Community Hospital, but there is no assurance they will result in extensions. SCH Culver City has received SB 306 approval that extends to 2020 the seismic replacement or retrofit of its buildings provided SCH Culver City meets certain interim requirements by interim deadlines. However, an interim requirement for such extension, to file plans by January 1, 2013, was not be met by SCH Culver City, which could jeopardize this basis for extension, in which case SCH Culver City would have to rely on the alternative basis for extension under the HAZUS re-evaluation program, or SB90 (addressed below), if obtained. The SB 306 approval subordinates to HAZUS which, if received would give the Company an extension to 2030.

In addition, in 2011, the California Legislature enacted Senate Bill 90, which permitted some hospitals to apply for up to an additional seven year extension to the seismic retrofit deadlines, not to extend beyond January 1, 2020. SB 90 also permits OSHPD to extend until January 1, 2018 the date by which the hospitals must obtain a building permit and commence the required retrofit project. SCH Culver City and Los Angeles Community Hospitals have applied to OSHPD seeking the SB 90 extension. OSHPD has discretion to approve or disapprove such extension, and to determine the length of the extension (up to the maximum seven years), based on eligibility factors including seismic risks associated with the affected buildings (which can be impacted by the updated HAZUS findings), community access to essential hospital services in the area and financial hardships facing the applicant.

These requirements can result in significant operational changes and capital outlays. Management is continuing to assess its options and the methods of financing the required retrofits. Based on management's evaluation, the renovation needs to comply with the California seismic safety standards for its acute-care facilities, including asbestos abatement, are not estimable at this time.

Confidential LGP-SBC-000002827

Legislation and HIPAA

The healthcare industry is subject to numerous laws and regulations of federal, state and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government healthcare program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity has continued with respect to investigations and allegations concerning possible violations of fraud and abuse statutes and regulations by healthcare providers. Violations of these laws and regulations could result in expulsion from government healthcare programs together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed.

The Company believes that it is in compliance with fraud and abuse regulations as well as other applicable government laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation as well as regulatory actions unknown or unasserted at this time.

The Health Insurance Portability and Accountability Act ("HIPAA") assures health insurance portability, reduces healthcare fraud and abuse, guarantees security and privacy of health information, and enforces standards for health information. The Health Information Technology for Economic and Clinical Health Act ("HITECH Act") imposes notification requirements of certain security breaches relating to protected health information. The Company may be subject to significant fines and penalties if found not to be compliant with the provisions outlined in the regulations.

California Hospital Fee Program

The State of California enacted Assembly Bill 1383 ("AB 1383") effective January 1, 2010, as amended by Assembly Bill 1653 (collectively, the "Program"), to provide supplemental payments to certain hospitals such as the hospitals owned and operated by the Company's subsidiaries. The Program requires participating hospitals to pay fee assessments into a pool of funds to which the federal government contributes matching funds. Most of these funds, including the federal matching funds, are then distributed to qualifying hospitals. In addition, on April 13, 2011 SB 90 was signed into law and provided for a six-month extension of the Hospital Fee Program for dates of service from January 1, 2011 through June 30, 2011. CMS granted final approval of SB 90 on December 29, 2011, at which point the revenue and expense was recognized for the retroactive period. In September 2011, the State of California enacted Senate Bill 335 ("SB 335") which provides a 30-month hospital fee program for dates of service from July 1, 2011 through December 31, 2013. The elements of SB 335 related to the fee for service payments were approved by CMS on June 22, 2012. The payments due under the managed care component are scheduled to be made in three cycles. The first two cycles have been approved by CMS. Certain technical changes to the legislation required by CMS are included in Senate Bill 920.

Governor Brown signed Senate Bill 239 ("SB 239") in October 2013, which enacted a hospital fee program for the period January 1, 2014 through December 31, 2016. This program has not yet been approved by the federal government. SB 239 provides that the hospital fee program will end as of December 31, 2016, although the bill as enacted includes provisions that could lead to a hospital fee program that would be in effect indefinitely after December 31, 2016 if the provision including the termination or "sunset" date is repealed. An initiative measure has filed with the

Confidential LGP-SBC-000002828

California Attorney General to be placed on the November 2014 ballot (assuming an adequate number of signatures are obtained) that would repeal the SB 239 sunset date.

For the years ended September 30, 2012 and 2011, SCH Culver City received invoices for fee assessments under AB 1383 and SB 90 of approximately $6,310,000 and $19,000,000, respectively, following payment of which, SCH Culver City was scheduled to receive approximately $5,236,000 and $15,000,000, respectively. Management of SCH Culver City estimated that SCH Culver City would be a "net" payer under the Program, since the fee assessments on SCH Culver City exceeded the supplemental payments by approximately $1,074,000 and $4,000,000, respectively. Accordingly, on October 6, 2010, the Company notified the California Department of Healthcare Services ("DHCS") that SCH Culver City was opting out of the Program.

SCH Culver City did not pay the required fee assessments under the Program. Beginning February 14, 2011, the DHCS began withholding against amounts otherwise due SCH Culver City, in the amount of $65,000 per week indicating that withholdings would continue for 108 weeks and would total approximately $7,000,000. Through September 30, 2012, a total of approximately $2,986,000 had been withheld against SCH Culver City's Medi-Cal fee-for-service payments. As of September 30, 2012, SCH Culver City recorded a liability of approximately $5,494,000, representing the accrued loss above, as well as deferred recognition of payments received from managed care plans. On November 15, 2012 the Company entered into a settlement agreement with DHCS with regards to SCH Culver City's liability under AB 1383, SB 90 and SB 335, as discussed above. Under the terms of the agreement, the DHCS agreed to forgive approximately $2,000,000 of the fees due under AB 1383, which was recorded by the Company during the year ended September 30, 2013. The remaining liability due to DHCS of $4,605,000 will be repaid by the Company monthly over a 10-year period without interest or penalties. The Company recorded a net liability of $3,233,000 as of the settlement date, which represents the net present value of the liability due to DHCS discounted at an effective interest rate of 7.5%. As of September 30, 2013, the unamortized balance of the liability amounted to $3,046,000. The DHCS will no longer withhold against any other amounts due to SCH Culver City unless the Company is delinquent on payments owed under the agreement.

As of September 30, 2013 and 2012, the Company had approximately $18,895,000 and $33,473,000 of amounts reflected in "hospital fee program receivable", respectively. As of September 30, 2013 and 2012, the Company had approximately $8,609,000 and $19,777,000, of amounts reflected in "hospital fee program liability", respectively, on the accompanying consolidated balance sheets.

Total California Hospital Fee program revenues and expenses recognized during the years ended September 30, 2013 and 2012 were as follows (in thousands):

Year Ended September 30,	**2013**	2012
Hospital services revenues	$ **63,371**	$ 95,871
Hospital operating expenses	**37,925**	63,774
Net pre-tax impact	$ **25,446**	$ 32,097

Confidential

Collective Bargaining Agreements

A small group of employees at SCH Hollywood, which is one of the hospitals under the consolidated group of Alta Hospitals System, LLC, and Service Employees International Union, United Healthcare Workers-West ("SEIU") are currently parties to collective bargaining agreement with a termination date of May 3, 2015. In addition, approximately 77% of the employees of SCH Culver City are part of a collective bargaining agreement with the SEIU or the California Nurses Association ("CNA"). SCH Culver City and CNA are currently parties to a collective bargaining agreement that expires on December 21, 2015. The collective bargaining agreement between SEIU and SCH Culver City expired on September 30, 2013. The parties are currently in good faith bargaining negotiations.

Tangible Net Equity ("TNE") requirement

The Company's affiliated physician organizations must comply with a minimum working capital requirement, Tangible Net Equity ("TNE") requirement, cash-to-claims ratio and claims payment requirements prescribed by the California Department of Managed Health Care. TNE is defined as net assets, less intangibles and amounts due from affiliates, plus subordinated obligations. At September 30, 2013, the Company and the affiliated physician organizations were in compliance with these regulatory requirements.

Employee Health Plans

During the fiscal year ended September 30, 2012 the Company (except for SCH Culver City and Nix Health) was fully insured for its HMO and PPO plans to employees. For the fully insured groups, health benefits were administered by a commercial insurance carrier, based on plan coverage and eligibility guidelines determined by the Company. The insurance policies had guaranteed cost and the Medical Group and Corporate segment incurred no claim liability if terminated. SCH Culver City and Nix were self-insured for their EPO/HMO and PPO plans and an actuarially estimated liability of approximately $838,000 ($552,000 for Brotman only) for incurred but not reported claims was included in accrued salaries, wages, and benefits as of September 30, 2012.

Effective January 1, 2013 the Company offers self-insured EPO/HMO and PPO plans to all eligible employees. Employee health benefits are administered by a third party claims administrator, based on plan coverage and eligibility guidelines determined by the Company, as well as by collective bargaining agreements (as reflected above). A commercial insurance policy covers losses in excess of $250,000 per occurrence (for the Medical Group and Corporate segments, this figure is $100,000). An actuarially estimated liability of approximately $1,788,000 for incurred but not reported claims has been included in accrued salaries, wages, and benefits as of September 30, 2013.

Provider Contracts

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

Confidential LGP-SBC-000002830

Acquisition of CharterCARE, Inc.

On September 24, 2013, the Company entered into an Asset Purchase Agreement pursuant to which, the Company's newly formed subsidiary, Prospect CharterCare, LLC (the "New Company") agreed to acquire substantially all of the assets of CharterCARE Health Partners ("CharterCARE") and its subsidiaries in exchange for a 15% interest in the New Company, $45 million in cash and the commitment to invest at least $50 million in the New Company for capital improvements over four years. CharterCare through its subsidiaries owns and operates Roger Williams Medical Center, St. Joseph Health Services of Rhode Island, and Elmhurst Extended Care, which operate hospitals, medical centers and assisted living facilities located in Rhode Island with approximately 579 licensed beds. The closing of this acquisition is subject to certain regulatory approvals and is expected to be consummated in the second or third quarter of 2014. Following the closing, the assets of the New Company will be pledged as collateral for the Company's obligations under the PMH 2019 Notes and the PMH Senior Secured Credit Facility. Results of operations for CharterCARE will be included in the Company consolidated financial statements from the date of acquisition.

11. Defined Contribution Plans

The Company sponsors defined contribution plans covering substantially all employees who meet certain eligibility requirements. Under these plans, employees can contribute up to 100% of their compensation up to the IRS deferred annual maximum. There is currently no company match offered under any of the plans, except for Nix, for which the expense for the employer match was $463,000 for the year ended September 30, 2013, and $215,000 from February 1, 2012 (date of acquisition) to September 30, 2012. Total expenses under the plans were approximately $87,000 and $92,000 during the years ended September 30, 2013 and 2012, respectively.

12. Accrued Medical Claims and Other Healthcare Costs Payable

The following table presents the roll-forward of incurred but not reported ("IBNR"), claims reserves as of and for each of the fiscal years ended September 30, 2013 and 2012 (in thousands):

September 30,	**2013**	2012
IBNR as of beginning of year	**$ 26,985**	$ 23,301
Medical group claim expenses incurred during the year:		
Related to current year	**128,747**	109,494
Related to prior year	**(3,646)**	(2,821)
Total incurred	**125,101**	106,673
Medical group claims paid during the year:		
Related to current year	**(100,301)**	(83,608)
Related to prior year	**(21,433)**	(19,381)
Total paid	**(121,734)**	(102,989)
IBNR as of end of year	**$ 30,352**	$ 26,985

Confidential LGP-SBC-000002831

Following is a table showing the details of the medical group cost of revenues per the consolidated statements of operations (in thousands):

Years Ended September 30,	**2013**	2012
Capitation expense	$ **76,918**	$ 74,457
Fee-for-service claims expense	**82,846**	76,340
Other physician compensation	**3,993**	5,738
Other cost of revenues	**700**	1,777
Total cost of revenues	$ **164,457**	$ 158,312

13. Joint Venture

The Company (through Prospect Medical Group, Inc.) and an unrelated third party, AMVI Care Health Network, Inc. ("AMVI") are partners in a joint venture initially formed to service Medi-Cal (Medi-Cal is the California Medicaid program) members under the CalOptima program in Orange County, California. Healthy Families and OneCare members were subsequently added to the joint venture arrangement. Effective January 1, 2013, all Healthy Family participants were transferred to the Company's Medi-Cal line of business and therefore no longer part of the joint venture. The Company does not consolidate the joint venture. The Company includes in its consolidated financial statements only the net results attributable to those enrollees specifically identified as assigned to it, together with the management fee that it charges the joint venture partner for managing those enrollees specifically assigned to AMVI. Costs incurred by the Company in managing the joint venture are included in general and administrative expenses in the accompanying consolidated financial statements. As of September 30, 2013 and 2012, the net liability balances of the Company investment in the joint venture under the equity method were approximately $2,000,000 and $758,000, respectively, and were included in accounts payable and other accrued liabilities in the accompanying consolidated financial statements.

Confidential LGP-SBC-000002832

Summarized unaudited financial information for the unconsolidated joint venture as of and for each of the years ended September 30, 2013 and 2012 is as follows (in thousands):

September 30,	2013	2012
Cash	$ 742	$ 663
Receivables	2,037	1,791
Total assets	$ 2,779	$ 2,454
Accrued medical claims	$ 1,556	$ 1,100
Other payables	34	48
Other partner's capital	1,188	1,305
Prospect's capital	1	1
Total liabilities and partners' capital	$ 2,779	$ 2,454

Years Ended September 30,	2013	2012
Revenues	$ 16,307	$ 13,695
Income before income taxes	$ 2,206	$ 2,063
Prospect's equity income	$ 2,150	$ 2,606
Management fees earned by Prospect	$ 1,016	$ 826

14. Segment Information

The Company's operations are organized into three reporting segments: (i) Hospital Services — which is comprised of the Alta Hospitals, SCHS Culver City and Nix Health reporting units, owns and operates eight hospitals — SCH Hollywood, SCH Van Nuys, SCH Culver City, Los Angeles Community Hospital, Norwalk Community Hospital, Nix Medical Center, Nix Specialty Health Center and Nix CGH; (ii) Medical Group — which is comprised of the Prospect and ProMed reporting units, provides management services to affiliated physician organizations that operate as independent physician associations or medical practice groups and certain unaffiliated independent physician associations; and (iii) Corporate, which represents expenses incurred in Prospect Medical Holdings, Inc., that were not allocated to the other reporting segments.

The accounting policies of the reporting segments are the same as those described in the summary of significant accounting policies (see Note 2). The Company evaluates financial performance and allocates resources primarily based on earnings from operations before interest expense, interest income, income taxes, depreciation and amortization, as well as income or loss from operations before income taxes, excluding infrequent or unusual items.

The reporting segments are strategic business units that offer different services within the healthcare industry. Business in each reporting segment is conducted by one or more direct or indirect wholly-owned subsidiaries of the Company and certain affiliated physician organizations

Confidential LGP-SBC-000002833

controlled through assignable option agreements and management services agreements. The Company voluntarily discloses the following table which summarizes certain information for each of the reporting segments regularly provided to and reviewed by the chief operating decision maker (in thousands):

	As of and for the Year Ended September 30, 2013				
	Hospital Services *(3)*	Medical Group *(2)*	Corporate *(1)*	Intersegment Eliminations	Consolidated

(1) Prospect files consolidated tax returns (effective February 1, 2012, including SCH Culver City) and allocates costs for shared services and corporate overhead to each of the reporting segments. With the exception of SCH Culver City (2012 only) and Nix Health, all

Confidential LGP-SBC-000002834

debt, including debt related to the Medical Group and Hospital Services segment, is recorded at the Parent Entity level. The Company does not allocate interest expense related to acquisition debt to the operating segments.

(2) Prospect Medical Group, Inc. (which serves as a holding company for the other affiliated physician organizations) files consolidated tax returns. The Medical Group segment includes the results for NGMA from October 1, 2012 (acquisition date) through September 30, 2013.

(3) The Hospital Services segment includes the results for Nix Health from February 1, 2012 (acquisition date) through September 30, 2013, and the results for Nix CGH from April 16, 2013 (acquisition date) through September 30, 2013. Included in revenues from external customers are $7,700,000 and $9,897,000 of other revenues related primarily to meaningful use incentive payments and rental revenue from operating leases for the years ended September 30, 2013 and 2012, respectively.

15. Subsequent Events (Unaudited)

The Company has evaluated subsequent events through December 17, 2013, the date the Company's consolidated financial statements were available for issuance.

Prospect Health Plan

On March 18, 2013, the Company incorporated Prospect Health Plan, Inc. ("PHP"), a Delaware corporation and a wholly owned indirect subsidiary of Prospect. On May 1, 2013, PHP filed a currently pending application with the California Department of Managed Health Care to operate as a Knox-Keene Health Care Service Plan for the purpose of managing "plan-to-plan" contracts with the fully licensed Medicare Advantage health plans.

Acquisition of Pacific Health Corporation hospitals

On November 21, 2013, the Company entered into an Asset Purchase Agreements to acquire substantially all of the assets of three Southern California hospitals owned by Pacific Health Corporation: Newport Specialty Hospital, Bellflower Medical Center, and L.A. Metropolitan Medical Center, for an aggregate purchase price of $55 million ($30 million, $13 million and $12 million, respectively). Newport Specialty Hospital is a 135-bed long term acute care and 42-bed pediatric subacute hospital located in Tustin, California. Bellflower Medical Center is a 144 bed acute care hospital located in Bellflower, California, offering comprehensive healthcare services with medical staff of more than 250 physicians from over 15 specialties. L.A. Metropolitan Medical Center is an acute care hospital located in Los Angeles, California. Newport Specialty Hospital is currently only operating its pediatric subacute unit and Bellflower Medical Center and L.A. Metropolitan Medical Center are closed facilities. The closing of this acquisition is subject to certain regulatory approvals and is expected to be consummated in the second or third quarter of fiscal 2014. Following the closing, the assets of the three hospitals will be pledged as collateral for the Company's obligations under the PMH 2019 Notes and the PMH Senior Secured Credit Facility. Results of operations for the three acquired hospitals will be included in the Company consolidated financial statements from the date of acquisition.

Acquisition of Chaparral Medical Group, Inc.

On December __, 2013, the Company through its NGMA subsidiary, entered into a stock purchase agreement (the "CMG Purchase Agreement") with Chaparral Medical Group, Inc. ("CMG"), a California medical corporation, and two of its largest shareholders to acquire 13,588 shares of the

Confidential LGP-SBC-000002835

acquired company for consideration composed of $1,100,000 in cash at the closing, $700,000 in future cash consideration to be used for the acquired company's general corporate purposes, and 3,750 shares of Ivy Holdings common stock issued at closing to the selling shareholders. After payment of the entire compensation, including the future cash consideration, Prospect will own 17.29% of the stock of CMG. The closing is conditioned upon the delivery of executed copies of certain ancillary documents and it is expected to occur during December 2013.

Pursuant to the terms of the stock purchase agreement, Prospect also has the right and option to make additional stock investments at the same share valuations and prices and upon the same applicable terms and conditions as the initially acquired shares, to bring its aggregate ownership to up to 50%.

Effective November 3, 2011, the Promed Entities entered into an Exclusivity and Non - Solicitation Agreement with CMG and certain of its physicians (the "CMG Exclusivity Agreement") in exchange for the payment of $1,000,000 divided among CMG and the exclusive physicians. On December _____, 2013, concurrently with the execution of the CMG Purchase Agreement, the CMG Exclusivity Agreement was amended and its exclusivity terms were extended through December 31, 2018 in exchange for the payment of an additional $300,000 (out of the $1,100,000 closing payment described above) divided among the exclusive physicians.

Chaparral Medical Group is a well-established 60 physician multi-specialty group serving communities primarily in the Los Angeles and San Bernardino counties since 1978.

Repurchase of Nuestra shares

On October 7, 2013, Nuestra repurchased 109 shares from a physician shareholder that left Nuestra's group medical practice. In accordance with Nuestra's Agreement Concerning Shares of the Company, dated September 19, 1995, the repurchase price was $17,824. The repurchase increased the share percentage holdings of all remaining shareholders and Prospect's percentage rose to 66.95% as of October 7, 2013.

Independent Auditors' Report

Board of Directors
Prospect Medical Holdings, Inc.
Los Angeles, California

We have audited the accompanying consolidated balance sheets of Prospect Medical Holdings, Inc. (the "Company") as of September 30, 2012 and 2011 and the related consolidated statements of operations, stockholder's equity, and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Prospect Medical Holdings, Inc. at September 30, 2012 and 2011, and the consolidated results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

BDO USA, LLP

December 17, 2012

BDO USA, LLP, a Delaware limited liability partnership, is the U.S. member of BDO International Limited, a UK company limited by guarantee, and forms part of the international BDO network of independent member firms.

BDO is the brand name for the BDO network and for each of the BDO Member Firms.

Confidential LGP-SBC-000001060

1. Organization

Prospect Medical Holdings, Inc. ("Prospect," the "Company" or the "Parent Entity") is a Delaware corporation and a wholly owned indirect subsidiary of Ivy Holdings Inc. The Company's operations are organized into three primary reportable segments: Hospital Services, Medical Group and Corporate, as discussed below.

Hospital Services Segment

Alta Hospitals System, LLC, a California limited liability company ("Alta"), Brotman Medical Center, Inc., a California corporation ("Brotman") and Nix Hospitals System, LLC, a Texas limited liability company, dba Nix Health Care System (collectively, the "Hospital Services segment") own and operate seven acute care and behavioral hospitals in Southern California and San Antonio, Texas, with a total of 1,056 licensed beds, and a network of 18 specialty and primary care clinics. Alta owns (i) Alta Hollywood Hospitals, Inc., a California corporation, dba Hollywood Community Hospital and dba Van Nuys Community Hospital; and (ii) Alta Los Angeles Hospitals, Inc., a California corporation, dba Los Angeles Community Hospital and dba Norwalk Community Hospital. From April 2009 to April 2012 the Company gradually increased its ownership in Brotman from 33% to 100%. Brotman owns and operates Brotman Medical Center, located in Culver City, California. On February 1, 2012 the Company acquired substantially all of the assets of MHS San Antonio, LLC (dba Nix Health Care System) located in San Antonio, Texas which is operated under the following subsidiaries: Nix Hospitals System, LLC, Nix Services, LLC, and Nix SPE, LLC (collectively "Nix Health").

The Company's three community hospitals in Hollywood, Los Angeles and Norwalk offer a comprehensive range of medical and surgical services, including general acute care hospital services, pediatrics, obstetrics and gynecology, pediatric sub-acute care, general surgery, medical-surgical services, orthopedic surgery, and diagnostic, outpatient, skilled nursing and urgent care services. The Company's psychiatric hospital in Van Nuys provides acute inpatient and outpatient psychiatric services on a voluntary basis. Brotman offers a comprehensive range of inpatient and outpatient services, including general surgery, orthopedic, spine and neurosurgery, cardiology, diagnostic outpatient, rehabilitation, psychiatric and detox services. In addition, Brotman has an active emergency room that plays an integral part in providing emergency services to the West Los Angeles area. Nix Health provides comprehensive service offerings at various locations throughout San Antonio, Texas. These locations include Nix Medical Center, which provides inpatient acute care and geriatric psychiatry services and Nix Specialty Health Center, which provides a full range of behavioral health and rehabilitation services for children, adolescents, and adults, and a range of health clinics and provider based clinics throughout San Antonio.

Admitting physicians are primarily practitioners in the local area. The hospitals have payment arrangements with Medicare, Medicaid (Medi-Cal in California) and other third party payers, including some commercial insurance carriers, health maintenance organizations ("HMOs") and preferred provider organizations ("PPOs").

Medical Group Segment

The Medical Group segment is a healthcare management services organization that provides management services to affiliated physician organizations that operate as independent physician associations ("Medical Groups"). The affiliated physician organizations enter into agreements with

Confidential LGP-SBC-000001061

HMOs to provide HMO enrollees with a full range of medical services in exchange for fixed, prepaid monthly fees known as "capitation" payments. The Medical Groups contract with physicians (primary care and specialist) and other healthcare providers to provide enrollees with all medical services. Prospect currently manages the provision of prepaid healthcare services for its affiliated physician organizations in Southern California. The network consists of the following physician organizations as of September 30, 2012 (stand alone or individually referred to as, an "Affiliate"):

Prospect Medical Group, Inc. ("PMG")
Prospect Health Source Medical Group, Inc. ("PHS")
Prospect Professional Care Medical Group, Inc. ("PPCM")
Genesis HealthCare of Southern California, Inc. ("Genesis")
Prospect NWOC Medical Group, Inc. ("PNW")
StarCare Medical Group, Inc. ("PSC")
AMVI/Prospect Medical Group ("AMVI/Prospect")
Nuestra Familia Medical Group, Inc. ("Nuestra")
Upland Medical Group, a Professional Medical Group ("UMG")*
Pomona Valley Medical Group, Inc. ("PVMG")*

* PVMG and UMG are collectively referred to as the "ProMed Entities."

These Affiliates are managed by the following two medical management company subsidiaries that are wholly-owned by Prospect:

Prospect Medical Systems, Inc. ("PMS")
ProMed Healthcare Administrators ("PHCA")

All of the Affiliates are wholly-owned by PMG, with the exception of Nuestra, which is 62% owned by PMG, and AMVI/Prospect which is a 50/50 Joint Venture between AMVI Care Health Network, Inc. ("AMVI") and PMG. PMG is owned by a nominee physician shareholder pursuant to an assignable option agreement described below. The operations of all of these entities, with the exception of AMVI/Prospect, are consolidated in the accompanying consolidated financial statements.

The AMVI Joint Venture was formed for the sole purpose of combining enrollment in order to meet minimum enrollment levels required for participation in the CalOptima Medicaid (Medi-Cal in California) program in Orange County, California. The joint venture ownership is set at 50/50 to prevent either party from exerting control over the other; however, AMVI's and PMG's businesses are operated autonomously, and enrollees, financial results and cash flows are each separately tracked and recorded. In accordance with the joint venture partnership agreement, profits and losses are not split in accordance with the partnership ownership interest, but rather, are directly tied to the results generated by each separate portion of the business. Separate from any earnings the Company generates from PMG's portion of business within the joint venture, the Company also earns fees for management services PMS provides to PMG's partner in the joint venture. The Company accounts for PMG's interest in the joint venture partnership using the equity method of accounting. The Company includes in the consolidated financial statements only the net results attributable to those enrollees specifically identified as assigned to the Company, together with the management fee that PMS charges for managing those enrollees specifically assigned to the other joint venture partner.

Confidential LGP-SBC-000001062

PMS has entered into an assignable option agreement with PMG and the nominee physician shareholder of PMG. Under the assignable option agreement, Prospect has an assignable option, obtained for a nominal amount from PMG and the nominee shareholder to designate the purchaser (successor physician) for all or part of PMG's issued and outstanding stock held by the nominee physician shareholder (the "Stock Option") in its sole discretion. The Company may also assign the assignable option agreement to any person. The assignable option agreement has an initial term of 30 years and is automatically extended for additional terms of 10 years each, as long as the term of the related management services agreement described below (the "Management Agreement") is automatically extended. Upon termination of the Management Agreement with PMG, the related Stock Option would be automatically and immediately exercised. The Stock Option may be exercised for a purchase price of $1,000. Under these nominee shareholder agreements, Prospect has the unilateral right to establish or effect a change of the nominee, at will, and without the consent of the nominee, on an unlimited basis and at nominal cost throughout the term of the Management Agreement. In addition to the Management Agreement with PMG, Prospect, through one of its management company subsidiaries, has a management agreement with each Affiliate. The term of the Management Agreements is generally 30 years. PMG is the sole shareholder of PHS, PPCM, PNW, PSC, Genesis, PVMG, and UMG. PMG holds a 62% interest in Nuestra.

The Company's Affiliates have each entered into a Management Agreement and each Affiliate has agreed to pay a management fee to PMS or PHCA, as applicable (each of which is a wholly-owned subsidiary of Prospect). The fee is based in part on the costs to the management company and on a percentage of revenues the Affiliate receives (i) for the performance of medical services by the Affiliate's employees and independent contractor physicians and physician extenders, (ii) for all other services performed by the Affiliates, and (iii) as proceeds from the sale of assets or the merger or other business combination of the Affiliates. The management fee also includes a fixed percentage fee for marketing and public relations services. The revenue from which this fee is determined includes medical capitation, all sums earned from participation in any risk pools and all fee-for-service revenue earned. Except in the case of Nuestra and AMVI/Prospect, the Management Agreements have initial terms of 30 years, renewable for successive 10-year periods thereafter, unless terminated by either party for cause. In the case of Nuestra, its Management Agreement has an initial 10 year term renewable for successive one year terms. In the case of AMVI/Prospect, the Management Agreement has a one year term with successive one year renewal terms. In return for payment of the management fee, Prospect (through PMS and PHCA) has agreed to provide financial management, information systems, marketing, advertising, public relations, risk management, and administrative support, including for utilization review and quality of care. At its cost, Prospect has assumed the obligations for all facilities, medical and non-medical supplies, and employment of non-physician personnel of its affiliated medical clinics.

The management fee earned by Prospect fluctuates based on the profitability of each wholly-owned Affiliate. Prospect is allocated a 50% residual interest in any profits after the first 8% of the profits. The remaining balance is retained by the Affiliates.

The Management Agreements are not terminable by the Affiliates except in the case of gross negligence, fraud or other illegal acts of Prospect, or bankruptcy of the Company.

Further, Prospect's rights under the Management Agreements are unilaterally saleable or transferable. Based on the provisions of the Management Agreements and the assignable option agreement with PMG, Prospect has determined that it has a controlling financial interest in the Affiliates, with the exception of AMVI/Prospect. Consequently, under applicable accounting principles, Prospect consolidates the revenues and expenses of all the Affiliates except

AMVI/Prospect from the respective dates of execution of the Management Agreements. All significant inter-entity balances have been eliminated in consolidation. In the case of AMVI/Prospect, only that portion of the results which are contractually identified as Prospect's are recognized in the consolidated financial statements, together with the management fee that the Company charges AMVI for managing AMVI's share of the joint venture operations.

Prospect has also entered into management agreements with unaffiliated third parties to manage services to their HMO enrollees. These management agreements do not have characteristics that give rise to the consolidation of the entities under current accounting literature.

The affiliated physician organizations provided medical services to a combined total of approximately 184,700 and 179,900 HMO enrollees as of September 30, 2012 and 2011, respectively. The enrollees include approximately 34,100 and 28,300 enrollees that the Company manages for the economic benefit of four independent third parties, and for which the Company earns management fee income as of September 30, 2012 and 2011, respectively. The total paid member months including managed enrollees, for the fiscal years ended September 30, 2012 and 2011 was 2,187,000 and 2,116,000, respectively.

Corporate Segment

The Corporate segment reflects certain expenses incurred at the Parent Entity not specifically allocable to the Hospital Services or Medical Group segments. These include, but are not limited to: salaries, benefits and other compensation for corporate employees: financing expenses; insurance expenses; rent; legal fees; accounting fees; and Securities and Exchange Commission ("SEC") and Sarbanes-Oxley compliance costs through July 2011 only. In July 2011, the Company obtained consent from a majority of the bondholders and ceased being an SEC registrant and reporting company. The Company does not allocate interest expense related to acquisition debt or income taxes to the other reporting segments.

2. Significant Accounting Policies

Basis of Presentation

The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") and include the accounts of all controlled subsidiaries, which control is effectuated through ownership of voting common stock or by other means, but do not include the accounts of the parent companies, Ivy Holdings Inc. and Ivy Intermediate Holding Inc. The Medical Group entities (subsidiaries) have been determined to be variable interest entities due to the existence of a call option under which the Company has the ability to require the holders of all of the voting common stock of the underlying subsidiaries to sell their shares at a fixed nominal price ($1,000) to another designated physician chosen by the Company. This call option agreement represents rights provided through a variable interest other than the equity interest itself that caps the returns that could be earned by the equity holders. In addition, the Company has a management agreement with the subsidiaries and the holders of the voting common stock of the subsidiaries which allows the Company to direct all of the activities of the subsidiaries, retain all of the economic benefits and assume all of the risks associated with ownership of the subsidiaries. In this manner, the Company has all of the economic benefits and risks associated with the subsidiaries but has disproportionately few voting rights (based on the terms of the equity). As the Company retains all of the economic benefits and assumes all of the risks associated with ownership of the subsidiaries, the Company is considered

to be the primary beneficiary of the activities of the subsidiaries and therefore must consolidate the underlying subsidiaries. Operating results for Nix Health are consolidated with the Company's financial statements effective February 1, 2012 (Note 5). All significant intercompany balances and transactions have been eliminated in consolidation.

Revenues

Revenues by reportable segment are comprised of the following amounts (in thousands):

For the Years Ended September 30,	**2012 (a)**	2011
Net Hospital Services		
Inpatient	**$ 392,756**	$ 299,659
Outpatient	**43,702**	23,929
Capitation	**35,767**	22,769
Other	**5,177**	605
Total net Hospital Services revenues	**477,402**	346,962
Medical Group		
Capitation	**199,415**	194,928
Management fees	**2,334**	1,627
Other	**2,057**	2,920
Total Medical Group revenues	**203,806**	199,475
Other revenues	**9,897**	-
Total net revenues	**$ 691,105**	$ 546,437

(a) Nix Health revenues have been included in the accompanying consolidated financial statements for the period from acquisition of Nix Health, February 1, 2012 through September 30, 2012.

Hospital Services Segment

Net Patient Service Revenues

Operating revenue of the Hospital Services segment consists primarily of net patient service revenue. The Company reports net patient service revenue at the estimated net realizable amounts from patients and third-party payers and others in the period in which services are rendered. The Company has agreements with third-party payers, including Medicare, Medicaid (Medi-Cal in California), managed care and other insurance programs that are paid at negotiated rates. These payment arrangements include prospectively determined rates per discharge, reimbursed costs, discounted charges and per diem payments, as further described below. Estimates of contractual allowances are based upon the payment terms specified in the related contractual agreements. The Company accrues for amounts that it believes may ultimately be due to or from the third-party payers. Normal estimation differences between final settlements and amounts accrued in previous years are reported as changes in estimates in the current year.

Confidential LGP-SBC-000001065

Outstanding receivables, net of allowances for contractual discounts and bad debts, are included in patient accounts receivable in the accompanying consolidated balance sheets.

A summary of the payment arrangements with major third-party payers follows:

Medicare: Medicare is a federal program that provides certain hospital and medical insurance benefits to persons aged 65 and over, some disabled persons with end-stage renal disease and certain other beneficiary categories. Inpatient services rendered to Medicare program beneficiaries are paid at prospectively determined rates per discharge, according to a patient classification system based on clinical, diagnostic, and other factors. Outpatient services are paid based on a blend of prospectively determined rates and cost-reimbursed methodologies. The Company is also reimbursed for various disproportionate share and Medicare bad debt components at tentative rates, with final settlement determined after submission of the annual Medicare cost report and audit thereof by the Medicare fiscal intermediary. Normal estimation differences between filed settlements and amounts accrued are reflected in net patient service revenue.

Cost report settlement estimates are recorded based upon as-filed cost reports and are usually not adjusted until a final Notice of Program Reimbursement ("NPR") is issued. Due to litigation in class action suits over the determination of the Supplemental Security Income ("SSI") percentage which affects the disproportionate share reimbursement, the Centers for Medicare and Medicaid Services ("CMS") suspended issuing any NPRs for 2007 cost reporting years and forward. On March 16, 2012, CMS began issuing updated SSI ratios for 2006 through 2009, and on October 17, 2012, CMS issued updated SSI ratios for 2010. To date, the Company has received final NPRs for 2006 and 2007 for Alta but has not yet received final NPRs for Brotman or Nix Health for any of these years. The issuance of final NPRs could result in changes to existing cost reporting estimates and these changes could be material to the consolidated financial statements of the Company. Accordingly the Company updated its estimates relating to open cost reporting of prior years using the revised SSI ratios and recorded a liability of $3,562,000 during the year ended September 30, 2012. Additionally, the Company joined a second round of litigation relating to Medicare's recent settlement with providers relating to the manner in which CMS handled the budget neutrality adjustment associated with the rural floor wage index in setting the Medicare inpatient prospective system rates ("Rural Floor"). The Company has not yet recorded any settlement revenue relating to the Rural Floor litigation.

Medicaid/Medi-Cal: Medicaid is a joint federal-state funded healthcare benefit program that is administered by states to provide benefits to qualifying individuals who are unable to afford care. The Company receives reimbursements under the Medicaid program at prospectively determined rates for both inpatient and outpatient services. Medi-Cal is the version of the federal Medicaid program that is applicable to California residents. Inpatient services rendered to Medi-Cal program beneficiaries in California are paid at contracted per diem rates. The per diem rates are not subject to retrospective adjustment. Outpatient services are paid based on prospectively determined rates per procedure provided. The Alta hospitals are eligible to participate in the State of California Medi-Cal Disproportionate Share ("DSH") programs, under which medical facilities that serve a disproportionate number of low-income patients receive additional reimbursements. Eligibility is determined annually based on prescribed guidelines. The Company accrues a receivable each month based on the expected total annual DSH payments. Differences between the estimated and the actual award are recorded in the period they become known. DSH amounts are subject

to retrospective revision prior to finalization and such revisions could lead to material retractions. The Company records retrospective retractions when they are estimable and probable. Retrospective additional DSH revenues are recorded as a gain contingency when received. The Medi-Cal DSH receivable as of September 30, 2012 and 2011 totaled approximately $3,690,000 and $3,636,000, net, respectively, and were included in due from government program payors in the accompanying consolidated balance sheets. For fiscal years ended September 30, 2012 and 2011, total Medi-Cal DSH payments received by Alta hospitals were approximately $11,758,000 and $10,487,000, respectively, and total Medi-Cal DSH revenues recorded were approximately $9,151,000 and $9,908,000, respectively. Additionally, pursuant to an audit of Medi-Cal cost reports and notification sent to the Company, the Company accrued a cost report liability payable to Medi-Cal of $1,294,000 during the year ended September 30, 2011. The liability is due to the State's determination that ancillary services of administrative days were paid at a higher percent of charges than is allowable.

During the fourth quarter of fiscal 2011, the Company's Alta Hospitals received notification that the DSH amounts received related to the State fiscal year 2009-2010 were being re-examined and that the DSH amounts to be received for State fiscal years 2010-2011 and 2011-2012 would be significantly reduced. The notification was the result of legislation that extended payments under Senate Bill 90 ("SB 90"). During the years ended September 30, 2012 and 2011, the Company recorded $2,700,000 and $5,800,000 reductions, respectively, in Medi-Cal DSH revenue related to this matter.

In Texas, the Medicaid program reimburses under prospectively determined rates for both inpatient and outpatient services. Medicaid reimbursement may be subject to periodic adjustment, as well as to changes in existing payment levels and rates, based on the amount of funding available to the Medicaid program. Nix Health has also been receiving payments from Texas Health and Human Services Commission under the section 1115 waiver that was recently granted to the state of Texas by CMS. Under the first year of the waiver ending September 30, 2012, a transition payment was paid to Nix Health based upon prior levels of payment under the "Upper Payment Limit" ("UPL") program, which the waiver replaced. Nix Health recorded $13,298,000 in revenue and $7,658,000 in associated cost during the period from February 1, 2012 (acquisition date) through September 30, 2012. These payments are subject to audit by Texas Health and Human Services. At September 30, 2012 accrued revenue under the section 1115 waiver amounted to $4,987,000 and accrued costs amounted to $1,889,000, respectively.

Managed Care: The Company has also entered into payment agreements with certain commercial insurance carriers, HMOs, and PPOs. The basis for payment under these agreements is in accordance with negotiated contracted rates or at our standard charges for services provided. Most of these payments are capitated, meaning that the Company receives an agreed amount per patient for providing an agreed range of services.

Self-Pay: Self-pay patients represent those patients who do not have health insurance and are not covered by some other form of third party arrangement. Such patients are evaluated, at the time of services or shortly thereafter, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid, as well as the Company's local hospital's indigent and charity care policy.

See "Concentrations of Credit Risks" below for discussion of revenues received from the Medicare and Medicaid programs.

Similar to other hospital operators, the Company is currently undergoing audits under the Recovery Audit Contractor ("RAC") program. As of September 30, 2012 and 2011 the Company had accrued $662,000 and $0, respectively, related to such liabilities.

Brotman Outlier Liability

Following the acquisition of a majority stake in Brotman, effective April 14, 2009, the Company consolidated Brotman's estimated liability to CMS arising out of outlier payments received for services provided by Brotman to Medicare eligible inpatients, primarily for the last four months of calendar year 2005 and all of calendar year 2006.

While Brotman reports financial statements on a fiscal year ending September 30, Medicare cost reports are filed on a calendar year basis. Acute care hospitals receive Medicare reimbursement payments pursuant to a prospective payment methodology primarily based on the diagnosis of the patient, but are entitled to receive additional payments, referred to as "outliers" for patients whose treatment is very costly. When Brotman acquired the hospital in 2005, CMS provided a ratio of cost to charges (the "RCC") based on the statewide average. Payments received by Brotman on this basis were an interim estimate, subject to final determination upon auditing of Brotman's cost reports. Brotman filed its Medicare cost reports, but determined that its outlier reimbursement for services provided in fiscal years 2005, 2006 and part of 2007 might be subject to adjustment based on certain outlier reconciliation rules. On October 12, 2012, Brotman received from its Medicare contractor a proposed outlier adjustment for Medicare fiscal year 2006 in the amount of $12,785,000. Brotman had previously been notified of an adjustment of $2,149,000 for 2005. As of September 30, 2012, the Company has accrued $13,834,000 of the estimated $14,934,000 liability to CMS included in the accompanying consolidated balance sheets. The difference between the $14,934,000 asserted by CMS and the $13,834,000 accrued by the Company relates to accrued interest of approximately $1,100,000, an amount with which the Company did not agree. Accordingly, in accordance with relevant literature related to accounting for contingencies, the Company has recorded to the lower end of the range. The Company has advised the Medicare contractor of this difference as well as the Chapter 11 bankruptcy bar date and other factors which the Company asserts impact this matter. The ultimate resolution of this item is unknown at this stage. Final adjustment will take place after the Medicare contractor issues a final notice of program reimbursement and resolution of all related uncertainties have been finalized.

The following is a summary of due from and due to governmental payers at September 30 (in thousands):

September 30,	**2012**	2011
Due from government payers:		
Medi-Cal Disproportionate Share (DSH), net	**$ 3,690**	$ 3,636
Medicare cost report settlements	**3,922**	440
Medicaid Section 1115 receivable	**4,987**	-
	$ 12,599	$ 4,076
Due to government payers:		
Outlier liability	**$ 13,834**	$ 13,834
Medicare cost report settlements	**4,613**	-
Medi-Cal cost report settlements	**1,341**	1,294
	$ 19,788	$ 15,128

The Company is not aware of any material claims, disputes, or unsettled matters with any payers that would affect revenues that have not been adequately provided for and disclosed in the accompanying consolidated financial statements.

Charity Care

The Company provides charity care to patients whose income level is below 300% of the Federal Poverty Level. Patients with income levels between 300% and 350% of the Federal Poverty Level qualify to pay a discounted rate under the requirements of California State Assembly Bill 774 (AB 774) based on various government program reimbursement levels. Patients without insurance are offered assistance in applying for Medicaid and other programs they may be eligible for, such as state disability. Patient advocates from the Company's Medical Eligibility Program ("MEP") screen patients in the Hospital and determine potential linkage to financial assistance programs. They also expedite the process of applying for these government programs. The approximate cost of providing charity care was approximately $4,178,000 and $3,450,000 for the years ended September 30, 2012 and 2011, respectively. The Company has estimated the cost of charity care based on a ratio of the cost to charges of operating expenses, excluding depreciation, interest and management fees.

Provisions for Contractual Allowances and Doubtful Accounts

Collection of receivables from third-party payers and patients is the Company's primary source of cash and is critical to its operating performance. The Company closely monitors its historical collection rates, as well as changes in applicable laws, rules and regulations and contract terms, to assure that provisions for contractual allowances are made using the most accurate information available. However, due to the complexities involved in these estimations, actual payments from payers may be materially different from the amounts management estimates and records. The Company's primary collection risks relate to uninsured patients and the portion of the bill which is the patient's responsibility, primarily co-payments and deductibles. Payments for services may also be denied due to issues over patient eligibility for medical coverage, the Company's ability to demonstrate medical necessity for services rendered and payer authorization of hospitalization.

Confidential LGP-SBC-000001069

The Company estimates the provisions for doubtful accounts based on general factors such as payer mix, the age of the receivables and historical collection experience. Management routinely reviews accounts receivable balances in conjunction with these factors and other economic conditions which might ultimately affect the collectability of the patient accounts, and makes adjustments to the Company's allowances as warranted.

All of the Company's hospital facilities are subject to the Emergency Medical Treatment and Active Labor Act ("EMTALA"). This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions exists regardless of a patient's ability to pay for treatment. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay. Penalties for violations of EMTALA include civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. The Company believes that it is in compliance with all applicable laws and regulations and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing that would have a material effect on the Company's financial statements.

The provision for bad debts for the years ended September 30, 2012 and 2011 totaled $32,355,000 and $35,256,000, respectively.

Other Revenues

Other revenues consist primarily of meaningful use incentive payments and rental revenue from operating leases, and totaled $9,897,000 for the year ended September 30, 2012. There were no such revenues during the year ended September 30, 2011.

A summary of other revenues recorded during the year follows:

Meaningful Use incentives: The American Recovery and Reinvestment Act of 2009 ("ARRA") established incentive payments under the Medicare and Medicaid programs for certain professionals and hospitals that meaningfully use certified electronic health record ("EHR") technology or adopt or implement such technology. The Medicare incentive payments will be paid out to qualifying hospitals over four consecutive years on a transitional schedule. To qualify for Medicare incentives, hospitals and physicians must meet EHR "meaningful use" criteria that become more stringent over three stages that have yet to be finalized by CMS.

Medicaid programs and payment schedules vary from state to state. The Medicaid programs require hospitals to register for the program prior to 2016, to engage in efforts to adopt, implement or upgrade certified EHR technology in order to qualify for the initial year of participation, and to demonstrate meaningful use of certified EHR technology in order to qualify for payment for up to three additional years.

For the years ended September 30, 2012 (including Nix Health from February 1, 2012 (acquisition date) through September 30, 2012) and 2011, the Company recorded revenues of $8,662,000 and $0, respectively, related to the Medicare and Medicaid programs in the

Confidential LGP-SBC-000001070

consolidated statements of operations. These incentives have been recognized following the grant accounting model, recognizing income ratably over the applicable reporting period as management becomes reasonably assured of meeting the required criteria. Subsequent changes to these estimates will be recognized in the consolidated statement of operations in the period in which additional information is available. Such estimates are subject to audit by the federal government or its designee. As of September 30, 2012, there have been no notifications from Medicare or Medicaid requiring an audit.

Rental Revenue: Rental revenue from operating leases, which commenced with the Nix Health acquisition, is recorded based on the fixed, minimum required rents (base rents) per the lease agreements. Rental revenue from base rents is recorded on the straight-line method over the terms of the related lease agreements and is included in other revenue on the consolidated statements of operations. During the years ended September 30, 2012 and 2011, the Company recorded rental revenues of $1,235,000 and $0, respectively.

Medical Group Segment

Medical Group Revenues

Operating revenue of the Medical Group segment consists primarily of payments for medical services procured by the Affiliates under capitated contracts with various managed care providers including HMOs. Capitation revenue under HMO contracts is prepaid monthly to the Affiliates based on the number of enrollees electing any one of the Affiliates as their health care provider. See "Concentrations of Credit Risks" below for revenues received from the five largest contracted HMOs.

Capitation revenue (net of capitation withheld to fund risk share deficits discussed below) is recognized in the month in which the Affiliates are obligated to provide services. Minor ongoing adjustments to prior months' capitation, primarily arising from contracted HMOs' finalizing of monthly patient eligibility data for additions or subtractions of enrollees, are recognized in the month they are communicated to the Company. Additionally, Medicare pays capitation using a "Risk Adjustment model," which compensates managed care organizations and providers based on the health status (acuity) of each individual enrollee. Health plans and providers with higher acuity enrollees will receive more and those with healthier enrollees will receive less. Under Risk Adjustment, capitation is determined based on health severity, measured using patient encounter data. Capitation is paid on an interim basis based on data submitted for the enrollee for the preceding year and is adjusted in subsequent periods (generally in the Company's fourth quarter) after the final data is compiled. Positive or negative capitation adjustments are made for Medicare enrollees with conditions requiring more or less healthcare services than assumed in the interim payments. Since the Company cannot reliably predict these adjustments, periodic changes in capitation amounts earned as a result of Risk Adjustment are recognized in the year to which they relate, generally in the fourth quarter, when those changes are communicated by the health plans to the Company. The Company received and recorded as additional revenue, approximately $2,751,000 and $3,700,000, respectively, in positive capitation risk adjustments in the years ended September 30, 2012 and 2011, respectively.

HMO contracts also include provisions to share in the risk for hospitalization, whereby the Affiliate can earn additional incentive revenue or incur penalties based upon the utilization of hospital services. Typically, any shared risk deficits are not payable until and unless the Company generates future risk sharing surpluses, or if the HMO withholds a portion of the capitation revenue to fund any risk share deficits. At the termination of the HMO contract, any accumulated

Confidential LGP-SBC-000001071

risk share deficit is typically extinguished. Due to the lack of access to information necessary to estimate the related costs, shared-risk amounts receivable from the HMOs are only recorded when such amounts are known. Risk pools for the prior contract years are generally final settled in the third or fourth quarter of the following fiscal year. For the years ended September 30, 2012 and 2011, Medical Group revenues included approximately $4,245,000 and $2,471,000, respectively, of additional revenues due to favorable settlements on prior year risk-sharing arrangements. At September 30, 2012 and 2011, contingent liabilities for carry-forward risk-pool deficits expected to be forgiven, or offset against future surpluses were approximately $7,170,000 and $7,000,000, respectively, based on the available information from the health plans.

The Company also receives incentives under "pay-for-performance" programs for quality medical care based on various criteria. These incentives, which are included in other revenues, are generally recorded in the third and fourth quarters of the fiscal year and are recorded when such amounts are known. Pay-for-performance revenues recorded during the years ended September 30, 2012 and 2011, were $1,923,000 and $2,595,000, respectively.

Management fee revenue is earned in the month the services are rendered. Management fee arrangements with unaffiliated entities provide for compensation ranging from 7.5% to 12.5% of revenues. The Company also provides management services to affiliated providers whose results are consolidated in the Company's financial statements under management fee arrangements, which are generally based on a percentage of revenues and a percentage of net income or loss. Revenues and expenses relating to these inter-entity agreements have been eliminated in consolidation. Management fee revenue recorded during the years ended September 30, 2012 and 2011, were $2,334,000 and $1,627,000, respectively.

In connection with providing services to HMO enrollees, the Affiliates are responsible for the medical services their affiliated physicians provide to assigned HMO enrollees.

Medical Group Cost of Revenues

The cost of health care services consists primarily of capitation and claims payments, pharmacy costs and incentive payments to contracted providers. These costs are recognized in the period incurred, or when the services are provided. Claims costs also include an estimate of the cost of services which have been incurred but not yet reported to the Company. The estimate for accrued medical costs is based on projections of costs using historical studies of claims paid and adjusted for seasonality, utilization and cost trends. These estimates are subject to trends in loss severity and frequency. Although considerable variability is inherent in such estimates, management records its best estimate of the amount of medical claims incurred at each reporting period. Estimates are continually monitored and reviewed and, as settlements are made or estimates adjusted, differences are reflected in current operations. See Note 13 for changes in claims estimates during the years ended September 30, 2012 and 2011.

In addition to contractual reimbursements to providers, the Company also makes discretionary incentive payments to physicians, which are in large part based on the pay-for-performance and shared risk revenues and favorable senior capitation risk adjustment payments received by the Company. Since the Company records these revenues generally in the third or fourth quarter of each fiscal year when the incentives and capitation adjustments due from the health plans are known, the Company also finalizes the discretionary physician bonuses in the same periods. During the years ended September 30, 2012 and 2011, the Company recorded discretionary physician incentives expense totaling approximately $5,738,000 and $3,600,000, respectively. As of

Confidential LGP-SBC-000001072

September 30, 2012 and 2011, bonus accruals of approximately $4,011,000 and $2,208,000, respectively, were included in accounts payable and other accrued liabilities.

The Company also periodically evaluates the need to establish premium deficiency reserves for the probability that anticipated future health care costs could exceed future capitation payments from HMOs under capitated contracts and, where appropriate, records a premium deficiency reserve.

The Company, for certain matters, maintains stop loss coverage for health care costs that are in excess of set thresholds. The Company, through two of its affiliated medical groups, was in dispute with its previous stop loss carrier with respect to amounts owed on claims under the 2007-2009 policy years. In November 2012, pursuant to a settlement agreement, the previous stop loss carrier agreed to pay the Company $225,000, in exchange for a mutual release of all claims and liabilities between the parties. As a result, the Company wrote off $679,000, which has been reflected in the consolidated financial statements at September 30, 2012.

Property, Improvements and Equipment

Property, improvements and equipment are stated on the basis of cost or, in the case of acquisitions, at their acquisition date fair values. Depreciation is provided using the straight-line method over the estimated useful lives of the assets, and amortization of leasehold improvements is provided using the straight-line basis over the shorter of the remaining lease period or the estimated useful lives of the leasehold improvements. Leasehold improvements are generally depreciated over five to ten years, buildings are depreciated over 14 to 28 years, equipment is depreciated over two to five years and furniture and fixtures are depreciated over two to seven years. Equipment capitalized under capital lease obligations are amortized over the life of the lease.

As more fully described in Note 11, the Company is required to comply with certain seismic standards as required by the state of California by January 1, 2020. The useful life of buildings subject to seismic retrofit requirements may be limited if the Company does not make the necessary upgrades by the required compliance date.

Goodwill and Other Intangible Assets

Goodwill and other intangible assets totaled approximately $194,625,000 and $191,541,000, net of accumulated amortization at September 30, 2012 and 2011, respectively, and arose as a result of the ProMed, Alta, Brotman and Nix Health acquisitions (February 1, 2012). Other intangible assets include customer relationships, covenants not-to-compete, trade names, provider networks, favorable leasehold, and net physician guarantees. Goodwill represents the excess of the consideration paid and liabilities assumed over the fair value of the assets acquired, including identifiable intangible assets.

Goodwill and other intangible assets with indefinite useful lives are not amortized; rather they are reviewed annually for impairment for each reporting unit, or more frequently if impairment indicators arise. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. A two-step impairment test is used to identify potential goodwill impairment and to measure the amount of goodwill impairment loss to be recognized, if any. The Company has five operating units, consisting of Alta, Brotman, Nix Health, ProMed and Prospect (which includes all other affiliated physician organizations).

Confidential LGP-SBC-000001073

The Company tests for goodwill impairment as of September 30 each year. In evaluating whether indicators of impairment exist, the Company considers adverse changes in market value, laws and regulations, profitability, cash flows, ability to maintain enrollment and renew payer contracts at favorable terms, among other factors. The goodwill impairment test is a two-step process. The first step consists of estimating the fair value of the reporting unit based on a weighted combination of (i) the guideline company method that utilizes revenue or earnings multiples for comparable publicly-traded companies, and (ii) a discounted cash flow model that utilizes expected future cash flows, the timing of those cash flows, and a discount rate (or weighted average cost of capital, which considers the cost of equity and cost of debt financing expected by a typical market participant) representing the time value of money and the inherent risk and uncertainty of the future cash flows. If the estimated fair value of the reporting unit is less than its carrying value, a second step is performed to compute the amount of the impairment by determining the "implied fair value" of the goodwill, which is compared to its corresponding carrying value. The Company's impairment test related to ProMed and Alta goodwill at September 30, 2012 resulted in no impairment charge. The Company did not perform an impairment test related to Brotman goodwill at September 30, 2012, as this was not required under current accounting literature due to the negative carrying value of Brotman's net assets. However, accounting literature expected to be adopted by the Company effective October 1, 2012 will require performance of an impairment test, which could require an impairment of Brotman goodwill and the amount of such expected impairment could be significant to the consolidated financial statements. Given Nix Health's recent acquisition, the Company used the fair value of the purchase price for its impairment analysis and determined that there was no impairment of goodwill as of September 30, 2012.

Long-Lived Assets and Amortizable Intangibles

The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. The Company considers assets to be impaired and writes them down to fair value if estimated undiscounted cash flows associated with those assets are less than their carrying amounts. Fair value is based upon the present value of the associated cash flows. Changes in circumstances (for example, changes in laws or regulations, technological advances or changes in strategies) may also reduce the useful lives from initial estimates. Changes in planned use of intangibles may result from changes in customer base, contractual agreements, or regulatory requirements. In such circumstances, management will revise the useful life of the long-lived asset and amortize the remaining net book value over the adjusted remaining useful life. No such impairments were recorded at September 30, 2012 and 2011, respectively.

Medical Malpractice Liability Insurance

The individual physicians who contract with the Affiliates carry their own medical malpractice insurance. In the Hospital Services segment, Alta, Brotman, and Nix Health purchase professional and general liability insurance to cover medical malpractice claims under claims-made policies. Under the policies, insurance premiums cover only those claims actually reported during the policy term. Should the claims-made policy not be renewed or replaced with equivalent insurance, claims related to occurrences during the policy term but reported subsequent to the policy's termination may be uninsured. During the year ended September 30, 2011, Brotman purchased a $0 deductible policy, which effectively insures against such claims from September 1, 2011 through August 31, 2012. Effective August 31, 2012, Brotman is no longer covered under a $0 deductible policy for claims from that date forward. The Company is not subject to claims arising

Confidential LGP-SBC-000001074

prior to the acquisition of Nix Health (February 1, 2012) as the former owner purchased an extended claims reporting policy (tail insurance) covering the incidents that have occurred up through January 31, 2012.

Accounting principles generally accepted in the United States of America require that a health care organization record and disclose the estimated costs of medical malpractice claims in the period of the incident of malpractice, if it is reasonably possible that liabilities may be incurred and losses can be reasonably estimated. The Company has recognized an estimated liability for incurred but not reported claims and the self-insured risks (including deductibles and potential claims in excess of policy limits) based upon an actuarial valuation of the Company's historical claims experience of Alta, Brotman and Nix Health. At September 30, 2012 and 2011, the claims liability was approximately $2,197,000 (net of insurance recoveries of $32,000) and $699,000, respectively and was estimated using a discount factor of 4%.

The claims reserve is based on the best data available to the Company; however, the estimate is subject to a significant degree of inherent variability. The estimate is continually monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of medical malpractice liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims. Management is not aware of any potential medical malpractice claims whose settlement, if any, would have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Workers' Compensation Insurance

The workers' compensation coverage provides the statutory benefits required by law and that the employer's liability limits are $1,000,000 (excluding Nix Health). Nix Health has opted out of the Texas Workers' Compensation system as a non-subscriber, and provides its employees with benefits for occupational injury or disease through an ERISA plan. Nix has an Employer's Excess Indemnity policy with a $25,000 deductible policy with limits of $10,000,000 per occurrence and $25,000,000 aggregate. The Company's (excluding Brotman and Nix Health) workers' compensation coverage for October 1, 2010 through September 30, 2012 did not have an aggregate loss limitation. The current workers' compensation policy for the period of October 1, 2012 through September 30, 2013 does not have an aggregate loss limitation. At September 30, 2012 and 2011, included in accrued salaries, wages and benefits are accruals relating to Alta and Brotman for uninsured claims and claims incurred but not reported of approximately $2,808,000 and $2,784,000, respectively. The amounts are estimated based upon an actuarial valuation of their claims experience, using a discount factor of 4%.

The claims reserve is based on the best data available to the Company; however, the estimate is subject to a significant degree of inherent variability. The estimate is monitored and reviewed, and as the reserve is adjusted, the difference is reflected in current operations. While the ultimate amount of the claims liability is dependent on future developments, management is of the opinion that the associated liabilities recognized in the accompanying consolidated financial statements are adequate to cover such claims. Management is not aware of any potential claims whose settlement, if any, would have a material adverse effect on the Company's consolidated financial position, results of operations or cash flows.

Stock Options

Prior to the completion of the merger discussed in Note 4, the Company had stock option and restricted stock agreements with certain directors, officers and employees issued under the Company's 1998 and 2008 equity incentive plans. These equity awards vested based on continuous service and did not include performance or market vesting conditions. Share-based awards have generally been issued at or above the market price of the underlying stock.

On December 15, 2010, the Board of Directors (the "Ivy Board") of Ivy Holdings Inc. adopted the 2010 Stock Option Plan of Ivy Holdings Inc. (the "Ivy Plan") and, on December 16, 2010, the stockholders of Ivy Holdings Inc. adopted the Ivy Plan. The Ivy Plan provides that it shall be administered by the Compensation Committee of the Ivy Board. The Ivy Plan includes an Incentive Stock Option Agreement and a Non-Qualified Stock Option Agreement to be used in connection with the grant of options under the Ivy Plan. These options granted under the Ivy Plan are exercisable into Ivy Holdings stock and vest based on a number of criteria, including time, performance and CEO discretion.

Compensation costs for option awards are measured and recognized in the consolidated financial statements based on their grant date fair value, net of estimated forfeitures over the awards' service period. The fair value of restricted stock grants are determined on the date of grant, based on the number of shares granted and the quoted price or estimated fair market value of the Company's common stock. The Company uses the Black-Scholes option pricing model and a single option award approach to estimate the fair value of stock options granted. Equity-based compensation is classified within the same line items as cash compensation paid to employees. Cash retained as a result of excess tax benefits relating to share-based payments is presented in the consolidated statements of cash flows as a financing cash inflow.

Cash and Cash Equivalents

The Company considers all highly liquid debt instruments with initial maturities of 90 days or less to be cash equivalents. Cash and cash equivalents are primarily comprised of deposits with banks. The Company maintains its cash at banks with high credit-quality ratings.

Restricted Cash

At September 30, 2012 and 2011, $233,000 and $233,000 was held in a restricted account in connection with workers compensation arrangements and $30,000 and $0 was restricted related to a capitation agreement, respectively.

Additionally at September 30, 2011, the Company had restricted cash of $3,840,000, which represented amounts set aside pursuant to the Los Angeles Jewish Home for the Aging ("JHA") loan agreements at Brotman (see Note 9), held in escrow for property taxes, maintenance and emergency room construction. The JHA loans were repaid on May 3, 2012 and, as a result, there are no longer restrictions on this cash.

Restricted Investments

The Company is required to keep restricted deposits by certain HMOs for the payment of claims. Such restricted deposits are classified as a current asset in the accompanying consolidated balance sheets, as they are restricted for payment of current liabilities. Investments also include certificates of deposit with maturity dates of more than 90 days when purchased.

Inventories

Inventories of supplies are valued at the lower of amounts that approximates the weighted average cost or market. Inventories consist primarily of medical and surgical supplies and pharmaceuticals.

Deferred Financing Costs

Deferred financing costs are amortized over the period in which the related debt is outstanding using the effective interest method. During the year ended September 30, 2012, the Company completed an offering of $325 million in 8.375% senior secured notes ("PMH 2019" Notes) (see Note 9), whereby the proceeds were partially used to repay $151.8 million in outstanding 12.75% senior secured notes due 2014 ("PMH 2014 Notes"). Deferred financing costs related to the PMH 2014 Notes of $3,944,000 were written off and deferred financing costs of $10,208,000 related to the PMH 2019 Notes were capitalized and included in deferred financing costs, net on the accompanying consolidated balance sheets.

Deferred financing costs at September 30, 2012 and 2011 are as follows (in thousands):

September 30,	**2012**			2011		
	Gross book value	**Accumulated amortization**	**Net book value**	Gross book value	Accumulated amortization	Net book value
Deferred financing costs	**$10,397**	**$649**	**$9,748**	$ 8,508	$ 4,171	$ 4,337

Income Taxes

Deferred income tax assets and liabilities are recognized for differences between financial and income tax reporting bases of assets and liabilities based on enacted tax rates and laws. To the extent a deferred tax asset cannot be recognized under the preceding criteria, allowances must be established. The impact on deferred taxes of changes in tax rates and laws, if any, are applied to the years during which temporary differences are expected to be settled and reflected in the financial statements in the period of enactment. The Company recognizes interest and penalties associated with income tax matters and unrecognized tax benefits in the income tax expense line item of the statements of operations. For the years ended September 30, 2012 and 2011, no interest and/or penalties related to incomes taxes were accrued and/or expensed.

An entity is required to evaluate its tax positions using a two-step process. First, the entity should evaluate the position for recognition. An entity should recognize the financial statement benefit of a tax position if it determines that it is more likely than not that the position will be sustained on examination. Next, the entity should measure the amount of benefit that should be recognized for those tax positions that meet the more-likely-than-not test.

Consolidated and separate income tax returns are filed with the U.S. Federal jurisdiction and in the State of California. The Company's filed tax returns are subject to examination by the IRS for tax years 2008 and later, the State of California for tax years 2007 and later. Net operating losses that were incurred in prior years may still be adjusted by taxing authorities.

The net deferred tax liabilities are primarily comprised of temporary differences between book and tax bases for intangible and capital assets acquired and net operating loss carryforwards.

Fair Value of Financial Instruments

Financial instruments consist primarily of cash and cash equivalents, restricted cash investments, patient and other accounts receivables, accrued salaries and benefits, accounts payable and accrued expenses, medical claims and related liabilities, amounts due to government agencies, notes receivable and payable, capital lease obligations, debt, and other liabilities. The carrying amounts of current assets and liabilities approximate their fair value due to the relatively short period of time between the origination of the instruments and their expected realization (see Note 16).

Concentrations of Credit Risk

Cash and cash equivalents are maintained at financial institutions and, at times, balances may exceed federally insured limits. The Company has not experienced any losses to date related to these balances. All of the Company's non-interest bearing cash balances were fully insured at September 30, 2012 due to a temporary federal program in effect from December 31, 2010 through December 31, 2012. Under the program, there is no limit to the amount of insurance for eligible accounts. Beginning January 1, 2013, insurance coverage will revert to $250,000 per depositor at each financial institution, and the Company's non-interest bearing cash balances may again exceed federally insured limits.

Financial instruments that potentially subject the Company to concentrations of credit risk consist of receivables due from Medicare, Medicaid (Medi-Cal in California), patients, health plans including shared-risk arrangements, and notes receivable.

The Company invests excess cash in liquid securities at institutions with strong credit ratings, following established guidelines relative to diversification and maturities to maintain safety and liquidity. These guidelines are periodically reviewed and modified to take into consideration trends in yields and interest rates and principal risk. Management attempts to schedule the maturities of the Company's investments to coincide with the Company's expected cash requirements. Credit risk with respect to receivables is limited since amounts are generally due from large HMOs within the Medical Group Management segment and from the Medicare and Medicaid (Medi-Cal in California) programs within the Hospital Services segment. Notes receivable are fully secured by collateral of equal or greater value. Management reviews the financial condition of these institutions on a periodic basis and does not believe the concentration of cash or receivables results in a high level of risk.

For the years ended September 30, 2012 and 2011, the Hospital Services segment received a total of 74% and 63%, respectively, of its net patient revenues from Medicare and Medicaid programs, and the Medical Group segment received a total of 73% and 74%, respectively, of their capitation revenues from its five largest HMOs, as follows (in thousands):

Years Ended September 30,	2012	% of Total Revenue	2011	% of Total Revenue
Hospital Services:				
Government Payors:				
Medicare	$ 178,838	37%	$ 153,648	44%
Medicaid	175,554	37%	66,618	19%
Total	$ 354,392	74%	$ 220,266	63%
Medical Group:				
HMO A	$ 35,936	18%	$ 35,139	18%
HMO B	31,862	16%	32,795	16%
HMO C	27,587	14%	27,262	14%
HMO D	26,818	13%	26,069	13%
HMO E	23,664	12%	25,441	13%
Totals	$ 145,867	73%	$ 146,706	74%

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities at the dates, and for the periods, that the consolidated financial statements are prepared. Actual results could materially differ from those estimates. Principal areas requiring the use of estimates include third party settlements, settlements under risk sharing programs, allowances for contractual discounts and doubtful accounts, accruals for medical claims, impairment of goodwill, long-lived assets and intangible assets, share-based payments, professional and general liability claims and workers' compensation claims, reserves for outcome of legislation and valuation allowances against deferred tax assets.

Recently Adopted Accounting Pronouncements

In August 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standard Updates ("ASU") 2010-24, "Health Care Entities (Topic 954): Presentation of Insurance Claims and Related Insurance Recoveries," which clarifies that a health care entity should not net insurance recoveries against a related claim liability. Additionally, the amount of the claim liability should be determined without consideration of insurance recoveries. The guidance provided in this ASU is effective for the fiscal years, and interim periods within those years, beginning after December 15, 2010. The Company adopted ASU 2010-24 effective October 1, 2011 and did not elect to retrospectively apply the new presentation to its fiscal 2011 consolidated financial statements. The adoption of ASU 2010-24 did not have a material impact on the Company's consolidated financial statements as of September 30, 2012.

Confidential LGP-SBC-000001079

In August 2010, the FASB issued ASU 2010-23, "Health Care Entities (Topic 954): Measuring Charity Care for Disclosure," which prescribes a specific measurement basis of charity care for disclosure. The guidance provided in this ASU is effective for fiscal years beginning after December 15, 2010. The Company adopted the modified accounting standards on October 1, 2011 and determined that the adoption did not have a material impact on its consolidated results of operations and consolidated financial position.

New Accounting Pronouncements

In December 2010, the FASB issued an update (ASU 2010-28) to the existing goodwill impairment accounting standards which modify the goodwill impairment test for reporting units with zero or negative carrying amounts, of which Brotman has a negative carrying value as of September 30, 2012. The amendments in ASU 2010-28 modify Step 1 of the goodwill impairment test for reporting units with zero or negative carrying amounts. Upon adoption of the amendments, an entity with reporting units that have carrying amounts that are zero or negative is required to assess whether it is more likely than not that the reporting units' goodwill is impaired. In determining whether it is more likely than not that goodwill impairment exists, an entity should consider whether there are any adverse qualitative factors indicating that an impairment may exist. If the entity determines that it is more likely than not that the goodwill of one or more of its reporting units with zero or negative carrying amounts is impaired, the entity should perform Step 2 of the goodwill impairment test for those reporting unit(s). Any resulting goodwill impairment should be recorded as a cumulative-effect adjustment to beginning retained earnings in the period of adoption. Any goodwill impairment loss occurring after the initial adoption of the amendments should be recognized in earnings. The adoption of this accounting guidance on October 1, 2012 could have a material impact on the Company's consolidated results of operations and financial position.

In June 2011, the FASB issued ASU 2011-06, "Other Expenses (Topic 720): Fees Paid to the Federal Government by Health Insurers (a consensus of the FASB Emerging Issues Task Force ("ASU 2011-06"))." The guidance specifies that the liability for the annual fee imposed on certain health insurers under the recently enacted Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act, should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense using a straight-line method of allocation unless another method better allocates the fee over the calendar year that it is payable. ASU 2011-06 is effective for calendar years beginning after December 31, 2013, when the fee initially becomes effective.

In July 2011, the FASB issued ASU 2011-07, "Health Care Entities (Topic 954): Presentation and Disclosure of Patient Service Revenue, Provision for Bad Debts, and the Allowance for Doubtful Accounts for Certain Health Care Entities" ("ASU 2011-07"). In accordance with ASU 2011-07, an entity will be required to present its provision for doubtful accounts related to patient service revenue as a deduction from revenue, similar to contractual discounts. Accordingly, an entity's revenues will be required to be reported net of both contractual discounts as well as its provision for doubtful accounts related to patient service revenues. Additionally, ASU 2011-07 will require an entity to make certain additional disclosures designed to help users understand how contractual discounts and bad debts affect recorded revenue in both interim and annual financial statements. ASU 2011-07 will be effective for public entities for fiscal years beginning after December 15, 2011, and interim periods within those fiscal years. For nonpublic entities, ASU

2011-07 will be effective for fiscal years ending after December 15, 2012, and interim and annual periods thereafter. Early adoption is permitted. Entities must apply the presentation requirements retrospectively; however, the qualitative and quantitative disclosures are only required to be provided prospectively. The adoption of ASU 2011-07 on October 1, 2012 is not expected to impact the Company's consolidated financial position, results of operations or cash flows, however, it will change the presentation of the Company's revenues on its consolidated statements of operations as well as requiring additional disclosures.

In September 2011, the FASB issued ASU 2011-08, "Intangibles — Goodwill and Other (Topic 350)" ("ASU 2011-08"). Previously, entities were required to test goodwill for impairment, on at least an annual basis, by first comparing the fair value of a reporting unit with its carrying amount, including goodwill. If the resulting fair value of a reporting unit was less than its carrying amount, then the second step of the test would be performed to measure the amount of the impairment loss, if any. ASU 2011-08 permits an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test. If, after assessing the totality of events or circumstances, an entity determines it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, then performing the two-step goodwill impairment test is unnecessary. In accordance with ASU 2011-08, an entity has the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. Additionally, ASU 2011-08 permits an entity to resume performing the qualitative assessment in any subsequent period. ASU 2011-08 is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The Company will adopt the authoritative guidance effective October 1, 2012 and does not expect the adoption to have a material impact on its consolidated financial statements.

Subsequent Events

The Company has evaluated subsequent events through December 17, 2012, the date the Company's consolidated financial statements were available for issuance (see Note 17).

3. Property, Improvements and Equipment

Property, improvements and equipment, consisted of the following (in thousands):

September 30,	**2012**	2011
Property, improvements and equipment:		
Land and land improvements	**$ 34,428**	$ 31,028
Buildings and improvements	**52,771**	24,209
Leasehold improvements	**6,295**	4,203
Equipment	**48,932**	29,910
Furniture and fixtures	**1,005**	878
	143,431	90,228
Less: accumulated depreciation	**(30,016)**	(21,392)
Property, improvements and equipment, net	**$ 113,415**	$ 68,836

Confidential LGP-SBC-000001081

The increase in property, improvements and equipment during the year ended September 30, 2012 is largely as a result of the acquisition of Nix Health on February 1, 2012 (see Note 5).

At September 30, 2012 and 2011, the Company had assets under capitalized leases of approximately $13,015,000 and $4,422,000, respectively, and related accumulated depreciation of $3,792,000 and $1,897,000, respectively.

Depreciation expense was approximately $8,692,000 and $3,935,000 for the years ended September 30, 2012 and 2011, respectively.

4. Agreement and Plan of Merger

On August 16, 2010, the Company entered into an Agreement and Plan of Merger (the "Ivy Merger Agreement") with Ivy Holdings Inc. ("Ivy Holdings") and Ivy Merger Sub Corp. ("Merger Sub"), an indirect, wholly owned subsidiary of Ivy Holdings. On December 15, 2010 (the "Merger Effective Date"), at a special meeting of the Company's stockholders, the adoption of the Ivy Merger Agreement was approved by the affirmative vote of a majority of the common stock outstanding as of the record date for the special meeting. In accordance with the Ivy Merger Agreement and the Delaware General Corporation Law on the Merger Effective Date, Merger Sub merged with and into the Company, and the Company became an indirect, wholly-owned subsidiary of Ivy Holdings (the "Ivy Merger"). Following the consummation of the merger, the Company's common stock ceased trading on the NASDAQ Global Market and was delisted.

Pursuant to the Ivy Merger Agreement, at the Merger Effective Date:

All outstanding options to purchase shares of the Company's common stock were canceled and the holder of each such option received a cash payment equal to the excess of the $8.50 per share cash merger consideration over the exercise price of such option, multiplied by the number of shares subject to the option that were vested immediately prior to the Merger Effective Date, less any applicable withholding taxes and after giving effect to the determination of the Company's compensation committee to accelerate the vesting of certain unvested options in connection with the Ivy Merger (see Note 10).

Each outstanding warrant to purchase shares of common stock was canceled and converted into the right to receive a cash payment equal to the excess of the $8.50 per share cash merger consideration over the exercise price of the warrant, multiplied by the number of shares subject to the warrant.

Restrictions on each share of restricted stock issued under any of the Company's equity incentive plans lapsed and each such share of restricted stock was converted into the right to receive the $8.50 per share merger consideration, less any applicable withholding taxes.

The Compensation Committee of the Board of Directors approved a contingent bonus in the amount of $1,235,000 paid to the Company's Chief Executive Officer ("CEO") and Chairman of its Board of Directors, upon successfully completing the merger transaction. Certain of the Company's senior management stockholders (the "Rollover Investors"), which were comprised of the CEO, the Company's Chief Financial Officer, the President of the Alta Hospitals System, LLC subsidiary and one of the Company's directors and the President of ProMed Healthcare

Confidential LGP-SBC-000001082

Administrators, executed a voting agreement pursuant to which they agreed, subject to the terms thereof, to vote their shares of the Company's common stock in favor of the approval and adoption of the Ivy Merger Agreement. The voting agreement provided the requisite stockholder approval for the merger.

Pursuant to a contribution and subscription agreement, immediately prior to the completion of the merger, the Rollover Investors contributed a total of 6,227,824 shares of the Company common stock (the "Rollover Shares") in exchange for shares of Ivy Holdings common stock. Following the completion of the Ivy Merger, the Rollover Investors beneficially own approximately 20.2%, 14.9%, 1.6% and 1.2%, respectively, of the outstanding common stock of Ivy Holdings (excluding any stock options that have been granted, or may in the future be granted, to the Rollover Investors pursuant to a management equity incentive plan that Ivy Holdings adopted in December 2010, as further discussed in Note 10).

The terms of the contribution and subscription agreement entitled the CEO and the President of Alta, in their discretion, to offer other employees of the Company the ability to acquire shares of Ivy Holdings common stock on the same terms and conditions as the Rollover Investors. Immediately prior to the completion of the merger, a group of 11 employees of the Company (the "Additional Employee Investors") contributed to Ivy Holdings approximately 136,765 shares of the Company's common stock in exchange for shares of Ivy Holdings' common stock. Following the completion of the merger, the Additional Employee Investors beneficially own a total of approximately 0.8% of the outstanding common stock of Ivy Holdings (excluding any stock options that have been granted, or may in the future be granted, to the Additional Employee Investors pursuant to a management equity incentive plan that Ivy Holdings adopted in December 2010, as further discussed in Note 10).

The LGP Funds, affiliated investment funds of Leonard Green Partners, L.P. ("LGP"), own the remainder of the common stock of Ivy Holdings not owned by the Rollover Investors and the Additional Employee Investors. As a result, at the Merger Effective Date, the Company, which became a wholly-owned subsidiary of Ivy Holdings, is approximately 61% indirectly owned by the LGP Funds and approximately 39% indirectly owned by the Rollover and Additional Employee Investors. In connection with the Ivy Merger, the Company also recorded a capital contribution of approximately $844,000 from the LGP Funds. In connection with such capital contribution and the acceleration of unvested options at the Merger Effective Date, additional paid-in capital totaling approximately $9,200,000 was recorded in the first quarter of the year ended September 30, 2011.

Following the Ivy Merger, each holder of the Company's PMH 2014 Notes (described in Note 9 below) was entitled under the notes' indenture to require the Company to repurchase all or a portion of the holder's senior secured notes at a cash purchase price equal to 101% of the principal amount of the PMH 2014 Notes plus accrued and unpaid interest. In December 2010 and January 2011, a total of approximately $8,200,000 of the PMH 2014 Notes were tendered by note holders and were purchased by the Company in January 2011.

Following the announcement of the Merger with controlled entities of the LGP Funds, two putative class action complaints were filed against the Company, each of our special committee members, Ivy Holdings, Leonard Green & Partners, L.P. and certain other parties. These complaints, which were consolidated into a single action, allege generally that defendants breached their fiduciary duties, or aided and abetted others' breaches of their fiduciary duties, in connection with the transaction with the Company by, among other things, authorizing the transaction for what

Confidential LGP-SBC-000001083

plaintiffs claim to be inadequate consideration and pursuant to what plaintiffs claim to be an inadequate process and with inadequate disclosures. An amended complaint was filed in July 2011 alleging the same general facts. On December 30, 2010, another lawsuit was filed in Delaware Chancery Court by Terrier Partners and five related entities against the same defendants identified above. The complaint alleges generally that the consideration offered to shareholders in connection with the transaction with the Company was inadequate in light of the revenue received under AB 1383 (see Note 11), and that defendants breached their fiduciary duties, or aided and abetted others' breaches of their fiduciary duties by not obtaining a higher price in light of this additional revenue. This action was stayed pending a decision on the motion for class certification.

In May 2012, the Court of Chancery granted motions to consolidate the Terrier Partners case and the class action cases, and for class certification, certifying the class as a non-opt out class. The Court also entered a schedule permitting the plaintiffs to file a new amended complaint, and on June 11, 2012, plaintiffs filed their Verified Consolidated Third Amended Class Action Complaint.

In connection with the merger, the Company has incurred and expensed a total of approximately $547,000 and $13,331,000 of merger-related expenses, during the years ended September 30, 2012 and 2011, respectively.

5. Acquisitions and Investments

Nix Health

Effective February 1, 2012, the Company acquired substantially all of the assets and assumed certain liabilities of MHS San Antonio, LLC (dba Nix Health Care System), a hospital system with 297 licensed beds, which offers San Antonio, Texas and the surrounding communities an array of medical services ranging from primary care and surgical services to behavioral and rehabilitation services. This acquisition adds further geographic and payor mix diversification consistent with the Company's growth strategy. The assets were acquired from subsidiaries of Merit Health Systems, LLC, principally Accord Medical Management, LP and Accord Properties, LP. The consideration for the Nix Health acquisition included approximately $44,000,000 in cash and assumption of approximately $4,000,000 in loans and capital leases, for total consideration of approximately $48,000,000. The acquisition of Nix Health is accounted for as a business combination using purchase accounting. Under the purchase accounting method, the amount of consideration paid is allocated to assets acquired and liabilities assumed based on their estimated fair values.

Confidential LGP-SBC-000001084

The following table summarizes the assets acquired and liabilities assumed in connection with the Nix Health acquisition, as of February 1, 2012 (in thousands):

	Purchase Price Allocation
Patient accounts receivable	$ 9,766
Prepaid expenses and other current assets	11,514
Property, improvements and equipment	40,167
Goodwill	3,295
Intangible assets	3,362
Accounts payable and other liabilities	(21,142)
Capital leases	(1,801)
Long-term debt	(2,300)
Net cash consideration subject to working capital adjustment	42,861
Working capital adjustment	1,162
Net cash consideration	$ 44,023

Brotman Medical Center

On August 31, 2005, the Company invested $1,000,000 for an approximate 33.1% stake in Brotman. On October 25, 2007, Brotman filed for bankruptcy protection under Chapter 11 of the U.S. Bankruptcy Code, and on April 14, 2009, the U.S. Bankruptcy Court confirmed and declared effective the final Chapter 11 Plan of Reorganization (the "Plan") of Brotman whereby, among other things, all of Brotman's outstanding securities were canceled and, in exchange for their pro rata share of the New Value Contribution (as defined in the Plan) totaling $3,500,000, holders of Brotman's securities would receive New Common Stock in Brotman in the same percentage as their pro rata share of the New Value Contribution. Prospect Hospital Advisory Services ("PHAS"), a wholly owned subsidiary of the Company, made a $1,814,000 investment in Brotman on January 13, 2009 and $705,000 on December 31, 2009, totaling $2,519,000 while other shareholders made a total cash investment of $981,000, and this increased PHAS total ownership interest to 71.96%. Brotman completed multiple rights offerings from emergence of bankruptcy through December 2011, whereby PHAS participated in the amount of $6,791,000 increasing its ownership stake to approximately 78.28%, given the level of participation from other stockholders. Between January and April 2012, the Company purchased the remaining interests of Brotman, increasing its ownership to 100%, which have been accounted for as equity transactions. Prior to the ownership of all outstanding common stock of Brotman, the pro rata share of net income (loss) of Brotman attributable to non-controlling interest is reported as net income (loss) attributable to non-controlling interest in the consolidated statements of operations.

For financial reporting purposes, the acquisition of Brotman as of April 14, 2009 was treated as a business combination in accordance with GAAP and the excess consideration over the estimated fair value of assets acquired and liabilities assumed was allocated to goodwill (approximately $24,373,000) and identifiable intangible assets. The Company did not perform an impairment test related to Brotman goodwill at September 30, 2012 and 2011, as this was not required under current accounting literature due to the negative carrying value of Brotman's net assets. However, accounting literature expected to be adopted by the Company effective October 1,

Confidential LGP-SBC-000001085

2012, for non public reporting companies could require an impairment of Brotman goodwill and the amount of such impairment could be significant to the consolidated financial statements.

6. Goodwill and Intangible Assets

As of September 30, 2011, all goodwill and intangible assets relate to the Alta, Brotman and ProMed Entities. Additionally as of September 30, 2012 goodwill and intangible assets also relate to Nix Health. The Company performed its annual goodwill impairment analysis for each reporting unit that constitutes a business for which 1) discrete financial information is produced and reviewed by management, and 2) services that are distinct from the other reporting units. No impairment assessment was performed for Brotman or Nix Health as of September 30, 2012, as Brotman has a negative carrying value, while Nix Health was recently acquired and there have been no indicators of impairment.

For the Medical Group segment, the Company has determined that PHCA and the ProMed Entities (collectively referred to as "ProMed"), as well as PMS and the other affiliated physician organizations as a group (collectively referred to as "Prospect") each constitutes a separate reporting unit.

For the Hospital Services segment, the reporting unit for the annual goodwill impairment analysis is determined to be at the individual entity level. An analysis was prepared for Alta but, as noted above, no assessment was prepared for Brotman or Nix Health.

The carrying value of goodwill for Brotman, Alta and ProMed at September 30, 2012 and 2011 was $24,373,000, $106,538,000 and $22,339,000, respectively.

The following table summarizes the changes to goodwill (in thousands):

Goodwill, September 30, 2011 and 2010	$	153,250
Additions from acquisition of Nix Health (Note 5)		3,295
Goodwill, September 30, 2012	$	156,545

Confidential LGP-SBC-000001086

Identifiable intangible assets are comprised of the following (in thousands):

	September 30, 2012				
	Alta	ProMed	Brotman	Nix Health	Total
HMO membership	$ -	$ 25,200	$ -	$ -	$ 25,200

Intangible assets, net	$ 11,208	$ 24,449	$ 2,634	$ 38,291

Amortization is recognized on a straight-line basis (management's best estimate of the period of economic benefit) over the respective useful lives and expense for the years ended September 30, 2012 and 2011 was approximately $3,884,000 and $3,868,000, respectively.

Estimated amortization expense for each future fiscal year is as follows (in thousands):

Years ended September 30,	
2013	$ 4,220
2014	4,002
2015	3,873
2016	3,786
2017	3,421
Thereafter	18,778
Total	$ 38,080

Confidential LGP-SBC-000001087

The following table shows the estimated useful lives for each of the intangible assets:

	Estimated useful lives
HMO membership	14 years
Covenants not-to-compete	18 months to 6 years
Trade names	5 - 20 years
Favorable leasehold	6 years
Physician guarantees	2 to 3 years
Provider networks	3 years

7. Related Party Transactions

An officer of the ProMed Entities has ownership interests in physician medical groups that provide medical services to ProMed members. For the years ended September 30, 2012 and 2011, the ProMed Entities paid these groups approximately $16,474,000 and $14,719,000, respectively.

Effective November 3, 2011, the Promed Entities entered into an Exclusivity and Non- Solicitation Agreement with the physician medical group and certain of its physicians. The amount paid for this agreement amounted to $1,000,000.

Pursuant to a Management Services Agreement, dated December 15, 2010 and amended on May 3, 2012 (the "LGP Management Agreement"), between the Company and LGP, LGP provides to the Company, (a) certain investment banking services, (b) management, consulting and financial planning services and (c) financial advisory and investment banking services in connection with major financial transactions from time to time. In consideration for the services provided by LGP under the LGP Management Agreement, the Company pays LGP an annual fee of $1,000,000, payable in monthly installments, and reimburses LGP for its related expenses up to $50,000 annually. If approved by the unanimous consent of the Board of Directors of the Company, additional customary fees may be due to LGP pursuant to the terms of the LGP Management Agreement for services rendered in connection with major transactions from time to time. For services rendered by LGP in connection with the consummation of the Ivy Merger, a one-time structuring fee and related expenses of $4,441,000 was paid by the Company to LGP. This amount was expensed during the year ended September 30, 2011.

Concurrent with the closing of the Ivy Merger on December 15, 2010, Ivy Holdings, Ivy Intermediate Holding Inc. ("Ivy Intermediate") and the Company entered into a Tax Sharing Agreement. Following the consummation of the Ivy Merger, the Company, which merged with a subsidiary of Ivy Intermediate, became a wholly-owned subsidiary of Ivy Holdings. Therefore, Ivy Holdings is now the parent of an affiliated group of corporations within the meaning of Section 1504(a) of the Internal Revenue Code of 1986. The Tax Sharing Agreement allows the Company to make payments to Ivy Holdings as necessary to fund their payment of any required taxes incurred due to such parent status. During the years ended September 30, 2012 and 2011, the Company made payments under this arrangement of $2,702,000 and $8,000, respectively.

Confidential LGP-SBC-000001088

8. Income Taxes

The components of the income tax provision are as follows (in thousands):

For the years ended September 30,	2012	2011
Current:		
Federal	$ 10,188	$ 15,032
State	3,325	1,605
	13,513	16,637
Deferred:		
Federal	(9,150)	(7,311)
State	(1,765)	(1,170)
	(10,915)	(8,481)
Total:		
Federal	1,038	7,721
State	1,560	435
	$ 2,598	$ 8,156

Temporary differences and carry forward items that result in deferred income tax balances as of September 30 are as follows (in thousands):

September 30,	2012	2011
Deferred tax assets:		
State tax benefit	$ 2,042	$ 1,384
Allowances for bad debts	11,161	13,388
Vacation accrual and other	3,954	3,103
Workers compensation	1,203	1,193
Accrued physician bonuses	3,552	3,555
Malpractice reserves	837	281
Deferred rent	105	105
Other	356	314

Fixed assets	(21,691)	(25,354)
Non-stockholder capital contribution	(2,142)	(2,142)
Prepaid expenses	(384)	(434)
Deferred tax liabilities	(34,766)	(36,748)
Net deferred tax liabilities	$ (10,593)	$ (21,508)

Confidential

Deferred tax assets and liabilities reflect the effect of temporary differences between the assets and liabilities recognized for financial reporting purposes and the amounts recognized for income tax purposes.

As discussed in Note 5, between January and April 2012, the Company increased its ownership in Brotman from 78.28% to 100%, following which, the Company now includes Brotman in its consolidated federal income tax return. Based on the available objective evidence, the Company believes it is more likely than not that certain Brotman deferred tax assets will be fully realizable. Accordingly, the Company reversed approximately $8,000,000 of deferred tax valuation allowances for the year ended September 30, 2012.

At September 30, 2012, the Company had federal and state net operating loss carryovers of approximately $35,600,000 and $45,300,000 which, if not utilized, will expire beginning 2032 and 2022, respectively. A substantial portion of these net operating loss carryforwards are subject to limitations under Internal Revenue Code Section 382, and their use may be severely limited in the future.

Brotman is under audit by the Internal Revenue Service ("IRS") for the years ended September 30, 2008 through 2010. PMH is under audit by the IRS for the year ended September 30, 2010 and the period from October 1, 2010 to December 15, 2010. PMG is under audit by the IRS for the year ended September 30, 2010. No material tax liabilities have been asserted to date with respect to any of these audits.

As further discussed in Note 10, in connection with the Ivy Merger that resulted in acceleration of certain unvested stock options, the Company recorded a credit to additional paid-in capital, which represents the tax benefit of the excess of the deductible amount over the total recognized compensation cost related to the merger transaction. Excess tax benefits realized related to such transaction of approximately $5,900,000, have been reported as both a cash inflow from financing activities and a cash outflow from operating activities in the accompanying consolidated statement of cash flows for the year ended September 30, 2011.

At September 30, 2012 and 2011, the Company has approximately $970,000 and $970,000, respectively, of unrealized excess tax benefits related to employee stock options. This amount is not included in the table of deferred tax assets above and the benefit will be recorded as an increase to additional paid in capital if and when realized.

The differences between the income tax provision at the federal statutory rate and that reflected in the accompanying consolidated statements of operations are summarized as follows:

For the years ended September 30,	**2012**	2011
Tax provision at statutory rate	**35%**	35%
State taxes, net of federal benefit	**5%**	(2)%
Permanent and other items	**2%**	16%
Change in valuation allowances	**(28)%**	99%
Other	**(5)%**	-
	9%	148%

9. Long-Term Debt

Long-term debt consists of the following (in thousands):

Long-term debt, net of current maturities	**$ 326,957**	$ 144,611

Confidential

Prospect's Debt:

Senior Secured Notes

On May 3, 2012, the Company closed the offering of $325 million in 8.375% senior secured notes due May 1, 2019 ("PMH 2019 Notes"). Interest is payable semi-annually in arrears on May 1 and November 1, commencing on November 1, 2012. The offering was executed in accordance with rule 144A and Regulation S under the Securities Act of 1933. The terms of the PMH 2019 Notes are governed by an indenture among the Company, certain of its subsidiaries and affiliates (as "Guarantors"), and U.S. Bank National Association (as trustee) (the "Indenture"). The Indenture contains certain covenants that, among other things, limit the Company's ability, and the ability of its restricted subsidiaries (as such term is defined in the Indenture) to: retire and pay dividends or distributions on capital stock or equity interests, prepay subordinated indebtedness or make other restricted payments; incur additional debt; make investments; create liens on assets; enter into transactions with affiliates; engage in other businesses; sell or issue capital stock of restricted subsidiaries; merge or consolidate with another company; transfer and sell assets; create dividend and other payment restrictions affecting subsidiaries; and designate unrestricted subsidiaries. The Credit Agreement (defined below), executed in connection with the PMH Senior Secured Credit Facility (discussed below), contains a number of customary covenants as well as covenants requiring the Company to maintain a maximum consolidated secured leverage ratio and limiting the amount of capital expenditures. As of September 30, 2012, the Company was in compliance with the financial covenants of the Indenture and Credit Agreement. Capitalized deferred financing costs related to the PMH 2019 Notes and PMH Senior Secured Credit Facility (discussed below) amounting to $10,208,000 through September 30, 2012 are being amortized over the term of the related debt using the effective interest method.

Concurrent with the issuance of the PMH 2019 Notes, the Company entered into a five year $50 million revolving senior secured credit facility (the "PMH Senior Secured Credit Facility") which replaced the existing senior secured credit facility. The PMH Senior Secured Credit Facility provides, among other things, for borrowings up to the amount of the facility with sublimits of up to (i) $20 million to be available for the issuance of letters of credit and (ii) $10 million to be available for swingline loans. The commitment under the facility may be increased by up to $10 million upon the Company's request at the discretion of the lenders and subject to certain customary requirements. The interest rate per annum applicable to loans under the PMH Senior Secured Credit Facility will be, at the Company's option, either a rate per annum equal to (i) LIBOR plus 3.50% or (ii) an alternate base rate, which will be the higher of the administrative agent's prime rate, the federal funds rate plus 0.50%, and the 1-month LIBOR rate plus 1.00%, plus in each case, 2.50%. The PMH Senior Secured Credit Facility was undrawn at closing and remains undrawn as of September 30, 2012.

The PMH 2019 Notes and the PMH Senior Secured Credit Facility are jointly and severally guaranteed on a senior secured basis by all of the Company's subsidiaries (as such term is defined in the Indenture) other than AMVI/Prospect Medical Group, Nuestra and certain immaterial subsidiaries. The PMH 2019 Notes are secured pari passu with the PMH Senior Secured Credit Facility by first-priority Liens and security interests on substantially all of the tangible and intangible assets of the Guarantors, including, but not limited to, the accounts receivable, inventories, other personal property, real property, fixtures and equipment, in each case now owned or hereafter acquired by the Company and the Subsidiary Guarantors, with certain exceptions. The PMH 2019 Notes are effectively senior to all of the Guarantors' existing and future Indebtedness.

Confidential LGP-SBC-000001092

The terms of the PMH Senior Secured Credit Facility are governed by the Credit Agreement, dated as of May 3, 2012, among the Company, Morgan Stanley Senior Funding, Inc. (as administrative agent), Royal Bank of Canada and Credit Suisse AG, Cayman Islands Branch (as co-syndication agents) and the lenders party thereto (the "Credit Agreement").

The Company, at its option, may redeem all or part of the notes at redemption price equal to 106.281%, 104.188%, 102.094% and 100.0% on or after May 1, 2015, 2016, 2017 and 2018, respectively. Prior to May 1, 2015, the Company, at its option, may (i) redeem up to 35% of the original principal amount of the notes with the proceeds of certain equity offerings at a redemption price of 108.375% (ii) redeem up to 10% of the original principal amount of the PMH 2019 Notes during each 12-month period, commencing on May 1 in each of 2012, 2013 and 2014, at a redemption price of 103.0% of the principal amount thereof (this redemption option was terminated in connection with the Company's November 2012 offering of additional PMH 2019 Notes - see Note 17) or (iii) redeem the PMH 2019 Notes, in whole, but not in part, at a redemption price of 100.0% of the aggregate principal plus a make-whole premium. There are no required principal payments on the PMH 2019 Notes until maturity.

See Note 17 (Subsequent Events) for a description of the Company's November 16, 2012 closing of the issuance of an additional $100 million of PMH 2019 Notes.

Retired Senior Secured Notes

On July 29, 2009, the Company closed the offering of $160 million in 12.75% senior secured notes due 2014 at an issue price of 92.335% with interest payable semi-annually in arrears on January 15 and July 15 ("PMH 2014 Notes"). The sale was executed in accordance with Rule 144A and Regulation S under the Securities Act of 1933. Concurrent with the issuance of the PMH 2014 Notes, the Company entered into a three year $15 million revolving credit facility ("2009 Credit Facility") which was undrawn at closing, with any future borrowings bearing interest at London Interbank Offered Rate ("LIBOR") plus 7.00%, with a LIBOR floor of 2.00%. Capitalized deferred financing costs and original issue discount related to the PMH 2014 Notes was being amortized over the term of the related debt using the effective interest method.

In connection with the Company's acquisition of Nix Health, effective February 1, 2012, the Company entered into an amended credit agreement with Royal Bank of Canada (as administrative agent) and in accordance with which the available loan commitments were increased to $25 million, certain covenants were relaxed and the interest rate was changed to the higher of (1) RBC prime rate, (2) the Federal funds rate plus 0.5% and (3) the 30-day LIBOR indexed rate. Also on February 1, 2012, the Company borrowed $15 million of the available loan commitment, of which on March 26, 2012 approximately $10 million was repaid. Pursuant to the further Amendment of the 2009 Credit Facility dated March 7, 2012, an additional incremental loan commitment of $15 million was obtained, bringing the total loan commitment to $40 million.

Pursuant to its definitive Prospectus filed with the SEC via Form S-4 on October 26, 2009, the Company offered to exchange (the "Exchange Offer") up to $160 million of its 12.75% Senior Secured Notes, Series B, due 2014 (the "Exchange Notes" and together with the Original Notes, the "PMH 2014 Notes") for an equal amount of the PMH 2014 Notes issued on July 29, 2009 (the "Original Notes"). The Exchange Notes were substantially identical to the Original Notes, except that the offer and sale of the Exchange Notes were registered under the Securities Act of 1933, as amended, and the Exchange Notes did not bear any legend restricting their transfer. The Exchange Offer was finalized on December 3, 2009, at which time $159 million of the $160 million

Confidential LGP-SBC-000001093

aggregate principal amount of private notes had been tendered and accepted for exchange. Pursuant to a post-effective amendment to the Form S-4 filed with the SEC on December 3, 2010, the Company removed from registration the Exchange Notes that were not issued because the corresponding Original Notes were not tendered for exchange.

Following the Ivy Merger, each holder of the Company's PMH 2014 Notes was entitled under the notes' indenture to require the Company to repurchase all or a portion of the holder's PMH 2014 Notes at a cash purchase price equal to 101% of the principal amount plus accrued and unpaid interest. Accordingly, following the effective time of the merger, notice was provided to each holder of such notes advising the holder that it was entitled under the indenture, prior to January 14, 2011, to require the Company to purchase the PMH 2014 Notes held by the holder at a purchase price equal to 101% of the principal amount of the PMH 2014 Notes, plus accrued and unpaid interest to the date of purchase. PMH 2014 Notes with an aggregate principal amount of $8.2 million were tendered, and Prospect repurchased such notes effective January 19, 2011.

On December 15, 2010, the effective time of the Ivy Merger, the Company and U.S. Bank National Association, a national banking association (the "Trustee"), entered into a First Supplemental Indenture (the "First Supplemental Indenture") in connection with the merger, pursuant to which the Company was permitted under Section 3.3 of the Indenture to make certain "Restricted Payments" immediately following consummation of the merger. In addition to the First Supplemental Indenture executed on December 15, 2010, on that date the Company and Royal Bank of Canada entered into a Consent and Agreement that provided for certain consents in connection with the Ivy Merger and certain amendments of covenants and conditions contained in the Credit Agreement.

As of July 26, 2011, in response to the Company's solicitation and receipt of tenders and consents from holders of $137,637,000 in aggregate principal amount of the PMH 2014 Notes (representing approximately 90.6% of the outstanding Notes) consenting to the amendment of the Company's reporting obligations under the Indenture, whereby the Company discontinued filing with the SEC. To effectuate such amendment, the Company, its subsidiary guarantors and U.S. Bank National Association (as trustee) executed a Second Supplemental Indenture (the "Second Supplemental Indenture") and the Company filed a Form 15 with the SEC that terminated its reporting obligations for the Exchange Notes under the Securities Exchange Act of 1934. Following the execution of the Second Supplemental Indenture and the filing of the Form 15, the Company no longer filed periodic reports with the SEC and instead provided quarterly and annual financial statements and earnings releases to U.S. Bank National Association (as trustee) and the holders of the PMH 2014 Notes. Pursuant to this amendment, the Company incurred a fee totaling approximately $690,000, which was fully expensed during the year ended September 30, 2011.

On April 18, 2012, the Company commenced a cash tender offer, subject to the consummation of the Existing Notes offering and certain other conditions, to repurchase any and all of the Company's PMH 2014 Notes and a related consent solicitation to proposed amendments to the PMH 2014 Notes indenture and collateral documents to, among other things, permit the grant of liens on the Guarantors assets to secure the notes and subsidiary guarantees. The total consideration for the PMH 2014 Notes under the Tender Offer was equal to $1,087.95 per $1,000 principal amount of the PMH 2014 Notes, which included a consent payment of $30.00 per $1,000 principal amount of PMH 2014 Notes for those holders who tendered and consented to the proposed amendments by the early consent date, plus accrued and unpaid interest to the purchase date. Holders that tendered after the early consent date, but on or before the expiration date, received

Confidential LGP-SBC-000001094

consideration equal to $1,057.95 per $1,000 principal amount of the PMH 2014 Notes, plus accrued and unpaid interest to the purchase date.

Upon the completed issuance of the PMH 2019 Notes, the proceeds of the issuance were used to repay $151.8 million owing on the PMH 2014 Notes (plus accrued interest), $5 million outstanding on the 2009 Credit Facility, and the call premium of $13.3 million, which is recorded within Prepayment penalty on debt refinance within the consolidated statements of operations. In addition, the Company wrote off the unamortized debt discount of approximately $6.4 million and unamortized debt financing costs of approximately $3.9 million related to the PMH 2014 Notes and 2009 Credit Facility.

Demand Notes

During the year ended September 30, 2012, the Company obtained a commitment from a bank for a $9.3 million equipment leasing facility to finance various equipments at Alta and Brotman. As of September 30, 2012, of a total of $4.9 million drawn under the facility, approximately $4.1 million has been converted to equipment leases and are classified as capital lease arrangements (see Note 11). Pending its conversion to equipment leases, the remaining $804,000 was classified as current debt, pursuant to certain demand notes, and the amount is payable on December 15, 2012 unless earlier demanded by the bank. Interest accrues on these notes at the bank prime rate plus 1.5% with a floor of 4.5% and is payable monthly. On December 17, 2012, pursuant to certain equipment financing agreements, the amount was converted to equipment leases, effective December 15, 2012.

Brotman's Debt:

Brotman had debt under a Senior Secured Revolving Credit Facility, Secured Term Loans and an Unsecured Promissory Note entered into in conjunction with affecting its Plan of Reorganization.

Senior Secured Revolving Credit Facility

On April 14, 2009, in conjunction with emergence from bankruptcy, Brotman obtained a commitment from Gemino Healthcare Finance, LLC ("Gemino") for a three year, $6.0 million (subsequently increased to $7.0 million), senior credit facility secured by Brotman's accounts receivable. The facility originally was set to expire on the earlier of April 14, 2012 and the Los Angeles Jewish Home for Aging ("JHA") loan (see below) maturity date and bore interest at LIBOR plus 7% per annum, given a LIBOR floor of 4%. On April 11, 2012, the Company obtained a 30-day extension of the maturity date of its senior credit facility from Gemino, which was extended to May 11, 2012. Interest was incurred based on the greater of $2 million or the actual outstanding principal balance. The agreement also included an unused line fee of 0.5% per annum and a collateral line fee, based on the average outstanding principal balance, of 0.5% per annum. Loan fees associated with the Gemino loan totaling approximately $120,000, were capitalized and amortized over the term of the related debt using the effective interest method. Upon the completed issuance of the PMH 2019 Notes, part of the proceeds of the issuance were used to repay the remaining amounts owing on this credit facility.

Secured Credit Facilities Term Loans: A and B

On April 14, 2009, in conjunction with Brotman's emergence from bankruptcy, JHA agreed to provide Brotman with up to $22.25 million in financing, consisting of two term loans: (i) a Term A

Confidential LGP-SBC-000001095

Loan of $16 million (the "Term A Loan") with a 24-month term and (ii) a Term B Loan of up to $6.25 million, with a 36-month term (the "Term B Loan"). Subject to the notification requirements set forth in the loan agreements, the term of the Term A Loan could be extended up to 36 months. Interest on the Term A Loan was payable at 10% per annum for the first year of the loan, and 7.5% thereafter. Interest on the Term B Loan was payable at 10% per annum for the term of the loan. The Term A Loan and Term B Loan were secured by certain of Brotman's personal property, and a mortgage on certain of Brotman's real property. Loan fees associated with the JHA loans totaling approximately $1,549,000, were capitalized and included as deferred financing costs with that amount being amortized over the term of the related debt using the effective interest method.

As part of the Tem A Loan, Brotman granted JHA an option to purchase certain Brotman-owned property, where JHA planned to construct a senior living facility, for a purchase price equal to the outstanding principal balance of the Term A Loan plus any prepaid amounts. The real estate purchase option, was recorded at its present value, estimated using discounted cash flow analyses based on market rates obtained from independent third parties for similar type debt. Based on an estimated market interest rate of 10.0%, the present value of the loan was estimated to be approximately $15,655,000 at inception. The difference of $345,000 between the recorded present value and the face value of the loan was recorded as a discount against the loan and was amortized to interest expense, using the effective interest rate method, over the term of the loan.

Upon the completed issuance of the PMH 2019 Notes, part of the proceeds of the issuance were used to repay the outstanding balance of approximately $16 million owing on the Term A Loan and approximately $6.25 million on the Term B Loan. The purchase option expired upon the repayment of the Term A Loan and the accrued option liability of $345,000 was reversed into income at that time.

Promissory Note

On April 14, 2009, in conjunction with emergence from bankruptcy, Brotman executed a $4,000,000 unsecured Class 4 Note, to be held by the Creditor Trust for the benefit of holders of allowed Class 4 claims (as defined in the Plan) and paid pro rata to holders of allowed Class 4 claims. The Note bears interest at 7.50% per annum and is payable in sixteen equal quarterly installments of principal, plus accrued interest through February 15, 2013. As of September 30, 2012, the outstanding balance on the note was $500,000.

Nix Health's Debt:

Mortgage Debt

In connection with the Nix Health acquisition, Nix SPE, LLC ("Nix SPE") executed a Loan Assumption Agreement, effective as of February 29, 2012, pursuant to which Nix SPE assumed the obligations of the sellers of Nix Health under a loan facility provided by The Ohio National Life Insurance Company on December 27, 1999. Nix SPE assumed the obligation to pay the outstanding principal amount of approximately $2,028,000 as of September 30, 2012, and interest accruing thereafter. Prospect Hospital Holdings, LLC, the parent company of Nix SPE, has provided a guaranty of the obligations of Nix SPE under the loan. The obligations under the loan facility are secured by a deed of trust on a neighborhood medical center known as Nix Alamo Heights.

Confidential LGP-SBC-000001096

The loan is subject to a 7.0% interest rate and requires monthly installment payments of $20,674, with a balloon payment on the maturity date of November 1, 2019. Prepayment is subject to a fee and the loan contains customary covenants.

Note Payable

Nix Health entered into a note payable due in March of 2014. Interest accrues on this note at 8.96% and is payable monthly. The outstanding balance of this note as of September 30, 2012 is $140,000.

Scheduled payments under the Company's current and long-term debt as of September 30, 2012 are as follows (in thousands):

Year ending September 30,	
2013	$ 1,515
2014	156
2015	126
2016	135
2017	145
Thereafter	326,395
	$ 328,472

10. Equity-Based Compensation Plans

On August 13, 2008, the Company adopted the 2008 Omnibus Equity Incentive Plan ("2008 Plan") to provide flexibility in implementing equity awards, including incentive stock options ("ISO"), non-qualified stock options ("NQSO"), restricted stock grants, stock appreciation rights ("SAR") and performance based awards to employees, directors and outside consultants, as determined by the Compensation Committee of the Board of Directors. In conjunction with the adoption of the 2008 Plan, effective August 13, 2008, additional equity awards under the Company's 1998 Stock Option Plan ("1998 Plan") were discontinued and new equity awards made prior to the completion of the Ivy Merger were granted under the 2008 Plan. Remaining authorized shares under the 1998 Plan which were not subject to outstanding awards as of August 13, 2008, were canceled on August 13, 2008. The 1998 Plan remained in effect as to outstanding equity awards granted under the 1998 Plan prior to August 13, 2008. At the inception of the 2008 Plan, 4,000,000 shares were reserved for issuance under the 2008 Plan.

As a result of the Ivy Merger, both the 1998 Plan and the 2008 Plan (collectively the "Prospect Medical Holdings Plan") were terminated and any unexercised options outstanding under the plans, the individual option agreements and any stock options issued outside of the plans were cancelled. Any offerings of common stock upon exercise of any such options pursuant to their registration statements were terminated.

Effective December 15, 2010, the Board of Directors of Ivy Holdings adopted the Ivy Plan that authorized the issuance of options exercisable for up to 155,110 shares of the common stock of Ivy Holdings to employees, certain consultants and independent members of the boards of directors, of Ivy Holdings and its subsidiaries (including the Company and its subsidiaries). During the years

Confidential LGP-SBC-000001097

ended September 30, 2012 and 2011, Ivy Holdings granted 17,436 and 127,349 options to certain members of the Company's management and employees. These options are exercisable into Ivy Holdings stock and vest based on a number of criteria, including time, Company and Business Unit performance and CEO and Compensation Committee discretion. Since the Ivy Holdings stock options were granted to Company employees for their services related to the Company, the related compensation cost has been recorded in the Company's consolidated financial statements.

Under the terms of the Ivy Plan, the exercise price of an ISO may not be less than 100% of the fair market value of the Company's common stock on the date of grant and, if granted to a shareholder owning more than 10% of the Company's common stock, then not less than 110%. Stock options granted under the Ivy Plan have a maximum term of 10 years from the grant date, and are exercisable at such time and upon such terms and conditions as determined by the Compensation Committee. Stock options granted to employees generally vest over four years, subject to continued service, performance, and other criteria. In the case of an ISO, the amount of the aggregate fair market value of common stock with respect to which the ISO grant is exercisable, for the first time by an employee during any calendar year, may not exceed $100,000.

Stock Options Activity

The following table summarizes information about the Company's stock options outstanding as of September 30, 2012 and 2011 and activity during the years then ended:

	Shares Subject to Options	Weighted Average Exercise Price	Aggregate Intrinsic Value	Weighted Average Remaining Contractual Term (Months)
Ivy Holdings, Inc. Stock Options:				
Outstanding as of September 30, 2010	—	$ —	$ —	—
Granted	127,349	100.00	—	—
Exercised	—	—	—	—
Forfeited	(5,255)	100.00	—	—
Expired	—	—		—
Outstanding as of September 30, 2011	122,094	100.00	—	112.8
Granted	17,436	100.00	—	—
Exercised	(853)	100.00	—	—
Forfeited	(28,152)	100.00	—	—
Expired	—	—	—	—
Outstanding as of September 30, 2012	110,525	$ 100.00	$ 90.00	104.2

The aggregate intrinsic value is calculated as the difference between the exercise price of the underlying awards and the estimated fair value of the Company's common stock for those awards that have an exercise price currently below the estimated fair value. As of September 30, 2012 the aggregate intrinsic value of outstanding shares was approximately $9,947,000.

Confidential LGP-SBC-000001098

A summary of the Company's non-vested options and the changes during the fiscal years ended September 30, 2012 and 2011 is presented as follows:

	Shares	Weighted Average Grant Date Fair Value
Ivy Holdings, Inc. Stock Options:		
Granted	127,349	$ 50.73
Vested	(27,917)	50.73
Forfeited	(5,255)	50.73
Nonvested at September 30, 2011	94,177	50.73
Granted	17,436	50.73
Vested	(25,913)	50.73
Forfeited	(24,439)	50.73
Nonvested at September 30, 2012	61,261	$ 50.73

The actual fair value of the options granted ranges from $45.58 to $50.73 per option. However, the stock compensation expense is based on a fair value of $50.73 per option. This does not have a material effect on the consolidated financial statements.

As discussed in Note 4, in connection with the Ivy Merger, the vesting of certain unvested stock options was accelerated. The cancellation of an award accompanied by the concurrent grant of a replacement award or other consideration should be accounted for as a modification of the stock option terms. Thus incremental compensation cost, measured as the excess of the replacement award's fair value over the fair value of the cancelled award (at the cancellation date), totaling approximately $1,400,000 was recorded on the date of the Ivy Merger.

Unvested stock options that were not modified were cancelled, thus requiring the acceleration of the remaining unamortized stock based compensation totaling approximately $252,000, which was expensed on the date of the Ivy Merger.

Stock-Based Compensation Expense

Stock-based compensation expense for all share-based payments in exchange for employee services (including stock options and restricted stock) is measured at fair value on the date of grant, estimated using an option pricing model and is recognized in the consolidated financial statements, net of estimated forfeitures over the awards requisite service period.

The Company uses the Black-Scholes option pricing model and a single option award approach to estimate the fair value of options granted. Estimated forfeitures will be revised in future periods if actual forfeitures differ from the estimates and will impact compensation cost in the period in which the change in estimate occurs. The determination of fair value using the Black-Scholes option-pricing model is affected by the Company's estimated stock price as well as assumptions regarding a number of complex and subjective variables, including expected stock price volatility, risk-free interest rate, expected dividends and projected employee stock option exercise behaviors.

Fair value for options granted during the years ended September 30, 2012 and 2011 was estimated with the following assumptions for Ivy Holdings Inc.

For the years ended September 30,	**2012**	2011
Weighted average fair value of option grants	**$50.73**	$50.73
Estimated fair market value of the Company's common stock on the date of grant	**$100.00**	$100.00
Weighted average expected life of the options	**7.5-8.0 years**	7.5-8.0 years
Risk-free interest rate	**1.43% - 2.85 %**	1.43%-2.85%
Weighted average expected volatility	**41.49% - 43.03 %**	41.49%-43.03%
Dividend yield	**0.00%**	0.00%

Expected Term - The expected term of options granted represents the period of time that they are estimated to be outstanding.

Risk-Free Interest Rate - The Company bases the risk-free interest rate on the implied yield in effect at the time of option grant on U.S. Treasury zero-coupon issues with equivalent remaining terms.

Expected Volatility—The Company estimates the volatility of the common stock at the date of grant based on the average of the historical volatilities of a group of peer companies. The Company has identified a group of comparable companies to calculate historical volatility from publicly available data for sequential periods approximately equal to the expected terms of the option grants. In selecting comparable companies, Management considered several factors including industry, stage of development, size and market capitalization.

Forfeitures—Share-based compensation is recognized only for those awards that are ultimately expected to vest. Compensation expense is recorded net of estimated forfeitures. Those estimates are revised in subsequent periods if actual forfeitures differ from those estimates. The Company used data since May 2005 to estimate pre-vesting option forfeitures.

Stock-based compensation expense for the Ivy Holdings Inc. stock options recognized during the years ended September 30, 2012 and 2011 was approximately $1,294,000 and $1,388,000, respectively. At September 30, 2012, there were 61,261 unvested options which could potentially vest over the next three fiscal years, subject to meeting various vesting requirements which include time, discretion, and various performance targets as defined. The remaining maximum estimated stock compensation expense to be amortized to expense in future periods is approximately $2,771,000. The stock-based compensation expense is based on a number of criteria, including time, achievement of Company and Business Unit EBITDA targets and CEO and Compensation Committee discretion. Options which are expected to vest based on CEO and Compensation Committee discretion, are treated as variable stock options and are subject to revaluation at each reporting period. Management determined the fair value of the discretionary vested options using a Black Scholes calculation but determined that the change in compensation expense was not material to the consolidated financial statements at September 30, 2012.

11. Commitments and Contingencies

Leases

The Company leases various office facilities and equipment from third parties under non-cancelable operating and capital lease arrangements expiring at various dates through 2016. Certain operating leases contain rent escalation clauses and renewal options, which have been factored into determining rent expense on a straight-line basis over the lease terms. Capital leases bear interest at rates ranging from 5% to 10% per annum.

The future minimum annual lease payments (net of anticipated sublease income) required under leases in effect at September 30, 2012, are as follows (in thousands):

For the Years ending September 30,	Capital Leases	Operating Leases
2013	$ 3,876	$ 2,639
2014	3,388	1,467
2015	1,892	1,104
2016	799	478
Thereafter	887	554
Total minimum lease payments	10,842	$ 6,242
Less: amounts representing interest	(1,245)	
	9,597	
Less: current portion	(3,337)	
	$ 6,260	

Rent expense for the years ended September 30, 2012 and 2011 was approximately $6,720,000 and $4,757,000, respectively. Sublease rental income of approximately $233,000 and $43,000, for the years ended September 30, 2012 and 2011, respectively, was recorded as a reduction to rental expense.

Litigation

The Company is subject to a variety of claims and suits that arise from time to time in the ordinary course of its business, acquisitions, or other transactions. While the Company's management currently believes that resolving all of these matters, individually or in the aggregate, will not have a material adverse impact on the Company's consolidated financial position or results of operations, the litigation and other claims that the Company faces are subject to inherent uncertainties and management's view of these matters may change in the future. Should an unfavorable final outcome occur, there exists the possibility of a material adverse impact on the Company's consolidated financial position, results of operations and cash flows for the period in which the effect becomes probable and reasonably estimable.

As discussed at Note 4, following the announcement of the Ivy Merger, two putative class action complaints were filed against the Company, each of the Company's special committee members, Ivy Holdings, LGP and certain other parties. These complaints, which were consolidated into a single action, allege generally that defendants breached their fiduciary duties, or aided and

Confidential LGP-SBC-000001101

abetted others' breaches of their fiduciary duties, in connection with the transaction with the Company by, among other things, authorizing the transaction for what plaintiffs claim to be inadequate consideration and pursuant to what plaintiffs claim to be an inadequate process and with inadequate disclosures. An amended complaint was filed in July 2011 alleging the same general facts.

On December 30, 2010, another lawsuit was filed in Delaware Chancery Court by Terrier Partners and five related entities against the same defendants identified above. The complaint alleges generally that the consideration offered to shareholders in connection with the transaction with us was inadequate in light of the revenue received under AB 1383 (see California Hospital Fee Program below), and that defendants breached their fiduciary duties, or aided and abetted others' breaches of their fiduciary duties by not obtaining a higher price in light of this additional revenue.

In May 2012, the Court of Chancery granted motions to consolidate the Terrier Partners case and the class action cases, and for class certification, certifying the class as a non-opt out class. The Court also entered a schedule permitting the plaintiffs to file a new amended complaint, and on June 11, 2012, plaintiffs filed their Verified Consolidated Third Amended Class Action Complaint. On July 26, 2012, the director defendants answered the Third Amended Complaint. That same day, Prospect moved to dismiss itself as a party to the Third Amended Complaint.

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

Seismic Standards

Alta and Brotman are required to comply with the Hospital Seismic Safety Act ("SB 1953"), which regulates the seismic performance of all aspects of hospital facilities in California. SB 1953 imposes near-term and long-term compliance deadlines for seismic safety assessment, submission of corrective plans, and the retrofitting or replacement of medical facilities to comply with current seismic standards. In addition to SB 1953, California's Alfred E. Alquist Hospital Facilities Seismic Safety Act (the "Alquist Act") requires that the California Building Standards Commission adopt earthquake performance categories, seismic evaluation procedures, standards and timeframes for upgrading certain facilities, and seismic retrofit building standards. These regulations require hospitals to meet seismic performance standards to ensure that they are capable of providing medical services to the public after an earthquake or other disaster. The Building Standards Commission completed its adoption of evaluation criteria and retrofit standards in 1998.

The Alquist Act requires that within three years after the Building Standards Commission had adopted evaluation criteria and retrofit standards:

- Hospitals in California must conduct seismic evaluation and submit these evaluations to the Office of Statewide Health Planning and Development ("OSHPD"), Facilities Development Division for its review and approval;

Confidential LGP-SBC-000001102

- Hospitals in California must identify the most critical nonstructural systems that represent the greatest risk of failure during an earthquake and submit timetables for upgrading these systems to the OSHPD, Facilities Development Division for its review and approval; and

- Hospitals in California must prepare a plan and compliance schedule for each regulated building demonstrating the steps a hospital will take to bring the hospital buildings into substantial compliance with the regulations and standards.

The Company was required to conduct engineering studies at its hospitals to determine whether and to what extent modifications to the hospital facilities will be required. Management believes that Brotman meets all current requirements; however, it may be required to make significant capital expenditures in the future to comply with the seismic standards, which could impact its earnings. The cost at September 30, 2012 is unknown at this time but could be material. In addition, such modifications to the hospital facilities could potentially result in environmental remediation liabilities which may be material to the Company.

The OSHPD is currently implementing a new voluntary program to re-evaluate the seismic risk of hospital buildings classified as Structural Performance Category ("SPC") 1. These buildings are considered hazardous and at risk of collapse in the event of an earthquake and must be retrofitted, replaced or removed from providing acute care services by 2013. OSHPD is using HAZARDS U.S. ("HAZUS"), a state-of-the-art methodology, to reassess the seismic risk of SPC-1 buildings and those that are determined to pose a low seismic risk may be reclassified to SPC-2. The SPC-2 buildings would have until 2030 to comply with the structural seismic safety standards. Participation in the HAZUS program is optional for hospital owners wishing to have their SPC-1 building(s) re-evaluated. Applications for a HAZUS re-evaluation of the seismic risk have been submitted for Hollywood Community Hospital, Los Angeles Community Hospital and Brotman, but there is no assurance they will result in extensions. Brotman has received SB 306 approval that extends to 2020 the seismic replacement or retrofit of its buildings provided Brotman meets certain interim requirements by interim deadlines. However, the next interim requirement for such extension, to file plans by January 1, 2013, will not be met by Brotman, which could jeopardize this basis for extension, in which case Brotman would have to rely on the alternative basis for extension under the HAZUS re-evaluation program, or SB90, if obtained. The SB 306 approval subordinates to HAZUS which, if received would give the Company an extension to 2030.

In addition, in 2011, the California Legislature enacted Senate Bill 90, which permitted some hospitals to apply for up to an additional seven year extension to the seismic retrofit deadlines, not to extend beyond January 1, 2020. SB 90 also permits OSHPD to extend until January 1, 2018 the date by which the hospitals must obtain a building permit and commence the required retrofit project. Brotman, Hollywood Community Hospital and Los Angeles Community Hospital have applied to OSHPD seeking the SB 90 extension. OSHPD has discretion to approve or disapprove such extension, and to determine the length of the extension (up to the maximum seven years), based on eligibility factors including seismic risks associated with the affected buildings (which can be impacted by the updated HAZUS findings), community access to essential hospital services in the area and financial hardships facing the applicant.

These requirements can result in significant operational changes and capital outlays. Management is continuing to assess its options and the methods of financing the required retrofits. Based on management's evaluation, the renovation needs to comply with the California seismic safety standards for its acute-care facilities, including asbestos abatement, are not estimable at this time.

Confidential LGP-SBC-000001103

Legislation and HIPAA

The healthcare industry is subject to numerous laws and regulations of federal, state and local governments. These laws and regulations include, but are not necessarily limited to, matters such as licensure, accreditation, government healthcare program participation requirements, reimbursement for patient services, and Medicare and Medicaid fraud and abuse. Government activity has continued with respect to investigations and allegations concerning possible violations of fraud and abuse statutes and regulations by healthcare providers. Violations of these laws and regulations could result in expulsion from government healthcare programs together with the imposition of significant fines and penalties, as well as significant repayments for patient services previously billed.

The Company believes that it is in compliance with fraud and abuse regulations as well as other applicable government laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation as well as regulatory actions unknown or unasserted at this time.

The Health Insurance Portability and Accountability Act ("HIPAA") assures health insurance portability, reduces healthcare fraud and abuse, guarantees security and privacy of health information, and enforces standards for health information. The Health Information Technology for Economic and Clinical Health Act ("HITECH Act") imposes notification requirements of certain security breaches relating to protected health information. The Company may be subject to significant fines and penalties if found not to be compliant with the provisions outlined in the regulations.

California Hospital Fee Program

The State of California enacted Assembly Bill 1383 ("AB 1383") effective January 1, 2010, as amended by Assembly Bill 1653 (collectively, the "Program"), to provide one-time supplemental payments to certain medical facilities such as the hospitals owned and operated by the Company's subsidiaries that serve a disproportionate share of indigent and low-income patients. The Program requires participating hospitals to pay fee assessments into a pool of funds to which the federal government contributes matching funds. These funds, including the federal matching funds, are then distributed to qualifying hospitals based on a prescribed formula. In addition, on April 13, 2011 SB 90 was signed into law and provided for a six-month extension of the Hospital Fee Program for dates of service from January 1, 2011 through June 30, 2011. CMS granted final approval of SB 90 on December 29, 2011, at which point the revenue and expense was recognized for the retroactive period. In September 2011, the State of California enacted Senate Bill 335 ("SB 335") which provides a 30-month hospital fee program for dates of service from July 1, 2011 through December 31, 2013. The elements of SB 335 related to the fee for service payments were approved by CMS on June 22, 2012 and final CMS approval for managed care payments is expected in 2013. Implementation of SB 335 was delayed to August 2012 as a result of pending legal advice obtained by the California Hospital Association, although certain technical changes to the legislation required by CMS are included in Senate Bill 920.

For the years ended September 30, 2012 and 2011, Brotman received invoices for fee assessments under AB 1383 and SB 90 of approximately $6,310,000 and $19,000,000, respectively, following payment of which, Brotman was scheduled to receive approximately $5,236,000 and $15,000,000, respectively. Management of Brotman estimated that Brotman would be a "net" payer under the Program, since the fee assessments on Brotman exceeded by approximately $1,074,000 and

Confidential LGP-SBC-000001104

$4,000,000 the supplemental payments that Brotman received as part of the Program. Accordingly, on October 6, 2010, the Company notified the California Department of Healthcare Services ("DHCS") that Brotman was opting out of the Program.

Brotman did not pay the required fee assessments under the Program. Beginning February 14, 2011, the DHCS began withholding against amounts otherwise due Brotman, in the amount of $65,000 per week indicating that withholdings would continue for 108 weeks and total approximately $7,000,000. Through September 30, 2012 and 2011, a total of approximately $2,986,000 and $1,772,000, respectively, had been withheld against Brotman's Medi-Cal payments. As of September 30, 2012 and 2011, Brotman has recorded a liability of approximately $5,494,000 and $4,800,000, respectively, representing the accrued loss above, as well as deferred recognition of payments received from managed care plans. Subsequent to September 30, 2012, the Company has settled this matter with the DHCS (see Note 17), whereby approximately $2,000,000 of the balance was forgiven by the DHCS and the remaining balance due is payable over a 10 year period.

All amounts received were reflected in net patient revenue, and all amounts paid were reflected in hospital operating expenses. As of September 30, 2012, The Company had approximately $33,473,000 of payments reflected in "hospital fee program receivable" and as of September 30, 2011, the Company had $8,841,000, reflected in "prepaid hospital fee program provider tax". As of September 30, 2012 and 2011, approximately $19,777,000 and $19,590,000, respectively, of receipts were reflected in "hospital fee program liability and deferred revenue", on the accompanying consolidated balance sheets.

Total California Hospital Fee program revenues and expenses recognized during the years ended September 30, 2012 and 2011 were as follows (in thousands):

Year Ended September 30,	**2012**	2011
Hospital services revenues	**$ 95,871**	$ 59,594
Hospital operating expenses	**63,774**	45,199
Net pre-tax impact	**$ 32,097**	$ 14,395

Collective Bargaining Agreements

The collective bargaining agreement entered into between Hollywood Community Hospital, which is one of the hospitals under the consolidated group of Alta Hospitals System, LLC, and Service Employees International Union, United Healthcare Workers-West ("SEIU"), covers a small group of Hollywood Community Hospital's employees and expired on May 9, 2011. The parties have agreed on a new collective bargaining agreement, which is still being finalized. In addition, approximately 77% of the employees of Brotman are part of a collective bargaining agreement with the SEIU or the California Nurses Association ("CNA"). Brotman's current agreement with SEIU expires on September 30, 2013, and Brotman's agreement with CNA expired on October 31, 2012. Brotman is currently in negotiations with CNA on a new collective bargaining agreement.

Tangible Net Equity ("TNE") requirement

The Company's affiliated physician organizations must comply with a minimum working capital requirement, Tangible Net Equity ("TNE") requirement, cash-to-claims ratio and claims payment requirements prescribed by the California Department of Managed Health Care. TNE is defined as net assets, less intangibles and amounts due from affiliates, plus subordinated obligations. At September 30, 2012, the Company and the affiliated physician organizations were in compliance with these regulatory requirements.

Employee Health Plans

Brotman offers self-insured HMO and PPO plans to employees. Employee health benefits are administered by a local claims processor, based on plan coverage and eligibility guidelines determined by Brotman, as well as Brotman's collective bargaining agreements. A commercial insurance policy covers losses in excess of $200,000 per occurrence. An actuarially estimated liability of approximately $520,000 and $595,000 for incurred but not reported claims has been included in accrued salaries, wages, and benefits as of September 30, 2012 and 2011, respectively.

The Company otherwise offers fully insured HMO and PPO plans to employees. Employee health benefits are administered by a commercial insurance carrier, based on plan coverage and eligibility guidelines determined by Prospect Medical Group. The insurance policies are guaranteed cost and Prospect incurs no claim liability if terminated.

Provider Contracts

Many of the Company's payer and provider contracts are complex in nature and may be subject to differing interpretations regarding amounts due for the provision of medical services. Such differing interpretations may not come to light until a substantial period of time has passed following contract implementation. Liabilities for claims disputes are recorded when the loss is probable and can be estimated. Any adjustments to reserves are reflected in current operations.

12. Defined Contribution Plan

Each of the Company's reporting units — Alta, Brotman, Nix, Prospect and ProMed — sponsor a defined contribution plan covering substantially all employees who meet certain eligibility requirements. Under these plans, employees can contribute up to 100% of their compensation up to the IRS deferred annual maximum. There is currently no company match under any of the plans, except for Nix, for which the expense for the employer match was $215,000 from February 1, 2012 (acquisition) to September 30, 2012. Additionally, in the year ended September 30, 2011 Brotman made a matching employer contribution related to 2009 of $215,000. Total expenses under the plans were approximately $92,000 and $88,000 during the years ended September 30, 2012 and 2011, respectively.

13. Accrued Medical Claims and Other Healthcare Costs Payable

The following table presents the roll-forward of incurred but not reported ("IBNR"), claims reserves as of and for each of the fiscal years ended September 30, 2012 and 2011 (in thousands):

September 30,	2012	2011
IBNR as of beginning of year	$ 23,301	$ 17,859
Medical group claim expenses incurred during the year:		
Related to current year	109,494	95,940
Related to prior year	(2,821)	(377)
Total incurred	106,673	95,563
Medical group claims paid during the year:		
Related to current year	(83,608)	(72,957)
Related to prior year	(19,381)	(17,164)
Total paid	(102,989)	(90,121)
IBNR as of end of year	$ 26,985	$ 23,301

Following is a table showing the details of the medical group cost of revenues per the consolidated statements of operations (in thousands):

Years Ended September 30,	2012	2011
Capitation expense	$ 74,457	$ 73,939
Fee-for-service claims expense	76,340	75,905
Other physician compensation	5,738	3,599
Other cost of revenues	1,777	244
Total cost of revenues	$ 158,312	$ 153,687

14. Joint Venture

The Company (through Prospect Medical Group, Inc.) and an unrelated third party, AMVI Care Health Network, Inc. ("AMVI") are partners in a joint venture initially formed to service Medi-Cal (Medi-Cal is the California Medicaid program) members under the CalOptima program in Orange County, California. Healthy Families and OneCare members were subsequently added to the joint venture arrangement. The Company does not consolidate the joint venture. The Company includes in its consolidated financial statements only the net results attributable to those enrollees specifically identified as assigned to it, together with the management fee that it charges the joint venture partner for managing those enrollees specifically assigned to AMVI. Costs incurred by the Company in managing the joint venture are included in general and administrative expenses in the accompanying consolidated financial statements. As of September 30, 2012 and 2011, the amounts due to the joint venture of approximately $758,000 and $649,000, respectively, which

Confidential LGP-SBC-000001107

represent advance capital distributions from the joint venture, were included in accounts payable and other accrued liabilities in the accompanying consolidated financial statements.

Summarized unaudited financial information for the unconsolidated joint venture as of and for each of the years ended September 30, 2012 and 2011 is as follows (in thousands):

September 30,	2012	2011
Cash	$ 663	$ 887
Receivables	1,791	1,508
Total assets	$ 2,454	$ 2,395
Accrued medical claims	$ 1,100	$ 1,177
Other payables	48	22
Other partner's capital	1,305	1,195
Prospect's capital	1	1
Total liabilities and partners' capital	$ 2,454	$ 2,395
Years Ended September 30,	2012	2011
Revenues	$ 13,695	$ 11,785
Income before income taxes	$ 2,063	$ 1,581
Prospect's equity income	$ 2,606	$ 2,150
Management fees earned by Prospect	$ 826	$ 709

15. Segment Information

The Company's operations are organized into three reporting segments: (i) Hospital Services — which is comprised of the Alta, Brotman, and Nix Health reporting units, owns and operates seven hospitals — Los Angeles Community Hospital, Hollywood Community Hospital, Norwalk Community Hospital, Van Nuys Community Hospital, Brotman Medical Center, Nix Medical Center and Nix Specialty Health Center; (ii) Medical Group — which is comprised of the Prospect and ProMed reporting units, provides management services to affiliated physician organizations that operate as independent physician associations or medical practice groups and certain unaffiliated independent physician associations; and (iii) Corporate, which represents expenses incurred in Prospect Medical Holdings, Inc., that were not allocated to the other reporting segments.

The accounting policies of the reporting segments are the same as those described in the summary of significant accounting policies (see Note 2). The Company evaluates financial performance and allocates resources primarily based on earnings from operations before interest expense, interest income, income taxes, depreciation and amortization, as well as income or loss from operations before income taxes, excluding infrequent or unusual items.

Confidential LGP-SBC-000001108

The reporting segments are strategic business units that offer different services within the healthcare industry. Business in each reporting segment is conducted by one or more direct or indirect wholly-owned subsidiaries of the Company and certain affiliated physician organizations controlled through assignable option agreements and management services agreements. The Company voluntarily discloses the following table which summarizes certain information for each of the reporting segments regularly provided to and reviewed by the chief operating decision maker (in thousands):

	As of and for the Year Ended September 30, 2012				
	Hospital Services (3)	Medical Group (2)	Corporate (1)	Intersegment Eliminations	Consolidated
Revenues from external customers	$ 487,299	$ 203,806	$ -	$ -	$ 691,105

Segment capital expenditures, net of dispositions	$ 8,375	$ 121	$ 31	$ -	$ 8,527
Segment goodwill	$ 130,912	$ 22,338	$ -	$ -	$ 153,250

Confidential

(1) Prospect files consolidated tax returns (effective February 1, 2012, including Brotman) and allocates costs for shared services and corporate overhead to each of the reporting segments. With the exception of Brotman and Nix Health, all debt, including debt related to the Medical Group and Hospital Services segment, is recorded at the Parent Entity level. The Company does not allocate interest expense related to acquisition debt to the operating segments.

(2) Prospect Medical Group, Inc. (which serves as a holding company for the other affiliated physician organizations) files consolidated tax returns.

(3) The Hospital Services segment, includes the results for Nix Health from February 1, 2012 through September 30, 2012. Included in revenues from external customers are $9,897,000 of other revenues related to meaningful use incentive payments and rental revenue from operating leases.

16. Fair Value of Financial Instruments

Relevant accounting guidance establishes a framework for measuring fair value and clarified that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants.

The guidance requires disclosure about how fair value is determined for assets and liabilities and establishes a hierarchy for which these assets and liabilities must be grouped, based on significant levels of inputs as follows: Level 1 quoted prices in active markets for identical assets or liabilities; Level 2 quoted prices in active markets for similar assets and liabilities and inputs that are observable for the asset or liability; or Level 3 unobservable inputs for the asset or liability, such as discounted cash flow models or valuations. The determination of where assets and liabilities fall within this hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The Company's Level 1 assets include cash and cash equivalents (certificates of deposit and money market mutual funds) and investments.

Financial Items Measured at Fair Value on a Recurring Basis

The following table sets forth the Company's financial assets and liabilities measured at fair value on a recurring basis and where they are classified within the hierarchy (in thousands):

	Total	Level 1	Level 2	Level 3
As of September 30, 2012				
Certificates of deposit and money market mutual funds	$ 633	$ 633	$ -	$ -
As of September 30, 2011				
Money market mutual funds	$ 538	$ 538	$ -	$ -

The Company's investments are classified within Level 1 of the fair value hierarchy because they are valued using quoted market prices.

Confidential LGP-SBC-000001110

Nonfinancial Items Measured at Fair Value on a Nonrecurring Basis

Nonfinancial assets such as goodwill and identifiable intangible assets are measured at fair value when there is an indicator of impairment and recorded at fair value only when impairment is recognized. The Company performs an annual impairment test on the goodwill, and performs an impairment test on the intangibles as and when there are indications of impairment.

The fair values of the Company's current financial assets and liabilities approximate their reported carrying amounts. The carrying values and the fair values of non-current financial assets and liabilities that qualify as financial instruments under the guidance are as follows (in thousands).

	2012		2011	
September 30,	**Carrying Amount**	**Fair Value**	Carrying Amount	Fair Value
Liabilities:				
Long-term debt	**$ 326,958**	**$ 346,463**	$ 144,611	$159,012

The fair value of the Company's long-term debt was determined based on market prices.

17. Subsequent Events (Unaudited)

Acquisition of New Genesis Medical Associates

On October 1, 2012, PMS entered into an Assignable Option Agreement and a long-term Management Services Agreement with New Genesis Medical Associates, Inc. ("NGMA"), which simultaneously acquired, for an acquisition price of $400,000, substantially all of the assets of a two physician family medicine practice group, with approximately $1 million in annual revenue, located in Orange County, CA. The Assignable Option Agreement provides PMS the right to designate the single physician shareholder of NGMA upon the same terms and conditions applicable under the Assignable Option Agreement entered into with Prospect Medical Group, Inc. (see Note 1) and the Management Services Agreement designates PMS to administer all non-medical components of the business for NGMA. The assets of NGMA have been pledged as collateral for the Company's obligations under the PMH 2019 Notes and the PMH Senior Secured Credit Facility.

Senior Secured Notes

On November 16, 2012, the Company closed the offering of $100 million in aggregate principal amount of 8.375% senior secured notes due 2019 (the "Additional Notes") at a price equal to 102% of the principal amount of the Additional Notes. The Additional Notes were issued in a private placement to qualified institutional buyers and form a part of the same series as the PMH 2019 Notes issued on May 3, 2012 (see Note 9).

The Additional Notes were issued under the Indenture, dated May 3, 2012 and described in Note 9, as supplemented by two supplemental indentures entered into in connection with the issuance of the Additional Notes (the "Supplemental Indentures"). The Additional Notes are treated as a single series with the previously issued PMH 2019 Notes for all purposes under the Indenture,

Confidential LGP-SBC-000001111

including, without limitation, restrictive covenants, waivers, amendments, redemptions and offers to purchase. For a description of the terms and conditions of the PMH 2019 Notes, see Note 9 above. Following the November 16, 2012 closing, the aggregate principal amount of outstanding PMH 2019 Notes is $425 million.

Prior to closing the issuance of the Additional Notes, the Company was required to obtain the consent of the majority in interest of its PMH 2019 Notes issued on May 3, 2012 to certain amendments to the Indenture contained in the first Supplemental Indenture. The Company obtained such consent from the holders of approximately $324 million in aggregate principal amount of outstanding PMH 2019 Notes and paid an aggregate consent fee of approximately $8.9 million.

The proceeds from the offering, together with approximately $10.9 million of the Company's available cash, were utilized to pay a dividend to the stockholders of the Company's indirect parent, Ivy Holdings Inc., in an aggregate amount equal to $100 million, to pay the aforementioned $8.9 million consent fee and to pay approximately $2.5 million for other fees and expenses related to the offering.

In connection with the issuance of the Additional Notes, the Company entered into an amendment of its Credit Agreement governing the PMH Senior Secured Credit Facility (see Note 9) that waived and amended certain provisions of the Credit Agreement, including certain restrictive covenants.

California Hospital Provider Fee

On November 15, 2012 the Company entered into a settlement agreement with DHCS with regards to Brotman's liability under AB 1383, SB 90 and SB 335, as discussed in Note 11. Under the terms of the agreement, the DHCS agreed to forgive approximately $2,000,000 of the fees due under AB 1383, which will be recorded by the Company during the year ending September 30, 2013. The remaining liability will be repaid by the Company monthly over a 10-year period without interest or penalties. The DHCS will no longer withhold against any other amounts due to Brotman unless the Company is delinquent on payments owed under the agreement.
