a. **Entity Access**. Entity shall have the right, at its expense, during Associate's normal business hours, to evaluate, test, and review Associate's policies and procedures related to the Requirements, facilities, books, records and systems which contain Entity's PHI in order to ensure compliance with the terms and conditions of this Addendum and the Requirements. Entity shall have the right to conduct such audit by use of its own employees or by use of outside consultants and auditors. Associate agrees to cooperate with Entity, and to otherwise provide any reasonable assistance to Entity necessary for Entity to carry out any audit as permitted herein, at no additional cost to Entity. Upon Entity's written request, Associate agrees to provide an annual written attestation of its compliance to the Requirements in a form and format provided at the discretion of the Entity in order to obtain satisfactory assurances in accordance with the Requirements that the Associate will appropriately safeguard the information with which it is entrusted. Entity shall protect the confidentiality of all confidential and proprietary information of Associate to which Entity or its agents have access during the course of such audit. The fact that Entity inspects, or fails to inspect, or has the right to inspect, Associate's facilities, systems, books, records, agreements, policies and procedures does not relieve Associate of its responsibility to comply with this Addendum, nor does Entity's (i) failure to detect or (ii) detection, but failure to notify Associate or require Associate's remediation of any unsatisfactory practices, constitute acceptance of such practice of waiver of Entity's enforcement rights under this Addendum. Notwithstanding the foregoing, Entity assumes no obligation to perform any inspection or audit of Associate's practices or policies, and assumes no liability for any violation or breach by Associate, whether an audit is performed or not.

b. **Government Access**. Associate will make its internal practices, books and records on the use and disclosure of PHI available to the Secretary of the Department of Health and Human Services to the extent required for determining compliance with the Requirements. Notwithstanding this provision, no attorney-client, accountant-client or other legal privilege will be deemed waived by Associate or Entity as a result of this Section.

15. **Notices**. Any notices required under this Addendum will be sent to the parties at the following address by first class mail, fax or hand delivery:

Entity:	Associate:
RCHP-Ottumwa, LLC d/b/a Ottumwa Regional Health Center 1001 Pennsylvania Avenue Ottumwa, IA 52501 Attention: Hospital CEO	Apogee Medical Management, Inc. 2525 East Camelback Road Suite 1100 Phoenix, AZ 85016 Attention: Compliance Department

With copy to:

RE: AMENDMENTS or TERMINATION	RE: PRIVACY BREACHES	RE: SECURITY INCIDENTS:
RegionalCare Hospital Partners 103 Continental Place, Suite 200 Brentwood, TN 37027 Attn: Corporate Privacy Officer	RegionalCare Hospital Partners 103 Continental Place, Suite 200 Brentwood, TN 37027 Attn: Corporate Privacy Officer	RegionalCare Hospital Partners 103 Continental Place, Suite 200 Brentwood, TN 37027 Attn: Chief Information Security Officer

16. **Indemnification**. Notwithstanding anything to the contrary in the Agreement, if a Breach or other violation of the Requirements occurs due solely to the acts or omissions of one party, that party shall indemnify, defend and hold the other party harmless from and against any and all losses, liabilities, damages, costs and expenses (including reasonable attorneys' fees) arising solely out of such Breach or other violation of the Requirements. This Section shall survive termination of the Agreement and/or this Addendum and is without regard to any limitation or exclusion of damages provision otherwise set forth in the Agreement.

17. **PHI Disclaimer and Ownership**. PHI IS PROVIDED TO ASSOCIATE SOLELY ON AN "AS IS" BASIS. ENTITY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, AND FITNESS FOR A PARTICULAR PURPOSE. As between Entity and Associate, any PHI disclosed, delivered or provided to Associate in connection with the Agreement, shall be deemed to be the exclusive property of Entity. In no event shall Associate or its subcontractors claim any rights with respect to such PHI. Neither Associate nor its agents or subcontractors shall transfer or export any PHI provided by Entity outside the United States. Additionally, Associate shall not use, authorize to use or disclose the PHI for the purpose of developing information or statistical compilations for use by third parties or other division or subsidiary of Associate or for any commercial exploitation.

18. **Amendment and Modification**. This Addendum may be amended only as set forth in the Agreement, except that Entity may amend the Addendum to the extent necessary to comply with new regulatory requirements by giving written notice to Associate, and such amendment shall become effective as of the later of 30 days following such notice or the date specified in the notice.

19. **State Privacy Laws**. Associate shall comply with applicable state privacy or state information security laws to the extent that such state privacy or information security laws are not preempted by HIPAA.

20. **Encryption**. Any hard drives on any computers or laptops that are used to access, receive, send, or maintain Entity's PHI must be Encrypted and all communications must be Encrypted if sending PHI. Mobile devices or external or removable media, including, without limitation, backup tapes, used for sending, receiving, or storing PHI must be Encrypted. For the purposes of this Section, "Encryption" shall mean any encryption standards that meet the U.S. Department of Health and Human Services Guidance specifying the Technologies and Methodologies that render Protected Health Information Unusable, Unreadable, or Indecipherable to Unauthorized Individuals for Purposes of the Breach Notification Requirements under Section 13402 of HITECH Act.

21. **No Exclusion**. None of Associate's officers, directors, employees or agents is an Ineligible Person. An "Ineligible Person" is an individual or entity who: (i) is currently excluded, debarred, suspended, or otherwise ineligible to participate in the Federal health care programs or in Federal procurement or non-procurement programs; or (ii) has been convicted of a criminal offense that falls within the range of activities described in 42 U.S.C. § 1320a-7(a), but has not yet been excluded, debarred, suspended, or otherwise declared ineligible. Associate agrees to disclose immediately to Entity if this Section changes and Entity may immediately terminate the Agreement for breach.

22. **Compliance Plan**. Associate acknowledges that Entity has adopted and implemented a code of conduct, compliance program, compliance hotline and related policies (the "Corporate Compliance Program"). Entity acknowledges that it has received information about the Corporate Compliance Program, some of which is available at RegionalCare Hospital Partner's website under compliance, and that it and its employees and agents shall abide by the Corporate Compliance Program policies and procedures to the extent they are relevant and applicable to the services performed under the Agreement. Associate further agrees that it shall promptly notify the appropriate individuals set forth in the Corporate Compliance Program of any violations of the code of conduct and Corporate compliance policies of which it becomes aware and attend Corporate Compliance Program meetings as reasonably requested by Entity.

23. **Obligations of the Entity**. The Entity will notify the Associate of any limitation in the Entity's Notice Of Privacy Practices, as required by the Requirements, that may affect the Associate's use or disclosure of PHI; the Entity will notify the Associate of any changes in or revocation of an individual's permission to use or disclose PHI, to the extent that such change may affect Associate's use or disclosure of PHI; and the Entity will notify the Associate of any restriction regarding the use or disclosure of an individual's PHI that the Entity has agreed to in accordance with 45CFR§ 164.522, to the extent that such restriction may affect Associate's use or disclosure of the PHI.

IN WITNESS WHEREOF, this Addendum is entered into between the parties to be effective as of August 1, 20 14.

SCHEDULE E

QUALITY METRICS

At-Risk Model

Scores shall be earned at Ottumwa Regional Health Center ("Medical Center"). The maximum amount at risk is Sixty-Four Thousand Eight Hundred Dollars ($64,800.00) per year if none of the measures is met at Medical Center. If all measures are met at Medical Center, a maximum additional amount of Sixty-Four Thousand Eight Hundred Dollars ($64,800.00) shall be paid to Company. Such amounts shall be subject to the pro rata performance payout/penalty provision outlined below.

As part of the Management Fee payment calculation, Company may earn or lose an additional amount of up to Sixteen Thousand Two Hundred Dollars ($16,200.00) per quarter for an annual total of Sixty-Four Thousand Eight Hundred Dollars ($64,800.00) as a quality metrics payout amount ("Quality Metrics Payout"). The Quality Metrics Payout shall be earned or lost when the goals outlined in this Schedule E are or are not achieved. To the extent Company has achieved the requisite goals, Medical Center shall make an additional quarterly payment for the Quality Metrics Payout to Company, as outlined below. Results shall be reported within sixty (60) days of the end of each quarter. The Quality Metrics Payout shall be paid within fifteen (15) days of official posting of results. If Medical Center fails to report the results to Company within the aforementioned time frame in any given quarter, the Quality Metrics Payout shall be deemed to have been earned, and Medical Center shall pay Company the quarterly Quality Metrics Payout of Sixteen Thousand Two Hundred Dollars ($16,200.00). If Company does not achieve the goals outlined in this Schedule E, Medical Center shall receive a credit, and Company shall subtract the corresponding amount from the next month's Management Fee.

90.0% – < 95.0%	75%
≥ 95.0%	100%

9. Physician Callbacks to Patients (9.1%) $5,891

An eligible physician is defined as an Apogee provider who has attended Apogee University.

Eligible physician callbacks are triggered by the discharge code and the discharge disposition.

Discharge code:

- 99238
- 99239
- 99315
- 99316
- 99217
- 99234
- 99235
- 99236

Discharge disposition:

- Home/Self Care
- Physician did not specify
- Home Hospice
- Left against medical advice (AMA)
- Home Health Service

Below the chart is a grid outlining the individual performance and volumes in each category.

Eligible – volume of events/patients marked as meeting the requirements for callback.

Called – volume of callbacks marked as called by the provider.

Needs Follow-up – the provider has marked these patients as called and as requiring follow-up.

Not Called – volume of callbacks not completed, either marked by provider or allowed time has expired.

Call Not Needed – marked by the provider as not needing a call. Some valid reasons include:

- Homeless
- Demented
- Hearing-impaired
- Patient readmitted or still in-house
- Non-English-speaking
- Drug-seeking

% Required Called – the formula for determining the overall performance for the period: (Called + Called Needs Follow-up) / (Eligible – Call Not Needed) = **Required Called %**

Result	Performance Payout/Penalty
< 60.0%	-100%
60.0% – < 65.0%	-75%
65.0% – < 70.0%	-50%
70.0% – < 75.0%	-25%
75.0% – < 80.0%	25%
80.0% – < 85.0%	50%
85.0% – < 90.0%	75%
≥ 90.0%	100%

10. Physician Discharge Orders Written before 12:00 P.M., Monthly Average for Measurement Quarter (9.1%) $5,891

Result	Performance Payout/Penalty
< 30.0%	-100%
30.0% – < 35.0%	-75%
35.0% – < 40.0%	-50%
40.0% – < 45.0%	-25%
45.0% – < 50.0%	25%
50.0% – < 55.0%	50%
55.0% – < 60.0%	75%
≥ 60.0%	100%

11. Physician Order Timed, Dated, and Signed within 48 Hours of Order (9.1%) $5,891

Result	Performance Payout/Penalty
< 30.0%	-100%
30.0% – < 40.0%	-75%
40.0% – < 50.0%	-50%
50.0% – < 60.0%	-25%
60.0% – < 70.0%	25%
70.0% – < 80.0%	50%
80.0% – < 90.0%	75%
≥ 90.0%	100%

AMENDED & RESTATED CHARTER
OF THE AUDIT COMMITTEE
OF THE BOARD OF DIRECTORS

I. PURPOSE

The Audit Committee (the *"**Committee**")* is appointed by the Board of Directors (the "***Board**")* of Lifepoint Health, Inc. (the *"**Company**")* to assist the Board in overseeing (i) the integrity of the Company's financial statements, (ii) the independent auditor's qualifications, independence and performance, (iii) the performance of the Company's internal audit function, and (iv) the Company's compliance with legal, ethical and regulatory requirements as it relates to financial reporting matters. In performing its duties, the Committee shall seek to maintain an open avenue of communication among the Board, the independent auditor, the internal auditors and the management of the Company.

While the Committee has the responsibilities and authority set forth in this Charter, management and the independent auditor are responsible for planning or conducting audits and determining that the Company's financial statements are complete and accurate and are in accordance with generally accepted accounting principles. Nothing contained in this Charter is intended to expand applicable standards of liability under legal or regulatory requirements for the directors of the Company or members of the Committee.

The independent auditor is ultimately accountable to the Committee, which has the sole authority to appoint, oversee and, where appropriate, replace the independent auditor. The Committee has direct responsibility for the compensation and oversight of the work of the independent auditor (including resolution of disagreements between management and the independent auditor regarding financial reporting) in connection with preparing or issuing an audit report or performing other audit, review or attest services for the Company. The independent auditor shall report directly to the Committee.

II. RESPONSIBILITIES

In carrying out its responsibilities, the Committee's policies and procedures should remain flexible to enable the Committee to react to changes in circumstances and conditions so that it can fulfill its oversight responsibilities. In addition to such other duties as the Board may from time to time assign, the Committee shall:

Financial Statements

- Review and discuss with management and the independent auditor the Company's annual audited financial statements. In the event the Company is required to (i) deliver an annual report pursuant to any relevant debt document or (ii) file an annual report on Form 10-K (any such annual report referred to in clause (i) or (ii), an "***Annual Report**"),* such review and discussion shall be completed prior to the delivery or filing, as applicable, of the Company's Annual Report and shall include disclosures made in Management's Discussion and Analysis of Financial Condition and Results of Operations, and the Committee shall recommend to the Board whether the audited financial statements should be included in the Annual Report.

- Review and discuss with management the Company's quarterly financial statements. In the event the Company is required to (i) deliver a quarterly report pursuant to any relevant debt document or (ii) file a quarterly report on Form 10-Q (any such quarterly report referred to in clause (i) or (ii), a *"**Quarterly Report**"),* such review and discussion shall be completed prior to the delivery or filing, as applicable, of the Company's Quarterly Report and shall include disclosures made in Management's Discussion and Analysis of Financial Condition and Results of Operations.

- Discuss with management and the independent auditor significant financial reporting issues and judgments made in connection with the preparation of the Company's financial statements, including any significant changes in the Company's selection or application of accounting principles, and the judgments of each of management and the independent auditor as to the quality and appropriateness of the Company's accounting principles as applied in its financial reporting.

- In the event the Company becomes subject to the Securities and Exchange Commission (the "SEC") filing requirement with respect to management's report on internal control over financial reporting and the independent auditor's attestation of the Company's internal control over financial reporting, review and discuss with management and the independent auditor such report and the independent auditor's attestation of the Company's internal control over financial reporting prior to the delivery or filing, as applicable, of the Company's Annual Report.

- If applicable, review and discuss the reports required to be delivered by the independent auditor pursuant to Section 10A(k) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") regarding:

    - all critical accounting policies and practices to be used;

    - all alternative treatments of financial information within generally accepted accounting principles that have been discussed with management, ramifications of the use of such alternative disclosures and treatments, and the treatment preferred by the independent auditor; and

    - other material written communications between the independent auditor and management, such as any management letter or schedule of unadjusted differences.

- Discuss with management the Company's earnings press releases, if any, including the use of "pro forma" or "adjusted" non-GAAP information, as well as financial information and earnings guidance provided to analysts and rating agencies. Such discussion may be done generally (consisting of discussing the types of information to be disclosed and the types of presentations to be made) and the Committee need not discuss in advance each earnings release or each instance in which the Company may provide earnings guidance.

- Discuss with management and the independent auditor the effect of regulatory and accounting initiatives, as well as off balance sheet structures, on the Company's financial statements.

- Discuss with the independent auditor the matters required to be discussed by the independent auditor with the Audit Committee under applicable auditing standards, and under the rules and regulations of the SEC and other applicable authorities (as such standards and rules and regulations may be established or amended from time to time). In particular, the Committee and independent auditor shall discuss, among other things, matters that arise during the audit, including

any difficulties encountered in the course of the audit work, any restrictions on the scope of activities or access to requested information, and any significant disagreements with management.

- Review and discuss with management and the independent auditor any major issues as to the adequacy of the Company's internal controls, any special audit steps adopted in light of material control deficiencies and the adequacy of disclosures about changes in internal control over financial reporting.

- To the extent applicable, review disclosures made to the Committee by the Company's CEO and CFO during their certification process for the Annual Report and Quarterly Report about any significant deficiencies in the design or operation of internal control over financial reporting or material weaknesses therein and any fraud involving management or other employees who have a significant role in the Company's internal control over financial reporting.

- Keep the independent auditor informed of the Committee's understanding of the Company's relationships and transactions with related parties that are significant to the Company; and review and discuss with the independent auditor the auditor's evaluation of the Company's identification of, accounting for, and disclosure of its relationships and transactions with related parties, including any significant matters arising from the audit regarding the Company's relationships and transactions with related parties.

Oversight of the Company's Relationship with the Independent Auditor

- Select, oversee and, if appropriate, replace the Company's independent auditor, considering qualifications, independence and performance; approve the scope of the proposed audit for each fiscal year and the fees and other compensation to be paid to the independent auditor therefor.

  In evaluating the independent auditor's qualifications, performance and independence, the Committee should discuss with the independent auditor the independent auditor's independence, take into account the opinions of management and the internal auditors and consider whether the independent auditor's quality controls are sufficient and whether the provision of permitted non-audit services is compatible with maintaining the auditor's independence. The Committee shall present its conclusions with respect to the independent auditor to the Board.

- Review and evaluate the lead partner of the independent auditor's audit team for the Company.

- Obtain and review a report from the independent auditor at least annually regarding:

  - the independent auditor's internal quality-control procedures;

  - any material issues raised by the most recent internal quality control review, or peer review, of the independent auditor, or by any inquiry or investigation by governmental or professional authorities within the preceding five years respecting one or more independent audits carried out by the independent auditor;

  - any steps taken to deal with any such issues; and

- all relationships between the independent auditor and the Company, including the matters set forth in any letter from independent auditors required by applicable auditing standards.

- Ensure the rotation of the lead audit partner having primary responsibility for the Company's audit and the audit partner responsible for reviewing the audit as required by law.

- Establish policies for the Company's hiring of employees or former employees of the independent auditor.

- Consider whether there should be regular rotation of the Company's independent auditor.

- Discuss with the independent auditor material issues on which the national office of the independent auditor was consulted by the Company's audit team.

- Preapprove (or adopt appropriate procedures to pre-approve) all auditing services, internal control-related services and permitted non-audit services (including the fees and terms thereof) to be performed for the Company by the independent auditor, subject to such exceptions for non-audit services as permitted by applicable laws and regulations. The Committee may when it deems appropriate form and delegate this authority to a subcommittee consisting of one or more Committee members, including the authority to grant preapprovals of audit and permitted non-audit services, provided that decisions of such subcommittee to grant preapprovals shall be presented to the full Committee at its next meeting.

Oversight of the Company's Internal Audit Function

- Review and approve the internal audit department charter at least bi-annually, or in the event of significant changes.

- Participate in discussions and decisions regarding the appointment and removal of the senior officer responsible for the internal audit function.

- Ensure the senior officer responsible for the internal audit function has unrestricted access to directly interact with the committee, without management present, during routine committee meetings and otherwise as circumstances warranting such discussions arise.

- Affirm the internal audit function's unrestricted access to any and all company records, physical properties, and personnel.

- Review and discuss with management and the senior officer responsible for the internal audit function the annual audit plan and its alignment with risks identified as part of the Company's enterprise risk management program, the adequacy of the internal audit function's budget and staffing to carry out the annual audit plan, and the organizational structure and qualifications of the persons performing the internal audit function.

- Receive and review communications from the senior officer responsible for internal audit regarding the department's performance relative to its plan and other matters.

- Review and discuss with management and the senior officer responsible for the internal audit function significant reports to management prepared by the internal audit function and management's responses thereto.

- Review with the senior officer responsible for the internal audit function any difficulties encountered by the internal audit function in the course of its audits, including any restrictions on the scope of its work or access to required information.

Oversight of Other Compliance and Regulatory Matters Related to Financial Reporting

- Review and approve any related person transactions in which the Company is a participant and for which disclosure would be required under Item 404(a) of Regulation S-K.

- Review and approve any waivers of the Company's Code of Ethics for Senior Financial Officers and Chief Executive Officer requested by the Company's Chief Executive Officer, Chief Financial Officer or Controller (or persons performing similar functions) and recommend to the Board whether a particular waiver requested by any of such officers should be granted.

- Review and approve procedures for the receipt, retention and treatment of complaints received by the Company regarding accounting, internal accounting controls or auditing matters, and the confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters.

- Discuss with management and the independent auditor any published reports or correspondence with regulators or governmental agencies that raise material issues regarding the Company's financial statements or accounting policies.

- Discuss with the Company's Chief Legal Officer and/or outside counsel legal matters that may have a material impact on the financial statements.

- Discuss and review the Company's policies and guidelines with respect to risk assessment and risk management, and discuss with management the Company's major financial and other risk exposures and the steps management has taken to monitor and control such exposures.

- Through the Committee’s Chairperson, coordinate with the Compliance and Enterprise Risk Committee as necessary or appropriate with respect to material financial risks.

- If applicable, obtain from the independent auditor assurance that Section 10A(b) of the Exchange Act has not been implicated.

Other

- Regularly report Committee activities to the Board and make such recommendations to the Board as the Committee deems appropriate.

- Prepare for the Board an annual performance evaluation of the Committee.

- Annually review and reassess the adequacy of this Charter (recommending any appropriate changes to the Board).

- To the extent required by applicable SEC rules and regulations, provide or approve a report for inclusion in the Company's proxy statement for its annual meeting of shareholders.

- Oversee the Related Person Transactions Policies and Procedures and perform any responsibilities delegated to the Committee therein.

- Oversee and periodically review management's processes and procedures for assessing, identifying and managing material risks from cybersecurity threats to the Company and the effectiveness of the Company's information security processes and procedures; periodically evaluate the knowledge, experience and capabilities of the members of the Committee and management with respect to cyber security risk and information security processes and procedures; and evaluate the nature, scope, timing and impact to the Company of any material cybersecurity incidents.

III. COMPOSITION

The Committee shall be comprised of three or more members (including a Chairperson). The members of the Committee and the Chairperson shall be appointed by the Board and serve at the pleasure of the Board. A Committee member (including the Chairperson) may be removed at any time, with or without cause, by the Board. The Board shall have the power to change the members of the Committee and fill any vacancies occurring on the Committee for any reason.

All Committee members shall be financially literate, as determined by the Board. Committee members may enhance their familiarity with finance and accounting by participating in educational programs conducted by the Company or an outside consultant. The Chairperson shall maintain regular communication with the chief executive officer, chief financial officer, the lead partner of the independent auditor and the senior officer responsible for the internal audit function.

The Committee may have, but is not required to have, one or more members that (i) meet the independence requirements of the New York Stock Exchange (the "NYSE") and Rule 10A-3(b)(1) under the Exchange Act, or (ii) qualify as an "audit committee financial expert" as defined by the SEC. In the event that the Company is required to deliver or file, as applicable, an Annual Report, the Company shall disclose in the Annual Report (a) whether or not the Committee has at least one member who is an audit committee financial expert, (b) if there is an audit committee financial expert, whether such audit committee financial expert is "independent" in accordance with the requirements established by the NYSE, and (c) if there is no audit committee financial expert, the reasons why there is none.

IV. MEETINGS

The Committee shall meet as often as it determines necessary, but at least quarterly, to enable it to fulfill its responsibilities. The Committee shall meet at the call of its Chairperson and shall be governed by the same rules regarding notice of meetings and waiver of notice as are applicable to the Board. The Committee may meet by telephone conference call or by any other means permitted by law or the Company's Bylaws. A majority of the members of the Committee shall constitute a quorum. The Committee shall act on the affirmative vote of a majority of members present at a meeting at which a quorum is present. Subject to the Company's Bylaws, the Committee may act by unanimous written

consent of all members in lieu of a meeting. The Committee shall determine its own rules and procedures, including designation of a chairperson pro tempore in the absence of the Chairperson, and designation of a secretary. The secretary need not be a member of the Committee and shall attend Committee meetings and prepare minutes. The Committee shall keep written minutes of its meetings, which shall be recorded or filed with the books and records of the Company. Any member of the Board shall be provided with copies of such Committee minutes if requested.

The Committee may ask members of management, employees, outside counsel, the independent auditors, internal auditors or others whose advice and counsel are relevant to the issues then being considered by the Committee, to attend any meetings and to provide such pertinent information as the Committee may request.

The Chairperson of the Committee shall be responsible for leadership of the Committee, including preparing the agenda, presiding over Committee meetings, making Committee assignments and regularly reporting the Committee's actions, including any significant issues or concerns that arise at meetings, to the Board.

As part of its responsibility to foster free and open communication, the Committee shall meet periodically with management, the internal auditors and the independent auditor in separate executive sessions.

V. AUTHORITY

In discharging its responsibilities, the Committee shall have the authority to engage and determine funding for independent legal, accounting or other advisors (without seeking Board approval) as the Committee determines necessary or appropriate to carry out its duties and responsibilities under this Charter. The Committee may conduct or authorize investigations into or studies of matters within the Committee's scope of responsibilities as described herein. The Company shall provide appropriate funding, as determined by the Committee, for the payment of (i) compensation to the independent auditor, and legal, accounting or other advisors engaged by the Committee and (ii) ordinary administrative expenses of the Committee that are necessary or appropriate in carrying out its duties.

Adopted and approved by the Board of Directors on September 27, 2023 and supersedes the charters approved and adopted on March 12, 2019, March 14, 2017 and September 22, 2016.

CHARTER OF THE
COMPENSATION COMMITTEE
OF THE BOARD OF DIRECTORS

I. PURPOSES

The Compensation Committee (the ***"Committee")*** is appointed by the Board of Directors (the ***"Board")*** of LifePoint Health, Inc. (the ***"Company"),*** for the purposes of (a) discharging the Board's responsibilities relating to the compensation of the Company's chief executive officer (the ***"CEO")***, (b) approving the compensation of the Company's and its subsidiaries' other executive officers, other officers, directors and Key Employees (as defined below), (c) making recommendations with respect to equity-based and other compensation to Compensation Committee of the board of managers of DSB Parent L.P. ***("Parent"),*** administering the Company's equity-based compensation plans, (d) if the Company is required to (i) deliver an annual report pursuant to any relevant debt document, (ii) file an annual report on Form 10-K (any such annual report referred to in clause (i) or (ii), an ***"Annual Report")*** or (iii) deliver or file an annual proxy statement, reviewing the disclosures in Compensation Discussion and Analysis and producing an annual compensation committee report for inclusion in the Company's Annual Report or in the Company's annual proxy statement and (e) overseeing the Board's evaluation of the Company's and its subsidiaries' senior management. For purposes hereof, the term ***"Key Employee"*** means any employee of the Company and its subsidiaries (other than non-executive physicians) whose annual cash compensation is at or greater than $1,000,000 (including base salary and bonus).

II. RESPONSIBILITIES

In addition to such other duties as the Board may from time to time assign, the Committee shall:

- in consultation with senior management, review, evaluate and recommend to the Board for approval the Company's general compensation philosophy and objectives and establish performance-based incentives that support the Company's long-term goals, objectives and interests:

- in consultation with the Compliance Committee, review and evaluate whether the Company's compensation policies are aligned with the Company's compliance obligations;

- review and approve the Company's goals and objectives relevant to the compensation of the CEO, annually evaluate the CEO's performance in light of those goals and objectives and based on this evaluation (i) determine the CEO's compensation level, including salary, bonus targets and non-equity incentive compensation and (ii) make recommendations to the Compensation Committee of the board of managers of Parent with respect to the CEO's equity compensation. In determining the long-term incentive component of the CEO's compensation, the Committee shall consider, among other factors, the Company's performance and relative shareholder return, the value of similar incentive awards to CEOs at comparable companies, and the awards given to the Company's CEO in past years;

- review and approve all non-equity based compensation for the Company's non-CEO executive officers, officers and other Key Employees of the Company and its subsidiaries, and review and make recommendations to the Compensation Committee of Parent with respect to all equity-based compensation for the Company's non-CEO executive officers, officers and other Key Employees of the Company and its subsidiaries;

- review and approve (i) all employment agreements, severance agreements, consulting agreements, change of control provisions and agreements and similar arrangements providing for severance, termination, change of control or similar payments to any current or former executive officer, officer or other Key Employee of the Company and its subsidiaries and (ii) any special supplemental benefits applicable to any current or former executive officer, officer or other Key Employee of the Company and its subsidiaries;

- review and make recommendations to the Board with respect to non-equity incentive compensation plans, policies and benefit programs for employees of the Company and its subsidiaries generally, and oversee the activities of the individuals and committees responsible for administering these plans, and review and make recommendations to the Compensation Committee of the board of managers of Parent with respect to equity-based compensation plans;

- together with the Compensation Committee of the board of managers of Parent, administer the Company's equity-based compensation plans and oversee the activities of the individuals and committees responsible for administering such plans; provided that the adoption of any such plan and the grant of any equity awards under any such plan shall be approved by the Compensation Committee of the board of managers of Parent;

- review and make recommendations to the Board with respect to the non-equity components of compensation for the members of the Board, and review and make recommendations to the Compensation Committee of the board of managers of Parent with respect to all equity-based components of compensation for the members of the Board;

- oversee the risk assessment of the Company's and its subsidiaries' compensation arrangements applicable to the Company's and its subsidiaries' executive officers and other employees and review and discuss the relationship between risk management policies and practices and compensation;

- review and make recommendations to the Board with respect to stock ownership guidelines for the Company's CEO and other executive officers and members of the Board and monitor compliance with such guidelines;

- provide oversight concerning the selection of officers, management succession planning (including developing a succession plan for the Company's CEO and other members of senior management), expense accounts, indemnification of officers, directors or employees, insurance policies for the benefit of officers, directors or employees or that cover the actions or omissions of officers, directors or employees, and separation packages;

- review and approve any recognition and/or neutrality agreement, collective bargaining agreement or other agreement arrangement or understanding with any labor organization purporting to represent any employees of the Company Group other than at individual hospital facilities;

- if the Company becomes subject to, or otherwise determines to comply with, the disclosure requirements of the Securities and Exchange Commission ***("SEC")*** regarding Compensation Discussion and Analysis, review and discuss with management the disclosures made in Compensation Discussion and Analysis prior to the delivery or filing, as applicable, of the Company's Annual Report and/or proxy statement for the annual meeting of stockholders, and recommend to the Board whether the Compensation Discussion and Analysis should be included in the Annual Report and/or proxy statement;

- if the Company becomes subject to, or otherwise determines to comply with, the SEC disclosure requirements regarding a compensation committee report, prepare an annual compensation committee report for inclusion in the Company's Annual Report and/or proxy statement for the annual meeting of stockholders in accordance with the applicable rules of the SEC;

- conduct an annual performance evaluation of the Committee; and

- review and reassess the adequacy of this charter and recommend any proposed changes to the Board for approval.

III. COMPOSITION

The Committee shall be comprised of two or more members (including a Chairperson) and, as and when required in accordance with the New York Stock Exchange rules, all of such members shall be "independent directors," as such term is defined in the New York Stock Exchange rules. The members of the Committee and the Chairperson shall be appointed by the Board and serve at the pleasure of the Board. A Committee member (including the Chairperson) may be removed at any time, with or without cause, by the Board. The Board shall have the power to change the members of the Committee and fill any vacancies occurring on the Committee for any reason.

IV. MEETINGS

The Committee shall meet as often as it determines necessary, but at least once each year, to enable it to fulfill its responsibilities. The Committee shall meet at the call of its Chairperson. The Committee may meet by telephone conference call or by any other means permitted by law or the Company's Bylaws. A majority of the members of the Committee shall constitute a quorum. The Committee shall act on the affirmative vote of a majority of members present at a meeting at which a quorum is present. Subject to the Company's Bylaws, the Committee may act by unanimous written consent of all members in lieu of a meeting. The Committee shall determine its own rules and procedures, including designation of a chairperson pro tempore in the absence of the Chairperson, and designation of a secretary. The secretary need not be a member of the Committee and shall attend Committee meetings and prepare minutes. The Secretary of the Company shall be the Secretary of the Compensation Committee unless the Committee designates otherwise. The Committee shall keep written minutes of its meetings, which shall be recorded or

filed with the books and records of the Company. Any member of the Board shall be provided with copies of such Committee minutes if requested.

The Committee may ask members of management, employees, outside counsel, or others whose advice and counsel are relevant to the issues then being considered by the Committee to attend any meetings and to provide such pertinent information as the Committee may request. The CEO should not attend any meeting where the CEO's performance or compensation is discussed, unless specifically invited by the Committee. The Committee shall have the authority to delegate any of its responsibilities to one or more subcommittees as the Committee may from time to time deem appropriate.

The Chairperson of the Committee shall be responsible for leadership of the Committee, including preparing the agenda, presiding over Committee meetings, making Committee assignments and reporting the Committee's actions to the Board from time to time as requested by the Board.

V. AUTHORITY

In discharging its responsibilities, the Committee shall have the authority, to the extent it deems appropriate, to retain one or more compensation consultants to assist in the evaluation of director, CEO, executive or other key employee compensation. The Committee shall have the sole authority to retain and terminate any such consulting firm, and to approve the firm's fees and other retention terms. The Committee shall also have the authority to retain and determine the funding for such other advisors (without seeking Board approval) as the Committee determines necessary or appropriate to carry out its duties and responsibilities under this Charter. The Company will provide for appropriate funding, as determined by the Committee, for payment of compensation to any consulting firm or other advisor employed by the Committee.

Adopted and approved by the Board of Directors on March 12, 2019, and supersedes the charter adopted and approved on September 22, 2016.

AMENDED AND RESTATED CHARTER
OF THE COMPLIANCE AND ENTERPRISE RISK COMMITTEE
OF THE BOARD OF DIRECTORS

I. PURPOSES

The Compliance and Enterprise Risk Committee (the ***"Committee")*** is appointed by the Board of Directors (the ***"Board")*** of Lifepoint Health, Inc. (the ***"Company")*** to assist the Board in its oversight of the Company's and its subsidiaries' compliance with the legal and regulatory requirements of their respective business operations and the Company's ethics and compliance policies and procedures, and its oversight of the Company's enterprise risk management program. The Committee's primary purposes are to: (1) oversee matters relating to the Company's compliance with all applicable state and federal laws and regulations; (2) oversee matters relating to the Company's compliance with federal health care program ***("FHCP")*** requirements; (3) oversee the performance and effectiveness of the Company's compliance program, the Health Support Center ("HSC") Compliance Committee and other internal compliance functions; (4) work in concert with the Company's Chief Compliance Officer and the Company's HSC Compliance Committee; (5) review matters concerning or relating to the Company's code of conduct, the Company's compliance programs, and compliance with the requirements of FHCPs; (6) oversee management's implementation of an enterprise risk management program and its efforts to identify risks and mitigate identified risks; and (7) make regular reports to the Board regarding these responsibilities.

II. RESPONSIBILITIES

In addition to such other duties as the Board may from time to time delegate, the Committee shall:

- Review and oversee significant compliance risk areas, including, but not limited to:
    - regulatory compliance;
    - coding and reimbursement;
    - physician recruitment, employment, and contracting compliance with state and federal fraud and abuse and self-referral laws;
    - privacy of company, employee, and patient information;
    - employee relations and workplace conduct; and
    - risks identified to have material enterprise impact on the Company.

  The Committee shall also review the steps management has taken to assess, monitor, control, mitigate and report such compliance and enterprise risk exposures.

- Review the appointment, performance and replacement, as necessary of the Company's Chief Compliance Officer.

- Meet at least quarterly with the Company's General Counsel and Chief Compliance Officer for a report on the Company's ethics and compliance programs, including a review of any issues that may pose a material financial, reputational or enterprise risk to the Company.

- Review, oversee, and take any such other action as the Committee deems necessary with respect to the Company's compliance and enterprise risk management programs, including but not limited to:

    - Developing and updating the Company's compliance program and the Company's code of conduct, either itself or by delegation to the appropriate officers or employees of the Company.

    - Overseeing management's development and implementation of an enterprise risk management program that is designed to assist management with identifying, monitoring and mitigating compliance, legal, regulatory, operational, reputational and other risks related to the Company's and its subsidiaries' business.

    - Reviewing reports submitted to the Committee by the Chief Compliance Officer regarding the activities undertaken pursuant to the Company's compliance programs, any actual or potential issues identified, and actions taken.

    - Monitoring and evaluating the effectiveness of the compliance programs and resource allocation to the compliance department.

    - Monitoring and evaluating the effectiveness of the enterprise risk management program to properly identify risk and progress towards the stated goals of risk mitigation within a reasonable timeframe.

- Review the status of the Company's compliance with relevant laws, regulations, and internal procedures, including without limitation compliance with FHCP requirements and the Health Insurance Portability and Accountability Act of 1996 and its implementing regulations *(**"HIPAA"**)*.

- As deemed appropriate by the Committee in its discretion, review compliance related policies and procedures, which shall be approved from time to time by the HSC Compliance Committee, including those regarding compliance with applicable federal, state, and local laws and regulations and with the Company's code of conduct. In connection with this responsibility, the Committee may require changes to any such policy or procedure.

- Review the Company's implementation of appropriate lines and means of communication to report suspected non-compliance with legal or regulatory requirements or the Company's polices, including procedures for the receipt, retention, and treatment of complaints regarding compliance with applicable legal and regulatory requirements and Company's code of conduct.

- In consultation with the Compensation Committee, discuss with management an evaluation of whether compensation practices are aligned with the Company's compliance obligations. Any compensation practices evaluation prepared as a result may

either be reported first to the Committee, or the Compensation Committee, which will then report the results to the Committee.

- Oversee the implementation of the Company's compliance program with respect to any hospitals, health systems, or other health care providers acquired by the Company.

- Discuss with the Company's Chief Compliance Officer, Executive Compliance Committee, General Counsel and other members of management (as deemed appropriate by the Committee in its discretion) or at the Committee's option, with outside counsel, any legal, compliance, or regulatory matters, including employee complaints and published reports or correspondence with regulators or government agencies, that may have a material impact on the Company's business or the Company's compliance policies.

- Ensure proper communication of significant compliance and enterprise risk issues to the Board, including the reporting of such issues that may have significant financial implications to the Company.

- Prepare for the Board an annual performance evaluation of the Committee.

- As frequently as deemed appropriate by the Committee in its discretion but at least annually, report to the Board on: (1) the state of the Company's compliance functions and enterprise risk program; (2) relevant compliance issues involving the Company of which the Committee has been made aware, including, as deemed appropriate by the Committee in its discretion, a summary of the results of any significant compliance investigations conducted by the Company; (3) any potential patterns of non-compliance presenting substantial compliance risk identified with the Company; (4) any significant disciplinary actions against any compliance personnel; and (5) any other issues that may reflect any systemic or widespread problems in compliance or regulatory matters exposing the Company to substantial compliance and/or enterprise risks.

- Annually review and reassess the adequacy of this Charter (recommending any appropriate changes to the Board).

Oversight of certain risk areas shall be retained by the Board's other committees as outlined in their respective charters, including charters of the Audit Committee and the Compensation Committee. Through the Committee Chairperson, the Committee shall coordinate with the Audit Committee and Compensation Committee as necessary or appropriate with respect to material financial and compensation risks.

III. COMPOSITION

The Committee shall be comprised of two or more members. The Committee may have, but is not required to have, one or more members that meet the independence requirements in accordance with New York Stock Exchange Listing Standards. Members of the Committee may, in the judgment of the Board, have relevant experience in healthcare, law, corporate compliance, regulatory or governmental affairs, or service on the Board of a healthcare institution or highly regulated company. The Chairperson of the Committee shall be designated by the Board.

The members of the Committee, including the Chairperson, shall be appointed by the Board and serve at the pleasure of the Board. A Committee member (including the Chairperson) may be removed at any time, with or without cause, by the Board. The Board shall have the power to change the members of the Committee and fill any vacancies occurring on the Committee for any reason. The Committee will provide its members with periodic continuing education opportunities and customized training focusing on topics such as leading practices with regard to compliance, oversight, and other legal and regulatory healthcare topics.

IV. MEETINGS AND OPERATIONS

The Committee shall meet as often as it determines necessary to fulfill its responsibilities, but not less frequently than quarterly. The Committee shall meet at the call of its Chairperson. The Committee may meet by telephone conference call or by any other means permitted by law or the Company's Third Amended and Restated Bylaws (as amended from time to time, the ***"Bylaws"***).

A majority of the members of the Committee shall constitute a quorum. The Committee shall act on the affirmative vote of a majority of members present at a meeting at which a quorum is present. Subject to the Company's Bylaws, the Committee may act by unanimous written consent of all members in lieu of a meeting. The Committee shall determine its own rules and procedures, including designation of a chairperson pro tempore in the absence of the Chairperson, and designation of a secretary. The secretary need not be a member of the Committee and shall attend Committee meetings and prepare minutes. The Secretary of the Company shall be the Secretary of the Committee unless the Committee designates otherwise. The Committee shall keep written minutes of its meetings, which shall be recorded or filed with the books and records of the Company. Any member of the Board shall be provided with copies of such Committee minutes if requested.

The Committee may ask members of management, employees, outside counsel, independent auditor or others whose advice and counsel are relevant to the issues then being considered by the Committee to attend any meetings, to meet with any member of, or advisors to, the Committee, or to provide such pertinent information as the Committee may request. The Committee shall have authority to delegate any of its responsibilities to one or more subcommittees as the Committee may from time to time deem appropriate.

The Chairperson of the Committee shall be responsible for leadership of the Committee, including preparing the agenda, presiding over Committee meetings, making Committee assignments, and reporting the Committee's actions to the Board.

V. AUTHORITY

The Committee is authorized to investigate any matter within the scope of its duties and responsibilities or as otherwise delegated by the Board, with full access to all books, records, facilities, and personnel of the Company. The Committee shall have the resources and the authority to discharge its duties and responsibilities, including, to the extent it deems appropriate, the authority to select, retain, terminate, and approve the fees or other retention terms of one or more independent consultant(s), expert(s), auditor(s), or outside legal advisor(s). The Committee shall have authority to obtain advice and assistance from internal or external legal, accounting or other advisors at the Company's expense.

Adopted and approved by the Board of Directors on September 21, 2016, amended on August 8, 2018; amended and restated on December 13, 2018**;** amended on March 12, 2019; amended and restated on December 7, 2020; and amended and restated on June 15, 2023.

CHARTER OF
THE EXECUTIVE COMMITTEE
OF THE BOARD OF DIRECTORS

I. PURPOSE

The purpose of the Executive Committee (the "***Committee***") of the Board of Directors (the "***Board***") is to facilitate the effective management of the business and affairs of Lifepoint Health, Inc. (the "***Company***") by the delegation (to the extent permitted by applicable law, the Company's Certificate of Incorporation (as amended from time to time, the "***Certificate of Incorporation***"), the Company's Amended and Restated Bylaws (as amended from time to time, the "***Bylaws***"), this Charter and action of the Board) to the Committee of certain of the powers and authority of the Board.

II. RESPONSIBILITIES

When, as determined by the Chairperson of the Committee, (a) it is both (i) necessary due to urgent or highly confidential situations, and (ii) impracticable to convene in-person, telephonic, or electronic meetings of the Board or (b) it is otherwise advisable, the Committee may, subject to the restrictions of applicable law and the Certificate of Incorporation and Bylaws, exercise the full powers and authority of the Board in the management of the business and affairs of the Company; provided, that, the Committee shall not have any power or authority to do any of the following actions, except pursuant to an express action of the Board from time to time:

- amend the Certificate of Incorporation or Bylaws or any organizational document of the Company;

- enter into or authorize any mergers, amalgamation, consolidation, reorganization, recapitalization or other business combination involving the Company (other than any merger, amalgamation, consolidation or other business combination solely involving the Company and another member of the Company Group (as defined below) that is wholly-owned by the Company);

- enter into any joint venture (or series of related joint ventures) involving an aggregate enterprise value in excess of $250,000,000 or any binding agreement to form such a joint venture (or series of related joint ventures);

- enter into or authorize any acquisition or divestiture (or series of related acquisitions or divestitures) involving an aggregate enterprise value in excess of $250,000,000 or any binding agreement to consummate any such acquisition or divestiture (or series of related acquisitions or divestitures);

- declare any dividend in respect of the Company's securities (other than (i) declaring and authorizing the payment of one or more cash dividends or distributions to the holders of the Company's common stock in such amount as determined by the Committee, solely to the extent used directly or indirectly in connection with the repurchase of equity from employees, consultants, managers, officers and directors of

any member of the Company Group in connection with a termination of employment, consulting relationship or service as a manager, officer or director, as applicable, following the date hereof (the "***Future Repurchase Distributions***"); (ii) determining the record dates for such Future Repurchase Distributions; and (iii) authorizing, approving, ratifying and confirming any and all such other agreements and documents, in each case, that the Committee deems necessary, desirable or appropriate in furtherance of such Future Repurchase Distributions);

- issue or authorize the issuance of any equity security of the Company;

- commence the termination, liquidation or dissolution of the Company, or enter into any agreement or arrangement relating thereto;

- propose or institute proceedings to adjudicate the Company or any of the Company's subsidiaries (such subsidiaries collectively with the Company, the "***Company Group***") as bankrupt, or consent to the filing of a bankruptcy proceeding against any member of the Company Group, or file a petition or answer or consent seeking reorganization of any member of the Company Group under any applicable bankruptcy or insolvency laws, or consent to the filing of any such petition against any member of the Company Group, or consent to the appointment of a receiver or liquidator or trustee or assignee in bankruptcy or insolvency of any member of the Company Group, or make an assignment for the benefit of creditors of any member of the Company Group or admit in writing any member of the Company Group's inability to pay its debts generally as they become due;

- propose that the Company be wound up or that any liquidation proceedings be commenced;

- form or dissolve standing or director-only committees of the Board;

- amend the charter of any committee of the Board;

- take any actions that have been expressly, by charter or resolutions, delegated to any other committee of the Board; and

- amend or repeal any resolution of the Board.

The Committee's authority shall be subject at all times to control by the Board, which has the power to revise or alter any action taken by the Committee acting in such capacity so long as no rights of third parties are adversely affected thereby. Any action taken by the Committee pursuant to its authority hereunder shall be communicated to the entire Board as promptly as the Committee deems reasonably practicable.

In addition to the duties and responsibilities set forth in this Charter, the Committee shall:

- advise and counsel the Chief Executive Officer of the Company (the "***CEO***") regarding Company matters;

- report regularly to the Board upon its activities and recommendations, and prepare special reports at the request of the Board (which reports may take the form of an oral report by the Chairperson or any other person designated by the Committee to make such report); and

- periodically review and assess the adequacy of this Charter and recommend any proposed changes to the Board.

III. COMPOSITION

The Committee shall be comprised of one or more members (including a Chairperson). The members of the Committee and the Chairperson shall be appointed by the Board and serve at the pleasure of the Board. A Committee member (including the Chairperson) may be removed at any time, with or without cause, by the Board. The Board shall have the power to change the members of the Committee and fill any vacancies occurring on the Committee for any reason.

If the CEO is not otherwise on the Committee, then the CEO shall serve ex officio as a non-voting advisor to the Committee.

IV. MEETINGS

The Committee shall meet as often as it determines necessary, but at least once each year, to enable it to fulfill its responsibilities. The Committee shall meet at the call of its Chairperson. The Committee may meet by telephone conference call or by any other means permitted by law or the Company's Bylaws. A majority of the members of the Committee shall constitute a quorum. The Committee shall act on the affirmative vote of a majority of members present at a meeting at which a quorum is present. Subject to the Company's Bylaws, the Committee may act by unanimous written consent of all members in lieu of a meeting. The Committee shall determine its own rules and procedures, including designation of a chairperson pro tempore in the absence of the Chairperson, and designation of a secretary. The secretary need not be a member of the Committee and shall attend Committee meetings and prepare minutes. The Committee shall keep written minutes of its meetings, which shall be recorded or filed with the books and records of the Company. Any member of the Board shall be provided with copies of such Committee minutes if requested.

The Committee shall have the authority to delegate any of its responsibilities to one or more subcommittees as the Committee may from time to time deem appropriate.

The Committee and any subcommittee may ask members of management, employees, outside counsel, the independent auditors, internal auditors or others whose advice and counsel are relevant to the issues then being considered by the Committee or subcommittee, to attend any meetings and to provide such pertinent information as the Committee or subcommittee may request. The Committee or subcommittee may also exclude from its meetings any person it deems appropriate in order to enable it to carry out its duties (including a member of the Committee or subcommittee if the matter at hand involves such person or the person's presence presents an appearance of a conflict of interest).

The Chairperson of the Committee shall be responsible for leadership of the Committee, including preparing the agenda, presiding over Committee meetings, making Committee assignments and reporting the Committee's actions to the Board from time to time as requested by the Board.

V. AUTHORITY

In discharging its responsibilities, the Committee shall have the authority to retain and determine funding for independent counsel and other advisors and experts (without seeking Board approval) as the Committee determines necessary or appropriate to carry out its duties and responsibilities under this Charter. The Company shall provide appropriate funding, as determined by the Committee, for the payment of (i) compensation any such persons employed by the Committee pursuant to its authority under the immediately preceding sentence and (ii) ordinary administrative expenses of the Committee that are necessary or appropriate in carrying out its duties.

In carrying out its duties, the Committee may act in reliance on management, independent public accountants, internal auditors, internal and outside counsel and such other outside advisors and experts, as it deems necessary or appropriate.

The Committee has the power, in its discretion, to conduct any investigation it deems necessary or appropriate to enable it to carry out its duties.

The Committee will have unrestricted access to the independent public accountants, the internal auditors, internal and outside counsel, and anyone else in the Company, and may require any officer or employee of the Company or the Company's outside counsel or independent public accountants to attend any meeting of the Committee or to meet with any members of, or consultants or advisors to, the Committee.

Adopted and approved by the Board of Directors on December 6, 2023, and supersedes the charter previously adopted and approved on March 12, 2019 and September 22, 2016.

CHARTER OF THE
NOMINATING AND CORPORATE GOVERNANCE COMMITTEE
OF THE BOARD OF DIRECTORS

I. PURPOSES

The Nominating and Corporate Governance Committee (the ***"Committee")*** is appointed by the Board of Directors ***("Board")*** of LifePoint Health, Inc. (the ***"Company")*** for the purposes of (a) assisting the Board in identifying individuals qualified to serve as members of the Board and/or committees thereof, (b) developing and recommending to the Board a set of corporate governance guidelines for the Company to the extent it determines adopting such corporate governance guidelines are required or otherwise appropriate and (c) overseeing the self-evaluation process of the Board.

II. RESPONSIBILITIES

In addition to such other duties as the Board may from time to time assign, the Committee shall:

- identify individuals qualified to become Board members, consistent with criteria approved by the Board;
- recommend to the Board the director nominees for election by the stockholders at each meeting of stockholders at which directors will be elected and recommend to the Board nominees to fill any vacancies and newly created directorships on the Board;
- if it deems appropriate or required by applicable stock exchange rules, develop and recommend to the Board a set of corporate governance guidelines applicable to the Company and review and reassess the adequacy of such guidelines and recommend any proposed changes to the Board for approval;
- develop and recommend to the Board for its approval an annual evaluation process, which should include evaluations completed by each member and committee of the Board;
- oversee the self-evaluation process of the Board, the standing committees of the Board and the individual members of the Board and solicit and receive comments from all directors and report annually to the Board with an assessment of the performance of the Board, its members and its standing committees;
- periodically review the criteria for the selection of new directors to serve on the Board and recommend any proposed changes to the Board for approval;
- evaluate candidates for Board membership, including those recommended by stockholders in compliance with the Company's Amended and Restated Bylaws, as such may be amended from time to time (the "Bylaws");
- periodically review and make recommendations regarding the composition and size of the Board;

- periodically review and make recommendations regarding the composition, size, purpose, structure, operations and charter of each of the Board's committees, including the creation of additional committees or elimination of existing committees;

- recommend to the Board the chairpersons and members of each of the Board's committees;

- recommend to the Board proposals submitted by the stockholders;

- establish a process for the design of continuing education for current directors, which shall be periodically updated as necessary;

- review and reassess the adequacy of the Certificate of Incorporation, Bylaws and this charter, periodically, and at least annually, as conditions dictate, and recommend any proposed amendments to the Board for approval;

- oversee the Insider Trading Policy and perform any responsibilities delegated to the Committee therein; and

- oversee director orientation and continuing education programs.

III. COMPOSITION

The Committee shall be comprised of two or more members (including a Chairperson) and, as and when required in accordance with corporate governance guidelines corporate governance guidelines, all of such members shall be "independent directors," as such term is defined in such applicable stock exchange rules. The members of the Committee and the Chairperson shall be selected by the Board and serve at the pleasure of the Board. A Committee member (including the Chairperson) may be removed at any time, with or without cause, by the Board. The Board shall have the power to change the members of the Committee and fill any vacancies occurring on the Committee for any reason.

IV. MEETINGS AND OPERATIONS

The Committee shall meet as often as necessary to enable it to fulfill its responsibilities. The Committee shall meet at the call of its Chairperson. The Committee may meet by telephone conference call or by any other means permitted by law or the Company's Bylaws. A majority of the members of the Committee shall constitute a quorum. The Committee shall act on the affirmative vote of a majority of members present at a meeting at which a quorum is present. Subject to the Company's Bylaws, the Committee may act by unanimous written consent of all members in lieu of a meeting. The Committee shall determine its own rules and procedures, including designation of a chairperson pro tempore in the absence of the Chairperson, and designation of a secretary. The secretary need not be a member of the Committee and shall attend Committee meetings and prepare minutes. The Secretary of the Company shall be the Secretary of the Committee unless the Committee designates otherwise. The Committee shall keep written minutes of its meetings, which shall be recorded or filed with the books and records of the Company. Any member of the Board shall be provided with copies of such Committee minutes if requested.

The Committee may ask members of management, employees, outside counsel, or others whose advice and counsel are relevant to the issues then being considered by the Committee to attend

any meetings and to provide such pertinent information as the Committee may request. The Committee shall have authority to delegate any of its responsibilities to one or more subcommittees as the Committee may from time to time deem appropriate.

The Chairperson of the Committee shall be responsible for leadership of the Committee, including preparing the agenda, presiding over Committee meetings, making Committee assignments and reporting the Committee's actions to the Board from time to time as requested by the Board.

V. AUTHORITY

The Committee has the authority, to the extent it deems appropriate, to retain one or more search firms to be used to identify director candidates. The Committee shall have the sole authority to retain and terminate any such consulting firm, and to approve the firm's fees and other retention terms. The Committee shall also have the authority, to the extent it deems necessary or appropriate, to retain other advisors. The Company will provide for appropriate funding, as determined by the Committee, for payment of compensation to any search firm or other advisors employed by the Committee.

Adopted and approved by the Board of Directors on March 12, 2019 and supersedes the charter adopted and approved on September 22, 2016.

CHARTER OF THE
QUALITY COMMITTEE
OF THE BOARD OF DIRECTORS

ARTICLE I. PURPOSE

The purpose of the Quality Committee (the "Committee") of the Board of Directors (the "Board") of LifePoint Health, Inc. (the "Company") shall be to assist the Board in its efforts to monitor and provide leadership with respect to the quality of care, patient safety and the appropriate environment for care provided at hospitals or other healthcare facilities owned or leased by subsidiaries of the Company.

ARTICLE II. COMPOSITION

The Committee shall be comprised of two or more members (including a Chairperson). The Committee may have, but is not required to have, one or more members that meet the independence requirements in accordance with New York Stock Exchange Listing Standards. Members of the Committee may, in the judgment of the Board, have relevant experience in healthcare, patient safety and quality or service on the Board of a healthcare institution. The members of the Committee and the Chairperson shall be appointed by the Board and serve at the pleasure of the Board. A Committee member (including the Chairperson) may be removed at any time, with or without cause, by the Board. The Board shall have the power to change the members of the Committee and fill any vacancies occurring on the Committee for any reason.

The Committee will provide its members with periodic continuing education opportunities and customized training focusing on topics such as leading practices with regard to compliance, oversight, patient quality and safety and other legal and regulatory healthcare topics.

ARTICLE III. AUTHORITY AND RESPONSIBILITIES

In carrying out its responsibilities, the Committee's policies and procedures should remain flexible to enable the Committee to react to changes in circumstances and conditions so that it can fulfill its oversight responsibilities. In addition to such other duties as the Board may from time to time assign, the Committee shall have the authority and responsibility, with respect to hospitals or other healthcare facilities owned or leased by subsidiaries of the Company, to:

(1) Monitor and evaluate the Company's quality of care and patient safety programs and initiatives.

(2) Review and discuss with senior management the adequacy and effectiveness of the Company's quality of care and patient safety programs initiatives and consider recommendations for improvement thereof.

(3) Receive reports from senior management as frequently as appropriate summarizing significant: (a) deviations from the Company's quality of care and patient safety standards; (b) corrective and preventative actions and (c) other matters deemed relevant by the Committee.

(4) Receive reports from senior management as frequently as appropriate summarizing significant quality assurance related activities undertaken by the Company and the results of internal quality compliance audits conducted.

(5) Meet at least quarterly with the Company's Chief Medical Officer for a report on the Company's Patient Safety and Quality Programs,

(6) Receive summaries of reports prepared by third party consultants or auditors retained to evaluate the Company's quality of care and patient safety programs and initiatives.

(7) Prepare for the Board an annual performance evaluation of the Committee.

(8) Report at least annually to the Board on any significant failure to maintain quality and/or patient safety standards at any of the Company's facilities that poses a material financial or reputational risk to the Company.

ARTICLE IV. MEETINGS AND OPERATIONS

The Committee shall meet as often as it determines necessary, but at least quarterly, to enable it to fulfill its responsibilities. The Committee shall meet at the call of its Chairperson and shall be governed by the same rules regarding notice of meetings and waiver of notice as are applicable to the Board. The Committee may meet by telephone conference call or by any other means permitted by law or the Company's Second Amended and Restated Bylaws (as amended from time to time, the "Bylaws").

A majority of the members of the Committee shall constitute a quorum. The Committee shall act on the affirmative vote of a majority of members present at a meeting at which a quorum is present. Subject to the Company's Bylaws, the Committee may act by unanimous written consent of all members in lieu of a meeting. The Committee shall determine its own rules and procedures, including designation of a chairperson pro tempore in the absence of the Chairperson, and designation of a secretary. The secretary need not be a member of the Committee and shall attend Committee meetings and prepare minutes. The Secretary of the Company shall be the Secretary of the Committee unless the Committee designates otherwise. The Committee shall keep written minutes of its meetings, which shall be recorded or filed with the books and records of the Company. Any member of the Board shall be provided with copies of such Committee minutes if requested.

The Committee may ask members of management, employees, outside counsel or others whose advice and counsel are relevant to the issues then being considered by the Committee, to attend any meetings and to provide such pertinent information as the Committee may request. The Committee may also exclude from its meetings any persons it deems appropriate in order to discharge its responsibilities.

The Chairperson of the Committee shall be responsible for leadership of the Committee, including preparing the agenda, presiding over Committee meetings, making Committee assignments and regularly reporting the Committee's actions, including any significant issues or concerns that arise at meetings, to the Board.

ARTICLE V. ADDITIONAL AUTHORITY, RESPONSIBILITIES AND DUTIES

The Committee is authorized to investigate any matter within the scope of its duties and responsibilities or as otherwise delegated by the Board, with full access to all books, records, facilities, and personnel of the Company. The Committee shall have the resources and the authority to discharge its duties and responsibilities, including, to the extent it deems appropriate, the authority to select, retain, terminate, and approve the fees or other retention terms of one or more independent

consultant(s), expert(s), auditor(s), or outside legal advisor(s). The Committee shall have authority to obtain advice and assistance from internal or external legal, accounting or other advisors at the Company's expense.

Adopted and approved by the Board of Directors on March 12, 2019 and supersedes the charter adopted and approved on December 13, 2018;

DSB Parent L.P.

Delegation of Authority and Corporate Policy
(Adopted as of November 21, 2019)

Purpose:

This Delegation of Authority and Corporate Policy (this "Policy") is established to define the limits of authority designated to specified positions of responsibility within DSB Parent L.P. (the "Company") and its Subsidiaries (including LifePoint, Legacy LifePoint and each of their respective Subsidiaries) (collectively, the "Company Group") and to set forth certain types of commitments, transactions and other actions requiring (i) the approval of the Board and/or (ii) the approval of one or more individuals holding certain specified positions within the Company Group. The approval of any commitment, transaction or other action outlined in this Policy must always be made by the parties that have been designated in this Policy as having authority to approve such commitment, transaction or other action.

All officers and employees of the Company Group should be aware that conduct that violates this Policy is always considered outside the scope of their employment and may result in personal liability. Individuals who violate these policies are subject to appropriate disciplinary action by the Company Group, including possible termination of employment. In addition, violating this Policy could significantly damage the Company Group and expose it to unintended legal and commercial liabilities.

All managers should periodically consult with their staff members to determine that appropriate procedures for the implementation of this Policy have been developed and are being followed.

Scope:

This Policy is applicable to (i) each of the members of the Company Group, (ii) any joint ventures or investments that are controlled by any member of the Company Group and (iii) each of the officers, employees, consultants and agents of any of the foregoing.

Statement of Policy:

The Company Group is required to implement appropriate approval procedures and controls to ensure compliance with this Policy, which procedures and controls shall be consistent with this Policy and shall be approved by at least two of the following officers: the Chief Executive Officer, the Chief Financial Officer, the Executive Vice President, Hospital Operations, the Executive Vice President, Integrated Operations, the Executive Vice President, Human Resources and the Executive Vice President, General Counsel.

The Company Group shall adopt policies and procedures requiring each officer and employee of any member of the Company Group to consult with the Legal Department and/or senior management of the Company if such officer, employee, consultant or agent knows or has reason to know that any prospective action could violate: (i) any law, rule or regulation; (ii) any order, judgment or decree of any court or arbitral body; or (ii) in any material respect any Contract.

Procedures:

1. Combining Transactions:

This Policy shall be interpreted broadly so that a series of reasonably related transactions shall be considered as a single transaction for purposes of determining approval and authority levels required by this Policy.

2. Delegation of Authority to Subordinates:

a. It is emphasized that any commitment, transaction or other action that is the subject of this Policy cannot be approved by individuals having a lower level of approval authority than the level specified in this Policy for such commitment, transaction or other action, except pursuant to a delegation of temporary authority that has been approved in accordance with this Policy.

b. If any person (an "Authorized Person") having approval authority under this Policy will be out of the office for a prolonged period of time or is temporarily unavailable during exigent circumstances, such Authorized Person shall inform the General Counsel of such absence or exigent circumstances and may recommend that another employee of the Company Group (the "Temporarily Authorized Person") be granted a delegation of temporary authority to approve all commitments, transactions and other actions that such Authorized Person has the authority to approve under this Policy for such time as the applicable Authorized Person is out of the office or temporarily unavailable. Any such delegation of temporary authority shall be in writing, shall specify the effective length of time that such Temporarily Authorized Person shall have such authority and shall be approved by the applicable Authorized Person and two of the following individuals: the Chief Executive Officer, the Chief Financial Officer, the Executive Vice President, Hospital Operations, the Executive Vice President, Integrated Operations, the Executive Vice President, Human Resources and the Executive Vice President, General Counsel. Any such delegation so approved shall be permitted under this Policy.

3. Compliance Documentation

Employees executing Contracts and approving transactions are required to ensure that all appropriate approvals and reviews required by this Policy and the Company Group's other policies and procedures have been obtained, and to ensure that appropriate documentation of these approvals is maintained. Appropriate documentation can take various forms, including, without limitation, the initialing of final Contracts, approval forms, or memorandums. All Contracts subject to legal review and approval of the corporate legal department under policies and procedures adopted by the Company Group shall be maintained with documentation of the appropriate approvals and a copy of the documentation shall be maintained in the Company's electronic contract management database.

4. Policy Interpretations and Amendments

a. Inevitably, it will be necessary for the Company to issue interpretations of various provisions of this Policy as unanticipated facts and circumstances occur that are not specifically addressed in this Policy. The ability of the Board, and where an interpretation by the Board is impractical, the Chief Executive Officer, the Chief Financial Officer, the Executive Vice President, Hospital Operations, the Executive Vice President, Integrated

Operations, the Executive Vice President, Human Resources and the Executive Vice President, General Counsel to make interpretations of this Policy shall be interpreted broadly. Any such formal interpretation shall be in writing and, if not approved by the Board, shall be approved by any two of the following individuals: the Chief Executive Officer, the Chief Financial Officer, Executive Vice President, Hospital Operations, the Executive Vice President, Integrated Operations, the Executive Vice President, Human Resources and the Executive Vice President, General Counsel.

b. The Board reserves the right to revise the terms and conditions of this Policy at any time. Officers and employees are responsible for understanding or seeking clarification of any rules outlined in this document and for familiarizing themselves with the most current version of this Policy.

Definitions:

Unless the context suggests otherwise, capitalized terms as used and not otherwise defined herein are defined as follows:

"Affiliate" means: (a) with respect to any Person, any other Person that directly, or indirectly through one or more intermediaries, controls, is controlled by, or is under common control with, such first Person, and (b) with respect to a Person who is a natural person, (i) any member of the immediate family of an individual, including parents, siblings, spouse and children (including those by adoption); the parents, siblings, spouse, or children (including those by adoption) of such immediate family member, and in any such case any trust whose primary beneficiary is such individual or one or more members of such immediate family and/or such individual's lineal descendants; and (ii) the legal representative or guardian of such individual or of any such immediate family member in the event such individual or any such immediate family member becomes mentally incompetent.

"Apollo" means Apollo Global Management, LLC or any of its Affiliates, investments funds, alternative investment vehicles or portfolio companies (other than the Company Group).

"Board" means the board of managers of DSB Parent L.P., or the board of directors of LifePoint or any Duly Authorized Committee of either such board.

"Encumbrances" means any direct or indirect encumbrance, lien, pledge, security interest, claim, charges, option, right of first refusal or offer, mortgage, deed of trust,

easement, or any other restriction or third party right, including restrictions on the right to vote equity interests.

"Executive Committee" means the Executive Committee of the board of directors of LifePoint.

"Executive Officer" means those Officers of any member of the Company Group designated as such by the Board (or the board of directors of the applicable Subsidiary) from time to time, including the Chief Executive Officer, , Chief Financial Officer, , General Counsel, Chief Medical Officer, Chief Information Officer, President and anyone elected by the Board or duly appointed by another Officer in accordance with applicable organization documents as an Executive Vice President, or any Officer of a Subsidiary with the corresponding authority and powers.

"Executive Vice President" means any individual then serving as an Executive Vice President of LifePoint or any successor entity thereto.

"Financing Agreements" means (A) the Asset-Based Revolving Credit Agreement, dated as of November 16, 2018, by and among DSB Acquisition LLC, LifePoint, Legend Merger Sub, Inc. ("Merger Sub"), the lenders party thereto from time to time, and Citibank, N.A., as administrative agent and collateral agent, (B) the First Lien Credit Agreement, dated as of November 16, 2018, by and among DSB Acquisition LLC, LifePoint, Merger Sub, the lenders party thereto from time to time, and Citibank, N.A., as administrative agent and collateral agent, (C) the Indenture, dated as of November 16, 2018, by and among LifePoint, Merger Sub, the Subsidiary Guarantors (as defined therein) party thereto from time to time, and Wilmington Trust, National Association, as trustee, and (D) the Indenture, dated as of April 29, 2016, by and among LifePoint, the Subsidiary Guarantors (as defined therein) party thereto from time to time, and Wilmington Trust, National Association, as trustee and (E) the Indenture, dated as of April 29, 2016, by and among LifePoint, the Subsidiary Guarantors (as defined therein) party thereto from time to time, and Wilmington Trust, National Association, as trustee, in each case, as amended, restated, supplemented or otherwise modified from time to time and including any financing agreements entered into in exchange for, or the net proceeds of which are used to extend, refinance, renew, replace, defease or refund any of the foregoing agreements, provided that any such action is approved by the Board or a Duly Authorized Committee. "GAAP" means, with respect to any date of determination, generally accepted accounting principles as used by the Financial Accounting Standards Board and/or the American Institute of Certified Public Accountants consistently applied and maintained throughout the periods indicated.

"General Counsel" means the individual then serving as the General Counsel of LifePoint or any successor entity thereto.

"HealthCare Services Contractor" means any Person under an arrangement to provide healthcare services on behalf of the Company or any of its Subsidiaries and whose annual aggregate compensation is at or greater than $2,000,000.

"Indebtedness" means, with respect to any Person, (a) all indebtedness of such Person, whether or not contingent, for borrowed money, and (b) all obligations of such Person evidenced by notes, bonds, debentures or other similar debt instruments.

"Insurance Captive" means Point of Life Indemnity LTD.

"Key Contractor" any Person subject to an arrangement to provide professional advisory or consulting services to any member of the Company Group whose annual cash compensation is at or greater than $1,000,000 and either (x) the primary individual(s) associated with such Person delivering services to the Company Group is a former employee of the Company Group and/or (y) such Person was formed for the purpose of such individual avoiding being designated as a Key Employee.

"Key Employee" means any employee of the Company Group (other than non-executive physician employees) whose annual cash compensation is at or greater than $1,000,000 (including base salary and bonus).

"Lease Agreements" means the lease agreements of the Company and its Subsidiaries in effect as of the date of this Policy and any related ancillary agreements entered into in connection therewith, including without limitation (i) the Amended & Restated Master Lease dated as of March 21, 2016 among affiliates of LifePoint and affiliates of MPT Camaro Opco, LLC, (ii) the Amended & Restated Lease Agreement dated as of March 21, 2016 between Hot Springs National Park Hospital Holdings, LLC and MPT of Hot Springs—Capella, LLC, (iii) the Amended and Restated Lease Agreement dated as of October 31, 2016 between Columbia Capital Medical Center Limited Partnership and MPT of Olympia-Capella, LLC and (iv) any other lease in effect as of the date of this Policy that is treated as a capital lease under GAAP, in each case as amended, restated, supplemented or otherwise modified from time to time and any lease or financing agreements entered into in exchange for, or the net proceeds of which are used to extend, refinance, renew, replace, defease or refund any of the foregoing agreements, provided that any such action is approved by the Board or a Duly Authorized Committee. "Legacy LifePoint" means Legacy LifePoint, Inc. (f/k/a LifePoint Health, Inc.).

"LifePoint" means LifePoint Health, Inc..

"Management Consulting Agreement" means the Management Consulting Agreement, dated as of November 16, 2018, by and among LifePoint and Apollo Management Holdings, L.P.

"Material Consultant" means any Person (i) under an arrangement to provide audit, investment banking or financial advisory services to the Company or any of its Subsidiaries, or (ii) under an arrangement to provide any other professional advisory or consulting services to the Company or any of its Subsidiaries and in the case of clause (ii) whose annual aggregate compensation is at or greater than $1,000,000; provided that Healthcare Services Contractors, any physicians or groups of physicians and any providers of audit services to individual hospitals or subsidiaries (other than by the independent auditor(s) of the Company Group) that are not used for the audits of the Company Group completed in connection with financial reporting required under the Financing Agreements or financial reporting required by the Securities and Exchange Commission shall be excluded from the definition of Material Consultant.

"Officer" means any Person who would be an officer under Section 142 of the General Corporation Law of the State of Delaware or any term of similar import under the laws under the which the applicable Person was formed or any other natural Person with the power or authority to bind, obligate or otherwise act on behalf of the Person with respect to which such natural Person is appointed. For the avoidance of doubt an Officer shall not include an individual with a nominal title of "Vice President" with no actual or apparent

authority to bind, obligate or act of behalf of the Company or any Subsidiary or act in any of the capacities contemplated to be taken by an "officer," "manager," "partner" or similar position by the laws under which such Person is organized or its organizational documents.

"Partnership Agreement" means the Amended and Restated Limited Partnership Agreement, dated as of December 3, 2015, by and between DSB Parent L.P. and the limited and general partners party thereto, as amended, modified or supplemented from time to time.

"Person" shall be construed broadly and shall include, without limitation, an individual, a partnership, a limited liability company, a corporation, an association, a joint stock company, a trust, a joint venture, an unincorporated organization and a governmental entity or any department, agency or political subdivision thereof.

"Registration Rights Agreement" means the Registration Rights Agreement by and among DSB Holdings Inc. and the Persons party thereto, as amended, modified or supplemented from time to time.

"Securities" means, with respect to any Person, such Person's "securities" as defined in Section 2(1) of the Securities Act of 1933, as amended, and includes such Person's capital stock or other equity interests or any options, warrants or other securities that are directly or indirectly convertible into, or exercisable or exchangeable for, such Person's capital stock or other equity or equity-linked interests, including phantom stock and stock appreciation rights.

"Subsidiary" means, with respect to any Person, any corporation, association, partnership, limited liability company, business entity or other Person of which 50% or more of the total voting power of equity interests (including partnership interests) entitled (without regard to the occurrence of any contingency) to vote in the election of directors, managers, representatives or trustees thereof is at the time owned or controlled, directly or indirectly, by (a) such Person, (b) such Person and one or more Subsidiaries of such Person, or (c) one or more Subsidiaries of such Person.

"Transaction Fee Agreement" means the Transaction Fee Agreement, dated as of November 16, 2018, by and among LifePoint and Apollo Global Securities, LLC.

"Vice President" means any individual then serving as a Vice President of LifePoint or any of its Subsidiaries or any successor entity thereto.

Actions Requiring Special Approvals and Related Procedures:

1. Annual Budget and Business Plan

a. Any annual business plans (including any annual budgets) for LifePoint shall require the approval of the Board.

b. Any strategic plan for LifePoint, to the extent such plan supplements, modifies or deviates from a business plan previously approved by the Board, shall require the approval of the Board.

c. All business plans (including any annual budgets) for any subsidiary of LifePoint which are materially inconsistent with the most recent plan adopted for LifePoint shall require the approval of the Board.

2. Securities and Dividends, Use of Cash and Repayment of Indebtedness

The following actions shall require the approval of the Board:

a. acquiring, repurchasing, redeeming, canceling, selling, issuing or otherwise transferring or disposing of any Indebtedness or equity interest of any member of the Company Group (or any successor entity holding all or substantially all of the assets of any member of the Company Group), or any other Securities convertible into or exchangeable for, or any rights, warrants or options to acquire any equity interests of any member of the Company Group (or any successor entity holding all or substantially all of the assets of any member of the Company Group); provided, that, regularly scheduled payments of any previously approved Indebtedness may be made without approval of the Board if such payments are approved by the Executive Committee, Chief Executive Officer or the Chief Financial Officer;

b. declaring, setting aside, making or paying any dividend or other distribution in respect of any member of the Company Group's Securities (or the Securities of any successor entity holding all or substantially all of the assets of the Company Group), or purchasing or redeeming, directly or indirectly, such Securities, other than dividends or other distributions to the Company or another Subsidiary of the Company (or any successor entity holding all or substantially all of the assets of such member of the Company Group) that (i) are approved by the Executive Committee, Chief Executive Officer or Chief Financial Officer and (ii) would not use or otherwise adversely impact any "baskets" specified in the covenants in the Financing Agreements. Notwithstanding the foregoing, (i) intercompany cash transfers between and among DSB Holdings Inc. and its Subsidiaries in connection with cash management in the ordinary course of business and consistent with past practice and (ii) distributions of cash by any joint ventures with third parties that are in the ordinary course of business and permitted by the operating agreement of such joint venture, shall be permitted without approval of the Board if such payments are approved by the Executive Committee, Chief Executive Officer, the Chief Financial Officer or the Chief Financial Officer, Hospital Operations;

c. amending, modifying or waiving any material term of any outstanding Security or Indebtedness of any member of the Company Group (or any successor entity holding all or substantially all of the assets of any member of the Company Group); and

d. commencing or consummating an initial public offering or a public offering of the Securities of any member of the Company Group (or any successor entity holding all or substantially all of the assets of any member of the Company Group) (other than on Forms S-4 or S-8 or their equivalent).

3. Investments

The following actions shall require the approval of the Board:

a.(i) making any acquisition or divestiture of any corporation, partnership, limited liability company, joint venture or other business organization, or any line of business or division thereof, or other significant assets, in each case with a value in excess

of $10,000,000 or that materially changes the nature of the business of the Company Group, (ii) entering into any joint venture, or any agreements or commitments relating to any such acquisition, divestiture or joint venture, or (iii) making, committing to or entering into any such transaction or series of related transactions that would use or adversely impact any "baskets" specified in the covenants in the Financing Agreements or would require the satisfaction of financial tests under the Financing Agreements (the limitations in this clause (iii) being referred to as the "Financing Restriction"); other than, to the extent approved by the Executive Committee, Chief Executive Officer or Chief Financial Officer, acquisitions and dispositions of assets involving a transaction or series of related transactions that do not conflict with the Financing Restriction and are either (A) between the Company and any subsidiary or between any Subsidiaries or (B) (i) in the ordinary course of business with an unaffiliated third party for which the consideration paid or received (including assumed Indebtedness) does not exceed $1,000,000 in the aggregate or (ii) for which the consideration paid or received (including assumed Indebtedness) is more than $1,000,000 and less than $10,000,000 in the aggregate and the Board has received prior notice (including through any budget or business plan);

b. entering into any new line of business materially different than the current lines of business conducted by the Company Group;

c. making, modifying or disposing of any investment in another Person other than cash management activities conducted (i) in accordance with an investment policy or Contract approved by the Board, (ii) by the Insurance Captives established by the Company Group and (iii) any affiliated physician practices of the Company Group; and

d. casting any votes or giving written consent as an equity holder (excluding for the avoidance of doubt acting in the capacity as a board member or manager by virtue of such equity holdings), with respect to investments, joint ventures or Subsidiaries or granting any proxy with respect to the voting of any shares or other equity interests directly or indirectly held as to an action or transaction that would require approval of the Board if such action were to be taken by a member of the Company Group.

4. Capital Expenditures and Other Expenses

a. Capital Expenditures: Approving, authorizing or incurring, or committing to make or pay any capital expenditures having a value of greater than $2,000,000, based on aggregate expenditures for one project or series of related projects, shall require the approval of the Board.

b. Operating & Other Expenses: Approving, authorizing or incurring, or committing to make or pay any operating expenses or other non-capital expenditures shall require the following approvals, measured based on annual and aggregate expenditures for each such commitment or series of related commitments:

Title	***Authority Level***	
	Annual Expenses	*Aggregate Expenses*
Board	Above $2,000,000	Above $5,000,000
Any Executive Officer	Up to $2,000,000	Up to $5,000,000

c. Exceptions for Actions Requiring Board Approval: Notwithstanding anything to the contrary set forth in this Section 4, the approval of the Board shall not be required for (i) purchases of equipment and supplies and maintenance expenditures at existing properties in the ordinary course of business consistent with past practice, (ii) purchases of equipment and supplies in accordance with a Contract that has been previously approved in accordance with this Policy, (iii) as expressly set forth in the then in effect annual business plan and/or annual budget (as the same may be amended or modified by the Board from time to time), (iv) operating expenses and other non-capital expenditures that are within the then in effect annual business plan and/or annual budget (as the same may be amended or modified by the Board from time to time) that are incurred in the ordinary course of business or (v) any capital expenditure or any other expense expressly described in any project, plan or budget approved by the Board.

d. Processing Payments: No commitment, transaction or other action will be processed by the purchasing, accounting, or treasury departments unless such commitment, transaction or other action is approved in accordance with this Policy and only when the underlying commitment, transaction, agreement (including purchase order) or arrangement has been properly approved and satisfactory evidence is available that the obligation is due, shall disbursement of the Company Group funds be permitted.

e. Expense Reports: Expense reports covering reimbursement of expenses incurred on behalf of the Company Group shall be approved in accordance with Company Group's policies and procedures for such expenses.

5. Business Combination Transactions: Reorganizations; Liquidations; Dissolutions

a. The following actions shall require the approval of the Board:

i. agreeing to enter into or consummate any merger, amalgamation, consolidation, reorganization, recapitalization or other business combination involving any member of the Company Group and third parties;

ii. creating any holding companies or any Subsidiaries that are not Guarantor Subsidiaries (as defined below);

iii. withdrawing from, terminating, or making any material change to the investment in or rights under any joint venture or partnership;

iv. commencing the termination, liquidation or dissolution of any member of the Company Group other than an Immaterial Subsidiary (as defined below), or entering into any agreement or arrangement relating thereto;

v. proposing or instituting proceedings to adjudicate any member of the Company Group as bankrupt, or consenting to the filing of a bankruptcy proceeding against any member of the Company Group, or filing a petition or answer or consent seeking reorganization of any member of the Company Group under any applicable bankruptcy or insolvency laws, or consenting to the filing of any such petition against any member of the Company Group, or consenting to the appointment of a receiver or liquidator or trustee or assignee in bankruptcy or insolvency of any member of the Company Group, or making an assignment for the benefit

of creditors of any member of the Company Group or admitting in writing any member of the Company Group's inability to pay its debts generally as they become due; and

vi. subject to applicable insolvency law, proposing that DSB Holdings, Inc. (or any successor entity holding all or substantially all of the assets of DSB Holdings Inc.) be wound up or that any liquidation proceedings be commenced.

b. The Company or LifePoint shall notify the Board at the next regularly scheduled quarterly board meeting by delivering a report in form and substance acceptable to the board (a "Quarterly Board Report") if any member of the Company Group takes the following actions and such actions shall not require the approval of the Board:

i. agreeing to enter into, or consummate, any merger, amalgamation, consolidation, reorganization, recapitalization or other business combination solely involving members of the Company Group and no third parties;

ii. creating direct or indirect subsidiaries of LifePoint that are (x) wholly-owned (y) guarantors under the Financing Agreements and (z) that comply with all the requirements applicable to becoming a guarantor under the Financing Agreements ("Guarantor Subsidiaries"); and

iii. commencing the termination, liquidation or dissolution of any Subsidiary of LifePoint that does not have any ongoing operations or material liabilities (contingent or otherwise), in each case, in compliance with the applicable requirements of the Financing Agreements and the Lease Agreements (each such Subsidiary, an "Immaterial Subsidiary"), or entering into any agreement or arrangement relating thereto

6. Dispositions of Assets

Except for sales of assets pursuant to a Contract previously approved in accordance with this Policy (including, without limitation, sales of equipment pursuant to equipment assumption provisions in such Contracts), disposing (whether by sale, transfer or otherwise) of any assets of the Company Group having a value of greater than $2,000,000 (based on the book value of such assets), in a single transaction or a series of related transactions, shall require the approval of the Board.

7. Indebtedness and Encumbrances

a. *Encumbrances:* Except as required by the Financing Agreements or the Lease Agreements, making, facilitating or approving any new lien or mortgage or otherwise encumbering or subjecting to any new Encumbrance any properties or other assets of any member of the Company Group, shall require the approval of the Board. *Making Loans:* Except (i) pursuant to a Contract previously approved in accordance with this Policy, (ii) having an aggregate value of less than $1,000,000, or (iii) income guarantees and other financial assistance to non-executive physicians in the ordinary course, lending or agreeing to lend any money or assets of the Company Group to any other Person (including any loans (regardless of amount) made to directors, Officers, employees, Key Contractors or

Material Consultants of any member of the Company Group) shall require the approval of the Board.

b. Letters of Credit and Similar Instruments: Entering into or causing to be issued on behalf of any member of the Company Group any letter of credit, performance bond, bid bond, surety bond, bank guarantee, bankers acceptance or similar instrument greater than $500,000 in value, shall require the approval of the Board; provided that letters of credit issued under the ABL Facility in the ordinary course of business consistent with past practice shall not require Board approval but the Company Group shall promptly notify the Board of any such issuances.

c. Incurrence of Indebtedness: Except for the existing Financing Agreements and Lease Agreements (or any financing arrangement or lease subsequently approved in accordance with this Policy), incurring any of the following types of indebtedness shall require the approval of the Board:

i. Indebtedness for money borrowed from others or purchase money indebtedness (other than accounts payable in the ordinary course consistent with past practice to the extent that such accounts payable are not more than thirty (30) days past due) shall require the approval of the Board;

ii. Indebtedness of the type described in clause (i) above guaranteed in any manner by any member of the Company Group or in effect guaranteed, directly or indirectly, in any manner by any member of the Company Group through an agreement, contingent or otherwise, to supply funds to, or in any other manner invest in, the debtor, or to purchase indebtedness, or to purchase and pay for property if not delivered or pay for services if not performed, primarily or exclusively, for the purpose of enabling the debtor to make payment of the indebtedness or to insure the owners of the indebtedness against loss (any such arrangement being hereinafter referred to as a "Guaranty"), but excluding endorsements of checks and other instruments in the ordinary course consistent with past practice;

iii. Indebtedness of the type described in clauses (i) and (ii) above secured by any Encumbrance upon property owned by any member of the Company Group, even though it has not in any manner become liable for the payment of such indebtedness;

iv. Obligations of any member of the Company Group under any lease of (or other arrangement covering the right to use) real or personal property, which obligations are expected to be required to be classified and accounted for as capital leases on a balance sheet of the Company Group and for which the capitalized lease obligation reflected on such balance sheet is expected to be greater than $2,000,000, computed in accordance with GAAP as of the date of incurrence; and

v. Any indebtedness at each of DSB Parent L.P., DSB Holdings, Inc. and DSB Acquisition LLC.

e. Borrowing Under Existing Facilities: Borrowing funds under the Financing Agreements or any of the Company Group's credit facilities existing at such time shall require the authorization of the Chief Financial Officer and any of the Executive

Committee, Chief Executive Officer or the General Counsel, and shall be in a manner consistent with any budgets or plans approved by the Board; provided, that the Board's approval shall be required for the drawdown of the Company's existing revolving facility under the ABL Facility in an aggregate amount greater than $25,000,000 following November 16, 2018 and any additional drawdown in an amount greater than $10,000,000 thereafter.

f. Cash Management: Notwithstanding the foregoing, the Board's approval is required for any distribution, contribution or any other use of cash at each of DSB Parent L.P., DSB Holdings Inc. and DSB Acquisition LLC.

8. Material Agreements and Transactions with Affiliates

a. Contracts Generally: Entering into any Contracts that require payments or liabilities of greater than $20,000,000 in the aggregate shall require the approval of the Board.

The above referenced approval authority shall also apply to (i) the submission of any request for proposal, bid proposal or similar document ("Bids"), (ii) any amendment, modification or supplement to any Contract or Bid, (iii) any renewal of any Contract or Bid, (iv) any termination of any Contract or Bid and (v) any waiver of any material rights under any Contract or Bid.

b. Additional Required Board Approvals: In addition to the approvals set forth in Section 8(a), entering into any of the following Contracts shall require the approval of the Board:

i. any Contract providing for the indemnification of any Officer, director, employee, Key Contractor, Material Consultant, agent or representative of any member of the Company Group or indemnification of another Person, other than agreements with customers, third party payors, vendors or other suppliers containing customary indemnification provisions entered in the ordinary course of business consistent with past practice; any Contract providing insurance for the benefit of any Officer, director, employee, Key Contractor, Material Consultant, agent or representative of any member of the Company Group or another Person, unless such action is approved by the relevant Company Group compensation committee;

ii. any Contract that would restrict or otherwise limit the operations of (A) Apollo in any respect or (B) any affiliate of LifePoint except for the Company or its Subsidiaries, including, in the case of clauses (A) or (B), Contracts that limit or purport to limit the ability of the Company Group to compete in any line of business or with any entity or Person or in any geographic area; and

iii. any Contracts or transactions that would require Board approval under the Financing Agreements or any similar agreements.

c. Existing Non-Competes. Approving of, or otherwise taking, any action that would expand the scope of any existing restrictive covenant in any Contract that restricts or otherwise limits the operations of Apollo or any other affiliates of the Company other than the Company Group shall require the approval of the Board.

d. Additional Required Management Approvals: In addition to the approvals set forth in Section 8(a), the Company Group shall adopt policies and procedures regarding prior approvals of Executive Officers or their designees for any member of the Company Group to enter into any of the following Contracts:

i. any Contract with a physician or group of physicians or Healthcare Services Contractor;

ii. any Contract with any third party payor managed care organization, provider of health insurance coverage or employer, in each case, with respect to setting rates at which a Company Group member may be reimbursed for the provision of health care services or goods;

iii. any Contract that limits or purports to limit the ability of the Company Group to compete in any line of business or with any entity or person or in any geographic area;

iv. any Contract granting a customer or other third party a "most favored nation" status or other type of special discount;

v. any Contract pursuant to which any member of the Company Group grants any third party the right to be the exclusive provider of any material good or service to such member of the Company Group; and

vi. Any management agreement for the operation of a hospital or other facility.

e. Review of General Terms and Conditions: Without limiting the foregoing, the terms and conditions of any Contract or Bid shall also be reviewed and approved by the General Counsel, which approval may be delegated as the General Counsel deems appropriate.

9. Employee and Consultant Related Matters

a. *General Board Approvals and Notification:* The following actions shall require the approval of the Board:

i. entering into any recognition and/or neutrality agreement, collective bargaining agreement or other agreement, arrangement or understanding with any labor organization purporting to represent any employees of the Company Group other than at individual hospital facilities;

ii. recognizing any labor organization purporting to represent any employees of the Company Group other than at individual hospital facilities;

iii. participating in, contributing to or otherwise endorsing or adopting any welfare or benefit plan or arrangement involving any labor organization (including without limitation any multi-employer trust providing retirement benefits) other than at individual hospital facilities;

iv. participating in, contributing to or otherwise endorsing or adopting any pension plan or arrangement involving any labor organization (including without limitation any multi-employer trust providing retirement benefits);

v. creating new Executive Officer positions or appointing new Executive Officers of any member of the Company Group other than pursuant to written delegated authority from the Board; provided, that, the Executive Committee shall be delegated the authority to appoint Officers with a title of vice president (excluding executive vice president) or lesser position with powers and duties commensurate with such position and not inconsistent with the limits on authority set forth in this Policy and any other action of the Board and no greater than the Executive Officer to whom such lesser Officer reports;

vi. creating new director positions or appoint new members of the Board or the board of directors of any member of the Company Group other than pursuant to a vote or written consent as an equity holder (which vote or consent was properly authorized under Section 3(d)); and

vii. (x) other than pursuant to authority delegated, in writing, by the Board to a duly authorized administrative committee composed of Executive Officers and/or other employees of the Company Group, enter into, adopt, amend, approve or terminate any compensation or benefit plans, programs and policies of any member of the Company Group or Parent, including, without limitation, health, welfare and retirement benefit plans, cash bonus plans, equity-based or profit sharing plans, (y) or approve any grant under any equity-based or profit sharing plan or (z) change the compensation of any Executive Officer, Key Employee or Key Contractor of any member of the Company Group.

The Company or LifePoint shall notify the Board at the next regularly scheduled quarterly board meeting by delivering a Quarterly Board Report if any member of the Company Group takes the following actions and such actions shall not require the approval of the Board:

i. entering into any recognition and/or neutrality agreement, collective bargaining agreement or other agreement, arrangement or understanding with any labor organization purporting to represent any employees of the Company Group at an individual hospital facility;

ii. recognizing any labor organization purporting to represent any employees of the Company Group at an individual hospital facility;

iii. participating in, contributing to or otherwise endorsing or adopting any welfare or benefit plan or arrangement involving any labor organization (including without limitation any multi-employer trust providing retirement benefits) at an individual hospital facility consistent with the Company Group's overall compensation philosophy and objectives and policies established by the compensation committee of the Board or the Board;

b. *Hiring and Firing Employees:*

i. Hiring or firing any Executive Officer, Key Employee or Key Contractor of any member of the Company Group shall require the approval of the Board.

ii. Hiring or firing any other employee (other than non-executive physician employees) whose annual cash compensation (including salary and bonus) is in excess of $750,000 (each, a "Second Tier Employee") shall require the approval of the compensation committee of the Board.

iii. Hiring or firing any other employees (other than non-executive physicians) shall be conducted in accordance with the policies and procedures adopted by the Company Group.

iv. All employment agreements, offer letters or similar agreements for any Key Employee or Second Tier Employee shall be reviewed and approved by (A) the Senior Vice President for Human Resources and (B) one of the Executive Committee, the Chief Executive Officer or any Executive Vice President and, if related to the employment of any Executive Officer or Key Employee, the Board. All other employment agreements, offer letters or similar agreements shall be reviewed and approved in accordance with the policies and procedures adopted by the Company Group.

c. Non-Equity Compensation:

i. Increasing or agreeing to increase the compensation, of (i) any Executive Officer, Key Employee, or Key Contractor or (ii) any other employee or consultant (other than non-executive physicians) if the result of such increase would result in such employee becoming a Key Employee, or Key Contractor shall require the approval of the Board.

ii. Increasing or agreeing to increase the compensation of (i) any Second Tier Employee or (ii) any other employee if the result of such increase would result in such employee becoming a Second Tier Employee shall require the approval of the Executive Committee or Chief Executive Officer.

iii. All non-equity bonuses (including, but not limited to, bonuses under defined incentive plans, statutory bonus, special bonuses and discretionary or one-time bonuses) payable to (A) any Executive Officer, Key Employee or Key Contractor or any such non-equity bonus in excess of $500,000 in the aggregate to any other employee (other than non-executive physicians) shall require the approval of the Board and (B) any other employee or consultant shall require the approval of the Executive Committee or Chief Executive Officer (provided such approval shall be consistent with the compensation philosophy and objectives established by the Board (including any bonus targets) and within the aggregate amounts approved by the Board for non-equity incentive compensation in the annual budget or otherwise.

d. *Equity Compensation:* Making any grants of equity-based compensation or any payments or distributions to any (i) Executive Officer, (ii) Key Employee or Key Contractor, (iii) Material Consultant, (iv) director, or (v) any of their respective Affiliates shall require the approval of the Board, except for the following payments:

i. fees, expenses and other payments required to be paid or reimbursed under the Transaction Fee Agreement, Management Consulting Agreement, the Partnership Agreement or the Registration Rights Agreement;

ii. regular salary payments and other payments arising under any member of the Company Group's or Parent's employee benefit plans which are generally applicable to all employees of the Company Group and which plans have been previously approved by the Board;

iii. expense reimbursement (A) in the ordinary course of business consistent with past practice and (B) generally applicable to the directors and Officers of the Company Group, in accordance with policies approved by the Board;

iv. payments pursuant to any Contract previously approved in accordance with this Policy; and

v. director fees and expenses paid in accordance with a policy or agreement previously approved by the Board.

e. *Severance:* Entering into or approving any severance agreement or other severance arrangement with, or paying any severance to, or determining severance eligibility with respect to, any person shall require the following approvals:

Title	***Authority Level*** (based on the aggregate payments and benefits to be provided to such person)
Board	Above $500,000
Chief Executive Officer	Up to $500,000

f. *Material Consultants:* Engaging, determining the compensation of, or terminating any Material Consultant shall require the approval of the Board, other than the termination of Material Consultants without cause and without material incremental liability once the engagement of any such consultant is substantially complete.

10. Litigation; Settling Claims

a. *General Approval Authority:* Commencing or settling any litigation, regulatory proceeding, or otherwise paying, settling, discharging, waiving or satisfying any claim, liability, dispute or obligation greater than $2,000,000) other than medical malpractice claims within the retention limits of the Company's self-insurance and third party insurance programs) shall require the approval of the Board.

b. *Special Board Approval:* Notwithstanding the foregoing, no litigation, dispute or other claim may be commenced or settled without the approval of the Board if such litigation, dispute or claim involves (i) the imposition of a consent order, injunction or decree affecting any member of the Company Group, (ii) a finding or admission of a violation of law by any member of the Company Group or any of their respective employees or agents, (iii) a finding or admission of guilt by any member of the Company

Group or any of their respective employees or agents or (iv) any other material non-monetary terms.

c. *Legal Department Review:* In addition to the above approvals, all litigation claims and other disputes (including commercial disputes) shall be reviewed and approved by the General Counsel, which review and approval may be delegated to one or more members of the Legal Department or the Risk Management Department, as the General Counsel deems appropriate.

d. *Insurance Claims:* All insurance claims filed by any member of the Company Group shall require the approval of the Vice President for Risk Management and either the Chief Financial Officer or General Counsel.

11. Miscellaneous

a. *Regulatory:* Making any filing with or any report to any regulatory agency relating to, or referring to, (x) Apollo or the Company Group's capital structure that has not been previously disclosed in accordance with this policy or otherwise approved by representatives of Apollo ("Approved Apollo Disclosure") or (y) if publicly filed or otherwise reasonably expected to become publicly available, any other Investor Disclosure Matters (defined below) other than to the extent disclosed in accordance with the Disclosure Policy, shall require the approval of the Board.

b. *Tax and Financial Reporting Matters:* The following tax and financial reporting related actions shall require the approval of the Audit Committee of the Board in accordance with the Audit Committee Charter:

i. materially change any of the tax, accounting, bookkeeping or record-keeping principles, elections or positions;

ii. electing, terminating or replacing an independent auditor of the Company Group; provided engagement of independent auditors that are not the auditor of LifePoint by a member of the Company Group with respect to audits of such Person for purposes other than financial reporting shall not require board approval and

iii. reviewing, accepting, approving or changing the Company Group's independent auditors' reports.

c. *Investor Relations:* Issuing any press release or other public announcement, or giving any media interview relating to or referring to (x) Apollo, or (y) the Company's or any of its Subsidiaries' earnings, results of operations, financial condition or capital structure (the "Investor Disclosure Matters") shall be made in accordance with the Disclosure Policy adopted by LifePoint.

d. *Amending Organizational Documents:* Materially amending, modifying or waiving the terms of any organizational document of any joint venture or any other material member of the Company Group shall require the approval of the Board.

e. *Governance Policies:* Modifying or approving policies established by the Board relating to the Company Group's operations or governance or making, modifying or

approving any plans, practices or procedures inconsistent with those policies adopted by the Board shall require the approval of the Board.

f. *Corporate Headquarters:* Changing the corporate headquarters of the Company Group shall require the approval of the Board.

g. Bank Accounts: Opening and closing bank accounts shall require the authorization of the Chief Financial Officer and the Vice President and Treasurer of LifePoint and shall be in a manner consistent with any budgets or plans approved by the Board.

h. Powers of Attorney: Approval of the General Counsel and the Chief Executive Officer is required prior to the execution of any power of attorney. Only the Chief Executive Officer or Chief Financial Officer may execute a power of attorney unless otherwise required by the constituent documents of the relevant member of the Company Group, in which case, the appropriate corporate officer of such member of the Company Group will execute the power of attorney and the Chief Executive Officer will approve the power of attorney.

i. Political Contributions: No political contributions may be made on behalf of any member of the Company Group without the prior written approval of the Board other than (i) corporate contributions not in excess of $10,000 in any fiscal year made in compliance with applicable law and applicable policies and procedures adopted by the Company Group and (ii) any contributions made by political actions committees established or sponsored by a member of the Company Group acting in compliance with applicable law.

Chief Executive Officer
JOB DESCRIPTION

Job Summary

The CEO provides leadership and direction for the overall operation of the hospital. Plans, directs and coordinates the development of short and long range objectives; is responsible for achieving the organization's financial and non-financial goals.

General Responsibilities

- Coordinates the activities of senior executives and works with them to develop short and long range objectives, policies, and procedures.
- Ensures that policies are uniformly understood and consistently interpreted and administered.

[x] Stress Tolerance

AMENDED AND RESTATED EXCLUSIVE EMERGENCY DEPARTMENT, HOSPITALIST SERVICES, AND ANESTHESIA SERVICES MASTER AGREEMENT

This Amended and Restated Exclusive Emergency Department, Hospitalist Services and Anesthesia Services Master Agreement (the "Agreement") is hereby entered into and effective as the date of the last signature (the "Effective Date"), by and between LifePoint Corporate Services, General Partnership ("Company") and Southeastern Emergency Physicians, LLC, a Tennessee limited liability company and TeamHealth subsidiary ("Contractor"). Company and Contractor may hereafter be referred to individually as a "Party" and collectively as tire "Parties".

RECITALS

WHEREAS, Company and Contractor are parties to that certain Exclusive Emergency Department and Hospitalist Services Master Agreement and certain Addenda thereto, dated January 1, 2018 (the "Previous Agreement");

WHEREAS, the Parties which to amend the Previous Agreement for the purposes of memorializing all the current services under one agreement, to add Anesthesia Services to the Previous Agreement, and to restate the Previous Agreement in its entirety;

WHEREAS, Company is an affiliate of those health care facilities more particularly identified in Exhibit 1 and subsequent Attachments, as defined below each attached hereto and incorporated by reference into this Agreement (individually referred to as the "Hospital" and collectively referred to as the "Hospitals"); and

WHEREAS, as a result of operational efficiencies achieved by combining emergency medicine and hospital medicine service offerings into a single, combined service offering, Company desires for Contractor to supply combined professional and administrative services in the applicable Hospitals' emergency departments, hospital medicine programs and/or anesthesia departments (collectively "Services") in exchange for consolidated payments that fully recognize the economies of scale created by a single combined service offering; and

WHEREAS, Company desires to manage the financial relationship of affiliated Hospitals and Contractor upon the terms and conditions stated below; and

WHEREAS, Contractor will, at its expense, arrange coverage for each of the Hospitals through licensed physicians and advanced practice clinicians (individually and collectively referred to as "Contractor's Representatives") authorized and licensed to practice under the laws of the stales in which the Hospitals are located and qualified to practice the professional services as defined in this Agreement; and

WHEREAS, Company desires to contract with Contractor as set forth herein to obtain the opportunity for Hospitals to contract with Contractor as the exclusive provider for emergency department and/or hospitalist services for Hospitals; and

WHEREAS, this Agreement is entered into for the purpose of defining the Parties' respective rights and responsibilities.

NOW, THEREFORE, in consideration of the premises and mutual covenants and agreements herein set forth, the Parties hereto agree as follows:

I. OBLIGATIONS OF CONTRACTOR

A. Organization. Contractor represents and warrants that it is a limited liability company that is duly organized and validly existing under the laws of its state of incorporation and has the corporate power and authority to execute and deliver this Agreement, and to carry out its provisions.

B. Emergency Department, Hospitalist Services and Anesthesia Services. Contractor shall provide to Hospitals professional and administrative services needed at the Hospitals, as reflected in separate arrangements (each an "Attachment") with each Hospital and the Services provided at each such Hospital identified in Exhibit 1 of the Agreement, as may be updated from time to time by the Parties without executing a written amendment to this Agreement. An example of the Attachment each Hospital will enter into with Contractor is attached hereto as Exhibit 4 for reference. Parties agree that only Hospitals with executed Attachments will be added to Exhibit 1. All Attachments previously set forth in that Previous Agreement are hereby incorporated into this Agreement by reference and repeated verbatim, unless such any such Attachments are otherwise amended, terminated, or replaced. In the event of any conflict between the terms of this Agreement and the terms of any Attachment, the terms of this Agreement shall control unless specifically stated otherwise.

C. Compliance. Contractor represents and warrants that as of the date of this Agreement: (i) neither it nor any Contractor's Representative providing Services at a Hospital is excluded, debarred or otherwise ineligible to participate in Medicare, Medicaid or any other federal or state healthcare programs or in any federal or state procurement or non-procurement programs; and (ii) neither Contractor nor any Contractor's Representative has been convicted of a criminal offense that could lead to such debarment or exclusion. Contractor shall immediately remove from Sendee at the applicable Hospital any Contractor's Representative for whom this representation and warranty is no longer true and shall so inform the Company and Hospital to which Contractor's Representative is assigned. Contractor acknowledges and agrees that this is a material term of this Agreement and the Attachments, and in the event this representation and warranty becomes untrue as to Contractor, Company may (i) deem this Agreement immediately terminated if such representation becomes untrue regarding this Agreement; or (ii) deem the applicable Attachment immediately terminated if such representation and warranty becomes untrue pursuant to Section I.E of the applicable Attachment. Contractor agrees this is an ongoing representation and will immediately notify Company in the event the foregoing representation and warranty is no longer completely accurate as it pertains to this Agreement or the applicable Attachment.

II. **OBLIGATIONS OF COMPANY**

A. Organization. Company represents and warrants that it is a corporation or limited liability company duly organized and validly existing under the laws of its state of incorporation and has the corporate power and authority to execute and deliver this Agreement, and to carry out its provisions.

B. Additional Hospitals. For purposes of this Master Agreement, an "Additional Hospital" or "Additional Hospitals" shall be defined as any hospital or service line at any hospital owned or operated by RCCH, Capella, Company or any subsidiary of RCCH, Capella or Company that is not currently included in Exhibit 1 as of the Effective Date. The parties agree that Additional Hospitals may be added to Exhibit 1 from time to time pursuant to the terms of this Master Agreement. As Additional Hospitals are added to this Master Agreement, the terms "Hospital" and "Hospitals" as used herein shall include any Additional Hospitals, unless otherwise noted."

C. Contractor's Right to Participate in Future Requests for Proposal. Should Company plan to request proposals for or terminate services at any Hospital at which Contractor is then providing any services to a Company Hospital, as applicable, Company agrees to: (i) include Contractor in the request for proposal process, and (ii) use its best efforts to meet with Contractor face to face to develop a precise pro-forma for the opportunity, with such face to face meeting scheduled on a mutually agreeable date no less than thirty (30) days prior to the deadline for submission of the response to the request for proposal.

III. **PARTNERSHIP GOVERNANCE**. Company and Contractor, through the Party's respective senior leadership teams, hereby acknowledge and agree to work cooperatively together to lead and administer the governance expectations set forth under this Agreement, which will include, but not be limited to, carrying out the following:

A. The Parties shall mutually agree upon any Attachment start-ups or terminations, unless otherwise terminated, as allowed in Section VI. The Parties agree that the applicable Hospital CEO(s) will not have unilateral termination authority for the applicable Attachment(s). This sentence shall supersede any conflicting termination provisions contained in the applicable Attachment(s).

B. Hold, at a minimum, monthly operations reviews of financial and operational performance that include the involvement of both Parties' senior leadership teams.

C. Each Party will appoint one or more senior leadership team members to manage the day-to-day operations of the Agreement, with such day-to-day management including the following:

1. Conducting bi-monthly and quarterly reviews in conjunction with Company's Group Chief Operating Officers.

2. Conducting monthly operation reviews with Company and Contractor leadership teams.

3. Conducting monthly operation reviews with the respective Hospital CEOs for those Hospitals that Company and Contractor mutually agree upon in advance.

4. Conduct monthly and weekly physician recruitment reviews with the applicable Hospital CEOs, the applicable Company service line leaders, and Contractor's leadership team to create more accountability and resolution to staffing, recruitment, premium labor, and other operational issues as identified.

IV. EXCLUSIVITY

A. Company concludes that an exclusive relationship with Contractor for Services at Hospitals and Additional Hospitals will best facilitate the delivery of efficient, effective and quality patient care. Such a relationship is expected to enhance patient services provided by Contractor and the Hospitals, improve the relationships between Contractor, the Hospitals' Medical Staffs and each Hospital, afford effective utilization of the Hospitals' equipment, provide consistent service and quality control, provide prompt availability of professional services, simplify scheduling of patients and physician coverage, enhance the efficient and effective administration of the service — all of which enhance the quality of patient care.

B. During the Term of this Agreement, Contractor shall be the exclusive provider of Services described in this Agreement at participating Hospitals, and therefore, Hospitals will not extend medical staff privileges for the practice of the Services at those Hospitals to any provider not employed by or under contract with Contractor. However, nothing in the preceding sentence shall be construed to limit the rights of community based physicians with medical staff privileges at the Hospitals to provide care for their patients while they are admitted to the same.

V. RESTRICTIVE COVENANT

A. During the Term of the Agreement, Contractor agrees that, prior to performing emergency department, hospitalist, or anesthesia services at any facility within the Hospitals' primary service areas, Contractor will notify Company in writing of its desire to provide such services. Following Contractor's delivery of such written notice to Company, Contractor and Company shall discuss and agree upon the opportunity, which agreement by Company will not be unreasonably withheld, prior to Contractor performing such services. Notwithstanding the foregoing, Company acknowledges and agrees that as of the Effective Date of this Agreement, Contractor or an affiliate of Contractor maintains existing relationships with those facilities identified in Exhibit 2-A of the Previous Agreement (as defined in the Recitals, above). Company agrees that no such notice requirement or restriction shall apply with respect to any such aforementioned facility.

B. If it shall be determined that the duration of any restriction contained in this section is unenforceable, it is the intention of the Parties that such restrictive covenant set forth herein shall not thereby be terminated or void but shall be deemed amended to the extent required to render it valid and enforceable to the greatest extent permissible by the applicable law and public policy, such amendment shall apply only with respect to the operation of this Article V.

C. Contractor shall not, by contract or otherwise, prohibit Contractor's Representatives from providing Services at the Hospitals in the event that this Agreement or an Attachment is terminated. In the event that this Agreement or an Attachment is terminated for any reason, the Company and Hospitals shall have the right to continue to engage or to employ (either directly or indirectly, including through a successor contracting entity to Contractor) the Contractor's Representatives who were engaged on the date of termination by Contractor to provide Services hereunder for any of the Hospitals (the "Existing Providers"); provided, however, that in the event this Agreement or an Attachment is terminated for any reason by Company or a Hospital, or upon expiration of this Agreement, the right of the Company and/or the Hospitals to continue to engage or to employ any such Existing Providers shall be contingent upon Company or the applicable Hospital first paying Contractor the following amounts for each Existing Provider engaged or employed by Company, Hospitals or any third party succeeding Contractor as the provider of similar services at Hospitals, as liquidated damages (collectively, the "Existing Provider Buyout Fee"):

i. the sum of Fifteen Thousand Dollars ($15,000.00), plus the amount of any repayments due to Contractor from Existing Providers for unamortized sign-on bonuses, workforce in place payments, or similar amounts, due to Contractor for each Existing Provider who is a physician; and

ii. the sum of Seven Thousand Five Hundred Dollars ($7,500.00), plus the amount of any repayments due to Contractor from Existing Providers unamortized sign-on bonuses or similar amounts, due to Contractor for each Existing Provider who is an advanced practice clinician;

Notwithstanding the foregoing, in the event this Agreement is terminated by Contractor for any reason, the Parties hereby acknowledge and agree that neither Company nor any Hospital shall be obligated to pay Contractor the aforementioned Existing Provider Buyout Fee for those Existing Providers engaged by Company and/or a Hospital after such termination. In addition, with the exception of any Facility Medical Director (to whom the Existing Provider Buyout Fee shall apply), no Existing Provider Buyout Fee will be applicable to any Existing Providers who provided services at the applicable Hospital prior to the first date Contractor began servicing the Hospital under this or any prior agreement. Such

amounts shall be payable to Contractor within thirty (30) days of the date of termination or expiration of this Agreement.

VI. TERM AND TERMINATION

A. This Agreement shall commence on October 1, 2022 (the "Effective Date"), beginning at 12:00 a.m. in the applicable time zones of the Hospitals, and shall continue for three (3) years thereafter through October 1, 2025 (the "Initial Term"), unless sooner terminated by either Party as further described herein. Notwithstanding the foregoing, upon expiration of the Initial Term, this Agreement will automatically renew for an additional three (3) year period (the "First Renewal Term"), and following the expiration of the First Renewal Term, two additional periods of one (1) year each (each an "Additional Term") until (i) such time as a new Agreement is executed by the Parties, or (ii) this Agreement is otherwise terminated as provided herein. As used herein, "Term" shall mean the Initial Term, the First Renewal Term, and any Additional Terms.

B. Termination Without Cause.

(i) Termination Without Cause by Company. Company may at any time give notice to terminate this Master Agreement in its entirety, but not any individual Hospitals or Attachments (unless otherwise mutually agreed to in writing by the Parties or subject to Section C below), without cause by providing not less than one hundred eighty (180) days prior written notice stating Company's intended date of termination. In such event, this Master Agreement and all Hospitals under this Master Agreement shall terminate at the end of such one hundred eighty (180) day notice period provided by Company and Contractor shall have no further obligation to provide services to the Hospitals.

(ii) Termination Without Cause by Contractor. Contractor may at any time give notice to terminate this Master Agreement in its entirety, but not any individual Hospitals or Attachments (unless otherwise mutually agreed to in writing by the Parties), without cause by providing not less than one hundred eighty (180) days prior written notice stating Contractor's intended date of termination. Upon receipt of such notice from Contractor, Company shall have the option of: (i) accepting Contractor's notice of without cause termination and allowing this Master Agreement and all Hospitals under this Master Agreement to terminate at the end of such one hundred eighty (180) day period, or (ii) notifying Contractor in writing that Company elects a staged termination approach, in which case Contractor will terminate no more than twenty-five percent (25%) of the then remaining Hospitals under this Agreement every one hundred eighty (180) thereafter (each a "Termination Staging Period"), until all Hospitals and the Master Agreement itself have terminated at the end of the final one hundred eighty (180) Termination Staging Period.

(iii) In the event Company: (i) terminates the Master Agreement for any reason prior to or during the Offset Period, or (ii) Contractor fails to achieve sufficient Additional Hospital growth to offset the Covid Adjustment. Amount prior to the termination of this Agreement for any reason, as evidenced by Contractor's financial documentation presented to and agreed upon by Company, Company agrees to pay Contractor, within sixty (60) days following final termination of the Master Agreement, a liquidated damage amount equal to the unpaid Covid Adjustment Amount. This amount shall be calculated by Contractor in accordance with Section 1.a and its routine accounting practices.

C. In the event of Company's sale or divestiture of any Hospital(s) covered by this Agreement, Company agrees to provide Contractor with no less than sixty (60) days prior written notice in advance of the closing, or promptly after full execution of a definitive sale agreement if closing takes place within less than sixty (60) days of such execution.. Such notice shall include, at a minimum, (i) the anticipated closing date, (ii) the name of the buyer, and (iii) contact information for buyer's representative(s) responsible for negotiating with Contractor for ongoing services at the site. Following Company's delivery of such written notice, Company agrees to provide reasonable transition assistance to Contractor during the sixty (60) days prior to closing in order to facilitate communications with Buyer regarding post-closing service opportunities..

D. Notwithstanding anything herein to the contrary, should either Party terminate this Agreement for any reason, all separate Attachments and arrangements identified in Exhibit 1 with each Hospital shall also terminate on the same Termination Date as this Agreement.

E. Either Party may terminate this Agreement at any time in the event the other Party engages in an act or omission constituting a material breach of any Term or condition of this Agreement. The Party electing to terminate this Agreement shall provide the breaching Party with written notice specifying the nature of the breach. If a dispute arises regarding the materiality of a breach, then both Parties shall submit the issue to a mutually agreed upon arbitrator pursuant to Section VIII of this Agreement for resolution of the dispute. The breaching Party shall then have thirty (30) days from the date of the notice or thirty (30) days from the date of the arbitrator's decision in which to remedy the breach and conform its conduct to this Agreement. If such corrective action is not taken within the time specified, this Agreement shall terminate at the end of the thirty (30) day period without further notice or demand, provided, however, that Company may not terminate this Agreement if Contractor is diligently pursuing the remedy of the breach.

F. Either Party may terminate this Agreement immediately if either Party makes a general assignment for the benefit of creditors, or files a petition for relief in bankruptcy or under similar laws for the protection of debtors, or upon the initiation of such proceedings against either Party if the same are not dismissed within forty-five (45) days of service.

G. No later than June 30, 2023, Company and Contractor shall mutually agree upon the "Amended and Restated Consolidated ED Scorecard" applicable to the Hospitals' emergency departments. Further, no later than June 30, 2023, Company and Contractor shall agree upon a "Consolidated Hospitalist Physician Scorecard" applicable to the Hospital's hospital medicine program. Existing scorecards shall remain in effect until the amended and restated versions set forth above are mutually agreed upon. Company and Contractor hereby agree that Contractor's actual performance against the Consolidated ED Scorecard and the Consolidated Hospitalist Physician Scorecard shall be measured against Contractor data at all TeamHealth contracted Hospitals from the then-current year to the immediately preceding year, subject to Company and the Hospitals providing Contractor with timely and accurate data to allow for such measuring. Company may terminate this Agreement upon ninety (90) days' prior written notice to Contractor with respect to an individual Hospital, but not with respect to this entire Agreement, if Contractor fails to achieve an overall minimum score of sixty (60) points on the "Consolidated ED Physician Scorecard" or "Consolidated Hospitalist Physician Scorecard" (defined in any of the Attachments to this Agreement) that specific Hospital for any two consecutive quarters during the term of this Agreement or any renewal period thereof. In the event Company and/or Hospitals fail or refuse to provide the necessary data for Contractor to measure its performance against the applicable scorecard, Contractor's performance relative to such missing data shall be deemed fully achieved. Contractor, however, shall have the right, at its own expense, to review and audit any quality metric contained in the ED Physician Scorecard or Hospitalist Physician Scorecard, including all underlying data. Company agrees to resolve any discrepancy found during an audit performed by Contractor to the Parties' mutual satisfaction. If a dispute arises or the Parties are unable to resolve the discrepancy to their mutual satisfaction, then both Parties shall submit the issue to a mutually agreed upon arbitrator pursuant to Section VIII of this Agreement for resolution of the dispute.

H. Except as provided herein, upon any termination of this Agreement, neither Party shall have further rights against, or obligations to, the other Party except with respect to any rights or obligations accruing prior to the date and time of termination and any obligations, promises or agreements which expressly extend beyond the termination, including but not limited to the terms herein related to insurance coverage, restrictive covenants, dispute resolution and confidentiality provisions. Contractor shall have reasonable access to any Hospital's information and records pursuant to this Agreement for a period of six months after termination of this Agreement for Contractor's billing, risk management and/or quality/peer review purposes.

VII. PAYMENT

A. GUARANTEE PAYMENTS

1. CONTRACTOR BILLING RESPONSIBILITY. Contractor shall be responsible for, and solely entitled to, billing and collection of the charges for all Services provided by any Contractor's Representatives at the Hospitals, unless indicated otherwise in the individual Attachments.

2. COST-PLUS SUBSIDY PAYMENTS. Company shall pay to Contractor, in monthly installments each year commencing on the Effective Date, a cost-plus subsidy amount (the "Cost-Plus Subsidy Payment") for services provided by Contractor to the Hospitals equal to the total of (i) the Total Estimated Semi-Annual Practice Expense Amount (as hereinafter defined) incurred by Contractor in fulfilling its obligations hereunder, plus (ii) a Management Fee equal to ten percent (10%) of the Total Estimated Semi-Annual Practice Expense Amount (the "Management Fee") covering administrative services provided by Contractor including, without limitation, legal, accounting, education and ongoing training, travel, performance improvement, satisfaction surveys, recruiting costs, billing administration, malpractice administration,

operation and clinical management, and other administrative services, less (iii) Contractor's Semi-Annual Professional Service Revenue, as that term is defined below. Notwithstanding the above, for those Additional Hospitals (i) scheduled in Exhibit 1, or (ii) added to Exhibit 1 effective after the Effective Date, the Management Fee shall equal five percent (5%) of the Total Estimated Semi-Annual Practice Expense Amount during the initial twelve (12) months of services, after which the Management Fee for such sites shall increase to the standard ten percent (10%) of the Total Estimated Semi-Annual Practice Expense Amount. Exhibit 2 attached to this Agreement sets forth the calculation of the Cost-Plus Subsidy Payment for a sample semi-annual period and shall serve as an example for all future Cost-Plus Subsidy Payment calculations unless otherwise mutually agreed between the parties. In the event there is any conflict or inconsistency between the terms and conditions of this Section VII(A)(2) and the manner of calculation of the Semi-Annual Practice Subsidy Amount set forth in Exhibit 2, the manner of calculation of the Cost-Plus Subsidy Payment set forth in Exhibit 2 shall govern and control the rights and obligations of the parties.

(a) For purposes of the Cost-Plus calculation occurring under the Agreement, the compensation methodology for the following facilities receiving anesthesia services from Contractor: (Northeastern Nevada Regional Hospital and Paris Regional Medical Center) will commence calculation of the Management Fee at ten percent (10%) pursuant to the Agreement as of the Effective Date, notwithstanding the fact that Anesthesia services commenced on an earlier date. Additional Anesthesia sites will be supplemented to Exhibit 1, as necessary.

(b) Notwithstanding the foregoing, for purposes of the Cost-Plus Compensation calculations, the parties reserve the right to mutually agree in writing to variations in the Year 1 and/or Year 2 Management Fee for Anesthesia Services if necessary based on prevailing market factors.

(c) With regard to anesthesia services provided at Conemaugh Memorial Medical Center and Conemaugh Nason Medical Center, the Management Fee shall be five percent (5%) of the Total Estimated Semi-Annual Practice Expense Amount during the initial twenty-four (24) months of operation, and ten percent (10%) commencing on the first date of the third year of operation and continuing for each successive year of operations thereafter.

(d) With regard to Conemaugh Memorial Medical Center, the following paragraph from the separate hospital attachment shall continue to apply:

(1) Locum Tenens Expenses. Following the Effective Date set forth in the table above and continuing for the first ninety (90) days thereafter, Company shall be solely responsible for all expenses associated with obtaining qualified locum tenens providers and/or temporary staffing, including CRNAs, to provide the Services hereunder to the Facility on behalf of Contractor (the "Locum Tenens Expenses"). For months four (4) through twenty-four (24) of the initial two (2) years of operations under this Agreement, Contractor shall be solely responsible for the aforementioned Locum Tenens Expenses. Starting in month twenty-five (25) and continuing thereafter, Facility shall resume responsibility for the Locum Tenens Expenses.

3. DEFINITIONS. The terms used in this Section shall have the following meanings:

(a) "Semi-Annual" or "Semi-Annually" shall mean each six (6) month calendar period during the Term of the Agreement commencing on the Effective Date (or a corresponding part thereof).

(b) "Total Estimated Semi-Annual Practice Expense Amount" shall mean, for each Semi-Annual period or part thereof during the Term of the Agreement, the projected expenses of Contractor in providing Services (as mutually agreed upon by Contractor and Company) during the subsequent applicable Semi-Annual period. Types of expenses included in the Total Estimated Semi-Annual Practice Expense Amount shall include direct expenses incurred by Contractor that are associated with the Services (inclusive of Services provided with respect to Additional Hospitals) including, but not limited to, the following: (i) compensation paid by Contractor to physician, mid-level, medical director, and scribe; (ii) allocated billing and collection costs; and (iii) insurance costs. With respect to the estimated expenses, the parties agree that any material changes in staffing or compensation subsequent to the establishment of estimated expenses shall require the prior approval of Company, which approval shall not be unreasonably withheld.

(1) Company agrees that in connection with Contractor's recruitment of Tyson J. Jordan, M.D., Robert C. Rankins DI, M.D., and Paul Dwyer, M.D. (collectively the "Cornerstone Physicians") to provide professional and administrative services at Paris Regional Medical Center in Paris, Texas (the "Paris Agreement"), Contractor has paid the total sum of Four

Hundred Eighty-Three Thousand Five Hundred Forty and No/100 Dollars ($483,540.00) to FasciaMedica Prompta, PLLC d/b/a Cornerstone Physicians Partners (the "Cornerstone Payment") on or around July 1, 2020. Company acknowledges and agrees that the remaining portion of the Cornerstone Payment in the amount of One Hundred Sixty-One Thousand One Hundred Eighty Dollars ($161,180.00) shall: (i) be treated by Contractor as a cost incurred by Contractor under this Agreement, and (ii) included by Contractor within the Semi-Annual Practice Expense Amount as defined in Article VII(A)(3)(b) of the Master Agreement for purposes of the July 1, 2022 calculation. The parties further agree that the restrictive covenant set forth in Section V(C) of the Master Agreement shall not apply as to the Cornerstone Physicians, and Company, or its designee, shall be free to engage with the Cornerstone Physicians without paying the Existing Provider Buyout Fee. In the event one or more of the Cornerstone Physicians terminate their engagements with Contractor under the Paris Agreement prior to July 1, 2023, the applicable one third (1/3) of the Cornerstone Payment represented by such terminating physician(s) shall not be included in subsequent Cost Plus Subsidy calculations prepared by Contractor once the funds are recovered by Contractor from the applicable Cornerstone Physician(s).

(c) "Semi-Annual Professional Service Revenue" shall mean all professional fees and charges (excluding the applicable portion of the Total Estimated Semi-Annual Practice Expense Subsidy Amount) of Contractor during the applicable Semi-Annual period accounted for on the accrual basis of accounting in accordance with Generally Accepted Accounting Principles ("GAAP") for the Services rendered by Contractor's Representatives. Semi-Annual Professional Service Revenue shall also include all Grants awarded to Contractor or to its affiliated medical groups from either the Provider Relief Fund established by the CARES Act or from any other future Extraordinary Governmental Payments related solely to lost revenues under the Master Agreement.

4. PAYMENT MECHANISM. During each contract year or part thereof commencing on the Effective Date, Company shall pay Contractor monthly, within ten (10) days after the first day of each month, an amount equal to one-sixth (1/6th) of the interim Cost-Plus Subsidy Payment as an "Interim Monthly Subsidy Payment".

5. ANNUAL RECONCILIATION. Within 45 days following the end of each calendar year, Contractor shall provide Company with an opportunity to review financial performance documentation with respect to the Hospitals, after which Contractor and Company shall jointly perform a reconciliation of (i) the interim Cost-Plus Subsidy Payments made from Company to Contractor during the prior year, (ii) the aggregate of the Total Estimated Semi-Annual Practice Expense Amount paid in the prior year vs. Contractor's actual full year expenses, and (iii) the aggregate of Semi-Annual Professional Service Revenue vs. Contractor's actual professional service revenue, during the prior twelve (12) months to determine if any overpayments or underpayments were made by Company to Contractor. In the event such annual reconciliation evidences an overpayment due from, or an underpayment due to, either party, such reconciliation correction payment shall be made to the applicable party within thirty (30) days following completion of the reconciliation. In the event the parties are unable to agree on a final reconciliation of amounts due or from the other party, the parties shall mutually agree on an independent auditor to perform such reconciliation, the results of which shall be binding on both parties.

6. PROMPT BILLING, REVIEW OF FINANCIAL PERFORMANCE, RIGHT TO AUDIT BOOKS AND RECORDS. Contractor shall bill all patients promptly and accurately for all Services rendered and shall use its best efforts to collect all patient accounts. Hospital and Contractor's Representatives will provide all documentation necessary for accurate and timely billing. During the Term of this Agreement, Contractor agrees to provide monthly, Base Period to date and year to date detailed financial and statistical reports for each Hospital. Company and Contractor agree to meet monthly to review such financial performance. Both during and following termination of the Agreement, Company shall have the right, upon reasonable notice and request, to review and audit Contractor's books and records on an annual basis for the then current contract year to assure compliance with this Agreement. Such review and audit shall be solely limited to the Services provided under this Agreement. Additionally, for purposes of ensuring accurate coding, Contractor agrees to use its best efforts to document its Services fully, completely, and in a timely manner. The Parties agree to make available, and shall also cause their respective billing companies to make available, any and all documents that may be used for the execution of the audit in a reasonable and timely fashion.

7. CONTRACTOR FEE SCHEDULE. Contractor will establish a schedule of fees at each Hospital to be charged to all patients for Services provided by Contractor's Representatives. Contractor will provide a fee schedule to Hospital upon execution of the applicable Attachment and annually thereafter. Contractor agrees that Contractor shall negotiate in good faith and use its best efforts in order that Contractor can participate,

and any Contractor's Representative designated by Company and/or a Hospital can participate, in any and all programs and/or networks in which Company and/or a Hospital participates with health maintenance organizations, preferred provider organizations, other payors, and physician-hospital organizations. Company is agreeable to Contractor and the exclusive provider of such Services negotiating a mutually agreeable billing and coverage arrangement. Company agrees to assist Contractor by providing contact information for relevant programs.

8. REMITTANCE ADDRESS. All payments made by Company to Contractor under this agreement will be paid to: Contractor:

Southeastern Emergency Physicians, LLC
Post Office Box 634850
Cincinnati, Ohio 45263-4850

9. PREVIOUS AGREEMENT COVID ADJUSTMENT. The parties acknowledge and agree that during the term of the Previous Agreement, the COVID-19 pandemic required certain adjustments and mitigations to Contractor's compensation ("Covid Adjustments") in order to take into account unexpected extraordinary short-term declining volumes, related market variables affecting the Hospitals, and the Grants as a result of the COVID-19 pandemic. As a result, the Management Fee payable to Contractor for certain existing Hospitals under the Master Agreement was reduced to six percent (6%) of the Total Estimated Semi-Annual Practice Expense Amount (the "Management Fee") during the period January 1, 2020 through December 31, 2020 (the "Covid Adjustment Period"). Following the end of the Covid Adjustment Period, the parties calculated the total amount of the reduction to the management fee during the Covid Adjustment Period, the total of which was Five Million Six Hundred Ninety Thousand Six Hundred Six and No/100 Dollars ($5,690,606.00) (the "Covid Adjustment Amount"). Commencing January 1, 2021 under the Previous Agreement, the Management Fee for Hospitals returned to ten percent (10%) of the Total Estimated Semi-Annual Practice Expense Amount as set forth in the existing Section VII.A.2 of the Agreement for the remainder of the Term. Under the Previous Agreement, and continuing under this Agreement, the parties acknowledge and agree the Covid Adjustment Amount would be offset by future growth under the Previous Agreement and this Agreement, as applicable, through Additional Hospitals added as attachments to this Agreement between January 1, 2020 and December 31, 2023 (the "Offset Period"). The dollar value of the future growth of each of the Additional Hospitals that will be used to offset the Covid Adjustment Amount shall be equal to the actual Contribution Margin realized during the Offset Period for any Additional Hospital; provided however, if the Term of this Agreement continues beyond December 31, 2023, then the Contribution Margin of each of the Additional Hospitals added during the Offset Period will continue to offset the Covid Adjustment Amount through the extended term(s) Company and Contractor agree to use their best good faith efforts to achieve the projected Additional Hospital growth during the Offset Period. Company and Contractor further agree that in the event Company terminates or divests any Hospitals under this Agreement that were signed as Additional Hospitals after December 31, 2019, such Hospitals will be counted for purposes of the growth calculation for the pro rata share of the period under the Master Agreement.

B. Premium Labor Cost Reimbursement. Company and Contractor hereby acknowledge and agree that Notwithstanding the above, the parties acknowledge and agree that, for purposes of calculating the Management Fee, Contractor shall not include Premium Labor Costs within the Management Fee calculation (i.e. as a component of Total Estimated Semi-Annual Practice Expense Amount for purposes of calculating the Management Fee); provided, however, Premium Labor Costs shall continue to be included within the Total Estimated Semi-Annual Practice Expense Amount for all other purposes.

As used herein, "Premium Labor Costs" shall be defined as the differential between the base provider compensation expenses incurred and paid by Contractor in the ordinary course for full-time providers and Contractor's actual expenses for premium coverage provided by internal or external locum tenens providers, and Contractor special operations providers.

C. Remittance Address. All payments made by Company to Contractor under this agreement will be paid to:

Contractor: Southeastern Emergency Physicians, LLC
Post Office Box 634850
Cincinnati, Ohio 45263-4850

D. Smart Ribbon® Services and Applications.

1. As an additional component of the hospitalist services provided by Contractor to Company and selected Hospitals receiving hospitalist services under this Master Agreement, Contractor has entered into a relationship with a third-party vendor, IllumiCare, Inc. ("Illumicare"). Illumicare offers a technology-based service to health care entities that displays information in context with the electronic medical record (on the Smart Ribbon® or "Ribbon"), which contains one or more functional applications ("Apps"). Through use of the proprietary Smart Ribbon®, Contractor proposes to reduce the direct, variable medication and lab spend per hospital admission managed by Contractor's Providers for certain Hospitals selected by Company at its sole and absolute discretion as participating hospitals in the Ribbon application (the "Participating Hospitals"). Once selected by Company, the Participating Hospitals shall be listed in Exhibit 5 attached hereto. Company's selection of the Hospitals to be included as Participating Hospitals shall be conditioned on Company first negotiating and entering into one or more separate licensing agreements between Company, the Participating Hospitals and Illumicare for use of the Smart Ribbon at the Participating Hospitals with terms reasonably acceptable to Company. Changes in the med/lab spend per admission will be calculated on a DRG and volume adjusted basis, per the cost methodology example set forth in Exhibit 6 attached hereto (the "Cost Savings") over each calendar quarter (each a "Performance Period"). Subject to the conditions set forth above, in the event of such Cost Savings, each Participating Hospital shall pay to Contractor a fee equal to the first $12.00 of per admission calculated savings in medication and lab test costs during each Performance Period (the "Shared Savings") at such Participating Hospital. The Shared Savings amount shall be in addition to all other amounts due to Contractor pursuant to this Master Agreement and will not be taken into account for purposes of the Cost-Plus Subsidy calculation. Within thirty (30) days after the end of each quarter, Company and Contractor shall meet to determine whether Cost Savings were achieved by Contractor and the Contractor's Providers during the prior quarter. If Cost Savings were achieved, then the Shared Savings shall be distributed to Contractor within sixty (60) days of the end of the prior quarter. If Cost Savings were not achieved, Company shall owe no Shared Savings and no discharge costs to Contractor for that quarter. Company shall be responsible for all administrative implementation costs across all Participating Hospital locations participating in the Ribbon."

2. During the term of this Agreement, Company and Participating Hospitals agree to cooperate with Contractor's and IllumiCare's efforts to perform and provide the following (collectively, the "Ribbon Platform") services at Participating Hospitals:

    a. Work with each Participating Hospital's technical staff to implement and maintain a secure flow of required data (as specified in Exhibit 5 attached to this Agreement);

    b. Work with each Participating Hospital's technical staff to install and maintain the code required to display the Ribbon in context with the electronic medical record;

    c. Maintain the Ribbon Platform and make any ongoing changes necessitated by each Participating Hospital's system modifications;

    d. Contractor, through its arrangement with Illumicare, will provide electronic training and support (24/7/365) and live support (M-F, 8:00 am-6:00 pm CT) to Contractor's Providers and support/administrative personnel.

3. Company further acknowledges and agrees that Contractor, through its collaboration with IllumiCare, shall provide Apps within the Ribbon as more specifically described in Exhibit 5.

4. Invoicing. On no less than a quarterly basis, Illumicare will perform the cost savings calculations reflected in Exhibit "6", the results of which shall be made available to Company and Contractor upon request. Thereafter, Illumicare will invoice Contractor for the amounts due to Illumicare pursuant to the Illumicare Agreement. Simultaneously, Contractor will invoice Company for the amounts due as set forth herein."

5. Termination. At any time during the term of this Agreement, Company may, in its sole and absolute discretion, terminate the arrangement described in this Section VII.D. with respect to

all of the Participating Hospitals, or any of them upon written notice to Contractor. Upon such termination, the remainder of this Agreement shall remain in full force and effect.

6. Nonexclusive. The arrangement described in this Section VII.D. is non-exclusive. As such, at any time during the term of this Agreement, Company or any of its Affiliates may obtain directly from Illumicare the right to use Smart Ribbon® at any Participating Hospital without violating the Agreement.

7. The purposes of the arrangement described in this Section VII.D. is to establish a compensation system that demonstrates, in an objective manner, quality clinical improvement resulting in the reduction of waste associated with the medication and lab services at each Participating Hospital, and to compensate the Contractor for such improvements by sharing the savings that occur as a result of such efforts. The arrangement described in this Section VII.D does not compensate the Contractor for limiting, reducing or withholding medically necessary patient care services, or for increased volume or value of referrals to, or other business generated for, any Participating Hospital.

8. Ongoing Monitoring of Unintended or Inappropriate Effects. Contractor, Illumicare and Company shall each designate one (1) representative (the "Monitoring Representatives") to monitor the arrangement set forth in this Section VII.D. to ensure that it does not adversely affect patient care. On biweekly basis during the Term, the Monitoring Representatives shall meet to review this arrangement and its impact upon the Participating Hospitals and patient outcomes. The review shall assess the quality of care and safety related to services that are subject to this arrangement, to assess whether the arrangement negatively affects patient care and to confirm there is no reduction of medically necessary patient care related to the arrangement or inappropriate patient discharges. Contractor agrees that it shall cooperate with Company to address any concerns identified through such monitoring, including through changes to this Agreement if necessary. In particular, The Monitoring Representatives shall review data related to (i) mortality rates, (ii) re-admission rates, and (iii) patient harm at each of the Participating Hospitals.

VIII. **ALTERNATIVE DISPUTE RESOLUTION.** The Parties firmly desire to resolve certain disputes arising hereunder without resort to litigation in order to protect their respective business reputations and the confidential nature of certain aspects of their relationship. Accordingly, any controversy or claim arising out of or relating to this Agreement, excepting healthcare liability and/or claims sounding in negligence, and the insurance and indemnification obligations set forth in each respective Attachment below relating to third-party claims made by patients and/or their representatives, shall be settled by arbitration before a single arbitrator and administered by the American Health Lawyers Association in accordance with its rules, including arbitrator selection. The award or decision rendered by the arbitrator will be final, binding and conclusive, and judgment may be entered upon such award by any court of competent jurisdiction. The arbitration process itself, and any other information or disclosures revealed by either Party to the arbitrator or to the other Party during the arbitration process will be confidential. No disclosure of the award shall be made by the Parties except as required by the law or as necessary or appropriate to effectuate the terms thereof. The location of the arbitration shall be in in the city in which the Hospital is located, unless otherwise mutually agreed by the parties. The dispute shall be governed by the laws of the State. Further, the prevailing Party shall be entitled to recover all costs and expenses associated with arbitration, including reasonable attorneys' fees. If the arbitrator determines that neither Party has substantially prevailed, the Parties shall bear equally the fees and costs of the arbitrator and the related expense of arbitration. Nothing in this section shall preclude either party from maintaining or initiating an action, counterclaim or cross-complaint in tort or contract against the other related to any healthcare liability and/or claims sounding in negligence relating to third-party claims made by a patient and/or a patient's representatives.

IX. **PARTIES' RELATIONSHIP.** The Parties acknowledge that Contractor is an independent contractor to Company and the Hospitals for the furnishing of Contractor's Representatives who agree to render Services to patients of the Hospitals. Neither Contractor nor Contractor's Representatives shall in any way be construed as employees of any of the Hospitals or Company. Neither Contractor nor any of its agents (employees or contractors) shall have the right or authority to enter into any contract in the name of the Company or the Hospitals or otherwise bind the Company or the Hospitals in any way without the express written consent of the Company or its Hospital designee.

X. **CHANGE OF CIRCUMSTANCES.** In the event (i) Medicare, Medicaid, any third party payor or any federal, state or local legislative or regulatory authority adopts any law, rule, regulation, policy, procedure or interpretation thereof which establishes a material change in the method or amount of reimbursement or payment for Services under this Agreement, or if (ii) any or all such payors and/or authorities impose requirements which require a material change in the manner of either Party's

operations under this Agreement and/or the costs related thereto, then, upon the request of either Party materially affected by any such change in circumstances, the Parties shall enter into good faith negotiations for the purpose of establishing such amendments or modifications as may be appropriate in order to accommodate the new requirements and change of circumstances while preserving the original intent of this Agreement to the greatest extent possible. If, after thirty (30) days of such negotiations, the Parties are unable to reach an agreement as to how or whether this Agreement shall continue, then either Party may terminate this Agreement upon thirty (30) days' prior written notice.

XI. **THIRD PARTY DISCOUNTS.** Company represents that it or its Hospital designees, as appropriate, will provide to Contractor a list of all billing arrangements the Hospitals enter into with any third party that result in a discount on fees relating to Services supplied by Contractor under this Agreement. As reasonably requested by Company or the Hospitals, Contractor shall participate in such plans and/or programs, unless Contractor has a contract in force with such payor providing for the receipt of superior reimbursement rates.

XII. **NOTICES.** All notices and any other communications with regard to the subject matter of this Agreement shall, unless indicated elsewhere in this Agreement, be made to the primary contacts for Contractor and Hospital at the address shown, with copies as indicated. Any notices permitted or required by this Agreement shall be deemed made on the day personally delivered in writing or mailed by certified mail (or first class mail), postage prepaid, to the other Party at the address set forth below or to such other persons and addresses as either Party may designate in writing:

Contractor:	Southeastern Emergency Physicians, LLC 265 Brookview Centre Way Suite 400 Knoxville, TN 37919 Attention: Mid-West President
Company:	LifePoint Corporate Services, General Partnership 330 Seven Springs Way Brentwood, TN 37027 Attention: President, Ambulatory Services
With a copy to:	LifePoint Health, Inc. 330 Seven Springs Way Brentwood, TN 37027 Attention: Chief Legal Officer

XIII. **CONFIDENTIALITY.** The Parties agree that this Agreement and its provisions are strictly confidential. The Parties shall not disclose any information pertaining to any provision of this Agreement to any person or entity not a party to this Agreement except for tax, legal or accounting advisors or as otherwise required by law.

XIV. **VENDOR PROMOTION/PUBLICATION.** Company prohibits the use of Company's name or any Hospital's name by any vendor or independent contractor, or the use of any name of Company's parent company, subsidiaries, or affiliated hospitals in any advertisement, press statement or release, website, published customer list, or any publication or dissemination similar to the foregoing without receiving in advance the express written permission from the Company's Chief Executive Officer or his or her designee. Any request for permission should include the complete text of the publication, statement or document in which the name usage will appear and will be subject to edit by the Company.

XV. **MARKETING SERVICES/COMPENSATION OF CONTRACTOR'S REPRESENTATIVES.** Except as specifically provided in this Agreement, Contractor shall not perform and is not being compensated for marketing services with respect to the Services to be performed at the Hospitals. Contractor represents and warrants that no part of the compensation paid hereunder is in exchange for the referral or arrangement for referral of any patient to any of the Hospitals. Contractor represents and warrants that, in connection with the Services to be performed pursuant to this Agreement, each employee, independent contractor, or other entity or person performing Services pursuant to the Agreement shall be compensated in a manner that

complies with the Federal Anti-Kickback Statute, an exception to the Stark law, and as applicable, an appropriate exception to any state statutes similar to either or both of the foregoing federal statutes.

XVI. **SEVERABILITY**. The invalidity or unenforceability of any provision(s) of this Agreement will not affect the validity or enforceability of any other provision(s).

XVII. **NO WAIVER**. No waiver of a breach of any provision of this Agreement shall be construed to be a waiver of any breach of any other provision.

XVIII. **ASSIGNABILITY**. Because this is a personal service contract, Contractor may not assign any of its rights or obligations hereunder without the prior written consent of Company, which consent will not be unreasonably withheld. Company may not assign this Agreement to any successor to all or substantially all of Company's operating assets without the prior written consent of Contractor, which consent will not be unreasonably withheld. This Agreement shall inure to the benefit of and be binding upon the Parties hereto and their respective successors and permitted assigns.

XIX. **NAME OR OWNERSHIP CHANGE**. This Agreement shall continue in full force and effect in the event of a change in the name or ownership of Company, the Hospitals or the Contractor.

XX. **AMENDMENTS**. Amendments to this Agreement shall be made only in writing duly executed by both Parties hereto.

XXI. **ENTIRE AGREEMENT**. This Agreement constitutes the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior agreements, contracts and understandings, oral, written or otherwise, including but not limited to any prior agreements between Contractor and/or its affiliates and any of the Hospitals, including the Previous Agreement (as defined in Section I.B, above).

XXII. **MASTER AGREEMENT**. The Parties acknowledge and agree that this Agreement serves as the Master Agreement between Company and Contractor, and its terms shall govern the financial relationship between the Hospitals and the Contractor. Hospitals receiving Services pursuant to this Agreement shall be individually identified in separate agreements that are affixed as Attachments to this Agreement, as applicable, which shall outline the specific details of provider coverage and quality criteria for each Hospital. Hospitals shall be solely responsible for contracting for management and professional services from Contractor. Contractor expressly acknowledges that Company does not manage the provision of Professional Services at Hospitals. All terms of this Agreement shall be incorporated into the Hospital Agreements as if fully repeated therein verbatim.

XXIII. **THIRD PARTY BENEFICIARIES**. This Agreement is intended to, and shall be deemed and construed to create rights and/or remedies for the Hospitals, which shall be deemed third party beneficiaries to this Agreement.

XXIV. **AGREEMENT CROSS-REFERENCE**. As required by 42 C.F.R. section 411.357 (d)(1)(ii), all service agreements between Company or its affiliated Hospitals and any physician (or an immediate family member of a physician) are maintained electronically in a master contract database that is maintained and updated centrally and is available for review upon request by an authorized government official.

XXV. **HEALTH INSURANCE PORTABILITY AND ACCOUNTABILITY ACT ("HIPAA")**. Because Contractor, on behalf of the Hospitals, may provide administrative services that involve the use and/or disclosure of individually identifiable health information relating to the Hospitals' patients (the "Protected Health Information" or "PHI"), Contractor may be deemed a business associate of the Hospitals under the federal privacy regulations set forth at 45 CFR Part 160 and Part 164 (the "HIPAA Privacy Regulations"). The HIPAA Privacy Regulations require the Hospitals to have written contracts with all business associates incorporating assurances that the business associate will appropriately safeguard the Protected Health Information, as more particularly described in the HIPAA Business Associate Agreement attached hereto and incorporated into this Agreement as Exhibit 3.

[SIGNATURES TO FOLLOW ON NEXT PAGE]

IN WITNESS WHEREOF, Company and Contractor have duly executed this Agreement as of the dates set out beneath their respective signatures, and hereby certify the following:

1) As of the date of the signatures below, this Agreement constitutes a binding agreement to perform Services as of the Effective Date and may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument;
2) The compensation arrangement is established at fair market value for the Services to be rendered and this Agreement is for Services that are needed and reasonable in scope;
3) This Agreement supersedes all prior agreements, contracts and understandings, whether written or otherwise, between the Parties relating to the subject matter hereof and does not condition the payment or the arrangement on the volume or value of any referrals or other business generated between the Parties;
4) Until the Agreement is listed in Company's Master Contract Database to the extent required by 42 C.F.R. §411.357(d)(1)(ii), no payment shall be made nor Services accepted under this Agreement; and
5) Upon the Effective Date of this Agreement, to ensure that no payments are made and no Services are accepted beyond the terms of this Agreement, or the terms of other Company-approved agreements between the Parties.

EXHIBIT 3
HIPAA BUSINESS ASSOCIATE AGREEMENT

This HIPAA Business Associate Agreement (the "Agreement") is made by and among LPNT for itself and one or more of its Hospitals, clients and/or affiliates that are "covered entities" or "business associates" within the meaning of the Privacy and Security Rules (hereinafter individually and collectively referred to as "Covered Entity") and Contractor (hereinafter individually and collectively referred to as "Business Associate"). Covered Entity and Business Associate shall be collectively referred to herein as the "Parties".

WHEREAS, Covered Entity is entering into a business relationship with Business Associate that is memorialized in that certain Exclusive Emergency Department And Hospitalist Services Master Agreement, as may be amended from time to time (the "Underlying Agreement") pursuant to which Business Associate may be considered a "business associate" or "subcontractor" of Covered Entity as defined in the Health Insurance Portability and Accountability Act of 1996 ("HIPAA") including all pertinent regulations (45 CFR Parts 160 and 164) issued by the U.S. Department of Health and Human Services as either have been amended by Subtitle D of the Health Information Technology for Economic and Clinical Health Act (the "HITECH Act"), as Title XIII of Division A and Title IV of Division B of the American Recovery and Reinvestment Act of 2009 (Pub. L. 111-5) (collectively "HIPAA Law");

WHEREAS, the nature of the prospective contractual relationship between Covered Entity and Business Associate may involve the exchange of Protected Health Information ("PHI") as that term is defined under HIPAA Law and Sensitive Information (as defined below); and

WHEREAS, for good and lawful consideration as set forth in the Underlying Agreement, Covered Entity and Business Associate enter into this Agreement for the purpose of ensuring compliance with the requirements of the HIPAA Law and relevant state law.

NOW THEREFORE, the premises having been considered and with acknowledgment of the mutual promises and of other good and valuable consideration herein contained, the Parties, intending to be legally bound, hereby agree as follows:

I. DEFINITIONS. Terms not defined below shall have the meaning set forth in the HIPAA Law.

A. Individual. "Individual" shall have the same meaning as the term "individual" in 45 CFR § 160.103 and shall include a person who qualifies as a personal representative in accordance with 45 CFR §164.502(g). With respect to Sensitive Information, "Individual" shall mean a natural person whose records containing Sensitive Information are maintained or accessed by Business Associate or disclosed by Covered Entity to Business Associate pursuant to the Underlying Agreement.

B. Breach. "Breach" shall have the same meaning as the term "breach" in 45 CFR §164.402 with respect to PHI and, with respect to Sensitive Information, shall mean any actual or suspected unauthorized disclosure, use of or access to Sensitive Information, or actual or suspected loss of Sensitive Information.

C. Designated Record Set. "Designated Record Set" shall have the same meaning as the term "designated record set" in 45 CFR §164.501.

D. Electronic Protected Health Information, EPHI or Electronic PHI. "Electronic Protected Health Information", "EPHI" or "Electronic PHI" shall have the same meaning as the term "electronic protected health information" in 45 CFR §160.103, limited to the information created or received by Business Associate from or on behalf of Covered Entity.

E. Encrypt, Encrypted or Encryption. With respect to PHI, any encryption requirements set forth in this Agreement must meet the U.S. Department of Health and Human Services Guidance Specifying the Technologies and Methodologies that Render Protected Health Information Unusable, Unreadable, or Indecipherable to Unauthorized Individuals for Purposes of the Breach Notification Requirements under Section 13402 of HITECH Act.

With respect to other information and data, such references mean the process of transforming information (referred to as plaintext) using an algorithm (cipher) to make the information unreadable except to those possessing special knowledge, usually referred to as a key, and encryption must meet or exceed standards, guidelines and best practices issued by the National Institute of Standards and Technology (NIST), as in effect from time to time.

F. Limited Data Set. "Limited Data Set" has the same meaning as the term "limited data set" in 45 CFR §164.514(e)(2).

G. Privacy Rule. "Privacy Rule" shall mean the Standards for Privacy of Individually Identifiable Health Information at 45 CFR Part 160 and Part 164, Subparts A and E, as amended by the HITECH Act and as may otherwise be amended from time to time.

H. Protected Health Information or PHI. "Protected Health Information" or "PHI" shall have the same meaning as the term "protected health information" in 45 CFR §160.103, limited to the information created or received by Business Associate from or on behalf of Covered Entity. As used in this Agreement, Protected Health Information shall also include Electronic PHI.

I. Required by Law. "Required by Law" shall have the same meaning as the term "required by law" in 45 CFR §164.103, with respect to any matter involving PHI. With respect to Sensitive Information, "Required by Law" means a mandate contained in law that compels an entity to make a use or disclosure of Sensitive Information and that is enforceable in a court of law, and includes, but is not limited to, court orders and court-ordered warrants; subpoenas or summons issued by a court, grand jury, a governmental or tribal inspector general, or an administrative body authorized to require the production of information; a civil or an authorized investigative demand; and statutes or regulations that require the production of information.

J. Secretary. "Secretary" shall mean the Secretary of the U.S. Department of Health and Human Services or his or her designee.

K. Security Incident. "Security Incident" shall have the same meaning as the tenor "security incident" in 45 CFR §164.304 with respect to PHI and with respect to Sensitive Information shall mean the attempted or successful unauthorized access, use, disclosure, modification, or destruction of Sensitive Information or interference with system operations in an information system.

L. Security Rule. The "Security Rule" shall mean the regulations found at 45 CFR Part 160 and Part 164, Subparts A and C, as amended by the HITECH Act and as may otherwise be amended from time to time.

M. Sensitive Information. "Sensitive Information" shall mean: (i) trade secrets, (ii) all business and proprietary information, (iii) patient-related information that is not PHI, including without limitation de-identified PHI that identifies Covered Entity or any of its affiliates or practitioners, (iv) any information that identifies, relates to, describes, or is capable of being associated with a particular Individual such as a person's name, signature, social security number, passport number, driver's license or state identification card number, insurance policy number, education, employment history, bank account number, credit card number, debit card number or any financial information, (v) any information that is designated by the disclosing Party as confidential, or (vi) any non-public information relating to Covered Entity received by Business Associate under the Underlying Agreement or learned by Business Associate about Covered Entity during the term period of this Agreement; regardless of the material or physical form on which such information is recorded or preserved, which may be by any means, including in written or spoken words, graphically depicted, printed or electromagnetically transmitted.

N. State Privacy and Security Laws. "State Privacy and Security Laws" shall mean all applicable state laws relating to privacy, security, data breach and confidentiality of the information provided to Business Associate under this Agreement.

O. Subcontractor. "Subcontractor" shall have the same meaning as the term "subcontractor" in 45 CFR § 160.103, except as otherwise provided in Article VII.

P. Unsecured Protected Health Information. "Unsecured Protected Health Information" or "Unsecured PHI" shall have the same meaning as the term "unsecured protected health information" in 45 CFR §164.402.

II. **APPLICABILITY.** This Agreement applies to the Underlying Agreement and any and all other agreements and relationships between Covered Entity and Business Associate, whether written or verbal, pursuant to which Covered Entity provides or will provide any Protected Health Information or Sensitive Information to Business Associate in any form whatsoever (collectively, the "Underlying Agreement"), whether Business Associate is characterized as a "business associate" under HIPAA or whether Business Associate is characterized as a "subcontractor" under HIPAA. As of the Effective Date, this Agreement shall automatically amend and be incorporated as part of the Underlying Agreement, whether or not specifically referenced therein. Should there be any conflict between the language of this Agreement and the Underlying Agreement (either previous or subsequent to the date of this Agreement), the language and provisions of this Agreement shall control and prevail unless the Parties specifically refer in a subsequent written agreement to this Agreement by its title and date and specifically state that the provisions of the later written agreement shall control over this Agreement. Business Associate acknowledges and agrees that this Agreement and the standards established hereunder will apply to all PHI received, accessed or created by Business Associate, whether the Covered Entity to which such PHI relates is characterized as a "covered entity" under HIPAA, or is characterized as a "business associate" under HIPAA.

III. **USE OR DISCLOSURE OF PHI BY BUSINESS ASSOCIATE.**

A. Except as otherwise limited in this Agreement, Business Associate may use or disclose Protected Health Information to perform functions, activities, or services for, or on behalf of, Covered Entity as specified in the Underlying Agreement, provided that such use or disclosure would not violate the Privacy Rule, if done by Covered Entity.

B. Except as otherwise limited in this Agreement, Business Associate may use PHI for the proper management and administration of Business Associate or to carry out its legal responsibilities. Except as otherwise limited in this Agreement, Business Associate may disclose PHI for the proper management and administration of Business Associate, provided that disclosures are Required by Law, or Business Associate obtains reasonable assurances from the person to whom the information is disclosed that the PHI will remain confidential and used or further disclosed only as Required by Law or for the purpose for which it was disclosed to the person, and the person notifies Business Associate of any instances of which it is aware in which the confidentiality of the information has been breached.

C. Business Associate shall only use and disclose PHI if such use or disclosure complies with each applicable requirement of 45 CFR §164.504(e), and shall only access, request, use and disclose the minimum information necessary to perform the duties required for Covered Entity, consistent with the requirements of 45 CFR §164.502.

D. Business Associate shall use reasonable efforts to limit its access, uses, disclosures, and requests for PHI to (i) a Limited Data Set unless Business Associate submits a written justification for additional data elements under the Covered Entity's Third Party Data Release Policy and Covered Entity specifically approves such request, and (ii) the minimum necessary to accomplish the intended purposes of such use, disclosure or request, in accordance with the minimum necessary standards at 45 CFR §§ 164.502(b) and 164.514(d) and in any guidance issued by the Secretary.

E. Business Associate may not use PHI in a manner or to accomplish a purpose or result that would violate the HIPAA Privacy or Security Rules, including without limitation engaging in information blocking or otherwise terminating Covered Entity's ability to access the PHI. Without submitting a complete and accurate solution risk analysis tool to Covered Entity and obtaining the prior written consent of LifePoint Health's Information Governance Officer (who may be contacted at infogov@lpnt.net), neither Business Associate nor its agents or subcontractors shall transfer or export any PHI or Sensitive Information outside the United States or store any PHI or Sensitive Information in a hosted/cloud computing environment. Additionally, Business Associate shall not use, authorize to use or disclose the PHI or Sensitive Information for the purpose of developing information or statistical compilations for use by third parties or other division or subsidiary of Business Associate or for any commercial exploitation.

IV. DUTIES OF BUSINESS ASSOCIATE RELATIVE TO PHI.

A. Business Associate shall not use or disclose PHI other than as permitted or required by this Agreement or as Required by Law.

B. Business Associate shall be directly responsible for full compliance with the relevant requirements of the Privacy Rule to the same extent as Covered Entity.

C. Business Associate shall comply with the applicable provisions of the Security Rule directing the implementation of Administrative, Physical and Technical Safeguards for Electronic Protected Health Information and the development and enforcement of related policies, procedures, and documentation standards (including but not limited to designation of a security official), and shall enter into written agreements with any Subcontractors that create, receive, maintain, or transmit Protected Health Information on behalf of Business Associate pursuant to which the Subcontractors shall agree to comply with the applicable requirements of the Security Rule. Business Associate shall implement safeguards and policies, procedures, and documentation consistent with the requirements of 45 C.F.R. §§ 164.306, 164.308, 164.310, 164.312, 164.314 and 164.316. Any hard drives on any computers or laptops that are used to access, receive, send, or maintain Covered Entities' Electronic Protected Health Information must be Encrypted and all communications must be Encrypted if sending Electronic Protected Health Information over an open network. Mobile devices or external or removable media, including, without limitation backup tapes, used for sending, receiving, or storing Electronic Protected Health Information must be Encrypted and password protected.

D. In the event of an unauthorized use or disclosure of PHI or a Breach of Unsecured PHI, Business Associate shall mitigate, to the extent practicable, any harmful effects of said disclosure that are known to it.

E. Business Associate agrees to enter into a written agreement with any Subcontractor that creates, receives, maintains, or transmits PHI on behalf of Business Associate, which complies with the requirements of 45 C.F.R. § 164.504(e)(2) through (e)(4), and pursuant to which the Subcontractor agrees to the same restrictions and conditions that apply to Business Associate with respect to such PHI and agrees to implement reasonable and appropriate safeguards, which shall be no less than that required of Business Associate under the Underlying Agreement, to protect the PHI.

F. To the extent applicable, Business Associate shall provide access to Protected Health Information in a Designated Record Set at reasonable times, at the request of Covered Entity or, as directed by Covered Entity, to an Individual (or Individual's designee) in order to meet the requirements under 45 CFR § 164.524. Business Associate shall notify Covered Entity within five (5) days of receipt of any request for access by an Individual. Covered Entity shall determine whether to grant or deny any access requested by the Individual. The information shall be provided in the form or format requested, if it is readily producible in such form or format, or in summary, if the Individual has agreed in advance to accept the information in summary form. If the Individual requests an electronic copy of his or her PHI maintained in a Designated Record Set electronically, Business Associate shall provide the Individual (or Individual's designee) with access to the information in the electronic form and format requested by the Individual, if it is readily producible in such form or format, or, if not, in a machine readable electronic form and format agreed to by the Individual. No fee for copying or providing access to the PHI may be charged.

G. If Business Associate maintains a Designated Record Set on behalf of Covered Entity, Business Associate shall amend the PHI maintained by Business Associate as directed by Covered Entity within five (5) days of such request. Business Associate shall notify Covered Entity within five (5) days of receipt of any request for amendment by an Individual. Business Associate shall promptly make amendment(s) to Sensitive Information requested by Covered Entity and will do so in the time and manner requested by Covered Entity to enable it to comply with law. Covered Entity shall determine whether to grant or deny any access or amendment requested by an Individual. Business Associate shall have a process in place for requests for amendments and for appending such requests to the Designated Record Set, as requested by Covered Entity. No fee for copying or amending the PHI or Sensitive Information may be charged.

H. Business Associate shall, upon request with reasonable notice and at no charge, provide Covered Entity access to its premises for a review and demonstration of its internal practices and procedures for safeguarding PHI. The fact that Covered Entity inspects, or fails to inspect, or has the right to inspect, Business Associate's

premises, systems, policies and procedures does not relieve Business Associate of its responsibility to comply with this Agreement, nor does Covered Entity's: (i) failure to detect or (ii) detection, but failure to notify Business Associate or require Business Associate's remediation of any unsatisfactory practices, constitute acceptance of such practice or a waiver of Covered Entity's enforcement rights under this Agreement.

I. Business Associate agrees to document and make available such disclosures of PHI and information related to such disclosures as would be required for Covered Entity to respond to a request by an Individual for an accounting of disclosures of PHI in accordance with 45 C.F.R. §164.528 and Section 13405(c) of the HITECH Act, and any implementing regulations. Should an Individual make a request to Covered Entity for an accounting of disclosures of his or her PHI pursuant to 45 C.F.R. § 164.528, Business Associate agrees to promptly provide Covered Entity with information in a format and manner sufficient to respond to the Individual's request. No fee for providing the accounting of disclosures of PHI may be charged. This Section shall survive termination of the Agreement.

J. If an Individual requests Business Associate to restrict the use or disclosure of PHI, Business Associate will forward the request to Covered Entity within five (5) days of Business Associate's receipt of the request. Covered Entity will be responsible for making all determinations regarding the grant or denial of an Individual's request for restrictions, and Business Associate will make no such determinations. Business Associate will restrict the use or disclosure of PHI consistent with Covered Entity's instructions, and shall further comply with any Individual's request for restrictions on PHI disclosures that Covered Entity or Business Associate is required by law to honor, including without limitation, requested restrictions on payment or health care operations-related disclosures to health plans when the Individual (or other person on behalf of the Individual) has paid the Individual's health care provider in full, unless otherwise required by law. No fee for providing the restriction of PHI may be charged.

K. Business Associate shall make its internal practices. books, records, and any other material requested by the Secretary relating to the use, disclosure, and safeguarding of PHI received from, or created or received by Business Associate on behalf of, Covered Entity available to the Secretary for the purpose of determining compliance with the Privacy Rule or other laws. The aforementioned information shall be made available to the Secretary in the manner and place as designated by the Secretary or the Secretary's duly appointed delegate. Under this Agreement. Business Associate shall comply and cooperate with any request for documents or other information from the Secretary directed to Covered Entity that seeks documents or other information held by Business Associate. Notwithstanding this provision, no attorney-client, accountant-client or other legal privilege will be deemed waived by Business Associate or Covered Entity as a result of this Section. Except to the extent prohibited by law, Business Associate agrees to notify Covered Entity immediately upon receipt by Business Associate of any and all requests by or on behalf of any and all government authorities served upon Business Associate relating to this Section or Protected Health Information.

L. Business Associate may use Protected Health Information to report violations of law to appropriate Federal and State authorities, consistent with 42 C.F.R. §164.502(j)(1).

M. Business Associate may not de-identify any Protected Health Information without the express prior written consent of the Covered Entity, and if such consent is given, Business Associate must comply with the requirements set forth at 45 C.F.R. § 164.514 for de-identifying PHI. Business Associate may only use PHI to provide Data Aggregation services to the extent expressly required pursuant to the Underlying Agreement and only as permitted for Covered Entity's health care operations under 45 CFR § 164.504(e)(2)(i)(B). Business Associate will not disclose any Limited Data Set, de-identified, or aggregated data derived from PHI (collectively, "Derivative Data") that divulges Covered Entity's name or any identifying information of Covered Entity or any of its affiliates or practitioners without providing at least thirty (30) calendar days advance written notice to Covered Entity for pre-distribution review and an opportunity to redact any information Covered Entity considers confidential, including any reference to the Covered Entity, its affiliates or practitioners. In any event, Covered Entity shall have sole ownership of any Derivative Data unless Covered Entity specifically agrees otherwise in writing in advance of its creation. Business Associate shall not sell any Protected Health Information without the express prior written consent of Covered Entity. Business Associate shall not transmit, to any Individual for whom Business Associate has Protected Health Information, any communication about a product or service that encourages the recipient of the communication to purchase or use that product or service in violation of any of the marketing prohibitions set forth in the HIPAA Law. Business Associate shall not use or disclose Protected Health Information for fundraising purposes as prohibited under the HIPAA Law.

N. Covered Entity shall have the right, at its expense, during Business Associate's normal business hours, to evaluate, test, and review Business Associate's HIPAA-HITECH policies and procedures, facilities, books, records and systems which contain Covered Entity's PHI and EPHI in order to ensure compliance with the terms and conditions of this Agreement and the HIPAA Law. Covered Entity shall have the right to conduct such audit by use of its own employees or by use of outside consultants and auditors. Business Associate agrees to cooperate with Covered Entity, and to otherwise provide any reasonable assistance to Covered Entity necessary for Covered Entity to carry out any audit as permitted herein, at no additional cost to Covered Entity. Upon Covered Entity's written request, Business Associate agrees to provide an annual written attestation of its compliance to the HIPAA Law in the form and format requested by Covered Entity in order to obtain satisfactory assurances in accordance with the HIPAA Law that Business Associate will appropriately safeguard the information with which it is entrusted. Covered Entity shall protect the confidentiality of all confidential and proprietary information of Business Associate to which Covered Entity or its agents have access during the course of such audit. The fact that Covered Entity inspects, or fails to inspect, or has the right to inspect, Business Associate's facilities, system, books, records, agreements, policies and procedures does not relieve Business Associate of its responsibility to comply with this Agreement, nor does Covered Entity's (i) failure to detect or (ii) detection, but failure to notify Business Associate or require Business Associate's remediation of any unsatisfactory practices, constitute acceptance of such practice or a waiver of Covered Entity's enforcement rights under this Agreement. Notwithstanding the foregoing, Covered Entity assumes no obligation to perform any inspection or audit of Business Associate's practices or policies, and assumes no liability for any violation or breach caused by Business Associate, whether an audit is performed or not.

O. To the extent Business Associate is to carry out any covered entity obligation of Covered Entity under the Privacy Rule, Business Associate shall agree to comply with the same Privacy Rule requirements that apply to Covered Entity in the performance of such obligation. When accessing or using the systems, information or facilities of any Covered Entity, Business Associate will comply with all applicable policies and procedures of the Covered Entity.

P. Business Associate acknowledges and agrees that PHI may include Patient Identifying Information (as defined under 42 C.F.R. § 2.11) of, from or relating to a Program (as defined under 42 C.F.R. § 2.11). Notwithstanding any agreement to the contrary, Business Associate acknowledges and agrees (1) that in receiving, storing, processing or otherwise dealing with any Patient Identifying Information (as defined under 42 C.F.R. § 2.11), Business Associate is fully bound by the regulations set forth at 42 C.F.R. Part 2, as amended from time to time; (2) if necessary, Business Associate will resist in judicial proceedings any efforts to obtain access to patient records except as permitted by 42 C.F.R. Part 2, and (3) Business Associate will not access, use or disclose Patient Identifying Information (as defined under 42 C.F.R. § 2.11) if such access, use or disclosure would result in a violation of law.

V. REPORTING.

A. Privacy Breach. Business Associate will report to Covered Entity any use or disclosure of Covered Entity's PHI or Sensitive Information that is not permitted by this Agreement or the Underlying Agreement within two (2) business days of discovery of the unauthorized use or disclosure. In addition, Business Associate will report to Covered Entity following discovery and without unreasonable delay, but in no event later than two (2) days following discovery of any suspected or actual Breach of Unsecured Protected Health Information or Sensitive Information or any actual or suspected disclosure or inappropriate access of Covered Entity's information which is subject to State Privacy and Security Laws. Business Associate shall cooperate with Covered Entity in investigating the potential or actual breach, disclosure or inappropriate access and in meeting Covered Entity's obligations under the HITECH Act and any other state or federal privacy or security breach notification laws, including, without limitation, assisting the Covered Entity with performing a risk assessment as set forth in 45 C.F.R. §164.402(2) and providing any information and documentation related to such risk assessment to the Covered Entity promptly upon request. Any such report shall contain at a minimum the information set forth on Appendix 4 attached hereto and incorporated by reference. Since time is of the essence under the HITECH Act and State Privacy and Security Laws, in addition to providing the report in accordance with the notice provisions contained in Section XIII.E below, a copy of the report shall be emailed to the Covered Entity's Privacy Officer At reportable.eventrdipnt.net or to such other person as Covered Entity shall request in writing of Business Associate. To the extent any Breach of Unsecured Protected Health Information or Sensitive Information or unauthorized acquisition or access to information subject to State Privacy and Security Laws is attributable to either: (i) a breach of the obligations under this Agreement by Business Associate or (ii) a violation of the HIPAA Law or State Privacy and Security Laws by Business Associate

or its Subcontractors, Business Associate shall bear (a) the costs incurred by Covered Entity in complying with its legal obligations relating to such breach or violation, and (b) in addition to other damages for which Business Associate may be liable for under this Agreement, the following expenses incurred by Covered Entity in responding to such breach: (1) the cost of preparing and distributing notifications to affected Individuals, (2) the cost of providing notice to government agencies, credit bureaus, and/or other required entities, (3) the cost of providing affected Individuals with credit monitoring services for a specific period not to exceed twenty-four (24) months, or longer if required by law, to the extent the incident could lead to a compromise of the data subject's credit or credit standing, (4) call center support for such affected Individuals for a specific period not to exceed thirty (30) days from the date the breach notification is sent to such affected Individuals and (5) the cost of any other measures required under applicable law.

B. Security Incident. Unless otherwise reportable as a Breach of Unsecured PHI or State Privacy and Security Law breach. Business Associate agrees to report to Covered Entity any Security Incident affecting Electronic Protected Health Information of Covered Entity within two (2) business days of becoming aware of the Security Incident. Business Associate shall mitigate. to the greatest extent practicable, any harmful effect known to Business Associate of a Security Incident and follow the HHS Office for Civil Rights HIPAA Guidance on Ransomware with respect to security incidents involving malware.

VI. **SENSITIVE INFORMATION**. This Article VI shall apply only Wand to the extent that Business Associate is given access to Sensitive Information, as defined above. Business Associate may use or disclose Sensitive Information only for the benefit of Covered Entity and to perform functions, activities, or services for the benefit of Covered Entity as specified in the Underlying Agreement and in accordance with the policies and procedures of Covered Entity. Except as otherwise limited in this Agreement, Business Associate may disclose Sensitive Information as Required by Law. To the extent Business Associate discloses Sensitive Information to third-parties. Business Associate shall obtain reasonable assurances from the person to whom the information is disclosed that the Sensitive Information will remain confidential and be used or further disclosed only as Required by Law or in accordance with the standards applicable to Business Associate under this Agreement, with requirements that the recipient notify Business Associate of any instances of which it is aware in which the confidentiality of the information has been Breached. Business Associate warrants, represents and agrees that each of the data elements of any Sensitive Information that it may access or receive from or on behalf of Covered Entity is minimally necessary to permit Business Associate to provide the services under the Underlying Agreement. Business Associate will use appropriate safeguards and procedures to prevent further use, unauthorized access, destruction, modification, or disclosure of Sensitive Information other than as provided for by the Underlying Agreement and this Agreement, and will implement administrative, physical and technical safeguards that reasonably and appropriately protect the confidentiality, security, integrity and availability of Sensitive Information that it receives, maintains, transmits or creates on behalf of Covered Entity, which in any event shall be no less than the Payment Card Industry ("PCI") Security Standards. Business Associate will promptly notify Covered Entity of any attempted or successful unauthorized access, use, disclosure, modification, or destruction of Sensitive Information or interference with system operations in an information system. To the extent that Sensitive Information is licensed by Covered Entity from third parties. Business Associate will comply with all restrictions and terms of any third party licenses. Further, Business Associate will (I) provide Covered Entity with access to the Sensitive information as requested by Covered Entity, and (2) comply with the standards and requirements of Sections IV.A, C, D, E. H, and K with respect to Sensitive information in the same manner as such provisions apply to PHI and EPH I.

VII. **SECURITY OF CUSTOMER DATA.**

A. Definitions. The following definitions will apply only with respect to terms of this Article VII:

1. "Authorized User" means: (a) Covered Entity and each of its employees, clients, patients and authorized agents and contractors, including, without limitation, physicians, nurses and medical staff, whether on-site or remote, affiliated with Covered Entity; (b) consultants and other independent contractors performing services for Covered Entity; and (c) any governmental bodies lawfully requesting or requiring access to facilities of Covered Entity.

2. "Customer Data" means all data and information provided to Business Associate by or on behalf of Covered Entity for processing, all user traffic and access data, usage statistics, images, and individual identifiable and other profile data generated or collected by or for Business Associate in connection with Covered Entity's and Authorized Users' use of the Software and Services, the document indexes and table structures used to organize any of the foregoing data, and any and all updates or modifications to or derivatives of any of the foregoing made by or for Business Associate.

3. "Disabling Code" means any virus, worm, trap door, back door, timer, counter or other limiting routine, instruction or design that would erase or alter data or programming or cause any Software, Service, or the network, equipment, or data of a Covered Entity, Affiliates and/or third parties to become inaccessible, inoperable or incapable of being used in the full manner for which it was designed, licensed or created, which otherwise disrupt the proper operation of any system, or compromise the confidentiality of any information of Covered Entity, Affiliates and/or third parties.

4. "Documentation" means: (a) all operations, design, user manuals (operational, educational and otherwise) and maintenance and support manuals and all other written materials related to any Software or Service; (b) any report, specifications, or other written Work Product produced by Business Associate for, or at the request of, Covered Entity that describes any Software or Service.

5. "Product" means anything provided by Business Associate to Covered Entity under the Underlying Agreement other than Services or Work Product.

6. "Service" means any service provided by Business Associate to Covered Entity under the Underlying Agreement.

7. "Software" means any Product or Work Product provided to Covered Entity under the Underlying Agreement. As used herein, the term "Software" includes Documentation, unless the context otherwise requires.

8. "Strong Authentication" means an authentication system that leverages two different types of data that serve as proof of the identity of the specific user trying to authenticate (e.g., a certificate and a password, a password and the answer to a secret user question, SecurID Token Code and PIN, or a password and Encrypted session cookie). User identifiers (UIDs) are never considered one of the factors in Strong Authentication.

9. "Strong Password" means a password that contains at least seven (7) characters in length and contains characters from at least three of the following categories: (i) upper case letters, (ii) lower case letters, (iii) numbers, and/or (iv) special characters.

10. "Subcontractor" means a subcontractor or independent contractor used by Business Associate to create, receive, maintain, or transmit Customer Data or Sensitive Information or to provide Services under the Underlying Agreement. Nothing in this Schedule authorizes the use of a Subcontractor beyond the extent permitted by the Underlying Agreement.

11. "Business Associate Personnel" means Business Associate, Business Associate's employees, Subcontractors and Subcontractors' employees providing Services to Covered Entity under the Underlying Agreement.

12. "Work Product" means any software, data, or other subject matter developed in the course of performing Services, including custom software, user interfaces, custom documentation, report formats, and file structures.

B. Safeguarding Customer Data. Business Associate shall, and shall cause Business Associate Personnel to, comply with the requirements set forth below.

1. Security. Business Associate shall store Customer Data on secure computers located in a physically secure data center, Business Associate shall establish, maintain, and comply with environmental, safety and facility procedures, data security practices and other safeguards against the destruction, loss, alteration, or unauthorized access or disclosure of Customer Data in the possession of Business Associate that are: (i) in conformance with the requirements set forth in this Agreement; (ii) in conformance with, and sufficient for Covered Entity to meet, applicable laws; and (iii) no less rigorous than those maintained by Business Associate for its own information of a similar nature or for any of Business Associate's other customers.

2. Encryption. Without limiting the foregoing: (i) Business Associate shall employ technology that is at least consistent with industry standards for firewalls and other security technology to help prevent Business Associate's computers and systems from being accessed by unauthorized persons; (ii) Business Associate shall use the HTTPS standard for all data transmissions, and shall ensure that all Customer Data is Encrypted while in transmission between Business Associate's data center and the Covered Entity's computer system or other device (as applicable) using TLS 1.0 network communications security protocol or greater if available; (iii) Business Associate shall provide and maintain the ability to transfer files via secure FTP, Encrypted email, or HTTPS; (iv) for Customer Data at rest. Business Associate shall employ an Encryption algorithm specified in NIST SP 800-111; and (v) Business Associate shall provide and maintain Encrypted passwords for access to Business Associate's systems.

3. Monitoring. Business Associate shall perform commercially reasonable monitoring of the Services and all Business Associate equipment and software for health and performance, and Business Associate engineers shall be on-call at all times to resolve any system issues.

4. Recovery of Lost Data. Business Associate shall develop and maintain procedures for the reconstruction of lost Customer Data, and Business Associate shall correct, at Covered Entity's request, any loss or unauthorized or inappropriate destruction or alteration of any Customer Data caused by the act or omission of Business Associate or any Business Associate Personnel.

5. No Caching. Business Associate represents, warrants, and covenants that no Customer Data will be cached or stored on any Authorized User's workstation, computer, or other device, except to the extent that, and only to the extent that, an Authorized User affirmatively and intentionally saves such Customer Data to such workstation, computer, or device.

6. Backup. Business Associate will perform regular backups all Customer Data in accordance with industry standards.

7. Remote Access. All remote control Software and remote access to systems on the Covered Entity network or system hosting Customer Data will be subject to review and continued approval by Covered Entity, and must meet configuration requirements as specified by Covered Entity. Software shall not allow for remote access from untrusted networks by default. Each of the Business Associate Personnel who uses a remote support solution shall be required to have a unique ID and Business Associate shall keep an audit log of all such access for a length of time based on regulatory requirements associated with data types and in accordance with Covered Entity requirements. Business Associate shall periodically, and no less than quarterly, review such audit logs for unauthorized or inappropriate access by Business Associate Personnel. Additionally, Business Associate shall audit the procedural, administrative, physical and technical safeguards used by Business Associate Personnel with access to Customer Data, at least once a year.

8. Personnel and Data in the United States Only. Business Associate represents, warrants, and covenants that all Software and Services will only be provided by Business Associate Personnel residing within the United States of America. Business Associate shall ensure that any information learned by it as a result of entering into the Underlying Agreement, including any Customer Data, will never leave the jurisdiction of the United States of America and will never be accessed by anyone from outside the United States of America. Any modification to the foregoing limitation will require the express written consent of LifePoint Health's Information Governance Officer (who may be contacted at infogovrdlpnt.net).

9. Audit Logging. Business Associate represents and warrants that the Software and Services shall automatically record and log each access to Customer Data by any person, through any portion of the system, and will provide Covered Entity the capability to readily create access reports. Where PHI is involved, Business Associate represents and warrants that the Software and Services shall automatically record and log each access to PHI by any person, through any portion of the system, and will provide Covered Entity the capability to readily create reports showing the following with respect to each such access: (i) Date/time of record access; (ii) Unique username of accessing person; (iii) Name of accessing person and identifying initials of any professional license, degree, or certification (e.g., RN, MD, RT); (iv) Specific data elements/fields accessed; (v) Duration of access; (vi) For each data element/field, what was read by accessing person; (vii) For each data element/field, description of action taken (whether information was created, modified, accessed, viewed, printed, deleted, included in a report, etc.); (viii) For each data element/field, the purpose of the access (treatment, payment, operations, etc.); (ix) Patient name; (x) Patient MRN; (xi) Patient DOB; (xii) Study/Case ID; (xiii) User's relationship to the patient; (xiv) IP address used to access the record; and (xv) Record of any printing activity. In addition, Business Associate shall, at any time upon Covered Entity's request, promptly make available to Covered Entity's personnel all of the foregoing audit logs and related information pertaining to access to or use of Customer Data and PHI.

10. Media Disposal. As part of the Services provided and at no additional charge to Covered Entity, to the extent that this Agreement allows or provides for disposal or destruction of Sensitive Information and/or Customer Data, Business Associate shall dispose of all electronic media that stores Sensitive Information and Customer Data using shredding or other secure means, in accordance with current NIST Guidelines for Media Sanitization for the type of media involved and provide Customer a certificate of destruction. Upon Covered Entity's reasonable request, Business Associate will provide Covered Entity with a written report of all electronic media used in the provision of Services to Covered Entity which has been disposed of in the previous twelve (12) months. Such reports will identify the media disposed of including serial number of the unit and media, if a serial number is available, the method of destruction, and the date the media were disposed of.

11. Authentication. Business Associate shall assign a unique user ID to any Business Associate user who accesses Customer Data on Business Associate managed systems. Business Associate shall configure the unique user ID so that it enables tracking of each Business Associate user's activity within the system. Business Associate shall require authentication by Business Associate users for access to Customer Data on Business Associate managed systems. Business Associate shall configure Business Associate managed systems to support Strong Authentication for accessing Customer Data from any open network (e.g., Internet, open wireless). Business Associate shall configure Business Associate managed systems to expire passwords at least every one-hundred and eighty (180) days and require a password change on the next successful login. For Business Associate managed systems that cannot support Strong Passwords, Business Associate shall configure such Business Associate managed systems to expire passwords every ninety (90) days. Unless otherwise agreed by Covered Entity, Business Associate shall ensure that Business Associate managed systems will require Strong Password for user authentication.

12. User Accountability. Business Associate shall report to Covered Entity, on request, all user accounts and their respective access rights within the system within five (5) business days or less of the request.

13. Account Termination. Business Associate shall disable user accounts of all Business Associate users or Authorized Users for the system within two (2) business days of becoming aware of the termination of such individual. In the cases of termination for cause, Business Associate shall disable such user accounts as soon as administratively possible but no later than the next business day.

14. Multi-Factor Authentication. Business Associate shall configure Business Associate managed systems to require multi-factor authentication when hosting Customer Data.

15. Mobile Devices. Business Associate shall Encrypt and password protect mobile devices or external or removable media, including, without limitation backup tapes, used for sending, receiving, or storing Customer Data.

C. Data Security. Upon notice from Covered Entity, Business Associate shall provide (and shall cause its Subcontractors to provide) Covered Entity, its accountants, and representatives with access to and any assistance that they may require with respect to the Software, Services, Customer Data, and compliance with the confidentiality, privacy, and data security related provisions of this Agreement, for the purpose of performing related audits or inspections. Covered Entity may, upon advance written notice to the Business Associate, perform remote scans and assessments of Business Associate's Products and/or Services. If any audit results in Business Associate being notified that Business Associate (or any subcontractor) is not in compliance with this Agreement, any applicable law or any audit requirement, the parties will meet to discuss such notice. Business Associate shall remedy (and shall cause its Subcontractors to remedy) all failures promptly, and in no event later than as required by law or a governmental authority.

D. Breach Notification Costs. If, as the result of any act or omission of Business Associate or any Business Associate Personnel, a person is required to be notified of unauthorized access, disclosure, or use of the person's personal information, Business Associate shall bear and pay, and compensate and reimburse Covered Entity for, all costs associated with such notification and related communication and for the costs of providing a credit monitoring service to the affected person.

E. Virus Warrants. Business Associate represents and warrants that no component of any of the Software or Services includes, and that any method of transmitting such Software and Services will not introduce, any Disabling Code. Business Associate shall immediately provide Covered Entity written notice in reasonable detail upon becoming aware of the existence of any Disabling Code in the Software or Services. Without limiting the foregoing, Business Associate shall use best efforts and all necessary precautions to prevent the introduction and proliferation of any Disabling Code in Covered Entity's computer systems or networks as a result of the implementation or use of the Software or Services or in any Business Associate systems used to provide Software or Services. In the event Business Associate or Covered Entity discovers the existence of any Disabling Code (whether intentionally or unintentionally introduced), Business Associate shall use its best efforts, in cooperation with Covered Entity, to effect the prompt removal of the Disabling Code from the Software and Services on Covered Entity's computer systems and networks and the repair of any files or data encrypted thereby, and the expenses associated with the removal of the Disabling Code and restoration of the data will be borne by Business Associate.

G. SOC Audits. Business Associate shall, prior to execution of the Underlying Agreement and annually thereafter, complete, obtain and provide to Covered Entity an independent audit report of Business Associate's systems and processes ("Security Assessment") covering (i) HITRUST CSF adherence, security, availability, processing integrity, confidentiality, privacy and such additional common criteria as Covered Entity may reasonably require, (ii) controls over all relevant business and IT processes related to the services provided by Business Associate relevant to Covered Entity's financial reporting; (iii) controls over the maintenance of financially relevant master files and configurations; (iii) controls over relevant reports and data outputs (base or custom) produced by Business Associate or its systems; (iv) controls over Business Associate users who may have access to Covered Entity's systems as applicable; and (v) such other controls and issues as Covered Entity may reasonably require. The Security Assessment will meet the standards for and be in the form of a SOC-2 report or other format reasonably requested and approved by an authorized officer of Covered Entity. The Security Assessment must be issued by a reputable independent firm appropriately qualified to complete the Security Assessment. If any Security Assessment identifies material weaknesses or fail points (for the purposes of this Section, a "fail point" includes any issue that would result in a "qualified" opinion), Business Associate shall act promptly to resolve such issues, and shall advise Covered Entity regarding such actions. Failure by Business Associate to resolve such issues within thirty (30) days (or such longer period as may be approved by Covered Entity) will be deemed a material breach of this Agreement.

VIII. TERM AND TERMINATION.

A. Term. The Term of this Agreement shall be effective as of the date the Underlying Agreement is effective (the "Effective Date"), and shall terminate when all of the Protected Health Information, Sensitive Information and Customer Data provided by Covered Entity to Business Associate, or created or received by Business Associate on behalf of Covered Entity, is destroyed or returned to Covered Entity, or, if it is infeasible to return or destroy the Protected Health Information, Sensitive Information and Customer Data, protections are extended to such information, in accordance with the termination provisions in this Article VIII. Notwithstanding anything to the

contrary contained in this Agreement, Business Associate shall not destroy any Protected Health Information or Sensitive Information without the prior written consent of Covered Entity.

B. Termination for Cause. Upon Covered Entity's knowledge of a breach by Business Associate, Business Associate's violation of the HIPAA Laws, a Breach of Unsecured Protected Health Information or Sensitive Information by Business Associate or any Subcontractor of Business Associate, or any other material breach of this Agreement, Covered Entity shall, within its sole discretion, either:

1. Provide an opportunity for Business Associate to cure the breach or end the violation and, if Business Associate does not cure the breach or end the violation within the time specified by Covered Entity, terminate this Agreement; or

2. Immediately terminate this Agreement.

C. Effect of Termination.

1. Except as provided in paragraph C(2) of this section, upon termination of this Agreement, for any reason, Business Associate shall return or destroy (at Covered Entity's sole discretion) all Protected Health Information, Sensitive Information and Customer Data received from Covered Entity, or created or received by Business Associate on behalf of Covered Entity within five (5) days of the effective date of the termination. This provision shall apply to Protected Health Information, Sensitive Information and Customer Data that is in the possession of subcontractors or agents of Business Associate. Business Associate shall not retain any copies of the Protected Health Information, Sensitive Information or Customer Data. Business Associate will be responsible for recovering any PHI, Sensitive Information and Customer Data from such agents or subcontractors at no cost to Covered Entity.

a. Standards for Return —Information that is in electronic format shall be provided to Covered Entity at no additional charge. The format to be provided should be one that is commonly used for export (i.e., comma delimited, text file, Word, Excel or Access database) that is agreeable to Covered Entity.

b. Standards for Destruction — If Covered Entity agrees to destruction, Business Associate and its agents and subcontractors must destroy the media on which the Protected Health Information, Sensitive Information or Customer Data has been stored or recorded in one of the following ways (except as otherwise provided in Article VII):

(i) Any paper, film, or other hard copy media must be shredded or destroyed such that the Protected Health Information or Sensitive Information cannot be read or otherwise reconstructed. Redaction is specifically excluded as a means of data destruction.

(ii) Business Associate must clear, purge, or destroy electronic media consistent with the NIST Guidelines for Media Sanilizalion (Special Publication 800-88) such that the Protected Health Information or Sensitive Information cannot be retrieved and must provide Covered Entity with appropriate evidence of destruction (i.e., a Certificate of Sanitization in the form shown in the NIST Guidelines fir Media Sanitization) within five (5) days of the destruction.

2. In the event that Business Associate determines that returning or destroying the Protected Health Information, Sensitive Information and/or Customer Data is infeasible, Business Associate shall provide to Covered Entity written notification of the conditions that make return or destruction infeasible. If such written notification that return or destruction of Protected Health Information, Sensitive Information and/or Customer Data is infeasible and agreed to by Covered Entity, Business Associate shall extend Individual rights and the protections of this Agreement to such Protected Health Information, Sensitive Information and Customer Data retained by Business Associate or its agents and subcontractors and limit further uses and disclosures of such Protected Health Information, Sensitive Information and Customer Data,

as applicable, to those purposes that make the return or destruction infeasible, for so long as Business Associate or its agents and subcontractors maintain such Protected Health Information, Sensitive Information and/or Customer Data.

3. Should Business Associate make a disclosure of PHI, Sensitive Information and/or Customer Data in violation of this Agreement, Covered Entity shall have the right, upon notice, to terminate (in whole or in part) any contract, other than this Agreement, then in force between the Parties, including without limitation the Underlying Agreement.

IX. REMEDIES IN EVENT OF BREACH, DISCLAIMER AND INDEMNIFICATION.

A. Business Associate hereby recognizes that irreparable harm may result to Covered Entity, and to the business of Covered Entity, in the event of breach by Business Associate of any of its obligations, covenants, or assurances contained in this Agreement. As such, in the event of a breach by the Business Associate of any of the obligations, covenants and assurances contained in Articles II through VIII above, Covered Entity shall be entitled to enjoin and restrain Business Associate from any continued violation of such Articles. Covered Entity retains all rights to seek injunctive relief to prevent or stop the unauthorized use or disclosure of PHI or Sensitive Information by Business Associate, its agents or subcontractors for so long as Business Associate, its agents or subcontractors maintain Protected Health Information or Sensitive Information.

B. PHI, SENSITIVE INFORMATION AND CUSTOMER DATA IS PROVIDED TO BUSINESS ASSOCIATE SOLELY ON AN "AS IS" BASIS. COVERED ENTITY DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, NON-INFRINGEMENT AND FITNESS FOR A PARTICULAR PURPOSE. As between Covered Entity and Business Associate, any PHI, Sensitive Information and/or Customer Data shall be deemed to be the exclusive property of Covered Entity. In no event shall Business Associate or its subcontractors claim any ownership rights with respect to such PHI, Sensitive Information or Customer Data.

C. Business Associate will indemnify and hold Covered Entity and its officers, directors, employees, agents, affiliates, successors and assigns (each an "Indemnified Party") harmless, from and against any and all claims, demands, losses, liabilities, damages, costs, penalties, fines and expenses (including, without limitation, in-house counsel and other reasonable attorneys' fees and costs) arising out of or related to either: (i) the Business Associate's breach of its obligations under this Agreement and/or (ii) any third-party claim based upon any breach of this Agreement, violation of HIPAA Laws or State Privacy and Security Laws by Business Associate or by its employees, agents or subcontractors ("Claim"). If any Indemnified Party learns of a Claim, the Indemnified Party may defend the Claim (in which case Business Associate shall reimburse the Indemnified Party for losses, liabilities, damages, costs, penalties, fines and expenses upon demand) or may, in its discretion at any time, tender defense of the Claim to Business Associate and require that Business Associate directly assume responsibility for defending the Claim, with counsel approved by the Indemnified Party; provided, however, the Indemnified Party will use reasonable efforts to avoid prejudicial delays in tendering defense to Business Associate. If Business Associate assumes the defense of a Claim, Covered Entity shall have the right, at its expense, to participate in the defense of such Claim, and Business Associate shall not make any admissions on behalf of the Covered Entity nor take any final action with respect to such Claim without the prior written consent of Covered Entity. This Section shall survive termination of this Agreement and any Claim is without regard to any limitation or exclusion of damages or liability provisions otherwise set forth in the Agreement or the Underlying Agreement.

D. Business Associate shall obtain and continuously maintain (during the term of this Agreement and thereafter) the following insurance coverages for Business Associate and its employees, agents and independent contractors in the following amounts: (a) not less than One Million Dollars ($1,000,000) per occurrence and Three Million Dollars ($3,000,000) annual aggregate of commercial general liability insurance; and (b) Ten Million Dollars ($10,000,000) per occurrence and Ten Million Dollars ($10,000,000) annual aggregate of Security and Privacy Liability ("Cyber Liability") insurance. The Cyber Liability insurance shall cover, among other things, breaches of this Agreement, and if requested by Covered Entity, Covered Entity will be included as an additional named insured on Business Associate's Cyber Liability insurance. Business Associate shall provide Covered Entity with certificates of insurance or other written evidence of the insurance policy or policies required herein prior to the effective date of the Agreement and as of each annual renewal of such insurance policies during the term of the Agreement, and

thereafter as requested by Covered Entity from time to time. Further, in the event of any modification, termination, expiration, non-renewal or cancellation of any of such insurance policies, Business Associate shall give mitten notice thereof to Covered Entity not more than ten (10) days following Business Associate's receipt of such notification.

X. **MODIFICATION.** Except as provided in this Article X, this Agreement may only be modified through a writing signed by the Parties. To the extent any term in this Agreement conflicts with the requirements of the HIPAA Law or other laws, rules or regulations applicable to Covered Entity, if such laws, rules or regulations are modified, or additional laws, rules or regulations are adopted, this Agreement shall be deemed to have been modified as necessary to allow Covered Entity to comply with applicable laws, rules and regulations. The Parties agree to take such action as is necessary to amend this Agreement Iron time to time as is necessary for Covered Entity to comply with the requirements of the HIPAA Law and other applicable laws, and Bu.siness Associate will execute such amendments as Covered Entity may request to reflect any modifications required to permit Covered Entity to comply with applicable laws, rules or regulations.

XI. **INTERPRETATION OF THIS CONTRACT IN RELATION TO OTHER CONTRACTS BETWEEN THE PARTIES.** Should there be any conflict between the language of this contract and any other contract entered into between the Parties (either previous or subsequent to the date of this Agreement), including, without limitation, the Underlying Agreement, the language and provisions of this Agreement shall control and prevail unless the Parties specifically refer in a subsequent written agreement to this Agreement by its title and date and specifically state that the provisions of the later written agreement shall control over this Agreement.

XII. **COMPLIANCE WITH STATE LAW.** Business Associate shall comply with State Privacy and Security Laws. If the HIPAA Law and the law of the State in which Covered Entity is located conflict regarding the degree of protection provided for Protected Health Information, Business Associate shall comply with the more restrictive protection requirement.

XIII. **MISCELLANEOUS.**

A. No Agency Relationship. The Parties expressly agree and assert that no agency relationship is created between Covered Entity and Business Associate by this Agreement or the Underlying Agreement with regard to Business Associate's HIPAA obligations. The Parties agree that each individual Party has its own independent HIPAA compliance obligations and that Business Associate will provide any services as an independent contractor. Business Associate acknowledges that any Breaches of Unsecured PHI shall be considered to be independent acts or omissions by Business Associate and beyond the scope of work or duties anticipated by Covered Entity for the Underlying Agreement; any uses or disclosures of PHI not in compliance with the de-identification, marketing and sale of PHI prohibitions of this Agreement and/or in violation of the minimum necessary standards or other HIPAA violations shall not be anticipated by Covered Entity, and as such, Business Associate shall not be authorized to act as Covered Entity's agent in this regard

B. Assignment/No Third Party Beneficiaries. Neither party may assign any of its rights or this Agreement or delegate any of its obligations to any party without the consent of the other, except that Covered Entity may assign this Agreement without the consent of Business Associate to any affiliate or in conjunction with a merger, reorganization, consolidation, change of control or sale of all or substantially all of its assets. Business Associate acknowledges and agrees that each Covered Entity (as defined in the introductory paragraph of this Agreement) will he considered a Party to this Agreement, but nothing express or implied in this Agreement confers upon any person, other than the Parties and their respective successors or permitted assigns, any rights, remedies, obligations, or liabilities whatsoever.

C. Survival. Any provisions of this Agreement which expressly or by implication are intended to survive its termination or expiration will survive and continue to bind the parties as long as Business Associate maintains PHI, Sensitive Information or Customer Data, including, without limitation, Section VIII.C, with respect to the continuing obligations for returning, destroying or protecting PHI, Section V, with respect to breach reporting and reimbursement of expenses, Article IX with respect to obligations to indemnify and to maintain insurance, and all limitations, restrictions and standards applying to Business Associate's maintenance, use or disclosure of PHI, Sensitive Information and/or Customer Data.

D. Ambiguity. Any ambiguity in this Agreement shall be resolved to permit Covered Entity to comply with the HIPAA Law, State Privacy and Security Laws, and other applicable legal obligations.

E. Notice to Covered Entity. Any notice required under this Agreement to be given Covered Entity shall be made in writing to:

Address: LifePoint Health
330 Seven Springs Way
Brentwood, TN 37027
Attention: Compliance, Privacy Off

With copy to: LifePoint Health
330 Seven Springs Way
Brentwood, TN 37027
Attention: Compliance, Privacy Off
Attention: Legal Department

F. Notice to Business Associate. Any notice required under this Agreement to be given Business Associate shall be made in writing to Business Associate.

IN WITNESS WHEREOF and acknowledging acceptance and agreement of the foregoing, the Parties affix their signatures hereto.

APPENDIX 4

FORM OF NOTIFICATION TO COVERED ENTITY OF

BREACH OF UNSECURED PHI AND STATE LAW

Date completed: _____

This notification is made pursuant to the Business Associate Agreement between _____ (Covered Entity), and _____ (Business Associate).

Business Associate hereby notifies Covered Entity that there has been an actual or potential breach of unsecured (unencrypted) protected health information (PHI) or Sensitive Information or information subject to State Privacy and Security Laws that Business Associate (or its agents or subcontractors) has used or has had access to under the terms of the Business Associate Agreement.

I. **Characteristics of the Breach**

1. Date of the breach: _____ Date the breach was discovered: _____

2. Description of the breach: _____

3. How was the breach discovered? _____

4. Number of individuals affected by the breach: _____

5. Are over 500 individuals affected by the breach?

   Yes _____ No

6. Have you been able to identify all individuals affected by the breach?

   Yes _____ No _____

   If yes, for how many of the affected individuals do you have current addresses? _____

7. Does the information disclosed in the breach identify, or can reasonably be used to identify, specific patients?

   Yes _____ No _____

   If no, please explain why the information does not identify, or cannot reasonably be used to identify, specific patients:

   _____

8. Does the information disclosed in the breach contain any sensitive information or other information that can be used in a manner that would be adverse or cause financial or reputational harm to the individual?

   Yes _____ No _____

   If no, explain why the information cannot be used in an adverse or harmful manner to the individual:

9. Was all of the patient(s') information compromised or only portions?

   Yes _____ No _____

   If only portions of the information, explain which portions of the information were compromised:

10. Indicate type of breach:

☐ Theft	☐ Unauthorized Access	☐ Unknown
☐ Loss	☐ Hacking/IT Incident	☐ Other: _____
☐ Improper Disposal	☐ Phishing	

11. Location of breached information:

☒ Laptop	☐ Portable Media/Device	☐ Unknown
☐ Desktop Computer	☐ EMR	☐ Other: _____
☐ Email	☐ Paper	

12. Description of types of unsecured PHI or other data involved in the breach:

☐ Demographic (full or partial name)	☐ Account number	☐ ICD-9-CM or CPT Codes
☐ Social security number	☐ Disability Code	☐ Driver's license, insurance card, or other form of identification
☐ Date of birth	☐ Financial (billing info, credit card # or check/bank account number	☐ Other: _____
☐ Home Address	☐ Clinical (any mention of diagnosis, procedure, or treatment provided)	

13. Are the patient(s) or the patient(s') family members aware of the incident?

Yes ____ No ____

If yes, Describe _____

II. Description of Safeguards

14. Safeguards that were in place prior to the breach:

☐ Firewalls	☐ Encrypted wireless	☐ Secure browser
☐ Packet Filtering	☐ Logic access control	☐ Biometrics
☐ Intrusion detection	☐ Anti-virus software (list product name): _____	☐ Strong authentication
☐ Other:	☐ Physical security:	

15. Was the data encrypted in compliance with the encryption standards set forth in the U.S. Department of Health and Human Services Guidance Specifying the Technologies and Methodologies that Render PHI Unusable, Unreadable, or Indecipherable to Unauthorized Individuals for Purposes of the Breach Notification Requirements under Section 13402 of HITECH Act?

Yes _____ No _____

If yes, please identify the method of encryption: _____

_____

_____

If no, please identify any other methods of securing the information (for example, password protected file): _____

_____

_____

III. The Recipient

16. Can you determine whether the PHI was actually acquired or viewed by the unintended recipient?

Yes _____ No _____

If yes, please explain how and provide any information regarding the information viewed, length of time viewed, whether it was e-mailed or saved to another device and who viewed the information:

_____

_____

17. Did the breach involve a good faith, unintentional acquisition, access or use of PHI by the entity's employee/workforce member? (For example, a billing employee receives and opens an e-mail containing PHI about a patient which a nurse mistakenly sent to the billing employee. The billing employee notices that he is not the intended recipient, alerts the nurse of the misdirected e-mail, and then deletes it.)

Yes _____ No _____

If yes, please explain: _____

_____

_____

18. Did the breach involve an inadvertent disclosure to another authorized person within the entity or Organized Health Care Arrangement in which the entity participates? (For example — A physician who has authority to use or disclose PHI at a hospital by virtue of participating in an organized health care arrangement with the hospital is similarly situated to a nurse or billing employee at the hospital.)

Yes _____ No _____

If yes, please explain: _____

_____

_____

19. Did the breach involve a recipient who could not reasonably have retained or remembered the data? (For example — A covered entity, due to a lack of reasonable safeguards, sends a number of explanations of benefits (EOBs) to the wrong individuals. A few of the EOBs are returned by the post office, unopened, as undeliverable.)

Yes _____ No _____

If yes, please explain: _____

_____

_____

20. Was the unauthorized person who received the PHI or Sensitive Information or to whom the disclosure was made covered by HIPAA and/or a licensed healthcare provider'?

Yes _____ No _____

If yes, please identify the licensed healthcare provider, the type of license and any state confidentiality regulations which require the licensed provider to maintain the confidentiality of the information: _____

_____

_____

21. Can any of the information be used by an unauthorized recipient to further the recipient's own interests?

Yes _____ No _____

If no, explain why none of the information cannot be used by an unauthorized recipient to further the recipient's own interests?

_____

_____

_____

IV. Addressing the Breach

22. Description of what Business Associate is doing to investigate the breach: _____

_____

_____

_____

_____

_____

23. Has law enforcement been notified?

Yes _____ No _____

If so, describe _____

_____

_____

24. Did law enforcement ask for patient notification delay (based on hindering an investigation or causing harm to national security)

Yes _____ . No _____

If yes, please provide documentation of the police request and deadline for notifications: _____

_____

_____

25. Was satisfactory assurance obtained from the recipient of PHI or Sensitive Information indicating that PHI or Sensitive Information will not be further used or disclosed?

Yes _____ No _____

If yes, please attach and explain: _____

_____

26. Has the information been returned or properly destroyed? (If destroyed — need to obtain satisfactory assurance that the information was destroyed.)

Yes _____ No _____

If yes, please attach the assurances and explain the circumstances: _____

_____

27. Description of what Business Associate is doing to mitigate harm to the individual(s): _____

_____

_____

28. Description of what Business Associate is doing to protect against any further breaches: _____

_____

_____

29. Contact information to ask questions and obtain additional information:

Name: _____

Title: _____

Address: _____

Email Address: _____

Phone Number: _____

"State"	_____		
"Initial Term Year 1 Total Annual Practice ED Subsidy Amount"	An amount as determined in Exhibit 1 to the Exclusive Emergency Department and Hospitalist Services Master Agreement between LifePoint Corporate Services, General Partnership ("Company") and Southeastern Emergency Physicians, LLC, a Tennessee limited liability company ("Contractor") effective as of [____] (the "Master Agreement").	**Such allocation will be based on the relative cost of providing the services per the schedules checked below. Specific hospital's revenue and expense for the services provided will be considered in determining this allocation**	
Terms of shared excess revenue/profits:	Per the Master Agreement		

The following checked Schedules are attached to and made a part of this Agreement:

	Schedule	Title
☐	1	Emergency Department Agreement
☐	2	Hospitalist Agreement

IN WITNESS WHEREOF, Hospital and Contractor have duly executed this Agreement as of the dates set out beneath their respective signatures.

The undersigned hereby certifies that:

1) As of the date of the signatures below, this Agreement constitutes a binding agreement to perform services as of the Effective Date and may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument;
2) The compensation arrangement is established at fair market value for the services to be rendered and this Agreement is for services that are needed and reasonable in scope;
3) This Agreement supersedes all prior agreements, contracts and understandings, whether written or otherwise, between the parties relating to the subject matter hereof and does not condition the payment or the arrangement on the volume or value of any referrals or other business generated between the parties;
4) Until the Agreement is listed in Hospital's Master Contract Database to the extent required by 42 C.F.R. § 411.357(d)(1)(ii), no payment shall be made nor services accepted under this Agreement; and
5) Upon the Effective Date of this Agreement, to ensure that no payments are made and no services accepted beyond the terms of this Agreement, or the terms of other company approved agreements between the parties.

THIS EXCLUSIVE PROFESSIONAL SERVICES AGREEMENT (the "Agreement") is hereby entered into by and between Hospital and Contractor who may hereafter be referred to individually as a "Party" and collectively as the "Parties" in connection with the Exclusive Emergency Department and Hospitalist Services Master Agreement (the "Master Agreement") dated the [___] day of [____], 2022, by and between LifePoint Corporate Services, General Partnership ("Company") and Contractor.

RECITALS

WHEREAS, Hospital has determined that coverage by an exclusive group of providers based at Hospital is necessary to meet the needs of patients at Hospital; and

WHEREAS, Hospital has determined that the proper, orderly and efficient delivery of emergency department services (the "ED Services") and/or hospitalist services (the "HM Services") at the Hospital (ED Services and HM Services are collectively known as the "Services") can be accomplished best by entering into an exclusive coverage arrangement; and

WHEREAS, Contractor will, at its expense, arrange coverage for Hospital through licensed physicians (individually referred to as "Physician" and collectively referred to as "Physicians"), and certified nurse practitioners or physician assistants (individually referred to as "Allied Health Practitioner" and collectively referred to as "Allied Health Practitioners") (Physicians and Allied Health Practitioners collectively referred to as "Contractor's Representatives") authorized and licensed to practice medicine where Hospital is located (the "State"), who are qualified to provide the services as defined in this Agreement; and

WHEREAS, Hospital desires to contract with Contractor as set forth herein to obtain management services of Contractor with respect to the professional component of services provided at the Hospitals so as to permit the development and operation of certain departments at Hospital; and

WHEREAS, this Agreement is entered into for the purpose of defining the Parties' respective rights and responsibilities; and

WHEREAS, the terms of the Master Agreement are incorporated herein as though fully repeated verbatim.

NOW, THEREFORE, in consideration of the premises and mutual covenants and agreements herein set forth, the Parties hereto agree as follows:

I. CONTRACTOR'S REPRESENTATIONS.

A. Organization. Contractor represents and warrants that it is a corporation or limited liability company duly organized and validly existing under the laws of its state of incorporation and has the corporate power and authority to execute and deliver this Agreement, and to carry out its provisions.

B. Services. Contractor shall (through appropriately licensed Contractor's Representatives) provide professional services needed at the Hospital, including but not limited to those services described as set forth in any attachment(s) defined as Professional Service Agreement(s) (the "Services") attached hereto.

C. Professional Qualifications. Contractor shall ensure that all Contractor's Representatives utilized to provide Services under this Agreement continuously have and maintain the following credentials:

1. Contractor's Representatives will be qualified by training and experience to provide the Services; and

2. The Contractor's Representatives assigned to Hospital shall have the Medical Staff or allied health privileges required to provide Services under this Agreement in accordance with the applicable requirements and Medical Staff bylaws, and each of Contractor's Representatives shall comply with Hospital policies and procedures. Medical Staff bylaws, and rules and regulations for Hospital.

D. Approval of Contractor's Representatives and Substitutes.

1. Contractor agrees it shall not use any Physician or Allied Health Professional to provide the Services under this Agreement to Hospital without first obtaining appropriate medical staff or allied health privileges and other approvals required by such Hospital's Medical Staff bylaws. Contractor agrees that all of Contractor's Representatives are subject to continuing approval of Hospital.

2. Contractor shall provide a substitute for any of Contractor's Representatives who are unable to provide services required under this Agreement. As a condition of providing services under this Agreement, any such substitute shall satisfy all qualification requirements applicable to the Contractor's Representatives.

3. Contractor agrees to cause each of Contractor's Representatives and substitutes to comply with his or her assigned Hospital policies and procedures. Medical Staff bylaws and rules and regulations. Failure to do so shall be grounds for Hospital to request Contractor to immediately remove the Contractor's Representative or substitute as described under Section II below. Hospital shall supply a copy of its Medical Staff Bylaws to Contractor within thirty (30) days of execution of this Agreement (if not already supplied), and shall supply an updated version upon any revision.

E. Compliance.

1. Contractor and Contractor's Representatives shall perform all Services under this Agreement in accordance with any and all regulatory and accreditation standards applicable to Hospital and the Services, including, without limitation, those requirements imposed by the Medicare Conditions of Participation, The Joint Commission accreditation standards, the AMA Code of Ethics, the rules and regulations of the Board of Medicine in the State, the Emergency Medical Treatment and Active Labor Act ("EMTALA"), the Federal Anti-Kickback and Stark statutes and regulations, federal and state regulations governing the security and privacy of health information, and other applicable state and federal regulations, all as amended from time to time.

2. Contractor represents and warrants that as of the date of this Agreement: (i) neither it nor any Contractor's Representative is excluded, debarred or otherwise ineligible to participate in Medicare, Medicaid or any other federal or state healthcare programs or in any federal or state procurement or non-procurement programs; and (ii) neither it nor any Contractor's Representative has been convicted of a criminal offense that could lead to such debarment or exclusion. Contractor shall immediately remove from service hereunder any Contractor's Representative for whom this representation and warranty is no longer true and shall so inform the Hospital to which Contractor's Representative is assigned. In the event this representation and warranty becomes untrue as to Contractor, Hospital may deem this Agreement terminated immediately. Contractor agrees this is an ongoing representation and will immediately notify Hospital in the event the foregoing representation and warranty is no longer completely accurate. Contractor acknowledges and agrees this is a material term of the Agreement and any breach or nonfulfillment of same will entitle the Hospital to terminate this Agreement immediately.

F. Quality Programs. Contractor and Contractor's Representatives shall furnish any and all information, records and other documents related to Contractor's service at the Hospital, which Hospital may reasonably request in furtherance of quality assurance, utilization review, risk management, and any other plans and/or programs adopted by Hospital to assess and improve the quality and efficiency of the Hospital's services. As reasonably requested, Contractor and Contractor's Representatives shall participate in one or more of such plans and/or programs, including participating in training on any such program at Hospital's request.

G. Medical Records for All Patients Evaluated and/or Treated by Contractor's Representatives. Unless otherwise specifically agreed to by the Parties, all patients evaluated and/or treated by Contractor's Representatives shall have a medical record created and a charge assigned, including all direct admissions undertaken by Contractor's Representatives. Contractor shall prepare timely, complete and accurate medical records in accordance with Hospital's policies and all professional standards applicable to medical records documentation. All such records shall be entered into Hospital's medical records system, including full use of Computerized Physician Order Entry. Medical records for patients evaluated and/or treated by Contractor's Representatives in Hospital shall at all times remain the property of Hospital.

II. **REMOVAL OF PHYSICIANS PROVIDED BY CONTRACTOR.** Contractor's Representatives shall be removed at the request of Hospital to which such Contractor's Representative is assigned, as follows:

A. For Cause. Upon Hospital's written notice to Contractor to remove any of Contractor's Representatives, with or without cause, Contractor shall remove Contractor's Representative immediately from providing Services. In that event, Contractor shall immediately provide a qualified replacement for Contractor's Representative. If Contractor fails to obtain alternative coverage within one hundred twenty (120) days that is acceptable to Hospital, then, without limiting any other remedies that Hospital may have under this Agreement or applicable law, Hospital may, following written notice to Contractor, obtain appropriate alternative coverage at Contractor's expense. If Hospital is requesting removal of a Contractor Representative for "cause", Hospital shall briefly describe the "cause" to Contractor in

writing. If Hospital does not provide a description of the "cause" for the requested removal, then such removal will be deemed a "without cause" removal for purposes of Section X(A) hereof. For-cause removals may include, but are not limited to, a Contractor's Representative who: (1) is convicted of a crime other than a minor traffic violation; (2) has a guardian or trustee of its person or estate appointed by a court of competent jurisdiction; (3) becomes disabled so as to be unable to perform the duties required by this Agreement; (4) fails to maintain professional liability insurance required by this Agreement; (5) has his/her license(s) and/or privileges required to perform the services contemplated by this Agreement either suspended, revoked or otherwise limited; (6) is debarred, sanctioned or excluded by a state or federal health care program; (7) if applicable, has his/her federal and/or state registration to prescribe and dispense controlled substances suspended, revoked or otherwise limited; (8) fails to comply with any of the terms and conditions of this Agreement after being given notice of that failure and a reasonable opportunity to comply; (9) acts in a manner that Hospital determines to be detrimental to patient safety or negatively affects Hospital's reputation or operations; or (10) fails to comply with any policy or lawful directive of the Hospital. The parties agree that Hospital's requested removal of a Contractor Representative shall have no impact on Contractor's relationship with the affected Contractor Representative, and that any subsequent decision by Contractor to terminate its relationship with the Contractor Representative shall be at the sole discretion of Contractor. Failure of Contractor to remove Contractor's Representative shall be deemed a material breach of this Agreement, and Hospital may immediately terminate this Agreement.

B. Effect on Contractor's Representatives Medical Staff Appointment and Clinical Privileges. Because this is an exclusive Agreement, as more particularly described in Section IV, the medical staff appointment and clinical privileges of all Contractor's Representatives providing services to Hospital shall be incident to and coterminous with this Agreement, and, upon termination or expiration of this Agreement or upon removal of Contractor's Representative by Contractor, the appointment and clinical privileges of the Contractor's Representative shall automatically terminate except as otherwise provided below. Notwithstanding the foregoing, a Contractor Representative's Medical Staff Appointment and Clinical Privileges will not automatically terminate upon termination or expiration of this Agreement unless a continuation of such privileges, in Hospital's reasonable judgment, would be inconsistent with Hospital's ability to contract exclusively with a successor provider of Services. Any rights that the Contractor's Representatives may have to any hearing or appeal procedures prior to termination of Medical Staff Appointment or Clinical Privileges, pursuant to the bylaws or policies of a Hospital or its Medical Staff, or any other state or federal statute, regulation or judicial decision are hereby waived with respect to any termination of Medical Staff Appointment or Clinical Privileges resulting from the items listed herein. Unless otherwise required by law, no reporting to any third party, such as the National Practitioner Data Bank, shall take place for any termination hereunder for non-clinical or non-competency issues. Contractor will require each Contractor's Representative providing Services under this Agreement to execute a separate Contractor Representative Agreement Regarding Medical Staff Membership and Privileges in substantially the same form as ADDENDUM I, attached hereto and incorporated by reference into this Agreement. If Contractor has a substantially similar provision in its contracts with its Physician and Allied Health Practitioners, Contractor will not be required to comply with the requirement in the foregoing sentence.

III. OBLIGATIONS OF HOSPITAL.

A. Hospital Billing. Hospital shall be responsible for, and solely entitled to, billing and collection of all Hospital services rendered to the patients to whom the Services are provided and non-physician provider services performed for the general benefit of its patients, except those for professional services rendered by Contractor's Representatives who are either contracting with or employed by Contractor.

B. Supplies, Equipment, Etc. Hospital will make available the space, utilities, equipment, supplies (to include drugs and narcotics) and services (including housekeeping and laundry) reasonably necessary for the proper operation of the Services. Hospital will maintain its equipment in good order and repair.

C. Facilities and Personnel. Hospital shall provide adequate facilities, along with appropriate numbers of competent support personnel (including nursing staff) for the operation of the Services as determined in Company's sole and reasonable discretion after consultation with Contractor, provided such consultation is requested by Contractor with respect to a particular facility in writing. Hospital shall provide other reasonable support services necessary for proper operation of the Services (including scheduling non-Contractor's Representative personnel, preparing and filing of patient treatment consents and providing other services which are reasonable and mutually agreed upon). Hospital shall provide an adequate medical records system for use in provision of the Services.

D. Transcription. Hospital will provide appropriate dictation, transcription, and medical record services to Contractor for use by Contractor's Representatives for documentation made by Contractor's Representatives in Hospital medical record.

E. Medical Staff On Call. Hospital shall have available specialty physicians on-call in accordance with its Medical Staff bylaws.

F. Materials to Patients. Hospital will, in good faith, attempt to distribute to patients to whom the Services are provided materials describing the separate billing relationship between the patients and Contractor. Such materials will be supplied to Hospital by Contractor on a form acceptable to Hospital.

G. Compliance. Hospital represents and warrants that as of the date of this Agreement: (i) Hospital is not excluded, debarred or otherwise ineligible to participate in Medicare, Medicaid or any other federal or state healthcare programs or in any federal or state procurement or non-procurement programs; and (ii) Hospital has not been convicted of a criminal offense that could lead to such debarment or exclusion. In the event this representation and warranty becomes untrue as to Hospital, Contractor may deem this Agreement terminated immediately. Hospital agrees this is an ongoing representation and will immediately notify Contractor in the event the foregoing representation and warranty is no longer completely accurate. Hospital acknowledges and agrees this is a material term of the Agreement and any breach or nonfulfillment of same will entitle the Contractor to terminate this Agreement immediately.

H. Billing Information. Hospital shall supply Contractor with information necessary for Contractor to bill patients for services rendered by the Contractor's Representatives. In order to allow Contractor to accurately and timely bill for professional services provided by Contractor Representatives hereunder, Hospital agrees to provide Contractor, with either: (i) an electronic file transfer containing patient medical records and related information, including, but not limited to, physician transcription, physician notes, insurance cards and demographic information necessary to conduct physician billing ("Billing Documents"), or (ii) the requested assistance necessary to obtain legible paper copies of Billing Documents to forward to Contractor, which assistance shall include, but not be limited to:

1. Hospital will locate any missing Department records and forward such missing records to Contractor within three (3) working days.

2. Hospital will use commercially reasonable efforts to arrange for patient signatures on forms noting patient's responsibility for paying Contractor's billings.

3. Hospital shall bear the expense of providing one copy of relevant patient medical records to be sent to Contractor.

4. Hospital will comply within three (3) working days with other reasonable requests for information or record handling (including requests regarding insurance) by Contractor.

In the event Hospital has implemented an Electronic Medical Records ("EMR"), Contractor will electronically transmit Billing Documents from Hospital to Contractor. In such event, Hospital will work cooperatively with Contractor and Contractor's Information Technology department to facilitate the timely and accurate flow of Billing Documents to Contractor. This information will be transmitted from Hospital to Contractor in a secure HIPAA compliant electronic format on a daily basis. The Billing Documents transmitted in this fashion will include, but not be limited to: ADT Registration information (patient demographics, payor information, and disposition), event times, and to the extent possible patient clinical record.

Each Hospital shall assist Contractor in obtaining patient signatures on assignment of insurance benefits and other reasonably appropriate forms supplied to the respective Hospital by Contractor. Any collection efforts by the Hospitals and Contractor will comply with all federal and state laws and regulations.

IV. EXCLUSIVITY

A. Hospital concludes that an exclusive relationship for the Services will best facilitate the delivery of efficient, effective and quality patient care. Such a relationship is expected to enhance patient services provided by Contractor and the Hospital, improve the relationships between Contractor, the Hospital's Medical Staffs and Hospital, afford effective utilization of the Hospital's equipment, provide consistent service and quality control, provide prompt availability of professional services, simplify scheduling of patients and physician coverage, enhance the efficient and effective administration of the Services — all of which enhance the quality of patient care.

B. During the Term of this Agreement, Contractor shall be the exclusive provider of the Services described in this Agreement, and therefore, Hospital will ensure does not extend medical staff privileges for the practice of the Services at Hospital to any provider not employed by or under contract with Contractor. However, nothing in the preceding

sentence shall be construed to limit the rights of community-based physicians with medical staff privileges at the Hospital to provide care for their patients while they are admitted to the same.

V. TERM AND TERMINATION

A. This Agreement shall be effective as of the Effective Date, beginning at 12:00 a.m. in the applicable time zone of the Hospital and shall continue for the Initial Term. **[NOTE: The Effective Date cannot be a date that occurs before the dates that both the Hospital and Contractor signed the Agreement. If the Agreement is submitted for approval with an Effective Date that occurs before the last party (The Hospital or Contractor) signed the Agreement, the Effective Date will automatically be changed to the date that the Contractor or Hospital signed, whichever is later. Contractor will not be compensated for services provided to the Hospital prior to the Effective Date.]** Notwithstanding the foregoing, this Agreement will automatically renew for additional twelve (12) month periods following the expiration of the Initial Term, with each such additional twelve (12) month period to be called an "Additional Term", until (i) such time as a new Agreement is executed by the Parties, or (ii) this Agreement is otherwise terminated as provided herein. For purposes of this Agreement, "Term" shall mean the Initial Term and any Additional Term.

B. Either Party may terminate this Agreement at any time in the event the other Party engages in an act or omission constituting a material breach of any term or condition of this Agreement. The Party electing to terminate this Agreement shall provide the breaching Party with written notice specifying the nature of the breach. If a dispute arises regarding the materiality of a breach, then both Parties shall submit the issue to a mutually agreed upon arbitrator pursuant to Section VIII of this Agreement for resolution of the dispute. The breaching Party shall then have twenty (20) days from the date of the notice or twenty (20) days from the date of the arbitrator's decision in which to remedy the breach and conform its conduct to this Agreement. If such corrective action is not taken within the time specified, this Agreement shall terminate at the end of the twenty (20) day period without further notice or demand, provided, however, that Hospital may not terminate this Agreement if Contractor is diligently pursuing the remedy of the breach.

C. Either Party may terminate this Agreement immediately as specified in Sections I.E.2 and III.G, of this Agreement.

D. Either Party may terminate this Agreement immediately if either Party makes a general assignment for the benefit of creditors, or files a petition for relief in bankruptcy or under similar laws for the protection of debtors, or upon the initiation of such proceedings against either Party if the same are not dismissed within forty-five (45) days of service;

E. Either Party may terminate this Agreement immediately if any of the following events occur with regard to Hospital:

1. Loss of Hospital's certification as a Medicare provider;

2. Closure of Hospital;

3. Contractor's general assignment for the benefit of creditors. Contractor's petition for relief in bankruptcy or under similar laws for the protection of debtors, or upon the initiation of such proceedings against Contractor if the same are not dismissed within forty-five (45) days of service; or

4. Hospital's general assignment for the benefit of creditors, or Hospital's petition for relief in bankruptcy or under similar laws for the protection of debtors, or upon the initiation of such proceedings against Hospital if the same are not dismissed within forty-five (45) days of service; or

5. Beginning on the Effective Date and for the Term of the Agreement, Contractor's failure to achieve an overall minimum score of sixty (60) points on the "ED Physician Scorecard" or "Hospitalist Physician Scorecard", if applicable (as may be further defined in this Agreement) at Hospital for any two consecutive quarters during the Term of this Agreement or any renewal period thereof. Contractor, however, shall have the right, at its own expense, to review and audit any performance metric contained in the ED Physician Scorecard or Hospitalist Physician Scorecard, including all underlying data. Hospital agrees to resolve any discrepancy found during an audit performed by Contractor to the Parties' mutual satisfaction. If a dispute arises or the Parties are unable to resolve the discrepancy to their mutual satisfaction, then both Parties shall submit the issue to a mutually agreed upon arbitrator pursuant to Section VIII of this Agreement for resolution of the dispute.

F. This Agreement shall terminate upon termination of the Master Agreement (as defined on the cover page of this Agreement).

G. Except as provided herein, upon any termination of this Agreement, neither Party shall have further rights against, or obligations to, the other Party except with respect to any rights or obligations accruing prior to the date and time of termination and any obligations, promises or agreements which expressly extend beyond the termination, including but not limited to the terms herein related to insurance coverage, restrictive covenants, dispute resolution and confidentiality provisions. Contractor shall have reasonable access to any Hospital's information and records pursuant to Section III (H) of the Agreement for a period of six months after termination of this Agreement for Contractor's billing, risk management and/or quality/peer review purposes.

VI. RISK MANAGEMENT

A. Required Risk Reduction Education. As fair market value consideration, Hospital may reimburse or pay all actual expenses associated with the costs of any educational sessions related to the Service that Contractor and/or Contractor's Representatives are directed to attend by Hospital. All such expenses must be reasonable, and the Contractor and/or Contractor's Representatives must be authorized in advance, and in writing by the Hospital's CEO, to incur such expenses, and such expenses must be paid in accordance with Hospital's policies and procedures. All such expenses are limited to those incurred by Contractor and/or Contractor's Representatives only (e.g., expenses of spouses and other family members are excluded from reimbursement).

B. Provision of Services for Risk Management, Employment Purposes, or Other Obligations of Hospital. Contractor agrees to provide Services as requested by Hospital in response to risk management issues, employee health efforts, or other contractual obligations as reasonably requested by Hospital. In these situations, if requested by Hospital to waive Contractor's fees after the Services have been provided, Contractor shall bill the Hospital for its professional charges rather than the patient or the patient's insurance plan. Contractor agrees to accept the then current year Medicare Physician Fee Schedule reimbursement amount, or where applicable, state workers' compensation amounts, for any such services rendered.

VII. **ALTERNATIVE DISPUTE RESOLUTION**. The Parties firmly, desire to resolve certain disputes arising hereunder without resort to litigation in order to protect their respective business reputations and the confidential nature of certain aspects of their relationship. Accordingly, any controversy or claim arising out of or relating to this Agreement, excepting healthcare liability and/or claims sounding in negligence, and the insurance and indemnification obligations set forth in Section XI, below relating to third-party claims made by patients and/or their representatives, shall be settled by arbitration before a single arbitrator and administered by the American Health Lawyers Association in accordance with its rules, including arbitrator selection. The award or decision rendered by the arbitrator will be final, binding and conclusive, and judgment may be entered upon such award by any court of competent jurisdiction. The arbitration process itself, and any other information or disclosures revealed by either Party to the arbitrator or to the other Party during the arbitration process will be confidential. No disclosure of the award shall be made by the Parties except as required by the law or as necessary or appropriate to effectuate the terms thereof. The location of the arbitration shall be in in the city in which the Hospital is located, unless otherwise mutually agreed by the parties. The dispute shall be governed by the laws of the State. Further, the prevailing Party shall be entitled to recover all costs and expenses associated with arbitration, including reasonable attorneys' fees. If the arbitrator determines that neither Party has substantially prevailed, the Parties shall bear equally the fees and costs of the arbitrator and the related expense of arbitration. Nothing in this section shall preclude either party from maintaining or initiating an action, counterclaim or cross-complaint in tort or contract against the other related to any healthcare liability and/or claims sounding in negligence relating to third-party claims made by a patient and/or a patient's representatives.

VIII. **PARTIES' RELATIONSHIP**. The Parties acknowledge that Contractor is an independent contractor to Hospital for the furnishing of Contractor's Representatives who agree to render Services to patients of the Hospital. Neither Contractor nor Contractor's Representatives shall in any way be construed as employees of any of the Hospital. Neither Contractor nor any of its agents (employees or contractors) shall have the right or authority to enter into any contract in the name of the Hospital or otherwise bind the Hospital in any way without the express written consent of the Hospital designee.

IX. **PERFORMANCE DATA**. Hospital agrees to comply with Contractor's reasonable request for financial and performance data related to utilization at Hospital. Contractor shall make such requests no more than quarterly during the Term of this Agreement.

X. INSURANCE AND INDEMNIFICATION.

A. Contractor hereby agrees to indemnify and hold harmless Hospital and Hospital's officers, directors, employees, agents, successors and assigns from and against any claim, damage, loss, expense, liability, obligation, action or cause of action, including reasonable attorneys' fees and reasonable third party costs of investigation, which Hospital may sustain, pay, suffer or incur by reason of any negligent act or omission of Contractor and/or its directors, employees, agents, independent contractors, contractors or subcontractors, including but not limited to Contractor's Representatives, in connection with services provided and duties undertaken under this Agreement, including any

claims for personal injury, healthcare liability or wrongful death, and including, without limitation, any claims arising from any for "cause" removal of Contractor's Representatives or Contractor's termination of its relationship with any Contractor Representative following any for "cause" removal requested by Hospital pursuant to Section II.A, above. For the avoidance of confusion, the parties hereby acknowledge that Contractor shall not be obligated to indemnify Hospital with respect to (i) any claims pursued by a Contractor Representative arising or accruing from a "without cause" removal, or (ii) any for "cause" removal requests by Hospital that Contractor reasonably and in good faith believes may result in actual or potential violation of any applicable federal, state or local employment, anti-retaliation and/or whistleblowing laws as set forth in writing from Contractor to Hospital. Such written notice by Contractor pursuant to clause (ii) above shall clearly articulate the relevant known or alleged facts supporting Contractor's belief, shall cite the applicable underlying law(s), shall clearly explain the rationale supporting Contractor's conclusion(s), and shall be provided to Hospital within three (3) business days after Contractor determines that such removal request may result in an actual or potential violation of law and regardless of the date of removal of the Contractor Representative. The parties hereby acknowledge and agree that while timely and adequate notice pursuant to clause (ii) shall temporarily relieve contractor of the obligation to indemnify Hospital, Hospital shall automatically retain all rights to challenge Contractor's refusal to indemnify pursuant to the dispute resolution procedures set forth in this Agreement. To ensure coverage in the event of an act or omission as described above, Contractor shall (i) maintain in force at all pertinent times at its sole expense a policy of general and professional liability insurance in the minimum amount of One Million Dollars ($1,000,000.00) per occurrence, Three Million Dollars ($3,000,000.00) in the annual aggregate, naming Hospital as an additional insured thereon, or such higher amount as may be required by the laws of the State; and (ii) if applicable, participate in the appropriate state compensation fund. Contractor shall furnish, upon execution of this agreement and annually a copy of the policy of insurance and a Certificate of Insurance evidencing the aforementioned coverage.

B. Hospital hereby agrees to indemnify and hold harmless Contractor from and against any claim, damage, loss, expense, liability, obligation, action or cause of action, including reasonable attorneys' fees and reasonable costs of investigation, which Contractor may sustain, pay, suffer or incur by reason of any negligent act or omission of Hospital, or its employees in connection with services provided and duties undertaken under this Agreement, including any claims for personal injury or wrongful death.

C. Contractor and Hospital each agree and it is the stated intent of each that they shall only be liable to the other party under this Section for the proportionate liability or representative share of negligence allocated to such party based on the negligent acts or omissions of each party and its directors, employees, agents, independent contractors, contractors or subcontractors, including but not limited to Contractor's Representatives. If such allocation is not determined by a court of competent jurisdiction and the parties in good faith are otherwise unable to agree to such allocations, either party hereto may bring an action, including a summary or expedited proceeding, to compel binding arbitration of such matter.

XI. **ACCESS TO BOOKS AND RECORDS.** In the event it is held that Section 1861(v)(1)(1) of the Social Security Act is applicable to this Agreement, it is agreed:

A. Until expiration of five (5) years after furnishing services and pursuant to this Agreement, Contractor shall make available upon written request of the Secretary of Health and Human Services or the U.S. Comptroller General, or any of their duly authorized representatives, this Agreement, books, documents and records of Contractor that are necessary to verify the nature and extent of costs incurred by Hospital under this Agreement.

B. If Contractor carries out any of the duties of this Agreement through a subcontract with a related organization with a value of Ten Thousand Dollars ($10,000) or more over a twelve (12) month period, such agreement must contain a clause to the effect that until the expiration of five (5) years after the furnishing of services under the subcontract, the related organization shall make available, upon written request of the Secretary of Health and Human Services, the U.S. Comptroller General, or any of their duly authorized representatives, the subcontract, any books, documents, and records of the related organization that are necessary to verify the nature and extent of costs incurred by Hospital under this subcontract.

C. In the event said sections are found to be inapplicable to this Agreement, this article shall be deemed not to be a part of this Agreement and shall be null and void with respect thereto.

XII. **NOTICES.** Any notice required or permitted to be given hereunder shall be in writing and may be given by: (1) hand delivery and shall be deemed given on the date of delivery; (2) registered or certified mail and shall be deemed given the third day following the date of mailing, or (3) overnight delivery by reputable overnight delivery service such as Federal Express or UPS and shall be deemed given the following day. All notices to Contractor or Hospital shall be addressed to Contractor or Hospital

at the addresses as set forth on the signature page, together with a required copy to: LifePoint Hospitals, 330 Seven Springs Way, Brentwood, TN 37027, Attention: Chief Legal Officer.

XIII. **CONFIDENTIALITY**. The Parties agree that this Agreement and its provisions are strictly confidential. The Parties shall not disclose any information pertaining to any provision of this Agreement to any person or entity not a party to this Agreement except for tax, legal, or accounting advisors or as otherwise required by law.

XIV. **VENDOR PROMOTION/PUBLICATION**. Hospital prohibits the use of Hospital's name by any vendor or independent contractor, or the use of any name of Hospital's subsidiaries, or affiliated hospitals in any advertisement, press statement or release, website, published customer list, or any publication or dissemination similar to the foregoing without receiving in advance the express written permission from Hospital's Chief Executive Officer or his or her designee. Any request for permission should include the complete text of the publication, statement, or document in which the name usage will appear and will be subject to edit by the Hospital.

XV. **MARKETING SERVICES/COMPENSATION OF CONTRACTOR'S REPRESENTATIVES**. Except as specifically provided in this Agreement, Contractor shall not perform and is not being compensated for marketing services with respect to the Services to be performed at the Hospital. Contractor represents and warrants that no part of the compensation paid hereunder is in exchange for the referral or arrangement for referral of any patient to of Hospital. Contractor represents and warrants that, in connection with the Services to be performed pursuant to this Agreement, each employee, independent contractor, or other entity or person performing Services pursuant to the Agreement shall be compensated in a manner that complies with the Federal Anti-Kickback Statute, an exception to the Stark law, and as applicable, an appropriate exception to any state statutes similar to either or both of the foregoing federal statutes.

XVI. **SEVERABILITY**. The invalidity or unenforceability of any provision(s) of this Agreement will not affect the validity or enforceability of any other provision(s).

XVII. **NO WAIVER**. No waiver of a breach of any provision of this Agreement shall be construed to be a waiver of any breach of any other provision.

XVIII. **ASSIGNABILITY**. Contractor may not assign any of its rights or obligations hereunder without the prior written consent of Hospital, which consent will not be unreasonably withheld. Hospital may not assign this Agreement to any successor to all or substantially all of Hospital's operating assets without the prior written consent of Contractor, which consent will not be unreasonably withheld. This Agreement shall inure to the benefit of and be binding upon the Parties hereto and their respective successors and permitted assigns.

XIX. **AMENDMENTS**. Amendments to this Agreement shall be made only in writing duly executed by both Parties hereto.

XX. **ENTIRE AGREEMENT**. This Agreement constitutes the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior agreements, contracts and understandings, oral, written or otherwise, including but not limited to any prior agreements between Contractor and/or its affiliates and Hospital.

XXI. **THIRD PARTY BENEFICIARIES**. This Agreement is intended to, and shall be deemed and construed to create rights and/or remedies for the Hospitals, which shall be deemed third party beneficiaries to this Agreement.

XXII. **AGREEMENT CROSS-REFERENCE**. As required by 42 C.F.R. section 411.357 (d)(1)(ii), all service agreements between Company or its affiliated Hospitals and any physician (or an immediate family member of a physician) are maintained electronically in a master contract database that is maintained and updated centrally and is available for review upon request by an authorized government official.

EXHIBIT 5

The Participating Hospitals will be determined at the sole and absolute discretion of Company following the Effective Date of this Agreement and subject to the conditions set forth in Article VII.D of the Agreement.

Data Requirements and Applications

IllumiCare shall provide the following Apps within the Ribbon, each as described in their respective App Schedule (attached hereto and incorporated by reference herein):

Schedule	App
1	Stewardship
2	Benchmarking
3	PDMP Auto-Login
4	Length of Stay (LOS)

SCHEDULE 1 – STEWARDSHIP

Description

The Stewardship App gives providers the human and economic cost of medications, labs and radiology tests, along with specific recommendations about how to lower costs/risks (see Fig 1).

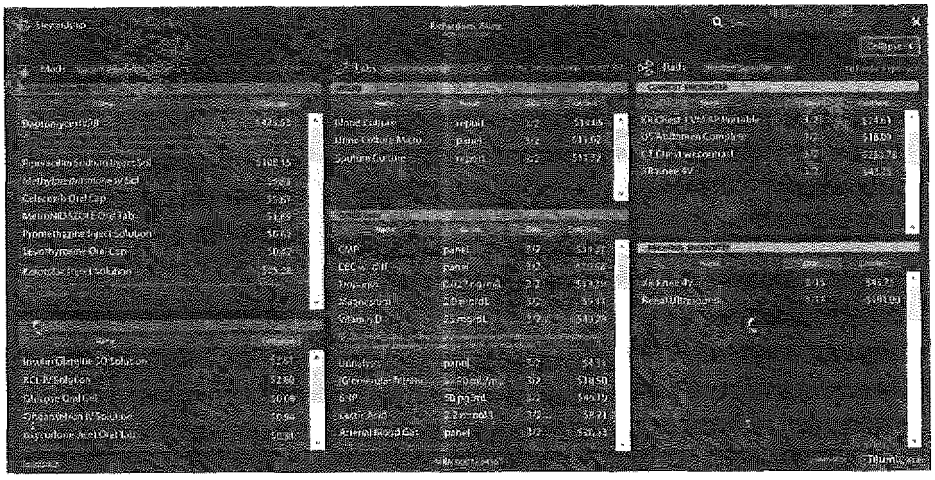

Figure 1

Data Required

- HL7 Feeds:
  - Admit/Discharge/Transfer (ADT)
  - Pharmacy (ORM and RDE)
  - Laboratory (ORM and ORU)
  - Radiology (ORM and ORU)
- Optional Cost Data / Interface:
  - Daily, wholesale acquisition cost of medications
  - Periodic cost accounting data on labs and radiology tests
- Weekly Flat-File of Discharges with (per discharge):
  - Final MS-DRG and APR-DRG
  - Variable and/or direct costs (optional)

SCHEDULE 2 – BENCHMARKING

Description

The Benchmarking App shows each provider how they compare to their peers on a DRG-adjusted basis in spending/utilization of medications, labs and radiology tests (see Fig 2).

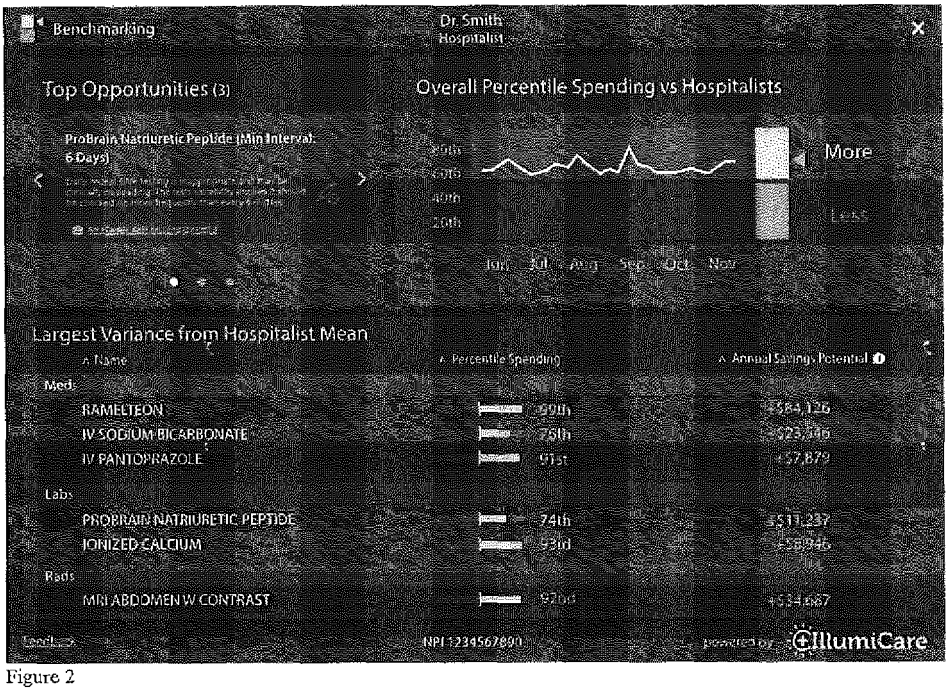

Figure 2

Data Required

Same as the Stewardship App.

SCHEDULE 3 – PDMP AUTO-LOGIN

Description

The PDMP Auto-Login App gives Users are view of outpatient opioid exposures (by opening the state PDMP results with that user's credentials) (Fig. 3).

Contractor Representative Agreement Regarding Medical Staff Membership and Privileges

The undersigned hereby acknowledge and agrees that:

1. The undersigned is a Physician who may provide services to Hospital pursuant to Agreement between Hospital and Contractor.

2. Pursuant to the Agreement, Hospital has certain rights of approval over Physicians and others who provide services, and that; in addition. Hospital may request removal of a Physician or other provider of services under the Agreement. The undersigned understands that this will mean that Hospital may refuse to permit the undersigned to provide services under the Agreement, or request that the undersigned be removed from the permitted list of individuals providing services under the Agreement.

3. The undersigned agrees to the following: the medical staff appointment and clinical privileges of all Physicians and practitioners providing services under the Agreement shall be incident to and coterminous with the Agreement, and upon termination or expiration of the Agreement or upon removal of any Physician or practitioner by Contractor (independently or at Hospital's request) or Hospital's refusal to permit a Physician or practitioner to perform services under the Agreement, the appointment and clinical privileges of such Physician or practitioner shall automatically terminate except as otherwise provided below. Notwithstanding the foregoing, a Contractor Representative's Medical Staff Appointment and Clinical Privileges will not automatically terminate upon termination or expiration of the Agreement unless a continuation of such privileges, in Hospital's reasonable judgment, would be inconsistent with Hospital's ability to exclusively contract with a successor provider of emergency services. Any rights that the Physician or practitioner may have to any hearing or appeal procedures prior to termination of medical staff appointment or clinical privileges, pursuant to the bylaws or policies of Hospital or the Medical Staff, or any other state or federal statute, regulation or judicial decision, are hereby waived with respect to any termination of Medical Staff Appointment or Clinical Privileges at Hospital as described herein. Unless otherwise required by law, no reporting to any third party, such as the National Practitioner Data Bank, shall take place for any termination hereunder for non-clinical or non-competency issues.

EMERGENCY DEPARTMENT AGREEMENT

TERMS AND CONDITIONS

This Schedule 1 ("Schedule 1") is attached to and made a part of the Agreement. Definitions contained herein shall have the same meaning as contained in the Agreement. Should a conflict arise between the terms contained in the Agreement and this Schedule 1, then the terms of this Schedule 1 shall control.

Contractor will be responsible for carrying out the duties identified throughout this Schedule 1 and, additionally, the duties defined hereunder (collectively referred to as the "Services"), plus any Schedules identified below, each of which constitute an integral part of this Agreement:

SCHEDULE	TITLE
1.A	Services, Coverage, and Quality Criteria
1.B	ED Physician Scorecard

SERVICES, COVERAGE, AND QUALITY CRITERIA — EMERGENCY DEPARTMENT

I. **DESCRIPTION OF SERVICES.** Hospital is engaging the services of Contractor to enter into an exclusive relationship for professional Emergency Department ("ED") services which will best facilitate efficient, effective and quality emergency medical care for patients presenting to Hospital's ED. This engagement is expected to improve the services provided at the Hospital, afford effective utilization of the Hospital's equipment and resources, provide consistent service and quality control; provide prompt availability of professional services; simplify scheduling of physician coverage, and enhance the efficient and effective administration of ED services. Contractor and Contractor's Representatives shall practice within Hospital, assuming the role of ED physician or physician extender for patients presenting to Hospital emergency department ("Program Patients"). Allied Health Practitioners, if and when utilized, shall assist Contractor with their duties and responsibilities. Contractor shall provide to Program Patients all professional emergency medicine services that are medically necessary and within the capabilities of the Contractor's Representatives. Contractor's Representatives shall not be responsible for a Program Patient's care after discharge or admission, provided however, Contractor's Representatives shall participate in the Code Team utilized at Hospital, including responses to codes and to other emergency situations involving Program Patients admitted to Hospital.

A. DUTIES OF CONTRACTOR. In addition to the coverage requirements referenced above, Hospital and Contractor agree that the following shall be required duties of Contractor with respect to the Service:

1. Drive performance and be accountable to ED Service line initiatives around quality, service, throughput and growth in coordination with Hospital.

2. Participate in all quality programs outlined by Hospital that improve patient outcomes: Improvement in Value Based Purchasing metrics including but not limited to: core measures, mortality, HCAHPS, readmissions, Medicare Spending Per Beneficiary, and other quality outcome measures.

3. Participate in development and execution of programs and/or educational programs related to service for medical personnel at Hospital, including but not limited to ED Nursing Staff and other Hospital staff, students, interns, residents, as well as Contractor's employees, subcontractors and agents.

4. Must comply with EMTALA, CMS, The Joint Commission and all regulatory agency rules and regulations.

5. Assist and participate in educating the community and creating awareness around services, as requested.

6. Provide the following program enhancement services:

(a) Participate in development and implementation of evidence-based care guidelines that are consistent with local and national standards.

(b) Lead and drive quality improvement in coordination with ED Nurse Director and appropriate Hospital personnel to ensure appropriate care by all of Contractor's Representatives.

(c) In coordination with ED service line initiatives, lead, support and drive improvement through implementation of best practices to drive improved patient outcomes around quality, service and throughput.

(d) Engage and be accountable to quality assurance and improvement initiatives by attending meetings, leading committees, measuring results and holding those accountable to established goals and objectives.

(e) Select a designee for Hospital to meet on a monthly basis with the medical director, case manager, Hospital administration, ED nurse director, and key medical staff leaders i.e. hospitalist, and other individuals necessary to provide input on enhancements for the improvement of Services at Hospital.

(f) Must remain compliant with timely completion of medical records describing the results for all the medical services performed by Contractor's Representatives in ED.

(g) Provide onsite physician supervision for outpatient services rendered at Hospital in order to meet supervision requirements under Medicare.

7. Establish expectations and hold Medical Director and Contractors' Representatives accountable to establishing effective working relationships with ED Nurse Director and personnel, other departments, the Medical Staff, and the administration.

8. Contractor's Regional Medical Directors and Regional Nursing/Clinical Directors must meet with Hospital's ED Services Team at least quarterly to review program goals and objectives around performance related to quality, service, throughput and growth.

9. Contractors support service structure; i.e. customer service and performance improvement, etc., resources; must be accountable to and establish goals consistent with Hospital's ED Service Line priorities both on priority hospitals and metrics.

10. Contractor must use the ED Physician Scorecard, as established in Schedule 1.B, attached hereto and incorporated herein by reference, to align provider and Hospital objectives through a financial withhold in the Medical Director's contract.

11. Agree to work on related projects and perform such other related duties as mutually agreed upon by both parties.

B. DUTIES OF CONTRACTOR'S REPRESENTATIVES. Hospital and Contractor agree that the following shall be required duties of each of the Contractor's Representatives assigned to the Hospitals:

1. Must be consistent with Duties outlined in Section "A" above.

2. Provide emergency department medical treatment as needed for all patients presenting to the Hospital's emergency department.

3. Participate in the Code Team utilized at the Hospital, including responses to codes.

4. Consult with other Medical Staff physicians as needed to assist with evaluations, transfers, and/or admission of program patients or unassigned patients.

5. Meet all behavior and professional conduct requirements of the medical staff bylaws and rules of regulations.

6. Meet all other requirements of the medical staff bylaws, rules and regulations.

7. Complete appropriate documentation of patient medical records and signing of final medical record within required timeframes as required by the Medical Staff Bylaws and Rules and Regulations of Hospital.

8. Work cooperatively with all medical staff and Hospital personnel.

C. MEDICAL DIRECTOR. Contractor shall designate one physician to serve as the Medical Director ("Medical Director") of the Services for each Hospital.

D. The expectations and obligations for the Medical Director include:

1. In conjunction with the ED Nurse Director, drive performance and be accountable to the ED Service line initiative around quality, service, throughput and growth in coordination with the Hospital.

2. Lead and drive quality improvement in coordination with ED Nurse Director and appropriate Hospital personnel to ensure appropriate care by all providers in the ED.

3. In coordination with the ED service line initiative, lead, support and drive improvement through implementation of best practices to drive improved patient outcomes around quality, service and throughput.

4. Educate and hold the ED providers accountable to implement best practices supported by the Hospital around quality, throughput, service and growth and hold the ED providers accountable to meeting the goals and objectives (targets) established.

5. Engage and be accountable to quality assurance and improvement initiatives by attending meetings, leading committees, measuring results and holding those accountable to established goals and objectives (targets).

6. Serve as the professional liaison of the physicians associated with the emergency department program and work closely with Hospital and administration to solve program problems

7. Develop and implement programs to educate medical staff physicians across Hospital on the benefits of the Services to the patients and the community served by Hospital.

8. Establish a culture of safety by creating a professional atmosphere conducive to a high standard of patient care, investigate patient complains and incident reports, hold providers accountable to expectations, and provide high levels of service measured by ED patient Satisfaction.

9. Lead the monthly ED operations committee in coordination with the ED nurse director. The purpose of this multidisciplinary committee is to address key operational priorities around quality, service throughput and growth. The meetings should be data driven based on objective metrics that will drive improvement and patient outcomes in the emergency department.

10. Establish a close working relationship with the case manager of Hospital's emergency department program to ensure a high standard of patient care, proper patient care protocols are developed and maintained, coordinate work flow with the other ancillary departments within Hospital, and assist in the coordination of case management services.

11. Serve as an advisor to Hospital's quality improvement program.

12. In collaboration with the ED Nurse Director, revise existing policies and develop new policies as needed.

13. Participate in Hospital meetings, including but not limited to those related to performance improvement, quality improvement, patient experience, and utilization review.

14. Periodically review emergency department patient records to ensure the documentation, treatment, treatment plans, consults and tests ordered meet the appropriate standard of care.

15. Participate in the Hospital's peer review activities as requested/needed by Hospital.

16. Oversee the administration and management of Hospital's emergency department program and the Agreement with Hospital.

17. Ensure appropriate coverage for Hospital by scheduling coverage of the Services on a monthly basis, including on-site coverage.

18. Facilitate an evaluation process as it relates to the performance of all Contractor's Representatives that treat patients at Hospital. The performance evaluation may include input from other specialists who consult on patients presenting to Hospital's Emergency Department, Hospital personnel, etc. Performance shall be evaluated on the basis of professional attitude, professional capabilities, patient relations attitude and overall effectiveness as determined appropriate by Contractor and Hospital.

II. COVERAGE. In accordance with the terms of this Agreement, Contractor shall:

A. Ensure and deliver to Hospital continuous, twenty-four (24) hour on-site emergency medicine coverage, seven (7) days per week, fifty-two (52) weeks per year.

B. In order to provide the comprehensive coverage set forth above and meet patient needs, Contractor shall provide to Hospital a minimum number of qualified Physician coverage hours ("Qualified Physician Hours"), and if applicable, a minimum number of physician extender or Allied Health Practitioner coverage hours ("Allied Health Practitioner Hours).

Provider	Hours/day needed
Physician	
NP/PA	

C. Any adjustments to staffing requirements and hours of coverage other than those set forth in Section 2 above shall be agreed upon by Hospital and Contractor in writing.

D. In no event shall any Physician or Allied Health Practitioner providing services under the Agreement work more than twelve (12) consecutive hours in a twenty-four (24) hour period, unless prior advance written approval has been obtained from Hospital's Chief Executive Officer or his or her designee. Such advance written approval shall be waived in the case of a catastrophic event or extraordinary medical crisis.

III. **QUALITY CRITERIA.** Hospital and Contractor shall mutually agree upon an "ED Physician Scorecard" which shall be set forth in Schedule I .B. Beginning on the Effective Date, Contractor shall cause Contractor's Representatives to meet the quality criteria set forth in the ED Physician Scorecard (the "ED Physician Scorecard") for the Hospital, which shall be effective as of the date that the ED Physician Scorecard is agreed upon by the Parties, which shall be no later than the Effective Date. The agreed upon ED Physician Scorecard shall be attached as Schedule 1.B, which may be amended from time to time by mutual agreement of the Parties. Any amendments to the ED Physician Scorecard shall be implemented prior to the commencement of a new contract year, shall be based on the prior year's trends and achievements, and shall be mutually agreed upon. The Parties further agree to use their best commercially reasonable efforts to negotiate the ED Physician Scorecard to be applicable hereunder within sixty (60) days of the Effective Date. Each of the quality criteria in the ED Physician Scorecard will be monitored quarterly during the Term of the Agreement, and Hospital will deliver the results of such assessment to Contractor thirty (30) days from the assessed quarter end. The Parties acknowledge and agree that targets identified for each of the quality criteria meet only the minimum level of performance required from Contractor and Contractor's Representatives which shall be an annual overall score of sixty (60) points (the "Minimum Score").

HOSPITALIST SERVICES AGREEMENT

TERMS AND CONDITIONS

This Schedule 2 ("Schedule 2") is attached to and made a part of the Agreement. Definitions contained herein shall have the same meaning as contained in the Agreement. Should a conflict arise between the terms contained in the Agreement and this Schedule 2, then the terms of this Schedule 2 shall control.

Contractor will be responsible for carrying out the duties identified throughout this Schedule 2 and, additionally, the duties defined hereunder (collectively referred to as the "Services"), plus any Schedules identified below, each of which constitute an integral part of this Agreement:

SCHEDULE	TITLE
2.A	Services, Coverage, and Quality Criteria
2.B	Hospitalist Physician Scorecard

SERVICES, COVERAGE, AND QUALITY CRITERIA - HOSPITALIST SERVICES

II. **DESCRIPTION OF SERVICES.** Hospital is engaging the services of Contractor to enter into an exclusive relationship for professional hospitalist services which will best facilitate efficient, effective and quality inpatient care for area physicians who choose to concentrate on outpatient care. This engagement is expected to improve the relationships between outlying physician practices, the Medical Staff and other services provided at the Hospital; afford effective utilization of the Hospital's equipment and resources, provide consistent service and quality control; provide prompt availability of professional services; simplify scheduling of patients and physician coverage, and enhance the efficient and effective administration of the service. Contractor shall provide inpatient hospitalist services for all unassigned patients and for all patients referred by community physicians of the Hospital's twenty-four (24) hours per day, seven (7) days per week. Contractor agrees to provide onsite coverage as required to attend patients on the hospital medicine service.

A. DUTIES OF CONTRACTOR. In addition to the coverage requirements referenced above, Hospital and Contractor agree that the following shall be required duties of Contractor with respect to the Services:

1. Conduct daily patient rounds beginning by 8:00 a.m. or such other times agreed upon by the Hospital, accompanied by the Hospital's case manager or primary nurse, if available.

2. Complete documentation to meet CMS and all other payer requirements for justifying admissions and continuing stays.

3. Attend interdisciplinary care/case management meetings.

4. Participate in the marketing campaign to be utilized to promote the services of the hospitalist program at Hospital as reasonably requested by the Hospital and as part of the campaign. Contractor Representatives will complete periodic visits to referring physicians to determine their level of satisfaction with the program.

5. Participate in the Code Team.

6. Participate in all quality programs outlined by Hospital that include reduction of inpatient mortality, patient harms, readmissions and improvement in patient outcomes, including, without limitation, HCAHPS and the Physician Quality Reporting System. .

7. Assist Hospital in compliance with all Core Measures. The Joint Commission requirements, and all regulatory agency rules and regulations.

8. Ensure achievement and maintenance of mutually agreed upon quality criteria, including, but not limited to, the following:

   a. Initial assessment of all patients within six (6) hours of admission, and an initial assessment of all patients in the intensive care/critical care unit no later than two (2) hours after admission or sooner if warranted by the patient's condition.

   b. Provide requested consultations within six (6) hours after routine requests, and within two (2) hours for those designated as "urgent request."

   c. Conduct and document medical history and physical examination for each patient within twenty four (24) hours of admission.

9. Assist the Hospital's education department as may be reasonably requested in grand rounds and CME depending upon Contractor's Representatives' availability.

10. Provide the following Program Enhancement services:

    a. Develop and implement evidence-based Order sets and support hospital CPOE initiative.

    b. Regularly review quality indicators with case manager to ensure appropriate care by all of Contractor's Representatives.

c. Discuss and develop protocol changes as needed to ensure quality care.

d. Attend meetings, participate in quality assurance and quality improvement ("QA/QI") activities, and educational functions to evaluate and maintain the quality of care of the hospitalist program.

e. Meet on a bi-monthly basis with the medical director, care manager, hospital administration (as appropriate), emergency department director and other individuals necessary to provide input on enhancements for the betterment of the hospitalist program.

f. Participate in Medical Staff activities including but not limited to attending committee meetings.

g. Ensure timely completion of medical records as required in the Hospital's Medical Staff Bylaws, describing the results of all medical services performed by Contractor's Representatives in the hospitalist program. Upon request, participate in the development of and will, upon implementation of, utilize the Hospital's health information system.

11. Encourage and develop effective working relationships with all other departments, the Medical Staff, the administration and staff within the hospitalist program.

12. Utilize Hospital's Hospitalist Scorecard when developed.

13. Provide Hospital with the following: the daily admission/census reports; anticipated discharge date with disposition updated daily; length of stay by DRG, and physician, on a monthly basis; patient perception index on a monthly basis and any other reports reasonably requested by Hospital.

14. Agree to work on other projects and perform such other duties as mutually agreed upon by both Parties.

B. DUTIES OF CONTRACTOR'S REPRESENTATIVES. Hospital and Contractor agree that the following shall be required duties of each of the Contractor's Representatives assigned to Hospital:

1. Accept direct, inpatient admissions from physicians on Hospital's medical staff utilizing the Service.

2. Timely consult with direct admit patients after admission.

3. Conduct initial patient assessments and admission procedures.

4. Formulate and implement a treatment plan.

5. Schedule and review clinical and diagnostic tests as medically necessary for each patient.

6. Provide timely and regular reports to primary care physicians and family members, if applicable, regarding all aspects of the patient's medical condition and course of treatment.

7. Conduct rounds daily as necessary for the acuity of the patient's conditions.

8. Respond to in-house codes and urgent requests for assistance from the Rapid Response Team.

9. Coordinate and integrate specialty and subspecialty consultations.

10. Coordinate patient transfers to and from the intensive care unit, medical/surgical unit, skilled nursing facility or home to provide continuity of cart.

11. Discharge the patient back to the care of the primary care physician, if applicable.

12. Arrive at Hospital within time frame required by the Hospital's Medical Staff bylaws, as amended from time to time, when emergent care is needed for critically ill patients.

13. Provide emergency room on call coverage as needed for primary care physicians utilizing the Services and accept all unassigned patients that present.

14. At the request of members of the Medical Staff, provide inpatient consultations or co-management services.

15. Participate in all quality programs outlined by Hospital that include reduction of inpatient mortality, patient harms, readmissions and improvement in patient outcomes and be an active member on committees of the Medical Staff.

16. Provide emergent care for all inpatients regardless of the attending physician.

17. Consult with emergency department physicians as needed either by phone or on site, to assist with evaluations, transfers, and/or admission of Program Patients or unassigned patients accepted by Contractor.

18. Meet all behavior and professional conduct requirements of the Medical Staff bylaws and rules and regulations.

19. Meet all other requirement of the medical staff bylaws, rules, and regulations including appropriate documentation in the medical record and signing final medical record within required timeframes.

20. Coordinate with discharge planning and social work departments as appropriate for each patient.

21. Inform Hospital and/or the primary care physician of any problems identified after a patient is discharged, if aware.

22. Be responsible for arranging post-acute care follow-up for all patients discharged from the hospitalist program and completing all required forms to facilitate transition of care for these patients to the respective post-acute setting.

23. Complete patient discharge summaries as required by the Medical Staff bylaws of the Hospital.

24. Provide onsite physician supervision for hospital medicine services rendered at the Hospital in order to meet supervision requirements under Medicare, to the extent appropriate based upon Contractor Representatives' privileges and experience.

25. Work cooperatively with all Medical Staff and Hospital personnel.

26. Maintain ICU/CCU privileges and ventilator management privileges.

C. MEDICAL DIRECTOR. Contractor shall designate one physician to serve as the Medical Director ("Medical Director") of the Services for each Hospital.

1. Program Operations

a. Serve as the professional liaison of the physicians associated with the hospitalist program and will work closely with Hospital administration to solve program problems.

b. Work to improve program efficiency, help create a professional atmosphere conducive to a high standard of patient care, investigate patient complaints and incident reports, and interact with the Hospital Medical Staff and related hierarchy as needed.

c. Work with Hospital to revise existing policies and develop new policies as the need arises, and develop necessary clinical protocols.

d. Work closely with the case manager of the hospitalist program to help ensure a high standard of patient care, to help ensure that proper patient care protocols are developed and maintained, to help coordinate work flow with the other ancillary departments within the Hospital, and to assist in the coordination of case management services.

e. Participate in Hospital committee meetings, including but not limited to those related to performance improvement and utilization review.

f. Assist in the development and implementation of a program to educate Medical Staff physicians on the benefits of the Services to their patients and the community served by the Hospital.

g. Assist the Hospital in evaluating the quality of patient care provided by Contractor's Representatives, including participating in peer review activities as needed.

h. Work very closely with the emergency department Medical Director to ensure coordination of care for all admitted patients and timely transfer to the inpatient unit.

2. Patient Care Activities

a. Serve as an advisor to the Hospital's quality improvement program as it relates to hospitalist patients.

b. Periodically review hospitalist patient records to ensure the documentation, treatment, treatment plans, consults and tests ordered are appropriate.

c. Participate in peer review activities as requested by the Hospital.

III **COVERAGE**. In accordance with the terms of this Agreement, Contractor shall:

A. Ensure and deliver to the Hospital continuous, twenty-four (24) hour hospitalist coverage, seven (7) days per week, fifty-two (52) weeks per year.

B. In order to provide the comprehensive coverage set forth above and meet patient needs, Contractor shall provide to Hospital qualified physician coverage ("Qualified Physician"), and if applicable, physician extender or Allied Health Practitioner coverage ("Allied Health Practitioner").

C. Any adjustments to staffing requirements and hours of coverage shall be agreed upon by Hospital and Contractor in writing.

IV. **QUALITY CRITERIA**. Hospital and Contractor shall mutually agree upon a Hospitalist Physician Scorecard which shall be set forth in Schedule 2.B. Beginning on the Effective Date, Contractor shall cause Contractor's Representatives to meet the quality criteria set forth in the Hospitalist Physician Scorecard (the "Hospitalist Physician Scorecard") for the Hospital which shall be effective as of the date that the Hospitalist Physician Scorecard is agreed upon by the Parties, which shall be materially similar to the document attached hereto and incorporated into this Agreement by reference as Schedule 2.B, and which may be amended from time to time by mutual agreement of the Parties. Any amendments to the Hospitalist Physician Scorecard shall be implemented prior to the commencement of a new contract year, and shall be based on the prior year's trends and achievements, and shall be mutually agreed upon. The Parties further agree to use their best commercially reasonable efforts to negotiate the Hospitalist Physician Scorecard to be applicable hereunder within sixty (60) days of the Effective Date. Each of the quality criteria in the Hospitalist Physician Scorecard will be monitored quarterly during the Term of the Agreement, and Hospital will deliver the results of such assessment to Contractor thirty (30) days from the assessed quarter end. The Parties acknowledge and agree that targets identified for each of the quality criteria meet only the minimum level of performance required from Contractor and Contractor's Representatives which shall be an annual score of sixty (60) points (the "Minimum Score").Hospital shall report to Contractor monthly on all performance metrics no later than the fifteenth (15'11) day of the following month, with the exception of those metrics which are reported on a quarterly (Core Measures), semi-annually (Patient Satisfaction) or annual basis, which shall be within five (5) days after the quarterly, semi-annual or annual publication.

ANESTHESIA SERVICES AGREEMENT

TERMS AND CONDITIONS

This Schedule 3 ("Schedule 3") is attached to and made a part of the Agreement. Definitions contained herein shall have the same meaning as contained in the Agreement. Should a conflict arise between the terms contained in the Agreement and this Schedule 3, then the terms of this Schedule 3 shall control.

Contractor will be responsible for carrying out the duties identified throughout this Schedule 3 and, additionally, the duties defined hereunder (collectively referred to as the "Anesthesia Services"), plus any Schedules identified below, each of which constitute an integral part of this Agreement:

SCHEDULE	TITLE
3.A	Services, Coverage, and Quality Criteria – Anesthesia Services
3.B	Anesthesia Scorecard

SERVICES, COVERAGE, AND QUALITY CRITERIA - ANESTHESIA SERVICES

I. **DESCRIPTION OF SERVICES AND COVERAGE.** Hospital is engaging Contractor to enter into an exclusive relationship for professional anesthesia services (the "Anesthesia Services") which will best facilitate efficient, effective and quality medical care for patients receiving medical treatment at Hospital who require Anesthesia Services. This engagement is expected to improve the Anesthesia Services provided at Hospital; afford effective utilization of Hospital's equipment and resources, provide consistent service and quality control; provide prompt availability of professional services; simplify scheduling of physician coverage, and enhance the efficient and effective administration of the service. Contractor's Representatives shall, within Hospital, practice exclusively according to the Anesthesia Services required herein and provide to all patients the professional Anesthesia Services that are medically necessary and within the capabilities of Contractor and Contractor's Representatives.

A. COVERAGE. In accordance with the terms of this Agreement, Contractor shall provide coverage as detailed in this section.

1. Staffing. In order to provide and deliver continuous coverage via onsite coverage and on-call coverage (as set forth in Section I.A.2, below), twenty-four (24) hour, seven (7) days per week, fifty-two (52) weeks per year and meet patient needs, Contractor shall provide coverage with an onsite daily minimum of ( ) Physicians and ( ) CRNAs.

2. Days and Hours coverage shall be provided: **HOSPITAL-SPECIFIC COVERAGE REQUIREMENTS TO BE ADDED**

3. Contractor's Representatives providing "on call coverage" for the Hospital shall arrive and be prepared to deliver direct patient care within thirty (30) minutes of receiving notice of need for Anesthesia Services, or as otherwise required by Hospital's Medical Staff Bylaws.

4. Either Party may request reasonable changes to call coverage requirements or onsite hours of staffing. Hospital and Contractor agree to meet within thirty (30) days of request to review, and discuss, with resolution and implementation date if applicable, of agreed upon changes within ninety (90) days of meeting. Any changes to staffing requirements or hours of coverage with financial implications shall be reflected in the form of an amendment to this Agreement that is executed by both Parties. Nothing contained in the section shall preclude Contractor from optimizing Contractor's staff so long as the coverage requirements set forth in Section I.A.1., above, is not affected.

B. DUTIES OF CONTRACTOR. In addition to the coverage requirements referenced above, Hospital and Contractor agree that the following shall be required duties of Contractor with respect to the Anesthesia Services:

1. Assist in efforts to educate the Medical Staff and Hospital employees about the Anesthesia Services, as requested.
2. Participate in all quality programs outlined by Hospital that include reduction of patient harms and improvement in patient outcomes that relate to the Anesthesia Services. Contractor will, on Contractor's own behalf and in support of Hospital's efforts, use commercially reasonable efforts to optimize HCAHPS, PQRS, MACRA, and other value-based reimbursement.
3. Assist Hospital in compliance with all Core Measures, Joint Commission requirements, CMS Conditions of Participation, and all other applicable regulatory agency rules and regulations.
4. Develop and provide educational and training programs related to the Anesthesia Services for medical personnel at Hospital, including, but not limited to, students, interns, residents and staff as well as Contractor's employees, subcontractors and agents.
5. Provide the following enhancement services:

    a. Develop and implement clinical protocols and care plans that are consistent with local and national standards and other efficiency tools for the Anesthesia Services.
    b. Regularly review quality indicators with appropriate Hospital personnel to ensure appropriate care by all of Contractor's Representatives.
    c. Discuss and develop protocol changes as needed to equal or better local area and Hospital comparatives.

d. Participate in quality improvement ("QA/QI") activities and attend meetings and educational functions to evaluate and maintain the quality of care of Anesthesia Services.
e. Communicate on at least a monthly basis with applicable medical directors, Surgical Services Director, Hospital Administration (as appropriate), and other individuals necessary to provide input on enhancements for the betterment of Anesthesia Services at Hospital.
f. Participate in Medical Staff activities including, but not limited to, regularly attending committee meetings.
g. Ensure timely dictation of results of all Anesthesia Services performed at Hospital.
h. Encourage and develop effective working relationships with all other departments, the Medical Staff and the administration and staff associated with the Anesthesia Services.
i. Oversee and review for appropriateness and outcomes all moderate sedation services performed at Hospital.

6. Work on other related projects and perform such other related duties as mutually agreed upon by the Parties.

C. DUTIES OF CONTRACTOR'S REPRESENTATIVES. Hospital and Contractor agree that the following shall be required duties of Contractor's Representatives:

1. Provide Anesthesia Services as requested for Hospital's patients requiring Anesthesia Services.
2. Participate in all quality programs outlined by Hospital that include reduction of patient harms and improvement in patient outcomes.
3. Be an active member on Hospital's medical staff committees.
4. Consult with other medical staff physicians as needed.
5. Meet all behavior and professional conduct requirements of the Bylaws and rules and regulations.
6. Meet all other requirement of the Bylaws, rules and regulations, including appropriate documentation in the medical record within required timeframes.
7. Work cooperatively with all medical staff and Hospital personnel.

D. MEDICAL DIRECTOR. Contractor shall designate one (1) Physician, agreed upon by Hospital CEO, to serve as Medical Director ("Medical Director") of the Anesthesia Services. The Medical Director shall regularly communicate with Hospital's Chief Executive Officer and Surgical Services Director regarding his/her oversight of clinical performance, coordination of care issues and other necessary administrative duties. The Medical Director will devote the required hours of services per month to the performance of the administrative duties listed below that are commensurate with the budgeted compensation for the same services included in the subsidy associated with this Agreement in order to fulfill all applicable legal or operational requirements. The expectations and obligations for the Medical Director include but are not limited to the following:

1. Program Operations.

a. Through exemplary leadership, Medical Director will work towards creating and maintaining a professional atmosphere conducive to a high standard of patient care, providing collaborative support of perioperative team, actively participating in ongoing improvements towards program efficiency, investigating patient complaints and incident reports, and interacting with the medical staff and medical staff hierarchy as needed.
b. Serve as the professional liaison for the providers associated with the Anesthesia Services and work closely with Hospital administration to solve program problems.
c. Work with Hospital to revise existing policies and develop new policies as the need arises.
d. Work closely with the Director of Hospital's Surgical Services department to: ensure a high standard of patient care by maintaining needed patient care protocols, helping coordinate operating room efficiencies, coordinating work flow with the other ancillary departments within Hospital and assisting in the coordination all perioperative services.
e. Regularly participate in Hospital committee meetings, including, but not limited to, those related to performance improvement and utilization review.
f. Assist in the development and implementation of a program to educate medical staff physicians on the benefits of the Anesthesia Services to their patients and the community served by Hospital.

g. Assist Hospital in evaluating the quality of patient care provided by Contractor's Representatives, including participating in peer review activities as needed.

h. Develop and provide educational and training programs related to the Anesthesia Services for personnel at Hospital, including, but not limited to, students, interns, residents and staff.

2. Patient Care Activities.

a. Serve as an advisor to Hospital's quality improvement program as it relates to Hospital's patients requiring Anesthesia Services.

b. Periodically review patient records to ensure that the documentation, treatment, treatment plans, consults and tests ordered meet the appropriate standard of care.

c. Participate in peer review activities as requested by Hospital.

3. Administrative Functions.

a. Oversee the administration and management of Anesthesia Services and the Agreement with Hospital.

b. Ensure appropriate coverage for Hospital by scheduling coverage of the Anesthesia Services on a monthly basis, including on-site coverage, as described above in Section I.A.2.

c. Facilitate an evaluation process as it relates to the performance of all of Contractor's Representatives who treat patients at Hospital. The performance evaluation may include input from other physicians, hospital personnel, etc. Performance shall be evaluated on the basis of professional attitude, professional capabilities, patient relations attitude and overall effectiveness as determined appropriate by Contractor and Hospital.

II. **QUALITY CRITERIA.** Contractor shall cause Contractor's Representatives to meet the quality criteria set forth in the Anesthesia Scorecard (the "Anesthesia Scorecard") for Hospital, which shall be materially similar to the document set forth in Schedule 1.B, and which may be amended from time to time by Hospital subject to Contractor's reasonable approval. The Parties agree to use their best commercially reasonable efforts to negotiate the Anesthesia Scorecard to be applicable hereunder within ninety (90) days of the Effective Date of this Agreement. If not finalized within the ninety (90) day period, the measures as reflected will become the agreed-upon measures by default, with targets based upon Company's facilities of similar demographics. Each of the quality criteria in the Anesthesia Scorecard will be monitored quarterly during the Term of the Agreement, and Hospital will deliver the results of such assessment to Contractor thirty (30) days from the assessed quarter end. The Parties acknowledge and agree that targets identified for each of the quality criteria meet only the minimum level of performance required from Contractor and Contractor's Representatives, and that an annual overall score of sixty (60) points (the "Minimum Score") must be maintained. In the event Hospital fails to report any performance metric as required hereunder, Contractor shall be deemed to have fully met any such unreported metric that is not reported by Contractor by Hospital.

FIRST AMENDMENT TO PROFESSIONAL SERVICES AGREEMENT

This First Amendment to Professional Services Agreement (the "First Amendment") is hereby entered into and made effective upon full execution (the "Effective Date"), by and between RCHP-Ottumwa, LLC d/b/a Ottumwa Regional Health Center ("Facility") and Southeastern Emergency Physicians, LLC ("Contractor"). **[NOTE: The Effective Date cannot be a date that occurs before the dates that both the Facility and Contractor signed the First Amendment. If the First Amendment is submitted for approval with an Effective Date that occurs before the last party (The Facility or Contractor) signed the First Amendment, the Effective Date will automatically be changed to the date that the Contractor or Facility signed, whichever is later. Contractor will not be compensated for services provided to the Facility prior to the Effective Date.]**

WHEREAS, Facility and Contractor entered into that certain Professional Services Agreement regarding emergency department Services, effective as of March 1, 2019, which is listed in the MediTract contract database as # 62460.68803C (the "Agreement");

WHEREAS, the parties desire to amend the Agreement to add certain medical director services for Facility's Mobile Intensive Care Services, as more particularly described below; and

WHEREAS, the parties hereby ratify and affirm that this First Amendment is not made to induce the value or volume of referrals made to the Facility by the Contractor or any of its physician affiliates or other potential referral sources;

NOW THEREFORE, the Agreement is hereby amended as of the Effective Date of this First Amendment as follows:

1. Amendments

   a. DESCRIPTION OF SERVICES. Section 1 of Schedule 1.A shall be amended by adding the following new Section I.D

      D. MEDICAL DIRECTOR – OTTUMWA REGIONAL MOBILE INSTENSIVE CARE SERVICES ("ORMICS") ("ORMICS Medical Director"). Contractor will designate one physician, who is agreeable to Facility, to serve as the ORMICS Medical Director jointly covering the ED and ambulance services, or one Medical Director over each service separately who works in tandem with the ED Medical Director and ED Service line Director. ORMICS Medical Director will perform the following duties:

         1. Perform weekly review of ORMICS Ambulance Calls.
         2. Attend quarterly Wapello County EMS Meetings.
         3. Perform monthly review of Ottumwa Fire Department and County EMS First Responder run sheets and CQI audits
         4. Perform review and revision of ORMICS, Ottumwa Fire Department and County EMS First Responder protocols and assurance of compliance with Iowa EMS Systems Standards.
         5. Attend annually, or as needed, meetings with Iowa EMS Bureau Chief.
         6. Other duties as reasonably requested.

   b. USE OF FACILITY LEASED APARTMENT. Facility may from time to time and in its sole discretion permit Contractor to use an apartment leased by Facility as a location for Contractor's Representatives to reside while providing Services under this Agreement.

Facility will charge Contractor a per diem rate that reflects Facility's cost to lease the space.

2. No Other Changes

Except as specifically amended herein, all terms and conditions of the Agreement shall remain in full force and effect, except as otherwise amended in writing.

IN WITNESS WHEREOF, this First Amendment is executed by Facility and Contractor as of the date and year first above written, and the parties hereby certify for and on behalf of each of themselves that:

Each of the undersigned hereby certifies:

1) As of the date of the signatures below, this Amendment and related Agreement constitutes a binding agreement as of the Effective Date of this Amendment and may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument;

2) The compensation arrangement is established at fair market value for the services to be rendered and this Agreement is for services that are needed and reasonable in scope;

3) This Agreement supersedes all prior agreements, contracts and understandings, whether written or otherwise, between the parties relating to the subject matter hereof and does not condition the payment or the arrangement on the volume or value of any referrals or other business generated between the parties;

4) Until the Agreement is listed in Facility's Master Contract Database to the extent required by 42 C.F.R. § 411.357(d)(1)(ii), no payment shall be made nor services accepted under this Agreement; and

5) Upon the Effective Date of this Agreement, the parties agree to ensure that no payments are made and no services rendered beyond the terms of this Agreement, or the terms of other company approved agreements between the parties.

Revised 12.2018

THIS EXCLUSIVE PROFESSIONAL SERVICES AGREEMENT (the "Agreement") is hereby entered into by and between Hospital and Contractor who may hereafter be referred to individually as a "Party" and collectively as the "Parties" in connection with the Exclusive Emergency Department and Hospitalist Services Master Agreement (the "Master Agreement") dated the 1st day of January, 2018, by and between LifePoint Corporate Services, General Partnership ("Company") and Contractor.

RECITALS

WHEREAS, Hospital has determined that coverage by an exclusive group of providers based at Hospital is necessary to meet the needs of patients at Hospital; and

WHEREAS, Hospital has determined that the proper, orderly and efficient delivery of emergency department services (the "ED Services") and/or hospitalist services (the "HM Services") at the Hospital (ED Services and HM Services are collectively known as the "Services") can be accomplished best by entering into an exclusive coverage arrangement; and

WHEREAS, Contractor will, at its expense, arrange coverage for Hospital through licensed physicians (individually referred to as "Physician" and collectively referred to as "Physicians"), and certified nurse practitioners or physician assistants (individually referred to as "Allied Health Practitioner" and collectively referred to as "Allied Health Practitioners") (Physicians and Allied Health Practitioners collectively referred to as "Contractor's Representatives") authorized and licensed to practice medicine where Hospital is located (the "State"), who are qualified to provide the services as defined in this Agreement; and

WHEREAS, Hospital desires to contract with Contractor as set forth herein to obtain management services of Contractor with respect to the professional component of services provided at the Hospitals so as to permit the development and operation of certain departments at Hospital, and

WHEREAS, this Agreement is entered into for the purpose of defining the Parties' respective rights and responsibilities; and

WHEREAS, the terms of the Master Agreement are incorporated herein as though fully repeated verbatim.

NOW, THEREFORE, in consideration of the premises and mutual covenants and agreements herein set forth, the Parties hereto agree as follows:

I. CONTRACTOR'S REPRESENTATIONS.

A Organization. Contractor represents and warrants that it is a corporation or limited liability company duly organized and validly existing under the laws of its state of incorporation and has the corporate power and authority to execute and deliver this Agreement, and to carry out its provisions.

B. Services. Contractor shall (through appropriately licensed Contractor's Representatives) provide professional services needed at the Hospital, including but not limited to those services described as set forth in any attachment(s) defined as Professional Service Agreement(s) (the "Services") attached hereto.

C. Professional Qualifications. Contractor shall ensure that all Contractor's Representatives utilized to provide Services under this Agreement continuously have and maintain the following credentials:

1. Contractor's Representatives will be qualified by training and experience to provide the Services; and

2. The Contractor's Representatives assigned to Hospital shall have the Medical Staff or allied health privileges required to provide Services under this Agreement in accordance with the applicable requirements and Medical Staff bylaws, and each of Contractor's Representatives shall comply with Hospital policies and procedures, Medical Staff bylaws, and rules and regulations for Hospital.

D. Approval of Contractor's Representatives and Substitutes.

1. Contractor agrees it shall not use any Physician or Allied Health Professional to provide the Services under this Agreement to Hospital without first obtaining appropriate medical staff or allied health privileges and other approvals required by such Hospital's Medical Staff bylaws. Contractor agrees that all of Contractor's Representatives are subject to continuing approval of Hospital.

2. Contractor shall provide a substitute for any of Contractor's Representatives who are unable to provide services required under this Agreement. As a condition of providing services under this Agreement, any such substitute shall satisfy all qualification requirements applicable to the Contractor's Representatives.

3. Contractor agrees to cause each of Contractor's Representatives and substitutes to comply with his or her assigned Hospital policies and procedures, Medical Staff bylaws and rules and regulations. Failure to do so shall be grounds for Hospital to request Contractor to immediately remove the Contractor's Representative or substitute as described under Section II below. Hospital shall supply a copy of its Medical Staff Bylaws to Contractor within thirty (30) days of execution of this Agreement (if not already supplied), and shall supply an updated version upon any revision.

E. Compliance.

1. Contractor and Contractor's Representatives shall perform all Services under this Agreement in accordance with any and all regulatory and accreditation standards applicable to Hospital and the Services, including, without limitation, those requirements imposed by the Medicare Conditions of Participation, The Joint Commission accreditation standards, the AMA Code of Ethics, the rules and regulations of the Board of Medicine in the State, the Emergency Medical Treatment and Active Labor Act ("EMTALA"), the Federal Anti-Kickback and Stark statutes and regulations, federal and state regulations governing the security and privacy of health information, and other applicable state and federal regulations, all as amended from time to time.

2. Contractor represents and warrants that as of the date of this Agreement: (i) neither it nor any Contractor's Representative is excluded, debarred or otherwise ineligible to participate in Medicare, Medicaid or any other federal or state healthcare programs or in any federal or state procurement or non-procurement programs; and (ii) neither it nor any Contractor's Representative has been convicted of a criminal offense that could lead to such debarment or exclusion. Contractor shall immediately remove from service hereunder any Contractor's Representative for whom this representation and warranty is no longer true and shall so inform the Hospital to which Contractor's Representative is assigned. In the event this representation and warranty becomes untrue as to Contractor, Hospital may deem this Agreement terminated immediately. Contractor agrees this is an ongoing representation and will immediately notify Hospital in the event the foregoing representation and warranty is no longer completely accurate. Contractor acknowledges and agrees this is a material term of the Agreement and any breach or nonfulfillment of same will entitle the Hospital to terminate this Agreement immediately.

F. Quality Programs. Contractor and Contractor's Representatives shall furnish any and all information, records and other documents related to Contractor's service at the Hospital, which Hospital may reasonably request in furtherance of quality assurance, utilization review, risk management, and any other plans and/or programs adopted by Hospital to assess and improve the quality and efficiency of the Hospital's services. As reasonably requested, Contractor and Contractor's Representatives shall participate in one or more of such plans and/or programs, including participating in training on any such program at Hospital's request.

G. Medical Records for All Patients Evaluated and/or Treated by Contractor's Representatives. Unless otherwise specifically agreed to by the Parties, all patients evaluated and/or treated by Contractor's Representatives shall have a medical record created and a charge assigned, including all direct admissions undertaken by Contractor's Representatives. Contractor shall prepare timely, complete and accurate medical records in accordance with Hospital's policies and all professional standards applicable to medical records documentation. All such records shall be entered into Hospital's medical records system, including full use of Computerized Physician Order Entry. Medical records for patients evaluated and/or treated by Contractor's Representatives in Hospital shall at all times remain the property of Hospital.

II. **REMOVAL OF PHYSICIANS PROVIDED BY CONTRACTOR.** Contractor's Representatives shall be removed at the request of Hospital to which such Contractor's Representative is assigned, as follows:

A. For Cause. Upon Hospital's written notice to Contractor to remove any of Contractor's Representatives for cause, Contractor shall remove any of Contractor's Representatives, with or without cause, Contractor shall remove any such Contractor's Representatives immediately from providing Services. In that event, Contractor shall immediately provide a qualified replacement for Contractor's Representative. If Contractor fails to obtain alternative coverage within one hundred twenty (120) days or a longer time frame that is acceptable to Hospital, then, without limiting any other remedies that Hospital may have under this Agreement or applicable law, Hospital may, following written notice to Contractor, obtain appropriate alternative coverage at Contractor's expense. If Hospital is requesting removal of a Contractor's Representative for "cause", Hospital shall briefly describe the "cause" to Contractor in writing. If Hospital does not provide a description of the "cause" for the requested removal, then such removal will be deemed a "without cause"

removal for purposes of Section X.A hereof. For-cause removals may include, but are not limited to, a Contractor's Representative who: (1) is convicted of a crime other than a minor traffic violation; (2) has a guardian or trustee of its person or estate appointed by a court of competent jurisdiction; (3) becomes disabled so as to be unable to perform the duties required by this Agreement; (4) fails to maintain professional liability insurance required by this Agreement; (5) has his/her license(s) and/or privileges required to perform the respective Services contemplated by this Agreement either suspended, revoked, or otherwise limited; (6) is debarred, sanctioned, or excluded by a state or federal health care program; (7) if applicable, has his/her federal and/or state registration to prescribe and dispense controlled substances suspended, revoked, or otherwise limited; (8) fails to comply with any of the terms and conditions of this Agreement after being given notice of that failure and a reasonable opportunity to comply; (9) acts in a manner that Hospital determines to be detrimental to patient safety or negatively affects Hospital's reputation or operations; or (10) fails to comply with any policy or lawful directive of the Hospital. The parties agree that Hospital's requested removal of a Contractor's Representative shall have no impact on Contractor's relationship with the affected Contractor's Representative, and that any subsequent decision by Contractor to terminate its relationship with such Contractor's Representative shall be at the sole discretion of Contractor. Failure of Contractor to remove any such Contractor's Representatives pursuant to this Section shall be deemed a material breach of this Agreement, and Hospital may immediately terminate this Agreement.

B. Effect on Contractor's Representatives Medical Staff Appointment and Clinical Privileges. Because this is an exclusive Agreement, as more particularly described in Section IV, the medical staff appointment and clinical privileges of all Contractor's Representatives providing services to Hospital shall be incident to and coterminous with this Agreement, and, upon termination or expiration of this Agreement or upon removal of Contractor's Representative by Contractor, the appointment and clinical privileges of the Contractor's Representative shall automatically terminate except as otherwise provided below. Notwithstanding the foregoing, a Contractor Representative's Medical Staff Appointment and Clinical Privileges will not automatically terminate upon termination or expiration of this Agreement unless a continuation of such privileges, in Hospital's reasonable judgment, would be inconsistent with Hospital's ability to contract exclusively with a successor provider of Services. Any rights that the Contractor's Representatives may have to any hearing or appeal procedures prior to termination of Medical Staff Appointment or Clinical Privileges, pursuant to the bylaws or policies of a Hospital or its Medical Staff, or any other state or federal statute, regulation or judicial decision are hereby waived with respect to any termination of Medical Staff Appointment or Clinical Privileges resulting from the items listed herein. Unless otherwise required by law, no reporting to any third party, such as the National Practitioner Data Bank, shall take place for any termination hereunder for non-clinical or non-competency issues. Contractor will require each Contractor's Representative providing Services under this Agreement to execute a separate Contractor Representative Agreement Regarding Medical Staff Membership and Privileges in substantially the same form as ADDENDUM 1, attached hereto and incorporated by reference into this Agreement. If Contractor has a substantially similar provision in its contracts with its Physician and Allied Health Practitioners, Contractor will not be required to comply with the requirement in the foregoing sentence.

III. OBLIGATIONS OF HOSPITAL.

A. Hospital Billing. Hospital shall be responsible for, and solely entitled to, billing and collection of all Hospital services rendered to the patients to whom the Services are provided and non-physician provider services performed for the general benefit of its patients, except those for professional services rendered by Contractor's Representatives who are either contracting with or employed by Contractor.

B. Supplies, Equipment, Etc. Hospital will make available the space, utilities, equipment, supplies (to include drugs and narcotics) and services (including housekeeping and laundry) reasonably necessary for the proper operation of the Services. Hospital will maintain its equipment in good order and repair.

C. Facilities and Personnel. Hospital shall provide adequate facilities and competent personnel for the operation of the Services. Hospital shall provide other reasonable support services necessary for proper operation of the Services (including scheduling non-Contractor's Representative personnel, preparing and filing of patient treatment consents and providing other services which are reasonable and mutually agreed upon). Hospital shall provide an adequate medical records system for use in provision of the Services.

D. Transcription. Hospital will provide appropriate dictation, transcription, and medical record services to Contractor for use by Contractor's Representatives for documentation made by Contractor's Representatives in Hospital medical record.

E. Medical Staff On Call. Hospital shall have available specialty physicians on-call in accordance with its Medical Staff bylaws.

F. Materials to Patients. Hospital will, in good faith, attempt to distribute to patients to whom the Services are provided materials describing the separate billing relationship between the patients and Contractor. Such materials will be supplied to Hospital by Contractor on a form acceptable to Hospital.

G. Compliance. Hospital represents and warrants that as of the date of this Agreement. (i) Hospital is not excluded, debarred or otherwise ineligible to participate in Medicare, Medicaid or any other federal or state healthcare programs or in any federal or state procurement or non-procurement programs; and (ii) Hospital has not been convicted of a criminal offense that could lead to such debarment or exclusion. In the event this representation and warranty becomes untrue as to Hospital, Contractor may deem this Agreement terminated immediately. Hospital agrees this is an ongoing representation and will immediately notify Contractor in the event the foregoing representation and warranty is no longer completely accurate. Hospital acknowledges and agrees this is a material term of the Agreement and any breach or nonfulfillment of same will entitle the Contractor to terminate this Agreement immediately.

H. Billing Information. Hospital shall supply Contractor with information necessary for Contractor to bill patients for services rendered by the Contractor's Representatives. In order to allow Contractor to accurately and timely bill for professional services provided by Contractor Representatives hereunder, Hospital agrees to provide Contractor, with either: (i) an electronic file transfer containing patient medical records and related information, including, but not limited to, physician transcription, physician notes, insurance cards and demographic information necessary to conduct physician billing ("Billing Documents"), or (ii) the requested assistance necessary to obtain legible paper copies of Billing Documents to forward to Contractor, which assistance shall include, but not be limited to:

1. Hospital will locate any missing Department records and forward such missing records to Contractor within three (3) working days.

2. Hospital will use commercially reasonable efforts to arrange for patient signatures on forms noting patient's responsibility for paying Contractor's billings.

3. Hospital shall bear the expense of providing one copy of relevant patient medical records to be sent to Contractor.

4. Hospital will comply within three (3) working days with other reasonable requests for information or record handling (including requests regarding insurance) by Contractor.

In the event Hospital has implemented an Electronic Medical Records ("EMR"), Contractor will electronically transmit Billing Documents from Hospital to Contractor. In such event, Hospital will work cooperatively with Contractor and Contractor's Information Technology department to facilitate the timely and accurate flow of Billing Documents to Contractor. This information will be transmitted from Hospital to Contractor in a secure HIPAA compliant electronic format on a daily basis. The Billing Documents transmitted in this fashion will include, but not be limited to: ADT Registration information (patient demographics, payor information, and disposition), event times, and to the extent possible patient clinical record.

Each Hospital shall assist Contractor in obtaining patient signatures on assignment of insurance benefits and other reasonably appropriate forms supplied to the respective Hospital by Contractor. Any collection efforts by the Hospitals and Contractor will comply with all federal and state laws and regulations.

IV. EXCLUSIVITY

A. Hospital concludes that an exclusive relationship for the Services will best facilitate the delivery of efficient, effective and quality patient care. Such a relationship is expected to enhance patient services provided by Contractor and the Hospital, improve the relationships between Contractor, the Hospital's Medical Staffs and Hospital, afford effective utilization of the Hospital's equipment, provide consistent service and quality control, provide prompt availability of professional services, simplify scheduling of patients and physician coverage, enhance the efficient and effective administration of the Services – all of which enhance the quality of patient care.

B. During the Term of this Agreement, Contractor shall be the exclusive provider of the Services described in this Agreement, and therefore, Hospital will ensure does not extend medical staff privileges for the practice of the Services at Hospital to any provider not employed by or under contract with Contractor. However, nothing in the preceding sentence shall be construed to limit the rights of community-based physicians with medical staff privileges at the Hospital to provide care for their patients while they are admitted to the same.

V. TERM AND TERMINATION

A. This Agreement shall be effective as of the Effective Date, beginning at 12:00 a.m. in the applicable time zone of the Hospital and shall continue for the Initial Term. **[NOTE: The Effective Date cannot be a date that occurs before the dates that both the Hospital and Contractor signed the Agreement. If the Agreement is submitted for approval with an Effective Date that occurs before the last party (The Hospital or Contractor) signed the Agreement, the Effective Date will automatically be changed to the date that the Contractor or Hospital signed, whichever is later. Contractor will not be compensated for services provided to the Hospital prior to the Effective Date.]** Notwithstanding the foregoing, this Agreement will automatically renew for additional twelve (12) month periods following the expiration of the Initial Term, with each such additional twelve (12) month period to be called an "Additional Term", until (i) such time as a new Agreement is executed by the Parties, or (ii) this Agreement is otherwise terminated as provided herein. For purposes of this Agreement, "Term" shall mean the Initial Term and any Additional Term.

B. Either Party may terminate this Agreement at any time in the event the other Party engages in an act or omission constituting a material breach of any term or condition of this Agreement. The Party electing to terminate this Agreement shall provide the breaching Party with written notice specifying the nature of the breach. If a dispute arises regarding the materiality of a breach, then both Parties shall submit the issue to a mutually agreed upon arbitrator pursuant to Section VIII of this Agreement for resolution of the dispute. The breaching Party shall then have twenty (20) days from the date of the notice or twenty (20) days from the date of the arbitrator's decision in which to remedy the breach and conform its conduct to this Agreement. If such corrective action is not taken within the time specified, this Agreement shall terminate at the end of the twenty (20) day period without further notice or demand, provided, however, that Hospital may not terminate this Agreement if Contractor is diligently pursuing the remedy of the breach.

C. Either Party may terminate this Agreement immediately as specified in Sections I.E.2 and III.G. of this Agreement.

D. Either Party may terminate this Agreement immediately if either Party makes a general assignment for the benefit of creditors, or files a petition for relief in bankruptcy or under similar laws for the protection of debtors, or upon the initiation of such proceedings against either Party if the same are not dismissed within forty-five (45) days of service;

E. Either Party may terminate this Agreement immediately if any of the following events occur with regard to Hospital:

1. Loss of Hospital's certification as a Medicare provider;

2. Closure of Hospital;

3. Contractor's general assignment for the benefit of creditors, Contractor's petition for relief in bankruptcy or under similar laws for the protection of debtors, or upon the initiation of such proceedings against Contractor if the same are not dismissed within forty-five (45) days of service; or

4. Hospital's general assignment for the benefit of creditors, or Hospital's petition for relief in bankruptcy or under similar laws for the protection of debtors, or upon the initiation of such proceedings against Hospital if the same are not dismissed within forty-five (45) days of service; or

5. Beginning on the Effective Date and for the Term of the Agreement, Contractor's failure to achieve an overall minimum score of sixty (60) points on the "ED Physician Scorecard" or "Hospitalist Physician Scorecard", if applicable (as may be further defined in this Agreement) at Hospital for any two consecutive quarters during the Term of this Agreement or any renewal period thereof. Contractor, however, shall have the right, at its own expense, to review and audit any performance metric contained in the ED Physician Scorecard or Hospitalist Physician Scorecard, including all underlying data. Hospital agrees to resolve any discrepancy found during an audit performed by Contractor to the Parties' mutual satisfaction. If a dispute arises or the Parties are unable to resolve the discrepancy to their mutual satisfaction, then both Parties shall submit the issue to a mutually agreed upon arbitrator pursuant to Section VIII of this Agreement for resolution of the dispute.

F. This Agreement shall terminate upon termination of the Master Agreement (as defined on the cover page of this Agreement).

G. Except as provided herein, upon any termination of this Agreement, neither Party shall have further rights against, or obligations to, the other Party except with respect to any rights or obligations accruing prior to the date and time of termination and any obligations, promises or agreements which expressly extend beyond the termination, including but not limited to the terms herein related to insurance coverage, restrictive covenants, dispute resolution and confidentiality provisions. Contractor shall have reasonable access to any Hospital's information and records pursuant to Section III (H) of the Agreement for a period of six months after termination of this Agreement for Contractor's billing, risk management and/or quality/peer review purposes.

VI. RISK MANAGEMENT

A. Required Risk Reduction Education. As fair market value consideration, Hospital may reimburse or pay all actual expenses associated with the costs of any educational sessions related to the Service that Contractor and/or Contractor's Representatives are directed to attend by Hospital. All such expenses must be reasonable, and the Contractor and/or Contractor's Representatives must be authorized in advance, and in writing by the Hospital's CEO, to incur such expenses, and such expenses must be paid in accordance with Hospital's policies and procedures. All such expenses are limited to those incurred by Contractor and/or Contractor's Representatives only (e.g., expenses of spouses and other family members are excluded from reimbursement).

B. Provision of Services for Risk Management, Employment Purposes, or Other Obligations of Hospital. Contractor agrees to provide Services as requested by Hospital in response to risk management issues, employee health efforts, or other contractual obligations as reasonably requestedby Hospital. In these situations, if requested by Hospital to waive Contractor's fees after the Services have been provided, Contractor shall bill the Hospital for its professional charges rather than the patient or the patient's insurance plan. Contractor agrees to accept the then current year Medicare Physician Fee Schedule reimbursement amount, or where applicable, state workers' compensation amounts, for any such services rendered.

VII. ALTERNATIVE DISPUTE RESOLUTION. The Parties firmly desire to resolve certain disputes arising hereunder without resort to litigation in order to protect their respective business reputations and the confidential nature of certain aspects of their relationship. Accordingly, any controversy or claim arising out of or relating to this Agreement, excepting healthcare liability and/or claims sounding in negligence, and the insurance and indemnification obligations set forth in Section XI, below relating to third-party claims made by patients and/or their representatives, shall be settled by arbitration before a single arbitrator and administered by the American Health Lawyers Association in accordance with its rules, including arbitrator selection. The award or decision rendered by the arbitrator will be final, binding and conclusive, and judgment may be entered upon such award by any court of competent jurisdiction. The arbitration process itself, and any other information or disclosures revealed by either Party to the arbitrator or to the other Party during the arbitration process will be confidential. No disclosure of the award shall be made by the Parties except as required by the law or as necessary or appropriate to effectuate the terms thereof. The location of the arbitration shall be in in the city in which the Hospital is located, unless otherwise mutually agreed by the parties. The dispute shall be governed by the laws of the State. Further, the prevailing Party shall be entitled to recover all costs and expenses associated with arbitration, including reasonable attorneys' fees. If the arbitrator determines that neither Party has substantially prevailed, the Parties shall bear equally the fees and costs of the arbitrator and the related expense of arbitration. Nothing in this section shall preclude either party from maintaining or initiating an action, counterclaim or cross-complaint in tort or contract against the other related to any healthcare liability and/or claims sounding in negligence relating to third-party claims made by a patient and/or a patient's representatives.

VIII. PARTIES' RELATIONSHIP. The Parties acknowledge that Contractor is an independent contractor to Hospital for the furnishing of Contractor's Representatives who agree to render Services to patients of the Hospital. Neither Contractor nor Contractor's Representatives shall in any way be construed as employees of any of the Hospital. Neither Contractor nor any of its agents (employees or contractors) shall have the right or authority to enter into any contract in the name of the Hospital or otherwise bind the Hospital in any way without the express written consent of the Hospital designee.

IX. PERFORMANCE DATA. Hospital agrees to comply with Contractor's reasonable request for financial and performance data related to utilization at Hospital. Contractor shall make such requests no more than quarterly during the Term of this Agreement.

X. **INSURANCE AND INDEMNIFICATION.**

A. Contractor hereby agrees to indemnify and hold harmless Hospital and Hospital's officers, directors, employees, agents, successors, and assigns from and against any claim, damage, loss, expense, liability, obligation, action, or cause of action, including reasonable attorneys' fees and reasonable third party costs of investigation, which Hospital may sustain, pay, suffer, or incur by reason of any negligent act or omission of Contractor and/or its directors, employees, agents, independent contractors, contractors or subcontractors, including but not limited to Contractor's Representatives, in connection with services provided and duties undertaken under this Agreement, including any claims for personal injury, healthcare liability or wrongful death, and including, without limitation, any claims for personal injury, healthcare liability or wrongful death, and including without limitation, any claims arising from any for "cause" removal of Contractor's Representatives or Contractor's termination of its relationship with any Contractor's Representative following any for "cause" removal requested by Hospital pursuant to Section II A, above. For the avoidance of confusion, the parties hereby acknowledge that Contractor shall not be obligated to indemnify Hospital with respect to (i) any claims pursued by a Contractor's Representative arising or accruing from a "without cause" removal, or (ii) any for "cause" removal requests by Hospital that Contractor reasonably and in good faith believes may result in actual or potential violation of any applicable federal, state, or local employment, anti-retaliation and/or whistleblowing laws as set forth in writing from Contractor to Hospital. Such written notice by Contractor pursuant to clause (ii) above shall clearly articulate the relevant known or alleged facts supporting Contractor's belief, shall cite the applicable underlying law(s), shall clearly explain the rationale supporting Contractor's conclusion(s), and shall be provided to Hospital within three (3) business days after Contractor determines that such removal request may result in an actual or potential violation of law and regardless of the date of removal of the Contractor's Representative. The parties hereby acknowledge and agree that while timely and adequate notice pursuant to clause (ii) shall temporarily relieve Contractor of the obligation to indemnify Hospital, Hospital shall automatically retain all rights to challenge Contractor's refusal to indemnify pursuant to the dispute resolution procedures set forth in this Agreement. To ensure coverage in the event of an act or omission as described herein, Contractor shall (i) maintain in force at all pertinent times at Contractor's sole expense a policy of general and professional liability insurance in the minimum amount of One Million Dollars ($1,000,000.00) per occurrence, Three Million Dollars ($3,000,000.00) in the annual aggregate, naming Hospital as an additional insured thereon, or such higher amount as may be required by the laws of the State; and (ii) if applicable, participate in the appropriate state compensation fund. Contractor shall furnish, upon execution of this Agreement and annually, a copy of the policy of the insurance and a Certificate of Insurance evidencing the aforementioned coverage.

B. Hospital hereby agrees to indemnify and hold harmless Contractor from and against any claim, damage, loss, expense, liability, obligation, action or cause of action, including reasonable attorneys' fees and reasonable costs of investigation, which Contractor may sustain, pay, suffer or incur by reason of any negligent act or omission of Hospital, or its employees in connection with services provided and duties undertaken under this Agreement, including any claims for personal injury or wrongful death.

C. Contractor and Hospital each agree and it is the stated intent of each that they shall only be liable to the other party under this Section for the proportionate liability or representative share of negligence allocated to such party based on the negligent acts or omissions of each party and its directors, employees, agents, independent contractors, contractors or subcontractors, including but not limited to Contractor's Representatives. If such allocation is not determined by a court of competent jurisdiction and the parties in good faith are otherwise unable to agree to such allocations, either party hereto may bring an action, including a summary or expedited proceeding, to compel binding arbitration of such matter.

XI. **ACCESS TO BOOKS AND RECORDS.** In the event it is held that Section 1861(v)(1)(I) of the Social Security Act is applicable to this Agreement, it is agreed:

A. Until expiration of five (5) years after furnishing services and pursuant to this Agreement, Contractor shall make available upon written request of the Secretary of Health and Human Services or the U.S. Comptroller General, or any of their duly authorized representatives, this Agreement, books, documents, and records of Contractor that are necessary to verify the nature and extent of costs incurred by Hospital under this Agreement.

B. If Contractor carries out any of the duties of this Agreement through a subcontract with a related organization with a value of Ten Thousand Dollars ($10,000) or more over a twelve (12) month period, such agreement must contain a clause to the effect that until the expiration of five (5) years after the furnishing of services under the subcontract, the related organization shall make available, upon written request of the Secretary of Health and Human Services, the U.S. Comptroller General, or any of their duly authorized representatives, the subcontract, any books, documents, and records of the related organization that are necessary to verify the nature and extent of costs incurred by Hospital under this subcontract.

C. In the event said sections are found to be inapplicable to this Agreement, this article shall be deemed not to be a part of this Agreement and shall be null and void with respect thereto.

XII. **NOTICES.** Any notice required or permitted to be given hereunder shall be in writing and may be given by: (1) hand delivery and shall be deemed given on the date of delivery; (2) registered or certified mail and shall be deemed given the third day following the date of mailing; or (3) overnight delivery by reputable overnight delivery service such as Federal Express or UPS and shall be deemed given the following day. All notices to Contractor or Hospital shall be addressed to Contractor or Hospital at the addresses as set forth on the signature page, together with a required copy to: LifePoint Hospitals, 330 Seven Springs Way, Brentwood, TN 37027, Attention: Chief Legal Officer.

XIII. **CONFIDENTIALITY**. The Parties agree that this Agreement and its provisions are strictly confidential. The Parties shall not disclose any information pertaining to any provision of this Agreement to any person or entity not a party to this Agreement except for tax, legal, or accounting advisors or as otherwise required by law.

XIV. **VENDOR PROMOTION/PUBLICATION.** Hospital prohibits the use of Hospital's name by any vendor or independent contractor, or the use of any name of Hospital's subsidiaries, or affiliated hospitals in any advertisement, press statement or release, website, published customer list, or any publication or dissemination similar to the foregoing without receiving in advance the express written permission from Hospital's Chief Executive Officer or his or her designee. Any request for permission should include the complete text of the publication, statement, or document in which the name usage will appear and will be subject to edit by the Hospital.

XV. **MARKETING SERVICES/COMPENSATION OF CONTRACTOR'S REPRESENTATIVES.** Except as specifically provided in this Agreement, Contractor shall not perform and is not being compensated for marketing services with respect to the Services to be performed at the Hospital. Contractor represents and warrants that no part of the compensation paid hereunder is in exchange for the referral or arrangement for referral of any patient to of Hospital. Contractor represents and warrants that, in connection with the Services to be performed pursuant to this Agreement, each employee, independent contractor, or other entity or person performing Services pursuant to the Agreement shall be compensated in a manner that complies with the Federal Anti-Kickback Statute, an exception to the Stark law, and as applicable, an appropriate exception to any state statutes similar to either or both of the foregoing federal statutes.

XVI. **SEVERABILITY**. The invalidity or unenforceability of any provision(s) of this Agreement will not affect the validity or enforceability of any other provision(s).

XVII. **NO WAIVER**. No waiver of a breach of any provision of this Agreement shall be construed to be a waiver of any breach of any other provision.

XVIII. **ASSIGNABILITY**. Contractor may not assign any of its rights or obligations hereunder without the prior written consent of Hospital, which consent will not be unreasonably withheld. Hospital may not assign this Agreement to any successor to all or substantially all of Hospital's operating assets without the prior written consent of Contractor, which consent will not be unreasonably withheld. This Agreement shall inure to the benefit of and be binding upon the Parties hereto and their respective successors and permitted assigns.

XIX. **AMENDMENTS**. Amendments to this Agreement shall be made only in writing duly executed by both Parties hereto.

XX. **ENTIRE AGREEMENT**. This Agreement constitutes the entire agreement of the Parties with respect to the subject matter hereof, and supersedes all prior agreements, contracts and understandings, oral, written or otherwise, including but not limited to any prior agreements between Contractor and/or its affiliates and Hospital.

XXI. **THIRD PARTY BENEFICIARIES**. This Agreement is intended to, and shall be deemed and construed to create rights and/or remedies for the Hospitals, which shall be deemed third party beneficiaries to this Agreement.

XXII. **AGREEMENT CROSS-REFERENCE**. As required by 42 C.F.R. section 411.357 (d)(1)(ii), all service agreements between Company or its affiliated Hospitals and any physician (or an immediate family member of a physician) are maintained electronically in a master contract database that is maintained and updated centrally and is available for review upon request by an authorized government official.

XXIII. **FAIR MARKET VALUE CONSIDERATION.** Hospital and Contractor hereby acknowledge and agree that the compensation arrangement hereunder is established at fair market value for the Services, and the Services performed under this Agreement are needed and reasonable in scope. The Parties hereby acknowledge and agree that in the event a written fair market valuation is ordered from an independent, third-party valuation company to support the compensation methodology under this Agreement, and such fair market valuation does not support the compensation methodology under this Agreement, the Parties will enter into good faith negotiations to determine a new compensation methodology, which new compensation methodology will be evidenced in a written amendment to this Agreement that is executed by both Parties. Notwithstanding the foregoing, in the event the Parties are unable to mutually agree upon a new compensation methodology within thirty (30) days after such aforementioned good faith negotiations begin, either Party may terminate this Agreement by providing ninety (90) days' written notice to the other Party.

MEDICAL STAFF MEMBERSHIP AND PRIVILEGES AGREEMENT **ADDENDUM 1**

Contractor Representative Agreement Regarding Medical Staff Membership and Privileges

The undersigned hereby acknowledge and agrees that:

1. The undersigned is a Physician who may provide services to Hospital pursuant to Agreement between Hospital and Contractor.

2. Pursuant to the Agreement, Hospital has certain rights of approval over Physicians and others who provide services, and that; in addition, Hospital may request removal of a Physician or other provider of services under the Agreement. The undersigned understands that this will mean that Hospital may refuse to permit the undersigned to provide services under the Agreement, or request that the undersigned be removed from the permitted list of individuals providing services under the Agreement.

3. The undersigned agrees to the following: the medical staff appointment and clinical privileges of all Physicians and practitioners providing services under the Agreement shall be incident to and coterminous with the Agreement, and upon termination or expiration of the Agreement or upon removal of any Physician or practitioner by Contractor (independently or at Hospital's request) or Hospital's refusal to permit a Physician or practitioner to perform services under the Agreement, the appointment and clinical privileges of such Physician or practitioner shall automatically terminate except as otherwise provided below. Notwithstanding the foregoing, a Contractor Representative's Medical Staff Appointment and Clinical Privileges will not automatically terminate upon termination or expiration of the Agreement unless a continuation of such privileges, in Hospital's reasonable judgment, would be inconsistent with Hospital's ability to exclusively contract with a successor provider of emergency services. Any rights that the Physician or practitioner may have to any hearing or appeal procedures prior to termination of medical staff appointment or clinical privileges, pursuant to the bylaws or policies of Hospital or the Medical Staff, or any other state or federal statute, regulation or judicial decision, are hereby waived with respect to any termination of Medical Staff Appointment or Clinical Privileges at Hospital as described herein. Unless otherwise required by law, no reporting to any third party, such as the National Practitioner Data Bank, shall take place for any termination hereunder for non-clinical or non-competency issues.

ADDENDUM TO EXCLUSIVE PROFESSIONAL SERVICES AGREEMENT **ADDENDUM 2**

This Addendum to Exclusive Professional Services Agreement (the "Addendum") is hereby entered into and made effective as of the 1st day of March, 2019, by and between RCHP-Ottumwa, LLC d/b/a Ottumwa Regional Health Center ("Hospital") and Southeastern Emergency Physicians, LLC ("Contractor").

Parties' Agreement Regarding Weatherby Healthcare Locum Tenens Providers

1 Notwithstanding anything to the contrary set forth in the Agreement, the Parties agree that the Hospital will be directly responsible for all expenses incurred by or in connection with Weatherby Healthcare locum tenens providers providing services at Hospital during the months of March and April 2019. The Parties further agree that all professional services provided by Weatherby Healthcare locum tenens providers will be billed through the current outsourced billing arrangement and shall not be billed by Contractor.

SCHEDULE 1

EMERGENCY DEPARTMENT AGREEMENT

TERMS AND CONDITIONS

This Schedule 1 ("Schedule 1") is attached to and made a part of the Agreement. Definitions contained herein shall have the same meaning as contained in the Agreement. Should a conflict arise between the terms contained in the Agreement and this Schedule 1, then the terms of this Schedule 1 shall control.

Contractor will be responsible for carrying out the duties identified throughout this Schedule 1 and, additionally, the duties defined hereunder (collectively referred to as the "Services"), plus any Schedules identified below, each of which constitute an integral part of this Agreement:

SCHEDULE	TITLE
1.A	Services, Coverage, and Quality Criteria
1.B	ED Physician Scorecard

SCHEDULE 1.A

SERVICES, COVERAGE, AND QUALITY CRITERIA - EMERGENCY DEPARTMENT

I. **DESCRIPTION OF SERVICES.** Hospital is engaging the services of Contractor to enter into an exclusive relationship for professional Emergency Department ("ED") services which will best facilitate efficient, effective and quality emergency medical care for patients presenting to Hospital's ED. This engagement is expected to improve the services provided at the Hospital, afford effective utilization of the Hospital's equipment and resources, provide consistent service and quality control; provide prompt availability of professional services; simplify scheduling of physician coverage, and enhance the efficient and effective administration of ED services. Contractor and Contractor's Representatives shall practice within Hospital, assuming the role of ED physician or physician extender for patients presenting to Hospital emergency department ("Program Patients"). Allied Health Practitioners, if and when utilized, shall assist Contractor with their duties and responsibilities. Contractor shall provide to Program Patients all professional emergency medicine services that are medically necessary and within the capabilities of the Contractor's Representatives. Contractor's Representatives shall not be responsible for a Program Patient's care after discharge or admission, provided however, Contractor's Representatives shall participate in the Code Team utilized at Hospital, including responses to codes and to other emergency situations involving Program Patients admitted to Hospital.

A. DUTIES OF CONTRACTOR. In addition to the coverage requirements referenced above, Hospital and Contractor agree that the following shall be required duties of Contractor with respect to the Service:

1. Drive performance and be accountable to ED Service line initiatives around quality, service, throughput and growth in coordination with Hospital.
2. Participate in all quality programs outlined by Hospital that improve patient outcomes; Improvement in Value Based Purchasing metrics including but not limited to: core measures, mortality, HCAHPS, readmissions, Medicare Spending Per Beneficiary, and other quality outcome measures.
3. Participate in development and execution of programs and/or educational programs related to service for medical personnel at Hospital, including but not limited to ED Nursing Staff and other Hospital staff, students, interns, residents, as well as Contractor's employees, subcontractors and agents.
4. Must comply with EMTALA, CMS, The Joint Commission and all regulatory agency rules and regulations.
5. Assist and participate in educating the community and creating awareness around services, as requested.
6. Provide the following program enhancement services:

    a. Participate in development and implementation of evidence-based care guidelines that are consistent with local and national standards.
    b. Lead and drive quality improvement in coordination with ED Nurse Director and appropriate Hospital personnel to ensure appropriate care by all of Contractor's Representatives.
    c. In coordination with ED service line initiatives, lead, support and drive improvement through implementation of best practices to drive improved patient outcomes around quality, service and throughput.
    d. Engage and be accountable to quality assurance and improvement initiatives by attending meetings, leading committees, measuring results and holding those accountable to established goals and objectives.
    e. Select a designee for Hospital to meet on a monthly basis with the medical director, case manager, Hospital administration, ED nurse director, and key medical staff leaders i.e. hospitalist, and other individuals necessary to provide input on enhancements for the improvement of Services at Hospital.
    f. Must remain compliant with timely completion of medical records describing the results for all the medical services performed by Contractor's Representatives in ED.
    g. Provide onsite physician supervision for outpatient services rendered at Hospital in order to meet supervision requirements under Medicare.

7. Establish expectations and hold Medical Director and Contractors' Representatives accountable to establishing effective working relationships with ED Nurse Director and personnel, other departments, the Medical Staff, and the administration.
8. Contractor's Regional Medical Directors and Regional Nursing/Clinical Directors must meet with Hospital's ED Services Team at least quarterly to review program goals and objectives around performance related to quality, service, throughput and growth.
9. Contractors support service structure; i.e. customer service and performance improvement, etc., resources; must be accountable to and establish goals consistent with Hospital's ED Service Line priorities both on priority hospitals and metrics.
10. Contractor must use the ED Physician Scorecard, as established in Schedule 1.B, attached hereto and incorporated herein by reference, to align provider and Hospital objectives through a financial withhold in the Medical Director's contract.
11. Agree to work on related projects and perform such other related duties as mutually agreed upon by both parties.

B. DUTIES OF CONTRACTOR'S REPRESENTATIVES. Hospital and Contractor agree that the following shall be required duties of each of the Contractor's Representatives assigned to the Hospitals:

1. Must be consistent with Duties outlined in Section "A" above.
2. Provide emergency department medical treatment as needed for all patients presenting to the Hospital's emergency department.
3. Participate in the Code Team utilized at the Hospital, including responses to codes.
4. Consult with other Medical Staff physicians as needed to assist with evaluations, transfers, and/or admission of program patients or unassigned patients.
5. Meet all behavior and professional conduct requirements of the medical staff bylaws and rules of regulations.
6. Meet all other requirements of the medical staff bylaws, rules and regulations.
7. Complete appropriate documentation of patient medical records and signing of final medical record within required timeframes as required by the Medical Staff Bylaws and Rules and Regulations of Hospital.
8. Work cooperatively with all medical staff and Hospital personnel.

C. MEDICAL DIRECTOR. Contractor shall designate one physician to serve as the Medical Director ("Medical Director") of the Services for the Hospital. The expectations and obligations for the Medical Director include:

1. In conjunction with the ED Nurse Director, drive performance and be accountable to the ED Service line initiative around quality, service, throughput and growth in coordination with the Hospital.
2. Lead and drive quality improvement in coordination with ED Nurse Director and appropriate Hospital personnel to ensure appropriate care by all providers in the ED.
3. In coordination with the ED service line initiative, lead, support and drive improvement through implementation of best practices to drive improved patient outcomes around quality, service and throughput.
4. Educate and hold the ED providers accountable to implement best practices supported by the Hospital around quality, throughput, service and growth and hold the ED providers accountable to meeting the goals and objectives (targets) established.
5. Engage and be accountable to quality assurance and improvement initiatives by attending meetings, leading committees, measuring results and holding those accountable to established goals and objectives (targets).
6. Serve as the professional liaison of the physicians associated with the emergency department program and work closely with Hospital and administration to solve program problems
7. Develop and implement programs to educate medical staff physicians across Hospital on the benefits of the Services to the patients and the community served by Hospital.
8. Establish a culture of safety by creating a professional atmosphere conducive to a high standard of patient care, investigate patient complains and incident reports, hold providers accountable to expectations, and provide high levels of service measured by ED patient Satisfaction.
9. Lead the monthly ED operations committee in coordination with the ED nurse director. The purpose of this multidisciplinary committee is to address key operational priorities around quality, service throughput and growth. The meetings should be data driven based on objective metrics that will drive improvement and patient outcomes in the emergency department.
10. Establish a close working relationship with the case manager of Hospital's emergency department program to ensure a high standard of patient care, proper patient care protocols are developed and maintained, coordinate work flow with the other ancillary departments within Hospital, and assist in the coordination of case management services.
11. Serve as an advisor to Hospital's quality improvement program.
12. In collaboration with the ED Nurse Director, revise existing policies and develop new policies as needed.
13. Participate in Hospital meetings, including but not limited to those related to performance improvement, quality improvement, patient experience, and utilization review.
14. Periodically review emergency department patient records to ensure the documentation, treatment, treatment plans, consults and tests ordered meet the appropriate standard of care.
15. Participate in the Hospital's peer review activities as requested/needed by Hospital.
16. Oversee the administration and management of Hospital's emergency department program and the Agreement with Hospital.
17. Ensure appropriate coverage for Hospital by scheduling coverage of the Services on a monthly basis, including on-site coverage.
18. Facilitate an evaluation process as it relates to the performance of all Contractor's Representatives that treat patients at Hospital. The performance evaluation may include input from other specialists who consult on patients presenting to Hospital's Emergency Department, Hospital personnel, etc. Performance shall be evaluated on the basis of professional attitude, professional capabilities, patient relations attitude and overall effectiveness as determined appropriate by Contractor and Hospital.

II. **COVERAGE.** In accordance with the terms of this Agreement, Contractor shall:

A. Ensure and deliver to Hospital continuous, twenty-four (24) hour on-site emergency medicine coverage, seven (7) days per week, fifty-two (52) weeks per year.

B. In order to provide the comprehensive coverage set forth above and meet patient needs, Contractor shall provide to Hospital a minimum number of qualified Physician coverage hours ("Qualified Physician Hours"), and if applicable, a minimum number of physician extender or Allied Health Practitioner coverage hours ("Allied Health Practitioner Hours).

Provider	Hours/day needed
Physician	24
NP/PA	12

C. Any adjustments to staffing requirements and hours of coverage other than those set forth in Section 2 above shall be agreed upon by Hospital and Contractor in writing.

D. In no event shall any Physician or Allied Health Practitioner providing services under the Agreement work more than twelve (12) consecutive hours in a twenty-four (24) hour period, unless prior advance written approval has been obtained from Hospital's Chief Executive Officer or his or her designee. Such advance written approval shall be waived in the case of a catastrophic event or extraordinary medical crisis.

III. **QUALITY CRITERIA.** Hospital and Contractor shall mutually agree upon an "ED Physician Scorecard" which shall be set forth in Schedule 1.B. Beginning on the Effective Date, Contractor shall cause Contractor's Representatives to meet the quality criteria set forth in the ED Physician Scorecard (the "ED Physician Scorecard") for the Hospital, which shall be effective as of the date that the ED Physician Scorecard is agreed upon by the Parties, which shall be no later than the Effective Date. The agreed upon ED Physician Scorecard shall be attached as Schedule 1.B, which may be amended from time to time by mutual agreement of the Parties. Any amendments to the ED Physician Scorecard shall be implemented prior to the commencement of a new contract year, shall be based on the prior year's trends and achievements, and shall be mutually agreed upon. The Parties further agree to use their best commercially reasonable efforts to negotiate the ED Physician Scorecard to be applicable hereunder within sixty (60) days of the Effective Date. Each of the quality criteria in the ED Physician Scorecard will be monitored quarterly during the Term of the Agreement, and Hospital will deliver the results of such assessment to Contractor thirty (30) days from the assessed quarter end. The Parties acknowledge and agree that targets identified for each of the quality criteria meet only the minimum level of performance required from Contractor and Contractor's Representatives which shall be an annual overall score of sixty (60) points (the "Minimum Score").

I get so involved in what I'm doing at work, I often lose track of time.	EE	63%
I look forward to each workday.	EE	62%
Disagreements in this work setting are resolved appropriately (i.e., not who is right, but what is best for the patient).	T	60%
Senior management supports my daily efforts.	PSM	56%
This organization consistently demonstrates its written values.	OT&V	54%
I get adequate, timely info about events that might affect my work from senior management.	PSM	54%
I feel tired when I get up in the morning and have to face another day on the job.	EXHAUST	52%
I trust the direction this organization is going in.	OT&V	50%
I feel used up at the end of the workday.	EXHAUST	40%
I feel emotionally drained from my work.	EXHAUST	37%
The staffing levels in this work setting are sufficient to handle the number of patients.	PSM	31%

Glint Results Review

Glint Quarterly Engagement Program 5pt

Let’s set the stage.

For today’s conversation, we’ll use a simple framework called ACT.

Acknowledge where we are.

Collaborate on where we want to go.

Take one step forward.

This is an opportunity for the team to give each other feedback, collaborate on solutions, and commit to small changes we all can make to improve our experience at work.

Acknowledge where we are.

Acknowledge Conversation Prompts

What are some things we have learned from reviewing the results (include some positives and some opportunities)?

What are the strengths we shouldn't lose sight of? What is our most important strength?

What are the biggest opportunities we see in the results? What are we missing?

C Collaborate on where we want to go.

Collaborate Conversation Prompts

What is one thing we should focus on improving in the next few weeks?

What should we start doing to improve in this area? What should we continue doing? What should we stop doing?

What is the top simple change we can begin trying as a team over the next few weeks?

Take one step forward.

Take one step forward Conversation Prompts

Here’s one change I will commit to trying when we leave today. What’s one small thing each of you will do as a result of our discussion?

We’ll check in on how we’re doing during next month’s meeting. Thank you for your openness and commitment to improving together.

Next steps

- Create an Action Plan in Glint outlining key actions for the team.
- Schedule time during a recurring team meeting for ongoing ACT check-ins.

Thank You

Appendix

Tips for a great conversation

- Incorporate the ACT conversation as 15 minutes on the agenda of a standing team meeting.
- Create safety for sharing stories of successes, surprises and misses.
- Encourage candid feedback, while acknowledging we can't solve for everything right away.
- Be comfortable with being uncomfortable. These conversations may feel hard at first but will get easier over time with more repetition.

Commit to listen

Be curious

Share openly & constructively

Your role in the feedback process is **not to own all of the action items independently,** but to **own the ongoing conversations** about feedback and action that fuels progress

Your Role as a Manager:

- Show confidence in team's abilities, provide direction, role modeling and recognize the right behaviors.
- Provide guidelines for prioritization and decision-making, seek out differing opinions and ensure all voices are heard.
- Navigate larger organizational constraints and serve as first point of escalation to help overcome roadblocks.
- Foster a continuous improvement mindset by Check in frequently and adjust as needed.

Let's have an A C T Conversation!

(Post-Survey ACT Conversation Team Worksheet)

A Acknowledge where we are.

- Key insights from Glint results
- Most important strength not to lose sight of
- Biggest opportunity to get after

C Collaborate on where we want to go.

- One thing to focus on improving in the next few weeks
- Stop doing to improve
- Start doing to improve
- Continue doing to improve
- Top simple change to try in the next few weeks

T Take one step forward.

- Your commitment over the next few weeks
- Any barriers to success
- Next check-in

Let's have an  Conversation!

(Ongoing ACT Conversation Team Worksheet)

A Acknowledge where we are.

- How did you do on your commitment?
- Success story
- Learning

TABLE OF CONTENTS

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report for the fiscal year ended December 31, 2018 (this "***Report***") contains forward-looking statements that involve risks and uncertainties. Forward-looking statements include any statements that address future results or occurrences. In some cases you can identify forward-looking statements by terminology such as "may," "might," "will," "would," "should," "could" or the negatives thereof. Generally, the words "anticipate," "believe," "continue," "expect," "intend," "estimate," "project," "plan" and similar expressions identify forward-looking statements. In particular, statements about our expectations, beliefs, plans, objectives, assumptions or future events or performance contained elsewhere in this Report are forward-looking statements. These forward-looking statements include statements that are not historical facts, including statements concerning our possible or assumed future actions and business strategies. We have based these forward-looking statements on our current expectations, assumptions, estimates and projections. While we believe these expectations, assumptions, estimates and projections are reasonable, such forward-looking statements are only predictions and involve known and unknown risks, uncertainties and other factors, many of which are outside of our control, which could cause our actual results, performance or achievements to differ materially from any results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements to differ materially from any results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following:

- the significant costs and substantial indebtedness that were incurred in connection with the closing of the LifePoint/RCCH Merger (as defined herein) and the integration of the businesses of Legacy LifePoint (as defined herein) and RCCH (as defined herein);
- payment changes, including policy considerations and changes resulting from federal and state budgetary restrictions;
- impact from or likelihood of the repeal, replacement or material modification to the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the "***Affordable Care Act***"), as a result of legislative or court action;
- potential impact from the repeal of the "individual mandate" to purchase health insurance under the Affordable Care Act, included in the Tax Cuts and Jobs Act of 2017 (the "***Tax Act***");
- impact from changes to Medicaid supplemental payment programs;
- our compliance with new and existing laws and regulations as well as costs and benefits associated with compliance;
- any potential action brought by the government under anti-fraud and abuse provisions or by individuals on the government's behalf under the "qui tam" or "whistleblower" provisions of the federal False Claims Act (the "***False Claims Act***");
- impact from the changes in payer mix marked by a shift of patients from private insurance to Medicare and Medicaid programs;
- our acquisition strategy, including integration risks relating to recent historical acquisitions and integration risks relating to future acquisitions that are in addition to those associated with the LifePoint/RCCH Merger;
- the potential material obligations if we acquire facilities with unknown or contingent liabilities;
- claims and legal actions relating to professional liabilities and other litigation risks;
- delayed payments and repayments resulting from reviews of claims to Medicare and Medicaid for our services;
- impact of controls imposed by payers designed to reduce inpatient services;
- our relationships with our joint venture partners, including our Duke LifePoint Healthcare joint venture with Duke University Health System;
- changes in physician employment regulations;
- increases in the amount and risk of collectability of patient accounts receivable;
- our need to make investments continually in our processes and information systems to protect the privacy of patients, employees and other persons and reduce the risk of successful cybersecurity attacks;
- damage to our reputation, regulatory penalties, legal claims and liability under state and federal laws that we could suffer upon any cybersecurity or privacy breaches;
- effects of competition in a facility's market;
- effects of union organizing activities;
- potential recoupment of previously recognized income from electronic health record ("***EHR***") incentive programs;
- anticipated capital expenditures, including routing projects, investments in information systems and capital projects related to acquisitions, construction of new facilities and construction projects and the expectation that capital commitments could be a component of future acquisitions;
- timeframes for completion of capital projects;
- changes in depreciation and amortization expenses;
- costs of providing care to our patients;
- implementation of supply chain management and revenue cycle functions;

- accounting estimates and the impact of accounting methodologies and new accounting pronouncements;
- changes in industry and general economic trends;
- consolidation of commercial insurance companies and patient shifts to lower cost healthcare plans, including association health plans and short term limited duration health insurance plans, which generally provide lower payment for services provided;
- participation in the healthcare exchanges and the impact of increasing enrollment by patients in insurance plans with narrow networks, tiered networks, high deductibles or high co-payments;
- uncertainty of patient volumes and related revenues;
- governmental or third-party investigations, legal actions and voluntary self-disclosures relating to overpayments or other regulatory compliance matters;
- recruitment and retention of senior executives, providers and other healthcare employees;
- our ability to acquire facilities on favorable terms and successfully complete asset sales and divestitures;
- the ability of our local management teams to identify and meet the needs of our patients, medical staffs and their communicates;
- the efforts of insurers, healthcare providers and others to contain healthcare costs;
- our ability to obtain adequate levels of general and professional liability insurance;
- our ability to implement initiatives promoting cost reductions and operational efficiencies;
- possible future indebtedness that may be incurred; and
- other factors referenced under the caption "Risk Factors" contained in this Report.

Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. We disclaim any obligation to update any such factors or to announce the result of any revisions to any of the forward-looking statements contained herein to reflect future results, events or developments.

Statements in this Report are made as of the date hereof. New factors emerge from time to time that could cause our actual results to differ, and it is not possible to predict all such factors.

EXPLANATORY INFORMATION REGARDING THIS REPORT

This Report has been prepared in accordance with the obligations of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.) (the "***Company***") under (i) Section 4.02 of the Indenture, dated as of April 29, 2016 (the "***8.25% Secured Notes Indenture***"), among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee, relating to the Company's 8.25% Secured Notes due 2023 (the "***8.25% Secured Notes***"), (ii) Section 4.02 of the Indenture, dated April 29, 2016 (the "***11.5% Unsecured Notes Indenture***"), among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee, relating to the Company's 11.5% Unsecured Notes due 2024 (the "***11.5% Unsecured Notes***"), (iii) Section 4.02 of the Indenture, dated November 16, 2018 (the "***9.75% Unsecured Notes Indenture***" and, together with the 8.25% Secured Notes Indenture and the 11.5% Unsecured Notes Indenture, the "***Indentures***"), among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee, relating to the Company's 9.75% Unsecured Notes due 2026 (the "***9.75% Unsecured Notes***" and, together with the 8.25% Secured Notes and the 11.5% Unsecured Notes, the "***Notes***"), (iv) Section 5.04 of the Asset-Based Revolving Credit Agreement, dated as of November 16, 2018 (the "***ABL Agreement***"), among the Company, as Lead Borrower, DSB Acquisition, LLC, a Delaware limited liability company ("***Holdings***"), the lenders party thereto from time to time and Citibank, N.A., as administrative agent and collateral agent, and (v) Section 5.04 of the First Lien Credit Agreement, dated as of November 16, 2018 (the "***Term Loan Agreement***" and, together with the ABL Agreement, the "***Credit Agreements***"), among the Company, as Lead Borrower, Holdings, the lenders party thereto and Citibank, N.A., as administrative agent and collateral agent. This Report has been prepared in all material respects in accordance with the rules and regulations of the Securities and Exchange Commission (the "***SEC***") applicable to an Annual Report on Form 10-K for the fiscal year ended December 31, 2018, except to the extent permitted to be excluded by the Indentures and the Credit Agreements.

USE OF NON-GAAP FINANCIAL INFORMATION

In this Report, we have provided EBITDA and Adjusted EBITDA (collectively, the "***Non-GAAP Measures***") because we believe they provide the Holders with additional information to measure our performance and evaluate our ability to service our indebtedness. We believe that the presentation of Non-GAAP Measures is appropriate to provide additional information to the Holders about certain material non-cash items and about unusual items that we do not expect to continue or to continue at the same level in the future as well as other items. Further, we believe the Non-GAAP Measures provide a meaningful measure of operating profitability because we use them for evaluating our business performance and understanding certain significant items.

The Non-GAAP Measures are not presentations made in accordance with United States ("***U.S.***") generally accepted accounting principles ("***GAAP***"), and our use of these terms may vary from others in our industry. EBITDA and Adjusted EBITDA should not be considered as alternatives to operating income or any other performance measures derived in accordance with GAAP as measures of operating performance or cash flows as measures of liquidity. EBITDA and Adjusted EBITDA have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results as reported under GAAP. Because of these limitations, we rely primarily on our GAAP results and use EBITDA and Adjusted EBITDA only as a supplement. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" for a description of the calculation and limitations of these measures.

DOCUMENT SUMMARIES AND REQUESTS

This Report contains summaries believed to be accurate with respect to certain documents, but reference is made to the actual documents for complete information. All such summaries, which do not purport to be complete, are qualified in their entirety by such reference. Copies of the documents referred to herein will be made available without cost to Holders of the Notes by making a written or oral request to us. Any such request may be made to us at the following address and telephone number:

FISCAL YEAR

All references to "fiscal year" are to the twelve months ended December 31 of the year referenced.

OTHER ITEMS

This Report is prepared by LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.), a Delaware corporation, which, along with each of its consolidated subsidiaries, is referred to herein as the "***Company***," "***LifePoint***," "***we***," "***our***," "***us***," and, before giving effect to the LifePoint/RCCH Merger (as defined below), "***RCCH***," in each case, unless the context otherwise requires.

References in this Report to the "***LifePoint/RCCH Merger***" refer to the merger, which was effective on November 16, 2018, of Legend Merger Sub, Inc., a Delaware corporation and wholly-owned subsidiary of RCCH ("***Legend Merger Sub***"), with and into LifePoint Health, Inc., a Delaware corporation ("***Legacy LifePoint***"), with Legacy LifePoint surviving the LifePoint/RCCH Merger as a subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc."

References in this Report to the "***RegionalCare/Capella Merger***" refer to the merger of Crimson Merger Sub, LLC ("***Crimson Merger Sub***"), a Delaware limited liability company and wholly-owned subsidiary of RegionalCare Hospital Partners Inc. ("***Regional Care***"), with and into Capella Health Holdings, LLC ("***Capella***"), with Capella surviving the RegionalCare/Capella Merger as a wholly-owned subsidiary of RegionalCare, which began to do business as RCCH HealthCare Partners. The RegionalCare/Capella Merger was consummated on April 29, 2016; however, for accounting purposes, the RegionalCare/Capella Merger became effective on May 1, 2016.

References in this Report to the "***Apollo/RegionalCare Acquisition***" refer to the merger, which was effective on December 3, 2015, of DSB Merger Sub Inc., a Delaware corporation and wholly-owned subsidiary of Holdings, with and into RegionalCare with RegionalCare surviving such merger as a direct wholly-owned subsidiary of Holdings, which is indirectly controlled by our Sponsor.

References in this Report to the "***Sponsor***" refer to certain funds that are affiliates of the Company (the "***Apollo Funds***") that are ultimately controlled and/or managed by Apollo Management VIII, L.P. ("***Apollo Management***" and, when acting on behalf of the Apollo Funds, "***Apollo***"), which is an affiliate of Apollo Global Management LLC.

PART I

Item 1. *Business*.

Our Company

We own and operate community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities. As of December 31, 2018, we operated 89 hospital campuses in 30 states throughout the U.S., having a total of 11,876 licensed beds. We generate revenues by providing a broad range of general and specialized healthcare services to patients through a network of hospitals and outpatient facilities.

We seek to fulfill our mission of Making Communities Healthier® by (1) delivering high quality patient care, (2) supporting our physicians, (3) creating excellent workplaces for our employees, (4) taking a leadership role in our communities and (5) ensuring fiscal responsibility. We strive to create places where people choose to come for healthcare, physicians want to practice and employees want to work.

Our Business Strategy

The key elements of our business strategy include:

- *Continue to Grow in Existing Markets by Expanding Services and Access Points to Care*. We regularly conduct in-depth strategic reviews of the major service lines offered at each of our facilities and evaluate additional services through which we could profitably grow in our markets and better serve our communities. We leverage our local market knowledge together with input and guidance from our local physician and community leaders to prioritize the healthcare services our communities are seeking. Focus areas include expansion of specialty service lines to meet unserved patient needs, expansion of access points to care, including outpatient, ancillary and retail health services, and investment in technology and equipment. We invest strategically in our markets in order to increase the quality and scope of services we provide, meet the needs of our communities and maintain our strong reputation as the healthcare provider of choice. This in turn helps us to continue recruiting physicians and growing the revenue and profitability of our facilities.

- *Continue to Recruit and Retain Leading Physicians*. Our physician engagement strategies drive our ability to enhance and expand our services to meet the healthcare needs of our communities. We have a comprehensive recruiting program that is directed by an experienced corporate department and is supported at the local level by our hospital system chief executive officers ("***CEOs***") and Boards of Trustees. We supplement our local teams with experienced corporate office specialists and several third party recruiting firms to assist us in identifying candidates that match the profile of our physician needs. We maintain a flexible approach to aligning our goals with our physician partners, including our willingness to recruit physicians through multi-year employment and/or income guarantee arrangements. In addition, we believe our physicians are attracted to our facilities because of several factors, including our commitment to quality care, our focus on employing and developing high quality nurses and support staff and our integration into, and support of, the communities we serve.

- *Routinely Optimize Our Portfolio to Strengthen Our Position in Existing Markets and Expand into New Markets*. We evaluate and selectively pursue acquisitions of hospitals, outpatient and ancillary clinics and other healthcare facilities in new and existing markets, with the goal of improving our operating performance and better meeting the healthcare needs of our communities. We employ a rigorous and disciplined approach to new market acquisitions and focus on a range of criteria, including expected financial returns and strategic benefits, to evaluate a target's suitability and fit within our portfolio. We seek to operate health systems that are, or have the potential to become, market leaders in non-urban communities with favorable demographic trends. We often acquire underperforming and/or undermanaged facilities where we can drive operating efficiencies in order to realize significant upside potential following an acquisition to generate attractive effective purchase multiples and strong returns on our investment. The recent market trend toward health system consolidation, particularly among underperforming not-for-profit hospital operators without the scale and/or operating discipline to compete, has benefited us and we believe will continue to support our acquisition strategy. Furthermore, we routinely evaluate our existing portfolio to assess whether we are meeting our strategic and financial objectives in our markets. We evaluate and may seek to opportunistically divest assets that do not meet our strategic and/or financial objectives and which may deliver more value to our stakeholders through a sale.

- *Commitment to the Delivery of Exceptional Quality Patient Care*. We believe providing high quality patient care is critical to attracting patients, physicians and employees to our facilities. In addition, providing high quality patient care is increasingly vital to achieving our operating and financial success, including receiving full payment from governmental and commercial payers. We believe several factors contribute to providing high quality patient care, including instilling leadership and accountability at all levels of our organization, aligning ourselves with quality physicians and medical staff, and providing a clinical environment that is satisfactory to our patients, physicians and employees. Furthermore, we strive continually to improve physician and employee satisfaction, which we believe is critical to delivering quality patient care. In addition, we also seek to partner with academic medical centers and regionally significant health systems to better serve our communities and to ensure we are delivering high quality care.

- *Continue to Engage in Strategic Relationships with Local Partners*. We partner with several academic medical centers and regionally significant health systems to better serve our communities. We have established partnerships with Duke University Health System ("***Duke***"), Norton Healthcare, Inc. ("***Norton***"), LHC Group, Inc. ("***LHC***"), University of Washington Health, the University of Alabama at Birmingham, and Billings Clinic. We formed Duke LifePoint Healthcare, a joint venture between us and a wholly-controlled affiliate of Duke, with a mission to own and operate community hospitals and other facilities as well as improve the delivery of healthcare services. We own a controlling interest in Duke LifePoint Healthcare. We believe this partnership, which combines our operational resources and experience with Duke's expertise in the development of clinical services and quality systems, further strengthens our ability to acquire well-positioned facilities. Since its formation in 2011 through December 31, 2018, we have completed the acquisition of 14 acute care hospitals and ancillary facilities through Duke LifePoint Healthcare.

- *Continue to Focus on Cost Reduction and Operational Efficiency*. We strive to improve our operating performance by making our revenue cycle processes more efficient, making an even higher level of purchases through our group purchasing organization, operating more efficiently and effectively, and working to appropriately standardize our policies, procedures and practices across all of our affiliated facilities. As part of our ongoing efforts to further manage costs and improve the results of our revenue cycle, we have partnered with a third party to provide certain nonclinical business functions, including payroll processing, supply chain management and revenue cycle functions. We believe this model is the most cost effective and efficient approach to managing these nonclinical business functions across multi-facility enterprises. Additionally, in connection with our efforts to responsibly manage purchasing costs, we participate along with other healthcare companies in a group purchasing organization, HealthTrust Purchasing Group ("***HPG***"), which makes certain national supply and equipment contracts available to our facilities. As of December 31, 2018, we owned an approximate 7.2% equity interest in HPG. We also implement this operating discipline when we enter a new market through acquisitions, where we focus on optimizing staffing levels to reduce labor costs, leveraging our national scale and group purchasing organizations to reduce supply costs and standardizing revenue cycle and information technology ("***IT***") systems. We have made substantial progress implementing these initiatives consistently across our network and we believe that opportunity exists for continued improvement in the near term, particularly among our recently acquired facilities.

- *Experienced Executive Management and Leadership Teams.* Our senior management team has an average of more than 20 years of healthcare industry experience with a proven record of achieving strong operating results. The senior management team is highly respected in the hospital management industry and has significant experience in managing and acquiring hospitals. Our executive management team is led by David Dill, who serves as our Chief Executive Officer. Mr. Dill has more than 20 years of operational and financial leadership experience in the healthcare industry, most recently as President and Chief Operating Officer of Legacy LifePoint.

Our Background

LifePoint/RCCH Merger

Summary

On July 22, 2018, RCCH, Legend Merger Sub and Legacy LifePoint entered into an agreement and plan of merger, pursuant to which, effective November 16, 2018, Legend Merger Sub merged with and into Legacy LifePoint, with Legacy LifePoint surviving the merger as a wholly-owned subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc."

Equity Contribution

In connection with the LifePoint/RCCH Merger, the Apollo Funds, together with certain other co-investors investing through a co-investment vehicle controlled by our Sponsor or its affiliates, indirectly contributed $1,000.0 million of newly invested capital to DSB Parent L.P., a Delaware limited partnership ("***DSB Parent***"), which is our indirect parent and is owned by the Apollo Funds, such co-investment vehicle and certain current or former directors, members of management, employees and consultants of the Company, and the $1,000.0 million of newly invested capital was further contributed to the Company to be used to partially fund the LifePoint/RCCH Merger.

Financing Transactions

Concurrently with the closing of the LifePoint/RCCH Merger, we (1) issued the 9.75% Unsecured Notes, (2) entered into the ABL Agreement, which provides a senior secured asset-based revolving credit facility (the "***ABL Facility***") in an aggregate principal amount of $800.0 million with a maturity of five years, (3) terminated our existing senior secured asset-based revolving credit facility, which we entered into on April 29, 2016 (the "***Prior ABL Facility***"), (3) entered into the Term Loan Agreement, which provides a senior secured term loan credit facility (the "***Term Loan Facility***") in an aggregate principal amount of $3,550.0 million with a maturity of seven years, and (4) repaid in full our $150.0 million term loan facility, which we entered into on April 25, 2018 (the "***Prior Term Facility***").

RegionalCare/Capella Merger and Apollo/RegionalCare Acquisition

On March 21, 2016, RegionalCare and Capella entered into an agreement and plan of merger, pursuant to which, effective on April 29, 2016 (and effective May 1, 2016 for accounting purposes), Crimson Merger Sub, merged with and into Capella, with Capella continuing as the surviving company in the merger as a wholly-owned subsidiary of RegionalCare. After the RegionalCare/Capella Merger was consummated we began to do business as RCCH HealthCare Partners. Concurrently with the closing of the RegionalCare/Capella Merger, we (i) issued the 8.25% Secured Notes and the 11.5% Unsecured Notes, (ii) entered into the Prior ABL Facility and (iii) refinanced certain indebtedness of DSB Holdings, RegionalCare and Capella.

On November 11, 2015, RegionalCare entered into an agreement and plan of merger with Holdings and the other parties thereto, in which RegionalCare became a direct wholly-owned subsidiary of Holdings on December 3, 2015. Holdings is an indirect wholly-owned subsidiary of DSB Parent, which is controlled by our Sponsor.

In connection with the Apollo/RegionalCare Acquisition and the RegionalCare/Capella Merger, certain Apollo Funds directly or indirectly managed by the Sponsor contributed in the aggregate approximately $380.0 million of invested capital to DSB Parent.

Our Operations

Services

We operate health systems that provide a range of medical, surgical and behavioral health services across inpatient and outpatient settings, including general surgery, internal medicine, cardiology, radiology, oncology, orthopedics, women's services, neurology, rehabilitation services, pediatric services, emergency services and, primarily through our joint venture with LHC, home health and hospice services. In some of our health systems, we offer specialized services such as open heart surgery, skilled nursing, psychiatric care and neurosurgery. In many markets, we also provide outpatient services such as same day surgery, clinical laboratory services, diagnostic imaging services, respiratory therapy services, sports medicine services, urgent care services and lithotripsy. The services provided in any specific health system depend on many factors, including the community need for the service, whether physicians necessary to safely operate the service line are members of the medical staff of that hospital and the existence of any contractual or certificate of need restrictions.

Management and Oversight

Our executive management team has extensive experience in operating multi-facility hospital networks and plays a vital role in the strategic planning for our facilities. A hospital's local management team is typically composed of a CEO, chief operating officer, chief financial officer and a chief nursing officer. Local management teams and the hospital's Board of Trustees and our corporate management teams, develop annual operating plans setting forth growth strategies through the expansion of current services, implementation of new services and the recruitment and retention of physicians in each community, as well as plans to improve operating efficiencies and reduce costs. We believe that the ability of each local management team to identify and meet the needs of our patients, medical staffs and the community as a whole is critical to the success of our facilities. We base the compensation for each local management team in part on its ability to achieve the goals set forth in the annual operating plan, including quality of care, patient satisfaction and financial measures.

The Board of Trustees at each facility, consisting of local community leaders, members of the medical staff and the facility CEO, advises the local management teams and helps develop the strategic operating plan for their facility. In addition, it plays a key role in providing the patient care excellence that we demand. Members of each Board of Trustees are identified and recommended by our local management teams. The Boards of Trustees oversee policies concerning medical, professional and ethical practices, monitor these practices and ensure that they conform to our high standards. We maintain company-wide compliance and quality assurance programs and use patient care evaluations and other assessment methods to support and monitor quality of care standards and to meet accreditation and regulatory requirements.

The majority of our facilities have a physician engagement group ("***PEG***") or a physician leadership group ("***PLG***") comprised of key physicians and members of the facility's administrative team. The mission of the PEG or PLG is to provide ongoing dialogue between hospital facility administration and members of the medical staff and community physicians primarily in the areas of operations, quality patient care, employee satisfaction and community relations.

We also provide support to the local management teams through our corporate resources in areas such as revenue cycle, business office, legal, managed care, clinical efficiency, physician services and other administrative functions. These resources allow for sharing best practices and standardization of policies and processes among all of our facilities.

Cost Management

We strive to improve our operating performance by making our revenue cycle processes more efficient, making an even higher level of purchases through our group purchasing organization, operating more efficiently and effectively, and working to appropriately standardize our policies, procedures and practices across all of our affiliated facilities.

As part of our ongoing efforts to further manage costs and improve the results of our revenue cycle, we have partnered with a third party to provide certain nonclinical business functions, including payroll processing, supply chain management and revenue cycle functions. We believe this model is the most cost effective and efficient approach to managing these nonclinical business functions across multi-facility enterprises.

Attracting Patients

We believe that the most important factors affecting a patient's choice in facilities are the reputation of the facility, the availability and expertise of physicians and nurses and the location and convenience of the facility. Other factors that affect utilization include local demographics and population growth, local economic conditions and the facility's success in contracting with a wide range of local payers.

Outpatient Services

The healthcare industry has experienced an accelerated shift during recent years from inpatient services to outpatient services as Medicare, Medicaid and managed care payers have sought to reduce costs by shifting lower-acuity cases to an outpatient setting. Advances in medical equipment technology and pharmacology also have supported the shift to outpatient utilization. However, we expect the decline in inpatient admission use rates to moderate over the long term as the baby boomer population reaches ages where inpatient admissions become more prevalent. We have responded to the shift to outpatient services through expanding service offerings and increasing the throughput and convenience of our emergency departments, outpatient surgery facilities and other ancillary units in our facilities.

Sources of Revenues

General

Our facilities generate revenues by providing healthcare services to our patients. Depending upon the patient's medical insurance coverage, we are paid for these services by governmental Medicare and Medicaid programs, commercial insurance, including health maintenance organizations ("***HMOs***"), preferred provider organizations ("***PPOs***") and other private insurers, and directly by the patient. The amounts we are paid for providing healthcare services to our patients vary depending upon the payer. Governmental payers generally pay significantly less than the hospital's customary charges for the services provided. Insured patients are generally not responsible for any difference between customary hospital charges and the amounts received from commercial insurance payers. However, insured patients are responsible for payments not covered by insurance, such as exclusions, deductibles and co-payments.

The following table summarizes our revenues by payer as approximate percentages of our net patient revenues before the provision for doubtful accounts for the years ended December 31, 2018, 2017 and 2016:

	2018	2017	2016
Medicare	37.6 %	40.4 %	36.4 %
Medicaid	13.1	12.2	12.8
HMOs, PPOs and other private insurers	41.3	40.7	42.5
Self-pay	8.0	6.7	8.3
	100.0 %	100.0 %	100.0 %

Certain changes have been made to the classification of our historical sources of revenues. Primarily, we changed the classification of revenues related to our managed Medicare and managed Medicaid programs from HMOs, PPOs and other private insurers to Medicare and Medicaid, respectively, for each of the periods presented above. This change had no impact on our historical results of operations.

Medicare

Our revenues from Medicare were approximately 37.6% of our net patient revenues before the provision for doubtful accounts for the year ended December 31, 2018. Medicare provides hospital and medical insurance benefits, regardless of income, to persons age 65 and over, some disabled persons and persons with end-stage renal or Lou Gehrig's disease. All of our hospitals are currently certified as providers of Medicare services.

Over the years, Congress and the Centers for Medicare and Medicaid Services ("***CMS***") have made several sweeping changes to the Medicare program and its reimbursement methodologies, such as the implementation of the prescription drug benefit that was created by the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the "***MMA***") and the numerous changes contained in the Affordable Care Act. Many of these changes have resulted in decreased reimbursement to healthcare providers. For example, the Budget Control Act of 2011 ("***BCA***") imposed a 2% reduction in Medicare spending which began on April 1, 2013. The Bipartisan Budget Act of 2015 ("***BBA***") and the Bipartisan Budget Act of 2018 (the "***2018 Act***") extended the 2% reduction in Medicare spending through 2027. Additional reductions in Medicare reimbursement could result from changes to, or the repeal of, the Affordable Care Act, or as a result of the enactment of Medicare reform, deficit reduction, or other legislation.

Medicare Inpatient Prospective Payment System

Under the Medicare program, hospitals are reimbursed for the costs of acute care inpatient stays under an inpatient prospective payment system ("***IPPS***"). Under the IPPS, our hospitals are paid a prospectively determined amount for each hospital discharge that is based on the patient's diagnosis. Specifically, each discharge is assigned to a Medicare severity diagnosis related group ("***MS-DRG***"), which groups patients that have similar clinical conditions and that are expected to require a similar amount of hospital resources. Each MS-DRG is, in turn, assigned a relative weight that is prospectively set and that reflects the average amount of resources, as determined on a national basis, that are needed to treat a patient with that particular diagnosis, compared to the amount of hospital resources that are needed to treat the average Medicare inpatient stay. The IPPS payment for each discharge is based on two national base payment rates or standardized amounts, one that covers hospital operating expenses and another that covers hospital capital expenses. The base MS-DRG payment rate for operating expenses has two components, a labor share and a non-labor share. Although the labor share is adjusted by a wage index to reflect geographical differences in the cost of labor, the base MS-DRG payment rate does not consider the actual costs incurred by an individual hospital in providing a particular inpatient service. In addition to IPPS reimbursement, Medicare also makes supplemental payments known as outlier payments to compensate hospitals for cases involving extraordinarily high costs.

The base MS-DRG operating expense payment rate that is used by the Medicare program in the IPPS is adjusted by an update factor each federal fiscal year ("***FFY***"), which begin on October 1 (for example, FFY 2019 began on October 1, 2018). The index used to adjust the base MS-DRG payment rate, which is known as the "hospital market basket index," gives consideration to the inflation experienced by hospitals in purchasing goods and services. For FFYs 2019, 2018 and 2017, the hospital market basket index increased 2.9%, 2.7% and 2.7%, respectively. Generally, however, the percentage increase in the MS-DRG payment rate has been lower than the projected increase in the cost of goods and services purchased by hospitals. In addition, as mandated by the Affordable Care Act, the hospital market basket increases for FFYs 2019, 2018 and 2017 were reduced by CMS by 0.75%, 0.75% and 0.75%, respectively. As also mandated by the Affordable Care Act, the market basket increase is reduced by a productivity adjustment equal to the Bureau of Labor Statistics' 10-year moving average of changes in annual economy-wide productivity. For FFYs 2019, 2018 and 2017, the productivity adjustment equated to a 0.8%, 0.6% and 0.3% reduction in the market basket increase, respectively. As a result of these reductions and other changes implemented by CMS, the MS-DRG-rate increased by 1.85% for FFY 2019.

On October 1, 2007, CMS replaced the previously existing 538 diagnosis related groups with 745 MS-DRGs. The MS-DRGs are intended to more accurately reflect the cost of providing inpatient services and eliminate any incentives that hospitals may have to only treat the healthiest and most profitable patients. The American Taxpayer Relief Act of 2012 ("***ATRA***") required CMS to recoup $11 billion from IPPS payments in FFYs 2014 through 2017 to offset an additional increase in aggregate payments to hospitals that Congress believes occurred from FFY 2008 through 2013 solely as the result of the transition to the MS-DRG system. In FFYs 2014, 2015 and 2016, CMS applied negative 0.8% adjustments as part of the recovery process required by ATRA, and it applied a negative 1.5% adjustment in FFY 2017 to recover the remaining outstanding amount. CMS had previously indicated that the reductions required by ATRA would be fully restored in FFY 2018. However, under the Medicare Access and CHIP Reauthorization Act of 2015 ("***MACRA***"), those reductions will be restored in 0.5% increments over a six year period from FFYs 2018 through 2023, which will result in a cumulative 3.0% increase in rates, which is less than the 3.9% reduction that was imposed by CMS in FFYs 2014 through 2017. In addition, the 21st Century Cures Act (the "***Cures Act***") further reduced the restoration for FFY 2018 from 0.5% to 0.4588%.

CMS has implemented a number of programs and requirements that are intended to promote value based purchasing and to link payments to quality and efficiency. For example, the MMA required all acute care hospitals to participate in CMS' Hospital Inpatient Quality Reporting Program (the "***IQR Program***") in order to receive the full hospital market basket update. Hospitals that do not participate in the IQR Program receive a one-fourth reduction in their IPPS annual payment update for the applicable FFY. Our hospitals reported all quality measures required by CMS related to the IQR Program and will receive the full market basket update through FFY 2019. In addition, hospitals that are not meaningful EHR users are also subject to an additional 75% reduction of the hospital market basket increase.

In addition, the Affordable Care Act requires United States Department of Health and Human Services ("***HHS***") to implement a value-based purchasing program for inpatient hospital services. This program rewards hospitals based either on how well the hospitals perform on certain quality measures or how much the hospitals' performance improves on certain quality measures from their performance during a baseline period. As part of the program, the Affordable Care Act requires HHS to reduce inpatient hospital payments for all discharges by 2.0% each FFY. HHS pools the amount collected from these reductions to fund payments to reward hospitals that meet and exceed certain quality performance standards established by HHS. Under the program, each hospital's performance is evaluated during a specified performance period, and hospitals receive points on each of a number of pre-determined measures based on the higher of (i) their level of achievement relative to an established standard or (ii) their improvement in performance from their performance during a prior baseline period. Each hospital's combined scores on all the measures are translated into value-based incentive payments. Hospitals that receive higher total performance scores receive higher incentive payments than those that receive lower total performance scores. Because the Affordable Care Act provides that the funds pooled and otherwise set aside for the value-based purchasing program will be fully distributed, hospitals with high scores may receive greater reimbursement under the value-based purchasing program than they would have otherwise, and hospitals with low scores may receive reduced Medicare inpatient hospital payments.

Medicare also does not allow an inpatient hospital discharge to be assigned to a higher paying MS-DRG if certain designated hospital acquired conditions ("***HACs***") were not present on admission and the identified HAC is the only condition resulting in the assignment of the higher paying MS-DRG. In those situations, the case is paid as though the secondary diagnosis was not present. In addition, hospitals that fall into the top 25.0% of national risk-adjusted HAC rates for all hospitals in the previous year receive a 1.0% reduction in their total Medicare payments.

Furthermore, inpatient payments are reduced pursuant to the Affordable Care Act if a hospital experiences "excessive readmissions" within a 30-day period of discharge for certain conditions designated by CMS including heart attack, pneumonia and total hip arthroplasty. Hospitals with what HHS defines as "excessive readmissions" for these conditions will receive reduced payments for all inpatient discharges, not just discharges relating to the conditions subject to the excessive readmission standard. Each hospital's performance is publicly reported by HHS. HHS has the discretion to determine what "excessive readmissions" means, the amount of the payment reduction and other terms and conditions of this program. The basic maximum payment reduction amount is 3.0%. The Cures Act does, however, allow for an adjustment factor that would reduce the penalties imposed on hospitals, based on the portion of beneficiaries the hospitals serve that are eligible for both Medicare and Medicaid, beginning in FFY 2019.

Medicare Hospital Outpatient Prospective Payment System and Other Outpatient Services

CMS reimburses hospital outpatient services under the Medicare hospital outpatient prospective payment system ("***OPPS***"), and uses fee schedules to pay for durable medical equipment and physical, occupational and speech therapy, clinical diagnostic laboratory and independent diagnostic testing facility services. Under the OPPS, hospital outpatient services are classified into groups called ambulatory payment classifications ("***APCs***"). Services in each APC are clinically similar and are similar in terms of the resources they require. Depending on the services provided, a hospital may be paid for more than one APC for an encounter. CMS establishes a payment rate for each APC by multiplying the scaled relative weight for the APC by a conversion factor. The payment rate is further adjusted to reflect geographic wage differences. The APC conversion factors for calendar years ("***CYs***") 2019, 2018 and 2017 were $79.490, $78.636 and $75.001, respectively, after the inclusion of the productivity adjustments and other reductions (1.55% for CY 2019, 1.35% for CY 2018 and 1.05% for CY 2017), that were required by the Affordable Care Act. APC classifications and payment rates are reviewed and adjusted on an annual basis, and, historically, the rate of increase in payments for hospital outpatient services has been higher than the rate of increase in payments for inpatient services. To receive the full increase, hospitals must satisfy the reporting requirements of the Hospital Outpatient Quality Reporting Program (the "***OQR Program***"). Hospitals that do not satisfy the reporting requirements of the OQR Program are subject to a reduction of 2.0% in their annual payment update under the OPPS. Our hospitals reported all quality measures required by CMS for the OQR Program and will receive the full market basket update through CY 2019.

Effective as of January 1, 2017, Section 603 of the BBA limits reimbursement for items and services that are furnished by certain off-campus outpatient provider-based departments ("***off-campus PBDs***") of hospitals. CMS included several provisions implementing Section 603 in the OPPS final rule for CY 2017. Under the final rule, CMS will continue to make OPPS payments to off-campus PBDs that were billing Medicare as hospital departments under the OPPS prior to November 2, 2015 ("***grandfathered PBDs***"). However, grandfathered PBDs will generally not be able to relocate, and CMS has indicated that it may adopt limitations on the expansion of the service lines provided at grandfathered PBDs in the future. In addition to grandfathered PBDs, CMS will also continue to reimburse all items and services that are furnished in a "dedicated emergency department" of a hospital, as such term is defined for the purposes of the Emergency Medical Treatment and Active Labor Act ("***EMTALA***"), regardless of whether the items and services are emergency items and services, and all items and services that are furnished in off-campus PBDs that are located within 250 yards of a remote location of a hospital, which is a facility that is either created or acquired by a hospital for the purpose of furnishing inpatient hospital services under the name, ownership, and financial and administrative control of the hospital, under the OPPS. For CY 2019, all items and services not provided at a grandfathered or otherwise excepted off-campus PBD will generally be paid by CMS under Medicare physician fee schedule ("***PFS***") rates that are approximately 40% of the applicable OPPS rate (the "***PFS Adjusted Rate***"). In addition, in 2018, CMS issued a final rule that will generally reimburse clinic visit services provided at all off-campus PBDs, including grandfathered PBDs, at a reduced Medicare PFS-equivalent payment rate. The payment reduction for clinic visit services provided at off-campus PBDs will be phased in over a two year period beginning in FFY 2019.

As part of the OPPS final rule for CY 2018, CMS finalized a change to the payment rate for certain Medicare Part B drugs purchased by hospitals through the 340B Drug Pricing Program (the "***340B Program***"). The 340B Program allows certain non-profit and governmental hospitals and other healthcare providers to obtain substantial discounts on covered outpatient drugs (prescription drugs and biologics other than vaccines) from drug manufacturers. Under the final rule, CMS pays for separately reimbursable, non-pass through drugs and biologicals (other than vaccines) purchased through the 340B Program at the average sales price ("***ASP***") minus 22.5% rather than ASP plus 6%. CMS estimated that this change reduced Medicare payments for drugs and biologicals by $1.6 billion in CY 2018. To maintain budget neutrality, CMS implemented an offsetting increase in the conversion factor, and, as a result, reimbursement rates for non-drug items and services provided by all hospitals, including those not eligible to participate in the 340B program, that are reimbursed under the OPPS. In connection with the OPPS final rule for CY 2019, CMS expanded the 340B Drug Pricing Program payment reductions to drugs that are obtained through the 340B Drug Pricing Program and furnished by non-excepted, off-campus PBDs.

In September 2018, a lawsuit was filed challenging the authority of CMS to make the 340B Program payment reductions set forth in the OPPS final rule for CY 2018. On December 27, 2018, the U.S. District Court for the District of Columbia held that the payment reductions exceeded CMS's statutory authority and entered a permanent injunction against the reductions. However, because the 340B Program payment reductions were made in a budget-neutral manner and the savings derived from the reductions were used to increase reimbursement for all of the other items and services provided under the OPPS, the Court ordered the parties to submit briefs as to how the issue should be remedied. CMS has appealed the Court's ruling. We cannot predict the outcome of CMS's appeal or the remedies, if any, that may be imposed in connection with the 340B Program payment reduction litigation or whether CMS will appeal the Court's ruling. If OPPS payments to hospitals are reduced (either retroactively or prospectively) as a result of the 340B Program payment reduction litigation, we would be materially adversely affected.

Medicare Disproportionate Share Hospital Payments

Hospitals may also qualify for Medicare disproportionate share hospital ("***DSH***") payments, if they treat a high percentage of low-income patients (Medicaid and Medicare patients eligible to receive Supplement Security Income). DSH payments are determined annually based on certain statistical information specified by HHS and are paid as an addition to MS-DRG payments. The Affordable Care Act requires Medicare DSH payments to providers to be reduced by 75% beginning in FFY 2014, subject to adjustment if the Affordable Care Act does not decrease uncompensated care to the extent anticipated. The amount that is withheld is reduced by the percentage change in uninsured individuals under the age of 65, and then paid as additional payments to DSH hospitals based on the amount of uncompensated care provided by each hospital relative to the amount of uncompensated care provided by all hospitals receiving DSH payments during the applicable time period. The IPPS final rule for FFY 2019 established the uncompensated care amount which will be distributed to qualifying hospitals in FFY 2019 at approximately $8.3 billion, up from $6.8 billion in FFY 2018.

Medicare Dependent and Low Volume Hospital Programs

On April 16, 2015, MACRA was enacted. Among other things, MACRA extended the Medicare dependent hospital program, which provides enhanced payment support for rural hospitals that have no more than 100 beds and at least 60% of their inpatient days or discharges covered by Medicare, and the Medicare low volume hospital program, which provides additional Medicare reimbursement for general acute care hospitals that are located a certain distance from another general acute care hospital and have less than a certain number of Medicare discharges each fiscal year, through September 30, 2017. The 2018 Act extended both of these programs through FFY 2022.

Cost Reports

Hospitals participating in the Medicare and some Medicaid programs, whether paid on a reasonable cost basis or under a prospective payment system, are required to meet certain financial reporting requirements. Federal and, where applicable, state regulations require submission of annual cost reports identifying medical costs and expenses associated with the services provided by each hospital to Medicare and Medicaid recipients.

Annual cost reports required under the Medicare and some Medicaid programs are subject to routine governmental audits. These audits may result in adjustments to the amounts ultimately determined to be payable to us under these reimbursement programs. Finalization of these audits often takes several years. Providers may appeal any final determination made in connection with an audit and it is common to contest issues raised in audits of cost reports.

Medicare Bad Debt Reimbursement

Under Medicare, the costs attributable to the deductible and coinsurance amounts that remain unpaid by Medicare beneficiaries after reasonable collection efforts can be added to the Medicare share of allowable costs as cost reports are filed. Hospitals generally receive interim pass-through payments during the cost report year which were determined by the Medicare administrative contractor from the prior cost report filing.

The amounts uncollectible from specific beneficiaries are to be charged off as bad debts in the accounting period in which the accounts are deemed to be worthless. In some cases, an amount previously written off as a bad debt and allocated to the program may be recovered in a subsequent accounting period. In these cases, the recoveries must be used to reduce the cost of beneficiary services for the period in which the collection is made. In determining reasonable costs for hospitals, the amount of bad debts otherwise treated as allowable costs is reduced by 35%.

Physician Services

Physician services provided to Medicare beneficiaries are reimbursed under the PFS, under which CMS has assigned a national relative value unit ("***RVU***") to most medical procedures and services that reflects the various resources required by a physician to provide the services relative to all other services. Each RVU is calculated based on a combination of work required in terms of time and intensity of effort for the service, practice expense (overhead) attributable to the service and malpractice insurance expense attributable to the service. These three elements are each modified by a geographic adjustment factor to account for local practice costs then aggregated. The aggregated amount had historically been multiplied by a conversion factor that accounts for inflation and targeted growth in Medicare expenditures (as calculated by the sustainable growth rate ("***SGR***")) to arrive at the payment amount for each service. The SGR generally resulted in significant reductions to payments made under the PFS, and Congress has passed multiple legislative acts delaying application of the SGR to the PFS.

MACRA replaced the SGR formula with a new system for establishing the annual updates to payments made under the PFS. Under MACRA, the PFS payment rates that were in effect when MACRA was enacted were extended through June 30, 2015, and then increased by 0.5% for the remainder of CY 2015. PFS payment rates were increased by an additional 0.5% for CYs 2016, 2017 and 2018 and, after the adoption of the 2018 Act were increased by 0.25% for CY 2019. PFS payment rates will then remain at their CY 2019 levels through CY 2025. Beginning in CY 2019, amounts paid to individual physicians are subject to adjustment through the Quality Payment Program ("***QPP***") and participation in either the Merit-Based Incentive Payment System ("***MIPS***") or an Advanced Alternative Payment Model ("***APM***") program. Physicians who participate in the MIPS program, which essentially consolidates the existing Physician Quality Reporting System, the Value-Based Modifier, and the Meaningful Use of EHR incentive programs, would be subject to positive, zero, or negative performance adjustments depending on how the physician's performance compared to a performance threshold. In addition, from CY 2019 through CY 2024, MACRA provides $500 million per year for an additional performance adjustment for physicians who participate in MIPS and achieve exceptional performance. Physicians who participate in an APM program, which, among other things, requires the physicians to receive a substantial amount of their revenue from an APM, would receive, from CYs 2019 through 2024, a lump-sum payment equal to 5% of their Medicare payments in the prior year for services paid under the PFS. Beginning in CY 2026, PFS payment rates for physicians participating in an APM program would be increased by 0.75% a year. Payments for other providers would be increased by 0.25% per year.

Medicaid

Our revenues under the various state Medicaid programs were approximately 13.1% of our net patient revenues before the provision for doubtful accounts for the year ended December 31, 2018. Included in these payments are DSH and other supplemental payments received under various state Medicaid programs. Medicaid programs are funded by both the federal government and states to provide healthcare benefits to limited categories of low-income individuals under 65 years of age. These programs and the reimbursement methodologies are administered by the states under approved plans and vary from state to state and from year to year. Amounts received under the Medicaid programs are often significantly less than the hospital's customary charges for the services provided. Most state Medicaid payments are made under a prospective payment system, fee schedule, cost reimbursement program, or some combination of these three methods. All of our hospitals are currently certified to participate in their respective state Medicaid programs.

The Affordable Care Act essentially requires states to expand medical coverage to all individuals under age 65 with incomes effectively at or below 138% of the federal poverty level ("***FPL***"). However that portion of the Affordable Care Act was held to be unconstitutional by the U.S. Supreme Court, and, as a result, states may opt out of the expansion without losing their existing Medicaid funding. Therefore, the income level required for individuals to qualify for Medicaid varies widely from state to state. To offset the cost of the Medicaid program's expansion, the Affordable Care Act authorized the federal government to provide states with "matching funds" (referred to as "***Enhanced FMAP***") to cover the costs of covering the newly eligible individuals. The Enhanced FMAP was 100% for CYs 2014 through 2016; 95% in 2017; 94% in 2018; is 93% in 2019; and will be 90% in 2020 and thereafter.

In recent years, we have benefited from the expansion of Medicaid under the Affordable Care Act, and effective as of January 1, 2019, Virginia, an additional state in which we operate, expanded its Medicaid program. However, a number of states in which we operate have not expanded their Medicaid programs, and several states have adopted or are considering legislation designed to reduce or control their Medicaid expenditures, including enrolling Medicaid recipients in managed care programs, and imposing additional taxes on hospitals to help finance such states' Medicaid systems. Given the reductions in the Enhanced FMAP and in light of the possible repeal, replacement or modification of the Affordable Care Act, we are unable to predict how many, if any, additional states in which we operate will expand their Medicaid programs or how many, if any, of the states in which we operate that have expanded their Medicaid programs will keep their expansions in place in the future.

The Affordable Care Act also included a number of provisions that are intended to improve the quality of care that is provided to Medicaid beneficiaries. Among other things, the Affordable Care Act prohibits federal funds from being used to reimburse providers for services related to provider preventable conditions, such as HACs, wrong site surgeries and other provider preventable conditions that may be designated by each state Medicaid program.

Work Requirements

In addition to implementing value-based purchasing and quality-driven reimbursement requirements, CMS also recently issued new guidance permitting states to impose work and/or community engagement on certain Medicaid beneficiaries. In response to the guidance, a number of states, including several in which the Company has facilities, have requested demonstration waivers from CMS that would allow those states to impose work requirements on their Medicaid beneficiaries. CMS has approved the requests that have been made by Arizona, Arkansas, Indiana, Kentucky, Michigan, New Hampshire and Wisconsin, and the remaining requests are still pending. The approved waivers and work requirements have already been implemented in Arkansas and Indiana, and the other waivers that have been approved are scheduled to take effect in the upcoming months. However, lawsuits have been filed in the U.S. District Court for the District of Columbia challenging the authority of CMS to allow the Arkansas and Kentucky Medicaid programs to impose work requirements on their respective beneficiaries. We cannot predict whether CMS will grant additional waivers that allow for the imposition of work and community engagement requirements on Medicaid beneficiaries or the impact that any such waivers will have on coverage for patients seeking care at our facilities. We also cannot predict whether the legal challenges that have been initiated against the Arkansas and Kentucky demonstration waivers will be successful or whether any legal challenges will be initiated against any other similar demonstration waivers that have been or may be granted by CMS in the future.

Additionally, as part of the movement to repeal, replace or modify the Affordable Care Act and as a means to reduce the federal budget deficit, there have been Congressional efforts to move Medicaid from an open-ended program with coverage and benefits set by the federal government to one in which states receive a fixed amount of federal funds, either through block grants or per capita caps, and have more flexibility to determine benefits, eligibility and provider payments. If implemented, we cannot predict whether the amount of fixed federal funding to the states will be based on current payment amounts, or if it will be based on lower payment amounts, which would negatively impact those states that expanded their Medicaid programs in response to the Affordable Care Act. Such efforts to modify or reduce federal funding of the Medicaid program, as well as those that would reduce the amount of federal Medicaid matching funds available to states by curtailing the use of provider taxes, could have a negative impact on state Medicaid budgets resulting in less coverage for eligible individuals.

Medicaid Disproportionate Share Hospital Payments

In addition to Medicare DSH funding, hospitals that provide care to a disproportionately high number of low-income patients may receive Medicaid DSH payments. The federal government distributes federal Medicaid DSH funds to each state based on a statutory formula. The states then distribute the DSH funding among qualifying hospitals. Although federal Medicaid law defines some level of hospitals that must receive Medicaid DSH funding, states have broad discretion to define additional hospitals that also may qualify for Medicaid DSH payments and the amount of such payments.

Pursuant to the Affordable Care Act, as amended by subsequent legislation, funding for Medicaid DSH programs is to be reduced by $4 billion in FFY2020 and $8 billion per year from FFY 2021 through 2025. Because many of the states in which we operate have not expanded Medicaid programs as intended under the Affordable Care Act, the reduction in Medicaid DSH payments may take place without a coupled increase in the Medicaid eligible population, thus increasing the net amount of uncompensated care we provide.

Budget cuts, federal or state legislation, or other changes in the administration or interpretation of government health programs by government agencies or contracted managed care organizations could have a material adverse effect on our financial position and results of operations.

Recovery Audit and Other Review Contractors

Recovery audit contractors ("***RACs***") are used by CMS and state agencies to detect Medicare and Medicaid overpayments not identified through existing claims review mechanisms. The RAC program relies on private companies to examine Medicare and Medicaid claims filed by healthcare providers. RACs perform post-discharge audits of medical records to identify overpayments resulting from incorrect payment amounts, non-covered services, medically unnecessary services, incorrectly coded services, and duplicate services and are paid on a contingency basis. Any claims identified as overpayments are subject to a RAC program appeals process. In 2016, in connection with the procurement of the new recovery audit contracts, CMS made a number of enhancements to the RAC program, including the establishment of a RAC program Provider Relations Coordinator, requiring RACs to maintain an overturn rate of less than 10% at the first level of appeal, requiring RACs to maintain an accuracy rate of at least 95%, and establishing additional documentation request limits based on a provider's compliance with Medicare rules, that are intended to address provider and other stakeholder concerns. CMS has also limited the number of claims that RACs may audit by limiting the number of records that RACs may request from hospitals based on each hospital's claim denial rate for the previous year.

In addition to RACs, CMS employs Unified Program Integrity Contractors ("***UPICs***"), which integrate the functions of the former Zone Program Integrity Contractors, Program Safeguard Contractors, and Medicaid Integrity Contractors, to perform post-payment audits of Medicare and Medicaid claims and identify overpayments. A number of state Medicaid agencies and other contractors have also increased their review activities.

Although we believe our claims for reimbursement submitted to the Medicare and Medicaid programs are accurate, many of our hospitals have had Medicare claims audited by the RAC program. While our hospitals have successfully appealed many of the adverse determinations raised by Medicare RAC audits, we cannot predict if this trend will continue or the results of any future audits. We cannot predict the volume or outcome of any future audits conducted by the various RAC and other review programs to which our hospitals will be subject.

Utilization and Claim Review

Federal law contains numerous provisions designed to ensure that services rendered to Medicare and Medicaid patients meet professionally recognized standards and are medically necessary and that claims for reimbursement are properly filed. These provisions include a requirement that a sampling of admissions of Medicare and Medicaid patients must be reviewed on a post-discharge basis by quality improvement organizations ("***QIOs***"), which review the appropriateness of Medicare and Medicaid patient admissions and discharges, the quality of care provided, the validity of MS-DRG classifications and the appropriateness of cases of extraordinary length of stay or cost. QIOs may deny payment for services or assess fines and also have the authority to recommend to HHS that a provider which is in substantial noncompliance with the standards of the QIO be excluded from participation in the Medicare program. Utilization review is also a requirement of most non-governmental managed care organizations.

In addition to utilization reviews, CMS has also adopted a nationwide claim review and provider education program known as the Targeted Probe and Educate ("***TPE***") program, which is intended to reduce errors in the claims submission process and focuses on items and services that pose the greatest risk to the Medicare program or that have a high national error rate, such as short inpatient stays. Under the TPE program, Medicare administrative contractors ("***MACs***", and each individually, a "***MAC***") use data analysis to identify providers who, for a particular item or service, have high claim denial rates or billing practices that vary significantly from their peers. Once a provider has been identified, the MAC reviews between 20 and 40 of the provider's claims for the item or service and, if issues are noted, offers the provider an individualized education session that is based on the results of the review. The provider is then generally given 45 days to improve its systems and processes, and, after that period has ended, the MAC conducts another review of the provider's claims. If additional issues are identified, the provider is given the opportunity for another education session. Providers are typically given three rounds of review and education before being referred to CMS for further action, such as pre-payment or RAC review.

HMOs, PPOs and Other Private Insurers

In addition to government programs, our facilities are reimbursed by differing types of private payers including HMOs, PPOs and other private insurers. Also included in this category are the patient responsibility portions for co-payment and deductible obligations under these programs. Our revenues from HMOs, PPOs and other private insurers were approximately 41.3% of our net patient revenues before the provision for doubtful accounts for the year ended December 31, 2018. Revenues from HMOs, PPOs and other private insurers are subject to contracts and other arrangements that require us to discount the amounts we customarily charge for healthcare services or accept fixed, pre-determined fees for our services. These discounted arrangements often limit our ability to increase charges or revenues in response to increasing costs. We actively negotiate with these payers in an effort to maintain or increase the pricing of our healthcare services; however, we have no control over patients switching their healthcare coverage to a payer with which we have negotiated less favorable reimbursement rates. In recent years, an increasing number of our patients have moved to lower cost healthcare coverage plans, and such plans generally provide lower reimbursement rates and require patients to pay an increased portion of the costs of care through deductibles, co-payments or exclusions. Additionally, plans purchased through the Affordable Care Act health insurance marketplace exchanges (the "***Exchanges***") are increasingly using narrow and tiered networks that limit beneficiary provider choices. If we provide services when we are not a participating provider in the network, it can result in higher patient responsibility amounts that a patient may not have the ability to pay or may choose not to pay. We expect these trends to continue in the coming years.

Self-Pay Patients

Self-pay revenues are derived from patients who do not have any form of healthcare coverage. Our revenues from self-pay patients were approximately 8.0% of our net patient revenues before the provision for doubtful accounts for the year ended December 31, 2018. The revenues associated with self-pay patients are generally reported at our gross charges. We evaluate these patients, after the patient's medical condition is determined to be stable, for qualifications of Medicaid or other governmental assistance programs, as well as our local hospital's policy for charity care. We do not report a charity care patient's charges in revenues or in the provision for doubtful accounts as it is our policy not to pursue collection of amounts related to these patients. Our ability to collect self-pay revenues is dependent on a combination of broad economic factors, including unemployment levels in our markets.

Health Care Reform

The Affordable Care Act, which became federal law in 2010, dramatically altered the U.S. healthcare system and was intended to decrease the number of uninsured Americans and reduce the overall cost of healthcare by, among other things, requiring most Americans to obtain health insurance (the "***individual mandate***"), providing additional funding for Medicaid in states that choose to expand their programs, reducing IPPS, OPPS and Medicare and Medicaid DSH payments to providers, expanding the Medicare program's use of value-based purchasing programs, tying hospital payments to the satisfaction of certain quality criteria, and instituting certain private health insurance reforms. The Affordable Care Act has, however, been subject to a number of legislative and regulatory changes and court challenges and its future is uncertain.

For example, on January 20, 2017, President Trump issued an executive order that, among other things, stated that it was the intent of his administration to repeal the Affordable Care Act and, pending that repeal, instructed the executive branch of the federal government to defer or delay the implementation of any provision or requirement of the Affordable Care Act that would impose a fiscal burden on any state or a cost, fee, tax or penalty on any individual, family, health care provider, or health insurer. On October 12, 2017, President Trump issued another executive order related to the Affordable Care Act that resulted in the issuance of regulations that are intended to encourage the formation of association health plans and increase the maximum duration of and access to short-term limited duration health insurance plans, neither of which are required to cover all of the essential health benefits mandated by the Affordable Care Act. In addition, a number of bills have been introduced in Congress that would repeal the Affordable Care Act and would replace it with varying health coverage plans, including plans that would allow insurers to sell health insurance across state lines, allow the use of health savings accounts ("***HSAs***") without a high-deductible plan, or give states the option to either keep the coverage framework created by the Affordable Care Act (e.g., expanded Medicaid, individual subsidies, and insurance exchanges) or utilize the increased federal funding that was intended for Medicaid expansion to be provided by the federal government under the Affordable Care Act to create HSAs that can be used by low-income individuals to purchase health insurance. Also, the Tax Act repealed the penalties associated with the individual mandate effective January 1, 2019. We cannot predict whether the Affordable Care Act will be repealed, replaced, or materially modified by Congress or the impact that the repeal of the penalties associated with the individual mandate will have on our facilities.

In addition to the administrative actions and legislative efforts to repeal, replace or modify the Affordable Care Act, there have been and will likely continue to be a number of legal challenges to various provisions of the Affordable Care Act. For example, in 2014, the U.S. House of Representatives (the "***House***") filed a lawsuit challenging the use of federal funds to pay insurance companies for cost sharing reductions that are provided to certain individuals who purchase insurance through the Exchanges. The House lawsuit was ultimately settled after HHS stopped making cost sharing reduction payments to insurance companies based on the determination that these payments had not been appropriated by Congress. A number of insurers have, however, filed litigation against HHS to recover the cost sharing reduction payments that have not been made. In addition, on December 14, 2018, the U.S. District Court for the Northern District of Texas held that, in light of the repeal of the penalties associated with the individual mandate, the entire Affordable Care Act was unconstitutional. The Court did not, however, issue an injunction against the continued enforcement of the Affordable Care Act, and seventeen states and the House have appealed the Court's ruling. We cannot predict the outcome of the litigation that has been filed by insurers relating to the cessation of HHS's cost sharing reduction payments, the impact that the cessation of HHS's cost sharing reduction payments will have on the premiums that are charged by insurers or the outcome of the appeal regarding the constitutionality of the Affordable Care Act.

Unless specifically stated otherwise, our summary of provisions of the Affordable Care Act throughout the remainder of this section and elsewhere in this Report are based on the law as currently in effect. Additionally, refer to the section below captioned "Impact of the Affordable Care Act on the Company" for further discussion about the uncertainty surrounding the Affordable Care Act.

Expanded Coverage

Based on original Congressional Budget Office ("CBO") and CMS estimates, by 2019, the Affordable Care Act was originally expected to expand coverage to 32 to 34 million additional individuals (resulting in coverage of an estimated 94% of the legal U.S. population). This increased coverage was expected to occur through a combination of public program expansion and private sector health insurance and other reforms.

Public program expansion has been driven primarily by expanding the categories of individuals who are eligible for Medicaid coverage and allowing individuals with relatively higher incomes to qualify for Medicaid coverage.

The Affordable Care Act essentially made the expansion of the Medicaid program mandatory, but, in 2012, the U.S. Supreme Court held that the provision of the Affordable Care Act that authorized the Secretary of HHS to penalize states that chose not to participate in the expansion of the Medicaid program by removing all of their existing Medicaid funding was unconstitutional. Based on the U.S. Supreme Court's ruling, a number of states, including several in which the Company has facilities, have opted not to expand their Medicaid programs. Public program expansion has also occurred through provisions of the Affordable Care Act that authorize the federal government to subsidize states that create non-Medicaid plans for residents whose incomes are greater than 133% of the FPL but do not exceed 200% of the FPL and allow Medicaid participating hospitals to make presumptive determinations of Medicaid eligibility for certain categories of individuals, such as pregnant women, infants, children, and parents and other caretaker relatives and their spouses. If an individual is found to be presumptively eligible for Medicaid benefits, the hospital will get paid for the services it provides during the temporary presumptive eligibility period, just as though the patient were already enrolled in the Medicaid program.

The expansion of health coverage through the private sector as a result of the Affordable Care Act has occurred through new requirements on health insurers, employers and individuals. For example, commencing January 1, 2014, health insurance companies were prohibited from imposing annual coverage limits, dropping coverage, excluding persons based upon pre-existing conditions or denying coverage for any individual who is willing to pay the premiums for such coverage. In addition, since January 1, 2011, each health plan has been required to keep its annual non-medical costs lower than 15% of premium revenue for the group market and lower than 20% in the small group and individual markets or rebate its enrollees the amount spent in excess of the percentage. Also, since September 23, 2010, health insurers have not been permitted to deny coverage to children based upon a pre-existing condition and must allow dependent care coverage for children up to 26 years old. Larger employers are subject to new requirements and incentives to provide health insurance benefits to their full time employees, and, effective January 1, 2016, all employers subject to the requirement are required to offer health insurance coverage to 95% of their full-time employees and their dependents in order to avoid penalties.

To facilitate the purchase of health insurance by individuals and small employers, each state was required to establish an Exchange by January 1, 2014. For individuals and families below 400% of the FPL, the cost of obtaining health insurance through the Exchanges is subsidized by the federal government. Those with lower incomes will be eligible to receive greater subsidies. Health insurers participating in the Exchange must offer a set of minimum benefits to be defined by HHS and may offer more benefits. Any benefits to us from the expansion of private sector coverage depend in large part on our success in contracting with payers whose policies are listed on the Exchanges. We currently have contracts with Exchange payers in every state in which we operate, and the reimbursement rates paid under those contracts generally are comparable to that paid to us by other private payers.

Beginning in 2014 and continuing throughout 2018, primarily as a result of the expansion of health insurance coverage, we experienced an increase in revenues from providing care to certain previously uninsured individuals. Although we expect this trend to continue, the future impact and timing of such expansion remains difficult to predict for the reasons discussed above, will be gradual and may not offset scheduled decreases in reimbursement. Additionally, we cannot predict the impact of the cessation of cost sharing reduction payments, the repeal of the individual mandate or any other modifications to the Affordable Care Act that may be adopted.

Public Program Spending

The Affordable Care Act provides for Medicare, Medicaid and other federal healthcare program spending reductions between 2010 and 2019. The CBO previously estimated that these program spending reductions would include $156 billion in Medicare fee-for-service market basket and productivity reimbursement reductions for all providers, the majority of which would come from hospitals. CMS previously set this estimate at $233 billion. The CBO's estimate also included an additional $36 billion in reductions of Medicare and Medicaid DSH funding ($22 billion for Medicare and $14 billion for Medicaid). The CMS estimate included an additional $64 billion in reductions of Medicare and Medicaid DSH funding, with $50 billion of the reductions coming from Medicare.

Accountable Care Organizations

The Affordable Care Act requires HHS to establish a Medicare Shared Savings Program that promotes accountability and coordination of care through the creation of accountable care organizations ("***ACOs***"). ACOs are groups of hospitals, physicians and other designated professionals and suppliers who come together voluntarily to invest in infrastructure and redesign delivery processes to achieve high quality and efficient delivery of services. The program is intended to produce savings as a result of improved quality and operational efficiency. ACOs that achieve quality performance standards established by HHS are eligible to share in a portion of the amounts saved by the Medicare program. There are several types of ACO programs, and as of January 2018, approximately 560 ACOs had been established to participate in the Medicare Shared Savings Program, and additional ACOs are being established by private payers. A few of our facilities currently participate in ACOs.

Bundled Payment Pilot Programs

The Affordable Care Act created the Center for Medicare & Medicaid Innovation ("***CMMI***") and made it responsible for establishing demonstration projects and other initiatives in order to identify, develop, test and encourage the adoption of new methods of delivering and paying for healthcare that create savings under the Medicare and Medicaid programs while improving quality of care. Under these projects and initiatives, participating providers agree to receive one payment for services provided to Medicare patients for certain medical conditions or episodes of care and accept accountability for costs and the quality of care that is provided. By rewarding providers for quality, cost-effective care and penalizing providers when costs exceed a certain amount, these models are intended to lead to higher quality, more coordinated care at a lower cost to the Medicare program. In connection with these programs, CMMI has developed a voluntary Bundled Payment for Care Improvement initiative to test innovative payment and service delivery models that have the potential to reduce Medicare and Medicaid expenditures while preserving or enhancing the quality of care for beneficiaries. Participation in bundled payments programs is generally voluntary, but CMS does currently require hospitals in certain geographic areas to participate in the Comprehensive Care for Joint Replacement model which covers certain extremity joint replacement procedures. CMS has indicated that it expects to increase opportunities for providers to participate in voluntary bundled payment models initiatives and that it may create additional mandatory bundled payment models in the future. Several of our facilities currently participate in bundled payment programs.

Specialty Hospital Limitations

Over the last decade, we have faced competition from hospitals that have physician ownership. The Affordable Care Act prohibits newly created physician-owned hospitals from billing for Medicare patients referred by their physician owners. While the Affordable Care Act grandfathers existing physician-owned hospitals, it does not allow these hospitals to increase the percentage of physician ownership and significantly restricts their ability to expand. As of December 31, 2018, we operate four hospitals through joint ventures with physicians in which we own a controlling interest.

Impact of the Affordable Care Act on the Company

The expansion of health insurance coverage under the Affordable Care Act has resulted in an increase in the number of patients using our facilities who have either private or public program coverage. It is difficult to predict with great precision the timing or size of positive or negative impacts on revenue as a result of the Affordable Care Act, because of uncertainty surrounding a number of material factors, including the following:

- the elimination of the penalties associated with the individual mandate;
- the cessation of cost sharing reduction payments to insurers;
- the possibility that the Affordable Care Act will be repealed and/or replaced or further modified by Congress;
- even if the Affordable Care Act is not repealed, replaced or further modified, the level of disruption that may be caused by continuing legal challenges and other efforts to delay, block or eliminate specific provisions of the Affordable Care Act, including the outcome of litigation relating to the continued constitutionality of the Affordable Care Act;
- how many previously uninsured individuals will ultimately obtain coverage as a result of the Affordable Care Act;
- what percentage of the future newly insured patients will be covered under the Medicaid program and what percentage will be covered by private health insurers;
- the extent to which states impose work and community engagement and/or premium requirements on their Medicaid beneficiaries;
- the number of states that ultimately elect to expand their Medicaid programs and when that expansion occurs;
- whether any states that have expanded their Medicaid programs will scale back such expansion through the imposition of work or premium requirements or otherwise as the Enhanced FMAP is reduced;
- the extent to which states will enroll any new Medicaid participants in managed care programs;
- the rates charged by private payers for insurance purchased on the Exchanges;
- the change, if any, in the volume of inpatient and outpatient hospital services that are sought by and provided to previously uninsured individuals;
- the future rates paid to hospitals by private payers for newly covered individuals under different plans, including those covered through the newly created Exchanges and those who might be covered under the Medicaid program under contracts with the state;
- increasing self-pay as a result of individuals in the Exchanges who select high deductible plans, and risks presented by their ability to pay such deductibles;
- whether or not private insurers will participate in the Exchanges, and whether such participation is through the use of narrow networks that restrict the number of participating providers or tiered networks that impose significantly higher cost sharing obligations on patients that obtain services from providers in a disfavored tier; and

- whether the net effect of the Affordable Care Act, including the prohibition on excluding individuals based on pre-existing conditions, the requirement to keep medical costs lower than a specified percentage of premium revenue, other health insurance reforms and the annual fee applied to all health insurers, will be to put pressure on the bottom line of health insurers, which in turn might cause them to seek to reduce payments to hospitals with respect to both newly insured individuals and their existing business.

Additionally, since approximately 50.7% of our net patient revenues before the provision for doubtful accounts in 2018 were from Medicare and Medicaid, collectively, the reductions in Medicare and Medicaid reimbursement and in the growth of spending by the Medicare and Medicaid programs that are contemplated by the Affordable Care Act will significantly impact us and could offset any positive effects of the Affordable Care Act. It is difficult to predict with great precision the size of the revenue reductions to Medicare and Medicaid spending, because of uncertainty regarding a number of material factors, including the following:

- the amount of overall revenues we will generate from Medicare and Medicaid business when the reductions are fully implemented;
- whether reductions required by the Affordable Care Act will be changed by statute;
- whether efforts to reform Medicaid funding into block grants or per capita caps will be successful, and, if implemented, the impact such changes may have on the Medicaid programs of states in which we operate;
- the size of the Affordable Care Act's annual productivity adjustment to the market basket in future years;
- the amount of the Medicare DSH reductions that are made;
- the allocation to our hospitals of the Medicaid DSH reductions, commencing in FFY 2020;
- what the losses in revenues will be, if any, from the Affordable Care Act's quality initiatives;
- the scope and nature of potential changes to Medicare reimbursement methods, such as an emphasis on bundling payments or coordination of care programs; and
- reductions to Medicare payments CMS may impose for "excessive readmissions."

Because of the many variables involved, we are unable to predict the future effect on the Company of the expected increases or decreases in insured individuals using our facilities, the reductions in Medicare spending and reductions in Medicare and Medicaid DSH funding, and numerous other provisions in the Affordable Care Act that may affect us. Additionally, it is unclear how many states will ultimately implement the Medicaid expansion, whether the Medicaid program will be reformed, or whether the Affordable Care Act will be replaced, further modified or found to be unconstitutional. Due to these factors, we are unable to predict with any reasonable certainty or otherwise quantify the future impact of the Affordable Care Act on our business model, financial condition or result of operations.

Competition for Patients

Our hospitals and other healthcare businesses operate in extremely competitive environments. Competition among healthcare providers occurs primarily at the local level. Accordingly, each facility develops its own strategies to address competition locally. A hospital's position within the geographic area in which it operates is affected by a number of competitive factors, including, but not limited to:

- the scope, breadth and quality of services a hospital offers to its patients and physicians;
- whether new, competitive services are subject to certificate of need or other restrictions;
- the number, quality and specialties of the physicians who admit and refer patients to the hospital;
- nurses and other healthcare professionals employed by the hospital or on the hospital's staff;
- the hospital's reputation;
- its managed care contracting relationships;
- its location and the location and number of competitive facilities and other healthcare alternatives;
- the physical condition of its buildings and improvements;
- the quality, age and state-of-the-art of its medical equipment;
- its parking or proximity to public transportation;
- the length of time it has been a part of the community;
- the relative convenience of the manner in which care is provided (for example, whether services are available on an outpatient basis and whether services can be obtained quickly);
- the choices made by the physicians on the medical staff of the hospital; and
- the charges for its services.

In addition, tax-exempt competitors may have certain financial advantages not available to our facilities, such as endowments, charitable contributions, tax-exempt financing, exemptions from sales, property and income taxes, and participation in the 340B Program. In certain states, some not-for-profit hospitals are permitted by law to directly employ physicians while for-profit hospitals are prohibited from doing so.

We also face increasing competition from specialized care providers, including freestanding emergency departments and outpatient surgery, oncology, physical therapy, diagnostic and urgent care centers, as well as competing services rendered in physician offices. To the extent that other providers are successful in developing specialized outpatient facilities, our market share for those specialized services will likely decrease. Physician competition also has increased as physicians, in some cases, have become equity owners in surgery centers and outpatient diagnostic centers to which they refer patients. Some of our hospitals have developed specialized outpatient facilities where necessary to compete with these other providers.

Competition for Professionals

Our facilities must also compete for professional talent. A significant factor in our future success will be the ability of our facilities to attract and retain physicians, as it is physicians who decide whether a patient is admitted to the hospital and the procedures to be performed. We seek to attract physicians by striving to employ excellent nurses, equipping our facilities with technologically advanced equipment and an attractive, up-to-date physical plant, properly maintaining the equipment and physical plant, and otherwise creating an environment within which physicians choose to practice. While physicians may terminate their association with our facilities at any time, we believe that by striving to maintain and improve the quality of care at our facilities and by maintaining ethical and professional standards, our facilities will be better positioned to attract and retain qualified physicians with a variety of specialties.

We also recruit physicians to the communities in which our facilities are located. The types, amount and duration of compensation and assistance we can provide to recruited physicians are limited by the federal physician self-referral law (commonly referred to as the "***Stark law***"), the Anti-kickback Statute, state anti-kickback and physician self-referral statutes, and related regulations. The Stark law requires, among other things, that recruitment assistance can only be provided to physicians who meet certain geographic and practice requirements, that the amount of assistance cannot be changed during the term of the recruitment agreement, and that the recruitment payments cannot generally benefit physicians currently in practice in the community beyond recruitment costs actually incurred. In addition to these legal requirements, there is competition from other communities and facilities for these physicians, and this competition continues after the physician begins practicing in one of our communities.

Many physicians today prefer to be employed, rather than operating their own practices or joining existing medical groups. Our hospitals and affiliated entities had more employed physicians at the end of 2018 than at the end of 2017. When employing office-based physicians, we also often employ office employees and other personnel necessary to support these physicians and incur additional expenses as a result. We expect this trend to continue.

We compete with other healthcare providers in recruiting and retaining qualified management and staff personnel responsible for the day-to-day operations of each of our facilities, including nurses and other non-physician healthcare professionals. In some markets, the scarce availability of nurses and other medical support personnel presents a significant operating issue. This shortage may require us to enhance wages and benefits to recruit and retain nurses and other medical support personnel, recruit personnel from foreign countries, and hire more expensive temporary personnel. We also depend on the available labor pool of semi-skilled and unskilled employees in each of the markets in which we operate.

Employees

At December 31, 2018, we had approximately 56,000 employees, including approximately 12,500 part-time employees. The majority are hospital-based employees, including nursing staff, physical and occupational therapists, laboratory and radiology technicians, pharmacy staff, facility maintenance workers and the administrative staffs of our facilities. Approximately 2,500 of our employees across ten different facilities are unionized. While some of our non-unionized facilities experience union organizing activity from time to time, currently we do not expect these efforts to affect our future operations materially. Our facilities, like most facilities, have experienced rising labor costs. Our labor costs also may increase at higher rates among unionized employees. Unionized employees also may have rights under their collective bargaining agreements that restrict the ability of a facility to take certain actions with respect to these employees.

Government Regulation

Overview

All participants in the healthcare industry are required to comply with extensive government regulations at the federal, state and local levels. Under these laws and regulations, facilities must meet requirements for licensure and to qualify to participate in government healthcare programs, including the Medicare and Medicaid programs. These requirements relate to the adequacy of medical care, equipment, personnel, operating policies and procedures, maintenance of adequate records, rate-setting, compliance with building codes and environmental protection laws. If we fail to comply with applicable laws and regulations, we may be subject to criminal penalties and civil sanctions, and our facilities may lose their licenses and ability to participate in Medicare and Medicaid. In addition, government regulations frequently change. When regulations change, we may be required to make changes in our facilities, equipment, personnel and services so that our facilities remain licensed and qualified to participate in these programs. We believe that our facilities are in substantial compliance with current federal, state and local regulations and standards.

Acute care hospitals are subject to periodic inspection by federal, state and local authorities to determine their compliance with applicable regulations and requirements necessary for licensing, certification and accreditation. All of our hospitals are currently licensed under appropriate state laws and are qualified to participate in the Medicare and Medicaid programs. In addition, as of December 31, 2018, with the exception of Bluegrass Community Hospital and Saline Memorial Hospital, all of our hospitals were accredited by the Joint Commission.

Fraud and Abuse Laws

Participation in Medicare and/or Medicaid programs is heavily regulated by federal statutes and regulations. If a hospital fails to comply substantially with the numerous federal laws governing the facility's activities, the hospital's participation in the Medicare and/or Medicaid programs may be terminated, and/or civil or criminal penalties may be imposed. For example, a hospital may lose its ability to participate in Medicare and/or Medicaid programs if it, among other things:

- submits claims to Medicare and/or Medicaid for services not provided or misrepresents actual services provided in order to obtain higher payments;
- pays money to induce the referral of patients or purchase of items or services where such items or services are reimbursable under a federal or state healthcare program; or
- fails to provide appropriate emergency medical screening services to any individual who comes to a hospital's campus or otherwise fails to properly treat and transfer emergency patients.

The Health Insurance Portability and Accountability Act of 1996 ("***HIPAA***") broadened the scope of the fraud and abuse laws by adding several criminal statutes that apply to all health plans regardless of whether any payments by such plans are made by or through a federal healthcare program. In addition, HIPAA created civil penalties for certain proscribed conduct, including upcoding and billing for medically unnecessary goods or services and established new enforcement mechanisms to combat fraud and abuse. These new mechanisms include a bounty system, where a portion of the payments recovered is returned to the applicable government agency, as well as a whistleblower program. HIPAA also expanded the categories of persons that may be excluded from participation in federal and state healthcare programs.

Anti-kickback Statute

The Anti-kickback Statute prohibits the payment, receipt, offer or solicitation of anything of value, whether in cash or in kind, with the intent of generating referrals or orders for services or items covered by a federal or state healthcare program. Violations of the Anti-kickback Statute are punishable by, among other things, criminal fines of up to $100,000 for each violation, substantial civil monetary penalties for each violation that are subject to annual adjustments for inflation, damages equal to three times the total remuneration and/or possible exclusion from participating in Medicare, Medicaid or other governmental healthcare programs.

The Office of Inspector General ("***OIG***") of HHS is responsible for identifying fraud and abuse activities in government healthcare programs. In order to fulfill its duties, the OIG performs audits, investigations and inspections. In addition, it provides guidance to healthcare providers by identifying types of activities that could violate the Anti-kickback Statute. The OIG has identified the following hospital/physician incentive arrangements as potential violations:

- payment of any incentive by a hospital based on physician referrals of patients to the hospital;
- use of free or significantly discounted office space or equipment;
- provision of free or significantly discounted billing, nursing or other staff services;
- free training (other than compliance training) for a physician's office staff, including management and laboratory technique training;
- guarantees which provide that if a physician's income fails to reach a predetermined level, the hospital will pay any portion of the remainder;
- low-interest or interest-free loans, or loans that may be forgiven if a physician refers patients to the hospital;
- payment of the costs for a physician's travel and expenses for conferences;
- payment of services which require few, if any, substantive duties by the physician or which are in excess of the fair market value of the services rendered; or
- purchasing goods or services from physicians at prices in excess of their fair market value.

We have a variety of financial relationships with physicians who refer patients to our facilities, including employment contracts, independent contractor agreements, professional service agreements, leases and joint ventures. We provide financial incentives to recruit physicians to relocate to communities served by our facilities. These incentives for relocation include minimum revenue guarantees and, in some cases, loans. The OIG is authorized to publish regulations outlining activities and business relationships that would be deemed not to violate the Anti-kickback Statute. These regulations are known as "safe harbor" regulations. Failure to comply with the safe harbor regulations does not make conduct illegal, but instead the safe harbors delineate standards that, if complied with, protect conduct that might otherwise be deemed in violation of the Anti-kickback Statute. We intend for all our business arrangements to be in full compliance with the Anti-kickback Statute and seek to structure each of our arrangements with physicians to fit as closely as possible within an applicable safe harbor. However, not all of our business arrangements fit wholly within safe harbors, so we cannot guarantee that these arrangements will not be scrutinized by government authorities or, if scrutinized, that they will be determined to be in compliance with the Anti-kickback Statute or other applicable laws.

Stark Law

The Stark law prohibits physicians from referring Medicare and Medicaid patients to entities with which they or any of their immediate family members have a financial relationship if those entities provide certain "designated health services" unless an exception applies. The Stark law also prohibits entities that provide designated health services reimbursable by Medicare and Medicaid from billing the Medicare and Medicaid programs for any items or services that result from a prohibited referral and requires entities to refund amounts received for items and services provided pursuant to a prohibited referral on a timely basis. "Designated health services" include, among other things, inpatient and outpatient hospital services, laboratory services and radiology services. A violation of the Stark law may result in (i) a denial of payment, (ii) substantial civil monetary penalties that are subject to annual adjustments for inflation for each violation or circumvention scheme and (iii) exclusion from participation in the Medicare and Medicaid programs and other governmental healthcare programs. In addition, violations of the Stark law could also result in penalties under the False Claims Act.

There are ownership and compensation arrangement exceptions to the self-referral prohibition. There are also exceptions for many of the customary financial arrangements between physicians and facilities, including employment contracts, leases and recruitment agreements, and there is a "whole hospital exception," which allows a physician to make a referral to a hospital if the physician owns an interest in the entire hospital, as opposed to an ownership interest in a department of the hospital. The Affordable Care Act significantly modified the requirements of the whole hospital exception and placed a number of restrictions on the ownership structure, operations, and expansion of physician owned hospitals. Four of our facilities are subject to those requirements. We intend for our financial arrangements with physicians to comply with the exceptions included in the Stark law and regulations. In recent years, CMS has issued a number of proposed and final rules modifying the Stark law exceptions. While some changes have been implemented, others remain in proposed form or have been delayed. Further, the Stark law and related regulations have been subject to little judicial interpretation to date. We anticipate that there will be further changes in the future and those changes may require us to modify our activities.

In addition to issuing new regulations, or applying new interpretations to existing rules or regulations, the federal government has modified its approach for ensuring compliance with and enforcing penalties for violations of the Stark law. In 2010, CMS also issued a "self-referral disclosure protocol" for hospitals and other providers that wish to self-disclose potential violations of the Stark law and attempt to resolve those potential violations and any related overpayment liabilities at levels below the maximum penalties and amounts set forth in the statute.

False Claims Act

The False Claims Act prohibits providers from, among other things, knowingly submitting false or fraudulent claims for payment to the federal government and failing to refund identified overpayments received from the government. The False Claims Act defines the term "knowingly" broadly, and while simple negligence generally will not give rise to liability, submitting a claim with reckless disregard to its truth or falsity can constitute the "knowing" submission of a false or fraudulent claim for the purposes of the False Claims Act. The "qui tam" or "whistleblower" provisions of the False Claims Act allow private individuals to bring actions under the False Claims Act on behalf of the government. These private parties are entitled to share in any amounts recovered by the government, and, as a result, the number of "whistleblower" lawsuits that have been filed against providers has increased significantly in recent years. When a private party brings a qui tam action under the False Claims Act, the defendant will generally not be aware of the lawsuit until the government makes a determination whether it will intervene and take a lead in the litigation. If found liable under the False Claims Act, a provider may be required to pay up to three times the actual damages sustained by the government plus substantial civil monetary penalties that are subject to annual adjustments for inflation for each separate false claim. The government and whistleblowers have used the False Claims Act to prosecute Medicare and other government healthcare program fraud such as coding errors, billing for services not provided, submitting false cost reports and providing care that is not medically necessary or that is substandard in quality.

Changes in the Regulatory Environment

The Fraud Enforcement and Recovery Act of 2009 ("***FERA***") expanded the scope of the False Claims Act by, among other things, creating liability for knowingly and improperly avoiding or decreasing an obligation to pay money to the federal government and broadening protections for whistleblowers. In addition, the Affordable Care Act made several significant changes to healthcare fraud and abuse laws, including providing additional enforcement tools to the government, increasing cooperation between agencies by establishing mechanisms for the sharing of information and enhancing criminal and administrative penalties for non-compliance. For example, the Affordable Care Act (1) provides $350 million in increased federal funding over 10 years to fight healthcare fraud, waste and abuse, (2) expands the scope of the RAC program to include Medicaid, (3) authorizes HHS, in consultation with the OIG, to suspend Medicare and Medicaid payments to a provider of services or a supplier "pending an investigation of a credible allegation of fraud," (4) provides Medicare contractors with additional flexibility to conduct random prepayment reviews and (5) requires providers to adopt compliance programs that meet certain specified requirements as a condition of their Medicare enrollment. The Affordable Care Act also expanded the scope of the False Claims Act to cover payments in connection with the Exchanges if those payments include any federal funds and provides that claims submitted in connection with patient referrals that result from violations of the Stark law or the Anti-kickback Statute constitute false claims for the purposes of the False Claims Act.

In addition to the changes mentioned above, the Affordable Care Act created False Claims Act liability for the knowing failure to report and return an overpayment within 60 days of the identification of the overpayment or the date by which a corresponding cost report is due, whichever is later. On February 11, 2016, CMS published a final rule that provides clarification around the meaning of overpayment identification and generally establishes a six year lookback period for Medicare Part A and Part B providers and suppliers. To avoid liability, providers must, among other things, carefully and accurately code claims for reimbursement, promptly return overpayments, accurately prepare cost reports and timely resolve credit balances. In light of the provisions of FERA and the Affordable Care Act relating to reporting and refunding overpayments and the robust funding for enforcement activities and audits, an increasing number of healthcare providers have self-reported potential violations of law, including technical violations of certain fraud and abuse laws, and refunded overpayments to avoid incurring fines and penalties. It is likely such refunds and voluntary disclosures will continue in the future, and we will make such refunds and disclosures in accordance with the law.

State Laws

Many of the states in which we operate have adopted laws similar to the Anti-kickback Statute and the Stark law. These state laws are generally very broad in scope and typically apply to patients whose treatment is covered by the Medicaid program and, in some cases, to all patients regardless of payment source. In addition, many of the states in which we operate have false claims statutes that impose civil and/or criminal liability for the types of acts prohibited by the False Claims Act or that otherwise prohibit the submission of false or fraudulent claims to the state government or Medicaid program. Violations of these laws are punishable by substantial civil and/or criminal penalties and, in many cases, the loss of the facility's license. Although we believe that our operations and arrangements with physicians and other referral sources comply with the applicable state fraud and abuse laws, most of these laws have not been interpreted by any court or governmental agency, and there can be no assurance that the regulatory authorities responsible for enforcing these laws will determine that our arrangements comply with the applicable requirements.

Emergency Medical Treatment and Active Labor Act

All of our facilities are subject to EMTALA. This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions or transfer exists regardless of a patient's ability to pay for treatment. Off-campus facilities such as specialty clinics, surgery centers and other facilities that lack emergency departments or otherwise do not treat emergency medical conditions are not generally subject to EMTALA. They must, however, have policies in place that explain how the location should proceed in an emergency situation, such as transferring the patient to the closest hospital with an emergency department. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay, including substantial civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. CMS has actively enforced EMTALA and has indicated that it will continue to do so in the future. Although we believe that our hospitals comply with EMTALA, we cannot predict whether CMS will implement new requirements in the future and, if so, whether our hospitals will comply with any new requirements.

Administrative Simplification Provisions and Privacy and Security Requirements

We are subject to the administrative simplification provisions of HIPAA which require the use of uniform electronic data transmission standards for healthcare claims and payment transactions submitted or received electronically. These provisions are intended to encourage electronic commerce in the healthcare industry. Additionally, we are subject to the privacy, security and breach notification regulations promulgated under HIPAA and the Health Information Technology for Economic and Clinical Health Act (the "***HITECH Act***"), which are designed to protect the confidentiality, availability and integrity of protected health information ("***PHI***") and establish an array of patient rights with respect to such information. The HIPAA privacy, security and breach notification regulations apply to covered entities, which include health plans, health care clearinghouses, and health care providers that conduct certain standard transactions (such as billing insurance) electronically. In addition, certain provisions of the privacy, security and breach notification regulations apply to business associates, which are entities that perform certain functions or activities on behalf of covered entities that require access to or the use or disclosure of protected health information. In certain circumstances, a covered entity may be held liable for the actions of its business associate if HHS determines an agency relationship exists between the covered entity and the business associate under federal agency law.

The HIPAA privacy regulations, which apply to individually identifiable health information held or disclosed by a covered entity in any form, whether communicated electronically, on paper or orally, impose extensive administrative requirements on us, which require that we adopt policies and procedures to comply with HIPAA, routinely train our workforce members on our HIPAA policies, provide patients with a copy of our notice of privacy practices, comply with rules governing the use and disclosure of PHI and impose these rules, by contract, on any business associate to whom we disclose such information in order to perform functions on our behalf. They also create rights for patients in their health information, such as the right to access and amend their health information and to request an accounting for certain disclosures of their health information. The HIPAA security regulations require us to establish and maintain reasonable and appropriate administrative, technical and physical safeguards to ensure the integrity, confidentiality and the availability of electronic health information and to perform ongoing assessments of the potential risks and vulnerabilities to the confidentiality, integrity and availability of such information. In addition, the HIPAA breach notification regulations require that we report breaches of unsecured (unencrypted) PHI to affected individuals without unreasonable delay, but in no case later than 60 calendar days of discovery of the breach. Notification must also be made to HHS and, in certain cases involving large breaches, to the local media. HHS is required to report on its website a list of all covered entities that report a breach involving more than 500 individuals. All non-permitted uses or disclosures are presumed to be breaches unless the covered entity or business associate can demonstrate that there is a low probability that the information has been compromised. We implement a comprehensive set of HIPAA policies and procedures, which we believe materially complies with the privacy, security and breach notification requirements of HIPAA.

Violations of the HIPAA regulations may result in criminal penalties and substantial civil monetary penalties subject to a limit for violations of the same requirement in a calendar year. The civil monetary penalties are also subject to annual inflation adjustments. In addition, state attorneys general are authorized to bring civil actions seeking either injunction or damages up to $25,000 for violations of the same requirement in a calendar year in response to HIPAA violations that affect their state residents. HHS has the discretion in many cases to resolve HIPAA violations through informal means without the imposition of penalties. However, the HIPAA privacy, security and breach notification regulations have and will continue to impose significant costs on our facilities in order to comply with these standards. We expect increased enforcement of the HIPAA regulations.

Our facilities continue to remain subject to other applicable federal or state laws that are more restrictive than the HIPAA privacy and security regulations, which could impose additional penalties on us. For example, the Federal Trade Commission uses its consumer protection authority to initiate enforcement actions against companies whose inadequate data security programs may expose consumers to fraud, identity theft and privacy intrusions, including the security programs of entities subject to the HIPAA regulations.

Corporate Practice of Medicine and Fee-Splitting

Some states have laws that prohibit unlicensed persons or business entities, including corporations or business organizations that own hospitals, from employing physicians. Some states also have adopted laws that prohibit direct or indirect payments or fee-splitting arrangements between physicians and unlicensed persons or business entities. Possible sanctions for violations of these restrictions include loss of a physician's license, civil and criminal penalties and rescission of business arrangements. These laws vary from state to state, are often vague and have seldom been interpreted by the courts or regulatory agencies. We attempt to structure our arrangements with healthcare providers to comply with the relevant state laws and the few available regulatory interpretations.

Certificates of Need

The construction of new facilities, the acquisition or expansion of existing facilities and the addition of new services and expensive equipment at our facilities may be subject to state laws that require prior approval by state regulatory agencies. These certificate of need laws generally require that a state agency determine the public need and give approval prior to the construction or acquisition of facilities or the addition of the new equipment or services and allow competing healthcare providers to challenge the need for the facility, service or equipment. We operate facilities in certain states that have adopted certificate of need laws. If we fail to obtain necessary state approval, we will not be able to expand our facilities, complete acquisitions or add new services at our facilities in these states. Violation of these state laws may result in the imposition of civil sanctions or the revocation of hospital licenses. Some states in which we operate do not have certificate of need requirements. Additionally, from time to time, states with existing requirements may repeal or limit the scope of their certificate of need programs. Our facilities in states that do not have (or limit the scope of) certificate of need programs could be subject to increased competition from other providers who may choose to enter the market.

Not-for-Profit Hospital Conversion Legislation

Many states have adopted legislation regarding the sale or other disposition of hospitals operated by not-for-profit entities. In states that do not have such legislation, the attorneys general have demonstrated an interest in reviewing these transactions under their general obligations to protect charitable assets. These legislative and administrative efforts primarily focus on the appropriate valuation of the assets divested and the use of the proceeds of the sale by the not-for-profit seller. Reviews and, in some instances, approval processes adopted by state authorities can add additional time to the closing of a not-for-profit hospital acquisition. Future actions by state legislators or attorneys general may seriously delay or even prevent our ability to acquire certain hospitals.

State Hospital Rate-Setting Activity

We currently operate two hospitals in West Virginia. The West Virginia Health Care Authority requires that requests for increases in hospital charges be submitted annually. Requests for rate increases are reviewed by the West Virginia Health Care Authority and are either approved at the amount requested, approved for lower amounts than requested, or are rejected. As a result, in West Virginia, our ability to increase our rates to compensate for increased costs per admission is limited, and the operating margins for our hospitals located in West Virginia may be adversely affected if we are not able to increase our rates as our expenses increase. We can provide no assurance that other states in which we operate hospitals will not enact similar rate-setting laws in the future.

Environmental Regulation

Our healthcare operations generate medical waste that must be disposed of in compliance with federal, state and local environmental laws, rules and regulations. Our operations, as well as our purchases and sales of healthcare facilities, are also subject to compliance with various other environmental laws, rules and regulations. Such compliance costs are not significant, and we do not anticipate that such compliance costs will be significant in the future.

Compliance Program

We maintain a company-wide ethics and compliance program designed to ensure that we maintain high standards of ethical conduct in the operation of our business, and to meet or exceed applicable federal guidance and industry standards. We continually implement written policies and procedures for all of our employees to promote compliance with all applicable laws, regulations and Company policies, and to encourage a "culture of compliance" within the Company and its facilities. The organizational structure of our ethics and compliance program includes oversight by our Board of Directors and compliance committees at the Company and facility levels. We have compliance officers and personnel at the Company level and at our facilities. Other features of our compliance program include initial and periodic ethics and compliance training, systems for identifying and tracking compliance issues (including databases and hotlines for employees to report, without fear of retaliation, any suspected legal or ethical violations), regular auditing and monitoring of compliance issues, including coding audits and reviews of our financial relationships with physicians, and prompt review and resolution of identified issues.

Our compliance program also oversees the implementation and monitoring of the standards set forth by HIPAA for privacy. Ongoing HIPAA compliance also includes self-monitoring of HIPAA policy and procedure implementation by each of our healthcare facilities and oversight by at the Company level.

Risk Management and Insurance

Given the nature of our operating environment, we are subject to potential professional liability claims, employee workers' compensation claims and other claims. To mitigate a portion of this risk, we maintain insurance for individual professional liability claims and employee workers' compensation claims exceeding self-insured retention ("***SIR***") and deductible levels. At December 31, 2018, our SIR for professional liability claims is $5.0 million per claim, with a $5.0 million inner aggregate, at the majority of our facilities, and $2.0 million per claim at certain of our facilities. Additionally, we participate in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2018, our deductibles for workers' compensation claims range from $0.5 million to $1.0 million per claim in all states in which we operate except for Montana, Oklahoma, Ohio, Washington and Wyoming. We participate in state-specific programs for our workers' compensation claims arising in these states. Our SIR and deductible levels are evaluated annually as a part of our insurance program's renewal process.

We also maintain directors' and officers', property, some professional liability and other types of insurance coverage with unrelated commercial carriers. Our directors' and officers' liability insurance coverage for current officers and directors is a program that protects us as well as the individual director or officer. We maintain property insurance through an unrelated commercial insurance company. We maintain large property insurance deductibles with respect to our facilities in coastal regions because of the high wind exposure and the related cost of such coverage. We have one location that is considered to have a high exposure to named-storm risk. It carries a deductible of 5% of its property value.

We operate a captive insurance company under the name Point of Life Indemnity, Ltd. This captive insurance company, which is licensed by the Cayman Islands Monetary Authority and is a wholly-owned subsidiary of LifePoint, issues malpractice insurance policies primarily to our employed physicians.

Item 1A. ***Risk Factors.***

Any of the following risks could materially and adversely affect our business, financial condition or results of operations. In addition, the risks described below are not the only risks that we face. The following information should be read in conjunction with Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations." Additional risks and uncertainties not currently known to us or those that we currently view to be immaterial could also materially and adversely affect our business, financial condition or results of operations.

We may be unable to achieve some or all of the expected benefits of the LifePoint/RCCH Merger.

We may not be able to achieve projected benefits or cost savings in connection with the LifePoint/RCCH Merger. The success of the LifePoint/RCCH Merger will depend, in part, on our ability to integrate Legacy LifePoint's and RCCH's businesses and operations as well as fully realize the anticipated benefits and synergies from combining these businesses. Mergers inherently involve risks, including those associated with assimilating and integrating different business operations, corporate cultures, personnel, infrastructure and technologies or products and increasing the scope, geographic diversity and complexity of our operations. There may be additional costs or liabilities that are not currently anticipated, including costs resulting from the unexpected loss of key employees or patients of the combined company, the hiring of additional management and other critical personnel, or unknown obligations or liabilities of facilities acquired in the LifePoint/RCCH Merger. The LifePoint/RCCH Merger may also be disruptive to our ongoing business, may divert the attention of our management and may cause patients, payers, joint venture partners, suppliers and employees that deal with us to seek changes to existing business relationships with us. Any of these risks could adversely affect our business, financial condition and results of operations.

Our substantial indebtedness could materially and adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry and prevent us from making debt service payments on the Notes.

We are a highly leveraged company. As of December 31, 2018, we had total outstanding debt of approximately $6,148.0 million, excluding capital and financing leases and unamortized debt issuance costs.

Our substantial indebtedness could have important consequences for the lenders and holders of our indebtedness. For example, it could:

- limit our ability to borrow money for our working capital, capital expenditures, debt service requirements, strategic initiatives or other purposes;
- make it more difficult for us to satisfy our obligations with respect to our indebtedness, including the Notes, and any failure to comply with the obligations of any of our debt instruments, including restrictive covenants and borrowing conditions, could result in an event of default under the indentures governing the Notes and the agreements governing other indebtedness;
- require us to dedicate a substantial portion of our cash flow from operations to the payment of interest and the repayment of our indebtedness, thereby reducing funds available to us for other purposes;
- limit our flexibility in planning for, or reacting to, changes in our operations or business;
- make us more highly leveraged than some of our competitors, which may place us at a competitive disadvantage;
- make us more vulnerable to downturns in our business, our industry or the economy;
- restrict us from making strategic acquisitions, engaging in development activities, introducing new technologies or exploiting business opportunities;
- cause us to make non-strategic divestitures;
- limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds or dispose of assets;
- prevent us from raising the funds necessary to repurchase all Notes tendered to us upon the occurrence of certain changes of control, which failure to repurchase would constitute an event of default under the Indentures; or
- expose us to the risk of increased interest rates, as certain of our borrowings, including borrowings under the ABL Facility and the Term Loan Facility, are at variable rates of interest.

In addition, the ABL Agreement, the Term Loan Agreement and the Indentures contain restrictive covenants that limit or will limit our ability to engage in activities that may be in our long-term best interest. Our failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of substantially all of our existing and future indebtedness.

We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness that may not be successful.

Our ability to pay principal and interest and to satisfy our other debt obligations will depend upon, among other things:

- our future financial and operating performance (including the realization of any cost savings described herein), which will be affected by prevailing economic, industry and competitive conditions and financial, business, legislative, regulatory and other factors, many of which are beyond our control; and
- our future ability to borrow under the ABL Facility, the availability of which depends on, among other things, our complying with the covenants in the ABL Agreement.

We cannot assure you that our business will generate cash flow from operations, or that we will be able to draw under the ABL Facility or otherwise, in an amount sufficient to fund our liquidity needs, including the payment of principal and interest on the ABL Facility, the Term Loan Facility and the Notes.

If our cash flows and capital resources are insufficient to service our indebtedness, we may be forced to reduce or delay capital expenditures, sell assets, seek additional capital or restructure or refinance our indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. In addition, the terms of existing or future debt agreements, including the ABL Agreement, the Term Loan Agreement and the Indentures, may restrict us from adopting some of these alternatives. In the absence of such operating results and resources, we could face substantial liquidity problems and might be required to dispose of material assets or operations to meet our debt service and other obligations. We may not be able to consummate those dispositions for fair market value or at all. Furthermore, any proceeds that we could realize from any such dispositions may not be adequate to meet our debt service obligations then due. The Sponsor and its affiliates have no continuing obligation to provide us with debt or equity financing. Our inability to generate sufficient cash flow to satisfy our debt obligations, or to refinance our indebtedness on commercially reasonable terms or at all, could result in a material adverse effect on our business, results of operations and financial condition and could negatively impact our ability to satisfy our obligations under our indebtedness.

If we cannot make scheduled payments on our indebtedness, we will be in default, and the lenders under the Term Loan Facility and the holders of the Notes could declare all outstanding principal and interest to be due and payable, the lenders under the ABL Facility could terminate their commitments to loan money, our secured lenders (including the lenders under the ABL Facility and the Term Loan Facility and the holders of the 8.25% Secured Notes) could foreclose against the assets securing their loans and the Notes and we could be forced into bankruptcy or liquidation. All of these events could cause you to lose all or part of your investment in the Notes.

Our revenues will decline if federal or state programs reduce our Medicare or Medicaid payments.

In 2018, we derived approximately 50.7% of our net patient revenues before the provision for doubtful accounts from Medicare and Medicaid programs, collectively. Numerous factors could materially decrease, or delay timing of, Medicare and Medicaid payments to our facilities. These factors include statutory and regulatory changes, administrative rulings and determinations concerning patient and provider eligibility and requirements for utilization review. Furthermore, the Affordable Care Act and related federal laws provide for material scheduled reductions in the growth rate of Medicare and Medicaid program spending, including reductions in market basket updates and Medicare and Medicaid DSH funding.

Medicaid programs, which are jointly funded by federal and state governments and are administered by states, provide healthcare benefits to qualifying individuals who are unable to afford care. A number of states have adopted or are considering legislation designed to reduce their Medicaid expenditures, including enrolling Medicaid recipients in managed care programs. States may also impose additional taxes on hospitals to help finance such states' Medicaid systems. Some states have also taken steps to implement work and/or community engagement requirements for Medicaid beneficiaries, which could have the effect of reducing the number of individuals eligible for Medicaid in those states.

Recent executive and legislative actions to amend or impede the implementation of the Affordable Care Act and ongoing efforts to repeal, replace or further modify the Affordable Care Act may adversely affect our business, financial condition and results of operations.

The Affordable Care Act dramatically altered the U.S. healthcare system, and we have expended substantial cost and effort to prepare for and comply with the Affordable Care Act. Since its adoption into law in 2010, the Affordable Care Act has been challenged before the U.S. Supreme Court, and several bills have been and continue to be introduced in Congress to delay, defund or repeal implementation of or amend significant provisions of the Affordable Care Act. In addition, there continues to be ongoing litigation over the interpretation, implementation and constitutionality of the law. The net effect of the Affordable Care Act, as currently in effect, on our business is subject to a number of variables, including the law's complexity, lack of complete implementing regulations and interpretive guidance, and the sporadic implementation of the numerous programs designed to improve access to and the quality of healthcare services. Additional variables of the Affordable Care Act impacting our business will be how states, providers, insurance companies, employers, and other market participants respond during this period of uncertainty surrounding the future of the Affordable Care Act.

In 2017, President Trump issued executive orders that, among other things, expressed the administration's intent to repeal the Affordable Care Act, instructed the executive branch of the federal government to defer or delay the implementation of any provisions of the Affordable Care Act that would impose a fiscal burden on any state or a cost, fee, tax or penalty on any individual, family, health care provider, or health insurer. On October 12, 2017, President Trump issued another executive order related to the Affordable Care Act that resulted in the issuance of regulations that are intended to encourage the formation of association health plans, and increase the maximum duration of and access to short-term limited duration health insurance plans, neither of which are required to cover all of the essential health benefits mandated by the Affordable Care Act. In 2017, the United States Department of Justice ("***DOJ***") also announced that HHS was immediately ceasing its cost sharing reduction payments to insurance companies based on a determination that those payments had not been appropriated by Congress, and Congress enacted the Tax Act that, in addition to overhauling the federal tax system, repealed the penalties associated with the individual mandate effective as of January 1, 2019. In addition, in December 2018, the U.S. District Court for the Northern District of Texas found that, as a result of the repeal of the penalties associated with individual mandate, the entire Affordable Care Act is unconstitutional.

We cannot predict the impact that the President's executive orders and other administrative actions will have on the implementation and enforcement of the provisions of the Affordable Care Act or the current or pending regulations adopted to implement the law. In addition, we cannot predict the impact that the repeal of the penalties associated with the individual mandate and the cessation of cost sharing reduction payments to insurers will have on the availability and cost of health insurance and the overall number of uninsureds. We also cannot predict the outcome of litigation challenging the constitutionality of the Affordable Care Act or whether the Affordable Care Act will be repealed, replaced, or modified. If the Affordable Care Act is found to be unconstitutional or if it is repealed, replaced or modified, we cannot predict what, if any, the replacement plan or modifications would be, when any such replacement plan or modifications would become effective, or whether any of the existing provisions of the Affordable Care Act would remain in place.

Changes to Medicaid supplemental payment programs may materially and adversely affect our revenues and results of operations.

Medicaid supplemental payments ("***MSPs***") are payments made to providers separate from and in addition to those made at a state's standard Medicaid payment rate. MSP programs are jointly financed by state funds and federal matching funds. The state portion may be funded through general revenue, intergovernmental transfers from local governments or healthcare related taxes imposed by states in the form of a mandatory provider payment related to healthcare items or services. The two most prevalent forms of MSPs are Medicaid DSH and Upper Payment Limit ("***UPL***") payments. Medicaid DSH payments are federally required to be made by the states to hospitals that serve significant numbers of Medicaid and uninsured patients in recognition of the added costs incurred by hospitals in treating these patients. The total amount of Medicaid DSH payments a state may make and the total amount any one hospital may receive are both capped by federal law. Unlike Medicaid DSH payments, UPL payments are not required to be made by states under federal law. Rather, federal regulations establish an upper payment limit above which states may not receive federal matching dollars.

The Affordable Care Act called for significant reductions in Medicaid DSH funding to account for decreases in uncompensated care anticipated under the health insurance coverage expansion. Subsequent changes in the law have delayed the implementation of these reductions, but they are scheduled to take effect in FFY 2020. Reductions in Medicaid DSH payments may take place without increases in the Medicaid eligible population, thus increasing the net amount of uncompensated care we provide.

UPL programs have expanded in recent years and certain of our hospitals receive payments under such programs. Because services provided to Medicaid beneficiaries enrolled in managed care are not included in state UPL calculations, as states increase their use of managed care Medicaid programs, UPL MSPs could be reduced. UPL funding and matching federal funds may also be reduced or eliminated as a result of state or local governmental legislation, state changes to historical funding levels or related taxes, compliance reviews by CMS, or changes to federal Medicaid funding affecting such programs. We cannot predict whether MSP programs will continue (and, if continued, whether we will qualify for such programs) or guarantee that revenues recognized from these programs will not decrease.

We are subject to increasingly stringent governmental regulations, and we may face allegations that we have failed to comply with such regulations, which could result in criminal and civil sanctions, exclusion from government healthcare programs and even greater scrutiny that may reduce our revenues and profitability.

All participants in the healthcare industry are required to comply with numerous overlapping laws and regulations at the federal, state and local government levels. These laws and regulations require that hospitals meet various requirements, including those relating to relationships with providers and other referral sources, the adequacy and quality of medical care, inpatient admission criteria, privacy and security of health information, standards for equipment, personnel, operating policies and procedures, billing and cost reports, payment for services and supplies, maintenance of adequate records, compliance with building codes and environmental protection, among other matters. Many of the laws and regulations applicable to the healthcare industry are complex and may be violated inadvertently, and there are numerous enforcement authorities, including CMS, the OIG, the DOJ, state attorneys general, and contracted auditors, as well as private plaintiffs.

There are also heightened coordinated civil and criminal enforcement efforts by both federal and state government agencies relating to the healthcare industry, including the hospital segment, which has led to a number of investigations, prosecutions, convictions and settlements in the healthcare industry. Recent enforcement actions have focused on, among other things, financial arrangements between hospitals and providers, billing for services without adequately documenting the medical necessity for such services and billing for services outside the coverage guidelines for such services. Hospitals continue to be one of the primary focal areas of the OIG and other governmental fraud and abuse programs, as described in the OIG Work Plan. Dealing with investigations can be time and resource consuming and can divert management's attention from the business. Any such investigation or settlement could increase our costs or otherwise have an adverse effect on our business. In addition, because of the potential for large monetary exposure under the False Claims Act, which provides for treble damages and substantial civil monetary penalties for each separate false claim or statement, healthcare providers often resolve allegations without admissions of liability for significant and material mounts to avoid the uncertainty of damages and penalties that may be awarded in litigation proceedings. Such settlements often contain additional compliance and reporting requirements as part of a consent decree, settlement agreement or corporate integrity agreement. These additional requirements can result in significant additional and ongoing expenditures. Given the significant size of actual and potential settlements, it is expected that the government will continue to devote substantial resources to investigating healthcare providers' compliance with the healthcare payment rules and fraud and abuse laws. Certain of our facilities have received inquiries and subpoenas from various governmental agencies regarding these matters, and we are also subject to various claims and lawsuits relating to these and other matters.

The laws and regulations with which we must comply continually change. In the future, different interpretations or enforcement of these laws and regulations could subject our business practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services, capital expenditure programs and operating expenses. Although we intend and will endeavor to conduct our business in compliance with all applicable federal and state laws and regulations, many of these laws and regulations are broadly worded and may be interpreted or applied in ways that cannot be predicted. Therefore, we cannot assure you that our arrangements or business practices will be free from government scrutiny or be found to be in compliance with applicable laws and regulations. If we fail to comply with applicable laws and regulations, we could suffer substantial civil or criminal penalties, including the loss of our licenses to operate our facilities or loss of our ability to participate in the Medicare, Medicaid and other governmental programs.

Additionally, we are subject to a variety of different federal, state and local employment and wage and hour laws. While we strive to comply with those laws, if we fail to do so, we may be subject to lawsuits by governmental authorities or private plaintiffs. In addition, the Internal Revenue Service ("***IRS***") and/or state taxing authorities may successfully challenge positions taken on our tax returns.

Finally, we are also subject to various federal, state and local statutes and ordinances regulating the discharge of materials into the environment. For example, our healthcare operations generate medical waste, such as pharmaceuticals, biological materials and disposable medical instruments that must be disposed of in compliance with federal, state and local environmental laws, rules and regulations. Environmental regulations also may apply when we build new facilities or renovate existing facilities, particularly older facilities. If we fail to comply with environmental regulations, we may be liable for substantial investigation and clean-up costs or we may be subject to lawsuits by governmental authorities or private plaintiffs.

We may be subjected to actions brought by the government under anti-fraud and abuse provisions or by individuals on the government's behalf under the False Claims Act's "qui tam" or "whistleblower" provisions.

The False Claims Act prohibits healthcare facilities and providers, as well as other entities or individuals from, among other things, knowingly submitting false claims for payment to the federal government, or knowingly causing the submission of such claims. The "qui tam" or "whistleblower" provisions of the False Claims Act allow private individuals to bring actions under the False Claims Act on behalf of the government. These private parties are entitled to share in any amounts recovered by the government, and, as a result, the number of "whistleblower" lawsuits that have been filed against providers has increased significantly in recent years. We are required to provide information to our employees and certain contractors about state and federal false claims laws and whistleblower provisions and protections. Defendants found to be liable under the False Claims Act may be required to pay up to three times the actual damages sustained by the government, plus substantial civil monetary penalties, that are subject to annual inflation adjustments, for each separate false claim.

There are many potential bases for liability under the False Claims Act, including reckless or intentional acts or omissions. The government has used the False Claims Act to prosecute Medicare and other government healthcare program violations such as coding errors, billing for services not provided, submitting false cost reports, and providing care that is not medically necessary or that is substandard in quality. The Affordable Care Act also (i) created potential False Claims Act liability for failing to report and repay identified overpayments within sixty (60) days of the identification of the overpayment or the date by which a corresponding cost report is due, whichever is later, and (ii) provided that claims submitted in connection with patient referrals that result from violations of the Anti-kickback Statute constitute false claims for the purposes of the False Claims Act. Some courts have held that a violation of the Stark law can result in False Claims Act liability as well. In addition, a number of states have adopted their own false claims and whistleblower provisions whereby a private party may file a civil lawsuit in state court.

Although we intend and will endeavor to conduct our business in compliance with all applicable federal and state laws, many of these laws are broadly worded and may be interpreted or applied in ways that cannot be predicted. Therefore, we cannot assure you that our arrangements or business practices will be free from government scrutiny or be found to be in compliance with applicable fraud and abuse laws.

Changes in payer mix, the financial condition of payers and healthcare cost containment initiatives may limit our revenues and profitability.

The amounts we receive for services provided to patients are determined by a number of factors, including the payer mix of our patients and the reimbursement methodologies and rates utilized by our payers. In recent years, we have seen shifts of patients from commercial and private insurance to Medicare and Medicaid programs and from "traditional" fee-for-service Medicare and Medicaid programs to "managed" Medicare and Medicaid programs. Some members of Congress have also recently proposed measures that would expand government-sponsored coverage, including "Medicare-for-all" or other single-payer proposals. Reimbursement rates generally are lower for (i) Medicare and Medicaid beneficiaries than they are for patients whose care is covered by commercial and private insurance and (ii) managed Medicare and Medicaid beneficiaries than they are for traditional Medicare and Medicaid beneficiaries. We also experience demographic pressures as aging populations in our non-urban communities shift from commercial insurance programs to Medicare or managed Medicare programs. Our revenues and results of operations may be adversely affected by these shifts.

In addition, our revenues from negotiated rates with HMOs, PPOs, insurance companies, employers and other private payers may decline based on renegotiations and the respective bargaining power of the parties. There is a general trend towards further consolidation among private payers, which may increase their bargaining power over fee structures. As a result, payers increasingly are demanding discounted fee structures or the assumption by healthcare providers of all or a portion of the financial risk related to paying for care provided. These changes include moving away from a percent of charge payment structure to a fixed payment for an episode of care, which typically reduces our payment rate and limits our ability to raise prices going forward. Furthermore, low cost plans purchased through the Exchanges are increasingly using narrow and tiered networks that limit beneficiary provider choices, restrict or exclude our facilities or impose significantly higher cost sharing obligations for care provided by our facilities if they are classified in a disfavored tier. In addition, other healthcare providers, including some with greater financial resources, greater geographic coverage or a wider range of services, may negotiate exclusivity provisions with managed care plans or otherwise restrict the ability of managed care plans to contract with us.

There are also an increasing number of patients enrolling in insurance plans with high deductibles or high co-payments, including those purchased on the Exchanges, which increase the amount due from the patient and may result in reimbursement for a lower portion of the total payment amount relative to traditional employer-sponsored health insurance plans for the healthcare services provided by our facilities and employed providers. Patients enrolled in higher deductible and co-payment plans tend to defer elective and non-emergency procedures or default on their portion of the payment. We may be adversely affected by the growth in patient responsibility accounts because of plan structures, including HSAs, which shift greater responsibility for care to individuals through greater exclusions and higher co-deductible and co-payment amounts. If we experience shifts in our patient volumes to these types of plan structures, our revenue and results of operations may be adversely affected.

We anticipate that efforts to impose greater discounts and more stringent cost controls by government and private payers will continue, thereby reducing some of the payments we receive for our services. As payments are reduced, if we are excluded from more payer networks or if the scope of services covered by payers is limited, there could be a material adverse effect on our revenues and results of operations.

We may encounter difficulty operating, integrating and improving financial performance at acquired facilities. Also, if we acquire facilities with unknown or contingent liabilities, we could become liable for material obligations or it could diminish the anticipated value of the acquired facility.

We may be unable to timely and effectively integrate facilities that we acquire with our ongoing operations. Many of the facilities we have acquired had, or future acquisitions may have, significantly lower operating margins than we do and/or operating losses prior to the time we acquired or will acquire them. In the past, we have occasionally experienced delays in improving the operating margins or effectively integrating the operations of our acquired facilities and we may experience such delays in implementing operating procedures and systems in newly or future acquired facilities. Integrating an acquired facility could be expensive and time consuming and could disrupt our ongoing business, negatively affect cash flow and distract management and other key personnel. Additionally, we may experience delays in reimbursement from governmental and third-party payers as a result of the change of ownership of our acquired facilities.

We must integrate complex information, accounting and operational systems, compliance programs and internal controls over financial reporting of acquired facilities into our existing systems and internal controls. While we devote a significant amount of employee and management resources on these integrations, we also rely heavily on third parties for systems integration. Our efforts to integrate new facilities, including causing those third parties to convert our newly acquired facilities' systems, may fail or be significantly delayed. Failure to timely and effectively integrate or convert any of these systems could cause business interruption, affect provider and staff morale and our ability to accurately manage accounting, clinical, compliance and operational functions. As future acquisitions may involve large operations, any such failure could cause a material adverse effect on our results of operations.

Facilities we have acquired, including in connection with the LifePoint/RCCH Merger, or facilities we acquire in the future, may have unknown or contingent liabilities for historical activities or conditions, including liabilities for failure to comply with laws and regulations, retroactive payment adjustments or recoupments from payer audits, medical and general professional malpractice liabilities, unfunded pension liabilities, workers' compensation or other employee-related liabilities, previous tax or environmental liabilities, regulatory and compliance related liabilities, and unacceptable business or accounting practices. Although we endeavor to obtain contractual indemnification from sellers covering these matters in connection with some acquisitions, we have not obtained contractual indemnifications in connection with all of them, and any indemnification obtained from sellers may be insufficient to cover material claims or liabilities for past activities of acquired businesses and the sellers may have insufficient funds to satisfy any claims or liabilities for which we may otherwise be entitled to be reimbursed.

We typically retain and rely on existing local management teams at newly acquired facilities to implement changes to operating procedures and systems. Integrating local management teams can involve cultural and systems challenges that may demand a disproportionate share of our resources and senior management's attention, and we may experience turnover of providers and other key personnel. Our acquisitions have become, and may continue to become larger, and may occur in communities with competing facilities. As a result, the issues surrounding integration may become more complex, expensive and time-consuming and may have a greater impact on our financial performance when we experience delays or difficulties.

If our fair value declines or if our estimated future cash flows decrease, a material non-cash charge to earnings from impairment of our goodwill or our long-lived assets could result.

As of December 31, 2018, we had approximately $2,642.1 million of goodwill and other intangible assets and approximately $4,317.1 million of long-lived assets, net of accumulated depreciation. We expect to recover the carrying values of both our goodwill as well as our long-lived assets through our future cash flows. We evaluate the carrying value of our goodwill at least annually, based on our fair value, to determine whether it is impaired. We evaluate our long-lived assets for possible impairment whenever circumstances indicate that the carrying amount of the asset, or related group of assets, may not be recoverable from estimated future cash flows. If the carrying value of our goodwill or our long-lived assets is impaired, we may incur a material non-cash charge to earnings.

We will be subject to liabilities because of malpractice and related legal claims brought against our facilities or healthcare providers associated with, or employed by, our facilities or affiliated entities. If we become subject to these claims, we could be required to pay significant damages, which may not be covered by insurance.

We will be subject to medical malpractice lawsuits and other legal actions arising out of the operations of our facilities and the activities of our employed or affiliated providers. As a matter of policy, we typically notify patients of any potential harms they may have suffered at our facilities, regardless of whether such notifications are required by law and notwithstanding our uncertainty as to the severity of such harms or whether they even took place. This may lead to class actions or other multi-plaintiff lawsuits or whistleblower reports. These actions may involve large claims and significant defense costs and, if we or our facilities are found liable, any judgments against us may be material. Furthermore, some states in which we operate do not impose caps on non-economic malpractice damages and, even in the states that have imposed caps on such damages, litigants may seek recoveries under alternative theories of liability that might not be subject to such caps. In an effort to resolve one or more of these matters, we may choose to negotiate a settlement whether or not we believe we are liable. Amounts we pay to settle any of these matters also may be material.

Although we maintain professional and general liability insurance with unrelated commercial insurance carriers, each individual plaintiff's claim is generally subject to an SIR insurance program administered in-house by our risk department with assistance from our insurance brokers. Any successful claim against us that is within our SIR amounts could have an adverse effect on our results of operations or liquidity. Some of these claims could exceed the scope of the excess coverage in effect, or coverage of particular claims could be denied, and any amounts not covered by insurance could be material.

Insurance coverage in the future may not continue to be available at a cost allowing us to maintain adequate levels of insurance with acceptable SIR attachments. One or more of our insurance carriers may become insolvent and unable to fulfill its obligation to pay or reimburse us when that obligation becomes due. In addition, providers using our facilities may be unable to obtain insurance on acceptable terms, which could result in these providers not being able to meet the minimum insurance requirements in the applicable facilities' medical staff bylaws or necessitate a reduction in the level of insurance required to be carried under such bylaws.

As a result of reviews of claims to Medicare and Medicaid for our services, we may experience delayed payments or incur additional costs and may be required to repay amounts already paid to us.

We are subject to regular post-payment inquiries, investigations and audits of the claims we submit to Medicare and Medicaid for payment for our services. These post-payment reviews may increase as a result of government cost-containment initiatives, including enhanced medical necessity reviews for patients admitted as inpatients to general acute care hospitals for certain procedures and audits of claims under the RAC programs to detect overpayments not identified through existing claims review mechanisms. RACs utilize a post-payment targeted review process employing data analysis techniques in order to identify those claims most likely to contain overpayments, such as incorrectly coded services, short stays, incorrect payment amounts, non-covered services and duplicate payments. The claims review strategies used by the RACs generally include a review of high dollar claims, including inpatient hospital claims. As a result, a large majority of the total amounts recovered by RACs has come from hospitals.

In addition, CMS and the states use UPICs to perform post-payment audits of claims and identify Medicare and Medicaid overpayments. Third party audits or investigations of Medicare or Medicaid claims could result in increases or decreases in operating revenues to be recognized in periods subsequent to when the related services were performed, which may have a material adverse effect on our results of operations.

Controls designed to reduce inpatient services may reduce our revenues.

Over the last several years, payers have instituted policies and procedures to reduce or limit the use of inpatient services. Controls imposed by Medicare, Medicaid, and commercial third-party payers designed to reduce admissions and lengths of stay, commonly referred to as "utilization review," have affected and are expected to continue to affect our facilities. Federal law contains numerous provisions designed to ensure that services rendered by hospitals to Medicare and Medicaid patients meet professionally recognized standards and are medically necessary and that claims for payment are properly filed. These provisions include a requirement that a sampling of admissions of Medicare and Medicaid patients must be reviewed by QIOs, which review the appropriateness of Medicare and Medicaid patient admissions and discharges, the quality of care provided, the validity of the MS-DRG classifications and the appropriateness of cases of extraordinary length of stay or cost on a post-discharge basis. QIOs may deny payment for services or assess fines and also have the authority to recommend to HHS that a provider that is in substantial noncompliance with quality standards be excluded from participation in the Medicare program.

Utilization review is also a requirement of most non-governmental managed care organizations and other third-party payers. Inpatient utilization, average lengths of stay and occupancy rates continue to be negatively affected by payer-required preadmission authorization and utilization review and by payer pressure to maximize outpatient and alternative healthcare delivery services for less acutely ill patients. Additionally, in some states in which we operate, commercial third-party payers and Medicaid managed care plans have instituted policies that retroactively limit or deny patient coverage for emergency department and certain other services provided at hospitals if the payers believe the services could have been provided in less expensive settings. For example, such payers are increasingly seeking to pay relatively low "triage fees" for patients seen in emergency departments when the payers retrospectively determine the patients' treatment did not qualify as an emergency service. Significant limits on the scope of services reimbursed or on the amounts paid for such services could have a material adverse effect on our revenues and results of operations.

We are subject to risks associated with outsourcing functions to third parties.

We outsource selected business functions to third parties. We take steps to monitor and regulate the performance of independent third parties to whom we delegate selected functions, including revenue cycle management, patient access, billing, cash collections, payment compliance and support services, project implementation, supply chain management, payroll system services and parts of cybersecurity. Arrangements with third party service providers may make our operations vulnerable if vendors fail to satisfy their obligations to us as a result of their performance, changes in their own operations, financial condition, or other matters outside of our control. We may also face legal, financial or reputational harm for the actions or omissions of such providers, including for violations of HIPAA and other privacy and security laws applicable to healthcare providers, and we may not have effective recourse against the providers for those harms. The expanding role of third party providers may also require changes to our existing operations and the adoption of new procedures and processes for retaining and managing these providers, as well as redistributing responsibilities as needed. Effective management, development and implementation of our outsourcing strategies are important to our business and strategy. If there are delays or difficulties in enhancing business processes or our third party providers do not perform as anticipated, we may not fully realize on a timely basis the anticipated economic and other benefits of the outsourcing projects or other relationships we enter into with key vendors, which could result in substantial costs, divert management's attention from other strategic activities, negatively affect employee morale or create other operational or financial problems for us. Terminating, transitioning or renegotiating arrangements with key vendors or failure to renegotiate on favorable terms could result in additional costs and a risk of operational delays, potential errors and possible control issues as a result of the termination or during the transition or renegotiation phase.

We conduct a significant portion of our operations through joint ventures. We cannot provide assurances that relationships with our joint venture partners will remain strong, which could negatively affect our joint ventures, affiliations and other strategic alliances as well as our overall business.

We have completed a number of joint ventures, affiliations and other strategic alliances as part of our business strategy. We expect to enter into similar transactions in the future, including joint ventures where we may have a minority or non-controlling interest. We believe our relationships with our joint venture partners are strong; however, any changes in these relationships could disrupt ongoing business, negatively affect cash flow and distract management and other key personnel.

The largest of our joint ventures is Duke LifePoint Healthcare, which is owned by us and a wholly-controlled affiliate of Duke University Health System, and which currently operates 14 hospital campuses in four states. In recent years, many of Legacy LifePoint's large acquisitions have been conducted through Duke LifePoint Healthcare. While we own a substantial majority of the equity in Duke LifePoint Healthcare, the long term success of Duke LifePoint Healthcare is dependent on ongoing collaboration and the alignment of our interests with those of Duke University Health System. In the event of a material disagreement with Duke University Health System or the breach of our joint venture agreement, Duke LifePoint Healthcare may be subject to dissolution, unwinding or purchase of either party's interest, which could have a material adverse effect on our revenues and results of operations. Even if Duke LifePoint Healthcare or another significant joint venture partner is not dissolved or unwound, our inability to involve Duke LifePoint Healthcare or other significant joint venture partners in our acquisitions and future operations could make it more difficult to source new targets or win competitive bidding processes, and our revenue or earnings growth may be hindered.

As a general matter, our joint venture partners may have investment and operational goals that are not consistent with our company-wide objectives, including the timing, terms and strategies for future growth and development opportunities, and we could reach an impasse on certain decisions, which may hinder our ability to pursue preferred strategies for growth and development, could require significant resources and attention from management and key employees to resolve and could have an adverse effect on our operations, cash flow and revenue growth. In addition, our joint venture relationships with not-for-profit partners and the agreements that govern these relationships are structured based on current provisions of the Internal Revenue Code of 1986, as amended (the "***Code***") (and the Treasury Regulations thereunder), published rulings by the IRS, as well as case law relevant to joint ventures between for-profit and not-for-profit entities. Material changes in these legal authorities could adversely affect our relationships with not-for-profit partners and related joint venture arrangements.

Furthermore, joint ventures in which we have a minority equity interest and minority investments inherently involve a lesser degree of control over business operations, thereby potentially increasing the financial, legal, operational and compliance risks associated with the joint venture or minority investment. We may be dependent on joint venture partners or management who may have business interests, strategies or goals that are inconsistent with ours. Business decisions or other acts or omissions of the joint venture partner or management may adversely affect the value of our investment, result in litigation or regulatory action against us, result in reputational harm to us or adversely affect the value of our investment or partnership. To the extent another party makes decisions that negatively impact the joint venture or internal control issues arise within the joint venture, we may have to take responsive or other actions or we may be subject to penalties, fines or other related actions for these activities.

Factors related to our employment of physicians could affect our financial performance.

We employ a large number of physicians. Physician employment by acute care facilities, where permissible, is a trend in the industry and has become more common as a result of actual and potential reductions in payment amounts for physician services and increasing costs to physicians, such as EHR implementation and professional liability insurance expenses. Employed physicians generally present more direct risks to us than those presented by independent members of our hospitals' medical staffs, such as risks of unsuccessful physician integration, challenges associated with physician practice management and compliance risks arising from the increased billing and coding activities associated with the employment of physicians, the possibility of legal claims under federal and state employment law, and governmental scrutiny of physician employment arrangements. Employed physicians also require us to incur additional expenses, such as increased salary and benefit costs, medical malpractice expense and rent expense. Payments received by us for services provided by our employed physicians, the physicians to whom our facilities have provided recruitment assistance, and the physician members of our medical staffs could be adversely affected as physician payment methodologies move toward pay-for-performance as hospital payment models are doing. The combination of payment cuts, potential liabilities and increased expenses could have an adverse effect on our results of operations.

Deterioration in the collectability of "patient due" accounts could adversely affect our revenues and results of operations.

The primary collection risks associated with our accounts receivable relate to uninsured patient accounts and patient accounts for which the primary insurance carrier has paid the amounts covered by the applicable agreement, but patient responsibility amounts (exclusions, deductibles and co-payments) remain outstanding. The provision for doubtful accounts relates primarily to amounts due directly from patients. The amount of our provision for doubtful accounts is based on management's assessment of historical collection trends, business and economic conditions, trends in federal and state governmental and private employer health coverage, the rate of growth in uninsured patient admissions and other collection indicators. While we have experienced a reduction in uninsured patients as a result of the Affordable Care Act, the risk of collection from insured patients, and the amounts due, have increased, and will likely continue to increase, as more individuals are enrolled in insurance plans with larger deductibles and/or co-payments, including those purchased on insurance exchanges.

If we experience growth in self-pay volume and revenue, including increased acuity levels for uninsured patients and increases in co-payments and deductibles for insured patients, our revenues and results of operations could be adversely affected. Although we have experienced a reduction in uninsured patients since 2014 as a result of the Affordable Care Act and the expansion of state Medicaid programs, we are unable to predict whether that trend will continue in light of the repeal of the penalties associated with the individual mandate, the cessation of the cost sharing reduction payments to insurers, and the decision by some states not to expand their Medicaid programs. In addition, the risk of collection from insured patients (and the amounts due) has increased, and will likely continue to increase, as a result of more individuals being enrolled in insurance plans with high deductibles and high co-payments. Furthermore, our ability to improve co-insurance collections and collections from self-pay patients may be limited by legislative developments, such as federal and state legislation designed to reduce "surprise billing," or by other regulatory or investigatory initiatives, including private lawsuits directed at hospital charges and collection practices for uninsured and underinsured patients.

An increase in the proportion of our accounts receivable being comprised of uninsured accounts and a deterioration in the collectability of these both insured and uninsured accounts could adversely affect our results of operations and revenues. Even if the Affordable Care Act remains implemented in its current form, we may continue to experience bad debts and be required to provide uninsured discounts and charity care for patients who choose not to purchase coverage, are undocumented immigrants who are not permitted to enroll in the Exchanges or government healthcare programs or live in states that do not expand or maintain the expansion of their Medicaid programs.

We are subject to potential legal and reputational risk as a result of our access to personal information of our patients and employees.

HIPAA and numerous other federal and state laws and regulations govern the collection, dissemination, use, privacy, security, confidentiality, integrity, and availability of personally identifiable information ("***PII***") and PHI. HIPAA imposes privacy and security requirements on healthcare providers who are covered entities such as us, including to implement reasonable and appropriate administrative, physical and technical safeguards to protect PHI, including PHI maintained, used and disclosed in electronic form, and data breach notification requirements for certain unauthorized access, acquisition, use or theft of PHI. The safeguards include employee training, identifying "business associates" with whom we need to enter into HIPAA-compliant contractual arrangements, and various other measures. We are required to develop and adopt a comprehensive set of policies and procedures to comply with HIPAA and other privacy and information security laws. Ongoing implementation and oversight of these measures involves significant time, effort and expense. In the ordinary course of our business, we, and vendors acting on our behalf, collect, transmit, share and store sensitive data, including PHI and PII of our patients and employees. Such information is at risk of accidental or intentional misuse or disclosure, and is often targeted by criminal organizations. The secure processing, maintenance and transmission of this information is critical to our operations and business strategy. If, in spite of our security and compliance efforts we or any of our business associates were to experience a breach, loss, or other compromise of PHI or PII, such event could disrupt our operations, result in increased data protection costs, damage our reputation, or result in regulatory penalties, legal claims and civil or criminal liability under HIPAA and other state and federal laws, which could have a material adverse effect on our results of operations.

HHS requires covered entities to report breaches of unsecured PHI to affected individuals without unreasonable delay and in no case later than 60 days after the discovery of the breach by the covered entity or its agents. Notification must also be made to HHS and, in certain situations involving large breaches, to the media. HIPAA creates a presumption that all non-permitted uses or disclosures of unsecured PHI are breaches unless the covered entity establishes that there is a low probability the information has been compromised. HHS has imposed substantial mandatory civil and criminal penalties for violations of HIPAA's requirements, with potential civil penalties exceeding $1.7 million in a calendar year for multiple violations of the same requirement in a single year. Moreover, because a single breach incident can result in multiple violations of multiple requirements, potential penalties can range much higher. We are also subject to state breach notification laws which may differ from HIPAA. In addition, state attorneys general and private plaintiffs have brought civil actions seeking injunctions and damages in response to violations of state or federal privacy laws or HIPAA's privacy, security and breach notification rules, as applicable. While HIPAA does not create a private right of action allowing individuals to sue us in civil court for violations of HIPAA's requirements, its standards have been used as a basis for the duty of care in state civil suits, such as those for negligence or recklessness in the handling of PHI. In addition, HIPAA mandates that the Secretary of HHS conduct periodic compliance audits of HIPAA covered entities such as us, and has reserved the right to initiate enforcement actions where it discovers noncompliance.

In addition, many states in which we operate may impose laws that are more protective of the privacy and security of PII than HIPAA. Where these state laws are more protective of individual privacy than HIPAA, we have to comply with their stricter provisions. Not only may some of these state laws impose fines and penalties upon violators, but some may also afford private rights of action to individuals who believe their PII has been misused. Both state and federal laws are subject to modification or enhancement of privacy protection at any time. Our facilities will continue to remain subject to any federal or state privacy-related laws that are more restrictive than the privacy regulations issued under HIPAA. These statutes vary and could impose additional requirements on us and more severe penalties for disclosures of confidential health information. New health information standards could have a significant effect on the manner in which we do business, and the cost of complying with new standards could be significant. We may not remain in compliance with the diverse privacy requirements in all of the jurisdictions in which we do business. If we fail to comply with HIPAA or similar state laws, we could incur substantial civil monetary or criminal penalties.

A cybersecurity attack or security breach could cause a loss of confidential data, give rise to remediation and other expenses, expose us to liability under HIPAA, consumer protection laws, common law or other theories, subject us to litigation and federal and state governmental inquiries, damage our reputation, and otherwise be disruptive to our business.

We rely extensively on our information systems and certain systems operated by us and third-parties to manage clinical, financial and employee data, communicate with our patients, payers, vendors and other third parties and summarize and analyze operating results. These systems are at risk from cybersecurity attacks and other intrusions, including attempts to gain unauthorized access to and theft of our confidential data, misuse, corruption or destruction of confidential data and damage, disruptions or shutdowns of these systems due to viruses, malware, ransomware, employee error or malfeasance, and other electronic security breaches. Our systems, which transmit and store sensitive and confidential data, including PHI and other PII of our patients, employees and others, and our proprietary and confidential business performance and other data, will continue to be a target for attempts to gain unauthorized access and data theft due to the valuable nature of the information they contain, as well as at risk for accidental exposure. In addition, certain third-party medical devices and equipment are used at our facilities, and may be vulnerable to cybersecurity attacks or other breaches which could negatively impact our systems or our patients.

Cybersecurity breaches and other unauthorized access to our data can sometimes be difficult to discern, and any delays in detection may lead to increased harm. Such attacks or breaches are common in the healthcare sector and could result in the compromise of health information or other data subject to protection by HIPAA and other laws and regulations, or disrupt our IT systems or business. While we are not aware of having experienced a material cybersecurity breach, there can be no assurance that we will not be subject to material cyber-attacks or security breaches in the future, or that the preventive actions we take to reduce the risk of such incidents and protect our IT and data will be sufficient. We continue to prioritize cybersecurity and the development of practices and controls to protect our systems. However, regardless of the nature, extent and timing of our actions, these measures may not prevent security breaches. If our services are subject to cyber-attacks that impair or deny the ability of patients to access our services, current and potential patients may become unwilling to provide us the information necessary for them to become users of our services or may curtail or stop using our services. As cyber-threats continue to evolve, we may be required to expend significant additional resources to continue to modify or enhance our protective measures and to investigate and remediate any information security vulnerabilities. As we are subjected to cyber-attacks and possible security breaches in the future, this could have an adverse impact on our business, reputation, financial condition and results of operations. See "—We are subject to potential legal and reputational risk as a result of our access to personal information of our patients and employees" for more information.

We may not be able to generate sufficient cash flow through operations or successfully access other capital resources to fund all of our capital expenditure programs and commitments.

We require substantial capital resources to fund our growth strategy and ongoing capital expenditure programs, including capital expenditure programs for renovation, expansion and construction at our facilities and the addition of equipment and technology at our facilities. We often commit to significant capital expenditures well in advance of the time these expenditures will be made. Our cash flows and available capital resources may be insufficient to fund our capital expenditure programs and commitments, and we may be forced to reduce or delay planned and required capital expenditures. Additionally, we may experience delays or impediments in satisfying the schedule for capital expenditure commitments because of a variety of factors beyond our control, such as zoning, environmental, licensing and certificate of need regulations and restrictions. The failure to satisfy our capital expenditure commitment obligations could also damage our reputation within our communities, expose us to potential claims from former owners of acquired facilities or other governing or regulatory agencies, and adversely impact our ability to negotiate and complete future acquisitions.

At December 31, 2018, we estimated our total remaining capital expenditure commitments to be approximately $1,436.3 million, which generally have remaining terms of three to seven years. Of this amount, approximately one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time. The failure to satisfy our capital expenditure commitment obligations could damage our reputation within our communities, expose us to potential claims from former owners of acquired facilities or other governing or regulatory agencies, and adversely impact our ability to negotiate and complete future acquisitions. As a result, if our cash flows and available capital resources are not sufficient to fund all of our anticipated capital expenditures, it may be necessary for us to give priority to contractual capital expenditure commitment obligations over other elective capital expenditure programs.

Other hospitals and outpatient facilities provide services similar to those which we offer. In addition, healthcare providers provide services in their offices that could be provided in our facilities. These factors increase the level of competition we face and may therefore adversely affect our revenues and results of operations.

Competition among hospitals and other healthcare service providers, including outpatient facilities, has intensified in recent years. We also have acquired, and may continue to acquire, larger facilities in more concentrated population centers, which experience greater competition for healthcare services. We compete with other facilities, including larger tertiary and quaternary care centers located in metropolitan areas. Although the facilities with which we compete may be a significant distance away from our facilities, patients in our markets may migrate on their own to, may be referred by local providers to, or may be required by their health plan to travel to these facilities. Furthermore, some of the facilities with which we compete may offer more or different services than those available at our facilities, may have more advanced equipment or technology or may have a medical staff that is perceived to be better qualified. We also compete with facilities and health systems that are implementing physician and other provider alignment strategies, such as employing providers, acquiring physician practice groups and participating in ACOs or other clinical integration models, which may impact our competitive position. Also, many of the facilities that compete with our facilities are owned by tax-supported governmental agencies or not-for-profit entities supported by endowments and charitable contributions and are eligible to participate in the 340B Program. These facilities, in most instances, are also exempt from paying sales, property and income taxes and have the ability to issue tax-exempt bonds for financing.

Quality of care and value-based purchasing have also become significant trends and competitive factors in the healthcare industry. CMS makes public the performance data relating to multiple quality measures that facilities submit in connection with their Medicare payment. CMS also requires every Medicare participating hospital to establish and update annually a public online listing of the hospital's standard charges for items and services. If the publicly-available performance and charge data become a primary factor in where patients choose to receive care, and if competing facilities have lower charges or better results than our facilities on those measures, our revenues and/or patient volumes could decline.

We also face significant and increasing competition from services offered by providers (including providers on our medical staffs) in their offices and from other specialized care providers, including freestanding emergency departments and outpatient surgery, oncology, physical therapy, diagnostic and urgent care centers (including many in which providers may have an ownership interest). We also compete with specialty facilities that focus on one or a small number of lucrative service lines, some of which are not required to operate emergency departments. Some of our facilities have and will seek to develop outpatient facilities where necessary to compete effectively. However, to the extent that other providers are successful in developing outpatient facilities or providers are able to offer additional, advanced services in their offices, our market share for these services will likely decrease in the future.

The industry emphasis on value-based purchasing and bundled payment arrangements may negatively affect our revenues.

There is a trend in the healthcare industry toward value-based purchasing of healthcare services and bundled payment arrangements. Value-based purchasing programs include both public reporting of quality data and payment limitations tied to the incidence of preventable adverse events or the quality and efficiency of care provided by facilities. For example, Medicare, Medicaid and many large commercial payers may require facilities to report certain quality data to receive full payment updates or avoid payment reductions. They may also impose payment reductions in connection with HACs and excessive readmissions for certain conditions designated by HHS. Our revenue may be negatively impacted by the application of one or more of these measures. Bundled payment arrangements generally set target payment amounts for all healthcare services provided to patients during particular episodes of care. They are intended to create incentives for physicians, hospitals and other providers to work together to provide higher quality and more coordinated care at a lower cost. We currently participate in a few ACOs as well as a number of bundled payment programs, and we expect value-based purchasing programs, including programs that condition payment on patient outcome measures, to become more common and to involve a higher percentage of payment amounts. We are unable at this time to predict how this trend will affect our results of operations, but it could negatively affect our revenues.

If we do not effectively attract, recruit and retain qualified physicians and other healthcare providers, our ability to deliver healthcare services efficiently will be adversely affected.

The success of our business operations depends on the number and quality of the physicians and other healthcare providers who perform services at our facilities. Our ability to recruit and retain quality providers in turn depends on several factors, including the actual and perceived quality of services furnished by our facilities, our ability to meet demands for new technology, our ability to identify and communicate with providers who want to practice in our communities and our ability to provide competitive financial compensation packages. Our ability to attract and retain providers is increasingly dependent on the ability of our facilities to offer and sustain employment arrangements. In particular, we face intense competition in the recruitment and retention of specialists and primary care providers. We may not be able to recruit all of the providers we target. In addition, we may incur increased malpractice, compliance or insurance expense depending on the quality of providers' clinical outcomes.

Additionally, our ability to recruit and employ providers is closely regulated. For example, the types, amount and duration of compensation and assistance we can provide to recruited physicians are limited by the Stark law, the Anti-kickback Statute, state anti-kickback and self-referral statutes, and related regulations. The Stark law requires, among other things, that recruitment assistance can only be provided to physicians who meet certain geographic and practice requirements, that the amount of assistance cannot be changed during the term of the recruitment agreement, and that the recruitment payments cannot generally benefit physicians currently in practice in the community beyond recruitment costs actually incurred by them. All arrangements with physicians must also be fair market value and commercially reasonable.

In addition to these legal requirements, there is competition from other communities and facilities for these providers, and this competition continues after the provider is practicing in one of our communities. For example, integrated ACOs and other kinds of "narrow" provider networks or organizations may exclude our providers from their plans' networks of healthcare providers. These contracting networks often organize hospitals, providers and ancillary healthcare providers into exclusive networks involving fewer healthcare providers. If our affiliated providers are excluded from such networks, we may have difficulty recruiting new providers or retaining existing providers.

Furthermore, a significant portion of the providers serving our facilities are native to countries other than the U.S. Our ability to recruit such providers and their ability and willingness to remain and work in the U.S. are impacted by immigration laws and regulations. Changes in immigration or naturalization laws, regulations, or procedures may adversely affect our ability to hire or retain providers and may adversely affect our costs of doing business or our ability to deliver services in our communities.

Generally, a small number of attending physicians within each of our facilities represent a large share of our inpatient revenues and admissions. The loss of one or more of these physicians—even if temporary—could cause a material reduction in our revenues, which could take significant time to replace given the difficulty and cost associated with recruiting and retaining physicians.

We may have difficulty acquiring facilities on favorable terms. Furthermore, our business could be negatively affected if acquisitions are not successfully completed or if contingent liabilities materialize in connection with such transactions.

A significant element of our business strategy is expansion through the acquisition of acute care facilities, especially those around which a system of facilities and other healthcare services can be created. We face significant competition to acquire attractive facilities, and we may not find suitable acquisitions on favorable terms. Our primary competitors for acquisitions have included for-profit and tax-exempt facilities and hospital systems and privately capitalized start-up companies. Buyers with a strategic desire for any particular facility—for example, a facility located near existing facilities or those who will realize economic synergies—have demonstrated an ability and willingness to pay premium prices for facilities. Strategic buyers, as a result, can present a competitive barrier to our acquisition efforts.

The cost of an acquisition could result in a dilutive effect on our results of operations, depending on various factors, including the amount paid for the acquisition, the acquired facility's results of operations, allocation of purchase price, effects of subsequent legislation and limitations on rate increases. As part of our acquisition strategy, we may commit to making significant capital improvements at acquired facilities. Such improvements may be difficult to achieve in the anticipated timeframe, if at all, due to a variety of factors beyond our control, such as zoning, environmental, licensing and certificate of need regulations and restrictions.

Our ability to engage in certain acquisitions in several states may be limited due to exclusivity, non-competition and non-solicitation provisions that we have agreed to in connection with our joint ventures (including Duke LifePoint Healthcare) and previous acquisitions and divestiture transactions. Additionally, certain acquisitions may require the consent of and collaboration with our joint venture partners based upon the applicable governing documents. If we cannot obtain the cooperation of our joint venture partners in certain instances, we may not be able to pursue these opportunities.

Even if we are able to identify an attractive target, we may need to obtain financing for acquisitions, joint ventures or required capital improvements. Such financing may not be available, or we may incur or assume additional indebtedness as a result. Any financing arrangements we enter into may not be on terms favorable to us, and this could have a material adverse effect on our results of operations.

In recent years, the legislatures and attorneys general of several states have sought to exercise more active oversight authority regarding sales of facilities by tax-exempt entities. For example, as a condition to approving an acquisition involving a non-profit hospital, the state attorney general of a state in which an acquisition takes place may require us to maintain specific service lines or provide charity care at certain minimum levels for set periods of time after closing of the acquisition, regardless of profitability. This heightened scrutiny may increase the cost and difficulty, or prevent the completion, of transactions with tax-exempt organizations in the future. Our failure to acquire facilities consistent with our growth plans could prevent us from increasing our revenues.

Many of the non-urban communities in which we operate continue to face challenging economic conditions and demographic trends, which may materially and adversely impede our business strategies intended to generate organic growth and improve operating results at our facilities.

While the U.S. economy as a whole is expanding, many of the non-urban communities in which we operate continue to face challenging economic conditions, including high levels of unemployment and demographic trends. The economies in the non-urban communities in which our facilities primarily operate are often dependent on a small number of large employers, especially manufacturing or similar facilities. These employers often provide income and health insurance for a disproportionately large number of community residents who may depend on our facilities for care. The failure of one or more large employers, or the closure or substantial reduction in the number of individuals employed at manufacturing or similar facilities located in or near many of the non-urban communities in which our facilities primarily operate, could cause affected employees to move elsewhere for employment or lose insurance coverage that was otherwise available to them. When patients are experiencing personal financial difficulties or have concerns about general economic conditions, they may choose to:

- defer or forego elective surgeries and other non-emergent procedures, which are generally more profitable lines of business for facilities; or
- purchase a high-deductible insurance plan or no insurance at all, which increases a facility's dependence on self-pay revenue. Moreover, a greater number of uninsured patients may seek care in our emergency rooms.

Additionally, non-urban communities are experiencing a much slower rate of growth, if any, as compared to more concentrated population centers. As a result, we may experience payer mix pressures as aging populations in our non-urban communities shift from commercial insurance programs to Medicare or managed Medicare programs.

The occurrence of these events may impede our business strategies intended to generate organic growth and improve operating results at our facilities.

If we are unable to implement successfully standardized processes, policies and systems throughout our facilities, our operating results could be negatively impacted.

We have initiated a multi-year business initiative to standardize certain processes, policies and systems throughout our facilities, including migrating our multiple IT platforms to a smaller number of enterprise-wide systems solutions. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure and implement standardized systems, or if we fail to achieve the expected benefits from this initiative, it may impact our ability to operate profitably and efficiently, and comply in a timely manner with changing regulatory requirements and with the requests of patients, payers and business partners. The failure to transition to these systems on time, or anticipate necessary readiness and training needs, could lead to business disruption and loss of revenue. In addition, the operating results of newly acquired facilities could be impacted if such facilities are not integrated on a timely basis into our new systems. The actions we take to resolve compliance or regulatory issues within acquired facilities may affect our revenue or results of operations.

In addition, as new information systems are developed in the future, we will need to integrate them into our existing systems. Evolving industry and regulatory standards may require changes to our systems in the future. System conversions are costly, time consuming and disruptive for providers, staff and, in some cases, patients. Some of our facilities have recently converted or are currently converting from their existing system to another third party information system. If such conversions occurred on a large scale or if conversions at our larger facilities experience difficulties, the costs and disruptions could have a material adverse effect on our revenues or results of operations.

If access to our information systems or those provided by our third party vendors is interrupted or restricted, or if we are unable to make changes to our information systems, our operations could suffer.

Our business depends heavily on effective information systems to process clinical, operational and financial information. Information systems require an ongoing commitment of significant resources to maintain and enhance existing systems and to develop new systems in order to keep pace with continuing changes in information processing technology. In addition to our own systems, we rely on multiple third party providers of financial, clinical, supply chain, patient accounting and network information services and, as a result, we face operational challenges in maintaining multiple provider platforms and facilitating the interface of such systems with one another. The third party providers may not have appropriate controls to protect confidential information. We do not control the information systems of third party providers, and in some cases we may have difficulty accessing information archived on third party systems, which could subject us to liability for failure to respond to legal, regulatory or payer obligations or information requests. Our networks and technology systems are also subject to disruption due to events such as a major earthquake, fire, flood, hurricane, telecommunications failure, terrorist attack or other catastrophic event. If these systems fail or are interrupted, if our access to these systems is limited in the future or if providers develop systems more appropriate for more urban healthcare markets and not suited for our facilities, our operations could suffer.

We intend to expand our operations, including by acquiring more facilities, which will require us to integrate and transition certain existing information systems. In addition, as new information systems are developed in the future, we will need to integrate them into our existing systems. Evolving industry and regulatory standards, such as the HITECH Act, HIPAA and EHR meaningful use regulations, also may require changes to our information systems in the future. System conversions are costly, time consuming and disruptive for providers, staff and, in some cases, patients. If such conversions occurred on a large scale or if we are unable to properly integrate other information systems or expand or update our current information systems, the costs and disruptions could have a material adverse effect on our revenues or results of operations.

Our facilities face competition for management and other non-physician staffing, which may increase labor costs and reduce profitability.

In addition to depending on our physicians and other providers, the operations of our facilities are dependent on the efforts, abilities and experience of our management and medical support personnel, such as nurses, pharmacists and lab technicians. We compete with other healthcare facilities in recruiting and retaining qualified management and staff personnel responsible for the day-to-day operations of each of our facilities, including physician assistants, nurses and other non-physician healthcare professionals. In some markets, the scarce availability of nurses and other medical support personnel presents a significant operating issue and the competition for experienced and talented hospital management personnel is intense. This may result in employee turnover, require us to enhance wages and benefits to recruit and retain management, nurses and other medical support personnel, recruit personnel from foreign countries (which may be limited by changes in immigration law, regulation and policy), and hire more expensive temporary or contract personnel. In addition, the states in which we operate could adopt mandatory nurse staffing ratios or could increase mandatory nurse-to-patient staffing ratios already in place. State-mandated nurse-staffing ratios could significantly affect labor costs and have an adverse impact on revenues if we are required to limit admissions in order to meet the required ratios. Some of the employees at some of our facilities are represented by a union, and others may be in the future, which can also increase the cost of labor. If our labor costs increase, we may not be able to raise rates to offset these increased costs. We also depend on the available labor pool of semi-skilled and unskilled employees in each of the markets in which we operate. Because a significant percentage of our revenue consists of fixed, prospective payments, our ability to pass along increased labor costs is constrained. Our failure to recruit and retain qualified management, nurses and other medical support personnel, or to control our labor costs could have a material adverse effect on our revenues or results of operations.

Labor union activity could raise costs and interfere with our operations. Certain of our employees are union members and subject to the terms of collective bargaining agreements.

Increased or ongoing labor union activity is another factor that could adversely affect our labor costs or otherwise adversely impact us. Several of our facilities have unionized employees. When a new collective bargaining agreement with a union must be negotiated, whether such agreements are renewals or first contracts, there is the possibility that strikes could occur, and our operations could be disrupted or our labor costs increased as a result of these disruptions. Our labor costs also could increase significantly if a substantial number of other employees at our facilities unionize.

If our labor costs increase, we may not be able to raise rates to offset these increased costs. Because a significant percentage of our revenue consists of fixed, prospective payments, our ability to pass along increased labor costs is constrained.

The terms of the collective bargaining agreements also set forth certain requirements related to the respective facility's employment practices, seniority, hours of work, overtime, holidays, use and redemption of paid time off, extended illness bank, vacation scheduling, compensation, pay practice, health and non-health benefits, leaves of absence, grievance procedures, disability accommodations and the facility's drug and alcohol policies. If these facilities fail to fulfill any of these requirements, it could result in discussions with union representatives or the filing of a grievance that could be costly and time-consuming for those facilities. Furthermore, the terms of the collective bargaining agreements constrain our flexibility with respect to these and other employee issues. The inability to negotiate future collective bargaining agreements on favorable terms with these employees or with other unionized employees could have a material adverse effect on our business, results of operations and financial condition.

If we fail to implement and maintain certified electronic health record and coding systems in an effective and timely manner, our operations could be adversely affected.

The Medicare and Medicaid Promoting Interoperability Programs (formerly known as the Medicare and Medicaid EHR Incentive Programs for Eligible Hospitals, Critical Access Hospitals, and Eligible Professionals, and formerly referred to as "***Meaningful Use***") was established in 2011 to encourage eligible professionals, eligible hospitals, and critical access hospitals to adopt, implement, upgrade and demonstrate meaningful use of certified health information technology ("***Certified HIT***") for the purposes of advancing care coordination and improving the quality of care. In 2018, CMS merged the Meaningful Use program into the programs that are being created under MACRA, included this technology requirement as one of the four components of MIPS, and changed the name of the Meaningful Use program to the Promoting Interoperability Program. Each year, HHS and CMS revise standards required for use of Certified HIT, and they periodically revise standards required for a technology's designation as a Certified HIT. In order to meet the requirements for the Promoting Interoperability Program, we must implement, maintain and use technology that meets the Certified HIT standards. In addition, use of Certified HIT is required for reporting under other CMS payment programs, such as ACOs and bundled payment programs. Certain of our EHR's will require software upgrades in the future in order to continue being categorized as Certified HIT as designated by HHS. Failure to effectively comply with the new requirements of the Promoting Interoperability Program, implement EHR systems or maintain current requirements for EHR systems effectively and in a timely manner could have a material adverse effect on our revenue generated from Medicare Part B claims and other CMS QPPs in which we participate.

Under Meaningful Use, we received certain incentive payments related to our efforts to implement our EHR. Incentive payments we have received in prior years for EHR implementation were materially reduced over the program's life to immaterial amounts in 2017 and 2018. EHR incentive payments that we have previously recognized are subject to audit and potential recoupment if it is determined that we did not meet the applicable Meaningful Use standards required in connection with such incentive payments.

Under Meaningful Use, we received certain incentive payments related to our efforts to implement our EHR. Incentive payments we have received in prior years for EHR implementation were materially reduced over the program's life to immaterial amounts in 2017 and 2018. EHR incentive payments that we have previously recognized are subject to audit by CMS and potential recoupment for up to the past six years if it is determined that we did not meet the applicable Meaningful Use standards required in connection with such incentive payments. To the extent a CMS audit determines that we did not meet the reporting requirements for Meaningful Use, the Company would be subject to the potential recoupment of the incentive and other payments previously received in connection with the Meaningful Use program. In addition, reporting under MIPS results in either a negative or positive per claim payment adjustment by CMS and potential bonus payments, as well. To the extent a CMS audit determines that we did not meet the reporting requirements of the Promoting Interoperability Program, the Company would be subject to potential recoupment of any positive adjustments or bonus payments that were previously made. A determination by CMS that the Company has made a false attestation regarding its Meaningful Use or Promoting Interoperability Program participation could also potentially be grounds for prosecution under the False Claims Act or other applicable federal fraud and abuse laws.

Certificate of need laws and regulations regarding licenses, ownership and operation may impair our future expansion in some states. In states without certificate of need laws, competing providers of healthcare services are able to expand and construct facilities without the need for significant regulatory approval.

Some states require prior approval for the purchase, construction and expansion of healthcare facilities, based on the state's determination of need for additional or expanded healthcare facilities or services. Certain states in which we operate facilities require a certificate of need for the purchase, construction or expansion of hospital facilities, capital expenditures exceeding a prescribed amount, changes in bed capacity or services, or for other hospital-related activities. We may not be able to obtain certificates of need required for expansion activities or to effectively compete with competing healthcare providers in the future. In addition, all of the states in which we operate facilities require hospitals, other healthcare facilities, and most healthcare providers to maintain one or more licenses. If we fail to obtain any required certificate of need or license, our ability to operate or expand operations in those states could be impaired.

In the states in which we operate that do not require certificates of need for the purchase, construction and expansion of hospital facilities, competing healthcare facilities face lower regulatory barriers to entry and expansion. If competing healthcare entities are able to purchase, construct or expand healthcare facilities without the need for regulatory approval, we may face decreased market share and revenues in those markets.

The implementation of participation and quality measurement requirements under the MACRA's Merit-Based Incentive Payment System may affect our revenues.

Under MACRA, CMS updates payment rates for physician services based on inflation, and implements the QPP that rewards value and outcomes through participation in MIPS or an APM program. Beginning in 2017, MIPS started measuring provider performance under four categories: quality, improvement activities, promoting interoperability and cost, and annually establishes a point threshold for each category and overall performance. In 2019, MIPS began rewarding or penalizing providers based on performance reported in CY 2017 and subsequent years. The MIPS adjustment has a more significant impact on claims' payment than the annual inflationary update to the Medicare PFS.

Although CMS estimates that less than half of all clinicians, which includes physician assistants, nurse practitioners, clinical nurse specialists and certified registered nurse anesthetists, who bill Medicare Part B are eligible for MIPS, physicians are required to participate unless they are participants of an APM, are newly enrolled in Medicare, or see a low volume of Medicare patients (i.e., no more than 200 patients in a calendar year or $90,000 in charges for professional services). MIPS eligible clinicians are subject to a payment adjustment of plus or minus 4% in CY 2019 (based on CY 2017 performance) with the payment adjustment increasing each year until it reaches plus or minus 9% in CY 2022 and beyond. MIPS eligible clinicians with exceptional performance may receive up to 10% bonus payment. However, for CY 2019, CMS projects that only 1.5% of participating MIPS eligible clinicians will receive a bonus, with this amount only increasing to 3.6% of MIPS eligible providers in CY 2021 (based on 2019 performance). Providers participating in an APM may be eligible for more advantageous adjustments under MIPS (or avoid any negative adjustment) and receive a 5% bonus. At this time, we have limited participation in APMs.

If an eligible clinician has not been satisfactorily participating in MIPS, his or her claims for Medicare Part B services are likely to be subject to negative payment adjustments in CY 2019 (which is based on 2017 performance), CY 2020 (which is based on CY 2018 performance) and CY 2021 (which will be based on CY 2019 performance). For participating eligible clinicians that meet or exceed the MIPS threshold or APM requirements, claims for payment are likely to be subject to positive adjustments as well as a share of an additional pool of bonus payments. At this time, and as CMS continues to modify MIPS payment policies, it is unclear how MIPS will impact our overall physician payments under the Medicare program. If we have not timely and effectively implemented policies and procedures, quality programs and appropriate clinician contracting to ensure compliance with MACRA and other QPP requirements, we would experience a negative effect on future revenues related to Medicare Part B claims.

MACRA requires that CMS publish each eligible clinician's MIPS score and performance category scores on its Physician Compare website. CMS has stated that it will report scores based on CY 2017 performance in early 2019. Publishing of MIPS scores could have an adverse reputational effect on us if our employed physicians have low scores or scores that are lower than those of the other clinicians in the relevant communities.

If current or future laws or regulations force us or cause us to restructure our arrangements with physicians and other providers, we may incur additional costs, lose contracts and suffer a reduction in net revenue under existing contracts, and we may need to refinance our debt or obtain consent from our lenders.

A number of laws bear on our relationships with our physicians and other providers. There is a risk that state authorities in some jurisdictions may find that our contractual relationships with our physicians violate laws prohibiting the corporate practice of medicine and fee-splitting. These laws generally prohibit the practice of medicine by lay entities or persons and are intended to prevent unlicensed persons or entities from interfering with or inappropriately influencing the physician's professional judgment. They may also prevent the sharing of professional services income with non-professional or business interests. In states that have enacted corporate practice of medicine and fee-splitting prohibitions, we believe that we have structured our physician contracts in an effort to remain compliant with such laws. A regulatory agency, however, could still make a determination that our arrangements constitute a corporate practice of medicine or fee splitting violation. A review or action by regulatory authorities or the courts could force us to terminate or modify our contractual relationships with physicians and affiliated medical groups or revise them in a manner that could be materially adverse to our business.

In addition, we have also entered into a number of joint venture arrangements with physicians and other providers (e.g., hospitals and hospital operators) that are subject to state and federal fraud and abuse laws, including the Anti-kickback Statute and False Claims Act. See "We are subject to increasingly stringent governmental regulations, and we may face allegations that we have failed to comply with such regulations, which could result in criminal and civil sanctions, exclusion from government healthcare programs and even greater scrutiny that may reduce our revenues and profitability." To the extent applicable, regulatory agencies may view these transactions as prohibited arrangements that must be restructured, or discontinued, or for which we could be subject to other significant penalties, including debarment, suspension or exclusion from state and federal government healthcare programs. Although compliance programs can mitigate the risk of investigation and prosecution for violations of these laws, the risks cannot be entirely eliminated. Any action against us for violation of these laws, even if we successfully defend against it, could cause us to incur significant legal expenses and loss of revenue from those joint ventures and divert our management's attention from the operation of our business.

We are dependent on our executive management team and the loss of the services of one or more of our executive management team could have a material adverse effect on our business.

The success of our business is largely dependent upon the services and management experience of our executive management team. In addition, we depend on the ability of our executive officers and key employees to manage growth successfully and on our ability to attract and retain skilled employees. We do not maintain key man life insurance policies on any of our officers. If we were to lose any of our executive management team or members of our local management teams, or if we are unable to attract other necessary personnel in the future, it could have a material adverse effect on our business, financial condition and results of operations. If we were to lose the services of one or more members of our executive management team, we could experience a significant disruption in our operations and failure of the affected facilities to adhere to their respective business plans.

Difficulties with major expansion projects may involve delays and significant capital expenditures that could have an adverse impact on our operations and liquidity.

We may decide to construct major expansion projects to existing facilities or new facilities, including replacement facilities, in order to achieve our growth objectives. Our ability to complete new expansion projects on budget and on schedule would depend on a number of factors, including, but not limited to:

- our ability to control construction costs;
- adverse weather conditions;
- shortages of labor or materials;
- our ability to obtain necessary licensing and other required governmental authorizations; and
- other unforeseen problems and delays.

As a result of these and other factors, we cannot assure you that if we decide to pursue major expansion projects we will not experience greater construction or other expansion or replacement costs than originally planned in connection with such expansion or replacement projects. Additionally, we cannot assure you that such expansion or replacement projects will be completed in a timely manner. Any delays or other difficulties in our ability to complete new expansion or replacement projects on budget and on schedule could have a material adverse effect on our results of operations and liquidity.

Under the A&R Master Lease (defined below) that governs certain of our facilities, a default with respect to one facility could cause a default under all of the facilities subject to the A&R Master Lease, which would have a material adverse effect on our business, results of operations and financial condition.

If there is a default under that certain Amended and Restated Master Lease Agreement (the "***A&R Master Lease***") with MPT Camaro OpCo, LLC, a Delaware limited liability company and wholly-owned subsidiary of Medical Properties Trust, Inc. ("***MPT***"), a Maryland corporation operating as a real estate investment trust, even if such default relates to one facility, it may terminate the A&R Master Lease in its entirety with respect to all of the facilities governed by the A&R Master Lease.

Under the A&R Master Lease, we are subject to financial covenants based on certain fixed charges, and the failure to meet such covenants results in an event of default. Other events that could trigger a default under the A&R Master Lease if not cured within the time periods required by the A&R Master Lease include, without limitation, (i) failure to pay rent or other amounts due under the lease, (ii) failure to comply with the non-financial covenants under the lease, (iii) the bankruptcy of any facility lessee under the A&R Master Lease or guarantor under a Second Amended and Restated Guaranty, (iv) termination of any licenses necessary for operation of a facility or required for certification under Medicare or Medicaid, (v) a change of control (as defined in the A&R Master Lease) in violation of the A&R Master Lease and (vi) a default under any material documents between any lessee of the facilities and any lessor of any facility. The A&R Master Lease contains cross-default provisions so that a default with respect to one of our facilities may cause a default under the entire A&R Master Lease. Accordingly, a default under the A&R Master Lease that results in a termination of the A&R Master Lease would cause us to lose the ability to operate all of the facilities subject to the A&R Master Lease and to incur substantial costs in restoring the premises, which would have a material adverse effect on our business, results of operations and financial condition.

If the A&R Master Lease is terminated prior to its expiration because of a default and the applicable affiliate of MPT, as lessor, exercises its rights thereunder, in addition to losing the ability to operate our facilities, we may be liable for (i) damages and incur charges such as continued lease payments through the end of the lease term (or such shorter period as proscribed in the A&R Master Lease or by law) and (ii) maintenance costs for the leased property. Upon termination of the A&R Master Lease, we are obligated to restore the premises to its original condition and repair all damage caused by the installation or removal of our personal property, ordinary wear and tear excepted. We also have restoration obligations with respect to certain casualty and condemnation events. In addition, upon termination of the A&R Master Lease, the lessor has the option to purchase all of our personal property at fair market value.

Because the land used by many of the facilities we operate are subject to ground leases, failure to comply with the terms of such leases or failure to renew such leases could cause us to lose the ability to operate these facilities altogether and incur substantial costs in restoring the premises.

The rights to use the land at many of our facilities are based upon long-term ground leases. Pursuant to the terms of these ground leases, we are required to pay all rent due and comply with all other lessee obligations. As of December 31, 2018, the remaining term of these ground leases (including renewal options) ranged from approximately 6 to 80 years. A pledge of our interest in some of these ground leases may also require the consent of the respective lessor and its lenders. As a result, we may not be able to sell, assign, transfer or convey our interest in certain facilities subject to such ground leases in the future absent consent of such third parties even if such transactions may be in our best interest. Most of the ground leases require that, upon the expiration or termination of the ground leases, we must surrender any improvements to the land to lessor. In addition, some of our ground leases include early termination provisions. We are typically responsible for all taxes, insurance, assessments and maintenance obligations under the ground leases. The ground leases also generally require the lessee to either reconstruct or restore the premises to its original condition following a casualty and to apply in a specified manner any proceeds received in connection therewith. In some leases the ground lessor has the option to purchase some or all of the assets owned by us and used in connection with the operation of the applicable facility. Accordingly, failure to comply with the terms of such leases, the invalidity of or default or termination under such leases could cause us to lose the ability to operate these facilities altogether and incur substantial costs in restoring the premises, which could have a material adverse effect on our business, results of operations and financial condition.

If certain sale-leaseback transactions are not characterized as "operating leases" under GAAP, this could adversely affect our results of operations and our financial condition.

We have entered into sale-leaseback transactions in the past and may enter into similar sale-leaseback transactions for properties that we acquire in the future, including pursuant to that certain Strategic Agreement, dated as of March 21, 2016, with MPT Operating Partnership, L.P. ("***MPT Op***"), which grants MPT Op and its affiliates certain rights and options to provide future sale-leaseback funding or real estate loans for certain acquisitions of additional properties. Although we may intend, in some cases, for such leases to be accounted for as an "operating lease" pursuant to GAAP, depending on the terms of any specific transaction, our auditors might take the position that the leases should be accounted for as "financing obligations" under Accounting Standards Codification ("***ASC***") 840, "Leases" ("***ASC 840***"). In that event, this may materially affect assets and liabilities in our balance sheet and certain expenses in our income statement, which could have a material adverse effect on our results of operations and our financial condition.

Our debt agreements contain restrictions that will limit our flexibility in operating our business.

The ABL Agreement, the Term Loan Agreement and the Indentures contain, and any other existing or future indebtedness of ours would likely contain, a number of covenants that impose significant operating and financial restrictions on us, including restrictions on our and our subsidiaries ability to, among other things:

- incur additional debt, guarantee indebtedness or issue certain preferred shares;
- pay dividends on or make distributions in respect of, or repurchase or redeem, our capital stock or make other restricted payments;
- prepay, redeem or repurchase certain debt;
- make loans or certain investments;
- sell certain assets;
- create liens on certain assets;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our assets;
- enter into certain transactions with our affiliates;
- alter the businesses we conduct;
- enter into agreements restricting our subsidiaries' ability to pay dividends; and
- designate our subsidiaries as unrestricted subsidiaries.

As a result of these covenants, we are limited in the manner in which we conduct our business, and we may be unable to engage in favorable business activities or finance future operations or capital needs.

In addition, the ABL Facility requires us to maintain a minimum fixed charge coverage ratio at any time when the average availability is less than the greater of $65.0 million and 10% of the lesser of the aggregate amount of revolving facility commitments and the borrowing base at such time. In that event, we must satisfy a minimum fixed charge ratio of 1.0 to 1.0. At December 31, 2018 we were in compliance with this financial maintenance covenant.

A failure to comply with the covenants under the ABL Facility, the Term Loan Facility, the Notes or any of our other future indebtedness could result in an event of default, which, if not cured or waived, could have a material adverse effect on our business, financial condition and results of operations. In the event of any such default, the lenders thereunder:

- will not be required to lend any additional amounts to us;
- could elect to declare all borrowings outstanding, together with accrued and unpaid interest and fees, to be due and payable and terminate all commitments to extend further credit;
- could require us to apply all of our available cash to repay these borrowings; or
- could effectively prevent us from making debt service payments on the Term Loan Facility and the Notes (due to a cash sweep feature under the ABL Facility).

Such actions by the lenders could cause cross defaults under our other indebtedness. If we were unable to repay those amounts, the lenders and holders under the ABL Facility, the Term Loan Facility and the Notes could proceed against the collateral granted to them to secure the ABL Facility, the Term Loan Facility or the Notes, respectively. If any of our outstanding indebtedness under the ABL Facility, the Term Loan Facility, the Notes or any of our other existing or future indebtedness were to be accelerated, there can be no assurance that our assets would be sufficient to repay such indebtedness in full.

Repayment of our debt is dependent on cash flow generated by our subsidiaries.

Repayment of our indebtedness, including the ABL Facility, the Term Loan Facility and the Notes, is dependent on the generation of cash flow by our subsidiaries and their ability to make such cash available to us, by dividend, debt repayment or otherwise. Unless they are guarantors of the indebtedness, our subsidiaries do not have any obligation to pay amounts due on such indebtedness or to make funds available for that purpose. Our subsidiaries may not be able to, or may not be permitted to, make distributions to enable us to make payments in respect of our indebtedness. Each subsidiary is a distinct legal entity and, under certain circumstances, legal and contractual restrictions may limit our ability to obtain cash from our subsidiaries. While our debt agreements will limit the ability of our restricted subsidiaries to incur consensual restrictions on their ability to pay dividends or make other intercompany payments to us, these limitations are subject to certain qualifications and exceptions. In the event that we do not receive distributions from our subsidiaries, we may be unable to make required principal and interest payments on our indebtedness. In the event we require restructuring or refinancing, we cannot assure you that we will be able to restructure or refinance any of our debt on commercially reasonable terms or at all.

Despite our substantial indebtedness, we may still be able to incur significantly more debt, which could intensify the risks described above.

We and our subsidiaries may be able to incur substantial indebtedness in the future. Although the terms of the ABL Agreement, the Term Loan Agreement and the Indentures contain restrictions on our and our subsidiaries' ability to incur additional indebtedness, these restrictions are subject to a number of important qualifications and exceptions, and the indebtedness incurred in compliance with these restrictions could be substantial. These restrictions also will not prevent us from incurring obligations that do not constitute indebtedness. As of December 31, 2018, we would have had approximately $580.0 million available for additional borrowing under the ABL Facility (without giving effect to letters of credit), all of which would be secured. In addition to the Notes and our borrowings under the ABL Facility and the Term Loan Facility, the covenants under any other existing or future debt instruments could allow us to incur a significant amount of additional indebtedness and, subject to certain limitations, such additional indebtedness could be secured. The more leveraged we become, the more we, and in turn our security holders, will be exposed to certain risks described above under "—Our debt agreements contain restrictions that will limit our flexibility in operating our business."

Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.

Borrowings under the ABL Facility and the Term Loan Facility are at variable rates of interest and expose us to interest rate risk. To manage this risk, we entered into an interest rate swap agreement on December 21, 2018 with Citibank, N.A. as counterparty (the "Interest Rate Swap"). The terms of the Interest Rate Swap require us to pay a fixed rate of 2.63% on a notional amount of $1,100.0 million and, in exchange, we receive one-month London Interbank Offered Rate ("***LIBOR***"). The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. We have not designated our Interest Rate Swap as a cash flow hedge in accordance with ASC 815, "Derivatives and Hedging" ("***ASC 815***"). Therefore, all changes in the fair value of our Interest Rate Swap will be recognized through interest expense in our results of operations. Changes in the fair value of our Interest Rate Swap could result in a material effect on our consolidated results of operations and financial position; however, we do not anticipate that changes in the fair value of our Interest Rate Swap will have any impact on our cash flows.

Discontinuation, reform or replacement of LIBOR may adversely affect our results of operations.

The U.K. Financial Conduct Authority announced in 2017 that it intends to phase out LIBOR by the end of 2021. Changes to LIBOR or any other benchmark rate may impact credit markets. Borrowings under our Term Loan Facility and ABL Facility bear interest at rates based on LIBOR. The administrative agent for those facilities may approve a comparable or successor rate with respect to LIBOR or, if not feasible, another accommodation as reasonably determined by the agent. The replacement of LIBOR with a comparable or successor rate could cause the amount of interest payable on our Term Loan Facility and ABL Facility to be different than expected.

Additionally, the notional amount associated with our Interest Rate Swap is based on LIBOR. If LIBOR becomes unavailable, it is unclear how payments under our Interest Rate Swap would be calculated. Relevant industry groups are seeking to create a standard protocol addressing the expected discontinuation of LIBOR, but there can be no assurance that such a protocol will be developed or implemented with respect to our Interest Rate Swap.

Our ability to utilize our net operating loss carryforwards may be limited, and we may not be able to utilize our net operating loss carryforwards as a result of recent U.S. federal tax reform legislation.

As of December 31, 2018, we had net operating loss carryforwards ("***NOLs***") of approximately $342.4 million for federal income tax purposes, which expire at various dates between 2028 through 2037 for NOLs generated prior to 2018, and indefinite lives for NOLs generated in 2018 and future periods. Additionally, we had approximately $2.5 billion in state and local net operating loss carryforwards that expire at various dates between 2019 through 2038. To the extent available and not otherwise utilized, we intend to use any NOL carryforwards to reduce the applicable U.S. or state corporate income tax liability associated with our operations. However, our ability to utilize our NOL carryforwards is based on the extent to which we generate future taxable income and on prevailing corporate income tax rates, and we cannot provide any assurance as to when and to what extent we will generate sufficient future taxable income to realize our deferred tax assets, whether in whole or in part. Furthermore, the utilization of our NOL carryforwards may become subject to an annual limitation under Section 382 of the Code (and similar state provisions) in the event of certain cumulative changes in the ownership interest of significant shareholders in excess of 50 percent over a three-year period. This could limit the amount of NOL carryforwards that can be utilized annually to offset taxable income. The amount of the annual limitation is determined based on the value of a company immediately prior to the ownership change. Subsequent ownership changes may further affect the limitation in future years. For these reasons, our ability to utilize our NOLs may be limited.

Item 2. ***Properties.***

The table below presents certain information with respect to our hospital campuses as of December 31, 2018:

Facility Name	City	Licensed Beds	Ownership and Real Property Status
Alabama			
Andalusia Regional Hospital	Andalusia	88	Own
North Alabama Medical Center	Florence	358	Own
Shoals Hospital	Muscle Shoals	178	Own
Vaughan Regional Medical Center (a)	Selma	175	JV/Own

(a) This facility is owned and operated by a joint venture between us and an unrelated third party. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.
(b) This facility is owned and operated by a joint venture with physicians in which a wholly-owned LifePoint affiliate has a controlling interest. The real property on which this facility is located is owned by the LifePoint member and leased to the joint venture.
(c) This facility is owned and operated by a joint venture with physicians in which a wholly-owned LifePoint affiliate has a controlling interest.
(d) This facility is subject to a sale-leaseback arrangement with MPT.
(e) This facility is subject to the A&R Master Lease.
(f) This facility is owned and operated by the Regional Health Network of Kentucky and Southern Indiana ("***RHN***"), a joint venture between us and Norton. A wholly-owned LifePoint affiliate owns a controlling interest in RHN.
(g) Refer to Note 3 to our accompanying consolidated financial statements included elsewhere in this Report for information regarding ongoing negotiations to divest this facility.
(h) This facility is owned and operated by Duke LifePoint Healthcare. A wholly-owned LifePoint affiliate owns a controlling interest in Duke LifePoint Healthcare.
(i) This facility is owned and operated by a joint venture between a local not-for-profit entity and Duke LifePoint Healthcare.
(j) This facility is owned and operated by a joint venture among us, physicians and a joint venture between us and University of Washington. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.
(k) This facility is owned and operated by a joint venture between us and University of Washington. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.
(l) This facility is subject to a sale-leaseback arrangement with a third-party for a hospital building whose rent is contingent on the financial performance of the hospital and a sale-leaseback arrangement for a medical office building.

We own and operate medical office buildings in conjunction with many of our hospitals. These medical office buildings are primarily occupied by physicians who practice at our hospitals. Additionally, we lease office space in Brentwood, Tennessee for our health support center. All of our facilities are suitable for their respective uses and are generally adequate for our present needs.

Item 3. ***Legal Proceedings.***

Healthcare facilities are, from time to time, subject to claims and suits arising in the ordinary course of business, including claims for damages for personal injuries, medical malpractice, breach of contracts, wrongful restriction of or interference with physicians' staff privileges and employment related claims. In certain of these actions, plaintiffs request payment for damages, including punitive damages, that may not be covered by insurance. We are currently not a party to any pending proceedings, which, in management's opinion, would have a material adverse effect on our business, financial condition or results of operations.

For more information about legal proceedings and general liability claims, refer to Note 14 to our accompanying consolidated financial statements included elsewhere in this Report.

Item 4. ***Mine Safety Disclosures*****.**

Not applicable.

PART II

Item 5. ***Market for Company's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***

All of our equity securities are held by Holdings, whose indirect parent is DSB Parent. As of December 31, 2018, our Sponsor beneficially owned approximately 99.5% of the capital units of LifePoint with the remaining approximate 0.5% owned by current or former directors, members of management, employees and consultants of the Company. Because our equity securities are privately held, there is no established public trading market for our equity securities.

Equity Compensation Plan Information

Refer to Note 13 to our accompanying consolidated financial statements included elsewhere in this Report for a discussion of profits units issued by DSB Parent to our employees and directors.

Recent Sales of Unregistered Securities

There have been no recent sales of unregistered equity securities of the Company within the period covered by this Report.

Item 6. ***Selected Financial Data.***

Set forth below is the selected historical consolidated financial data of the Company for the periods and as of the dates indicated.

On December 3, 2015, the Apollo/RegionalCare Acquisition was completed. For periods prior to the Apollo/RegionalCare Acquisition, our operations are referred to as the "***Predecessor***". For periods after the Apollo/RegionalCare Acquisition, our operations are referred to as the "***Successor***". Additionally, on April 29, 2016, the RegionalCare/Capella Merger was completed, which, for accounting purposes, became effective on May 1, 2016. Furthermore, on November 16, 2018, the LifePoint/RCCH Merger was completed, which, for accounting purposes became effective on November 17, 2018.

The Apollo/RegionalCare Acquisition, RegionalCare/Capella Merger and LifePoint/RCCH Merger were all significant transactions which affect the comparability of the selected financial data. The following information should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," as well as our accompanying consolidated financial statements included elsewhere in this Report.

	Successor				Predecessor	
$ in millions	Year Ended December 31, 2018	Year Ended December 31, 2017	Year Ended December 31, 2016	Period From 12/4/2015 through 12/31/2015	Period From 1/1/2015 through 12/3/2015	Year Ended December 31, 2014

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

We recommend that you read this discussion together with our accompanying consolidated financial statements and related notes included elsewhere in this Report.

The following discussion and analysis of our financial condition and results of operations covers periods prior to the consummation of the LifePoint/RCCH Merger, which was effective November 16, 2018, and for accounting purposes, became effective November 17, 2018, and the RegionalCare/Capella Merger, which was effective April 29, 2016, and for accounting purposes, became effective May 1, 2016. In this management's discussion and analysis, (i) the results of operations from January 1, 2018 to November 16, 2018 are those of RCCH only, (ii) the results of operations from November 17, 2018 to December 31, 2018 are those of Legacy LifePoint and RCCH on a combined basis, (iii) the results of operations for the year ended December 31, 2017 are those of RCCH only, (iv) the results of operations from January 1, 2016 to April 30, 2016 are those of RegionalCare only and (v) the results of operations for the period from May 1, 2016 to December 31, 2016 are those of RegionalCare and Capella on a combined basis. Additionally, in this management's discussion and analysis under "Supplemental Results of Operations for Legacy LifePoint and RCCH on a Combined Basis for the Years Ended December 31, 2018 and 2017," we are providing results of operations on a combined basis for the years ended December 31, 2018 and 2017 as if the LifePoint/RCCH Merger had occurred on January 1 for each of the years then ended. GAAP does not allow for such a combination of results of operations; however, we believe the combined results provide information that is useful in evaluating our financial performance.

Overview

We own and operate community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities. As of December 31, 2018, we operated 89 hospital campuses in 30 states throughout the U.S., having a total of 11,876 licensed beds. We generate revenues by providing a broad range of general and specialized healthcare services to patients through a network of hospitals and outpatient facilities. We generated $2,778.1 million, $1,872.8 million and $1,502.7 million in revenues during the years ended December 31, 2018, 2017 and 2016, respectively. In 2018, we derived approximately 50.7% of our revenues from the Medicare and Medicaid programs, collectively. Payments made to our facilities pursuant to the Medicare and Medicaid programs for services rendered rarely exceed our costs for such services. As a result, we rely largely on payments made by private or commercial payers, together with certain limited services provided to Medicare recipients, to generate an operating profit. The healthcare industry continues to endure a period where the costs of providing care are rising faster than reimbursement rates from government or private commercial payers. This places a premium on efficient operation, the ability to reduce or control costs and the need to leverage the benefits of our organization across all of our facilities.

Recent Developments

LifePoint/RCCH Merger

On July 22, 2018, RCCH, Legend Merger Sub and Legacy LifePoint entered into an agreement and plan of merger, pursuant to which, effective November 16, 2018, Legend Merger Sub merged with and into Legacy LifePoint, with Legacy LifePoint surviving the merger as a wholly-owned subsidiary of RCCH. Our consolidated results of operations for the year ended December 31, 2018 include the results of Legacy LifePoint beginning on November 17, 2018. For more information about the LifePoint/RCCH Merger, refer to "Part 1, Item 1. Business—Our Background" and Note 2 to our accompanying consolidated financial statements included elsewhere in this Report.

Acquisitions & Divestitures

The following table summarizes our hospital acquisitions and divestitures completed during the years ended December 31, 2018, 2017 and 2016:

Facility	Location	Effective Date
Acquisitions:		
Lourdes Health ("***Lourdes***") (two hospital campuses)	Pasco, Washington	September 1, 2018
Trios Health ("***Trios***") (two hospital campuses) (JV)	Kennewick, Washington	August 4, 2018
St. Joseph Regional Medical Center ("***St. Joseph***")	Lewiston, Idaho	May 1, 2017
Saline Memorial Hospital ("***Saline***") (JV)	Benton, Arkansas	July 1, 2016
Divestitures:		
Sharon Hospital ("***Sharon***")	Sharon, Connecticut	August 1, 2017
EaStar Health System ("***EaStar***")	Muskogee, Oklahoma	April 1, 2017

Additionally, effective April 1, 2018, we acquired Pacific Medical Data Solutions ("***PMDS***"). PMDS is a healthcare technology and software services company that provides revenue cycle, billing automation and software solutions to multi-specialty physician groups, ambulatory surgery centers and urgent care clinics.

Lastly, in August 2018, Legacy LifePoint and certain of its subsidiaries entered into a proposed settlement agreement with The Hospital Service District No. 2 of the Parish of St. Mary ("***HSD***"), a political subdivision of the state of Louisiana, outlining the terms of a definitive settlement agreement to terminate our lease of Teche Regional Medical Center ("***Teche***") located in Morgan City, Louisiana. The proposed settlement agreement provides, among other things, that we will convey to HSD, or its designee, all assets of Teche in accordance with the existing lease agreement, and we will no longer operate Teche upon completion of the transaction. We anticipate this transaction to be completed during the second quarter of 2019, subject to the terms and conditions of a definitive settlement agreement.

For additional information regarding our recent acquisitions and divestitures, refer to Note 3 to our accompanying consolidated financial statements included elsewhere in this Report.

Health Care Reform Efforts

The Affordable Care Act, which became federal law in 2010, dramatically altered the U.S. healthcare system and was intended to decrease the number of uninsured Americans and reduce the overall cost of healthcare by, among other things, creating the individual mandate to require most Americans to obtain health insurance, providing additional funding for Medicaid in states that choose to expand their programs, reducing IPPS, OPPS and Medicare and Medicaid DSH payments to providers, expanding the Medicare program's use of value-based purchasing programs, tying hospital payments to the satisfaction of certain quality criteria and instituting certain private health insurance reforms. The Affordable Care Act has, however, been subject to a number of legislative and regulatory changes and court challenges and its future is uncertain.

The net effect of the Affordable Care Act, as currently adopted, on our business is subject to numerous variables, including the law's complexity, lack of complete implementing regulations and interpretive guidance, and the sporadic implementation of the numerous programs designed to improve access and quality. Additional variables related to the Affordable Care Act impacting our business will be how, if at all, Congress repeals, replaces, or otherwise modifies the Affordable Care Act, whether the Affordable Care Act is found to be unconstitutional after the repeal of the penalties associated with the individual mandate, and how states, providers, insurance companies, employers and other market participants respond during this period of uncertainty. As a result, we are unable to predict the effect on our business, financial condition or results of operations, the availability of adequate insurance coverage for patients seeking healthcare at our facilities, the reductions in government healthcare reimbursement spending, and numerous other provisions potentially impacted by the repeal of the penalties associated with the individual mandate, the cessation of the cost sharing reduction payments, and the possible repeal, replacement or modification of the Affordable Care Act.

Refer to "Part I, Item 1. Business—Health Care Reform" included elsewhere in this Report for more information about the Affordable Care Act.

Competitive and Structural Environment

The environment in which our facilities operate is extremely competitive. Our hospitals face competition from other acute care hospitals, including larger tertiary hospitals located in larger markets and/or affiliated with universities; specialty hospitals that focus on one or a small number of very lucrative service lines but that are not required to operate emergency departments; freestanding emergency departments and outpatient surgery, diagnostic, cancer care and urgent care centers; and physicians on the medical staffs of our hospitals. In many cases, our competitors focus on the service lines that offer the highest margins. By doing so, our competitors can potentially draw the best-paying business out of our hospitals. This, in turn, can reduce the overall operating profit of our hospitals as we are often obligated to offer service lines that operate at a loss or that have much lower profit margins. We continue to see the shift of increasingly complex procedures from the inpatient to the outpatient setting and have also seen growth in the general shift of lower acuity procedures to physician offices and other non-hospital outpatient settings. These trends have contributed to decreases in admissions and surgical volumes and have, to some extent, offset our efforts to improve equivalent admission rates at many of our hospitals.

Our hospitals also face extreme competition in their efforts to recruit and retain physicians on their medical staffs. It is widely recognized that the U.S. has a shortage of physicians in certain practice areas, including primary care physicians and specialists such as cardiologists, oncologists, urologists and orthopedists, in various areas of the country. This fact, and our ability to overcome these shortages, is directly relevant to our growth strategies because cardiologists, oncologists, urologists and orthopedists are often the physicians in highest demand in communities where our hospitals are located. Larger tertiary medical centers are acquiring physician practices and employing physicians in some of our communities. While physicians in these practices may continue to be members of the medical staffs of our hospitals, they may be less likely to refer patients to our hospitals over time.

We believe other key factors in our competition for patients is the quality of our patient care and the perception of that quality in the communities where our facilities are located, which may be influenced by, among other things, the technology, service lines and capital improvements made at our facilities and by the skills and experience of our non-physician employees involved in patient care.

In addition to competitive concerns, many of our communities are experiencing slow growth, and in some cases, population losses. We believe this trend has occurred mainly as a result of recent challenging economic conditions because the economies in the non-urban communities in which our facilities primarily operate are often dependent on a small number of larger employers, especially manufacturing or other facilities. This causes the economies of our communities to be more sensitive to economic downturns and slower to rebound when the overall U.S. economy improves. In addition, other economic factors, including, potentially, self-rationing of healthcare services, have made it more difficult to increase the number of patients who seek care at many of our facilities.

Regulatory Environment

Our business and our facilities are highly regulated, and the penalties for noncompliance can be severe. We are required to comply with extensive, complicated and overlapping government laws and regulations at the federal, state and local levels. These laws and regulations govern every aspect of how our hospitals conduct their operations, from what service lines must be offered in order to be licensed as an acute care hospital, to whether our hospitals may employ physicians, and to how (and whether) our hospitals may receive payments pursuant to the Medicare and Medicaid programs. The failure to comply with these laws and regulations can result in severe penalties including criminal penalties, civil sanctions, and the loss of our ability to receive reimbursements through the Medicare and Medicaid programs or the refund of such payments we previously received.

Not only are our facilities heavily regulated, but the rules, regulations and laws to which they are subject often change, with little or no notice, and are often interpreted and applied differently by various regulatory agencies with authority to enforce such requirements. Each change or conflicting interpretation may require our facilities to make changes in space usage, equipment, personnel or services, and may also require that standard operating policies and procedures be re-written and re-implemented. The cost of complying with such laws and regulations is a significant component of our overall expenses. Further, this expense has grown in recent periods because of new regulatory requirements and the severity of the penalties associated with non-compliance. Management anticipates that compliance expenses will continue to grow in the foreseeable future. The healthcare industry has seen a number of ongoing investigations related to patient referrals, physician recruiting and employment practices, cost reporting and billing practices, medical necessity of inpatient admissions, physician office leasing, laboratory and home healthcare services, physician ownership of hospitals and other healthcare providers, and joint ventures involving hospitals and physicians. Hospitals continue to be one of the primary focal areas of the OIG, the DOJ and other governmental fraud and abuse programs.

The Affordable Care Act imposed an affirmative obligation on healthcare providers to report and refund any overpayments received. “Overpayments” in this context include any amount received from a government program by a provider to which it is not entitled, regardless of the cause. Such overpayments are deemed to be fraudulent and become violations of the False Claims Act if not reported and refunded within the later of 60 days of identification or the date any corresponding cost report is due (if applicable). Hospitals can meet the obligation to report and refund in three ways: (1) refunding overpayments directly to the program; (2) self-disclosing the overpayment to the OIG via its voluntary self-disclosure protocol (with respect to False Claims Act and other violations not related to the Stark law); and (3) self-disclosing to CMS via the self-referral disclosure protocol (with respect to overpayments caused by potential violations of the Stark law only) for which CMS has the authority to reduce the amounts otherwise owed.

Revenue Sources

Our facilities generate revenues by providing healthcare services to our patients. Depending upon the patient’s medical insurance coverage, we are paid for these services by governmental Medicare and Medicaid programs, commercial insurance, including managed care organizations, and directly by the patient. The amounts we are paid for providing healthcare services to our patients vary depending upon the payer. Governmental payers generally pay significantly less than the hospital’s customary charges for the services provided. Insured patients are generally not responsible for any difference between customary hospital charges and the amounts received from commercial insurance payers. However, insured patients are responsible for payments not covered by insurance, such as exclusions, deductibles and co-payments.

Medicare and Medicaid Reimbursement

Revenues from governmental payers, such as Medicare and Medicaid, are controlled by complex rules and regulations that stipulate the amount a hospital is paid for providing healthcare services. We must comply with these rules and regulations to continue to be eligible to participate in the Medicare and Medicaid programs. These rules and regulations are subject to frequent changes as a result of legislative and administrative action and annual payment adjustments on both the federal and the state levels.

In addition, Medicare payment methodologies have been, and are expected to continue to be, revised significantly based on cost containment and policy considerations.

For more information about Medicare and Medicaid reimbursement matters, refer to "Part I, Item 1. Business—Sources of Revenue" included elsewhere in this Report.

Physician Services

We employ an increasing number of physicians in our hospital markets. Medicare pays us for services provided by our employed physicians under the PFS system. Under the PFS, CMS has assigned a national RVU to most medical services and procedures that reflects the various resources required by a physician to provide the services relative to all other services. Historically, the conversion factor that is used to determine physician payments for each RVU had been updated by the SGR that is intended to account for inflation and targeted growth in Medicare expenditures. The SGR has generally resulted in significant reductions to payments made under the PFS, and Congress has passed multiple legislative acts delaying application of the SGR to the PFS. For more information, refer to "Part I, Item 1. Business—Sources of Revenue—Physician Services" included elsewhere in this Report.

HMOs, PPOs and Other Private Insurers

In addition to government programs, our facilities are reimbursed by differing types of private payers, including HMOs, PPOs and other private insurers. Revenues from HMOs, PPOs and other private insurers are subject to contracts and other arrangements that require us to discount the amounts we customarily charge for healthcare services or accept fixed, pre-determined fees for our services. These discounted arrangements often limit our ability to increase charges or revenues in response to increasing costs. We actively negotiate with these payers in an effort to maintain or increase the pricing of our healthcare services; however, we have no control over patients switching their healthcare coverage to a payer with which we have negotiated less favorable reimbursement rates. In recent years, an increasing number of our patients have moved to lower cost healthcare coverage plans, and such plans generally provide lower reimbursement rates and require patients to pay an increased portion of the costs of care through deductibles, co-payments or exclusions. Additionally, plans purchased through the Exchanges are increasingly using narrow and tiered networks that limit beneficiary provider choices. If we provide services when we are not a participating provider in the network, it can result in higher patient responsibility amounts that a patient may not have the ability to pay or may choose not to pay. We expect these trends to continue in the coming years.

Self-pay Patients

Self-pay revenues are primarily generated through the treatment of uninsured patients. Beginning in 2014, our self-pay revenues began to decrease as a percentage of overall revenues due largely to a shift from self-pay to Medicaid and HMOs, PPOs and other private insurers for a portion of our patient population, which primarily has been a result of the Affordable Care Act and the expansion of Medicaid coverage in certain of the states in which we operate. These reductions partially offset trends our facilities have experienced in recent years, including increases in self-pay revenues due to a combination of broad economic factors, including high levels of unemployment in many of our markets and increasing numbers of individuals and employers who purchase insurance plans with high deductibles and high co-payments. Additionally, we cannot predict the impact of the cessation of cost sharing reduction payments, the repeal of the individual mandate or any other modifications to the Affordable Care Act that may be adopted.

To provide for accounts receivable that could become uncollectible in the future, we establish an allowance for doubtful accounts to reduce the carrying value of such receivables to their estimated net realizable value. Our provision for doubtful accounts serves to reduce our reported revenues.

Results of Operations

Certain Definitions

The following definitions apply throughout the remaining portion of Management's Discussion and Analysis of Financial Condition and Results of Operations:

Adjusted EBITDA. EBITDA adjusted to exclude unusual items and other adjustments required or permitted in calculating debt covenant compliance under the Indentures governing the Notes and/or the Term Loan Facility and ABL Facility. We believe that this inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA are appropriate to provide additional information to investors about the impact of certain non-cash items, unusual items that we do not expect to continue at the same level in future and other items.

Admissions. The total number of patients admitted to our hospitals. Used by management and investors as a general measure of inpatient volume.

Combined. Combined information for the years ended December 31, 2018 and 2017 includes the results of Legacy LifePoint and RCCH as if the LifePoint/RCCH Merger had occurred on January 1 for each of the years then ended.

Consolidated. Consolidated information includes the results of all hospital operations and corporate overhead costs, including the results of our recent acquisitions and divestitures, and the results of Legacy LifePoint beginning on November 17, 2018.

EBITDA. Earnings before interest, taxes, depreciation and amortization.

Equivalent admissions. Management and investors use equivalent admissions as a general measure of combined inpatient and outpatient volume. We compute equivalent admissions by multiplying admissions (inpatient volume) by the Outpatient factor. The equivalent admissions computation "equates" outpatient revenue to the volume measure (admissions) used to measure inpatient volume resulting in a general measure of combined inpatient and outpatient volume.

Outpatient factor. The sum of gross inpatient revenue and gross outpatient revenue divided by gross inpatient revenue.

Same-hospital combined. Same-hospital combined information includes the results of the same 84 hospital campuses operated during the entire years ended December 31, 2018 and 2017 on a combined basis as if the LifePoint/RCCH Merger had occurred on January 1 for each of the years then ended. Same-hospital combined information excludes the results of our recent acquisitions and divestitures completed in 2018 and 2017.

Summary

The following table summarizes our results of operations for the years ended December 31, 2018, 2017 and 2016 (in millions):

	Years Ended December 31,					
	2018		2017		2016	
	Amount	% of Revenues	Amount	% of Revenues	Amount	% of Revenues
Revenues before provision for doubtful accounts	$ 3,136.0	112.9 %	$ 2,079.7	111.0 %	$ 1,667.9	111.0 %
Provision for doubtful accounts	357.9	12.9	206.9	11.0	165.2	11.0
Revenues	2,778.1	100.0	1,872.8	100.0	1,502.7	100.0

Loss before income taxes	(287.8)	(10.4)	(39.4)	(2.1)	(37.3)	(2.5)
Provision for (benefit from) income taxes	0.2	-	(1.3)	(0.1)	4.0	0.2
Net loss	(288.0)	(10.4)	(38.1)	(2.0)	(41.3)	(2.7)
Less: Net income attributable to noncontrolling and redeemable noncontrolling interests	(5.7)	(0.2)	(7.3)	(0.4)	(2.7)	(0.2)
Net loss attributable to LifePoint Health, Inc.	$ (293.7)	(10.6)%	$ (45.4)	(2.4)%	$ (44.0)	(2.9)%

For the Years Ended December 31, 2018 and 2017

Revenues

The following table summarizes our key revenue metrics on a consolidated basis for the years ended December 31, 2018 and 2017:

	Years Ended December 31,			
	2018	2017	Increase	% Increase
Consolidated:				
Number of hospital campuses at end of period	89	17	72	423.5 %
Revenues (in millions)	$ 2,778.1	$ 1,872.8	$ 905.3	48.3 %
Admissions	118,366	84,196	34,170	40.6 %
Equivalent admissions	287,619	199,563	88,056	44.1 %
Revenues per equivalent admission	$ 9,659	$ 9,385	$ 274	2.9 %
Inpatient surgeries	33,360	24,102	9,258	38.4 %
Outpatient surgeries	109,759	77,701	32,058	41.3 %
Total surgeries	143,119	101,803	41,316	40.6 %
Emergency department visits	616,150	445,257	170,893	38.4 %

For the year ended December 31, 2018, our consolidated revenues increased $905.3 million, or 48.3%, to $2,778.1 million compared to $1,872.8 million for the prior year. The increase in our revenues was primarily a result of the LifePoint/RCCH Merger and our 2018 and 2017 acquisitions, net of the impact of our 2017 divestitures. Refer to *"Supplemental Results of Operations for Legacy LifePoint and RCCH on a Combined Basis for the Years Ended December 31, 2018 and 2017"* included elsewhere in this Report for a more comparable analysis of our revenues on a combined basis as if the LifePoint/RCCH Merger had occurred on January 1 for each of the years ended December 31, 2018 and 2017.

During the year ended December 31, 2018, we recorded a decrease to revenues of $17.0 million as a result of a change in our accounting estimate of the collectability of accounts receivable. During the year ended December 31, 2018, we identified additional information which indicated that our current collection estimates might be different from our historical collection estimates. We utilized this new information to further refine our estimation procedures to more precisely estimate the collectability of accounts receivable. The change in our estimation procedures of the collectability of our accounts receivable is considered a change in accounting estimate in accordance with ASC 250, "Accounting Changes and Error Corrections" ("***ASC 250***").

The following table summarizes our revenues by payer as approximate percentages of our net patient revenues before the provision for doubtful accounts for the years ended December 31, 2018 and 2017:

	Years Ended December 31,	
	2018	**2017**
Medicare	37.6 %	40.4 %
Medicaid	13.1	12.2
HMOs, PPOs and other private insurers	41.3	40.7
Self-pay	8.0	6.7
	100.0 %	100.0 %

Certain changes have been made to the classification of our historical sources of revenues. Primarily, we changed the classification of revenues related to our managed Medicare and managed Medicaid programs from HMOs, PPOs and other private insurers to Medicare and Medicaid, respectively, for each of the periods presented above. This change had no impact on our historical results of operations.

Salaries and Benefits

For the year ended December 31, 2018, our consolidated salaries and benefits expense was $1,329.4 million, or 47.9% of revenues, compared to $874.3 million, or 46.7% of revenues, for the prior year. The increase in our salaries and benefits expense was primarily a result of the LifePoint/RCCH Merger and our 2018 and 2017 acquisitions, net of the impact of our 2017 divestitures.

Supplies

For the year ended December 31, 2018, our consolidated supplies expense was $484.5 million, or 17.4% of revenues, compared to $323.2 million, or 17.3% of revenues, for the prior year. The increase in our supplies expense was primarily a result of the LifePoint/RCCH Merger and our 2018 and 2017 acquisitions, net of the impact of our 2017 divestitures.

Other Operating Expenses, Net

Other operating expenses include, among other things, contract services, professional fees, rents and leases, repairs and maintenance, utilities, insurance, non-income taxes, other income and other expenses. For the year ended December 31, 2018, our consolidated other operating expenses were $709.2 million, or 25.6% of revenues, compared to $469.4 million, or 25.0% of revenues, for the prior year. The increase in our other operating expenses was primarily a result of the LifePoint/RCCH Merger and our 2018 and 2017 acquisitions, net of the impact of our 2017 divestitures.

Depreciation and Amortization

For the year ended December 31, 2018, our consolidated depreciation and amortization expense was $129.0 million, or 4.6% of revenues, compared to $80.6 million, or 4.3% of revenues, for the prior year. The increase in our depreciation and amortization expense was primarily a result of the LifePoint/RCCH Merger and our 2018 and 2017 acquisitions, net of the impact of our 2017 divestitures.

Interest Expense, Net

For the year ended December 31, 2018, our consolidated interest expense was $186.1 million, or 6.7% of revenues, compared to $126.1 million, or 6.7% of revenues, for the prior year. The increase in our interest expense was primarily a result of the debt financing activities in connection with the LifePoint/RCCH Merger. For a further discussion of our debt and corresponding interest rates, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Merger and Acquisition Costs

For the year ended December 31, 2018, we recognized merger and acquisition costs of $141.5 million, primarily related to legal and transaction advisory services as well as employee severance and retention costs in connection with the LifePoint/RCCH Merger, in addition to our 2018 acquisitions. For the year ended December 31, 2017, we recognized acquisition costs of $7.8 million, primarily related to our acquisition of St. Joseph.

Impairment of Goodwill and Long-lived Assets

For the year ended December 31, 2018, we recognized impairment charges in the aggregate of $78.4 million, comprised of $53.9 million of goodwill impairments related to three of our facilities, and $24.5 million of long-lived asset impairments primarily related to the write-down of certain assets to their estimated fair values at one of our facilities. For the year ended December 31, 2017, we recognized a goodwill impairment charge of $14.1 million related to one of our facilities.

Other Non-Operating Losses, Net

For the year ended December 31, 2018, our net other non-operating losses were primarily related to the write-off of $8.2 million of previously capitalized debt issuance costs in connection with the termination of our Prior ABL Facility and Prior Term Facility, partially offset by other miscellaneous gains and losses. For the year ended December 31, 2017, our other non-operating losses were comprised of a $7.3 million loss on our divestitures of EaStar and Sharon, a $4.3 million loss on the refinancing of long-term debt, a $3.9 million loss on the conversion of a financing lease to an operating lease at the completion of a construction project to satisfy sale-leaseback accounting, and $1.2 million of contingent consideration expense.

Income Taxes

For the year ended December 31, 2018, we recorded a provision for income taxes of $0.2 million, primarily related to the non-deductibility of certain merger and acquisition costs and a $38.1 million increase in the valuation allowance against our deferred tax assets. For the year ended December 31, 2017, we recognized a benefit from income taxes of $1.3 million, primarily related to the reduction in the net deferred tax liability position as a result of the Tax Act that was signed into law on December 22, 2017. For a further discussion of our income taxes, refer to Note 6 to our accompanying consolidated financial statements included elsewhere in this Report.

For the Years Ended December 31, 2017 and 2016

Revenues

The following table summarizes our key revenue metrics on a consolidated basis for the years ended December 31, 2017 and 2016:

	Years Ended December 31,		Increase	% Increase
	2017	2016	(Decrease)	(Decrease)
Consolidated:				
Number of hospital campuses at end of period	17	18	(1)	(5.6)%
Revenues (in millions)	$ 1,872.8	$ 1,502.7	$ 370.1	24.6 %
Admissions	84,196	72,775	11,421	15.7 %
Equivalent admissions	199,563	168,907	30,656	18.1 %
Revenues per equivalent admission	$ 9,385	$ 8,897	$ 488	5.5 %
Inpatient surgeries	24,102	20,246	3,856	19.0 %
Outpatient surgeries	77,701	64,352	13,349	20.7 %
Total surgeries	101,803	84,598	17,205	20.3 %
Emergency department visits	445,257	366,674	78,583	21.4 %

For the year ended December 31, 2017, our consolidated revenues increased $370.1 million, or 24.6%, to $1,872.8 million compared to $1,502.7 million for the prior year. The increase in our revenues was primarily a result of the RegionalCare/Capella Merger and our 2017 and 2016 acquisitions, net of the impact of our 2017 divestitures.

The following table summarizes our revenues by payer as approximate percentages of our net patient revenues before the provision for doubtful accounts for the years ended December 31, 2017 and 2016:

	Years Ended December 31,	
	2017	2016
Medicare	40.4 %	36.4 %
Medicaid	12.2	12.8
HMOs, PPOs and other private insurers	40.7	42.5
Self-pay	6.7	8.3
	100.0 %	100.0 %

Certain changes have been made to the classification of our historical sources of revenues. Primarily, we changed the classification of revenues related to our managed Medicare and managed Medicaid programs from HMOs, PPOs and other private insurers to Medicare and Medicaid, respectively, for each of the periods presented above. This change had no impact on our historical results of operations.

Salaries and Benefits

For the year ended December 31, 2017, our consolidated salaries and benefits expense was $874.3 million, or 46.7% of revenues, compared to $694.4 million, or 46.2% of revenues, for the prior year. The increase in our salaries and benefits expense was primarily a result of the RegionalCare/Capella Merger and our 2017 and 2016 acquisitions, net of the impact of our 2017 divestitures.

Supplies

For the year ended December 31, 2017, our consolidated supplies expense was $323.2 million, or 17.3% of revenues, compared to $261.3 million, or 17.4% of revenues, for the prior year. The increase in our supplies expense was primarily a result of the RegionalCare/Capella Merger and our 2017 and 2016 acquisitions, net of the impact of our 2017 divestitures.

Other Operating Expenses, Net

Other operating expenses include, among other things, contract services, professional fees, rents and leases, repairs and maintenance, utilities, insurance, non-income taxes, other income and other expenses. For the year ended December 31, 2017, our consolidated other operating expenses were $469.4 million, or 25.0% of revenues, compared to $377.1 million, or 25.1% of revenues, for the prior year. The increase in our other operating expenses expense was primarily a result of the RegionalCare/Capella Merger and our 2017 and 2016 acquisitions, net of the impact of our 2017 divestitures.

Depreciation and Amortization

For the year ended December 31, 2017, our consolidated depreciation and amortization expense was $80.6 million, or 4.3% of revenues, compared to $57.6 million, or 3.8% of revenues, for the prior year. The increase in our depreciation and amortization expense was primarily a result of the RegionalCare/Capella Merger and our 2017 and 2016 acquisitions, net of the impact of our 2017 divestitures.

Interest Expense, Net

For the year ended December 31, 2017, our consolidated interest expense was $126.1 million, or 6.7% of revenues, compared to $101.3 million, or 6.7% of revenues, for the prior year. The increase in our interest expense was primarily a result of the debt financing activities in connection with the RegionalCare/Capella Merger. For a further discussion of our debt and corresponding interest rates, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Merger and Acquisition Costs

For the year ended December 31, 2017, we recognized acquisition costs of $7.8 million, primarily related to our acquisition of St. Joseph. For the year ended December 31, 2016, we recognized merger and acquisition costs of $25.1 million, primarily related to legal and transaction advisory services in connection with the RegionalCare/Capella Merger and our acquisition of Saline.

Impairment of Goodwill and Long-lived Assets

For the year ended December 31, 2017, we recognized a goodwill impairment charge of $14.1 million related to one of our facilities. For the year ended December 31, 2016, we recognized long-lived asset impairments of $11.6 million primarily related to the write-down of certain assets to their estimated fair values at Sharon.

Other Non-Operating Losses, Net

For the year ended December 31, 2017, our other non-operating losses were comprised of a $7.3 million loss on our divestitures of EaStar and Sharon, a $4.3 million loss on the refinancing of long-term debt, a $3.9 million loss on the conversion of a financing lease to an operating lease at the completion of a construction project to satisfy sale-leaseback accounting, and $1.2 million of contingent consideration expense. For the year ended December 31, 2016, our net other non-operating losses were comprised of an $11.7 million loss on the refinancing of long-term debt, partially offset by $0.1 million of contingent consideration income.

Income Taxes

For the year ended December 31, 2017, we recognized a benefit from income taxes of $1.3 million, primarily related to the reduction in the net deferred tax liability position as a result of the Tax Act that was signed into law on December 22, 2017. For the year ended December 31, 2016, we recognized a provision for income taxes of $4.0 million. For a further discussion of our income taxes, refer to Note 6 to our accompanying consolidated financial statements included elsewhere in this Report.

Supplemental Results of Operations for Legacy LifePoint and RCCH on a Combined Basis for the Years Ended December 31, 2018 and 2017

As discussed above, the results of operations in this section for the years ended December 31, 2018 and 2017 are presented on a combined basis as if the LifePoint/RCCH Merger had occurred on January 1 for each of the years then ended. GAAP does not allow for such a combination of results of operations; however, we believe the combined results provide information that is useful in evaluating our financial performance.

Revenues

The following table summarizes our key revenue metrics on a combined and same-hospital combined basis for the years ended December 31, 2018 and 2017:

	Years Ended December 31,		Increase	% Increase
	2018	2017	(Decrease)	(Decrease)
Combined:				
Number of hospital campuses at end of period	89	88	1	1.1 %
Revenues (in millions)	$ 8,347.9	$ 8,164.2	$ 183.7	2.3 %
Admissions	344,172	351,310	(7,138)	(2.0)%
Equivalent admissions	891,161	906,777	(15,616)	(1.7)%
Revenues per equivalent admission	$ 9,367	$ 9,004	$ 363	4.0 %
Inpatient surgeries	93,713	95,890	(2,177)	(2.3)%
Outpatient surgeries	347,049	352,031	(4,982)	(1.4)%
Total surgeries	440,762	447,921	(7,159)	(1.6)%
Emergency department visits	1,958,555	2,094,886	(136,331)	(6.5)%
Same-hospital combined:				
Number of hospital campuses at end of period	84	84	-	- %
Revenues (in millions)	$ 8,003.3	$ 7,785.7	$ 217.6	2.8 %
Admissions	330,994	331,471	(477)	(0.1)%
Equivalent admissions	855,663	855,961	(298)	(0.0)%
Revenues per equivalent admission	$ 9,353	$ 9,096	$ 257	2.8 %
Inpatient surgeries	89,744	92,019	(2,275)	(2.5)%
Outpatient surgeries	336,928	337,487	(559)	(0.2)%
Total surgeries	426,672	429,506	(2,834)	(0.7)%
Emergency department visits	1,882,308	1,962,657	(80,349)	(4.1)%

For the year ended December 31, 2018, our combined revenues increased $183.7 million, or 2.3%, compared to the prior year. The increase in our combined revenues was primarily attributable to a 2.8% increase in our same-hospital combined revenues, partially offset by the impact of our divestitures completed in 2018 and 2017. The increase in our same-hospital combined revenues for the year ended December 31, 2018 was primarily driven by higher contracted rates from HMOs, PPOs and other private insurers as evidenced by a 2.8% increase in our same-hospital revenues per equivalent admission. Our same-hospital combined equivalent admissions for the year ended December 31, 2018 were consistent with the prior year.

Additionally, during the years ended December 31, 2018 and 2017, we recorded reductions to revenues of $17.0 million and $72.6 million, respectively, as a result of changes in our accounting estimates of the collectability of accounts receivable. The changes in our estimation procedures of the collectability of our accounts receivable is considered a change in accounting estimate in accordance with ASC 250. When adjusted to exclude the impact of the changes in accounting estimates recorded during each of the years ended December 31, 2018 and 2017, our same-hospital combined revenues increased 2.1% for the year ended December 31, 2018 compared to the prior year and our same-hospital combined revenues per equivalent admission increased 2.1% for the year ended December 31, 2018 compared to the prior year.

Non-GAAP Measures

Adjusted EBITDA

The following table presents EBITDA and Adjusted EBITDA on a combined basis for the years ended December 31, 2018 and 2017 (in millions):

		2018		2017
Net (loss) income		$ (424.0)	$	74.8
Interest expense, net		315.9		274.9
Income taxes		0.3		45.6
Depreciation and amortization		413.5		431.2
EBITDA		305.7		826.5
(a)	Stock-based compensation	91.8		26.1
(b)	Change in accounting estimate of collectability of accounts receivable	17.0		72.6
(c)	Merger and acquisition costs	321.0		20.0
(d)	Impairments of goodwill and long-lived assets	204.2		70.0
(e)	Facility lease expense	(28.2)		(38.7)
(f)	Discontinued operations	5.2		10.9
(g)	Non-cash and other items	39.3		(5.7)
(h)	One-time costs and non-recurring items	18.2		(19.6)
(i)	Run rate EBITDA from in-market investments and acquisitions	60.3		22.9
(j)	Pro forma cost savings	67.5		60.0
Adjusted EBITDA		$ 1,102.0	$	1,045.0

(a) Represents the exclusion of stock-based compensation expense.

(b) Represents the exclusion of one-time, non-cash charges recognized by Legacy LifePoint in the fourth quarter of 2017 and RCCH in the fourth quarter of 2018 related to changes in our accounting estimates of the collectability of accounts receivable.

(c) Represents costs associated with the LifePoint/RCCH Merger and other acquisitions that occurred during the years ended December 31, 2018 and 2017, including legal, financing and transaction advisory services, employee severance and retention costs and other integration costs associated with such transactions.

(d) Represents the exclusion of non-cash impairment charges related to goodwill and long-lived assets. For the year ended December 31, 2018, such items consist of (i) losses of approximately $107 million related to the divestiture of certain Legacy LifePoint facilities; (ii) goodwill impairment losses of approximately $54 million related to three of our facilities; and (iii) other long-lived asset impairment losses of approximately $43 million related to certain buildings and equipment. For the year ended December 31, 2017, such items consist of (i) losses of approximately $13 million related to the divestiture of one Legacy LifePoint facility; (ii) other Legacy LifePoint long-lived asset impairment losses of approximately $43 million related to certain buildings and equipment; and (iii) a goodwill impairment loss of approximately $14 million related to one of our facilities.

(e) Represents incremental cash rent expense in connection with certain leases that are recorded as capital and financing leases within our accompanying consolidated financial statements included elsewhere in this Report. Pursuant to the terms of our financial covenants contained in our debt agreements, we are required to consider cash rent expense and capital payments on facility capital leases within the definition of Adjusted EBITDA. Additionally, differences between cash payments and reported rent expense for facility operating leases are reflected within this adjustment, in accordance with our debt agreements.

(f) Represents the elimination of EBITDA associated with facilities that have either been divested or are currently contracted to be divested.

(g) Represents the exclusion of certain non-cash and other items. For the year ended December 31, 2018, such items consist of (i) losses of approximately $26 million related to the write-off of previously capitalized debt issuance costs; and (ii) other miscellaneous non-cash charges. For the year ended December 31, 2017, such items consist of (i) a non-cash gain of approximately $18 million recognized by Legacy LifePoint upon the release of a legal liability reserve; (ii) losses of approximately $11 million recognized by RCCH upon the sale of certain locations and facilities; and (iii) other miscellaneous non-cash charges.

(h) Represents the exclusion of certain one-time costs and non-recurring items. For the year ended December 31, 2018, such items consist of (i) costs of approximately $12 million related to the installation of certain clinical IT systems; and (ii) other miscellaneous one-time charges. For the year ended December 31, 2017, such items consist of (i) a non-cash gain of approximately $29 million recognized by Legacy LifePoint in connection with the transfer of home health agencies and hospices to a non-consolidated joint venture; (ii) costs of approximately $5 million related to the installation of certain clinical IT systems; and (iii) other miscellaneous one-time charges.

(i) Represents the EBITDA of acquired facilities for periods prior to the acquisition date, inclusive of certain run rate cost savings for implemented headcount reductions. Additionally, the net pro forma EBITDA from new or expanded service lines and newly constructed facilities are included within this adjustment.

(j) Represents the estimated unrealized annual cost savings related to certain corporate integration, operational improvements and synergies anticipated from the LifePoint/RCCH Merger. There can be no assurances that these estimated cost savings will be achieved.

Leverage

The following table illustrates our indebtedness and certain leverage ratios prepared in accordance with the calculations set forth in the 9.75% Unsecured Notes Indenture and the ABL Agreement and the Term Loan Agreement as of and for the year ended December 31, 2018 on a combined basis (dollars in millions):

Cash and cash equivalents (a)	$	58.1
ABL Facility	$	20.0
Term Loan Facility		3,550.0
8.25% Secured Notes		800.0
Total Secured Debt (b)	$	4,370.0
Net Secured Debt (b)	$	4,311.9
9.75% Unsecured Notes	$	1,425.0
11.5% Unsecured Notes		350.0
Total Debt (b)	$	6,145.0
Net Debt (b)	$	6,086.9
Adjusted EBITDA	$	1,102.0
Total Secured Debt (b) / Adjusted EBITDA		3.97x
Net Secured Debt (b) / Adjusted EBITDA		3.91x
Total Debt (b) / Adjusted EBITDA		5.58x
Net Debt (b) / Adjusted EBITDA		5.52x

(a) Excludes cash held by unrestricted subsidiaries which is not included as cash for purposes of calculating the ratios set forth in the Indentures governing the Notes, the ABL Agreement and the Term Loan Agreement.

(b) Excludes financing and capital leases, which are not considered indebtedness for purposes of calculating the ratios set forth in the 9.75% Unsecured Notes Indenture, the ABL Agreement and the Term Loan Agreement, as well as unamortized debt issuance costs. Under the 8.25% Secured Notes Indenture and the 11.5% Unsecured Notes Indenture, calculation of leverage ratios only exclude financing and capital leases relating to hospitals and related or ancillary facilities.

Liquidity and Capital Resources

Liquidity

Our primary sources of liquidity are cash generated by operations and borrowings under the ABL Facility. Our primary uses of cash are working capital requirements, debt service requirements and capital expenditures. Based on our current level of operations and available cash, we believe our cash flows from operations, combined with availability under the ABL Facility, will provide sufficient liquidity to fund our current obligations, projected working capital requirements, debt service requirements and capital spending requirements over the next twelve months. We cannot assure you, however, that our business will generate sufficient cash flows from operations or that future borrowings will be available to us under the ABL Facility, which is subject to a borrowing base, in an amount sufficient to enable us to pay principal and interest on the ABL Facility, the Term Loan Facility and the Notes, or to fund other liquidity needs. Our ability to do so depends on prevailing economic conditions, many of which are beyond our control. In addition, upon the occurrence of certain events, such as a change of control, we could be required to repay or refinance our indebtedness. We cannot assure you that we will be able to refinance any of our indebtedness on commercially reasonable terms or at all. Any future acquisitions, joint ventures or other similar transactions will likely require additional capital, and there can be no assurance that any such capital will be available to us on acceptable terms or at all.

The following table presents summarized cash flow information for the years ended December 31, 2018, 2017 and 2016 (in millions):

	2018	2017	2016
Net cash (used in) provided by operating activities	$ (73.0)	$ 105.6	$ 54.8
Net cash used in investing activities	(5,645.7)	(151.1)	(715.6)
Net cash provided by financing activities	5,760.7	32.0	683.2
Net change in cash and cash equivalents	$ 42.0	$ (13.5)	$ 22.4

Operating Activities

For the year ended December 31, 2018, our cash flows from operating activities decreased by $178.6 million compared to the prior year, primarily as a result of merger-related expenses including legal and transaction advisory services as well as employee severance and retention costs in connection with the LifePoint/RCCH Merger. For the year ended December 31, 2017, our net cash provided by operating activities increased by $50.8 million compared to the prior year. Our operating performance, adjusted for non-cash items, accounted for $30.0 million of the increase, while the remainder of the increase was primarily related to a decrease in net working capital as a result of improved collections on accounts receivable and the timing of payments on accounts payable and prepaid expenses.

Investing Activities

For the years ended December 31, 2018, 2017 and 2016, we invested $5,345.9 million, $112.9 million and $673.8 million, respectively, in mergers and acquisitions. For the year ended December 31, 2018, our acquisition spend consisted primarily of the LifePoint/RCCH Merger in addition to our acquisitions of Lourdes, Trios and PMDS. For the year ended December 31, 2017, our acquisition spend consisted primarily of our acquisition of St. Joseph. For the year ended December 31, 2016, our acquisition spend consisted primarily of the RegionalCare/Capella Merger and our acquisition of Saline.

For the years ended December 31, 2018, 2017 and 2016, we invested $319.7 million, $145.1 million and $67.5 million, respectively, in purchases of property and equipment. Refer to “Capital Expenditures” for further information.

Financing Activities

For the year ended December 31, 2018, net cash provided by financing activities related primarily to the net increase in borrowings and equity to effectuate the LifePoint/RCCH Merger. Refer to “Capital Resources” for further information regarding our recent debt transactions. For the year ended December 31, 2017, net cash provided by financing activities related primarily to net MPT financing activity to finance our acquisition of St. Joseph and construction projects at two facilities, partially offset by the repayment of the financing lease related to EaStar upon completion of its sale. For the year ended December 31, 2016, net cash provided by financing activities related primarily to the net increase in borrowings and equity to effectuate the RegionalCare/Capella Merger.

Capital Expenditures

We continue to make significant, targeted investments at our facilities to add new technologies, modernize facilities and expand the services available. These investments should assist in our efforts to attract and retain physicians, to offset outmigration of patients and to make our facilities more desirable to our employees and potential patients.

The following table summarizes our capital expenditures as a percentage of revenues and as a percentage of depreciation expense for the years ended December 31, 2018, 2017 and 2016 (dollars in millions):

	2018		2017		2016	
	Amount	% of Revenues	Amount	% of Revenues	Amount	% of Revenues
Capital expenditures	$ 319.7	11.5 %	$ 145.1	7.7 %	$ 67.5	4.5 %
Depreciation expense	128.5		80.1		56.9	
Ratio of capital expenditures to depreciation expense	248.8 %		181.1 %		118.6 %	

On a combined basis, our capital expenditures were elevated in 2018 and 2017 primarily as a result of certain significant capital projects, including the construction of two replacement hospital campuses and the installation of a new clinical system at certain of our facilities.

We have a formal and intensive review procedure for the authorization of capital expenditures that exceed an established threshold. One of the most important financial measures of acceptability for a discretionary capital project is whether its projected discounted cash flow return on investment exceeds our projected cost of capital for that project. We expect to continue to invest in information systems, modern technologies, emergency room and operating room expansions, the construction of medical office buildings for physician expansion and the reconfiguration of the flow of patient care. Additionally, we may from time to time replace existing hospital buildings with new buildings as we evaluate ongoing repair and maintenance costs and other factors that impact the future operations of the existing buildings. Refer to "Liquidity and Capital Resources Outlook" for further information regarding our long-term capital expenditure commitments.

Capital Resources

ABL Facility

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we entered into the ABL Facility in an aggregate principal amount of up to $800.0 million with a maturity of five years and we terminated our Prior ABL Facility. For further information regarding the ABL Facility, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Term Loan Facility

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we entered into the Term Loan Facility in an aggregate principal amount of $3,550.0 million with a maturity of seven years and we repaid in full our Prior Term Facility. For further information regarding the Term Loan Facility, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

9.75% Unsecured Notes

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we issued the 9.75% Unsecured Notes in an aggregate principal amount of $1,425.0 million with a maturity of eight years. For further information regarding the 9.75% Unsecured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

8.25% Secured Notes

Effective April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, we issued the 8.25% Secured Notes in an aggregate principal amount of $800.0 million with a maturity of seven years. For further information regarding the 8.25% Secured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

11.5% Unsecured Notes

Effective April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, we issued the 11.5% Unsecured Notes in a private offering in an aggregate principal amount of $350.0 million with a maturity of eight years. For further information regarding the 11.5% Unsecured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

A roll-forward of our long-term debt, including current portions, during 2018 is as follows (in millions):

	December 31, 2017	Proceeds from Borrowings	Payments of Borrowings	Payments of Debt Financing Costs	Amortization of Debt Issuance Costs	New Financing and Capital Leases	Other	December 31, 2018
Senior borrowings:								
ABL Facility	$ -	$ 20.0	$ -	$ -	$ -	$ -	$ -	$ 20.0
Prior ABL Facility	10.0	-	(10.0)	-	-	-	-	-
Term Loan Facility	-	3,550.0	-	-	-	-	-	3,550.0
Prior Term Facility	-	150.0	(150.0)	-	-	-	-	-
9.75% Unsecured Notes	-	1,425.0	-	-	-	-	-	1,425.0
8.25% Secured Notes	800.0	-	-	-	-	-	-	800.0
11.5% Unsecured Notes	350.0	-	-	-	-	-	-	350.0
Unamortized debt issuance costs	(32.9)	-	-	(206.5)	7.2	-	4.8	(227.4)
Financing and capital leases	265.0	-	(10.0)	-	-	302.2	-	557.2

	$ 1,434.0	$ 5,145.0	$ (209.3)	$ (206.5)	$ 7.2	$ 302.2	$ 5.2	$ 6,477.8

Liquidity and Capital Resources Outlook

We expect total capital expenditures to continue to be elevated, primarily as a result of ongoing capital commitments in connection with several of our acquired facilities. At December 31, 2018, we estimated our total remaining capital expenditure commitments to be approximately $1,436.3 million, which generally have remaining terms of three to seven years. Of this amount, approximately one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time. We anticipate funding these expenditures through cash provided by operating activities, available cash and borrowings available under the ABL Facility.

Our business strategy contemplates the selective acquisition of additional hospitals and other healthcare service providers, and we regularly review potential acquisitions. These acquisitions may, however, require additional financing. Our primary sources of liquidity are cash flows provided by our operations and our borrowings available under the ABL Facility. We believe that our internally generated cash flows and borrowing availability under the ABL Facility will be adequate to service existing debt, finance internal growth and fund capital expenditures and small to mid-size hospital acquisitions over the next twelve months and into the foreseeable future prior to maturity dates of our outstanding debt. Certain larger hospital acquisitions may, however, require additional financing.

Inflation

The healthcare industry is labor-intensive. Wages and other expenses increase during periods of inflation and when labor shortages in marketplaces occur. In addition, suppliers pass along rising costs to us in the form of higher prices. Private insurers pass along their rising costs in the form of lower reimbursement to us. Our ability to pass on these increased costs in increased rates is limited because of increasing regulatory and competitive pressures and the fact that the majority of our revenues are fee-based. Accordingly, inflationary pressures could have a material adverse effect on our results of operations.

Contractual Obligations, Commitments and Off-Balance Sheet Arrangements

Contractual Obligations and Commitments

Our contractual obligations and commitments as of December 31, 2018 are materially consistent with disclosure set forth in in the offering memorandum dated November 14, 2018 for the 9.75% Unsecured Notes (the "***November 2018 OM***"), except as otherwise disclosed in this Report, including the financial statements and notes thereto.

Off-Balance Sheet Arrangements

We had letters of credit outstanding of approximately $32.0 million as of December 31, 2018, primarily related to the self-insured retention level of our general and professional liability insurance and workers' compensation programs as security for payment of claims.

Recently Issued Accounting Pronouncements

Refer to Note 1 to our consolidated financial statements included elsewhere in this Report for a discussion of accounting standards not yet adopted.

Critical Accounting Estimates

The preparation of financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts and related disclosures. We consider an accounting estimate to be critical if:

- it requires assumptions to be made that were uncertain at the time the estimate was made; and
- changes in the estimate or different estimates that could have been made could have a material impact on our consolidated results of operations or financial condition.

Our critical accounting estimates include the following areas:

- Revenue recognition and accounts receivable;
- Goodwill impairment analysis;
- Accounting for income taxes; and
- Reserves for self-insurance claims.

The following discussion of critical accounting estimates is not intended to be a comprehensive list of all of our accounting policies that require estimates, but the estimates discussed below involve a higher degree of judgment and complexity. We believe the current assumptions and other considerations used to estimate amounts reflected in our consolidated financial statements are appropriate. However, if actual experience differs from the assumptions and other considerations used in estimating amounts reflected in our consolidated financial statements, the resulting changes could have a material adverse effect on our consolidated results of operations and our financial condition. The discussion that follows presents information about our critical accounting estimates, as well as the effects of hypothetical changes in the material assumptions used to develop each estimate.

Revenue Recognition and Accounts Receivable

We recognize revenues in the period in which services are provided. Accounts receivable primarily consist of amounts due from third-party payers and patients. Our ability to collect outstanding receivables is critical to our results of operations and cash flows. Amounts we receive for treatment of patients covered by governmental programs, such as Medicare and Medicaid, and other third-party payers such as HMOs, PPOs and other private insurers, are generally less than our established billing rates. Additionally, to provide for accounts receivable that could become uncollectible in the future, we establish an allowance for doubtful accounts to reduce the carrying value of such receivables to their estimated net realizable value. Accordingly, our revenues and accounts receivable are reduced to net realizable value through an allowance for contractual discounts and a provision for doubtful accounts.

Approximately 92.0%, 93.3% and 91.7% of our patient revenues recognized during the years ended December 31, 2018, 2017 and 2016, respectively, related to discounted charges, which were comprised of the following sources (as a percentage of our net patient revenues before the provision for doubtful accounts):

	2018	2017	2016
Medicare	37.6 %	40.4 %	36.4 %
Medicaid	13.1	12.2	12.8
HMOs, PPOs and other private insurers	41.3	40.7	42.5

Revenues are recorded at estimated net amounts due from patients, third-party payers and others for healthcare services provided. For certain payers, such as Medicare, Medicaid, as well as some managed care payers with which we have contractual arrangements, the contractual allowances are calculated by computerized logging systems based on defined payment terms. For other payers, the contractual allowances are determined based on historical data by insurance plan. All contractual adjustments, regardless of type of payer or method of calculation, are reviewed and compared to actual experience.

We monitor our processes for calculating contractual allowances through:

- review of payment discrepancy reports for logged payers;
- analysis of historical contractual allowance trends based on actual claims paid by HMOs, PPOs and other private insurers;
- review of contractual allowance information reflecting current contract terms;
- consideration and analysis of changes in charge rates and payer mix reimbursement levels; and
- other issues that may impact contractual allowances.

Medicare and Medicaid

The majority of services performed on Medicare and Medicaid patients are reimbursed at predetermined reimbursement rates. The differences between the established billing rates (i.e. gross charges) and the predetermined reimbursement rates are recorded as contractual discounts and deducted from gross charges. Under the Medicaid program's prospective reimbursement systems, there is no adjustment or settlement of the difference between the actual cost to provide the service and the predetermined reimbursement rates.

Discounts for retrospectively cost-based revenues are estimated based on historical and current factors and are adjusted in future periods when settlements of filed cost reports are received. Final settlements under these programs are subject to adjustment based on administrative review and audit by third party intermediaries, which can take several years to resolve completely.

Because the laws and regulations governing the Medicare and Medicaid programs are complex and subject to change, the estimates of contractual discounts we record could change by material amounts. A significant increase in our estimate of contractual discounts for Medicare and Medicaid would lower our earnings. This would adversely affect our results of operations, financial condition, liquidity and future access to capital.

HMOs, PPOs and Other Private Insurers

Amounts we receive for the treatment of patients covered by HMOs, PPOs and other private insurers (collectively "***managed care plans***") are generally less than our established billing rates. We include contractual allowances as a reduction to revenues in our consolidated financial statements based on payer specific identification and payer specific factors for rate increases and denials. For most managed care plans, estimated contractual allowances are adjusted to actual contractual allowances as cash is received and claims are reconciled.

The process of determining the allowance requires us to estimate the amount expected to be received based on payer contract provisions, historical collection data as well as other factors and requires a high degree of judgment. It is impacted by changes in managed care contracts and other related factors. A significant increase in our estimate of contractual discounts for managed care plans would lower our earnings. This would adversely affect our results of operations, financial condition, liquidity and future access to capital.

Provision and Allowance for Doubtful Accounts

To provide for accounts receivable that could become uncollectible in the future, we establish an allowance for doubtful accounts. Our allowance for doubtful accounts, included in our consolidated balance sheets as of December 31, 2018 and 2017 was $403.4 million and $251.9 million, respectively. Our provision for doubtful accounts, included in our consolidated results of operations for the years ended December 31, 2018, 2017 and 2016, was $357.9 million, $206.9 million and $165.2 million, respectively. During the year ended December 31, 2018, we recorded a decrease to revenues of $17.0 million as a result of a change in our accounting estimate of the collectability of accounts receivable. During the year ended December 31, 2018, we identified additional information which indicated that our current collection estimates might be different from our historical collection estimates. We utilized this new information to further refine our estimation procedures to more precisely estimate the collectability of accounts receivable. The change in our estimation procedures of the collectability of our accounts receivable is considered a change in accounting estimate in accordance with ASC 250.

The largest component of our allowance for doubtful accounts relates to accounts for which patients are responsible, which we refer to as patient responsibility accounts or self-pay accounts. These accounts include both amounts payable by uninsured patients and co-payments and deductibles payable by insured patients. In general, we attempt to collect deductibles, co-payments and self-pay accounts prior to the time of service for non-emergency care. If we do not collect these patient responsibility accounts prior to the delivery of care, the accounts are handled through our billing and collections processes.

We verify each patient's insurance coverage as early as possible before a scheduled admission or procedure, including with respect to eligibility, benefits and authorization/pre-certification requirements, in order to notify patients of the amounts for which they will be responsible. We attempt to verify insurance coverage within a reasonable amount of time for all emergency room visits and urgent admissions in compliance with EMTALA.

In general, we perform the following steps in collecting accounts receivable:

- if possible, cash collection of deductibles, co-payments and self-pay accounts prior to or at the time service is provided;
- billing and follow-up with third party payers;
- collection calls;
- utilization of collection agencies; and
- if collection efforts are unsuccessful, write-off of the accounts.

Our policy is to write-off accounts after all collection efforts have failed, which is generally one year after the date of discharge of the patient. Patient responsibility accounts represent the majority of our write-offs. All of our hospitals retain third-party collection agencies for billing and collection of delinquent accounts. At most of our hospitals, more than one collection agency is used to promote competition and improve performance results. The selection of collection agencies and the timing of referral of an account to a collection agency vary among our hospitals.

We determine the adequacy of the allowance for doubtful accounts utilizing a number of analytical tools and benchmarks. No single statistic or measurement alone determines the adequacy of the allowance. Specifically, we monitor the revenue trends by payer classification on a month-by-month basis along with the composition of our accounts receivable agings. This review is focused primarily on trends in self-pay revenues, accounts receivable, co-payment receivables, historic payment patterns and other factors such as revenue days in accounts receivable.

The process of determining our allowance for doubtful accounts requires us to estimate uncollectible self-pay accounts. Our estimate of uncollectible self-pay accounts is primarily based on our collection history, adjusted for anticipated changes in collection trends, if significant. Our estimate may be impacted by changes in regional economic conditions, business office operations, payer mix and trends in federal or state governmental healthcare coverage or other third party payers.

Goodwill Impairment Analysis

Goodwill represents the excess of the purchase price over the fair value of the net assets of acquired businesses. Our goodwill included in our consolidated balance sheet as of December 31, 2018 was $2,567.6 million. Refer to Note 5 to our accompanying consolidated financial statements included elsewhere in this Report for a detailed rollforward of our goodwill.

In accordance with ASC 350, "Intangibles — Goodwill and Other" ("***ASC 350***") goodwill and intangible assets with indefinite lives are reviewed by us at least annually for impairment. The impairment evaluation is performed at the individual hospital level as each hospital represents a reporting unit as defined in ASC 350. For the annual impairment evaluation, we may perform an initial qualitative assessment to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying value. This assessment is used as a basis for determining whether it is necessary to perform the goodwill impairment test. For those reporting units on which we perform the impairment test, we determine fair value using a discounted cash flow ("***DCF***") analysis and consideration of certain market inputs including those of guideline public companies. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates and the amount and timing of expected future cash flows. The significant judgments are typically based upon Level 3 inputs, generally defined as unobservable inputs representing our assumptions. The cash flows employed in the DCF analysis are based on our most recent financial budgets and business plans and, when applicable, various growth rates for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risks inherent in the future cash flows of the respective reporting units.

If we determine the carrying value of goodwill is impaired, or if the carrying value of a business that is to be sold or otherwise disposed of exceeds its fair value, then we reduce the carrying value, including any allocated goodwill, to fair value. Refer to Note 5 to our consolidated financial statements included elsewhere in this Report for further discussion of the results of our annual goodwill impairment evaluation procedures.

Accounting for Income Taxes

Deferred tax assets generally represent items that will result in a tax deduction in future years for which we have already recorded the tax benefit in our income statement. We assess the likelihood that deferred tax assets will be recovered from future taxable income. To the extent we believe that recovery is not probable, a valuation allowance is established. To the extent we establish a valuation allowance or increase this allowance, we must include an expense as part of the income tax provision in our results of operations. Our deferred tax asset balances in our consolidated balance sheets were $456.4 million and $163.9 million as of December 31, 2018 and 2017, respectively. Our valuation allowances for deferred tax assets in our consolidated balance sheets were $274.4 million and $134.1 million as of December 31, 2018 and 2017, respectively.

In addition, significant judgment is required in determining and assessing the impact of certain tax-related contingencies. We establish accruals when, despite our belief that our tax return positions are fully supportable, it is probable that we have incurred a loss related to tax contingencies and the loss or range of loss can be reasonably estimated. We adjust the accruals related to tax contingencies as part of our provision for income taxes in our results of operations based upon changing facts and circumstances, such as progress of a tax audit, development of industry related examination issues, as well as legislative, regulatory or judicial developments. A number of years may elapse before a particular matter, for which we have established an accrual, is audited and resolved.

The first step in determining the deferred tax asset valuation allowance is identifying reporting jurisdictions where we have a history of tax and operating losses or are projected to have losses in future periods as a result of changes in operational performance. We then determine if a valuation allowance should be established against the deferred tax assets for that reporting jurisdiction.

The second step is to determine the amount of the valuation allowance. We will generally establish a valuation allowance equal to the net deferred tax asset (deferred tax assets less deferred tax liabilities) related to the jurisdiction identified in step one of the analysis. In certain cases, we may not reduce the valuation allowance by the amount of the deferred tax liabilities depending on the nature and timing of future taxable income attributable to deferred tax liabilities.

In assessing tax contingencies, we apply the provisions of ASC 740, “Income Taxes”. We apply the recognition threshold and measurement of a tax position taken or expected to be taken in a tax return and follow the guidance on various matters such as derecognition, interest, penalties and disclosure. We classify interest and penalties as a component of income tax expense.

During each reporting period, we assess the facts and circumstances related to recorded tax contingencies. If tax contingencies are no longer deemed probable based upon new facts and circumstances, the contingency is reflected as a reduction of the provision for income taxes in the current period.

Our deferred tax assets exceeded our deferred tax labilities by $270.4 million as of December 31, 2018, excluding the impact of valuation allowances. Historically, we have not produced federal taxable income, and in connection with the LifePoint/RCCH Merger, the Company became highly leveraged. As such, we believe it is likely that the deferred tax assets will not be realized and thus have established a valuation allowance against the deferred tax assets as of December 31, 2018. In addition, we do have subsidiaries with a history of tax losses in certain state jurisdictions and, based upon those historical tax losses, we assumed that the subsidiaries would not be profitable in the future for those states’ tax purposes. If our assertion regarding the future profitability of those subsidiaries was incorrect, then our deferred tax assets would be understated by the amount of the state valuation allowance of $274.4 million at December 31, 2018.

Additionally, on December 22, 2017, the Tax Act was signed into law. The Tax Act significantly revises the U.S. corporate income tax by, among other things, lowering the statutory corporate tax rate from 35% to 21% and eliminating certain deductions. Due to the timing of the enactment and the complexity involved in applying the provisions of the Tax Act, we have made reasonable estimates of the effects of the Tax Act on our existing deferred tax assets and liabilities and recognized a provisional benefit for income taxes of $57.7 million during the year ended December 31, 2017. We completed our analysis during the year ended December 31, 2018 and determined that no additional adjustment was needed to the $57.7 million provisional expense that we recorded for the year ended December 31, 2017.

Reserves for Self-Insurance Claims

Given the nature of our operating environment, we are subject to potential professional liability claims, employee workers' compensation claims and other claims. To mitigate a portion of this risk, we maintain insurance for individual professional liability claims and employee workers' compensation claims exceeding SIR and deductible levels. At December 31, 2018, our SIR for professional liability claims is $5.0 million per claim, with a $5.0 million inner aggregate, at the majority of our facilities, and $2.0 million per claim at certain of our facilities. Additionally, we participate in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2018, our deductibles for workers' compensation claims range from $0.5 million to $1.0 million per claim in all states in which we operate except for Montana, Oklahoma, Ohio, Washington and Wyoming. We participate in state-specific programs for our workers' compensation claims arising in these states. Our SIR and deductible levels are evaluated annually as a part of our insurance program's renewal process.

Each year, we obtain quotes from various insurers with respect to the cost of obtaining insurance coverage. We compare these quotes to our most recent actuarially determined estimates of losses at various self-insured retention and deductible levels. Accordingly, changes in insurance costs affect the self-insured retention and deductible levels we choose each year.

Our reserves for self-insurance and deductible claims reflect the current estimate of all outstanding losses, including incurred but not reported losses, based upon actuarial calculations as of the balance sheet date. The loss estimates included in the actuarial calculations may change in the future based upon updated facts and circumstances. Our expense for self-insurance and deductible claims coverage each year includes: the actuarially determined estimate of losses for the current year, including claims incurred but not reported; the change in the estimate of losses for prior years based upon actual claims development experience as compared to prior actuarial projections; the insurance premiums for losses in excess of our self-insured retention and deductible levels; the administrative costs of the insurance program; and interest expense related to the discounted portion of the liability.

Our reserves for professional liability claims are based upon quarterly and/or semi-annual actuarial calculations. Our reserves for employee workers' compensation claims are based upon semi-annual actuarial calculations. Our reserve calculations consider historical claims data, demographic considerations, severity factors and other actuarial assumptions, which are discounted to present value. We have discounted our reserves for self-insured claims to their present value using a discount rate of 1.8% at December 31, 2018 and in a range of 1.4% to 2.4% at December 31, 2017 and 0.9% to 2.3% at December 31, 2016. We select a discount rate by considering a risk-free interest rate that corresponds to the period when the self-insured claims are incurred and projected to be paid.

The following table provides information regarding our reserves for self-insured claims at December 31, 2018 and 2017 (in millions):

	2018	2017
Undiscounted	$ 279.0	$ 70.7
Discounted (as reported)	$ 264.7	$ 65.0

As of December 31, 2018 and 2017, less than 1% of our reserves for self-insured claims represents reserves for settled and unpaid claims. Our average lag time between the settlement and payment of a self-insured claim ranges from 1 to 2 weeks.

Our estimated reserves for self-insured claims will be significantly affected if current and future claims differ from historical trends. While we monitor reported claims closely and consider potential outcomes when determining our reserves for self-insured claims, the complexity of the claims, the extended period of time to settle the claims and the wide range of potential outcomes complicate the estimation process. In addition, certain states have passed varying forms of tort reform which attempt to limit the amount of awards. If such laws are passed in the states where our hospitals are located, our loss estimates could decrease.

Our estimate of reserves for self-insured and deductible claims are based upon actuarial calculations and are significantly influenced by key assumptions and other factors. These factors include, but are not limited to: historical paid claims; trending of loss development factors; trends in the frequency and severity of claims, which can differ significantly by jurisdiction as a result of the legislative and judicial climate in such jurisdictions; coverage limits of third-party insurance and actuarial determined statistical confidence levels. Given the number of assumptions and characteristics of each assumption considered in establishing the reserves for self-insured claims, it is difficult to compute the individual financial impact of each assumption or groups of assumptions. Some of the assumptions are dependent upon the quantitative measurement of other assumptions, and therefore are not accurately evaluated in isolation. For example, a change in the frequency of claims assumption is also affected by the estimated severity of these claims resulting in an inability to properly isolate and quantify the impact of a change in this assumption.

Professional and general liability claims are typically resolved over an extended period of time, often as long as five years or more, while workers' compensation claims are typically resolved in one to two years. Our reserves for self-insured claims are comprised of estimated indemnity and expense payments related to reported events and incurred but not reported events as of the end of the period. We have the ability to reliably determine the amount and timing of payments based on sufficient history of our claims development, the use of external actuarial expertise and our rigorous review process. Actuarial payment patterns are based on our individual hospital historical data both prior to and after our inception. The processes, performed by both external actuaries and our management, enable us to reliably determine the amount of our ultimate losses as well as the timing of the loss settlements such that discounting of the reserves for self-insured claims is appropriate. Given the number of factors considered in establishing the reserves for self-insured claims, it is neither practical nor meaningful to isolate a particular assumption or parameter of the process and calculate the impact of changing that single item.

Ultimately, from an actuarial standpoint, the sensitivity in the estimates of reserves for self-insured claims is reflected in the various actuarial confidence levels. Our best estimate of our reserves for self-insured claims utilizes a statistical confidence level that is 50%. Higher statistical confidence levels, while not representative of our best estimate, reflect reasonably likely outcomes upon the ultimate resolution of related claims. Using a higher statistical confidence level would increase the estimated reserves for self-insured claims. A 25% increase in our utilized statistical confidence level would increase our estimated reserve by $30.7 million. Changes in our estimates of reserves for self-insured claims are non-cash charges and accordingly, do not impact our liquidity or capital resources.

The combination of changing conditions and the extended time required for claim resolution results in a loss estimation process that requires actuarial skill and the application of judgment, and such estimates require periodic revision. As a result of the variety of factors that must be considered, there is a risk that actual incurred losses may develop differently from estimates. The results of our quarterly and semi-annual actuarial calculations resulted in changes to our reserves for self-insured claims for prior years. As a result, for the years ended December 31, 2018, 2017 and 2016, our related self-insured claims expense decreased by $3.9 million, $12.1 million and $4.5 million, respectively.

Item 7A. ***Quantitative and Qualitative Disclosures about Market Risk.***

Market Risk

Market risk is defined as the risk of loss resulting from changes in market prices as a result of changes in interest rates, credit and liquidity or general economic conditions. Our principal market risks in the ordinary course of business are credit risk, liquidity risk and interest rate risk. We currently do not have direct exposure to either market risk from trading activities or foreign currency exchange rate risk.

Credit Risk

We define credit risk as the risk that amounts payable by uninsured patients and remaining patient responsibility amounts (deductibles and co-payments) for patient accounts where the primary insurance carrier has paid the amounts covered by the applicable agreements will not be paid. The provision for doubtful accounts relates primarily to amounts due directly from patients. While we have experienced a reduction in uninsured patients, the risk of collection from insured patients and the amounts due, may increase as more individuals are enrolled in insurance plans with larger deductibles and/or co-payments, including those purchased on insurance exchanges.

The provision for doubtful accounts is based on our assessments of historical collection trends, business and economic conditions, trends in federal and state governmental and private employer health coverage and other collection indicators. To date, the Affordable Care Act has decreased the number of uninsured individuals by incentivizing states to expand their Medicaid eligibility requirements, incentivizing employers to offer health insurance, and requiring individuals to carry health insurance or be subject to penalties. However, it is difficult to predict the future impact of the Affordable Care Act on the uninsured population and the collectability of patient receivables because of ongoing state determinations on whether to expand Medicaid, the availability of federal premium subsidies, as well as our inability to foresee how individuals, businesses, private payers and states will respond to the choices afforded them by the Affordable Care Act. If the recent decrease in the uninsured population does not continue, the proportion of accounts receivable being comprised of uninsured accounts and deterioration in the collectability of these accounts could adversely affect our collections of accounts receivable, results of operations and revenues.

The counterparty to our Interest Rate Swap exposes us to credit risk in the event of nonperformance. However, we do not anticipate nonperformance by our counterparty. We do not hold or issue derivative financial instruments for trading purposes.

Liquidity Risk

We define liquidity risk as the risk that we will not meet our payment obligations in a timely manner or the risk that market conditions or institution-specific events may reduce our ability to raise funds from market counterparties. An adverse institution-specific event such as a major loss that causes a perceived or actual deterioration in our financial condition or an adverse systemic event could affect our funding liquidity.

Interest Rate Risk

Borrowings under the ABL Facility and the Term Loan Facility are at variable rates of interest and expose us to interest rate risk. To manage this risk, we entered into an Interest Rate Swap. The terms of the Interest Rate Swap require us to pay a fixed rate of 2.63% on a notional amount of $1,100.0 million and, in exchange, we receive one-month LIBOR. The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. We have not designated our Interest Rate Swap as a cash flow hedge in accordance with ASC 815. Therefore, all changes in the fair value of our Interest Rate Swap will be recognized through interest expense in our results of operations. Changes in the fair value of our Interest Rate Swap could result in a material effect on our consolidated results of operations and financial position; however, we do not anticipate that changes in the fair value of our Interest Rate Swap will have any impact on our cash flows.

As of December 31, 2018, we had total outstanding debt of approximately $6,148.0 million, excluding capital and financing leases and unamortized debt issuance costs, of which $2,470.0 million, or 40.2%, was subject to variable rates of interest after giving effect to our Interest Rate Swap. If the interest rate on our variable rate long-term debt outstanding as of December 31, 2018, not subject to our Interest Rate Swap, were to increase by 100 basis points during any annual period, our cash flows would be negatively impacted by approximately $24.7 million.

Item 8. ***Financial Statements and Supplementary Data.***

Information with respect to this Item is contained in our accompanying consolidated financial statements beginning on page F-1 of this Report.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*****.**

None.

Item 9A. ***Controls and Procedures.***

The information that would be required to be disclosed under Part II, Item 9A of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a**)** of each of the Indentures.

Item 9B. ***Other Information.***

None.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance*.**

The following table provides information regarding our executive officers and the members of our Board of Directors (ages as of March 28, 2019):

Name	Age	Position(s)
David M. Dill	50	President and Chief Executive Officer
Michael S. Coggin	49	Executive Vice President and Chief Financial Officer
John P. Bumpus	58	Executive Vice President, Administration
Victor E. Giovanetti	55	Executive Vice President, Hospital Operations
Robert F. Jay	51	Executive Vice President, Integrated Operations
Jennifer C. Peters	47	Executive Vice President, General Counsel and Corporate Secretary
J. Michael Grooms	41	Senior Vice President and Chief Accounting Officer
Matthew H. Nord	39	Director and Chairman
William F. Carpenter III	64	Director and Chairman Emeritus
Norman Brownstein	75	Director
Christopher J. Christie	56	Director
Maxwell David	28	Director
Michael P. Haley	68	Director
Steve Levin	53	Director
Holly McMullan	42	Director
Daniel Morissette	53	Director
Eric L. Press	53	Director
Martin S. Rash	64	Director
Olivia Wassenaar	39	Director
G. Rodney Wolford	72	Director

David M. Dill became our Chief Executive Officer upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Dill served in various roles at Legacy LifePoint as President since January 2011 and as Chief Operating Officer since April 2009. Mr. Dill served as Executive Vice President from February 2008 to January 2011. Mr. Dill joined Legacy LifePoint in July 2007 as Chief Financial Officer and continued to serve in that role until April 2009. From March 2006 until Mr. Dill joined Legacy LifePoint, he served as executive vice president of Fresenius Medical Care North America and as chief executive officer of one of two United States divisions of Fresenius Medical Care Services, a wholly owned subsidiary of Fresenius Medical Care AG & Co. KGaA. Mr. Dill previously served as executive vice president, chief financial officer and treasurer of Renal Care Group, Inc., a publicly-traded dialysis services company, from November 2003 until Renal Care Group was acquired by Fresenius Medical Care in March 2006. From 1996 to November 2003, Mr. Dill served in various finance and accounting roles with Renal Care Group, Inc. Mr. Dill served as a member of the board of directors of Psychiatric Solutions, Inc., a behavioral health services company, from 2005 until 2010.

Michael S. Coggin became our Executive Vice President and Chief Financial Officer upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Coggin served in various roles at Legacy LifePoint as Executive Vice President, Chief Financial Officer and Chief Accounting Officer, since September 2016. From December 2008 until September 2016, Mr. Coggin served as Senior Vice President and Chief Accounting Officer of Legacy LifePoint. From September 2007 until December 2008, Mr. Coggin served as chief financial officer of Specialty Care Services Group, a multi-service line healthcare provider primarily focused on providing perfusion and auto-transfusion services to hospitals. Mr. Coggin was a senior vice president in the finance, accounting and internal audit groups of Renal Care Group, Inc. from April 2004 until its acquisition by Fresenius Medical Care AG & Co. KGaA in March 2006. Following the acquisition, Mr. Coggin provided finance and accounting oversight for business units within the East Division of Fresenius. Prior to that time, Mr. Coggin was an audit manager at KPMG Peat Marwick in Nashville, Tennessee.

John P. Bumpus became our Executive Vice President, Administration upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Bumpus served as Executive Vice President and Chief Administrative Officer of Legacy LifePoint since 2008. In this role, Mr. Bumpus was responsible for overseeing human resources and talent development; employee and labor relations; compensation and benefits; capital and construction management; communications; administration; and aviation. He previously served as Senior Vice President, Human Resources and Administration of Legacy LifePoint. Prior to joining Legacy LifePoint, Mr. Bumpus served as vice president, human resources for Province Healthcare Company. He also held various leadership positions during his tenure with The Kroger Company, including strategic planning and implementation specialist; manager, human resources; and various positions in operations for the Nashville marketing area.

Victor E. Giovanetti became our Executive Vice President, Hospital Operations upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Giovanetti served as President of Legacy LifePoint's Eastern Group since January 2017. From July 2015 to January 2017, Mr. Giovanetti served as President of Legacy LifePoint's Western Group. Mr. Giovanetti joined Legacy LifePoint in July 2013 as Chief Operating Officer of Legacy LifePoint's Eastern Group. Mr. Giovanetti has more than 25 years of management experience in operations, financial, clinical and strategic aspects of healthcare administration. Prior to joining the Company, his positions included president of HCA Lewis-Gale Regional Health System in Roanoke, Virginia, chief executive officer and chief operating officer of Southern Hills Medical Center in Nashville, Tennessee, and various management roles with HCA, Symbion and other healthcare organizations in Georgia.

Robert F. Jay became our Executive Vice President, Integrated Operations upon consummation of the LifePoint/RCCH Merger. Mr. Jay previously served as RCCH's Executive Vice President and Chief Operating Officer, a position he held from January 2018. Mr. Jay has served in various roles with RCCH, including Executive Vice President Operations Support from May 2016 to September 2016 and Division President from September 2016 to January 2018. Prior to that he served as Chief Operating Officer for RCCH from January 2014 until May 2016. Prior to joining RCCH, he spent seven years at Vanguard Health Systems in a variety of operations and development positions. He joined Vanguard Health Systems as its Corporate Director Operations and Financial Analysis where he was responsible for managing and reporting operational, clinical, and financial results. In 2008, Mr. Jay was promoted to Vice President, Supply Chain Management of Vanguard where he oversaw the overall strategic direction and tactical execution of supply chain operations. In 2009 he transitioned to Vice President, Development of Vanguard where he led acquisition teams that closed on hospital transactions with combined net revenues of over $2.2 billion. Prior to joining Vanguard Health Systems, Mr. Jay worked as the Corporate Controller for Health Management Associates, Inc. in Naples, Florida. He has also served as a Controller in a not-for-profit hospital and also spent time at KPMG as an auditor.

Jennifer C. Peters became our Executive Vice President and General Counsel upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Ms. Peters served as Legacy LifePoint's General Counsel since April 2017 and Corporate Secretary since June 2017. Prior to that, Ms. Peters served as senior vice president and chief operations counsel of Legacy LifePoint, where she was responsible for overseeing the Company's operations lawyers and contract management team to ensure consistent legal guidance across all operational units. Prior to joining Legacy LifePoint in November 2013, Ms. Peters served as general counsel, secretary and chief compliance officer for Simplex Healthcare from October 2010 through November 2013. Ms. Peters has also served as vice president and associate general counsel at Community Health Systems. In addition, Ms. Peters has experience as a hospital administrator.

J. Michael Grooms became our Senior Vice President and Chief Accounting Officer upon consummation of the LifePoint/RCCH Merger. Mr. Grooms previously served as Chief Accounting Officer of Legacy Lifepoint from June 2018 and as Vice President of Accounting and Financial Reporting from March 2012. Additionally, Mr. Grooms served in various other accounting financial reporting roles since joining Legacy Lifepoint in September 2006. Prior to that time, he served as controller with Delek US from 2005 to 2006, and as an auditor with KPMG from 2001 to 2005.

Matthew H. Nord has been our Director since consummation of the Apollo/RegionalCare Acquisition in December 2015 and became Chairman of the Board in December 2018. Mr. Nord is a Senior Partner of Apollo Global Management, LLC, where he has been employed since 2003. From 2001 to 2003, Mr. Nord was a member of the Investment Banking division of Salomon Smith Barney Inc. Mr. Nord serves on several boards of directors, including West Corporation, Presidio, Inc., ADT, and Exela Technologies, Inc. Mr. Nord also serves on the Board of Trustees of Montefiore Health System and on the Board of Overseers of the University of Pennsylvania's School of Design. During the past five years, Mr. Nord has also served as a director of Affinion Group Holdings, Inc. (from October 2006 to November 2015), Constellium N.V. (from May 2010 to November 2015), EVERTEC, Inc. (from September 2010 to December 2013), Hughes Telematics, Inc. (from December 2006 to July 2012), MidCap Financial Holdings, LLC (from December 2013 to January 2015), Noranda Aluminum Holding Corporation (from March 2007 to December 2015) and SourceHOV Holdings, Inc. (from January 2006 to April 2013). Mr. Nord graduated summa cum laude with a B.S. in Economics from the Wharton School of the University of Pennsylvania. Between his work at Apollo and his prior experience in investment banking, Mr. Nord has approximately 15 years of experience analyzing, financing and investing in public and private companies.

William F. Carpenter III became our Director and Chairman Emeritus upon consummation of the LifePoint/RCCH Merger. Mr. Carpenter was a founding member of Legacy LifePoint, having served in various roles as Executive Vice President, Senior Vice President, General Counsel, Secretary and Corporate Governance Officer. In 2006, Mr. Carpenter was appointed Chief Executive Officer and elected to the Board of Directors of Legacy LifePoint and, in 2010, was appointed Chairman of the Board. Mr. Carpenter serves on the board of directors of the American Hospital Association, and formerly served as Chairman and a member of the board of the Federation of American Hospitals, the national public policy organization for investor-owned hospitals. Mr. Carpenter is also a member and past chairman of the Nashville Health Care Council Board of Directors, and serves on the boards of directors of the Nashville Area Chamber of Commerce, NashvilleHealth, the Center for Medical Interoperability, United Way of Nashville, and Nashville Public Radio. A recognized leader in the healthcare industry, he has appeared on *Modern Healthcare* magazine's annual "100 Most Influential People in Healthcare" list numerous times.

Norman Brownstein became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Brownstein is the founding member and chairman of the board of the law firm of Brownstein Hyatt Farber Schreck, LLP. Mr. Brownstein is nationally recognized for his extensive experience in real estate law, commercial transactions and public policy advocacy, which spans the economic spectrum, extending to telecommunications, financial services, agriculture, tax and health care interests. Mr. Brownstein serves on the board of directors of National Jewish Health, and during the past five years has also served as a director of Ardent Healthcare Services. Mr. Brownstein received a B.S. from the University of Colorado and a J.D. from the University of Colorado Law School.

Christopher J. Christie became our Director in December 2018. Mr. Christie served two terms as Governor of New Jersey from 2010 to 2018. Prior to that, Mr. Christie served as U.S. Attorney for the District of New Jersey from 2002 to 2008. During his governorship, Mr. Christie chaired the President's Commission on Combating Drug Addiction and the Opioid Crisis in 2017. He currently serves as a legal and political commentator for ABC News. Mr. Christie is a graduate of the University of Delaware and Seton Hall University School of Law.

Maxwell David became our Director in December 2018. Mr. David is a principal in Apollo Global Management's Private Equity business, having joined in 2014. Prior to that time, Mr. David was a member of the Investment Banking division of Bank of America Merrill Lynch. Mr. David serves on the board of directors of CareerBuilder. Mr. David graduated cum laude from Dartmouth College with a B.A. in Economics.

Michael P. Haley became our Director in December 2018. Prior to that time, Mr. Haley served as a director of Legacy LifePoint since 2005 and as chair of its Audit Committee since 2016. Mr. Haley is also a member of the board of directors of American National Bankshares, Inc., a bank holding company. From 2005 until April 2018, Mr. Haley served as a director of Ply Gem Holdings, Inc., a producer of window, door and siding products for the residential construction industry. Mr. Haley served as an advisor to Fenway Partners, LLC, a private equity investment firm, from April 2006 to June 2015, and was a managing director of its affiliate, Fenway Resources, from 2008 to June 2015. Mr. Haley's previous executive leadership experience includes service as executive chairman of Coach America, a transportation services operator, and as chairman, president and chief executive officer of MW Manufacturers, Inc., a subsidiary of Ply Gem Industries, Inc. In addition, Mr. Haley previously served on the board of the Martinsville-Henry County United Way and as chairman of the board of trustees of Memorial Hospital of Martinsville and of the Martinsville-Henry County Economic Development Corporation.

Steven Levin became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Levin is the chief strategy officer of Waystar, a healthcare revenue cycle technology platform. In 2018, Waystar acquired Connance, an analytics company that delivers workflow optimization technology for healthcare providers, which Mr. Levin founded in collaboration with Tenet Healthcare, FICO and Northbridge Venture Partners following a nearly two decade management consulting career at Monitor Company working with hospitals, HCIT companies and health insurers. Mr. Levin holds a B.A. from Dartmouth College and an M.B.A. from Harvard Business School.

Holly McMullan became our Director in December 2018. Ms. McMullan is a Partner in Apollo Global Management's Marketing and Business Development group, where she is responsible for fundraising efforts, having jointed in 2008. Prior to that time, Ms. McMullan was a Senior Vice President at Pequot Capital and was previously a member of Guggenheim Advisors, Bear Stearns, and Robertson Opp. Capital.

Daniel Morissette became our Director upon consummation of the Transaction in April 2016. Mr. Morissette has served as Senior Executive Vice President/Chief Financial Officer for Dignity Health since February 2016. Previously, Mr. Morissette served as the Chief Financial Officer for Stanford Health Care. Mr. Morissette has over 25 years of experience in health care, consulting and international business development. During the past five years, Mr. Morissette served as a director for Optum360 and University Healthcare Alliance. Mr. Morissette received a B.S. from DePaul University and an M.B.A. from The University of Chicago, Booth School of Business.

Eric L. Press has been our Director since consummation of the Apollo/RegionalCare Acquisition in December 2015. Mr. Press is a senior partner of Apollo Global Management, LLC, where he has been employed since 1998 and has served as an officer of certain affiliates of Apollo. From 1992 to 1998, Mr. Press was associated with the law firm of Wachtell, Lipton, Rosen & Katz specializing in mergers, acquisitions, restructurings and related financing transactions. From 1987 to 1989, Mr. Press was a consultant with The Boston Consulting Group. Mr. Press serves on several boards of directors, including Apollo Commercial Real Estate Finance, Inc., PlayAGS, Inc., Princimar Chemical Holdings, LLC, ADT Inc. and Constellis Holdings, LLC. During the past five years, Mr. Press also served as a director of Affinion Group Holdings, Inc. (from October 2005 to September 2015), Athene Holding Ltd. (from July 2009 to February 2014), Metals USA Holdings Corp. (from May 2005 to April 2013), Noranda Aluminum Holding Corporation (from March 2007 to December 2015), Prestige Cruise Holdings, Inc. (from April 2007 to November 2014), Verso Corporation (from January 2009 to July 2016) and Caesars Entertainment Corporation (from January 2008 to October 2017). Mr. Press graduated magna cum laude from Harvard University with a A.B. in economics and received his JD from Yale Law School. Mr. Press has significant experience making and managing private equity investments on behalf of Apollo. Between his work at Apollo and his prior experience as an attorney and a management consultant, Mr. Press has approximately 28 years of experience in the process of financing, analyzing, and investing in public and private companies and serving on their board of directors.

Martin S. Rash has been our director since October 2015 following the Apollo/RegionalCare Acquisition and served as Executive Chairman following the consummation of the RegionalCare/Capella Merger in April 2016 until the consummation of the LifePoint/RCCH Merger. Additionally, Mr. Rash served as Chief Executive Officer of RegionalCare from October 2015 until the consummation of the LifePoint/RCCH Merger. Mr. Rash served as the Executive Chairman at RegionalCare Hospital Partners, Inc. from March 2013 to October 2015 and served as its Chief Executive Officer from 2009 until March 2013. From December 1996 to 2005, Mr. Rash was Chairman and Chief Executive Officer of Province Healthcare, a $1 billion NYSE company that owned 21 hospitals and managed more than 50 facilities. Prior to his tenure at Province Healthcare, Mr. Rash served as Executive Vice President and Chief Operating Officer for Community Health Systems where he led the growth of the company from 10 to 41 hospitals in 17 states. Earlier in his 39-year healthcare career, he worked at numerous community hospitals in various administrative and financial roles. Mr. Rash's experience and leadership includes Board of Directorships in the past at Healthspring, a NYSE company, and Odyssey Healthcare, a NASDAQ company. He is a past Chairman of the Federation of American Hospitals and currently serves on the board of the Nashville Health Care Council. He holds both a B.A. and M.B.A. from Middle Tennessee State University. He currently serves as Chairman of American Pathology Partners.

Olivia Wassenaar became our Director in December 2018. Ms. Wassenaar is a partner in Apollo Global Management's Natural Resources business, having joined in 2018. Prior to that time, Ms. Wassenaar was a Managing Director at Riverstone Holdings and was previously a member of the Investment Banking division of Goldman Sachs. Ms. Wassenaar also serves on the boards of directors of Talos Energy and Pegasus.

G. Rodney Wolford became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Wolford has over 40 years of wide-ranging experience in the health care industry, having served in leadership roles with health care providers, suppliers, consulting firms, associations and insurers. Redirecting his professional time from active executive leadership, he now focuses his professional time on multiple boards of directors and rural community economic development. Among his many executive positions, Mr. Wolford served as chief executive officer of Alliant Healthcare (now Norton Healthcare), the leading hospital system in Louisville, KY, Sterling Diagnostic, a worldwide manufacturer of x-ray film, Forhealth Technologies, the inventor of the first robot dedicated to hospital IV production, and a senior executive of Blue Cross Tennessee. Mr. Wolford currently serves on the boards of Atlanta based D4C Brands, a pediatric dentistry company, and Liberate Medical, which develops electronic stimulation for ventilator patients, and as a fund manager of Bluegrass Angel Fund III. During the past five years, Mr. Wolford has also served as a director of Haven Behavioral, Laboratory Supply Company, VetCor and Essent Healthcare.

Code of Ethics

Our Board expects its members, as well as our officers and employees, to act ethically at all times and to acknowledge in writing their adherence to the policies comprising our Code of Conduct, which is known as "Common Ground," and, as applicable, our Code of Ethics for Senior Financial Officers and Chief Executive Officer.

Board Structure

The Board consists of 13 directors. The Board has the following standing committees: audit; compensation; nominating and governance; compliance; quality; and executive. In addition, the board of directors of our parent company, DSB Parent, also has a compensation committee that administers equity-based compensation plans in which our managers, officers, employees, consultants and directors participate. As a result of the LifePoint/RCCH Merger and the RegionalCare/Capella Merger, Apollo has the power to control us and our affairs and policies, including the designation of a majority of the members of our Board and the appointment of management.

Committees of our Board of Directors

The Board has adopted written charters for each of the following standing committees:

Audit Committee

The current members of our audit committee are Messrs. Morissette, Haley and Wolford. Mr. Morissette is the chairman of our audit committee. The principal duties and responsibilities of our audit committee are to assist the Board in overseeing:

- the integrity of our financial statements;
- the independent auditor's qualifications, independence and performance;
- the performance of our internal audit function; and
- our compliance with certain legal, ethical and regulatory requirements.

The audit committee has the authority to conduct or authorize investigations into or studies of matters within its scope of responsibilities. It also has the authority to retain and determine funding for independent legal, accounting or other advisors (without seeking Board approval) as it determines necessary or appropriate to carry out its duties and responsibilities.

Our Board has determined that each of Messrs. Morissette and Wolford is an "audit committee financial expert" within the meaning of applicable SEC regulations.

Compensation Committee

The current members of our compensation committee are Messrs. Nord and Press. Mr. Press is the chairman of our compensation committee. The principal duties and responsibilities of our compensation committee are as follows:

- approving the non-equity-based compensation of our officers, directors and employees;
- administering our non-equity-based compensation plans; and
- making recommendations to DSB Parent for the equity-based compensation of DSB Parent and its subsidiaries' officers, directors and employees.

Nominating and Governance Committee

The current members of our nominating and governance committee are Messrs. Christie, Press and Rash. Mr. Press is the chairman of our nominating and governance committee. The principal duties and responsibilities of our nominating and governance committee are as follows:

- to assist the Board in identifying individuals qualified to serve as members of the Board and/or its committees; and
- other duties and responsibilities that our Board may delegate to the nominating and governance committee.

Compliance Committee

The current members of our compliance committee are Messrs. Levin, Morissette, Wolford and Rash. Mr. Wolford is the chairman of our compliance committee. The compliance committee is responsible for overseeing our legal and regulatory compliance program, including certain healthcare and regulatory compliance matters that affect us and our business operations.

Quality Committee

The current members of our compliance committee are Messrs. Brownstein, Carpenter, David, Haley and Ms. McMullan. Mr. Carpenter is the chairman of our quality committee. The quality committee is responsible for monitoring and evaluating the adequacy and effectiveness of our quality of care and patient safety programs and initiatives.

Executive Committee

The current members of our executive committee are Messrs. David, Nord and Press. Mr. Nord is the chairman of our executive committee. The principal duties and responsibilities of our executive committee are as follows:

- to advise and counsel the Chief Executive Officer regarding company matters; and
- to take such actions as are necessary due to their urgent or highly confidential nature, or where convening the Board is impracticable, subject to certain limitations.

Item 11. ***Executive Compensation.***

The information that would be required to be disclosed under Part III, Item 11 of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a) of each of the Indentures.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.***

The information that would be required to be disclosed under Part III, Item 12 of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a) of each of the Indentures.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence*****.**

The following discussion reflects certain relationships and related party transactions entered into in connection with the LifePoint/RCCH Merger. For a further discussion of our relationships and related party transactions, refer to the notes to our accompanying consolidated financial statements included elsewhere in this Report and disclosure regarding our relationships and related party transactions contained in the November 2018 OM.

New Employment Agreements

In connection with the consummation of the LifePoint/RCCH Merger, we entered into an employment agreement with each of Messrs. Dill, Bumpus, Coggin and Giovanetti and Ms. Peters. Additionally, we entered an amended and restated employment agreement with Mr. Jay.

Each applicable executive's employment agreement contains an indefinite term of employment. Each employment agreement established the applicable executive's annual base salary (the annual base salary in the employment agreements for each of Messrs. Dill, Bumpus, Coggin, Giovanetti and Jay and Ms. Peters was set at $1,100,000, $550,000, $650,000, $650,000, $650,000 and $550,000, respectively) and his or her eligibility to receive an annual bonus with the target bonus for each fiscal year determined annually by our board of directors or our compensation committee. Pursuant to his or her respective employment agreement, Mr. Dill's target bonus is at least 150% of base salary, and each of Messrs. Bumpus', Coggin's, Giovanetti's and Jay's and Ms. Peters' target bonus is at least 100% of base salary with a maximum of 200% of base salary. The actual bonus payable to each applicable executive will be based upon the level of achievement of annual Company and individual performance objectives, as determined by the board of directors or our compensation committee.

As disclosed in the November 2018 OM, we implemented a transaction severance plan (the "***RCCH Severance Plan***") under which certain employees are eligible to receive severance payments and benefits in connection with their "qualifying termination" (as defined in the November 2018 OM) of employment under the plan within 18 months after the consummation of the LifePoint/RCCH Merger. Under the RCCH Severance Plan and the applicable employment agreement, in the event of his or her qualifying termination under the plan within such 18-month period and execution of a release of claims, each of the executives other than Mr. Bumpus will be entitled to receive the severance payments and benefits provided to "category one" employees as described in the November 2018 OM. Following the expiration of the 18-month period and execution of a release of claims, each of the executives other than Mr. Bumpus will be entitled to receive the severance payments and benefits as described in the applicable employment agreement in the event of his or her termination without cause (other than due to death or disability) or resignation due to good reason. Under his employment agreement, in the event of his termination for any reason other than for cause (including due to retirement) and his execution of a release of claims, Mr. Bumpus will be entitled to receive the same severance payments and benefits payable to "category one" employees under the RCCH Severance Plan and certain additional severance benefits.

Additionally, as disclosed in the November 2018 OM, on November 8, 2018, we entered into an amended and restated employment agreement with Mr. Rash. Mr. Rash's amended and restated employment agreement contains an indefinite term of employment and provides for an annual base salary and payment of an annual fee in connection with his service on our board of directors and severance payments and benefits in the event of his termination of employment without cause (other than due to death or disability) or resignation for good reason and execution of a release of claims. Mr. Rash is not entitled to receive any severance payments or benefits under the RCCH Severance Plan.

Each applicable executive is subject to a (i) 12-month post-termination non-competition covenant relating to competitors of the Company, (ii) 12-month post-termination non-solicitation covenant in respect of our employees, consultants, clients, customers and similar business relationships of the Company and (iii) perpetual confidentiality and non-disparagement covenants.

Retention Bonuses and Severance Payments

As contemplated in the November 2018 OM, in connection with the consummation of the LifePoint/RCCH Merger, we have paid or are paying retention bonuses and severance payments to certain former Legacy LifePoint or RCCH executives and other employees. The aggregate amount for such payments made through the end of December 31, 2018 is included within merger and acquisition costs on our consolidated statement of operations for the year ended December 31, 2018 and are discussed in Note 2 to our accompanying consolidated financial statements included elsewhere in this Report. Certain retention bonuses and severance payments in connection with the LifePoint/RCCH merger are anticipated to continue to be made during 2019 and 2020 and will be reflected within merger and acquisition costs on our consolidated statement of operations for subsequent periods.

DSB Parent L.P. Capital Units and Profits Units

Certain of our executives, employees, consultants and directors, including our new executive officers following the LifePoint/RCCH Merger, have been granted profits units and certain of our executives, employees and directors have purchased capital units in DSB Parent (the "***capital units***"). Further information about such capital unit acquisitions and certain of the profits unit grants is provided below.

The profits units provide the recipients with the opportunity to share in our future appreciation, subject to vesting. In general, 40% of the profits units vest in substantially equal installments on the last day of each of the first twenty (20) calendar quarters commencing on or after the applicable grant date or, in the case of certain grants, November 16, 2018 (the "***time-vested profits units***") and the remaining 60% of the profits units vest based on the achievement of certain investment returns to our Sponsor. The profits units granted to directors (the "***directors profits units***") generally vest on a time basis, either in substantially equal installments on each of the first three anniversaries of the date of grant or on the date that is six months and one day from November 16, 2018. In addition, the time-vested profits units and the director profits units will vest in full on a sale of the Company. Refer to Note 13 to our accompanying consolidated financial statements included elsewhere in this Report for a discussion of profits units issued by DSB Parent to our executives, employees, consultants and directors.

The capital units and profits units are generally subject to the terms and condition set forth in the applicable award agreements or subscription agreements, as the case may be, and in the partnership agreement of DSB Parent, including, but not limited to, customary transfer restrictions, redemption rights and obligations, drag-along rights, tag-along rights, and preemptive rights.

Equity Repurchases

As contemplated in the November 2018 OM, in connection with the LifePoint/RCCH Merger, DSB Parent has repurchased or is in process of repurchasing capital units and vested profits units from certain of our former or departing employees, including certain former executive officers. Although none of these repurchases were completed prior to the end of 2018, the aggregate amount of such repurchases is included under the caption "Other current liabilities" in our accompanying consolidated balance sheet as of December 31, 2018 included elsewhere in this Report. Repurchases are ongoing and are anticipated to continue to occur during 2019.

Director Arrangements

Certain members of our Board of Directors are entitled to receive annual retainers and fees in accordance with our director compensation policy in connection with their service on our Board.

In addition, as contemplated in November 2018 OM, we entered into a letter agreement with Mr. Carpenter, dated November 16, 2018, regarding the terms of his stepping down as the chief executive officer and chairman of the board of directors of Legacy LifePoint and the terms of his continued service with us on our board of directors.

Item 14. *Principal Accounting Fees and Services*.

The Audit Committee has appointed Ernst & Young LLP as our independent registered public accounting firm. Services provided to us by Ernst & Young LLP in fiscal 2018 are described below.

Audit Fees. The aggregate audit fees billed by Ernst & Young LLP for professional services rendered for the audit of our annual consolidated financial statements and services that are normally provided by the independent registered public accounting firm in connection with statutory and regulatory filings totaled approximately $6.0 million for 2018 and approximately $1.2 million for 2017.

Audit-Related Fees. The aggregate fees billed by Ernst & Young LLP for assurance and related services other than those described under “Audit Fees” were approximately $0.2 million for 2018.

Tax Fees. The aggregate fees billed by Ernst & Young LLP for professional services rendered for tax compliance, tax advice and tax planning were approximately $0.3 million for 2018 and approximately $0.1 million for 2017.

All Other Fees. There were no fees billed by Ernst & Young LLP for products or services other than those described above in 2018 or 2017.

PART IV

Item 15. ***Exhibits, Financial Statement Schedules*.**

(a) The following documents are filed as part of this Report:

1. *Consolidated Financial Statements*:

2. *Financial Statement Schedule*: All schedules for which provision is made in the applicable accounting regulations of the SEC are omitted because they either are not required under the related instructions, are inapplicable, or the required information is shown in the consolidated financial statements or notes thereto.

3. *Exhibits*: The exhibits required by Item 601 of Regulation S-K that would be disclosed under Part IV, Item 15 of an annual report on Form 10-K filed with the SEC have been omitted as permitted pursuant to Section 4.02(a) of the Indentures.

Report of Independent Auditors

Board of Directors and Shareholders of
LifePoint Health, Inc.

We have audited the accompanying consolidated financial statements of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.), which comprise the consolidated balance sheets as of December 31, 2018 and 2017, and the related consolidated statements of operations, comprehensive loss, equity and cash flows for each of the three years in the period ended December 31, 2018, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.) at December 31, 2018 and 2017, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2018 in conformity with U.S. generally accepted accounting principles.

Note 1. Organization and Summary of Significant Accounting Policies

Organization

LifePoint Health, Inc., a Delaware corporation, acting through its subsidiaries, owns or leases and operates community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities. At December 31, 2018, on a consolidated basis, LifePoint Health, Inc. operated 89 hospital campuses in 30 states throughout the United States ("U.S.").

Unless otherwise indicated or the context otherwise requires, references throughout these notes to the consolidated financial statements to the "Company" or "LifePoint" refer to LifePoint Health, Inc., and each of its consolidated subsidiaries after giving effect to the LifePoint/RCCH Merger (defined below) and (ii) "RCCH" refer to RegionalCare Hospital Partners Holdings, Inc. and each of its consolidated subsidiaries before giving effect to the LifePoint/RCCH Merger. References in this Report to the "Sponsor" refer to certain funds that are affiliates of the Company (the "Apollo Funds") that are ultimately controlled and/or managed by Apollo Management VIII, L.P. ("Apollo Management" and, when acting on behalf of the Apollo Funds, "Apollo"), which is an affiliate of Apollo Global Management LLC.

Additionally, references throughout these notes to the consolidated financial statements to the "LifePoint/RCCH Merger" refer to the merger, which was effective on November 16, 2018, of Legend Merger Sub, Inc., a Delaware corporation and wholly owned subsidiary of RCCH ("Legend Merger Sub"), with and into LifePoint Health, Inc., a Delaware corporation ("Legacy LifePoint"), with Legacy LifePoint surviving the LifePoint/RCCH Merger as a subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners, Inc." to "LifePoint Health, Inc."

Furthermore, references throughout these notes to the consolidated financial statements to the "RegionalCare/Capella Merger" refer to the merger of Crimson Merger Sub, LLC ("Crimson Merger Sub"), a Delaware limited liability company and wholly-owned subsidiary of RegionalCare Hospital Partners Inc. ("RegionalCare"), with and into Capella Health Holdings, LLC ("Capella"), with Capella surviving the RegionalCare/Capella Merger as a wholly-owned subsidiary of RegionalCare, which began to do business as RCCH Healthcare Partners. The RegionalCare/Capella Merger was consummated on April 29, 2016; however, for accounting purposes, the RegionalCare/Capella Merger became effective on May 1, 2016.

References throughout these notes to the consolidated financial statements to the "Apollo/RegionalCare Acquisition" refer to the merger, which was effective on December 3, 2015, of DSB Merger Sub Inc., a Delaware corporation and wholly-owned subsidiary of DSB Acquisition LLC, a Delaware limited liability company ("Holdings"), with and into RegionalCare with RegionalCare surviving such merger as a direct wholly-owned subsidiary of Holdings, which is indirectly controlled by our Sponsor.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company and all subsidiaries and entities controlled by the Company through majority voting control, and variable interest entities which the Company controls. All significant intercompany accounts and transactions within the Company have been eliminated in consolidation. Noncontrolling interests in non-wholly-owned consolidated subsidiaries of the Company are presented as noncontrolling interests and redeemable noncontrolling interests and distinguish between the interests of the Company and the interests of the noncontrolling owners. Net income attributable to noncontrolling interests and redeemable noncontrolling interests represents the amounts attributable to the noncontrolling interests for each of the applicable periods presented. Investments in entities the Company does not control but does have a substantial ownership interest and can exercise significant influence are accounted for using the equity method.

The Company's financial statements have been presented on the basis of push down accounting in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") No. 805-50-S99. Under the push down basis of accounting, certain transactions incurred by the parent company which would otherwise be accounted for in the accounts of the parent are "pushed down" and recorded on the financial statements of the subsidiary. Accordingly, certain items resulting from the acquisition by Apollo have been recorded on the financial statements of the Company.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in the Company's accompanying consolidated financial statements and notes to the consolidated financial statements. Actual results could differ from those estimates.

Revenue Recognition and Accounts Receivable

Overview

The Company recognizes revenues in the period in which services are performed. Accounts receivable primarily consist of amounts due from third-party payers and patients. The Company's ability to collect outstanding receivables is critical to its results of operations and cash flows. Amounts the Company receives for treatment of patients covered by governmental programs such as Medicare and Medicaid and other third-party payers such as health maintenance organizations ("HMOs"), preferred provider organizations ("PPOs") and other private insurers are generally less than the Company's established billing rates. Additionally, to provide for accounts receivable that could become uncollectible in the future, the Company establishes an allowance for doubtful accounts to reduce the carrying value of such receivables to their estimated net realizable value. Accordingly, the revenues and accounts receivable reported in the Company's consolidated financial statements are recorded at the net amount expected to be received.

Change in Accounting Estimate

During the year ended December 31, 2018, the Company recorded a decrease to revenues of $17.0 million as a result of a change in its accounting estimate of the collectability of accounts receivable. During the year ended December 31, 2018, the Company identified additional information which indicated that its current collection estimates might be different from its historical collection estimates. Management utilized this new information to further refine its estimation procedures to more precisely estimate the collectability of accounts receivable. The Company's change in its estimation procedures of the collectability of its accounts receivable is considered a change in accounting estimate in accordance with ASC 250, "Accounting Changes and Error Corrections."

Payer Mix

The following table summarizes the Company's revenues by payer as approximate percentages of net patient revenues before the provision for doubtful accounts for the years ended December 31, 2018, 2017 and 2016:

	2018	2017	2016
Medicare	37.6 %	40.4 %	36.4 %
Medicaid	13.1	12.2	12.8
HMOs, PPOs and other private insurers	41.3	40.7	42.5
Self-pay	8.0	6.7	8.3
	100.0 %	100.0 %	100.0 %

Certain changes have been made to the classification of the Company's historical sources of revenues. Primarily, the Company changed the classification of revenues related to its managed Medicare and managed Medicaid programs from HMOs, PPOs and other private insurers to Medicare and Medicaid, respectively, for each of the periods presented above. This change had no impact on the Company's historical results of operations.

Contractual Discounts and Cost Report Settlements

The Company derives a significant portion of its revenues from Medicare, Medicaid and other payers that receive discounts from its established billing rates. The Company must estimate the total amount of these discounts to prepare its consolidated financial statements. The Medicare and Medicaid regulations and various managed care contracts under which these discounts must be calculated are complex and are subject to interpretation and adjustment. The Company estimates the allowance for contractual discounts on a payer-specific basis given its interpretation of the applicable regulations or contract terms. These interpretations sometimes result in payments that differ from the Company's estimates. Additionally, updated regulations and contract renegotiations occur frequently, necessitating regular review and assessment of the estimation process by management. Changes in estimates related to the allowance for contractual discounts affect revenues reported in the Company's accompanying consolidated statements of operations.

Cost report settlements under reimbursement agreements with Medicare and Medicaid are estimated and recorded in the period the related services are rendered and will be adjusted in future periods as final settlements are determined. There is a reasonable possibility that recorded estimates will change by a material amount in the near term. For the year ended December 31, 2018, the net adjustments to estimated cost report settlements resulted in a decrease to revenues of approximately $4.0 million, and for the years ended December 31, 2017 and 2016, the net adjustments to estimated cost report settlements resulted in increases to revenues of approximately $3.6 million and $3.7 million, respectively. The net estimated cost report settlements due to Medicare and Medicaid were approximately $0.5 million and $0.3 million as of December 31, 2018 and 2017, respectively. The Company's management believes that adequate provisions have been made for adjustments that may result from final determination of amounts earned under these agreements.

The Company believes that it is in compliance with all applicable laws and regulations with regard to its Medicare and Medicaid programs and is not aware of any pending or threatened investigations involving allegations of potential wrongdoing that would have a material effect on the Company's consolidated financial statements. Compliance with such laws and regulations can be subject to future governmental review and interpretation as well as significant regulatory action including fines, penalties and exclusion from the Medicare and Medicaid programs.

Charity Care

Self-pay revenues are derived primarily from patients who do not have any form of healthcare coverage. The revenues associated with self-pay patients are generally reported at the Company's gross charges. The Company evaluates these patients, after the patient's medical condition is determined to be stable, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid or other governmental assistance programs, as well as the local hospital's policy for charity care. The Company provides care without charge to certain patients that qualify under the local charity care policy of each of its hospitals. For the years ended December 31, 2018, 2017 and 2016, the Company estimates that its costs of care provided under its charity care programs approximated $16.8 million, $11.7 million and $5.7 million, respectively. The Company does not report a charity care patient's charges in revenues or in the provision for doubtful accounts as it is the Company's policy not to pursue collection of amounts related to these patients.

The Company's management estimates its costs of care provided under its charity care programs utilizing a calculated ratio of costs to gross charges multiplied by the Company's gross charity care charges provided. The Company's gross charity care charges include only services provided to patients who are unable to pay and qualify under the Company's local charity care policies. To the extent the Company receives reimbursement through the various governmental assistance programs in which it participates to subsidize its care of indigent patients, the Company does not include these patients' charges in its cost of care provided under its charity care program.

Provision and Allowance for Doubtful Accounts

To provide for accounts receivable that could become uncollectible in the future, the Company establishes an allowance for doubtful accounts to reduce the carrying value of such receivables to their estimated net realizable value. The primary uncertainty lies with uninsured patient receivables and deductibles, co-payments or other amounts due from individual patients.

The Company has an established process to determine the adequacy of the allowance for doubtful accounts that relies on a number of analytical tools and benchmarks to arrive at a reasonable allowance. No single statistic or measurement determines the adequacy of the allowance for doubtful accounts. Some of the analytical tools that the Company utilizes include, but are not limited to, historical cash collection experience, revenue trends by payer classification and revenue days in accounts receivable. Accounts receivable are written off after collection efforts have been followed in accordance with the Company's policies.

A summary of activity in the Company's allowance for doubtful accounts is as follows (in millions):

	Balances at Beginning of Year	Additions Recognized as a Reduction to Revenues	Accounts Written Off, Net of Recoveries	Balances at End of Year
Year ended December 31, 2018	$ 251.9	$ 357.9	$ (206.4)	$ 403.4
Year ended December 31, 2017	$ 127.7	$ 206.9	$ (82.7)	$ 251.9
Year ended December 31, 2016	$ 7.9	$ 165.2	$ (45.4)	$ 127.7

The allowances for doubtful accounts as a percentage of gross accounts receivable, net of contractual discounts were 26.7% and 49.5% as of December 31, 2018 and 2017, respectively. The decrease in the Company's allowances for doubtful accounts as a percentage of gross accounts receivable, net of contractual discounts, is primarily a result of the accounts receivable acquired in connection with the LifePoint/RCCH Merger, which was recognized in the Company's balance sheet net of allowances for doubtful accounts at the effective time of the LifePoint/RCCH Merger. Additionally, as of December 31, 2018 and 2017, the allowances for doubtful accounts plus certain contractual allowances and discounts related to self-pay patients as a percentage of self-pay receivables were 95.3% and 94.1%, respectively.

Concentration of Revenues

During the years ended December 31, 2018, 2017 and 2016, approximately 50.7%, 52.6% and 49.2%, respectively, of the Company's revenues related to patients participating in the Medicare and Medicaid programs, collectively. The Company's management recognizes that revenues and receivables from government agencies are significant to the Company's operations, but it does not believe that there are significant credit risks associated with these government agencies. Any changes in the current demographic, economic, competitive or regulatory conditions, or to Medicaid programs could have an adverse effect on the Company's revenues or results of operations. The Company's management does not believe that there are any other significant concentrations of revenues from any particular payer or geographic area that would subject the Company to any significant credit risks in the collection of its accounts receivable.

Other Revenue

Other revenue primarily consists of hospital ancillary sales and services as well as rental income. The Company leases certain real estate assets it owns to unrelated third parties, primarily medical office buildings to non-employed physicians. The Company recognizes rental income for these operating lease arrangements in which the Company is the lessor on a straight-line basis over the lease term in accordance with ASC 840, "Leases" ("ASC 840").

General and Administrative Costs

The majority of the Company's operating expenses are "cost of revenue" items. Operating costs that could be classified as "general and administrative" by the Company would include its corporate overhead costs, excluding depreciation and amortization and merger and acquisition costs, which were $72.4 million, $42.8 million and $29.7 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Other Income

The American Recovery and Reinvestment Act of 2009 ("ARRA") provides for incentive payments under the Medicare and Medicaid programs for certain hospitals and physician practices that demonstrate meaningful use of certified electronic health record ("EHR") technology. These provisions of ARRA, collectively referred to as the Health Information Technology for Economic and Clinical Health Act (the "HITECH Act"), are intended to promote the adoption and meaningful use of interoperable health information technology and qualified EHR technology.

The Company accounts for EHR incentive payments in accordance with ASC 450, "Gain Contingencies" ("ASC 450"). In accordance with ASC 450, the Company recognizes a gain for EHR incentive payments when its eligible hospitals and physician practices have demonstrated meaningful use of certified EHR technology for the applicable period and when the cost report information for the full cost report year that determines the final calculation of the EHR incentive payment is available. The demonstration of meaningful use is based on meeting a series of objectives and varies among hospitals and physician practices, between the Medicare and Medicaid programs and within the Medicaid program from state to state. Additionally, meeting the series of objectives in order to demonstrate meaningful use becomes progressively more stringent as its implementation is phased in through stages as outlined by the Centers for Medicare and Medicaid Services ("CMS"). EHR incentive payments are subject to audit and potential recoupment if it is determined that the Company's hospitals did not meet the applicable meaningful use standards required in connection with such incentive payments. Furthermore, EHR incentive payments are subject to retrospective adjustment because the cost report data upon which the payments are based are further subject to audit.

The Company recognized EHR incentive income under the Medicare and Medicaid HITECH Act programs, collectively, of $9.8 million during the year ended December 31, 2016, which is included under the caption "Other operating expenses, net" in the Company's accompanying consolidated statements of operations. The Company's incentive payments under these programs substantially concluded in 2017.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand and short-term investments with original maturities of three months or less. The Company places its cash in financial institutions that are federally insured in limited amounts.

Inventories

Inventories of supplies are stated at the lower of cost (first-in, first-out) or market and consist of purchased items. Inventories acquired in connection with business combinations are recorded at fair value which approximates replacement cost. Inventory items are primarily operating supplies used in the direct or indirect treatment of patients.

Investments

The Company accounts for its investments in entities in which the Company exhibits significant influence, but not control, under the equity method of accounting in accordance with ASC 323, "Investments – Equity Method and Joint Ventures" ("ASC 323"). The Company does not consolidate its equity method investments, but rather measures them at their initial costs and then subsequently adjusts their carrying values through income for their respective shares of the earnings or losses during the period. Refer to Note 9 for further discussion of the Company's equity method investments.

Property and Equipment

Purchases of property and equipment are recorded at cost. Property and equipment acquired in connection with business combinations are recorded at estimated fair value in accordance with the acquisition method of accounting as prescribed in ASC 805, "Business Combinations" ("ASC 805"). Routine maintenance and repairs are charged to expense as incurred. Expenditures that increase capacities or extend useful lives are capitalized. Fully depreciated assets are retained in property and equipment accounts until they are disposed. The Company capitalizes interest on funds used to pay for the construction of major capital additions and such interest is included in the cost of each capital addition.

Depreciation is computed by applying the straight-line method over the estimated useful lives of buildings, improvements and equipment. Assets under capital and financing leases are generally amortized using the straight-line method over the shorter of the estimated useful life of the assets or life of the lease term, excluding any lease renewals, unless the lease renewals are reasonably assured. Capitalized internal-use software costs are amortized over their expected useful life, which is generally four years. Useful lives are as follows:

	Years		
Buildings and improvements (including those under capital leases and financing obligations)	3	-	49
Equipment	2	-	12
Equipment under capital leases	3	-	5

Depreciation expense (including lease amortization) totaled $128.5 million, $80.1 million and $56.9 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Whenever events or changes in circumstances indicate that the carrying values of certain long-lived assets may be impaired, the Company projects the undiscounted cash flows expected to be generated by these assets. If the projections indicate that the reported amounts are not expected to be recovered, such amounts are reduced to their estimated fair value based on a quoted market price, if available, or an estimate based on valuation techniques available in the circumstances.

For the year ended December 31, 2018, the Company recognized an impairment charge of $24.5 million to reduce the carrying amounts of certain long-lived assets at one of its facilities to their estimated fair values, which is included under the caption "Impairments of goodwill and long-lived assets" in the accompanying consolidated statements of operations for the year ended December 31, 2018. There were no long-lived asset impairments recorded for the years ended December 31, 2017 and 2016.

Goodwill and Intangible Assets

The Company accounts for its acquisitions in accordance with ASC 805 using the acquisition method of accounting. Goodwill represents the excess of the cost of an acquired entity over the net amounts assigned to assets acquired and liabilities assumed. In accordance with ASC 350, Intangibles – Goodwill and Other ("ASC 350"), goodwill and intangible assets with indefinite lives are reviewed by the Company annually for impairment on October 1. The impairment evaluation is performed at the individual hospital level as each hospital represents a reporting unit as defined in ASC 350. For the annual impairment evaluation, the Company may perform an initial qualitative assessment to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying value. This assessment is used as a basis for determining whether it is necessary to perform the goodwill impairment test. For those reporting units on which the Company performs the impairment test, the Company determines fair value using a discounted cash flow ("DCF") analysis and consideration of certain market inputs including those of guideline public companies. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates and the amount and timing of expected future cash flows. The significant judgments are typically based upon Level 3 inputs, generally defined as unobservable inputs representing the Company's assumptions. The cash flows employed in the DCF analysis are based on the Company's most recent financial budgets and business plans and, when applicable, various growth rates for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risks inherent in the future cash flows of the respective reporting units.

The Company's intangible assets relate to contract-based physician minimum revenue guarantees; non-competition agreements; certificates of need and certificates of need exemptions; and licenses, provider numbers, accreditations and other. Contract-based physician minimum revenue guarantees and non-competition agreements are amortized over the terms of the agreements. The certificates of need, certificates of need exemptions, licenses, provider numbers, accreditations and other have been determined to have indefinite lives and, accordingly, are not amortized. Refer to Note 5 for further discussion of the Company's goodwill and intangible assets.

Income Taxes

The Company accounts for income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the income tax provision in the period that includes the enactment date. The Company assesses the likelihood that deferred tax assets will be recovered from future taxable income. To the extent the Company believes that recovery is not likely, a valuation allowance is established. The establishment or increase in a valuation allowance is included as an expense within the provision for income taxes in the consolidated statements of operations. The Company classifies interest and penalties related to its tax positions as a component of income tax expense. Refer to Note 6 for further discussion of the Company's accounting for income taxes.

Reserves for Self-Insurance Claims

Given the nature of the Company's operating environment, it is subject to potential professional liability claims, employee workers' compensation claims and other claims. To mitigate a portion of this risk, the Company maintains insurance for individual professional liability claims and employee workers' compensation claims exceeding self-insured retention ("SIR") and deductible levels. At December 31, 2018, the Company's SIR for professional liability claims is $5.0 million per claim, with a $5.0 million inner aggregate, at the majority of its facilities, and $2.0 million per claim at certain of its facilities. Additionally, the Company participates in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2018, the Company's deductibles for workers' compensation claims range from $0.5 million to $1.0 million per claim in all states in which it operates except for Montana, Oklahoma, Ohio, Washington and Wyoming. The Company participates in state-specific programs for its workers' compensation claims arising in these states. The Company's SIR and deductible levels are evaluated annually as a part of its insurance program's renewal process.

The Company's reserves for self-insurance and deductible claims reflect the current estimate of all outstanding losses, including incurred but not reported losses, based upon actuarial calculations as of the balance sheet date. The loss estimates included in the actuarial calculations may change in the future based upon updated facts and circumstances. The Company's expense for self-insurance and deductible claims coverage each year includes: the actuarially determined estimate of losses for the current year, including claims incurred but not reported; the change in the estimate of losses for prior years based upon actual claims development experience as compared to prior actuarial projections; the insurance premiums for losses in excess of the Company's self-insured retention and deductible levels; the administrative costs of the insurance program; and interest expense related to the discounted portion of the liability. The Company's expense for self-insurance and deductible claims was approximately $20.7 million, $7.7 million and $12.5 million for the years ended December 31, 2018, 2017 and 2016, respectively.

The Company's reserves for professional liability claims are based upon quarterly and/or semi-annual actuarial calculations. The Company's reserves for employee workers' compensation claims are based upon semi-annual actuarial calculations. These reserve calculations consider historical claims data, demographic considerations, severity factors and other actuarial assumptions, which are discounted to present value. The Company's reserves for self-insured claims have been discounted to their present value using a discount rate of 1.8% at December 31, 2018 and in a range of 1.4% to 2.4% at December 31, 2017 and 0.9% to 2.3% at December 31, 2016. The Company's management selects a discount rate by considering a risk-free interest rate that corresponds to the period when the self-insured claims are incurred and projected to be paid.

Professional and general liability claims are typically resolved over an extended period of time, often as long as five years or more, while workers' compensation claims are typically resolved in one to two years. Accordingly, the Company's reserves for self-insured claims, comprised of estimated indemnity and expense payments related to reported events and incurred but not reported events as of the end of the period, include both a current and long-term component. The current portion of the Company's reserves for self-insured claims is included under the caption "Other current liabilities" and the long-term portion is included under the caption "Long-term portion of reserves for self-insurance claims" in the accompanying consolidated balance sheets.

The following table provides information regarding the classification of the Company's reserves for self-insured claims at December 31, 2018 and 2017 (in millions):

	2018	2017
Current portion	$ 70.7	$ 14.1
Long-term portion	194.0	50.9
	$ 264.7	$ 65.0

The following table presents the changes in our reserves for self-insured claims for the years ended December 31, 2018 and 2017 (in millions):

	2018	2017
Reserve at the beginning of the period	$ 65.0	$ 64.5
Liabilities assumed in LifePoint/RCCH Merger	194.7	-
Increase for the provision of current year claims	23.0	19.8
Decrease for the provision of prior year claims	(3.9)	(12.1)
Payments related to current year claims	(1.0)	(0.8)
Payments related to prior year claims	(14.8)	(10.0)
Provision for the change in discount rate	1.6	-
Noncash change in reserve for claims in excess of self-insured retention levels	0.1	3.6
Reserve at the end of the period	$ 264.7	$ 65.0

The combination of changing conditions and the extended time required for claim resolution results in a loss estimation process that requires actuarial skill and the application of judgment, and such estimates require periodic revision. As a result of the variety of factors that must be considered, there is a risk that actual incurred losses may develop differently from estimates. The results of the Company's quarterly and semi-annual actuarial calculations resulted in changes to its reserves for self-insured claims for prior years. As a result, for the years ended December 31, 2018, 2017 and 2016, the Company's related self-insured claims expense decreased by $3.9 million, $12.1 million and $4.5 million, respectively.

Point of Life Indemnity, Ltd.

The Company operates, with approval from the Cayman Islands Monetary Authority, a captive insurance company under the name Point of Life Indemnity, Ltd. Through this wholly-owned subsidiary of the Company, the captive insurance company issues malpractice insurance policies to certain of the Company's employed physicians and contracted physicians in addition to providing workers' compensation deductible coverage. Fees charged to these employed physicians and contracted physicians are eliminated in consolidation. Reserves for the Company's estimate of the related outstanding claims, including incurred but not reported losses, are actuarially determined and are included as a component of the Company's reserves for professional liability self-insurance claims.

Self-Insured Medical Benefits

The Company is self-insured for substantially all of the medical expenses and benefits of its employees. The reserve for medical benefits primarily reflects the current estimate of incurred but not reported losses based upon an annual actuarial calculation as of the balance sheet date. The undiscounted reserve for self-insured medical benefits was $46.1 million and $7.1 million at December 31, 2018 and 2017, respectively, and is included in the Company's accompanying consolidated balance sheets under the caption "Other current liabilities".

Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling interests represent the portion of equity in a subsidiary not attributable, directly or indirectly, to the Company. The Company's accompanying consolidated financial statements include all assets, liabilities, revenues, and expenses at their consolidated amounts, which include the amounts attributable to the Company and the noncontrolling interest. The Company recognizes as a separate component of earnings that portion of income or loss attributable to noncontrolling interests based on the portion of the entity not owned by the Company. Refer to Note 10 for further discussion of the Company's noncontrolling interests and redeemable noncontrolling interests.

Variable Interest Entities

The Company's consolidated financial statements at December 31, 2018 include eight facilities that qualify as a variable interest entity in which the Company is the primary beneficiary under the provisions of ASC 810, "Consolidation," and in which the Company owns a controlling economic interest.

Stock-Based Compensation

The Company's indirect parent, DSB Parent L.P., a Delaware limited partnership ("DSB Parent"), has issued profits units (the "Units") to certain employees, directors and consultants under the terms and conditions of the Amended and Restated Limited Partnership Agreement of DSB Parent dated of December 3, 2015 (the "DSB Parent Partnership Agreement") and forms of award agreements. The Company accounted for these stock-based awards in accordance with the provisions of ASC 718, "Compensation – Stock Compensation" ("ASC 718"). In accordance with ASC 718, the Company recognized compensation expense based on the estimated grant date fair value of each stock-based award. The Company recognizes forfeitures of Units as they occur. Refer to Note 14 for further discussion of the Company's accounting for Units.

Defined Benefit Pension Plans

In connection with the LifePoint/RCCH Merger, the Company acquired certain assets and assumed certain liabilities associated with two separate defined benefit pension plans covering certain employees at two of Legacy LifePoint's facilities. The Company accounts for its defined benefit pension plans in accordance with ASC 715, "Compensation – Defined Benefit Plans", ("ASC 715"). In accordance with ASC 715, the Company recognizes the unfunded liability of its defined benefit pension plans in the Company's consolidated balance sheets and unrecognized gains (losses) and prior service credits (costs) as changes in other comprehensive income (loss). The measurement date of the defined benefit pension plans' assets and liabilities coincides with the Company's year-end. The Company's pension benefit obligation is measured using actuarial calculations that incorporate discount rates, rate of compensation increases, when applicable, expected long-term returns on plan assets and consider expected age of retirement and mortality. Refer to Note 12 for further discussion of the Company's defined benefit pension plans.

Defined Contribution Plans

The Company maintains three separate defined contribution retirement plans covering a majority of the Company's employees, including Legacy LifePoint employees, RCCH employees and employees at Community Medical Center. These defined contribution retirement plans contain discretionary matching policies based on the Company's financial performance and definite contribution formulas for employees at certain facilities. Refer to Note 12 for further discussion of the Company's defined contribution plans.

Reclassifications

Certain reclassifications have been made to the prior years to conform to current year presentation. These reclassifications had no effect on net loss or cash flows as previously reported.

Accounting Standards Not Yet Adopted

Accounting Standards Update ("ASU") 2014-9, "Revenue from Contracts with Customers"

In May 2014, the FASB issued ASU 2014-9, "Revenue from Contracts with Customers", along with subsequent amendments, updates and an extension of the effective date (collectively, the "New Revenue Standard"), which supersedes most existing revenue recognition guidance, including industry-specific healthcare guidance. The New Revenue Standard provides for a single comprehensive principles-based standard for the recognition of revenue across all industries through the application of the following five-step process:

Step 1: Identify the contract(s) with a customer.
Step 2: Identify the performance obligations in the contract.
Step 3: Determine the transaction price.
Step 4: Allocate the transaction price to the performance obligations in the contract.
Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

This five-step process will require significant management judgment in addition to changing the way many companies recognize revenue in their financial statements. Additionally, and among other provisions, the New Revenue Standard requires expanded quantitative and qualitative disclosures, including disclosure about the nature, amount, timing and uncertainty of revenue.

The provisions of the New Revenue Standard are effective for annual reporting periods beginning after December 15, 2018 by applying either the full retrospective method or the cumulative catch-up transition method. The full retrospective method requires application of the provisions of the New Revenue Standard for all periods presented while the cumulative catch-up transition method requires the application of the provisions of the New Revenue Standard as of the date of adoption with the cumulative effect of the retrospective application of the provisions as an adjustment through retained earnings. Currently, the Company anticipates adopting the provisions of the New Revenue Standard using the full retrospective method.

The Company does not anticipate that the provisions of the New Revenue Standard will have an impact on its current or historical financial position, results of operations or cash flows. Additionally, the Company does not anticipate that the provisions of the New Revenue Standard will have an impact on the amount or timing of when it recognizes revenues prospectively. However, upon adoption of the New Revenue Standard, the Company will recognize the majority of its previously reported provision for doubtful accounts, primarily related to its self-pay patient population, as a direct reduction to revenues as an implicit pricing concession, instead of separately as a discrete deduction to arrive at revenues, and the related presentation of the allowance for doubtful accounts will be eliminated for all periods presented.

ASU 2016-2, "Leases"

In February 2016, the FASB issued ASU 2016-2 "Leases" ("ASU 2016-2"). ASU 2016-2 requires the rights and obligations arising from lease contracts, including existing and new arrangements, to be recognized as assets and liabilities on the balance sheet. ASU 2016-2 is effective for annual reporting periods beginning after December 15, 2019. The Company anticipates that the adoption of ASU 2016-2 will result in an increase in both total assets and total liabilities reflected on the Company's balance sheets. The Company is still evaluating the impact that the adoption of this standard will have on its policies, procedures, financial disclosures, and control framework.

Note 2. Mergers

LifePoint/RCCH Merger

Summary

On July 22, 2018, RCCH, Legend Merger Sub and Legacy LifePoint entered into an agreement and plan of merger, pursuant to which, effective November 16, 2018, Legend Merger Sub merged with and into Legacy LifePoint, with Legacy LifePoint surviving the merger as a wholly-owned subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc."

Equity Contribution

In connection with the LifePoint/RCCH Merger, the Apollo Funds, together with certain other co-investors investing through a co-investment vehicle controlled by our Sponsor or its affiliates, indirectly contributed $1,000.0 million of newly invested capital to DSB Parent, which is our indirect parent and is owned by the Apollo Funds, such co-investment vehicle and certain current or former directors, members of management, employees and consultants of the Company, and the $1,000.0 million of newly invested capital was further contributed to the Company to be used to partially fund the LifePoint/RCCH Merger.

Financing Transactions

Concurrently with the closing of the LifePoint/RCCH Merger, the Company (1) issued $1,425.0 million principal amount of 9.750% Senior Notes due 2026 (the "9.75% Unsecured Notes"), (2) entered into a new senior secured asset-based revolving credit facility (the "ABL Facility") in an aggregate principal amount of $800.0 million with a maturity of five years, (3) terminated its existing senior secured asset-based revolving credit facility, entered into on April 29, 2016 (the "Prior ABL Facility"), (4) entered into a senior secured term loan credit facility (the "Term Loan Facility") in an aggregate principal amount of $3,550.0 million with a maturity of seven years, and (4) repaid in full its $150.0 million term loan facility, entered into on April 25, 2018 (the "Prior Term Facility").

The Company has accounted for the LifePoint/RCCH Merger in accordance with ASC 805 under the acquisition method of accounting. The following table summarizes the fair values of assets acquired and liabilities assumed on a preliminary basis in connection with the LifePoint/RCCH Merger (in millions):

Cash	$	139.8
Accounts receivable		778.8
Other current assets		479.2
Property and equipment		3,117.3
Goodwill		1,950.1
Intangible assets		60.3
Other long-term assets		240.0
Accounts payable		(185.3)
Accrued salaries		(407.8)
Other current liabilities		(266.0)
Capital and financing leases		(136.1)
Other long-term liabilities		(235.1)
Noncontrolling interests and redeemable noncontrolling interests		(105.6)
Net assets acquired	$	5,429.6

The fair values assigned to certain assets acquired and liabilities assumed in relation to the LifePoint/RCCH Merger have been prepared on a preliminary basis with information currently available and are subject to change. Specifically, the Company is further assessing the valuation of property and equipment, goodwill, intangible assets, equity method investments, noncontrolling interests and redeemable noncontrolling interests, as well as deferred income taxes. The Company expects to finalize its analysis during 2019.

The results of operations of Legacy LifePoint are included in the Company's results of operations beginning on November 17, 2018. Revenues from the operations acquired in the LifePoint/RCCH Merger included in the Company's consolidated statements of operations were $754.9 million for the year ended December 31, 2018. Income before income taxes from the operations acquired in the LifePoint/RCCH Merger was $50.9 million for the year ended December 31, 2018.

For the year ended December 31, 2018, the Company recognized merger-related costs of $134.7 million primarily related to legal and transaction advisory services as well as employee severance and retention costs in connection with the LifePoint/RCCH Merger. Included in this amount is a $55.0 million transaction fee paid by the Company to an affiliate of its Sponsor upon the closing of the LifePoint/RCCH Merger.

RegionalCare/Capella Merger

On March 21, 2016, RegionalCare and Capella entered into an agreement and plan of merger, pursuant to which, effective on April 29, 2016, Crimson Merger Sub merged with and into Capella, with Capella continuing as the surviving company in the merger as a wholly-owned subsidiary of RegionalCare. After the RegionalCare/Capella Merger was consummated we began to do business as RCCH HealthCare Partners. Concurrently with the closing of the RegionalCare/Capella Merger, the Company (i) issued the 8.25% Secured Notes due 2023 in an aggregate principal amount of $800.0 million (the "8.25% Secured Notes") and the 11.5% Unsecured Notes due 2024 an aggregate principal amount of $350.0 million (the "11.5% Unsecured Notes") (ii) entered into the Prior ABL Facility and (iii) refinanced certain indebtedness of DSB Holdings Inc., a Delaware corporation and wholly-owned subsidiary of DSB Parent ("DSB Holdings"), RegionalCare and Capella.

The Company accounted for the RegionalCare/Capella Merger in accordance with ASC 805 under the acquisition method of accounting. The following table summarizes the fair values of assets acquired and liabilities assumed in connection with the RegionalCare/Capella Merger (in millions):

Cash	$	16.5
Accounts receivable		116.4
Other current assets		75.6
Property and equipment		397.3
Goodwill		367.0
Other long-term assets		17.1
Accounts payable		(32.6)
Accrued salaries		(27.4)
Other current liabilities		(27.1)
Financing leases		(177.6)
Other long-term liabilities		(32.2)
Redeemable noncontrolling interests		(21.1)
Net assets acquired		671.9
Cash contributed to parent by Capella management		(3.4)
Total merger consideration	$	668.5

The results of operations of Capella are included in the Company's results of operations beginning on May 1, 2016. Revenues from the operations acquired in the RegionalCare/Capella Merger included in the Company's consolidated statements of operations were $578.1 million for the year ended December 31, 2016. Income before income taxes from the operations acquired in the RegionalCare/Capella Merger was $42.8 million for the year ended December 31, 2016.

For the year ended December 31, 2016, the Company recognized merger-related costs of $21.7 million primarily related to legal and transaction advisory services and employee severance costs in connection with the RegionalCare/Capella Merger.

Note 3. Acquisitions & Divestitures

Acquisitions

Lourdes Health ("Lourdes")

At the close of business on August 31, 2018, the Company acquired Lourdes for $21.3 million, of which $17.5 million was financed from a sale-leaseback transaction with an affiliate of Medical Properties Trust ("MPT"), a Maryland corporation operating as a real estate investment trust. Lourdes is comprised of a 95 bed medical center and a 32 bed counseling center each located in Pasco, Washington. The results of operations of Lourdes are included in the Company's results of operations beginning on September 1, 2018.

Trios Health ("Trios")

At the close of business on August 3, 2018, the Company acquired Trios for $18.0 million. Trios is comprised of two hospital campuses with a total of 111 beds each located in Kennewick, Washington. In connection with the Trios acquisition, the Company entered into a sale-leaseback arrangement for a hospital building whose rent is contingent on the financial performance of the hospital and a sale-leaseback arrangement for a medical office building. The results of operations of Trios are included in the Company's results of operations beginning on August 4, 2018. The fair values assigned to certain assets acquired and liabilities assumed in relation to the Company's acquisition of Trios have been prepared on a preliminary basis with information currently available and are subject to change. Specifically, the Company is further assessing the valuation of certain tangible and intangible assets acquired as well as obligations assumed. The Company expects to finalize its analysis during 2019.

Pacific Medical Data Solutions ("PMDS")

Effective April 1, 2018, the Company acquired PMDS for $10.7 million. PMDS is a healthcare technology and software services company that provides revenue cycle, billing automation and software solutions to multi-specialty physician groups, ambulatory surgery centers and urgent care clinics.

St. Joseph Regional Medical Center ("St. Joseph")

At the close of business on April 30, 2017, the Company acquired St. Joseph, a 145 bed hospital in Lewiston, Idaho, for $112.2 million of which $87.5 million was financed from a sale-leaseback transaction with MPT. The results of operations of St. Joseph are included in the Company's results of operations beginning on May 1, 2017.

Saline Memorial Hospital ("Saline")

Effective June 30, 2016, the Company acquired a controlling interest in Saline County Medical Center Joint Venture, LLC, ("Saline") which owns and operates a 177 bed hospital in Benton, Arkansas for $16.6 million. The results of operations of Saline are included in the Company's results of operations beginning on July 1, 2016.

Divestitures

Teche Regional Medical Center ("Teche")

In August 2018, Legacy LifePoint and certain of its subsidiaries entered into a proposed settlement agreement with The Hospital Service District No. 2 of the Parish of St. Mary ("HSD"), a political subdivision of the state of Louisiana, outlining the terms of a definitive settlement agreement to terminate the Legacy LifePoint's lease of Teche, located in Morgan City, Louisiana. The proposed settlement agreement provides, among other things, that the Company will convey to HSD, or its designee, all assets of Teche in accordance with the existing lease agreement, and the Company will no longer operate Teche upon completion of the transaction. The Company anticipates this transaction to be completed during the second quarter of 2019 subject to the terms and conditions of a definitive settlement agreement. Included in the Company's consolidated results of operations for the year ended December 31, 2018 is a net operating loss before income taxes attributable to Teche of $0.6 million.

Sharon Hospital ("Sharon")

The Company sold Sharon Hospital, located in Sharon, Connecticut on August 1, 2017 for $3.6 million. The Company recorded an estimated impairment of long-lived assets of $11.6 million during the year ended December 31, 2016, in order to reduce the carrying value of Sharon's property and equipment to its estimated fair value. The Company subsequently recorded a loss on sale of $2.8 million during the year ended December 31, 2017 as the divestiture was finalized. Included in the Company's consolidated results of operations for the year ended December 31, 2017 and 2016 are net operating losses before income taxes attributable to Sharon of $2.1 million and $1.6 million, respectively.

EaStar Health System ("EaStar")

On March 31, 2017, the Company sold EaStar Health System, located in Muskogee, Oklahoma. The total sales price was $89.3 million, plus certain working capital items and sales taxes. Of the proceeds, $68.5 million were paid to MPT to pay off the financing lease obligation and the related prepayment penalty. The remainder of the proceeds of $20.8 million were paid directly to the Company's parent. Included in the Company's consolidated results of operations for the year ended December 31, 2017 and 2016 are net operating losses before income taxes attributable to EaStar of $8.9 million and $1.4 million, respectively.

Note 4. Long-Term Debt

The Company's long-term debt, including current portions and financing and capital leases, consists of the following at December 31, 2018 and 2017 (in millions):

	2018	2017
Senior borrowings:		
ABL Facility	$ 20.0	$ -
Prior ABL Facility	-	10.0
Term Loan Facility	3,550.0	-
9.75% Unsecured Notes	1,425.0	-
8.25% Secured Notes	800.0	800.0
11.5% Unsecured Notes	350.0	350.0
Financing and capital leases	557.2	265.0
Secured loan from affiliate	-	37.6
Unamortized debt issuance costs	(227.4)	(32.9)
	6,474.8	1,429.7
Subordinated borrowings, net	3.0	4.3
Total debt	$ 6,477.8	$ 1,434.0

Maturities of the Company's long-term debt outstanding at December 31, 2018, including financing and capital leases, but excluding unamortized debt issuance costs and other obligations that do not require eventual settlement in cash, are as follows for the years indicated (in millions):

2019	$ 58.4
2020	48.2
2021	50.4
2022	116.7
2023	847.5
Thereafter	5,533.1
	$ 6,654.3

ABL Facility

General

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, the Co-Borrowers entered into the ABL Facility in an aggregate principal amount of $800.0 million and terminated its Prior ABL Facility. The ABL Facility has a maturity of five years; provided that if more than $200.0 million aggregate principal amount of the 8.25% Secured Notes remain outstanding 91 days before the stated maturity thereof (the "ABL Springing Maturity Date"), then the ABL Facility will mature and the commitments ABL Facility will terminate on the ABL Springing Maturity Date. At the Effective Time, Legacy LifePoint assumed all of the rights and obligations of Legend Merger Sub under the ABL Facility. The ABL Facility also includes both a letter of credit sub-facility and a swingline loan sub-facility (including in its capacity as co-borrower under the Term Loan Facility). In addition, the Company may request one or more incremental revolving commitments in an aggregate principal amount up to the greater of (x) the greater of (i) $255.0 million and (ii) 0.23 times pro forma Adjusted EBITDA for the most recently available four fiscal quarter periods, and (y) the amount by which the borrowing base exceeds the aggregate commitments under the ABL Facility, subject to certain conditions and receipt of commitments by existing or additional lenders.

As of December 31, 2018, the Company had $20.0 million in borrowings outstanding under the ABL Facility and approximately $32.0 in letters of credit outstanding primarily related to the self-insured retention level of its general and professional liability insurance and workers' compensation programs as security for payment of claims. Amounts available for borrowing under the ABL Facility were approximately $548.0 million as of December 31, 2018.

Collateral and Guarantors

All obligations under the ABL Facility are unconditionally guaranteed by Holdings on a limited recourse basis and each of the existing and future direct and indirect material, wholly-owned domestic subsidiaries of the Co-Borrowers, subject to certain exceptions.

The obligations under the ABL Facility are secured by a pledge of the capital stock of the Co-Borrowers and substantially all of their assets and those of each subsidiary guarantor, including a pledge of the capital stock of all entities directly held by the Company (including Legacy LifePoint) and each subsidiary guarantor (which pledge is limited to 65% of the voting capital stock of first-tier foreign subsidiaries), in each case subject to certain exceptions. Such security interests consist of a first-priority lien with respect to the ABL Priority Collateral and a second-priority lien with respect to the Non-ABL Priority Collateral. Additionally, certain of the Company's restricted subsidiaries that are not guarantors will pledge certain of their assets (the "Credit Support Party Collateral") on a first-priority basis, as further security of the obligations under the ABL Facility. The Credit Support Party Collateral will secure only the obligations under the ABL Facility.

All borrowings under the ABL Facility are subject to the satisfaction of customary conditions, including the absence of a default and the accuracy of representations and warranties.

Interest Rates and Fees

Borrowings under the ABL Facility will bear interest at a rate equal to, at the Company's option, either (a) a LIBOR rate determined by reference to the costs of funds for Eurodollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs or (b) a base rate determined by reference to the highest of (i) the federal funds rate plus 0.50%, (ii) the prime rate of Citibank, N.A. and (iii) the one-month adjusted LIBOR plus 1.00%, in each case plus an initial applicable margin of 1.75% for LIBOR loans and 0.75% for base rate loans. The applicable margin for borrowings will be subject to step-downs based on average availability thresholds.

In addition to paying interest on outstanding principal under the ABL Facility, the Co-Borrowers will be required to pay a commitment fee under the ABL Facility in respect of the unutilized commitments under the ABL Facility at an initial rate equal to 0.375% per annum. The commitment fee may be subject to one step-down based on the average daily utilization under the ABL Facility. The Co-Borrowers will also be required to pay customary agency fees as well as letter of credit participation fees.

Restrictive Covenants and Other Matters

The ABL Facility contains certain customary affirmative covenants and events of default. The negative covenants in the ABL Facility include, among other things, limitations (none of which are absolute) on the Co-Borrowers and their subsidiaries' ability to incur additional debt or issue certain preferred shares, create liens on certain assets, make certain loans or investments (including acquisitions), pay dividends on or make distributions in respect of their capital stock or make other restricted payments, consolidate, merge, sell or otherwise dispose of all or substantially all of theirs and their restricted subsidiaries' assets, sell certain assets, enter into certain transactions with their affiliates, enter into sale-leaseback transactions, change their lines of business, restrict dividends from their subsidiaries or restrict liens, change their fiscal year; and modify the terms of certain debt.

The ABL Facility requires that the Co-Borrowers and its restricted subsidiaries maintain a minimum fixed charge coverage ratio at any time when availability is less than an agreed amount.

The ABL Facility contains certain customary events of default, including relating to a change of control. If an event of default occurs, the lenders under the ABL Facility are entitled to take various actions, including the acceleration of amounts due under the ABL Facility and all actions permitted to be taken by a secured creditor in respect of the collateral securing the ABL Facility.

Term Loan Facility

General

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, the Company and Legend Merger Sub (together, prior to the Effective Time, the "Co-Borrowers") entered into the Term Loan Facility in an aggregate principal amount of $3,550.0 million and repaid in full its Prior Term Facility. The Term Loan Facility has a maturity of seven years; provided that if more than $150.0 million aggregate principal amount of the 11.5% Unsecured Notes remain outstanding 91 days before the stated maturity thereof (the "Term Springing Maturity Date"), then the Term Loan Facility will mature and the commitments under the Term Loan Facility will terminate on the Term Springing Maturity Date. At the Effective Time, Legacy LifePoint assumed all of the rights and obligations of Merger Sub under the Term Loan Facility (including in its capacity as a Co-Borrower under the Term Loan Facility). In addition, the Company may request one or more incremental commitments in an aggregate principal amount up to the sum of (x) the greater of (i) $800.0 million and (ii) 0.75 times pro forma Adjusted EBITDA for the most recently available four fiscal quarter periods, plus additional amounts subject to certain agreed leverage requirements, certain other conditions and receipt of commitments by existing or additional lenders.

The Term Loan Facility requires scheduled quarterly amortization payments on the term loans in an annual amount equal to 1.0% of the original principal amount of the term loans, with the balance to be paid at maturity.

Collateral and Guarantors

All obligations under the Term Loan Facility are unconditionally guaranteed by Holdings on a limited recourse basis and each of the existing and future direct and indirect material, wholly-owned domestic subsidiaries of the Co-Borrowers, subject to certain exceptions.

The obligations under the Term Loan Facility are secured by a pledge of the capital stock of the Company and substantially all of its assets and those of each subsidiary guarantor, including a pledge of the capital stock of all entities directly held by the Company (including Legacy LifePoint) and each subsidiary guarantor (which pledge is limited to 65% of the voting capital stock of first-tier foreign subsidiaries), in each case subject to certain exceptions. Such security interests consist of a first-priority lien with respect to the "Non-ABL Priority Collateral" (which generally includes most inventory and fixed assets, equity interests and intellectual property of the Co-Borrowers and the subsidiary guarantors) and a second-priority lien with respect to the "ABL Priority Collateral" (which generally includes most accounts receivable and certain related assets of the Co-Borrowers and the subsidiary guarantors).

Interest Rates

Borrowings under the Term Loan Facility will bear interest at a rate equal to, at the Company's option, either (a) a LIBOR rate determined by reference to the costs of funds for Eurodollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs or (b) a base rate determined by reference to the highest of (i) the federal funds rate plus 0.50%, (ii) the prime rate of Citibank, N.A. and (iii) the one-month adjusted LIBOR plus 1.00%, in each case plus an applicable margin of 4.50% for LIBOR loans and 3.50% for base rate loans.

Restrictive Covenants and Other Matters

The Term Loan Facility contains certain customary affirmative covenants and events of default. The negative covenants in the Term Loan Facility include, among other things, limitations (none of which are absolute) on the Co-Borrowers and their subsidiaries' ability to incur additional debt or issue certain preferred shares, create liens on certain assets, make certain loans or investments (including acquisitions), pay dividends on or make distributions in respect of their capital stock or make other restricted payments, consolidate, merge, sell or otherwise dispose of all or substantially all of theirs and their restricted subsidiaries' assets, sell certain assets, enter into certain transactions with their affiliates enter into sale-leaseback transactions, change their lines of business, restrict dividends from subsidiaries or restrict liens, change their fiscal year and modify the terms of certain debt or organizational agreements.

The Term Loan Facility contains certain customary events of default, including relating to a change of control. If an event of default occurs, the lenders under the Term Loan Facility are entitled to take various actions, including the acceleration of amounts due under the Term Loan Facility and all actions permitted to be taken by a secured creditor in respect of the collateral securing the Term Loan Facility.

9.75% Unsecured Notes

On November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, the Company issued $1,425.0 million aggregate principal amount of the 9.75% Unsecured Notes. The 9.75% Unsecured Notes will mature on December 1, 2026. Interest on the 9.75% Unsecured Notes will accrue at 9.750% per annum and will be paid semi-annually, in arrears, on June 1 and December 1 of each year, beginning June 1, 2019.

Prior to December 1, 2021, the Company may redeem the 9.75% Unsecured Notes at its option, in whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the 9.75% Unsecured Notes redeemed, plus a "make-whole" premium and accrued and unpaid interest, if any. Additionally, prior to December 1, 2021, the Company may redeem in the aggregate up to 40% of the aggregate principal amount of the 9.75% Unsecured Notes in an aggregate amount not to exceed the amount of net cash proceeds of one or more equity offerings at a redemption price equal to 109.750%, plus accrued and unpaid interest, if any, so long as at least 50% of the original aggregate principal amount of the 9.75% Unsecured Notes must remain outstanding after each such redemption. On or after December 1, 2021, the Company may redeem the 9.75% Unsecured Notes at its option, in whole at any time or in part from time to time, at the redemption prices set forth in indenture governing the 9.75% Unsecured Notes (the "9.75% Unsecured Notes Indenture").

The Company's obligations under the 9.75% Unsecured Notes are fully and unconditionally guaranteed by each of the Company's wholly-owned domestic restricted subsidiaries that guarantees the Term Loan Facility. The 9.75% Unsecured Notes and the related guarantees are unsecured obligations of the Issuers and the subsidiary guarantors.

The 9.75% Unsecured Notes Indenture, among other things, limits the Company's ability and the ability of its restricted subsidiaries to, among other things: (i) incur or guarantee additional indebtedness; (ii) pay dividends or distributions on, or redeem or repurchase, capital stock and make other restricted payments; (iii) make certain investments; (iv) consummate certain asset sales; (v) engage in certain transactions with affiliates; (vi) grant or assume certain liens; and (vii) consolidate, merge or transfer all or substantially all of their assets. These covenants are subject to a number of important qualifications and exceptions. Additionally, upon the occurrence of specified change of control events, the Company must offer to repurchase the 9.75% Unsecured Notes at 101% of the principal amount, plus accrued and unpaid interest, if any, to, but not including, the purchase date. The 9.75% Unsecured Notes Indenture also provides for customary events of default.

8.25% Secured Notes

On April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, the Company issued $800.0 million aggregate principal amount of 8.25% Secured Notes. The 8.25% Secured Notes are senior obligations of the Company which mature on May 1, 2023 and bear interest at a rate of 8.25% per annum, payable semiannually on May 1 and November 1 of each year.

Prior to May 1, 2019, the Company may redeem the Secured Notes at its option, in whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the notes redeemed plus an applicable "make-whole" premium and accrued and unpaid interest, if any. Additionally, prior to May 1, 2019, the Company may redeem up to 40% of the aggregate principal amount of the 8.25% Secured Notes in an amount equal to the net proceeds of one or more equity offerings at a price equal to 108.25% of the principal amount thereof, plus accrued and unpaid interest, so long as at least 50% of the 8.25% Secured Notes remain outstanding. On or after May 1, 2019, the Company may redeem the 8.25% Secured Notes at its option, in whole at any time or in part from time to time, at redemption prices set forth in the indenture governing the 8.25% Secured Notes.

The Company's obligations under the 8.25% Secured Notes are fully and unconditionally guaranteed, jointly and severally, by the Company's present and future direct and indirect wholly-owned material domestic subsidiaries that guarantee the Term Loan Facility. The 8.25% Secured Notes are secured by first priority security interests in the Non-ABL Priority Collateral and a second priority security interests in the ABL Priority Collateral.

The indenture governing the 8.25% Secured Notes contains restrictive covenants that are substantially the same as those in the 9.75% Unsecured Notes Indenture.

11.5% Senior Unsecured Notes

Effective April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, the Company issued $350.0 million aggregate principal amount of 11.5% Unsecured Notes in a private offering. The 11.5% Unsecured Notes mature on May 1, 2024 and bear interest at a rate of 11.5% per annum, payable semi-annually on May 1 and November 1 of each year.

Prior to May 1, 2019, the Company may redeem some or all of the 11.5% Unsecured Notes at a redemption price equal to 100% of the principal amount of the 11.5% Unsecured Notes, plus accrued and unpaid interest, and the applicable "make-whole" premium and accrued and unpaid interest, if any. Additionally, prior to May 1, 2019, the Company may redeem up to 40% of the aggregate principal amount of the 11.5% Unsecured Notes in an amount equal to the net proceeds of one or more equity offerings at a price equal to 111.5% of the principal amount thereof, plus accrued and unpaid interest, so long as at least 50% of the 11.5% Unsecured Notes remain outstanding. On or after May 1, 2019, the Company may redeem the 11.5% Unsecured Notes at its option, in whole at any time or in part from time to time, at the redemption prices set forth in the indenture governing the 11.5% Unsecured Notes.

The Company's obligations under the 11.5% Unsecured Notes are fully and unconditionally guaranteed, jointly and severally, by the Company's present and future direct and indirect wholly-owned material domestic subsidiaries that guarantee the Term Loan Facility.

The indenture governing the 11.5% Unsecured Notes contains restrictive covenants that are substantially the same as those in the 9.75% Unsecured Notes Indenture.

Financing and Capital Leases

Refer to Note 8 for further discussion of the Company's financing and capital leases.

Secured loan from Affiliate

On October 31, 2017, the Company received $37.6 million from an affiliate in connection with an agreement for the sale and assignment of the accounts receivable of St. Joseph. The transaction did not qualify as a true sale of accounts receivable pursuant to ASC 860, "Transfers and Servicing of Financials Assets." Accordingly, the transaction was accounted for as a secured borrowing. On June 18, 2018, the loan was repaid in full.

Interest Rate Swap Agreement

On December 21, 2018, the Company entered into an interest rate swap agreement with Citibank, N.A. as counterparty (the "Interest Rate Swap") whereby the Company pays a fixed rate of 2.63% on a notional amount of $1,100.0 million and receives one-month LIBOR. The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. Refer to Note 11 for additional information regarding the Company's accounting for its Interest Rate Swap.

Debt Transaction Costs

In connection with the issuance of the Term Loan Facility, the ABL Facility and the 9.75% Unsecured Notes, the Company capitalized $201.7 million of new debt issuance costs associated with these new debt instruments, which are included as a reduction to "Long-term debt, net" on the Company's accompanying consolidated balance sheet. Additionally, during the year ended December 31, 2018, the Company wrote off $8.2 million of previously capitalized debt issuance costs in connection with the extinguishment of the Prior ABL Facility and Prior Term Facility, which is included under the caption "Other non-operating losses, net" in the accompanying consolidated statements of operations for the year ended December 31, 2018. For the years ended December 31, 2017 and 2016, the Company recorded losses on various debt refinancing activities of $4.3 million and $11.7 million, respectively, which are included under the caption "Other non-operating losses, net" in the accompanying consolidated statements of operations for the years ended December 31, 2017 and 2016.

Note 5. Goodwill and Intangible Assets

Goodwill

The following table presents the changes in the carrying amount of goodwill for the year ended December 31, 2018 (in millions):

Balance at December 31, 2017	$	651.5
LifePoint/RCCH Merger		1,950.1
Acquisitions		19.9
Impairments		(53.9)
Balance at December 31, 2018	$	2,567.6

The Company performed its annual goodwill impairment testing as of October 1, 2018. Based on the Company's updated financial projections for each reporting unit developed during the fourth quarter of 2018, the Company concluded that the carrying values of three of its facilities exceeded their estimated fair values. Accordingly, for the year ended December 31, 2018, the Company recorded non-cash impairment charges in the aggregate of $53.9 million. The results of the annual goodwill impairment testing for the year ended December 31, 2018 for the Company's other reporting units indicated varying degrees of excess estimated fair value over carrying value, ranging from approximately 1% to 102% of the respective carrying values, with an average of approximately 36%.

For the year ended December 31, 2017, the Company recorded a non-cash impairment charge of $14.1 million equal to the excess carrying value of one of its facilities as compared to its fair value. There were no impairments of goodwill for the year ended December 31, 2016.

Intangible Assets

The following table provides information regarding the Company's intangible assets, included in the accompanying consolidated balance sheets as of December 31, 2018 and 2017 (in millions):

	2018	2017
Amortizable intangible assets:		
Contract-based physician minimum revenue guarantees		
Gross carrying amount	$ 34.0	$ 14.7
Accumulated amortization	(7.1)	(7.4)
Net total	26.9	7.3
Non-competition agreements and other		
Gross carrying amount	4.5	-
Accumulated amortization	(0.5)	-
Net total	4.0	-
Total amortizable intangible assets		
Gross carrying amount	38.5	14.7
Accumulated amortization	(7.6)	(7.4)
Net total	30.9	7.3
Indefinite-lived intangible assets:		
Certificates of need and certificates of need exemptions	31.0	-
Licenses, provider numbers, accreditations and other	12.6	-
Net total	43.6	-
Total intangible assets:		
Gross carrying amount	82.1	14.7
Accumulated amortization	(7.6)	(7.4)
Net total	$ 74.5	$ 7.3

Contract-Based Physician Minimum Revenue Guarantees

The Company has committed to provide certain financial assistance pursuant to recruiting agreements, or "physician minimum revenue guarantees," with various physicians practicing in the communities it serves. In consideration for a physician relocating to one of its communities and agreeing to engage in private practice for the benefit of the respective community, the Company may advance certain amounts of money to a physician to assist in establishing his or her practice.

The Company accounts for its physician minimum revenue guarantees in accordance with the provisions of ASC 460, "Guarantees" ("ASC 460"). In accordance with ASC 460, the Company records a contract-based intangible asset and a related guarantee liability for new physician minimum revenue guarantees. The contract-based intangible asset is amortized as a component of other operating expenses, in the accompanying consolidated statements of income, over the period of the physician contract, which typically ranges from four to five years. As of December 31, 2018 and 2017, the Company's liability for contract-based physician minimum revenue guarantees was $12.6 million and $2.3 million, respectively. These amounts are included as a current liability under the caption "Other current liabilities" in the Company's accompanying consolidated balance sheets.

Non-Competition Agreements

The Company has entered into non-competition agreements with certain physicians and other individuals which are amortized on a straight-line basis over the term of the agreements.

Certificates of Need and Certificates of Need Exemptions

The construction of new facilities, the acquisition or expansion of existing facilities and the addition of new services and certain equipment at the Company's facilities may be subject to state laws that require prior approval by state regulatory agencies. These certificate of need laws generally require that a state agency determine the public need and give approval prior to the construction or acquisition of facilities or the addition of new services. The Company has acquired facilities in certain states that have adopted certificate of need laws. The Company has determined that these intangible assets have an indefinite useful life.

Licenses, Provider Numbers, Accreditations and Other

To operate hospitals, the Company must obtain certain licenses, provider numbers and accreditations from federal, state and other accrediting agencies. The Company has acquired facilities in certain jurisdictions that require licenses, provider numbers and accreditations. The Company has determined that these intangible assets have an indefinite useful life.

Amortization Expense

Amortization expense for the Company's intangible assets, including physician minimum revenue guarantee expense in accordance with ASC 460, during the years ended December 31, 2018, 2017 and 2016 was $4.7 million, $3.6 million and $3.5 million, respectively.

Total estimated amortization expense for the Company's intangible assets during the next five years are as follows (in millions):

2019	$	12.5
2020		9.1
2021		5.9
2022		2.7
2023		0.6
Thereafter		0.1
	$	30.9

Note 6. Income Taxes

The provision for (benefit from) income taxes for the years ended December 31, 2018, 2017 and 2016 consisted of the following (in millions):

	2018	2017	2016
Current:			
Federal	$ -	$ -	$ -
State	1.3	0.4	0.3
	1.3	0.4	0.3
Deferred:			
Federal	(27.1)	37.7	17.7
State	(10.0)	(4.4)	3.6
	(37.1)	33.3	21.3
Change in valuation allowance	36.0	(35.0)	(17.6)
Total	$ 0.2	$ (1.3)	$ 4.0

The Tax Cuts and Jobs Act (the "Tax Act") was signed into law on December 22, 2017. The Tax Act significantly revised the U.S. corporate income tax laws. The Company is most notably impacted by the reduction of the U.S. corporate tax rate from 35% to 21% for tax years after December 31, 2017 and limiting certain deductions such as interest expense and net operating loss carryforwards. The Tax Act also enhanced and extended through 2026 the option to claim accelerated depreciation deductions on qualified property. Due to the timing of the enactment and the complexity involved with applying the provisions of the Tax Act, the Company had not completed its determination of the accounting implications of the Tax Act on its income tax accruals for the year ended December 31, 2017. However, the Company reasonably estimated the effects of the Tax Act on its existing deferred tax assets and liabilities and recognized a provisional expense for income taxes of $57.7 million for the year ended December 31, 2017. The Company completed its analysis during the year ended December 31, 2018 and determined that no additional adjustment was needed to the $57.7 million provisional expense recorded for the year ended December 31, 2017.

The following table reconciles the differences between the statutory federal income tax rate to the Company's effective tax rate on net loss from continuing operations before income taxes and including net income attributable to noncontrolling interests and redeemable noncontrolling interests for the years ended December 31, 2018, 2017 and 2016 (in millions):

	2018	2017	2016
Federal statutory rate	21.0 %	35.0 %	35.0 %
State income taxes, net of federal income tax benefits	2.2	23.2	(1.6)
Change in valuation allowance	(12.5)	99.6	(38.1)
Provisional expense resulting from the Tax Act	-	(146.6)	-
Tax effect of impairment on goodwill	(2.3)	(12.5)	-
Noncontrolling interests and redeemable noncontrolling interests	0.4	6.4	2.6
Nondeductible acquisition costs	(6.6)	-	(6.3)
Nondeductible merger compensation costs	(1.6)	-	-
Other items	(0.7)	(1.9)	(2.3)
Effective income tax rate	(0.1) %	3.2 %	(10.7) %

Deferred income taxes result from temporary differences in the recognition of assets, liabilities, revenues and expenses for financial accounting and tax purposes. Sources of these differences and the related tax effects were as follows as of December 31, 2018 and 2017 (in millions):

	2018	2017
Deferred income tax liabilities:		
Depreciation and amortization	$ (137.7)	$ (21.7)
Deferred loan costs	(0.4)	(0.8)
Tax deductible goodwill	(11.2)	(11.4)
Debt discount	(0.1)	(0.2)
Equity investments	(32.6)	-
Other	(4.0)	(0.4)
Total deferred income tax liabilities	(186.0)	(34.5)
Deferred income tax assets:		
Provision for doubtful accounts	72.4	10.5
Employee compensation	50.5	5.8
Acquisition and start-up costs	10.2	4.1
Net operating loss carryforwards	195.8	113.9
Insurance reserves	64.4	11.4
Prepaid rent	18.5	2.1
Section 163(j) interest expense carryforward	31.7	-
Investment in Partnerships	-	9.6
Other	12.9	6.5
Total deferred income tax assets	456.4	163.9
Valuation allowance	(274.4)	(134.1)
Net deferred income tax assets	182.0	29.8
Deferred income taxes	$ (4.0)	$ (4.7)

Noncurrent deferred income tax liabilities totaled $4.0 million and $4.7 million at December 31, 2018 and 2017, respectively. As of December 31, 2018, the Company had federal net operating loss carryforwards of $342.4 million and state and local net operating loss carryforwards of approximately $2.5 billion. The federal net operating loss carryforwards generated prior to 2018 expire between 2028 and 2037. The federal net operating loss carryforwards generated in 2018 and forward have an indefinite carryforward period. The state net operating loss carryforwards will expire between 2019 and 2038. As of December 31, 2017, the Company had federal net operating loss carryforwards of $390.2 million and state and local net operating loss carryforwards of $779.0 million. The Company has established a valuation allowance for deferred tax assets at December 31, 2018 and 2017, due to the uncertainty of realizing these assets in the future. The valuation allowance increased $140.3 million during 2018, of which $103.2 million of the increase was a result of the LifePoint/RCCH Merger. The valuation allowance decreased $9.0 million during 2017.

No federal income tax payments were made during the years ended December 31, 2018, 2017 or 2016. State and local income tax payments in the amount of $2.4 million, $0.8 million, and $0.4 million were made during the years ended December 31, 2018, 2017 and 2016, respectively.

The Company’s policy is to accrue interest and penalties related to potential underpayment of income taxes within the provision for income taxes. Interest is computed on the difference between the Company’s uncertain tax benefit positions and the amount deducted or expected to be deducted in our income tax returns. As there were no unrecognized tax benefits at December 31, 2018 and 2017, the Company did not have any amounts accrued for interest and penalties.

The Company files a consolidated U.S. federal income tax return, as well as income tax returns in various state jurisdictions. All of the Company’s tax years are subject to examination by the Internal Revenue Service and various state taxing authorities.

Note 7. Other Current Liabilities

The following table provides information regarding the Company's other current liabilities, which are included in the accompanying consolidated balance sheets at December 31, 2018 and 2017 (in millions):

	2018	2017
Accrued interest	$ 68.9	$ 19.5
Current portion of self-insurance reserves	70.7	14.1
Self-insured medical benefits liabilities	46.1	7.1
Accrued property taxes	19.1	7.7
Accrued expenses and other	217.4	10.7
	$ 422.2	$ 59.1

Note 8. Leases

The Company leases real estate property and equipment under cancelable and non-cancelable leases. The leases expire at various times and have various renewal options. Certain leases that meet the lease capitalization criteria in accordance with ASC 840 have been recorded as an asset and liability at the lower of the net present value of the minimum lease payments at the inception of the lease or the fair value of the asset at the inception date. Interest rates used in computing the net present value of the lease payments are based on the Company's incremental borrowing rate at the inception of the lease. All of the lease agreements generally require the Company to pay maintenance, repairs, taxes and insurance costs. Rental expense of operating leases totaled $57.3 million, $44.0 million and $31.0 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Future minimum lease payments at December 31, 2018, for those leases having an initial or remaining noncancelable lease term in excess of one year, but excluding obligations that do not require eventual settlement in cash, are as follows for the years indicated (in millions):

	Operating Leases	Financing and Capital Leases	Total
2019	$ 55.9	$ 52.9	$ 108.8
2020	43.9	54.2	98.1
2021	34.7	57.6	92.3
2022	26.3	119.2	145.5
2023	21.2	48.5	69.7
Thereafter	92.4	833.8	926.2
	$ 274.4	$ 1,166.2	$ 1,440.6
Less: interest portion		(660.3)	
		$ 505.9	

Sale-Leaseback Transactions

The real estate associated with certain of the Company's facilities and its health support center are leased from various third party entities in connection with sale-leaseback transactions. Certain of these leasing arrangements contain various forms of continuing involvement and resultantly fail sale-leaseback accounting criteria in accordance with ASC 840-40, "Leases – Sale-Leaseback Transactions." Those leases with continuing involvement are accounted for as financing transactions. Additionally, for certain properties which satisfied the sale-leaseback accounting criteria, the sales proceeds received were in excess of the fair value of the properties leased. Accordingly, financing obligations have been recorded for such excess. At December 31, 2018, the Company has recorded $434.7 million of total financing obligations, including current portions, associated with sale-leaseback transactions in its accompanying consolidated balance sheet.

Properties failed sale-leaseback criteria due to several reasons, including fully prepaid arrangements with government authorities, the ability to share in the appreciation rights of the property, involvement in an ongoing build to suit construction project financed by a third party and more than minor subleasing arrangements. One property was previously accounted for as a financing lease due to an ongoing build to suit construction project which was completed during 2017, and the lease is now accounted for as an operating lease. At completion of the construction project, the Company reduced land and buildings by $62.4 million and reduced financing and capital leases by $59.3 million and recognized a loss of $3.9 million, which is included under the caption "Other non-operating losses, net" in the accompanying consolidated statements of operations for the year ended December 31, 2017.

Note 9. Investments

The Company accounts for its investments in entities in which the Company exhibits significant influence, but not control, under the equity method of accounting in accordance with ASC 323. The Company does not consolidate its equity method investments, but rather measures them at their initial costs and then subsequently adjusts their carrying values through income for their respective shares of the earnings or losses during the period. In connection with the LifePoint/RCCH Merger, the Company acquired equity method investments with an estimated fair value of $208.9 million. The Company's equity method investments totaled $231.9 million and $13.8 million at December 31, 2018 and 2017, respectively, and are included under the caption "Other long-term assets" in the accompanying consolidated balance sheets.

Note 10. Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling Interests

Noncontrolling interests represent the portion of equity in a subsidiary not attributable, directly or indirectly, to a parent. The Company's accompanying consolidated financial statements include all assets, liabilities, revenues and expenses at their consolidated amounts, which include the amounts attributable to the Company and the noncontrolling interest. The Company recognizes as a separate component of equity and earnings on the portion of income or loss attributable to noncontrolling interests based on the portion of the entity not owned by the Company.

The following table presents the changes in the Company's noncontrolling interests during the year ended December 31, 2018 (in millions):

Balance at December 31, 2017	$	-
Noncontrolling interests assumed in the LifePoint/RCCH Merger		29.9
Net income attributable to noncontrolling interests		0.2
Distributions		(0.2)
Balance at December 31, 2018	$	29.9

Redeemable Noncontrolling Interests

Certain of the Company's noncontrolling interests include redemption features that cause these interests not to meet the requirements for classification as equity in accordance with ASC 480-10-S99-3, "Distinguishing Liabilities from Equity." Redemption features related to these interests could require the Company to deliver cash, if exercised. Accordingly, these redeemable noncontrolling interests are classified in the mezzanine section of the Company's accompanying consolidated balance sheets under the caption "Redeemable noncontrolling interests." Changes in the fair value of the Company's redeemable noncontrolling interests are recognized as adjustments to consolidated stockholders' equity.

The following table presents the changes in the Company's redeemable noncontrolling interests during the year ended December 31, 2018 (in millions):

Balance at January 1, 2017	$	54.2
Net income attributable to redeemable noncontrolling interests		7.3
Fair value adjustments		3.1
Distributions		(3.9)
Balance at December 31, 2017		60.7
Redeemable noncontrolling interests assumed in LifePoint/RCCH Merger		75.7
Net income attributable to redeemable noncontrolling interests		5.5
Distributions, net of proceeds		(5.8)
Balance at December 31, 2018	$	136.1

Note 11. Fair Value of Financial Instruments

Fair Value Hierarchy

Fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, the Company utilizes the fair value hierarchy pursuant to ASC 820, "Fair Value Measurements and Disclosures" ("ASC 820") that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumption about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

The inputs used to measure fair value are classified into the following fair value hierarchy:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Level 3 includes values determined using pricing models, discounted cash flow methodologies, or similar techniques reflecting the Company's own assumptions.

In instances where the determination of the fair value hierarchy measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment of factors specific to the asset or liability.

Cash and Cash Equivalents, Accounts Receivable, Accounts Payable and Other Current Liabilities

The carrying amounts reported in the accompanying consolidated balance sheets for cash and cash equivalents, accounts receivable, accounts payable and other current liabilities approximate fair value because of the short-term nature of these instruments.

Long-Term Debt

The carrying amounts and fair values of the Company's ABL Facility, Prior ABL Facility, Term Loan Facility, 9.75% Unsecured Notes, 8.25% Secured Notes and 11.5% Unsecured Notes, excluding unamortized debt issuance costs, as of December 31, 2018 and December 31, 2017 were as follows (in millions):

	Carrying Amount		Fair Value	
	December 31, 2018	December 31, 2017	December 31, 2018	December 31, 2017
ABL Facility	$ 20.0	$ -	$ 20.0	$ -
Prior ABL Facility	$ -	$ 10.0	$ -	$ 10.0
Term Loan Facility	$ 3,550.0	$ -	$ 3,487.9	$ -
9.75% Unsecured Notes	$ 1,425.0	$ -	$ 1,353.8	$ -
8.25% Secured Notes	$ 800.0	$ 800.0	$ 808.0	$ 843.0
11.5% Unsecured Notes	$ 350.0	$ 350.0	$ 359.6	$ 350.0

The fair values of the Company's long-term debt instruments were estimated based on the average bid and ask price as determined using published rates and categorized as Level 2 within the fair value hierarchy in accordance with ASC 820.

Interest Rate Swap

The Company measures its Interest Rate Swap at fair value on a recurring basis. The fair value of the Company's Interest Rate Swap is based on quotes from its counterparty. The Company considers those inputs to be Level 2 in the fair value hierarchy. At December 31, 2018, the fair value of the Company's Interest Rate Swap was a total liability of $5.8 million, of which $0.7 million is included under the caption "Other current liabilities" and $5.1 million is included under the caption "Other long-term liabilities" in the Company's accompanying consolidated balance sheet.

The Company has not designated its Interest Rate Swap as a cash flow hedge in accordance with ASC 815, "Derivatives and Hedging." Accordingly, all changes in the fair value of the Company's Interest Rate Swap are recognized through interest expense in its results of operations. For the year ended December 31, 2018, the Company recognized additional interest expense of $5.8 million related to changes in the fair value of its Interest Rate Swap.

Changes in the fair value of the Company's Interest Rate Swap could result in a material effect on its consolidated results of operations and financial position; however, the Company does not anticipate that changes in the fair value of its Interest Rate Swap will have any impact on its cash flows. The counterparty to the Interest Rate Swap exposes the Company to credit risk in the event of nonperformance. However, the Company does not anticipate nonperformance by its counterparty. The Company does not hold or issue derivative financial instruments for trading purposes.

Financial Liabilities

The Company has a contingent consideration liability payable to the former owners of Canyon Vista that represents the Level 3 estimated fair value of the contingent consideration using unobservable inputs and assumptions available to the Company. The liability for Canyon Vista is recorded at an estimated fair value of approximately $13.6 million and $13.2 million at December 31, 2018 and 2017, respectively. The key assumptions used in estimating the fair value of the Canyon Vista liability are the range of probabilities that the payments will be earned by the seller and a discount rate adjusted for the Company's credit risk.

Note 12. Employee Benefit Plans

Defined Benefit Pension Plans

In connection with the LifePoint/RCCH Merger, the Company acquired certain assets and assumed certain liabilities associated with two separate defined benefit pension plans (i) associated with certain employees of Marquette General Hospital covered by a collective bargaining agreement (the "Marquette Pension Plan") and (ii) associated with certain non-union employees of Bell Hospital (the "Bell Pension Plan" and, collectively with the Marquette Pension Plan, the "Pension Plans"). Both Pension Plans are closed to new participants. Participants in the Marquette Pension Plan are required to make annual contributions totaling 6% of annual compensation to the Marquette Pension Plan to continue accruing benefits. Participants in the Bell Pension Plan no longer accrue benefits. The Company makes contributions to the Pension Plans sufficient to meet its minimum funding requirements as prescribed by the Employee Retirement Income Security Act of 1974, as amended.

Status and Expense

The following table presents the changes in the benefit obligations and plan assets of the Pension Plans during the year ended December 31, 2018 and the unfunded liability of the Pension Plans at December 31, 2018 (in millions):

Change in benefit obligation:	
Benefit obligation at beginning of year	$ -
Benefit obligations assumed in LifePoint/RCCH Merger	56.5
Service costs	0.1
Interest costs	0.3
Participant contributions	0.1
Actuarial loss	1.8
Benefits paid	(0.2)
Benefit obligation at end of year	58.6
Change in plan assets:	
Fair value of plan assets at beginning of year	-
Plan assets acquired in LifePoint/RCCH Merger	39.6
Actual return on plan assets	(1.0)
Participant contributions	0.1
Benefits and expenses paid	(0.2)
Fair value of plan assets at end of year	38.5
Unfunded liability included in other long-term liabilities in the Company's accompanying consolidated balance sheet	$ 20.1

The Company recognizes changes in the funded status of the Pension Plans as a direct increase or decrease to stockholders' equity through accumulated other comprehensive income (loss). For the year ended December 31, 2018, the Company recognized a comprehensive loss of $3.1 million as a decrease in stockholders' equity through accumulated other comprehensive loss. This adjustment was primarily related to changes in the Company's unfunded pension liability due to changes in the discount rates and mortality assumptions used to measure the projected benefit obligation.

The following table summarizes the projected benefit obligation, accumulated benefit obligation and fair value of plan assets related to the Pension Plans as of December 31, 2018 (in millions):

Projected benefit obligation	$ 58.6
Accumulated benefit obligation	$ 54.9
Fair value of plan assets	$ 38.5

The following table summarizes the weighted-average assumptions used by the Company to determine its benefit obligation as of December 31, 2018 (in millions):

Discount rate	4.1 %
Rate of compensation increases, when applicable	3.0 %

The following table summarizes the components of net periodic costs for the year ended December 31, 2018 (in millions):

Service cost	$ 0.1
Interest cost	0.3
Expected return on plan assets	(0.3)
Amortization of net actuarial loss	-
Total net periodic benefit cost	$ 0.1

The following table summarizes the weighted-average assumptions used by the Company to determine its net periodic benefit costs during the year ended December 31, 2018 (in millions):

Discount rate	4.2 %
Rate of compensation increases, when applicable	3.0 %
Expected long-term return on plan assets	5.8 %

Plan Assets

The investment policy for the Pension Plans has been formulated to achieve a risk adjusted return that balances the need for asset growth against the risk of significant fluctuations in asset prices and the need for significant contributions from the Company. On a quarterly basis, or more frequently as necessary, the current risk levels, asset performance and expected return on assets are reviewed and evaluated against goals and targets by a committee appointed to oversee investment of the Pension Plans' assets (the "Investment Committee"). The Investment Committee strives to maintain a balance between risk and return through the use of modern portfolio theory methods, in conjunction with Monte Carlo modeling to evaluate the behavior of the portfolio under different scenarios. At December 31, 2018, the Pension Plans' investments include a balance of mutual funds and money market funds in order to achieve an overall rate of return that minimizes the need for additional employer contributions. The Company measures the fair value of its Pension Plans' assets in accordance with ASC 820.

The Pension Plans' investments in mutual funds are valued at the net asset value ("NAV") of shares reported in the active market in which the funds are traded. Because quoted prices are available for mutual funds and the markets in which they are traded are generally considered active, the Company has classified each of them as a Level 1 investment. The Pension Plans' investments in money market funds are valued at quoted prices in markets that are not active by a combination of inputs, including but not limited to dealer quotes who are market makers in the underlying funds and other directly and indirectly observable inputs. Because the inputs used to value money market funds are either directly or indirectly observable, but are not quoted prices in active markets, the Company has classified these assets as Level 2 investments.

The following table summarizes the assets of the Pension Plans, measured at fair value as of December 31, 2018, by major asset category and aggregated by level within the fair value hierarchy (in millions):

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Mutual funds	$ 34.6	$ 34.6	$ -	$ -
Money market funds	3.9	-	3.9	-
Total	$ 38.5	$ 34.6	$ 3.9	$ -

The Company expects to contribute approximately $2.1 million to the Pension Plans during the year ended December 31, 2019. Additionally, the Company expects to make future benefit payments from the Pension Plans as follows for the years indicated (in millions):

2019	2.1
2020	2.3
2021	2.5
2022	2.6
2023	2.9
Five years thereafter	16.7
	$ 29.1

Multiemployer Pension Plan

In connection with the LifePoint/RCCH Merger, the Company assumed the obligation to contribute to a multiemployer pension plan on behalf of certain employees covered by collective bargaining agreements, in accordance with the terms of such collective bargaining agreements. The Company's contributions to the multiemployer pension plan are determined based on the terms of the applicable collective bargaining agreements. Multiemployer plans are different from single-employer plans because assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers. Also, if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers. If the Company stops participating in the multiemployer plan, the Company may be required to pay a withdrawal liability based on its portion of the unfunded status of the plan. Currently, the Company does not anticipate ending its participation in this plan.

Defined Contribution Plans

The Company maintains three separate defined contribution retirement plans covering a majority of the Company's employees, including Legacy LifePoint employees, RCCH employees and employees at Community Medical Center. These defined contribution plans contain discretionary matching policies based on the Company's financial performance and definite contribution formulas for employees at certain facilities. The Company's expense related to its defined contribution plans was $5.6 million, $3.1 million and $4.3 million for the years ended December 31, 2018, 2017 and 2016, respectively.

The Company maintains a supplemental deferred compensation plan ("the RCCH Deferred Compensation Plan"). As of December 31, 2018 and 2017, the deferred compensation liability was $10.8 million and $7.3 million, respectively. The Company did not make any matching contributions in 2018, 2017 and 2016.

In connection with the LifePoint/RCCH Merger, the Company assumed liabilities under the LifePoint Health Deferred Compensation Plan (the "LifePoint Deferred Compensation Plan") and acquired a rabbi trust holding assets equal to the present value of all liabilities under the LifePoint Deferred Compensation Plan as of the effective time of the LifePoint/RCCH Merger. The assets in the rabbi trust are subject to the claims of the Company's creditors in the event of the Company's insolvency but are otherwise only available to pay liabilities under the LifePoint Deferred Compensation Plan. As of December 31, 2018, the assets and liabilities associated with the LifePoint Deferred Compensation Plan were $23.7 million and $23.3 million, and are included under the captions "Other long-term assets" and "Other long-term liabilities", respectively, on the accompanying consolidated balance sheet at December 31, 2018.

Note 13. Stock-Based Compensation

DSB Parent is authorized to issue Units to employees, executives, consultants and directors of the Company, under the DSB Parent Partnership Agreement. The Company has determined that the Units are a substantive class of members' equity for accounting purposes because the Units are legal equity of DSB Parent, they have participation features, including distribution and liquidation rights which allow them to participate in the residual returns of the DSB Parent and vested interests are retained upon termination. As a result, these awards are accounted for under ASC 718.

There are 35,270,000 aggregate number of Units authorized for issuance. Service Units and Performance Units have been issued under the DSB Parent Partnership Agreement and forms of award agreements.

Service Units

Service Units have been granted to certain members of the board of directors and Tranche A Units to certain employees, executives and consultants. Units that have been granted to members of the board of directors vest on a time-basis only, either in three equal installments on each of the first three anniversaries of the grant date or on the date that is the earliest of (i) six months and one day following November 16, 2018 or (ii) the date of the applicable director's termination of service due to death, disability or as a result of the director's removal from the board of directors other than for cause. Tranche A Units granted to certain employees, executives and consultants vest in equal installments on the last day of each of the first twenty calendar quarters that commence on or after the grant date or, in some cases, November 16, 2018. Service Units will automatically vest upon the sale of the Company. In the event of an ("IPO"), all unvested Service Units will remain outstanding and continue to vest based on the stated vesting pattern. Unvested Service Units are forfeited upon a holder's termination of service.

Service Units are accounted for as equity awards and related compensation expense is recognized ratably over the vesting period. On November 16, 2018, Service Units originally issued to approximately 40 employees and executives were modified in connection with the LifePoint/RCCH Merger. For employees and executives granted Service Units prior to November 16, 2018 who are severed during the 18-month period following the LifePoint/RCCH Merger under certain circumstances, Tranche A Units vest in full upon the eligible employee's termination date. The Company calculated the fair value of the service units before and after the modification and recorded expense of $2.7 million related to the modification and acceleration of service units. Total stock compensation expense, including modification expense, for Service Units was $3.4 million and $0.7 million for 2018 and 2017, respectively. As of December 31, 2018, Service Units had unrecognized compensation expense of $1.4 million. The expense is expected to be recognized over a weighted-average period of 2.5 years from December 31, 2018.

Performance Units

Performance Units, which have been granted as Tranche B Units and Tranche C Units, will vest based upon equity holders of DSB Parent realizing certain targeted multiples of invested capital ("MOIC thresholds"). Performance Units are accounted for as equity awards with expense recognition occurring upon the realization of the stated MOIC thresholds due to a liquidity event. On November 16, 2018, Tranche B Units previously issued to approximately 40 employees and executives were modified in connection with the LifePoint/RCCH Merger. For employees and executives granted Performance Units prior to November 16, 2018 who were severed in connection with the LifePoint/RCCH Merger, Tranche B units vest in full upon the eligible employee's termination date and Tranche C units are forfeited in accordance with the original terms and conditions of the applicable Profits Units award agreement. The Company calculated the fair value of the Tranche B Units before and after the modification and recorded expense of $3.6 million related to the modification and acceleration of Tranche B Units. For Performance Units not modified in connection with the LifePoint/RCCH Merger, the Company determined that a liquidity event was not probable, therefore no compensation expense has been recognized related to the unmodified Performance Units. Performance Units had unrecognized compensation expense of $1.9 million as of December 31, 2018. Unvested Units that do not vest on termination are forfeited upon such termination, subject to certain conditions.

Valuation Assumptions

The fair value of all Units was determined using a Monte Carlo simulation framework. The following table shows the weighted average assumptions the Company used to develop the fair value estimates and the resulting estimates of weighted-average fair value per Unit granted during the years ended December 31, 2018, 2017 and 2016:

	2018	2017	2016
Common equity value of the Company	$ 624.1	$ 513.8	$ 297.2
Expected volatility	24.0 %	27.5 %	34.0 %
Risk-free interest rate	1.60 %	1.10 %	1.60 %
Expected dividends	-	-	-
Average expected term (years)	3.2	4.1	4.9

Units Activity

The following represents the activity of the Units for the years ended December 31, 2018, 2017 and 2016:

	Service Units		Performance Units			
	Tranche A and Units to the Board	Weighted Average Grant Date Fair Value per Unit	Tranche B	Weighted Average Grant Date Fair Value per Unit	Tranche C	Weighted Average Grant Date Fair Value per Unit
Unvested at January 1, 2016	2,088,792	$ 0.66	2,088,792	$ 0.40	1,044,395	$ 0.30
Granted	4,768,578	0.69	4,480,578	0.41	2,240,289	0.30
Vested	(741,956)	0.67	-	-	-	-
Forfeited	(1,593,281)	0.66	(1,675,801)	0.40	(837,899)	0.30
Unvested at December 31, 2016	4,522,133	$ 0.69	4,893,569	$ 0.41	2,446,785	$ 0.30
Granted	548,200	0.93	548,200	0.47	274,100	0.28
Vested	(1,104,234)	0.64	-	-	-	-
Forfeited	(165,070)	0.84	(179,600)	0.44	(89,800)	0.28
Unvested at December 31, 2017	3,801,029	$ 0.71	5,262,169	$ 0.41	2,631,085	$ 0.30
Granted	1,229,200	1.43	1,229,200	0.68	614,600	0.37
Vested	(2,054,331)	0.82	(1,636,959)	0.46	-	-
Forfeited	(266,140)	0.70	(379,400)	0.41	(1,008,180)	0.31
Unvested at December 31, 2018	2,709,758	$ 0.97	4,475,010	$ 0.47	2,237,505	0.31

During the year ended December 31, 2018, there were no convertible or expired Units.

Note 14. Commitments and Contingencies

Capital Expenditure Commitments

The Company is reconfiguring some of its facilities to more effectively accommodate patient services and to provide for a greater variety of services. The Company has incurred approximately $436.5 million in costs related to uncompleted projects as of December 31, 2018, which is included under the caption "Construction in progress" in the Company's accompanying consolidated balance sheet. At December 31, 2018, these uncompleted projects had an estimated cost to complete of approximately $226.7 million. The estimated timeframe for completion of these projects generally ranges from less than one year up to two years. Additionally, the Company is subject to annual capital expenditure commitments in connection with several of its facilities. At December 31, 2018, the Company estimated its total remaining capital expenditure commitments to be approximately $1,436.3 million, which generally have remaining terms of three to seven years. Of this amount, approximately one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time.

Legal Proceedings and General Liability Claims

Healthcare facilities, including the Company and its facilities, are, from time to time, subject to claims and suits arising in the ordinary course of business, including claims for damages for personal injuries, medical malpractice, breach of contracts, wrongful restriction of or interference with physicians' staff privileges and employment related claims. In certain of these actions, plaintiffs request payment for damages, including punitive damages that may not be covered by insurance.

In addition, the Company is subject to the regulation and oversight of various state and federal governmental agencies. Further, under the False Claims Act, private parties have the right to bring qui tam, or "whistleblower," suits against healthcare facilities that submit false claims for payments to, or improperly retain identified overpayments from, governmental payers. Some states have adopted similar state whistleblower and false claims provisions. These qui tam or "whistleblower" actions initiated under the civil False Claims Act may be pending but placed under seal by the court to comply with the False Claims Act's requirements for filing such suits. As a result, they could be proceeding without the Company's knowledge. If a provider is found to be liable under the False Claims Act, the provider may be required to pay up to three times the actual damages sustained by the government plus substantial civil monetary penalties that are subject to annual adjustment for inflation for each separate false claim.

Although the healthcare industry has seen numerous ongoing investigations related to compliance and billing practices, hospitals, in particular, continue to be a primary enforcement target for the Office of Inspector General ("OIG"), the Department of Justice ("DOJ") and other governmental agencies and fraud and abuse programs. Certain of the Company's individual facilities have received, and from time to time, other facilities may receive, inquiries or subpoenas from Medicare Administrative Contractors, and federal and state agencies. Any proceedings against the Company may involve potentially substantial amounts as well as the possibility of civil, criminal, or administrative fines, penalties, or other sanctions, which could be material. Settlements of suits involving Medicare and Medicaid issues routinely require both monetary payments as well as corporate integrity agreements. Depending on whether the underlying conduct in these or future inquiries or investigations could be considered systemic, their resolution could have a material adverse effect on the Company's financial position, results of operations and liquidity.

The Company does not control and cannot predict with certainty the progress or final outcome of discussions with government agencies, investigations and legal proceedings against the Company. Therefore, the final amounts paid to resolve such matters, claims and obligations could be material and could materially differ from amounts currently recorded, if any. Any such changes in the Company's estimates or any adverse judgments could materially adversely impact the Company's future results of operations and cash flows.

The Company accrues an estimate for a contingent liability when losses are both probable and reasonably estimable. The Company reviews its accruals each quarter and adjusts them to reflect the impact of developments, advice of legal counsel and other information pertaining to a particular matter.

Note 15. Subsequent Events

In accordance with the provisions of ASC 855, "Subsequent Events," the Company evaluated all material events subsequent to the balance sheet date through March 28, 2019, the date of issuance, for events requiring disclosure or recognition in the Company's consolidated financial statements. There were no subsequent events requiring disclosure or recognition in the Company's consolidated financial statements other than those noted below.

During 2019, the Company borrowed additional amounts under its ABL Facility for general corporate purposes. As of March 28, 2019, the Company had $90.0 million in borrowings outstanding under its ABL Facility.

SIGNATURES

LifePoint Health, Inc. has caused this Report to be signed on its behalf by the undersigned thereunto duly authorized.

LIFEPOINT HEALTH, INC.

Annual Report

For the Fiscal Year Ended December 31, 2019

TABLE OF CONTENTS

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report for the fiscal year ended December 31, 2019 (this "***Report***") contains forward-looking statements that involve risks and uncertainties. Forward-looking statements include any statements that address future results or occurrences. In some cases you can identify forward-looking statements by terminology such as "may," "might," "will," "would," "should," "could" or the negatives thereof. Generally, the words "anticipate," "believe," "continue," "expect," "intend," "estimate," "project," "plan" and similar expressions identify forward-looking statements. In particular, statements about our expectations, beliefs, plans, objectives, assumptions or future events or performance contained elsewhere in this Report are forward-looking statements. These forward-looking statements include statements that are not historical facts, including statements concerning our possible or assumed future actions and business strategies. We have based these forward-looking statements on our current expectations, assumptions, estimates and projections. While we believe these expectations, assumptions, estimates and projections are reasonable, such forward-looking statements are only predictions and involve known and unknown risks, uncertainties and other factors, many of which are outside of our control, which could cause our actual results, performance or achievements to differ materially from any results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following:

- payment changes, including policy considerations and changes resulting from federal and state budgetary restrictions;
- impact from or likelihood of the repeal or replacement of, or material modification to, the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the "***Affordable Care Act***"), as a result of legislative or court action;
- potential impact from the repeal of the penalties associated with the "individual mandate" to purchase health insurance under the Affordable Care Act, included in the Tax Cuts and Jobs Act of 2017 (the "***Tax Act***");
- impact from changes to Medicaid supplemental payment programs;
- our compliance with new and existing laws and regulations as well as costs and benefits associated with compliance;
- any potential action brought by the government under anti-fraud and abuse provisions or by individuals on the government's behalf under the "qui tam" or "whistleblower" provisions of the federal False Claims Act (the "***False Claims Act***");
- impact from the changes in payer mix marked by a shift of patients from private insurance to Medicare and Medicaid programs;
- our acquisition strategy, including integration risks relating to future acquisitions;
- the potential for material obligations if we acquire facilities with unknown or contingent liabilities;
- claims and legal actions relating to professional liabilities and other litigation risks;
- delayed payments and repayments resulting from reviews of claims to Medicare and Medicaid for our services;
- impact of controls imposed by payers designed to reduce inpatient services;
- risks associated with outsourcing functions to third parties;
- our relationships with our joint venture partners;
- changes in physician employment regulations;
- increases in the amount and risk of collectability of patient accounts receivable;
- our need to make investments continually in our processes and information systems to protect the privacy of patients, employees and other persons and reduce the risk of successful cybersecurity attacks;
- the emergence of and effects related to pandemics, epidemics and infectious diseases;
- damage to our reputation, regulatory penalties, legal claims and liability under state and federal laws that we could suffer upon any cybersecurity or privacy breaches;
- anticipated capital expenditures, including routing projects, investments in information systems and capital projects related to acquisitions, construction of new facilities and construction projects and the expectation that capital commitments could be a component of future acquisitions;
- effects of competition in a facility's market;
- changes in industry and general economic trends;
- recruitment and retention of senior executives, providers and other healthcare employees;
- our ability to acquire facilities on favorable terms and successfully complete asset sales and divestitures;
- effects of union organizing activities;
- potential recoupment of previously recognized income from electronic health record ("***EHR***") incentive programs;
- timeframes for completion of capital projects;
- changes in depreciation and amortization expenses;
- costs of providing care to our patients;
- accounting estimates and the impact of accounting methodologies and new accounting pronouncements;
- consolidation of commercial insurance companies and patient shifts to lower cost healthcare plans, including association health plans and short term limited duration health insurance plans, which generally provide lower payment for services provided;

- participation in the healthcare exchanges and the impact of increasing enrollment by patients in insurance plans with narrow networks, tiered networks, high deductibles or high co-payments;
- uncertainty of patient volumes and related revenues;
- governmental or third-party investigations, legal actions and voluntary self-disclosures relating to overpayments or other regulatory compliance matters;
- the ability of our local management teams to identify and meet the needs of our patients, medical staffs and their communities;
- the efforts of insurers, healthcare providers and others to contain healthcare costs;
- our ability to obtain adequate levels of general and professional liability insurance;
- our ability to implement initiatives promoting cost reductions and operational efficiencies;
- possible future indebtedness that may be incurred; and
- other factors referenced under the caption "Risk Factors" contained in this Report.

Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. We disclaim any obligation to update any such factors or to announce the result of any revisions to any of the forward-looking statements contained herein to reflect future results, events or developments.

Statements in this Report are made as of the date hereof unless stated otherwise. New factors emerge from time to time, and it is not possible to predict all such factors.

EXPLANATORY INFORMATION REGARDING THIS REPORT

This Report has been prepared in accordance with the obligations of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.) (the "***Company***") under (i) Section 4.02 of the Indenture, dated as of February 13, 2020 (as amended or supplemented from time to time, the "***4.375% Secured Notes Indenture***") among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee and notes collateral agent, relating to the Company's 4.375% Senior Secured Notes due 2027 (the "***4.375% Secured Notes***") and (ii) Section 4.02 of the Indenture, dated as of November 16, 2018 (as amended or supplemented from time to time, the "***9.75% Unsecured Notes Indenture***" and, together with the 4.375% Secured Notes Indenture , the "***Indentures***"), among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee, relating to the Company's 9.75% Unsecured Notes due 2026 (the "***9.75% Unsecured Notes***" and, together with the 4.375% Secured Notes, the "***Notes***"), (iii) Section 5.04 of the Asset-Based Revolving Credit Agreement, dated as of November 16, 2018 (as amended or supplemented from time to time, the "***ABL Agreement***"), among the Company, as Lead Borrower, DSB Acquisition, LLC, a Delaware limited liability company ("***Holdings***"), the lenders party thereto from time to time and Citibank, N.A., as administrative agent and collateral agent, and (iv) Section 5.04 of the First Lien Credit Agreement, dated as of November 16, 2018 (as amended or supplemented from time to time, the "***Term Loan Agreement***" and, together with the ABL Agreement, the "***Credit Agreements***"), among the Company, as Lead Borrower, Holdings, the lenders party thereto and Citibank, N.A., as administrative agent and collateral agent. This Report has been prepared in all material respects in accordance with the rules and regulations of the Securities and Exchange Commission (the "***SEC***") applicable to an Annual Report on Form 10-K for the fiscal year ended December 31, 2019, except to the extent permitted to be excluded by the Indentures and the Credit Agreements.

USE OF NON-GAAP FINANCIAL INFORMATION

In this Report, we have provided EBITDA and Adjusted EBITDA (collectively, the "***Non-GAAP Measures***") because we believe they provide the Holders with additional information to measure our performance and evaluate our ability to service our indebtedness. We believe that the presentation of Non-GAAP Measures is appropriate to provide additional information to the Holders about certain material non-cash items and about unusual items that we do not expect to continue or to continue at the same level in the future as well as other items. Further, we believe the Non-GAAP Measures provide a meaningful measure of operating profitability because we use them for evaluating our business performance and understanding certain significant items.

The Non-GAAP Measures are not presentations made in accordance with United States ("***U.S.***") generally accepted accounting principles ("***GAAP***"), and our use of these terms may vary from others in our industry. EBITDA and Adjusted EBITDA should not be considered as alternatives to operating income or any other performance measures derived in accordance with GAAP as measures of operating performance or cash flows as measures of liquidity. EBITDA and Adjusted EBITDA have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results as reported under GAAP. Because of these limitations, we rely primarily on our GAAP results and use EBITDA and Adjusted EBITDA only as a supplement. See "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" for a description of the calculation and limitations of these measures.

DOCUMENT SUMMARIES AND REQUESTS

This Report contains summaries believed to be accurate with respect to certain documents, but reference is made to the actual documents for complete information. All such summaries, which do not purport to be complete, are qualified in their entirety by such reference. Copies of the documents referred to herein will be made available without cost to Holders of the Notes by making a written or oral request to us. Any such request may be made to us at the following address and telephone number:

FISCAL YEAR

All references to "fiscal year" are to the twelve months ended December 31 of the year referenced.

OTHER ITEMS

This Report is prepared by LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.), a Delaware corporation, which, along with each of its consolidated subsidiaries, is referred to herein as the "***Company***," "***LifePoint***," "***we***," "***our***," "***us***," and, before giving effect to the LifePoint/RCCH Merger (as defined below), "***RCCH***," in each case, unless the context otherwise requires.

References in this Report to the "***LifePoint/RCCH Merger***" refer to the merger, which was effective on November 16, 2018, of Legend Merger Sub, Inc., a Delaware corporation and wholly-owned subsidiary of RCCH ("***Legend Merger Sub***"), with and into LifePoint Health, Inc., a Delaware corporation ("***Legacy LifePoint***"), with Legacy LifePoint surviving the LifePoint/RCCH Merger as a subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc."

References in this Report to the "***RegionalCare/Capella Merger***" refer to the merger of Crimson Merger Sub, LLC ("***Crimson Merger Sub***"), a Delaware limited liability company and wholly-owned subsidiary of RegionalCare Hospital Partners Inc. ("***Regional Care***"), with and into Capella Health Holdings, LLC ("***Capella***"), with Capella surviving the RegionalCare/Capella Merger as a wholly-owned subsidiary of RegionalCare, which began to do business as RCCH HealthCare Partners. The RegionalCare/Capella Merger was consummated on April 29, 2016; however, for accounting purposes, the RegionalCare/Capella Merger became effective on May 1, 2016.

References in this Report to the "***Apollo/RegionalCare Acquisition***" refer to the merger, which was effective on December 3, 2015, of DSB Merger Sub Inc., a Delaware corporation and wholly-owned subsidiary of Holdings, with and into RegionalCare with RegionalCare surviving such merger as a direct wholly-owned subsidiary of Holdings, which is indirectly controlled by our Sponsor.

References in this Report to the "***Sponsor***" refer to certain funds that are affiliates of the Company (the "***Apollo Funds***") that are ultimately controlled and/or managed by Apollo Management VIII, L.P. ("***Apollo Management***" and, when acting on behalf of the Apollo Funds, "***Apollo***"), which is an affiliate of Apollo Global Management LLC.

PART I

Item 1. *Business*.

Our Company

We own and operate community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities. As of December 31, 2019, we operated 88 hospital campuses in 29 states throughout the U.S., having a total of 11,493 licensed beds. We generate revenues by providing a broad range of general and specialized healthcare services to patients through a network of hospitals and outpatient facilities.

We seek to fulfill our mission of Making Communities Healthier® by (1) delivering high quality patient care, (2) supporting our physicians, (3) creating excellent workplaces for our employees, (4) taking a leadership role in our communities and (5) ensuring fiscal responsibility. We strive to create places where people choose to come for healthcare, physicians want to practice and employees want to work.

Our Business Strategy

The key elements of our business strategy include:

- *Continue to Grow in Existing Markets by Expanding Services and Access Points to Care*. We regularly conduct in-depth strategic reviews of the major service lines offered at each of our facilities and evaluate additional services through which we could profitably grow in our markets and better serve our communities. We leverage our local market knowledge together with input and guidance from our local physician and community leaders to prioritize the healthcare services our communities are seeking. Focus areas include expansion of specialty service lines to meet unserved patient needs, expansion of access points to care, including outpatient, ancillary and retail health services, and investment in technology and equipment. We invest strategically in our markets in order to increase the quality and scope of services we provide, meet the needs of our communities and maintain our strong reputation as the healthcare provider of choice. This in turn helps us to continue recruiting physicians and growing the revenue and profitability of our facilities. We are implementing transfer centers across our portfolio to improve patient retention and drive volume growth. These transfer centers will help preserve the continuum of care, leading to better patient outcomes and higher quality care.

- *Continue to Recruit and Retain Leading Physicians*. Our physician engagement strategies drive our ability to enhance and expand our services to meet the healthcare needs of our communities. We have a comprehensive recruiting program that is directed by an experienced corporate department and is supported at the local level by our hospital system chief executive officers ("***CEOs***") and Boards of Trustees. We supplement our local teams with experienced corporate office specialists and several third party recruiting firms to assist us in identifying candidates that match the profile of our physician needs. We maintain a flexible approach to aligning our goals with our physician partners, including our willingness to recruit physicians through multi-year employment and/or income guarantee arrangements. In addition, we believe our physicians are attracted to our facilities because of several factors, including our commitment to quality care, our focus on employing and developing high quality nurses and support staff and our integration into, and support of, the communities we serve.

- *Routinely Optimize Our Portfolio to Strengthen Our Position in Existing Markets and Expand into New Markets*. We evaluate and selectively pursue acquisitions of hospitals, outpatient and ancillary clinics and other healthcare facilities in new and existing markets, with the goal of improving our operating performance and better meeting the healthcare needs of our communities. We employ a rigorous and disciplined approach to new market acquisitions and focus on a range of criteria, including expected financial returns and strategic benefits, to evaluate a target's suitability and fit within our portfolio. We seek to operate health systems that are, or have the potential to become, market leaders in non-urban communities with favorable demographic trends. We often acquire underperforming and/or undermanaged facilities where we can drive operating efficiencies in order to realize significant upside potential following an acquisition to generate attractive effective purchase multiples and strong returns on our investment. The recent market trend toward health system consolidation, particularly among underperforming not-for-profit hospital operators without the scale and/or operating discipline to compete, has benefited us and we believe will continue to support our acquisition strategy. Furthermore, we routinely evaluate our existing portfolio to assess whether we are meeting our strategic and financial objectives in our markets. We evaluate and may seek to opportunistically divest assets that do not meet our strategic and/or financial objectives and which may deliver more value to our stakeholders through a sale.

- *Commitment to the Delivery of Exceptional Quality Patient Care*. We believe providing high quality patient care is critical to attracting patients, physicians and employees to our facilities. In addition, providing high quality patient care is increasingly vital to achieving our operating and financial success, including receiving full payment from governmental and commercial payers. We believe several factors contribute to providing high quality patient care, including instilling leadership and accountability at all levels of our organization, aligning ourselves with quality physicians and medical staff, and providing a clinical environment that is satisfactory to our patients, physicians and employees. Furthermore, we strive continually to improve physician and employee satisfaction, which we believe is critical to delivering quality patient care. In addition, we also seek to partner with academic medical centers and regionally significant health systems to better serve our communities and to ensure we are delivering high quality care.

- *Continue to Engage in Strategic Relationships with Local Partners*. We partner with several academic medical centers and regionally significant health systems to better serve our communities. We have established partnerships with Duke University Health System ("***Duke***"), Norton Healthcare, Inc. ("***Norton***"), LHC Group, Inc. ("***LHC***"), University of Washington Health, Billings Clinic and Emory Healthcare ("***Emory***").

- *Continue to Focus on Cost Reduction and Operational Efficiency*. We strive to improve our operating performance by making our revenue cycle processes more efficient, making an even higher level of purchases through our group purchasing organization, operating more efficiently and effectively, and working to appropriately standardize our policies, procedures and practices across all of our affiliated facilities. As part of our ongoing efforts to further manage costs and improve the results of our revenue cycle, we have partnered with a third party to provide certain nonclinical business functions, including payroll processing, supply chain management and revenue cycle functions. We believe this model is the most cost effective and efficient approach to managing these nonclinical business functions across multi-facility enterprises. Additionally, in connection with our efforts to responsibly manage purchasing costs, we participate along with other healthcare companies in a group purchasing organization, HealthTrust Purchasing Group ("***HPG***"), which makes certain national supply and equipment contracts available to our facilities. As of December 31, 2019, we owned an approximate 7.0% equity interest in HPG. We also implement this operating discipline when we enter a new market through acquisitions, where we focus on optimizing staffing levels to reduce labor costs, leveraging our national scale and group purchasing organizations to reduce supply costs and standardizing revenue cycle and information technology ("***IT***") systems. We have made substantial progress implementing these initiatives consistently across our network and we believe that opportunity exists for continued improvement in the near term, particularly among our recently acquired facilities.

- *Experienced Executive Management and Leadership Teams.* Our executive management team has an average of more than 20 years of healthcare industry experience with a proven record of achieving strong operating results. The executive management team is highly respected in the hospital management industry and has significant experience in managing and acquiring hospitals. Our executive management team is led by David Dill, who serves as our Chief Executive Officer. Mr. Dill has more than 20 years of operational and financial leadership experience in the healthcare industry.

Our Background

LifePoint/RCCH Merger

Summary

On July 22, 2018, RCCH, Legend Merger Sub and Legacy LifePoint entered into an agreement and plan of merger, pursuant to which, effective November 16, 2018, Legend Merger Sub merged with and into Legacy LifePoint, with Legacy LifePoint surviving the merger as a wholly-owned subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc."

Equity Contribution

In connection with the LifePoint/RCCH Merger, the Apollo Funds, together with certain other co-investors investing through a co-investment vehicle controlled by our Sponsor or its affiliates, indirectly contributed $1,000.0 million of newly invested capital to DSB Parent L.P., a Delaware limited partnership ("***DSB Parent***"), which is our indirect parent and is owned by the Apollo Funds, such co-investment vehicle and certain current or former directors, members of management, employees and consultants of the Company, and the $1,000.0 million of newly invested capital was further contributed to the Company to be used to partially fund the LifePoint/RCCH Merger.

Financing Transactions

Concurrently with the closing of the LifePoint/RCCH Merger, we (1) issued the 9.75% Unsecured Notes, (2) entered into the ABL Agreement, which provides a senior secured asset-based revolving credit facility (the "***ABL Facility***") in an aggregate principal amount of $800.0 million with a maturity of five years, (3) terminated our existing senior secured asset-based revolving credit facility, which we entered into on April 29, 2016 (the "***Prior ABL Facility***"), (4) entered into the Term Loan Agreement, which provides a senior secured term loan credit facility (the "***Term Loan Facility***") in an aggregate principal amount of $3,550.0 million with a maturity of seven years, and (5) repaid in full our $150.0 million term loan facility, which we entered into on April 25, 2018 (the "***Prior Term Facility***").

RegionalCare/Capella Merger and Apollo/RegionalCare Acquisition

On March 21, 2016, RegionalCare and Capella entered into an agreement and plan of merger, pursuant to which, effective on April 29, 2016 (and effective May 1, 2016 for accounting purposes), Crimson Merger Sub, merged with and into Capella, with Capella continuing as the surviving company in the merger as a wholly-owned subsidiary of RegionalCare. After the RegionalCare/Capella Merger was consummated we began to do business as RCCH HealthCare Partners. Concurrently with the closing of the RegionalCare/Capella Merger, we (i) issued 8.25% Senior Secured Notes due 2023 (the "***8.25% Secured Notes***") and 11.5% Senior Notes due 2024 (the "***11.5% Unsecured Notes***"), (ii) entered into the Prior ABL Facility and (iii) refinanced certain indebtedness of DSB Holdings, RegionalCare and Capella.

On November 11, 2015, RegionalCare entered into an agreement and plan of merger with Holdings and the other parties thereto, in which RegionalCare became a direct wholly-owned subsidiary of Holdings on December 3, 2015. Holdings is an indirect wholly-owned subsidiary of DSB Parent, which is controlled by our Sponsor.

In connection with the Apollo/RegionalCare Acquisition and the RegionalCare/Capella Merger, certain Apollo Funds directly or indirectly managed by the Sponsor contributed in the aggregate approximately $380.0 million of invested capital to DSB Parent.

Our Operations

Services

We operate health systems that provide a range of medical, surgical and behavioral health services across inpatient and outpatient settings, including general surgery, internal medicine, cardiology, radiology, oncology, orthopedics, women's services, neurology, rehabilitation services, pediatric services, emergency services and, primarily through our joint venture with LHC, home health and hospice services. In some of our health systems, we offer specialized services such as open heart surgery, skilled nursing, psychiatric care and neurosurgery. In many markets, we also provide outpatient services such as same day surgery, clinical laboratory services, diagnostic imaging services, respiratory therapy services, sports medicine services, urgent care services and lithotripsy. The services provided in any specific health system depend on many factors, including the community need for the service, whether physicians necessary to safely operate the service line are members of the medical staff of that hospital and the existence of any contractual or certificate of need restrictions.

Management and Oversight

Our executive management team has extensive experience in operating multi-facility hospital networks and plays a vital role in the strategic planning for our facilities. A hospital's local management team is typically composed of a CEO, chief operating officer, chief financial officer and a chief nursing officer. Local management teams and the hospital's Board of Trustees and our corporate management teams, develop annual operating plans setting forth growth strategies through the expansion of current services, implementation of new services and the recruitment and retention of physicians in each community, as well as plans to improve operating efficiencies and reduce costs. We believe that the ability of each local management team to identify and meet the needs of our patients, medical staffs and the community as a whole is critical to the success of our facilities. We base the compensation for each local management team in part on its ability to achieve the goals set forth in the annual operating plan, including quality of care, patient satisfaction and financial measures.

The Board of Trustees at each facility, consisting of local community leaders, members of the medical staff and the facility CEO, advises the local management teams and helps develop the strategic operating plan for their facility. In addition, it plays a key role in providing the patient care excellence that we demand. Members of each Board of Trustees are identified and recommended by our local management teams. The Boards of Trustees oversee policies concerning medical, professional and ethical practices, monitor these practices and ensure that they conform to our high standards. We maintain company-wide compliance and quality assurance programs and use patient care evaluations and other assessment methods to support and monitor quality of care standards and to meet accreditation and regulatory requirements.

The majority of our facilities have a physician engagement group ("***PEG***") or a physician leadership group ("***PLG***") comprised of key physicians and members of the facility's administrative team. The mission of the PEG or PLG is to provide ongoing dialogue between hospital facility administration and members of the medical staff and community physicians primarily in the areas of operations, quality patient care, employee satisfaction and community relations.

We also provide support to the local management teams through our corporate resources in areas such as revenue cycle, business office, legal, managed care, clinical efficiency, physician services and other administrative functions. These resources allow for sharing best practices and standardization of policies and processes among all of our facilities.

Cost Management

We strive to improve our operating performance by making our revenue cycle processes more efficient, making an even higher level of purchases through our group purchasing organization, operating more efficiently and effectively, and working to appropriately standardize our policies, procedures and practices across all of our affiliated facilities.

As part of our ongoing efforts to further manage costs and improve the results of our revenue cycle, we have partnered with a third party to provide certain nonclinical business functions, including payroll processing, supply chain management and revenue cycle functions. We believe this model is the most cost effective and efficient approach to managing these nonclinical business functions across multi-facility enterprises.

Attracting Patients

We believe that the most important factors affecting a patient's choice in where to receive healthcare services are the reputation of the facility, the availability and expertise of physicians and nurses and the location and convenience of the facility. Other factors that affect utilization include local demographics and population growth, local economic conditions and the facility's success in contracting with a wide range of local payers.

Outpatient Services

The healthcare industry has experienced an accelerated shift during recent years from inpatient services to outpatient services as Medicare, Medicaid and managed care payers have sought to reduce costs by shifting lower-acuity cases to an outpatient setting. Advances in medical equipment technology and pharmacology also have supported the shift to outpatient utilization. However, we expect the decline in inpatient admission use rates to moderate over the long term as the baby boomer population reaches ages where inpatient admissions become more prevalent. We have responded to the shift to outpatient services through expanding service offerings and increasing the throughput and convenience of our emergency departments, outpatient surgery facilities and other ancillary units in our facilities.

Sources of Revenues

General

Our facilities generate revenues by providing healthcare services to our patients. Depending upon the patient's medical insurance coverage, we are paid for these services by governmental Medicare and Medicaid programs, commercial insurance, including health maintenance organizations ("***HMOs***"), preferred provider organizations ("***PPOs***") and other private insurers, and directly by the patient. The amounts we are paid for providing healthcare services to our patients vary depending upon the payer. Governmental payers generally pay significantly less than the hospital's customary charges for the services provided. Insured patients are generally not responsible for any difference between customary hospital charges and the amounts received from commercial insurance payers. However, insured patients are responsible for payments not covered by insurance, such as exclusions, deductibles and co-payments.

Our revenues by payer and approximate percentages of revenues on a consolidated basis were as follows for the years ended December 31, 2019, 2018 and 2017 (dollars in millions):

	2019		2018		2017	
	Amount	% of Revenues	Amount	% of Revenues	Amount	% of Revenues
Medicare	$ 3,338.1	38.1 %	$ 1,105.3	39.8 %	$ 760.6	40.6 %
Medicaid	1,495.3	17.1	486.3	17.5	346.2	18.5
HMOs, PPOs and other private insurers	3,698.6	42.3	1,113.8	40.1	723.8	38.7
Self-pay	59.2	0.7	17.2	0.6	11.4	0.6
Other	143.6	1.6	49.4	1.8	26.7	1.4
Revenue from contracts with customers	8,734.8	99.8	2,772.0	99.8	1,868.7	99.8
Rental income	18.0	0.2	6.1	0.2	4.1	0.2
Revenues	$ 8,752.8	100.0 %	$ 2,778.1	100.0 %	$ 1,872.8	100.0 %

Medicare

For the year ended December 31, 2019, approximately 38.1% of our revenues related to patients participating in Medicare programs. Medicare provides hospital and medical insurance benefits, regardless of income, to persons age 65 and over, some disabled persons and persons with end-stage renal or Lou Gehrig's disease. All of our hospitals are currently certified as providers of Medicare services.

Over the years, Congress and the Centers for Medicare and Medicaid Services ("***CMS***") have made several sweeping changes to the Medicare program and its reimbursement methodologies, such as the implementation of the prescription drug benefit that was created by the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (the "***MMA***") and the numerous changes contained in the Affordable Care Act. Many of these changes have resulted in decreased reimbursement to healthcare providers. For example, the Budget Control Act of 2011 ("***BCA***") imposed a 2% reduction in Medicare spending which began on April 1, 2013. The Bipartisan Budget Act of 2015 ("***BBA***"), the Bipartisan Budget Act of 2018 (the "***2018 Act***") and the Bipartisan Budget Act of 2019 extended the 2% reduction in Medicare spending through 2029. Additional reductions in Medicare reimbursement could result from changes to, or the repeal of, the Affordable Care Act, or as a result of the enactment of Medicare reform, deficit reduction, or other legislation.

Medicare Inpatient Prospective Payment System

Under the Medicare program, hospitals are reimbursed for the costs of acute care inpatient stays under an inpatient prospective payment system ("***IPPS***"). Under the IPPS, our hospitals are paid a prospectively determined amount for each hospital discharge that is based on the patient's diagnosis. Specifically, each discharge is assigned to a Medicare severity diagnosis related group ("***MS-DRG***"), which groups patients that have similar clinical conditions and that are expected to require a similar amount of hospital resources. Each MS-DRG is, in turn, assigned a relative weight that is prospectively set and that reflects the average amount of resources, as determined on a national basis, that are needed to treat a patient with that particular diagnosis, compared to the amount of hospital resources that are needed to treat the average Medicare inpatient stay. The IPPS payment for each discharge is based on two national base payment rates or standardized amounts, one that covers hospital operating expenses and another that covers hospital capital expenses. The base MS-DRG payment rate for operating expenses has two components, a labor share and a non-labor share. Although the labor share is adjusted by a wage index to reflect geographical differences in the cost of labor, the base MS-DRG payment rate does not consider the actual costs incurred by an individual hospital in providing a particular inpatient service. In addition to IPPS reimbursement, Medicare also makes supplemental payments known as outlier payments to compensate hospitals for cases involving extraordinarily high costs.

The base MS-DRG operating expense payment rate that is used by the Medicare program in the IPPS is adjusted by an update factor each federal fiscal year ("***FFY***"), which begin on October 1 (for example, FFY 2020 began on October 1, 2019). The index used to adjust the base MS-DRG payment rate, which is known as the "hospital market basket index," gives consideration to the inflation experienced by hospitals in purchasing goods and services. For FFYs 2019 and 2018, the hospital market basket index increased 2.9% and 2.7%, respectively. Generally, however, the percentage increase in the MS-DRG payment rate has been lower than the projected increase in the cost of goods and services purchased by hospitals. In addition, as mandated by the Affordable Care Act, the hospital market basket increases for FFYs 2020, 2019 and 2018 were each reduced by CMS by 0.75%. As also mandated by the Affordable Care Act, the market basket increase is reduced by a productivity adjustment equal to the Bureau of Labor Statistics' 10-year moving average of changes in annual economy-wide productivity. For FFYs 2020, 2019 and 2018, the productivity adjustment equated to a 0.4%, 0.8% and 0.6% reduction in the market basket increase, respectively. As a result of these reductions and other changes implemented by CMS, the MS-DRG-rate increased by 3.1% for FFY 2020.

On October 1, 2007, CMS replaced the previously existing 538 diagnosis related groups with 745 MS-DRGs. The MS-DRGs are intended to more accurately reflect the cost of providing inpatient services and eliminate any incentives that hospitals may have to only treat the healthiest and most profitable patients. The American Taxpayer Relief Act of 2012 ("***ATRA***") required CMS to recoup $11 billion from IPPS payments in FFYs 2014 through 2017 to offset an additional increase in aggregate payments to hospitals that Congress believes occurred from FFYs 2008 through 2013 solely as the result of the transition to the MS-DRG system. In FFYs 2014, 2015 and 2016, CMS applied negative 0.8% adjustments as part of the recovery process required by ATRA, and it applied a negative 1.5% adjustment in FFY 2017 to recover the remaining outstanding amount. CMS had previously indicated that the reductions required by ATRA would be fully restored in FFY 2018. However, under the Medicare Access and CHIP Reauthorization Act of 2015 ("***MACRA***"), those reductions were to be restored in 0.5% increments over a six year period from FFYs 2018 through 2023, which would result in a cumulative 3.0% increase in rates, which would be less than the 3.9% reduction that was imposed by CMS in FFYs 2014 through 2017. However, we note that some of that restoration has been subject to further limits, such as under the 21st Century Cures Act (the "***Cures Act***") which further reduced the restoration for FFY 2018 from 0.5% to 0.4588%.

CMS has implemented a number of programs and requirements that are intended to promote value based purchasing and to link payments to quality and efficiency. For example, the MMA required all acute care hospitals to participate in CMS' Hospital Inpatient Quality Reporting Program (the "***IQR Program***") in order to receive the full hospital market basket update. Hospitals that do not participate in the IQR Program receive a 25% reduction in their IPPS annual payment update for the applicable FFY. Our hospitals reported all quality measures required by CMS related to the IQR Program and will receive the full market basket update through FFY 2020. In addition, hospitals that are not meaningful EHR users are also subject to an additional 75% reduction of the hospital market basket increase.

In addition, the Affordable Care Act requires United States Department of Health and Human Services ("***HHS***") to implement a value-based purchasing program for inpatient hospital services. This program rewards hospitals based either on how well the hospitals perform on certain quality measures or how much the hospitals' performance improves on certain quality measures from their performance during a baseline period. As part of the program, the Affordable Care Act requires HHS to reduce inpatient hospital payments for all discharges by 2.0% each FFY. HHS pools the amount collected from these reductions to fund payments to reward hospitals that meet and exceed certain quality performance standards established by HHS. Under the program, each hospital's performance is evaluated during a specified performance period, and hospitals receive points on each of a number of pre-determined measures based on the higher of (i) their level of achievement relative to an established standard or (ii) their improvement in performance from their performance during a prior baseline period. Each hospital's combined scores on all the measures are translated into value-based incentive payments. Hospitals that receive higher total performance scores receive higher incentive payments than those that receive lower total performance scores. Because the Affordable Care Act provides that the funds pooled and otherwise set aside for the value-based purchasing program will be fully distributed, hospitals with high scores may receive greater reimbursement under the value-based purchasing program than they would have otherwise, and hospitals with low scores may receive reduced Medicare inpatient hospital payments.

Medicare also does not allow an inpatient hospital discharge to be assigned to a higher paying MS-DRG if certain designated hospital acquired conditions ("***HACs***") were not present on admission and the identified HAC is the only condition resulting in the assignment of the higher paying MS-DRG. In those situations, the case is paid as though the secondary diagnosis was not present. In addition, hospitals that fall into the top 25.0% of national risk-adjusted HAC rates for all hospitals in the previous year receive a 1.0% reduction in their total Medicare payments.

Furthermore, inpatient payments are reduced pursuant to the Affordable Care Act if a hospital experiences "excessive readmissions" within a 30-day period of discharge for certain conditions designated by CMS including heart attack, chronic obstructive pulmonary disease, heart failure, pneumonia, coronary artery bypass, and total hip arthroplasty. Hospitals with what HHS defines as "excessive readmissions" for these conditions will receive reduced payments for all inpatient discharges, not just discharges relating to the conditions subject to the excessive readmission standard. Each hospital's performance is publicly reported by HHS. HHS has the discretion to determine what "excessive readmissions" means, the amount of the payment reduction and other terms and conditions of this program. The basic maximum payment reduction amount is 3.0%. The Cures Act does, however, allow for an adjustment factor that would reduce the penalties imposed on hospitals, based on the portion of beneficiaries the hospitals serve that are eligible for both Medicare and Medicaid.

Medicare Hospital Outpatient Prospective Payment System and Other Outpatient Services

CMS reimburses hospital outpatient services under the Medicare hospital outpatient prospective payment system ("***OPPS***"), and generally uses fee schedules to pay for durable medical equipment and physical, occupational and speech therapy, clinical diagnostic laboratory and independent diagnostic testing facility services. Under the OPPS, hospital outpatient services are classified into groups called ambulatory payment classifications ("***APCs***"). Services in each APC are clinically similar and are similar in terms of the resources they require. Depending on the services provided, a hospital may be paid for more than one APC for an encounter. CMS establishes a payment rate for each APC by multiplying the scaled relative weight for the APC by a conversion factor. The payment rate is further adjusted to reflect geographic wage differences. The APC conversion factors for calendar years ("***CYs***") 2020, 2019 and 2018 were $80.784, $79.490 and $78.636, respectively, after the inclusion of the productivity adjustments and other reductions that were required by the Affordable Care Act. APC classifications and payment rates are reviewed and adjusted on an annual basis, and, historically, the rate of increase in payments for hospital outpatient services has been higher than the rate of increase in payments for inpatient services. To receive the full increase, hospitals must satisfy the reporting requirements of the Hospital Outpatient Quality Reporting Program (the "***OQR Program***"). Hospitals that do not satisfy the reporting requirements of the OQR Program are subject to a reduction of 2.0% in their annual payment update under the OPPS. Our hospitals reported all quality measures required by CMS for the OQR Program and will receive the full market basket update through CY 2020.

Effective as of January 1, 2017, Section 603 of the BBA limits reimbursement for items and services that are furnished by certain off-campus outpatient provider-based departments ("***off-campus PBDs***") of hospitals. CMS included several provisions implementing Section 603 in the OPPS final rule for CY 2017. Under the final rule, CMS will continue to make OPPS payments to off-campus PBDs that were billing Medicare as hospital departments under the OPPS prior to November 2, 2015 ("***grandfathered PBDs***"). However, grandfathered PBDs will generally not be able to relocate, and CMS has indicated that it may adopt limitations on the expansion of the service lines provided at grandfathered PBDs in the future. In addition to grandfathered PBDs, CMS will also continue to reimburse all items and services that are furnished in a "dedicated emergency department" of a hospital, as such term is defined for the purposes of the Emergency Medical Treatment and Active Labor Act ("***EMTALA***"), regardless of whether the items and services are emergency items and services, and all items and services that are furnished in off-campus PBDs that are located within 250 yards of a remote location of a hospital, which is a facility that is either created or acquired by a hospital for the purpose of furnishing inpatient hospital services under the name, ownership, and financial and administrative control of the hospital, under the OPPS. Beginning in CY 2019, all items and services not provided at a grandfathered or otherwise excepted off-campus PBD are generally paid by CMS under Medicare physician fee schedule ("***PFS***") rates that are approximately 40% of the applicable OPPS rate (the "***PFS Adjusted Rate***"). In addition, in 2018, CMS issued a final rule that will generally reimburse clinic visit services provided at all off-campus PBDs, including grandfathered PBDs, at a reduced Medicare PFS-equivalent payment rate. The payment reduction for clinic visit services provided at off-campus PBDs will be phased in over a two year period beginning in FFY 2019.

In December 2018, a lawsuit was filed challenging the portion of CMS' final rule that reduced reimbursement for clinic visit services provided at grandfathered PBDs to a lower Medicare PFS-equivalent payment rate. On September 17, 2019, the U.S. District Court for the District of Columbia ruled that the reduction in reimbursement for clinic services provided at grandfathered PBDs exceeded CMS' statutory authority. CMS has indicated that it will pay claims for clinic visit services provided at grandfathered PBDs in CY 2019 at the full OPPS payment rate. However, in the OPPS final rule for CY 2020, CMS noted that the court's ruling only applied to clinic visit services provided in CY 2019 and, as a result, CMS moved forward with the planning phase-in of the second year of the clinic visit service payment reduction in CY 2020 while it appeals the court's decision. A new lawsuit was filed on January 13, 2020, challenging the continued phase-in of the reduction for CY 2020.

As part of the OPPS final rule for CY 2018, CMS also finalized a change to the payment rate for certain Medicare Part B drugs purchased by hospitals through the 340B Drug Pricing Program (the "***340B Program***"). The 340B Program allows certain non-profit and governmental hospitals and other healthcare providers to obtain substantial discounts on covered outpatient drugs (prescription drugs and biologics other than vaccines) from drug manufacturers. Under the final rule, CMS pays for separately reimbursable, non-pass through drugs and biologicals (other than vaccines) purchased through the 340B Program at the average sales price ("***ASP***") minus 22.5% rather than ASP plus 6%. CMS estimated that this change reduced Medicare payments for drugs and biologicals by $1.6 billion in CY 2018. To maintain budget neutrality, CMS implemented an offsetting increase in the conversion factor, and, as a result, reimbursement rates for non-drug items and services provided by all hospitals, including those not eligible to participate in the 340B Program, that are reimbursed under the OPPS. In connection with the OPPS final rule for CY 2019, CMS expanded the 340B Program payment reductions to drugs that are obtained through the 340B Program and furnished by non-excepted, off-campus PBDs. CMS will continue these 340B Program payment reductions in CY 2020.

In September 2018, a lawsuit was filed challenging the authority of CMS to make the 340B Program payment reductions set forth in the OPPS final rule for CY 2018. On December 27, 2018, the U.S. District Court for the District of Columbia held that the payment reductions exceeded CMS's statutory authority and entered a permanent injunction against the reductions. However, because the 340B Program payment reductions were made in a budget-neutral manner and the savings derived from the reductions were used to increase reimbursement for all of the other items and services provided under the OPPS, the court ordered the parties to submit briefs as to how the issue should be remedied. The lawsuit has been expanded to include the 340B Program payment reductions that were made in CY 2019, and an additional lawsuit has been filed against the 340B Program payment reductions being made by CMS in CY 2020. CMS has appealed the District Court's rulings. We cannot predict the outcome of CMS's appeal or the remedies, if any, that may be imposed in connection with the 340B Program payment reduction litigation. If OPPS payments to hospitals are reduced (either retroactively or prospectively) as a result of the 340B Program payment reduction litigation, we would be materially adversely affected.

Medicare Disproportionate Share Hospital Payments

Hospitals may also qualify for Medicare disproportionate share hospital ("***DSH***") payments, if they treat a high percentage of low-income patients (as determined by a ratio involving Medicare and Medicaid patients eligible to receive Supplemental Security Income). DSH payments are determined annually based on certain statistical information specified by HHS and are paid as an addition to MS-DRG payments. The Affordable Care Act requires Medicare DSH payments to providers to be reduced by 75% beginning in FFY 2014, subject to adjustment if the Affordable Care Act does not decrease uncompensated care to the extent anticipated. The amount that is withheld is reduced by the percentage change in uninsured individuals under the age of 65, and then paid as additional payments to DSH hospitals based on the amount of uncompensated care provided by each hospital relative to the amount of uncompensated care provided by all hospitals receiving DSH payments during the applicable time period. The IPPS final rule for FFY 2020 established the uncompensated care amount which will be distributed to qualifying hospitals in FFY 2020 at approximately $8.4 billion, an increase of approximately $78 million from FFY 2019.

Medicare Dependent and Low Volume Hospital Programs

On April 16, 2015, MACRA was enacted. Among other things, MACRA extended the Medicare dependent hospital program, which provides enhanced payment support for rural hospitals that have no more than 100 beds and at least 60% of their inpatient days or discharges covered by Medicare, and the Medicare low volume hospital program, which provides additional Medicare reimbursement for general acute care hospitals that are located a certain distance from another general acute care hospital and have less than a certain number of Medicare discharges each fiscal year, through September 30, 2017. The 2018 Act extended both of these programs through FFY 2022.

Cost Reports

Hospitals participating in the Medicare and some Medicaid programs, whether paid on a reasonable cost basis or under a prospective payment system, are required to meet certain financial reporting requirements. Federal and, where applicable, state regulations require submission of annual cost reports identifying medical costs and expenses associated with the services provided by each hospital to Medicare and Medicaid recipients.

Annual cost reports required under the Medicare and some Medicaid programs are subject to routine governmental audits. These audits may result in adjustments to the amounts ultimately determined to be payable to us under these reimbursement programs. Finalization of these audits often takes several years. Providers may appeal any final determination made in connection with an audit and it is common to contest issues raised in audits of cost reports.

Medicare Bad Debt Reimbursement

Under Medicare, the costs attributable to the deductible and coinsurance amounts that remain unpaid by Medicare beneficiaries after reasonable collection efforts can be added to the Medicare share of allowable costs as cost reports are filed. Hospitals generally receive interim pass-through payments during the cost report year which were determined by the Medicare administrative contractor (***"MAC"***) from the prior cost report filing.

The amounts uncollectible from specific beneficiaries are to be charged off as bad debts in the accounting period in which the accounts are deemed to be worthless. In some cases, an amount previously written off as a bad debt and allocated to the program may be recovered in a subsequent accounting period. In these cases, the recoveries must be used to reduce the cost of beneficiary services for the period in which the collection is made. In determining reasonable costs for hospitals, the amount of bad debts otherwise treated as allowable costs is reduced by 35%.

Medicare Physician Fee Schedule

Professional medical services provided to Medicare beneficiaries by physicians and certain other health care practitioners, including physician assistants and nurse practitioners, are reimbursed under the PFS. Under the PFS, CMS has assigned a national relative value unit ("***RVU***") to most medical procedures and services that reflects the various resources required by a physician or practitioner to provide the services relative to all other services. Each RVU is calculated based on a combination of work required in terms of time and intensity of effort for the service and the practice overhead and malpractice insurance expenses that are attributable to the service. These three elements are each modified by a geographic adjustment factor to account for local practice costs and are then aggregated. The aggregated amount is multiplied by a conversion factor to determine the payment rate for the service. The conversion factor is updated by CMS on an annual basis.

MACRA, which was adopted in 2015, significantly changed how CMS determines the annual updates to the PFS. Under MACRA, the PFS payment rates that were in effect when MACRA was enacted were extended through June 30, 2015, and then increased by 0.5% for the remainder of CY 2015. PFS payment rates were increased annually by an additional 0.5% for CYs 2016, 2017 and 2018 and, after the adoption of the 2018 Act, were increased by 0.25% for CY 2019. PFS payment rates are scheduled to remain at their CY 2019 levels through CY 2025.

In addition to revising the methodology that is used to update payments that are made under the PFS, MACRA also established a Quality Payment Program ("***QPP***") for incentivizing physician and practitioner care that meets certain value, quality, cost, and performance criteria. Beginning in CY 2019, amounts paid to physicians and practitioners under the PFS are subject to adjustment through the QPP and participation in either the Merit-Based Incentive Payment System ("***MIPS***") or an Advanced Alternative Payment Model ("***APM***") program. Physicians and practitioners who participate in the MIPS program, which essentially consolidated the prior Physician Quality Reporting System, the Value-Based Modifier, and the Meaningful Use of EHR incentive programs, are subject to positive, zero, or negative performance adjustments depending on how the physician's or practitioner's performance compared to a performance threshold. The payment adjustments are based on the physician's or practitioner's performance in the year that is two years prior to the current payment period. As a result, PFS payments in CY 2020 will be based on CY 2018 performance scores. HHS and CMS revise the MIPS reporting measures on an annual basis and have indicated that they intend to routinely increase the performance thresholds in connection with those revisions. In addition, from CY 2019 through CY 2024, MACRA provides $500 million per year for an additional performance adjustment for physicians and practitioners who participate in MIPS and achieve exceptional performance. Physicians and practitioners who participate in an APM program, which, among other things, requires the physician or practitioner to receive a substantial amount of their revenue from an APM, will receive, from CYs 2019 through 2024, a lump-sum payment equal to 5% of their Medicare payments in the prior year for services paid under the PFS. Beginning in CY 2026, PFS payment rates for physicians and practitioners participating in an APM program would be increased by 0.75% a year. Payments for other physicians and practitioners would be increased by 0.25% per year.

Medicaid

For the year ended December 31, 2019, approximately 17.1% of our revenues related to patients participating in the various state Medicaid programs. Included in these payments are DSH and other supplemental payments received under various state Medicaid programs. Medicaid programs are funded by both the federal government and states to provide healthcare benefits to limited categories of low-income individuals under 65 years of age. These programs and the reimbursement methodologies are administered by the states under approved plans and vary from state to state and from year to year. Amounts received under the Medicaid programs are often significantly less than the hospital's customary charges for the services provided. Most state Medicaid payments are made under a prospective payment system, fee schedule, cost reimbursement program, or some combination of these three methods. All of our hospitals are currently certified to participate in their respective state Medicaid programs.

The Affordable Care Act essentially requires states to expand medical coverage to all individuals under age 65 with incomes effectively at or below 138% of the federal poverty level ("***FPL***"). However that portion of the Affordable Care Act was held to be unconstitutional by the U.S. Supreme Court, and, as a result, states may opt out of the expansion without losing their existing Medicaid funding. Therefore, the income level required for individuals to qualify for Medicaid varies widely from state to state. To offset the cost of the Medicaid program's expansion, the Affordable Care Act authorized the federal government to provide states with "matching funds" (referred to as "***Enhanced FMAP***") to cover the costs of covering the newly eligible individuals. The Enhanced FMAP was 100% for CYs 2014 through 2016; 95% in CY 2017; 94% in CY 2018; 93% in CY 2019; and will be 90% in CYs 2020 and thereafter.

In recent years, we have benefited from the expansion of Medicaid under the Affordable Care Act, and effective as of January 1, 2020, Idaho and Utah, two additional states in which we operate, expanded their Medicaid programs. However, a number of states in which we operate have not expanded their Medicaid programs, or are seeking waivers that could reduce their Medicaid-eligible populations. Several states have adopted or are considering legislation designed to reduce or control their Medicaid expenditures, including enrolling Medicaid recipients in managed care programs, and imposing additional taxes on hospitals to help finance such states' Medicaid systems. Given the reductions in the Enhanced FMAP and in light of the possible repeal, replacement or modification of the Affordable Care Act, we are unable to predict how many, if any, additional states in which we operate will expand their Medicaid programs or how many, if any, of the states in which we operate that have expanded their Medicaid programs will keep their expansions in place in the future.

The Affordable Care Act also included a number of provisions that are intended to improve the quality of care that is provided to Medicaid beneficiaries. Among other things, the Affordable Care Act prohibits federal funds from being used to reimburse providers for services related to provider preventable conditions, such as HACs, wrong site surgeries and other provider preventable conditions that may be designated by each state Medicaid program.

Work Requirements

In addition to implementing value-based purchasing and quality-driven reimbursement requirements, CMS has also issued new guidance permitting states to impose work and/or community engagement requirements on certain Medicaid beneficiaries. In response to the guidance, a number of states, including several in which the Company has facilities, have requested demonstration waivers from CMS that would allow those states to impose work requirements on their Medicaid beneficiaries. CMS has approved the requests that have been made by Arizona, Arkansas, Indiana, Michigan, New Hampshire, Ohio, South Carolina, Utah and Wisconsin, and the remaining requests are still pending. However, a number of lawsuits have been filed challenging the authority of CMS to allow state Medicaid programs to impose work and/or community engagement requirements on their respective beneficiaries and, as a result, the demonstration waivers that have been approved by CMS have generally not yet been implemented. We cannot predict whether CMS will grant additional waivers that allow for the imposition of work and community engagement requirements on Medicaid beneficiaries or the impact that any such waivers will have on coverage for patients seeking care at our facilities. We also cannot predict whether the legal challenges that have been initiated against the demonstration waivers that have been approved by CMS will be successful or whether any legal challenges will be initiated against any other similar demonstration waivers that have been or may be granted by CMS in the future.

Medicaid Block Grants and Capped Federal Funding

As part of the movement to repeal, replace or modify the Affordable Care Act and as a means to reduce the federal budget deficit, there have been Congressional efforts to move Medicaid from an open-ended program with coverage and benefits set by the federal government to one in which states receive a fixed amount of federal funds, either through block grants or per capita caps, and have more flexibility to determine benefits, eligibility and provider payments. If implemented, we cannot predict whether the amount of fixed federal funding to the states will be based on current payment amounts, or if it will be based on lower payment amounts, which would negatively impact those states that expanded their Medicaid programs in response to the Affordable Care Act. Such efforts to modify or reduce federal funding of the Medicaid program, as well as those that would reduce the amount of federal Medicaid matching funds available to states by curtailing the use of provider taxes, could have a negative impact on state Medicaid budgets resulting in less coverage for eligible individuals or lower reimbursement rates.

On November 11, 2019, Tennessee, one of the states in which we operate, submitted an amendment to CMS for its Medicaid demonstration waiver that would convert federal funding for the Tennessee Medicaid program to a modified block grant program. We cannot predict whether the Tennessee waiver amendment will be approved by CMS or, if approved by CMS, the impact the amendment would have on Medicaid beneficiaries or our facilities in Tennessee.

Additionally, on January 30, 2020, CMS released new guidance permitting states to design Medicaid plans that would receive a block grant or capped amount of federal funding in connection with plans that expand coverage to able-bodied adults not generally eligible for benefits under traditional Medicaid, while providing states flexibility in the administration of benefits for such individuals. We cannot predict what states might submit waiver requests under the new guidance, or how such capped Medicaid plans might affect our operations.

Medicaid Supplemental Payments

Medicaid supplemental payments ("***MSPs***") are payments made to providers separate from and in addition to those made at a state's standard Medicaid payment rate. MSP programs are jointly financed by state funds and federal matching funds. The state portion may be funded through general revenue, intergovernmental transfers from local governments or healthcare related taxes imposed by states in the form of a mandatory provider payment related to healthcare items or services. The two most prevalent forms of MSPs are Medicaid DSH and Upper Payment Limit ("***UPL***") payments.

Medicaid DSH payments are federally required to be made by the states to hospitals that serve significant numbers of Medicaid and uninsured patients in recognition of the added costs incurred by hospitals in treating these patients. The federal government distributes federal Medicaid DSH funds to each state based on a statutory formula. The states then distribute the DSH funding among qualifying hospitals. Although federal Medicaid law defines some level of hospitals that must receive Medicaid DSH funding, states have broad discretion to define additional hospitals that also may qualify for Medicaid DSH payments and the amount of such payments. However, the total amount of Medicaid DSH payments a state may make and the total amount any one hospital may receive are both capped by federal law.

Pursuant to the Affordable Care Act, as amended by subsequent legislation, funding for Medicaid DSH programs is to be reduced by $4 billion in FFY2020 and $8 billion per year from FFY 2021 through FFY 2025. Congress has delayed the reduction in funding for Medicaid DSH programs on a number of occasions, most recently through May 2020, but we cannot predict whether Congress will further delay or otherwise modify the reductions in the future. Because many of the states in which we operate have not expanded Medicaid programs as intended under the Affordable Care Act, the reduction in Medicaid DSH payments may take place without a coupled increase in the Medicaid eligible population, thus increasing the net amount of uncompensated care we provide.

Unlike Medicaid DSH payments, UPL payments are not required to be made by states under federal law. Rather, federal regulations establish an upper payment limit above which states may not receive federal matching dollars. UPL programs have expanded in recent years, and certain of our hospitals receive payments under such programs. Because services provided to Medicaid beneficiaries enrolled in managed care are not included in state UPL calculations, as states increase their use of managed care Medicaid programs, UPL MSPs could be reduced. UPL funding and matching federal funds may also be reduced or eliminated as a result of state or local governmental legislation, state changes to historical funding levels or related taxes, compliance reviews by CMS, or changes to federal Medicaid funding affecting such programs.

In addition, on November 18, 2019, CMS released a proposed rule, the Medicaid Fiscal Accountability Rule, that is intended to increase federal oversight of MSPs and state Medicaid financing policies. Among other things, the proposed rule would add new review and reporting requirements on UPL payment arrangements, including the reporting of provider-level payment detail, impose limitations on UPL payments that are made to physicians and certain other practitioners, and impose certain limits on the use of healthcare provider taxes, intergovernmental transfers and certified public expenditures. We cannot predict whether the proposed rule will be adopted and, if adopted, the impact that the proposed rule would have on the MSPs that are currently received by the Company's facilities. In addition, even if the proposed rule is not adopted, we also cannot predict whether MSP programs will continue (and, if continued, whether we will qualify for such programs) or guarantee that revenues recognized from these programs will not decrease.

Budget cuts, federal or state legislation, or other changes in the administration or interpretation of government health programs by government agencies or contracted managed care organizations could have a material adverse effect on our financial position and results of operations.

Recovery Audit and Other Review Contractors

Recovery audit contractors ("***RACs***") are used by CMS and state agencies to detect Medicare and Medicaid overpayments not identified through existing claims review mechanisms. The RAC program relies on private companies to examine Medicare and Medicaid claims filed by healthcare providers. RACs perform post-discharge audits of medical records to identify overpayments resulting from incorrect payment amounts, non-covered services, medically unnecessary services, incorrectly coded services, and duplicate services and are paid on a contingency basis. Any claims identified as overpayments are subject to a RAC program appeals process. In 2016, in connection with the procurement of the new recovery audit contracts, CMS made a number of enhancements to the RAC program, including the establishment of a RAC program Provider Relations Coordinator, requiring RACs to maintain an overturn rate of less than 10% at the first level of appeal, requiring RACs to maintain an accuracy rate of at least 95%, and establishing additional documentation request limits based on a provider's compliance with Medicare rules, that are intended to address provider and other stakeholder concerns. CMS has also limited the number of claims that RACs may audit by limiting the number of records that RACs may request from hospitals based on each hospital's claim denial rate for the previous year.

In addition to RACs, CMS employs Unified Program Integrity Contractors ("***UPICs***"), which integrate the functions of the former Zone Program Integrity Contractors, Program Safeguard Contractors, and Medicaid Integrity Contractors, to perform post-payment audits of Medicare and Medicaid claims and identify overpayments. A number of state Medicaid agencies and other contractors have also increased their review activities.

Although we believe our claims for reimbursement submitted to the Medicare and Medicaid programs are accurate, many of our hospitals have had Medicare claims audited by the RAC program. While our hospitals have successfully appealed many of the adverse determinations raised by Medicare RAC audits, we cannot predict if this trend will continue or the results of any future audits. We cannot predict the volume or outcome of any future audits conducted by the various RACs and other review programs to which our hospitals will be subject.

Utilization and Claim Review

Federal law contains numerous provisions designed to ensure that services rendered to Medicare and Medicaid patients meet professionally recognized standards and are medically necessary and that claims for reimbursement are properly filed. These provisions include a requirement that a sampling of admissions of Medicare and Medicaid patients must be reviewed on a post-discharge basis by quality improvement organizations ("***QIOs***"), which review the appropriateness of Medicare and Medicaid patient admissions and discharges, the quality of care provided, the validity of MS-DRG classifications and the appropriateness of cases of extraordinary length of stay or cost. QIOs may deny payment for services or assess fines and also have the authority to recommend to HHS that a provider which is in substantial noncompliance with the standards of the QIO be excluded from participation in the Medicare program. Utilization review is also a requirement of most non-governmental managed care organizations.

In addition to utilization reviews, CMS has also adopted a nationwide claim review and provider education program known as the Targeted Probe and Educate ("***TPE***") program, which is intended to reduce errors in the claims submission process and focuses on items and services that pose the greatest risk to the Medicare program or that have a high national error rate, such as short inpatient stays. Under the TPE program, MACs use data analysis to identify providers who, for a particular item or service, have high claim denial rates or billing practices that vary significantly from their peers. Once a provider has been identified, the MAC reviews between 20 and 40 of the provider's claims for the item or service and, if issues are noted, offers the provider an individualized education session that is based on the results of the review. The provider is then generally given 45 days to improve its systems and processes, and, after that period has ended, the MAC conducts another review of the provider's claims. If additional issues are identified, the provider is given the opportunity for another education session. Providers are typically given three rounds of review and education before being referred to CMS for further action, potentially including pre-payment review, referral for RAC review, or in some cases revocation of billing privileges.

HMOs, PPOs and Other Private Insurers

In addition to government programs, our facilities are reimbursed by differing types of private payers including HMOs, PPOs and other private insurers. Also included in this category are the patient responsibility portions for co-payment and deductible obligations under these programs. Our revenues from HMOs, PPOs and other private insurers were approximately 42.3% of our net patient revenues for the year ended December 31, 2019. Revenues from HMOs, PPOs and other private insurers are subject to contracts and other arrangements that require us to discount the amounts we customarily charge for healthcare services or accept fixed, pre-determined fees for our services. These discounted contractual arrangements often limit our ability to increase charges or revenues in response to increasing costs. We actively negotiate with these payers in an effort to maintain or increase the pricing of our healthcare services; however, we have no control over patients switching their healthcare coverage to a payer with which we have negotiated less favorable reimbursement rates. In recent years, an increasing number of our patients have moved to lower cost healthcare coverage plans, and such plans generally provide lower reimbursement rates and require patients to pay an increased portion of the costs of care through deductibles, co-payments or exclusions. Additionally, plans purchased through the Affordable Care Act health insurance marketplace exchanges (the "***Exchanges***") are increasingly using narrow and tiered networks that limit beneficiary provider choices. If we provide services when we are not a participating provider in the network, it can result in higher patient responsibility amounts that a patient may not have the ability to pay or may choose not to pay. We expect these trends to continue in the coming years.

Self-Pay Patients

Self-pay revenues are primarily generated through the treatment of uninsured patients. Our revenues from self-pay patients were approximately 0.7% of our net patient revenues for the year ended December 31, 2019. Beginning in 2014, our self-pay revenues began to decrease as a percentage of overall revenues due largely to a shift from self-pay to Medicaid and HMOs, PPOs and other private insurers for a portion of our patient population, which primarily has been a result of the Affordable Care Act and the expansion of Medicaid coverage in certain of the states in which we operate. These reductions partially offset trends our facilities experienced in prior years, which included increases in self-pay revenues due to a combination of broad economic factors, including high levels of unemployment in many of our markets and increasing numbers of individuals and employers who purchase insurance plans with high deductibles and high co-payments. We cannot predict how administrative or judicial interpretations, legislative actions or any other modifications to the Affordable Care Act that may be implemented or adopted, such as the cessation of cost sharing reduction payments or the repeal of the individual mandate, may impact our self-pay revenues.

Surprise Medical Billing

Congress is considering legislation to limit the "surprise" medical bills that are often received by individuals receiving emergency and certain other services (such as anesthesia services) from out-of-network providers. Various proposals have been introduced in Congress that would generally limit cost sharing for insured individuals who receive emergency and certain other services from out-of-network providers to in-network co-payment and deductible amounts, and would generally prohibit out-of-network providers from balance billing patients for any additional amounts. The proposals would either set payments from payers to out-of-network providers at the median in-network rate, or would allow payers and providers to refer payment disagreements to independent dispute resolution mechanisms. A number of states are considering or have already adopted legislation to eliminate surprise medical billing. We cannot predict how legislative actions to modify or pass these proposals may be implemented or adopted, or what impact, if any, this may have on our contracts with providers or on our revenues.

Price Transparency

Under the OPPS Rule for CY 2020, CMS finalized price transparency requirements that are applicable to hospitals and, beginning January 1, 2021, require (i) public online disclosure of all standard charges for all hospital items and services and (ii) public display in a consumer-friendly manner of cash prices, payer-specific negotiated charges, and de-identified minimum and maximum negotiated charges for at least 300 "shoppable" services (70 CMS-specified and 230 hospital-selected). The final rule also authorizes CMS to monitor hospital compliance with reporting requirements and to take actions to address hospital noncompliance (including issuing a warning notice, requesting a corrective action plan, and imposing civil monetary penalties). The Departments of the Treasury, Labor, and Health and Human Services have also undertaken regulatory efforts to increase price transparency with a proposal requiring health plans to publicly release all of their negotiated rates. On December 4, 2019, a lawsuit was filed challenging the final rule and CMS' new price transparency requirements. We are unable to predict the outcome of that litigation or what affect the public disclosure of hospitals' or insurance providers' negotiated rates would have on our future negotiations with payers or on our revenues.

Health Care Reform

The Affordable Care Act, which became federal law in 2010, dramatically altered the U.S. healthcare system and was intended to decrease the number of uninsured Americans and reduce the overall cost of healthcare by, among other things, requiring most Americans to obtain health insurance (the "***individual mandate***"), providing additional funding for Medicaid in states that choose to expand their programs, reducing IPPS, OPPS and Medicare and Medicaid DSH payments to providers, expanding the Medicare program's use of value-based purchasing programs, tying hospital payments to the satisfaction of certain quality criteria, and instituting certain private health insurance reforms. The Affordable Care Act has, however, been subject to a number of legislative and regulatory changes and court challenges and its future is uncertain.

For example, on January 20, 2017, President Trump issued an executive order that, among other things, stated that it was the intent of his administration to repeal the Affordable Care Act and, pending that repeal, instructed the executive branch of the federal government to defer or delay the implementation of any provision or requirement of the Affordable Care Act that would impose a fiscal burden on any state or a cost, fee, tax or penalty on any individual, family, health care provider, or health insurer. On October 12, 2017, President Trump issued another executive order related to the Affordable Care Act that resulted in the issuance of regulations that are intended to encourage the formation of association health plans and increase the maximum duration of and access to short-term limited duration health insurance plans, neither of which are required to cover all of the essential health benefits mandated by the Affordable Care Act. Portions of these regulations were later invalidated by the U.S. District Court for the District of Columbia, in a case that has been appealed to the D.C. Circuit Court of Appeals. In addition, a number of bills have been introduced in Congress that would repeal the Affordable Care Act and would replace it with varying health coverage plans, including plans that would allow insurers to sell health insurance across state lines, allow the use of health savings accounts ("***HSAs***") without a high-deductible plan, or give states the option to either keep the coverage framework created by the Affordable Care Act (e.g., expanded Medicaid, individual subsidies, and insurance exchanges) or utilize the increased federal funding that was intended for Medicaid expansion to be provided by the federal government under the Affordable Care Act to create HSAs that can be used by low-income individuals to purchase health insurance. Also, the Tax Act repealed the penalties associated with the individual mandate effective January 1, 2019. We cannot predict whether the Affordable Care Act will be repealed, replaced, or materially modified by Congress or the impact that the repeal of the penalties associated with the individual mandate will have on our facilities.

In addition to the administrative actions and legislative efforts to repeal, replace or modify the Affordable Care Act, there have been and will likely continue to be a number of legal challenges to various provisions of the Affordable Care Act and the regulations that have been promulgated thereunder. For example, in 2014, the U.S. House of Representatives (the "***House***") filed a lawsuit challenging the use of federal funds to pay insurance companies for cost sharing reductions that are provided to certain individuals who purchase insurance through the Exchanges. The House lawsuit was ultimately settled after HHS stopped making cost sharing reduction payments to insurance companies based on the determination that these payments had not been appropriated by Congress. A number of insurers have, however, filed litigation against HHS to recover the cost sharing reduction payments that have not been made. In addition, on December 14, 2018, the U.S. District Court for the Northern District of Texas held that, in light of the repeal of the penalties associated with the individual mandate, the entire Affordable Care Act was unconstitutional. The court did not, however, issue an injunction against the continued enforcement of the Affordable Care Act. On appeal, the U.S. Fifth Circuit Court of Appeals held that the individual mandate was unconstitutional but it remanded the case back to the U.S. District Court for the Northern District of Texas for further analysis as to whether the entire Affordable Care Act should be held to be unlawful. The U.S. Supreme Court has agreed to review the case, but it likely will not issue an opinion until 2021. We cannot predict the outcome of the litigation that has been filed by insurers relating to the cessation of HHS's cost sharing reduction payments, the impact that the cessation of HHS's cost sharing reduction payments will have on the premiums that are charged by insurers or the outcome of any of the litigation regarding the Affordable Care Act, including its constitutionality.

Unless specifically stated otherwise, our summary of provisions of the Affordable Care Act throughout the remainder of this section and elsewhere in this Report are based on the law as currently in effect. Additionally, refer to the section below captioned "Impact of the Affordable Care Act on the Company" for further discussion about the uncertainty surrounding the Affordable Care Act.

Expanded Coverage

Based on original Congressional Budget Office ("CBO") and CMS estimates, by 2020, the Affordable Care Act was originally expected to expand coverage to 32 to 34 million additional individuals (resulting in coverage of an estimated 95% of the legal U.S. population). This increased coverage was expected to occur through a combination of public program expansion and private sector health insurance and other reforms.

Public program expansion has been driven primarily by expanding the categories of individuals who are eligible for Medicaid coverage and allowing individuals with relatively higher incomes to qualify for Medicaid coverage.

The Affordable Care Act essentially made the expansion of the Medicaid program mandatory, but, in 2012, the U.S. Supreme Court held that the provision of the Affordable Care Act that authorized the Secretary of HHS to penalize states that chose not to participate in the expansion of the Medicaid program by removing all of their existing Medicaid funding was unconstitutional. Based on the U.S. Supreme Court's ruling, a number of states, including several in which the Company has facilities, have opted not to expand their Medicaid programs. Public program expansion has also occurred through provisions of the Affordable Care Act that authorize the federal government to subsidize states that create non-Medicaid plans for residents whose incomes are greater than 133% of the FPL but do not exceed 200% of the FPL and allow Medicaid participating hospitals to make presumptive determinations of Medicaid eligibility for certain categories of individuals, such as pregnant women, infants, children, and parents and other caretaker relatives and their spouses. If an individual is found to be presumptively eligible for Medicaid benefits, the hospital will get paid for the services it provides during the temporary presumptive eligibility period, just as though the patient were already enrolled in the Medicaid program.

The expansion of health coverage through the private sector as a result of the Affordable Care Act has occurred through new requirements on health insurers, employers and individuals. For example, commencing January 1, 2014, health insurance companies were prohibited from imposing annual coverage limits, excluding persons based upon pre-existing conditions or denying coverage for any individual who is willing to pay the premiums for such coverage. In addition, since January 1, 2011, each health plan has been required to keep its annual non-medical costs lower than 15% of premium revenue for the group market and lower than 20% in the small group and individual markets or rebate its enrollees the amount spent in excess of the percentage. Also, since September 23, 2010, health insurers have not been permitted to deny coverage to children based upon a pre-existing condition and must allow dependent care coverage for children up to 26 years old. Larger employers are subject to new requirements and incentives to provide health insurance benefits to their full time employees, and, effective January 1, 2016, all employers subject to the requirement are required to offer health insurance coverage to 95% of their full-time employees and their dependents in order to avoid penalties.

To facilitate the purchase of health insurance by individuals and small employers, each state was required to establish an Exchange by January 1, 2014. For individuals and families below 400% of the FPL, the cost of obtaining health insurance through the Exchanges is subsidized by the federal government. Those with lower incomes will be eligible to receive greater subsidies. Health insurers participating in the Exchange must offer a set of minimum benefits to be defined by HHS and may offer more benefits. Any benefits to us from the expansion of private sector coverage depend in large part on our success in contracting with payers whose policies are listed on the Exchanges. We currently have contracts with Exchange payers in every state in which we operate, and the reimbursement rates paid under those contracts generally are comparable to that paid to us by other private payers.

Although we expect this trend to continue, the future impact and timing of such expansion remains difficult to predict for the reasons discussed above, will be gradual and may not offset scheduled decreases in reimbursement. Additionally, we cannot predict the impact of the cessation of cost sharing reduction payments, the repeal of the individual mandate or any other modifications to the Affordable Care Act that may be adopted.

Public Program Spending

The Affordable Care Act provides for a number of Medicare, Medicaid and other federal healthcare program spending reductions. The CBO previously estimated that between 2013 and 2023, these program spending reductions would include $415 billion in Medicare fee-for-service market basket and productivity reimbursement reductions for all providers, the majority of which ($260 billion) would come from hospitals. The CBO's estimate also included an additional $56 billion in reductions of Medicare and Medicaid DSH funding. CMS had originally estimated that the Affordable Care Act would result in $64 billion in reductions of Medicare and Medicaid DSH funding, with $50 billion of the reductions coming from Medicare.

Accountable Care Organizations

The Affordable Care Act requires HHS to establish a Medicare Shared Savings Program that promotes accountability and coordination of care through the creation of accountable care organizations ("***ACOs***"). ACOs are groups of hospitals, physicians and other designated professionals and suppliers who come together voluntarily to invest in infrastructure and redesign delivery processes to achieve high quality and efficient delivery of services. The program is intended to produce savings as a result of improved quality and operational efficiency. ACOs that achieve quality performance standards established by HHS are eligible to share in a portion of the amounts saved by the Medicare program. There are several types of ACO programs, and as of July 1, 2019, 518 ACOs had been established to participate in the Medicare Shared Savings Program, and additional ACOs are being established by private payers. A few of our facilities currently participate in ACOs.

Bundled Payment Pilot Programs

The Affordable Care Act created the Center for Medicare & Medicaid Innovation ("***CMMI***") and made it responsible for establishing demonstration projects and other initiatives in order to identify, develop, test and encourage the adoption of new methods of delivering and paying for healthcare that create savings under the Medicare and Medicaid programs while improving quality of care. Under these projects and initiatives, participating providers agree to receive one payment for services provided to Medicare patients for certain medical conditions or episodes of care and accept accountability for costs and the quality of care that is provided. By financially rewarding providers for quality, cost-effective care and penalizing providers when costs exceed a certain amount, these models are intended to lead to higher quality, more coordinated care at a lower cost to the Medicare program. In connection with these programs, CMMI has developed a voluntary Bundled Payment for Care Improvement Advanced Model ("***BPCI Advanced***") to test innovative payment and service delivery models that have the potential to reduce Medicare and Medicaid expenditures while preserving or enhancing the quality of care for beneficiaries. Participation in bundled payments programs is generally voluntary, but CMS does currently require hospitals in certain geographic areas to participate in the Comprehensive Care for Joint Replacement model which covers certain extremity joint replacement procedures. CMS has indicated that it expects to increase opportunities for providers to participate in voluntary bundled payment models initiatives and that it may create additional mandatory bundled payment models in the future. Several of our facilities currently participate in bundled payment programs.

Specialty Hospital Limitations

Over the last decade, we have faced competition from hospitals that have physician ownership. The Affordable Care Act prohibits newly created physician-owned hospitals from billing for Medicare patients referred by their physician owners. While the Affordable Care Act grandfathers existing physician-owned hospitals, it does not allow these hospitals to increase the percentage of physician ownership and significantly restricts their ability to expand. As of December 31, 2019, we operated four hospitals through joint ventures with physicians in which we own a controlling interest.

Impact of the Affordable Care Act on the Company

The expansion of health insurance coverage under the Affordable Care Act has resulted in an increase in the number of patients using our facilities who have either private or public program coverage. It is difficult to predict with great precision the timing or size of positive or negative impacts on revenue as a result of the Affordable Care Act, because of uncertainty surrounding a number of material factors, including the following:

- the elimination of the penalties associated with the individual mandate;
- the cessation of cost sharing reduction payments to insurers;
- the possibility that the Affordable Care Act will be repealed and/or replaced or further modified by Congress;
- even if the Affordable Care Act is not repealed, replaced or further modified, the level of disruption that may be caused by continuing legal challenges and other efforts to delay, block or eliminate specific provisions of the Affordable Care Act, including the outcome of continuing litigation relating to the constitutionality of the Affordable Care Act;
- how many previously uninsured individuals will ultimately obtain coverage as a result of the Affordable Care Act;
- what percentage of the future newly insured patients will be covered under the Medicaid program and what percentage will be covered by private health insurers;
- the extent to which states impose work and community engagement and/or premium requirements on their Medicaid beneficiaries;
- the number of states that ultimately elect to expand their Medicaid programs and when that expansion occurs;
- whether any states that have expanded their Medicaid programs will scale back such expansion through the imposition of work or premium requirements or otherwise as the Enhanced FMAP is reduced;
- the extent to which states will enroll any new Medicaid participants in managed care programs;
- the rates charged by private payers for insurance purchased on the Exchanges;
- the change, if any, in the volume of inpatient and outpatient hospital services that are sought by and provided to previously uninsured individuals;
- the future rates paid to hospitals by private payers for newly covered individuals under different plans, including those covered through the Exchanges and those who might be covered under the Medicaid program under contracts with the state;
- increasing self-pay as a result of individuals in the Exchanges who select high deductible plans, and risks presented by their ability to pay such deductibles;
- whether or not private insurers will participate in the Exchanges, and whether such participation is through the use of narrow networks that restrict the number of participating providers or tiered networks that impose significantly higher cost sharing obligations on patients that obtain services from providers in a disfavored tier; and
- whether the net effect of the Affordable Care Act, including the prohibition on excluding individuals based on pre-existing conditions, the requirement to keep medical costs lower than a specified percentage of premium revenue, other health insurance reforms and the annual fee applied to all health insurers, will be to put pressure on the bottom line of health insurers, which in turn might cause them to seek to reduce payments to hospitals with respect to both newly insured individuals and their existing business.

Additionally, since approximately 55.2% of our revenues in 2019 were related to patients participating in Medicare and Medicaid programs, collectively, the reductions in Medicare and Medicaid reimbursement and in the growth of spending by the Medicare and Medicaid programs that are contemplated by the Affordable Care Act will significantly impact us and could offset any positive effects of the Affordable Care Act. It is difficult to predict with great precision the size of the revenue reductions to Medicare and Medicaid spending, because of uncertainty regarding a number of material factors, including the following:

- the amount of overall revenues we will generate from Medicare and Medicaid business when the reductions are fully implemented;
- whether reductions required by the Affordable Care Act will be changed by statute;
- whether efforts to reform Medicaid funding into block grants or per capita caps will be successful, and, if implemented, the impact such changes may have on the Medicaid programs of states in which we operate;
- the size of the Affordable Care Act's annual productivity adjustment to the market basket in future years;
- the amount of the Medicare DSH reductions that are made;
- the allocation to our hospitals of the Medicaid DSH reductions, if and when they are put into effect;
- what the losses in revenues will be, if any, from the Affordable Care Act's quality initiatives;
- the scope and nature of potential changes to Medicare reimbursement methods, such as an emphasis on bundling payments or coordination of care programs; and
- reductions to Medicare payments CMS may impose for "excessive readmissions."

Because of the many variables involved, we are unable to predict the future effect on the Company of the expected increases or decreases in insured individuals using our facilities, the reductions in Medicare spending and reductions in Medicare and Medicaid DSH funding, and numerous other provisions in the Affordable Care Act that may affect us. Additionally, it is unclear how many states will ultimately implement the Medicaid expansion, whether the Medicaid program will be reformed, or whether the Affordable Care Act will be replaced, further modified or found to be unconstitutional. Due to these factors, we are unable to predict with any reasonable certainty or otherwise quantify the future impact of the Affordable Care Act on our business model, financial condition or result of operations.

Competition for Patients

Our hospitals and other healthcare businesses operate in extremely competitive environments. Competition among healthcare providers occurs primarily at the local level. Accordingly, each facility develops its own strategies to address competition locally. A hospital's position within the geographic area in which it operates is affected by a number of competitive factors, including, but not limited to:

- the scope, breadth and quality of services a hospital offers to its patients and physicians;
- whether new, competitive services are subject to certificate of need or other restrictions;
- the number, quality and specialties of the physicians who admit and refer patients to the hospital;
- the nurses and other healthcare professionals employed by the hospital or on the hospital's staff;
- the hospital's reputation;
- its managed care contracting relationships;
- its location and the location and number of competitive facilities and other healthcare alternatives;
- the physical condition of its buildings and improvements;
- the quality, age and state-of-the-art of its medical equipment;
- its parking or proximity to public transportation;
- the length of time it has been a part of the community;
- the relative convenience of the manner in which care is provided (for example, whether services are available on an outpatient basis and whether services can be obtained quickly);
- the choices made by the physicians on the medical staff of the hospital; and
- the charges for its services.

In addition, tax-exempt competitors may have certain financial advantages not available to our facilities, such as endowments, charitable contributions, tax-exempt financing, exemptions from sales, property and income taxes, and participation in the 340B Program. In certain states, some not-for-profit hospitals are permitted by law to directly employ physicians while for-profit hospitals are prohibited from doing so.

We also face increasing competition from specialized care providers, including freestanding emergency departments and outpatient surgery, oncology, physical therapy, diagnostic and urgent care centers, as well as competing services rendered in physician offices. To the extent that other providers are successful in developing specialized outpatient facilities, our market share for those specialized services will likely decrease. Physician competition also has increased as physicians, in some cases, have become equity owners in surgery centers and outpatient diagnostic centers to which they refer patients. Some of our hospitals have developed specialized outpatient facilities where necessary to compete with these other providers.

Competition for Professionals

Our facilities must also compete for professional talent. A significant factor in our future success will be the ability of our facilities to attract and retain physicians, as it is physicians who decide whether a patient is admitted to the hospital and the procedures to be performed. We seek to attract physicians by striving to employ excellent nurses, equipping our facilities with technologically advanced equipment and an attractive, up-to-date physical plant, properly maintaining the equipment and physical plant, and otherwise creating an environment within which physicians choose to practice. While physicians may terminate their association with our facilities at any time, we believe that by striving to maintain and improve the quality of care at our facilities and by maintaining ethical and professional standards, our facilities will be better positioned to attract and retain qualified physicians with a variety of specialties.

We also recruit physicians to the communities in which our facilities are located. The types, amount and duration of compensation and assistance we can provide to recruited physicians are limited by the federal physician self-referral law (commonly referred to as the "***Stark law***"), the Anti-kickback Statute, state anti-kickback and physician self-referral statutes, and related regulations. The Stark law requires, among other things, that recruitment assistance can only be provided to physicians who meet certain geographic and practice requirements, that the amount of assistance cannot be changed during the term of the recruitment agreement, and that the recruitment payments cannot generally benefit physicians currently in practice in the community beyond recruitment costs actually incurred. In addition to these legal requirements, there is competition from other communities and facilities for these physicians, and this competition continues after the physician begins practicing in one of our communities.

Many physicians today prefer to be employed, rather than operating their own practices or joining existing medical groups. Our hospitals and affiliated entities employed more physicians during 2019 than 2018. When employing office-based physicians, we also often employ office employees and other personnel necessary to support these physicians and incur additional expenses as a result. We expect this trend to continue.

We compete with other healthcare providers in recruiting and retaining qualified management and staff personnel responsible for the day-to-day operations of each of our facilities, including nurses and other non-physician healthcare professionals. In some markets, the scarce availability of nurses and other medical support personnel presents a significant operating issue. This shortage may require us to enhance wages and benefits to recruit and retain nurses and other medical support personnel, recruit personnel from foreign countries, and hire more expensive temporary personnel. We also depend on the available labor pool of semi-skilled and unskilled employees in each of the markets in which we operate.

Employees

At December 31, 2019, we had approximately 55,000 employees, including approximately 12,000 part-time employees. The majority are hospital-based employees, including nursing staff, physical and occupational therapists, laboratory and radiology technicians, pharmacy staff, facility maintenance workers and the administrative staffs of our facilities. Approximately 3,000 of our employees across certain of our facilities are unionized. While some of our non-unionized facilities experience union organizing activity from time to time, currently we do not expect these efforts to affect our future operations materially. Our facilities, like most facilities, have experienced rising labor costs. Our labor costs also may increase at higher rates among unionized employees. Unionized employees also may have rights under their collective bargaining agreements that restrict the ability of a facility to take certain actions with respect to these employees.

Government Regulation

Overview

All participants in the healthcare industry are required to comply with extensive government regulations at the federal, state and local levels. Under these laws and regulations, facilities must meet requirements for licensure and to qualify to participate in government healthcare programs, including the Medicare and Medicaid programs. These requirements relate to the adequacy of medical care, equipment, personnel, operating policies and procedures, maintenance of adequate records, rate-setting, compliance with building codes and environmental protection laws. If we fail to comply with applicable laws and regulations, we may be subject to criminal penalties and civil sanctions, and our facilities may lose their licenses and ability to participate in Medicare and Medicaid. In addition, government regulations frequently change. When regulations change, we may be required to make changes in our facilities, equipment, personnel and services so that our facilities remain licensed and qualified to participate in these programs. We believe that our facilities are in substantial compliance with current federal, state and local regulations and standards.

Acute care hospitals are subject to periodic inspection by federal, state and local authorities to determine their compliance with applicable regulations and requirements necessary for licensing, certification and accreditation. All of our hospitals are currently licensed under appropriate state laws and are qualified to participate in the Medicare and Medicaid programs. In addition, as of December 31, 2019, with the exception of Bluegrass Community Hospital and Saline Memorial Hospital, all of our hospitals were accredited by the Joint Commission.

Fraud and Abuse Laws

Participation in Medicare and/or Medicaid programs is heavily regulated by federal statutes and regulations. If a hospital fails to comply substantially with the numerous federal laws governing the facility's activities, the hospital's participation in the Medicare and/or Medicaid programs may be terminated, and/or civil or criminal penalties may be imposed. For example, a hospital may lose its ability to participate in Medicare and/or Medicaid programs if it, among other things:

- submits claims to Medicare and/or Medicaid for services not provided or misrepresents actual services provided in order to obtain higher payments;
- pays money to induce the referral of patients or purchase of items or services where such items or services are reimbursable under a federal or state healthcare program; or
- fails to provide appropriate emergency medical screening services to any individual who comes to a hospital's campus or otherwise fails to properly treat and transfer emergency patients.

Anti-kickback Statute

The Anti-kickback Statute prohibits the payment, receipt, offer or solicitation of anything of value, whether in cash or in kind, with the intent of generating referrals or orders, or recommending or arranging for services or items covered by a federal or state healthcare program. Violations of the Anti-kickback Statute are punishable by, among other things, imprisonment, criminal fines, substantial civil monetary penalties that are subject to annual adjustments for inflation for each violation, damages equal to three times the total remuneration associated with the unlawful referrals or services, and/or possible exclusion from participating in Medicare, Medicaid or other governmental healthcare programs. Violations of the Anti-kickback Statute can also result in liability under the False Claims Act.

The Office of Inspector General ("***OIG***") of HHS is responsible for identifying fraud and abuse activities in government healthcare programs. In order to fulfill its duties, the OIG performs audits, investigations and inspections. In addition, it provides guidance to healthcare providers by identifying types of activities that could violate the Anti-kickback Statute. The OIG has identified the following hospital/physician incentive arrangements, among other things, as potential violations:

- payment of any incentive by a hospital based on physician referrals of patients to the hospital;
- use of free or significantly discounted office space or equipment;
- provision of free or significantly discounted billing, nursing or other staff services;
- free training (other than compliance training) for a physician's office staff, including management and laboratory technique training;
- guarantees which provide that if a physician's income fails to reach a predetermined level, the hospital will pay any portion of the remainder;
- low-interest or interest-free loans, or loans that may be forgiven if a physician refers patients to the hospital;
- payment of the costs for a physician's travel and expenses for conferences;
- payment of services which require few, if any, substantive duties by the physician or which are in excess of the fair market value of the services rendered; or
- purchasing goods or services from physicians at prices in excess of their fair market value.

We have a variety of financial relationships with physicians who refer patients to our facilities, including employment contracts, independent contractor agreements, professional service agreements, leases and joint ventures. We provide financial incentives to recruit physicians to relocate to communities served by our facilities. These incentives for relocation include minimum revenue guarantees and, in some cases, loans. The OIG is authorized to publish regulations outlining activities and business relationships that would be deemed not to violate the Anti-kickback Statute. These regulations are known as "safe harbor" regulations. Failure to comply with the safe harbor regulations does not make conduct illegal, but instead the safe harbors delineate standards that, if complied with, protect conduct that might otherwise be deemed in violation of the Anti-kickback Statute. We intend for all our business arrangements to be in full compliance with the Anti-kickback Statute and seek to structure each of our arrangements with physicians to fit as closely as possible within an applicable safe harbor. However, not all of our business arrangements fit wholly within safe harbors, so we cannot guarantee that these arrangements will not be scrutinized by government authorities or, if scrutinized, that they will be determined to be in compliance with the Anti-kickback Statute or other applicable laws.

Stark Law

The Stark law prohibits physicians from referring Medicare and Medicaid patients to entities with which they or any of their immediate family members have a financial relationship if those entities provide certain "designated health services" unless an exception applies. The Stark law also prohibits entities that provide designated health services reimbursable by Medicare and Medicaid from billing the Medicare and Medicaid programs for any items or services that result from a prohibited referral and requires entities to refund amounts received for items and services provided pursuant to a prohibited referral on a timely basis. "Designated health services" include, among other things, inpatient and outpatient hospital services, laboratory services and radiology services. A violation of the Stark law may result in (i) a denial of payment, (ii) substantial civil monetary penalties that are subject to annual adjustments for inflation for each violation or circumvention scheme and (iii) exclusion from participation in the Medicare and Medicaid programs and other governmental healthcare programs. In addition, violations of the Stark law could also result in penalties under the False Claims Act.

There are ownership and compensation arrangement exceptions to the self-referral prohibition. There are also exceptions for many of the customary financial arrangements between physicians and facilities, including employment contracts, leases and recruitment agreements, and there is a "whole hospital exception," which allows a physician to make a referral to a hospital if, among other things, the physician owns an interest in the entire hospital, as opposed to an ownership interest in a department of the hospital. The Affordable Care Act significantly modified the requirements of the whole hospital exception and placed a number of restrictions on the ownership structure, operations, and expansion of physician owned hospitals. Four of our facilities are subject to those requirements. We intend for our financial arrangements with physicians to comply with the exceptions included in the Stark law and regulations. In recent years, CMS has issued a number of proposed and final rules modifying and/or clarifying the Stark law exceptions. While some changes have been implemented, others remain in proposed form or have been delayed. We anticipate that there will be further changes in the future, and those changes may require us to modify our activities.

In addition to issuing new regulations, or applying new interpretations to existing rules or regulations, the federal government has modified its approach for ensuring compliance with and enforcing penalties for violations of the Stark law. In 2010, CMS also issued a "self-referral disclosure protocol" for hospitals and other providers that wish to self-disclose potential violations of the Stark law and attempt to resolve those potential violations and any related overpayment liabilities at levels below the maximum penalties and amounts set forth in the statute.

False Claims Act

The False Claims Act prohibits providers from, among other things, knowingly submitting false or fraudulent claims for payment to the federal government and failing to refund identified overpayments received from the government. The False Claims Act defines the term "knowingly" broadly, and while simple negligence generally will not give rise to liability, submitting a claim with reckless disregard to its truth or falsity can constitute the "knowing" submission of a false or fraudulent claim for the purposes of the False Claims Act. The "qui tam" or "whistleblower" provisions of the False Claims Act allow private individuals to bring actions under the False Claims Act on behalf of the government. These private parties are generally entitled to share in any amounts recovered by the government, and, as a result, the number of "whistleblower" lawsuits that have been filed against providers has increased significantly in recent years. When a private party brings a qui tam action under the False Claims Act, because such cases are filed under seal, the defendant will generally not be aware of the lawsuit until the government makes a determination whether it will intervene and take a lead in the litigation. If found liable under the False Claims Act, a provider may be required to pay up to three times the actual damages sustained by the government plus substantial civil monetary penalties that are subject to annual adjustments for inflation for each separate false claim. The government and whistleblowers have used the False Claims Act to prosecute Medicare, Medicaid and other government healthcare program fraud such as coding errors, billing for services not provided, submitting false cost reports and providing care that is not medically necessary or that is substandard in quality. Violations of the Stark law can result in False Claims Act liability, as well.

Changes in the Regulatory Environment

The Fraud Enforcement and Recovery Act of 2009 ("***FERA***") expanded the scope of the False Claims Act by, among other things, creating liability for knowingly and improperly avoiding or decreasing an obligation to pay money to the federal government and broadening protections for whistleblowers. In addition, the Affordable Care Act made several significant changes to healthcare fraud and abuse laws, including providing additional enforcement tools to the government, increasing cooperation between agencies by establishing mechanisms for the sharing of information and enhancing criminal and administrative penalties for non-compliance. For example, the Affordable Care Act (1) provides $350 million in increased federal funding over 10 years to fight healthcare fraud, waste and abuse, (2) expands the scope of the RAC program to include Medicaid, (3) authorizes HHS, in consultation with the OIG, to suspend Medicare and Medicaid payments to a provider of services or a supplier "pending an investigation of a credible allegation of fraud," (4) provides Medicare contractors with additional flexibility to conduct random prepayment reviews and (5) requires providers to adopt compliance programs that meet certain specified requirements as a condition of their Medicare enrollment. The Affordable Care Act also expanded the scope of the False Claims Act to cover payments in connection with the Exchanges if those payments include any federal funds and provides that claims submitted in connection with patient referrals that result from violations of the Anti-kickback Statute constitute false claims for the purposes of the False Claims Act.

In addition to the changes mentioned above, the Affordable Care Act created False Claims Act liability for the knowing failure to report and return an overpayment within 60 days of the identification of the overpayment or the date by which a corresponding cost report is due, whichever is later. On February 11, 2016, CMS published a final rule that provides clarification around the meaning of overpayment identification and generally establishes a six year lookback period for Medicare Part A and Part B providers and suppliers. To avoid liability, providers must, among other things, carefully and accurately code claims for reimbursement, promptly return overpayments, accurately prepare cost reports and timely resolve credit balances. In light of the provisions of FERA and the Affordable Care Act relating to reporting and refunding overpayments and the robust funding for enforcement activities and audits, an increasing number of healthcare providers have self-reported potential violations of law, including technical violations of certain fraud and abuse laws, and refunded overpayments to avoid incurring fines and penalties. It is likely such refunds and voluntary disclosures will continue in the future, and we will make such refunds and disclosures in accordance with the law.

State Laws

Many of the states in which we operate have adopted laws similar to the Anti-kickback Statute and the Stark law. These state laws are generally very broad in scope and typically apply to patients whose treatment is covered by the Medicaid program and, in some cases, to all patients regardless of payment source. In addition, many of the states in which we operate have false claims statutes that impose civil and/or criminal liability for the types of acts prohibited by the False Claims Act or that otherwise prohibit the submission of false or fraudulent claims to the state government or Medicaid program. Violations of these laws are punishable by substantial civil and/or criminal penalties and, in many cases, the loss of the facility's license. Although we believe that our operations and arrangements with physicians and other referral sources comply with the applicable state fraud and abuse laws, most of these laws have not been interpreted by any court or governmental agency, and there can be no assurance that the regulatory authorities responsible for enforcing these laws will determine that our arrangements comply with the applicable requirements.

Emergency Medical Treatment and Active Labor Act

All of our facilities are subject to EMTALA. This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions or transfer exists regardless of a patient's ability to pay for treatment. Off-campus facilities such as specialty clinics, surgery centers and other facilities that lack emergency departments or otherwise do not treat emergency medical conditions are not generally subject to EMTALA. They must, however, have policies in place that explain how the location should proceed in an emergency situation, such as transferring the patient to the closest hospital with an emergency department. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay, including substantial civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. CMS has actively enforced EMTALA and has indicated that it will continue to do so in the future. Although we believe that our hospitals comply with EMTALA, we cannot predict whether CMS will implement new requirements in the future and, if so, whether our hospitals will comply with any new requirements.

Administrative Simplification Provisions and Privacy and Security Requirements

We are subject to the administrative simplification provisions of the Health Insurance Portability and Accountability Act of 1996 ("***HIPAA***") which require the use of uniform electronic data transmission standards for healthcare claims and payment transactions submitted or received electronically. These provisions are intended to encourage electronic commerce in the healthcare industry. Additionally, we are subject to the privacy, security and breach notification regulations promulgated under HIPAA and the Health Information Technology for Economic and Clinical Health Act (the "***HITECH Act***"), which are designed to protect the confidentiality, availability and integrity of protected health information ("***PHI***") and establish an array of patient rights with respect to such information. The HIPAA privacy, security and breach notification regulations apply to covered entities, which include health plans, health care clearinghouses, and health care providers that conduct certain standard transactions (such as billing insurance) electronically. In addition, certain provisions of the privacy, security and breach notification regulations apply to business associates, which are entities that perform certain functions or activities on behalf of covered entities that require access to or the use or disclosure of protected health information. In certain circumstances, a covered entity may be held liable for the actions of its business associate if HHS determines an agency relationship exists between the covered entity and the business associate under federal agency law.

The HIPAA privacy regulations, which apply to individually identifiable health information held or disclosed by a covered entity in any form, whether communicated electronically, on paper or orally, impose extensive administrative requirements on us, which require that we adopt policies and procedures to comply with HIPAA, routinely train our workforce members on our HIPAA policies, provide patients with a copy of our notice of privacy practices, comply with rules governing the use and disclosure of PHI and impose these rules, by contract, on any business associate to whom we disclose such information in order to perform functions on our behalf. They also create rights for patients in their health information, such as the right to access and amend their health information and to request an accounting for certain disclosures of their health information. The HIPAA security regulations require us to establish and maintain reasonable and appropriate administrative, technical and physical safeguards to ensure the integrity, confidentiality and the availability of electronic health information and to perform ongoing assessments of the potential risks and vulnerabilities to the confidentiality, integrity and availability of such information. In addition, the HIPAA breach notification regulations require that we report breaches of unsecured (unencrypted) PHI to affected individuals without unreasonable delay, but in no case later than 60 calendar days of discovery of the breach. Notification must also be made to HHS and, in certain cases involving large breaches, to the local media. HHS is required to report on its website a list of all covered entities that report a breach involving more than 500 individuals. All non-permitted uses or disclosures are presumed to be breaches unless the covered entity or business associate can demonstrate that there is a low probability that the information has been compromised. We implement a comprehensive set of HIPAA policies and procedures, which we believe materially complies with the privacy, security and breach notification requirements of HIPAA.

Violations of the HIPAA regulations may result in criminal penalties and substantial civil monetary penalties subject to a limit for violations of the same requirement in a calendar year. The civil monetary penalties are also subject to annual inflation adjustments. In addition, state attorneys general are authorized to bring civil actions seeking either injunction or damages up to $25,000 for violations of the same requirement in a calendar year in response to HIPAA violations that affect their state residents. HHS has the discretion in many cases to resolve HIPAA violations through informal means without the imposition of penalties. However, the HIPAA privacy, security and breach notification regulations have and will continue to impose significant costs on our facilities in order to comply with these standards. We expect increased enforcement of the HIPAA regulations.

Our facilities continue to remain subject to other applicable federal or state laws that are more restrictive than the HIPAA privacy and security regulations, which could impose additional penalties on us. For example, the Federal Trade Commission uses its consumer protection authority to initiate enforcement actions against companies whose inadequate data security programs may expose consumers to fraud, identity theft and privacy intrusions, including the security programs of entities subject to the HIPAA regulations.

Corporate Practice of Medicine and Fee-Splitting

Some states have laws that prohibit unlicensed persons or business entities, including corporations or business organizations that own hospitals, from employing physicians. Some states also have adopted laws that prohibit direct or indirect payments or fee-splitting arrangements between physicians and unlicensed persons or business entities. Possible sanctions for violations of these restrictions include loss of a physician's license, civil and criminal penalties and rescission of business arrangements. These laws vary from state to state, are often vague and have seldom been interpreted by the courts or regulatory agencies. We attempt to structure our arrangements with healthcare providers to comply with the relevant state laws and the few available judicial and regulatory interpretations.

Certificates of Need

The construction of new facilities, the acquisition or expansion of existing facilities and the addition of new services and expensive equipment at our facilities may be subject to state laws that require prior approval by state regulatory agencies. These certificate of need laws generally require that a state agency determine the public need and give approval prior to the construction or acquisition of facilities or the addition of the new equipment or services and allow competing healthcare providers to challenge the need for the facility, service or equipment. We operate facilities in certain states that have adopted certificate of need laws. If we fail to obtain necessary state approval, we will not be able to expand our facilities, complete acquisitions or add new services at our facilities in these states. Violation of these state laws may result in the imposition of civil sanctions or the revocation of hospital licenses. Some states in which we operate do not have certificate of need requirements. Additionally, from time to time, states with existing requirements may repeal or limit the scope of their certificate of need programs. Our facilities in states that do not have (or limit the scope of) certificate of need programs could be subject to increased competition from other providers who may choose to enter the market.

Not-for-Profit Hospital Conversion Legislation

Many states have adopted legislation regarding the sale or other disposition of hospitals operated by not-for-profit entities. In states that do not have such legislation, the attorneys general have demonstrated an interest in reviewing these transactions under their general obligations to protect charitable assets. These legislative and administrative efforts primarily focus on the appropriate valuation of the assets divested and the use of the proceeds of the sale by the not-for-profit seller. Reviews and, in some instances, approval processes adopted by state authorities can add additional time to the closing of a not-for-profit hospital acquisition, and can also impose on buyers ongoing requirements to provide certain levels of charity care, or limit buyers' ability to discontinue particular service lines or to sell or otherwise dispose of a converted hospital. Future actions by state legislators or attorneys general may seriously delay or even prevent our ability to acquire certain hospitals.

State Hospital Rate-Setting Activity

We currently operate two hospitals in West Virginia. The West Virginia Health Care Authority requires that requests for increases in hospital charges be submitted annually. Requests for rate increases are reviewed by the West Virginia Health Care Authority and are either approved at the amount requested, approved for lower amounts than requested, or are rejected. As a result, in West Virginia, our ability to increase our rates to compensate for increased costs per admission is limited, and the operating margins for our hospitals located in West Virginia may be adversely affected if we are not able to increase our rates as our expenses increase. We can provide no assurance that other states in which we operate hospitals will not enact similar rate-setting laws in the future.

Environmental Regulation

Our healthcare operations generate medical waste that must be disposed of in compliance with federal, state and local environmental laws, rules and regulations. Our operations, as well as our purchases and sales of healthcare facilities, are also subject to compliance with various other environmental laws, rules and regulations. Such compliance costs are not significant, and we do not anticipate that such compliance costs will be significant in the future.

Compliance Program

We maintain a company-wide ethics and compliance program designed to ensure that we maintain high standards of ethical conduct in the operation of our business, and to meet or exceed applicable federal guidance and industry standards. We continually implement written policies and procedures for all of our employees to promote compliance with all applicable laws, regulations and Company policies, and to encourage a "culture of compliance" within the Company and its facilities. The organizational structure of our ethics and compliance program includes oversight by our Board of Directors and compliance committees at the Company and facility levels. We have compliance officers and personnel at the Company level and at our facilities. Other features of our compliance program include initial and periodic ethics and compliance training, systems for identifying and tracking compliance issues (including databases and hotlines for employees to report, without fear of retaliation, any suspected legal or ethical violations), regular auditing and monitoring of compliance issues, including coding audits and reviews of our financial relationships with physicians, and prompt review and resolution of identified issues.

Our compliance program also oversees the implementation and monitoring of the standards set forth by HIPAA for privacy. Ongoing HIPAA compliance also includes self-monitoring of HIPAA policy and procedure implementation by each of our healthcare facilities and oversight at the Company level.

Risk Management and Insurance

Given the nature of our operating environment, we are subject to potential professional liability claims, employee workers' compensation claims and other claims. To mitigate a portion of this risk, we maintain insurance for individual professional liability claims and employee workers' compensation claims exceeding self-insured retention ("***SIR***") and deductible levels. At December 31, 2019, our SIR for professional liability claims is $5.0 million per claim, with a $5.0 million inner aggregate, at the majority of our facilities. Additionally, we participate in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2019, our deductible for workers' compensation claims was $1.0 million per claim in all states in which we operate except for Montana, Oklahoma, Ohio, Washington and Wyoming. We participate in state-specific programs for our workers' compensation claims arising in these states. Our SIR and deductible levels are evaluated annually as a part of our insurance program's renewal process.

We also maintain directors' and officers', property, some professional liability and other types of insurance coverage with unrelated commercial carriers. Our directors' and officers' liability insurance coverage for current officers and directors is a program that protects us as well as the individual director or officer. We maintain property insurance through unrelated commercial insurance companies.

We operate a captive insurance company under the name Point of Life Indemnity, Ltd. This captive insurance company, which is licensed by the Cayman Islands Monetary Authority and is a wholly-owned subsidiary of LifePoint, issues malpractice insurance policies primarily to our employed physicians.

Item 1A. ***Risk Factors.***

Any of the following risks could materially and adversely affect our business, financial condition or results of operations. In addition, the risks described below are not the only risks that we face. The following information should be read in conjunction with Part II, Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations." Additional risks and uncertainties not currently known to us or those that we currently view to be immaterial could also materially and adversely affect our business, financial condition or results of operations.

Our substantial indebtedness could materially and adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry and prevent us from making debt service payments on the Notes.

We are a highly leveraged company. As of December 31, 2019, we had total outstanding debt of approximately $6,100.0 million, excluding capital and financing leases and unamortized debt issuance costs.

Our substantial indebtedness could have important consequences for the lenders and holders of our indebtedness. For example, it could:

- limit our ability to borrow money for our working capital, capital expenditures, debt service requirements, strategic initiatives or other purposes;
- make it more difficult for us to satisfy our obligations with respect to our indebtedness, including the Notes, and any failure to comply with the obligations of any of our debt instruments, including restrictive covenants and borrowing conditions, could result in an event of default under the indentures governing the Notes and the agreements governing other indebtedness;
- require us to dedicate a substantial portion of our cash flow from operations to the payment of interest and the repayment of our indebtedness, thereby reducing funds available to us for other purposes;
- limit our flexibility in planning for, or reacting to, changes in our operations or business;
- make us more highly leveraged than some of our competitors, which may place us at a competitive disadvantage;
- make us more vulnerable to downturns in our business, our industry or the economy;
- restrict us from making strategic acquisitions, engaging in development activities, introducing new technologies or exploiting business opportunities;
- cause us to make non-strategic divestitures;
- limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds or dispose of assets;
- prevent us from raising the funds necessary to repurchase all Notes tendered to us upon the occurrence of certain changes of control, which failure to repurchase would constitute an event of default under the Indentures; or
- expose us to the risk of increased interest rates, as certain of our borrowings, including borrowings under the ABL Facility and the Term Loan Facility, are at variable rates of interest.

In addition, the ABL Agreement, the Term Loan Agreement and the Indentures contain restrictive covenants that limit or will limit our ability to engage in activities that may be in our long-term best interest. Our failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of substantially all of our existing and future indebtedness.

We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness that may not be successful.

Our ability to pay principal and interest and to satisfy our other debt obligations will depend upon, among other things:

- our future financial and operating performance (including the realization of any cost savings described herein), which will be affected by prevailing economic, industry and competitive conditions and financial, business, legislative, regulatory and other factors, many of which are beyond our control; and
- our future ability to borrow under the ABL Facility, the availability of which depends on, among other things, our complying with the covenants in the ABL Agreement.

We cannot assure you that our business will generate cash flow from operations, or that we will be able to draw under the ABL Facility or otherwise, in an amount sufficient to fund our liquidity needs, including the payment of principal and interest on the ABL Facility, the Term Loan Facility and the Notes.

If our cash flows and capital resources are insufficient to service our indebtedness, we may be forced to reduce or delay capital expenditures, sell assets, seek additional capital or restructure or refinance our indebtedness. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. In addition, the terms of existing or future debt agreements, including the ABL Agreement, the Term Loan Agreement and the Indentures, may restrict us from adopting some of these alternatives. In the absence of such operating results and resources, we could face substantial liquidity problems and might be required to dispose of material assets or operations to meet our debt service and other obligations. We may not be able to consummate those dispositions for fair market value or at all. Furthermore, any proceeds that we could realize from any such dispositions may not be adequate to meet our debt service obligations then due. The Sponsor and its affiliates have no continuing obligation to provide us with debt or equity financing. Our inability to generate sufficient cash flow to satisfy our debt obligations, or to refinance our indebtedness on commercially reasonable terms or at all, could result in a material adverse effect on our business, results of operations and financial condition and could negatively impact our ability to satisfy our obligations under our indebtedness.

If we cannot make scheduled payments on our indebtedness, we will be in default, and the lenders under the Term Loan Facility and the holders of the Notes could declare all outstanding principal and interest to be due and payable, the lenders under the ABL Facility could terminate their commitments to loan money, our secured lenders (including the lenders under the ABL Facility and the Term Loan Facility) could foreclose against the assets securing their loans and the Notes and we could be forced into bankruptcy or liquidation. All of these events could cause you to lose all or part of your investment in the Notes.

Our revenues will decline if federal or state programs reduce our Medicare or Medicaid payments.

For the year ended December 31, 2019, approximately 55.2% of our revenues related to patients participating in Medicare and Medicaid programs, collectively. Numerous factors could materially decrease, or delay timing of, Medicare and Medicaid payments to our facilities. These factors include statutory and regulatory changes, administrative rulings and determinations concerning patient and provider eligibility and requirements for utilization review. Furthermore, the Affordable Care Act and related federal laws provide for material scheduled reductions in the growth rate of Medicare and Medicaid program spending, including reductions in market basket updates and Medicare and Medicaid DSH funding.

Medicaid programs, which are jointly funded by federal and state governments and are administered by states, provide healthcare benefits to qualifying individuals who are unable to afford care. A number of states have adopted or are considering legislation designed to reduce their Medicaid expenditures, including enrolling Medicaid recipients in managed care programs. States may also impose additional taxes on hospitals to help finance such states' Medicaid systems. Some states have also taken steps to implement work and/or community engagement requirements for Medicaid beneficiaries, which could have the effect of reducing the number of individuals eligible for Medicaid in those states.

Recent executive and legislative actions to amend or impede the implementation of the Affordable Care Act and ongoing efforts to repeal, replace or further modify the Affordable Care Act may adversely affect our business, financial condition and results of operations.

The Affordable Care Act dramatically altered the U.S. healthcare system, and we have expended substantial cost and effort to prepare for and comply with the Affordable Care Act. Since its adoption into law in 2010, the Affordable Care Act has been challenged before the U.S. Supreme Court, and several bills have been and continue to be introduced in Congress to delay, defund or repeal implementation of or amend significant provisions of the Affordable Care Act. In addition, there continues to be ongoing litigation over the interpretation, implementation and constitutionality of the law. The net effect of the Affordable Care Act, as currently in effect, on our business is subject to a number of variables, including the law's complexity, lack of complete implementing regulations and interpretive guidance, and the sporadic implementation of the numerous programs designed to improve access to and the quality of healthcare services. Additional variables of the Affordable Care Act impacting our business will be how the litigation regarding the law is ultimately resolved and how states, providers, insurance companies, employers, and other market participants respond during this period of uncertainty surrounding the future of the Affordable Care Act.

In 2017, President Trump issued executive orders that, among other things, expressed the administration's intent to repeal the Affordable Care Act, instructed the executive branch of the federal government to defer or delay the implementation of any provisions of the Affordable Care Act that would impose a fiscal burden on any state or a cost, fee, tax or penalty on any individual, family, health care provider, or health insurer. On October 12, 2017, President Trump issued another executive order related to the Affordable Care Act that resulted in the issuance of regulations that were intended to encourage the formation of association health plans, and increase the maximum duration of and access to short-term limited duration health insurance plans, neither of which are required to cover all of the essential health benefits mandated by the Affordable Care Act. Portions of these regulations were later invalidated by the U.S. District Court for the District of Columbia in a case that has been appealed to the D.C. Circuit Court of Appeals. In 2017, the United States Department of Justice ("***DOJ***") also announced that HHS was immediately ceasing its cost sharing reduction payments to insurance companies based on a determination that those payments had not been appropriated by Congress, and Congress enacted the Tax Act that, in addition to overhauling the federal tax system, repealed the penalties associated with the individual mandate effective as of January 1, 2019. In addition, in December 2019, the U.S. Fifth Circuit Court of Appeals found that the individual mandate set forth in the Affordable Care Act was unconstitutional and ordered the U.S. District Court for the Northern District of Texas to conduct further analysis as to whether the entire Affordable Care Act should be held to be unlawful. The U.S. Supreme Court has agreed to review the case, but it likely will not issue an opinion until 2021.

We cannot predict the impact that the President's executive orders and other administrative actions will have on the implementation and enforcement of the provisions of the Affordable Care Act or the current or pending regulations adopted to implement the law. In addition, we cannot predict the impact that the repeal of the penalties associated with the individual mandate and the cessation of cost sharing reduction payments to insurers will have on the availability and cost of health insurance and the overall number of uninsureds. We also cannot predict the outcome of litigation challenging the constitutionality of the Affordable Care Act or whether the Affordable Care Act will be repealed, replaced, or modified. If the Affordable Care Act is found to be unconstitutional or if it is repealed, replaced or modified, we cannot predict what, if any, the replacement plan or modifications would be, when any such replacement plan or modifications would become effective, or whether any of the existing provisions of the Affordable Care Act would remain in place.

Changes to Medicaid supplemental payment programs may materially and adversely affect our revenues and results of operations.

MSPs are payments made to providers separate from and in addition to those made at a state's standard Medicaid payment rate. MSP programs are jointly financed by state funds and federal matching funds. The state portion may be funded through general revenue, intergovernmental transfers from local governments or healthcare related taxes imposed by states in the form of a mandatory provider payment related to healthcare items or services. The two most prevalent forms of MSPs are Medicaid DSH and UPL payments. Medicaid DSH payments are federally required to be made by the states to hospitals that serve significant numbers of Medicaid and uninsured patients in recognition of the added costs incurred by hospitals in treating these patients. The total amount of Medicaid DSH payments a state may make and the total amount any one hospital may receive are both capped by federal law. Unlike Medicaid DSH payments, UPL payments are not required to be made by states under federal law. Rather, federal regulations establish an upper payment limit above which states may not receive federal matching dollars.

The Affordable Care Act called for significant reductions in Medicaid DSH funding to account for decreases in uncompensated care anticipated under the health insurance coverage expansion. Subsequent changes in the law have delayed the implementation of these reductions, but they are scheduled to take effect in FFY 2020. Reductions in Medicaid DSH payments may take place without increases in the Medicaid eligible population, thus increasing the net amount of uncompensated care we provide.

UPL programs have expanded in recent years and certain of our hospitals receive payments under such programs. Because services provided to Medicaid beneficiaries enrolled in managed care are not included in state UPL calculations, as states increase their use of managed care Medicaid programs, UPL MSPs could be reduced. UPL funding and matching federal funds may also be reduced or eliminated as a result of state or local governmental legislation, state changes to historical funding levels or related taxes, compliance reviews by CMS, or changes to federal Medicaid funding affecting such programs. In addition, on November 18, 2019, CMS released a proposed rule that is intended to increase federal oversight of MSPs and state Medicaid financing policies. Among other things, the proposed rule would add new review and reporting requirements on UPL payment arrangements, including the reporting of provider-level payment detail, impose limitations on UPL payments that are made to physicians and certain other practitioners, and impose certain limits on the use of healthcare provider taxes, intergovernmental transfers and certified public expenditures. We cannot predict whether the proposed rule will be adopted and, if adopted, the impact that the proposed rule would have on the MSPs that are currently received by the Company's facilities. In addition, even if the proposed rule is not adopted, we also cannot predict whether MSP programs will continue (and, if continued, whether we will qualify for such programs) or guarantee that revenues recognized from these programs will not decrease.

We are subject to increasingly stringent governmental regulations, and we may face allegations that we have failed to comply with such regulations, which could result in criminal and civil sanctions, exclusion from government healthcare programs and even greater scrutiny that may reduce our revenues and profitability.

All participants in the healthcare industry are required to comply with numerous overlapping laws and regulations at the federal, state and local government levels. These laws and regulations require that hospitals meet various requirements, including those relating to relationships with providers and other referral sources, the adequacy and quality of medical care, inpatient admission criteria, privacy and security of health information, standards for equipment, personnel, operating policies and procedures, billing and cost reports, payment for services and supplies, maintenance of adequate records, compliance with building codes and environmental protection, among other matters. Many of the laws and regulations applicable to the healthcare industry are complex and may be violated inadvertently, and there are numerous enforcement authorities, including CMS, the OIG, the DOJ, state attorneys general, and contracted auditors, as well as private plaintiffs.

There are also heightened coordinated civil and criminal enforcement efforts by both federal and state government agencies relating to the healthcare industry, including the hospital segment, which has led to a number of investigations, prosecutions, convictions and settlements in the healthcare industry. Recent enforcement actions have focused on, among other things, financial arrangements between hospitals and providers, billing for services without adequately documenting the medical necessity for such services and billing for services outside the coverage guidelines for such services. Hospitals continue to be one of the primary focal areas of the OIG and other governmental fraud and abuse programs, as described in the OIG Work Plan. Dealing with investigations can be time and resource consuming and can divert management's attention from the business. Any such investigation or settlement could increase our costs or otherwise have an adverse effect on our business. In addition, because of the potential for large monetary exposure under the False Claims Act, which provides for treble damages and substantial civil monetary penalties for each separate false claim or statement, healthcare providers often resolve allegations without admissions of liability for significant and material amounts to avoid the uncertainty of damages and penalties that may be awarded in litigation proceedings. Such settlements often contain additional compliance and reporting requirements as part of a consent decree, settlement agreement or corporate integrity agreement. These additional requirements can result in significant additional and ongoing expenditures. Given the significant size of actual and potential settlements, it is expected that the government will continue to devote substantial resources to investigating healthcare providers' compliance with the healthcare payment rules and fraud and abuse laws. Certain of our facilities have received inquiries and subpoenas from various governmental agencies regarding these matters, and we are also subject to various claims and lawsuits relating to these and other matters.

The laws and regulations with which we must comply continually change. In the future, different interpretations or enforcement of these laws and regulations could subject our business practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services, capital expenditure programs and operating expenses. Although we intend and will endeavor to conduct our business in compliance with all applicable federal and state laws and regulations, many of these laws and regulations are broadly worded and may be interpreted or applied in ways that cannot be predicted. Therefore, we cannot assure you that our arrangements or business practices will be free from government scrutiny or be found to be in compliance with applicable laws and regulations. If we fail to comply with applicable laws and regulations, we could suffer substantial civil or criminal penalties, including the loss of our licenses to operate our facilities or loss of our ability to participate in the Medicare, Medicaid and other governmental programs.

Additionally, we are subject to a variety of different federal, state and local employment and wage and hour laws. While we strive to comply with those laws, if we fail to do so, we may be subject to lawsuits by governmental authorities or private plaintiffs. In addition, the Internal Revenue Service ("***IRS***") and/or state taxing authorities may successfully challenge positions taken on our tax returns.

Finally, we are also subject to various federal, state and local statutes and ordinances regulating the discharge of materials into the environment. For example, our healthcare operations generate medical waste, such as pharmaceuticals, biological materials and disposable medical instruments that must be disposed of in compliance with federal, state and local environmental laws, rules and regulations. Environmental regulations also may apply when we build new facilities or renovate existing facilities, particularly older facilities. If we fail to comply with environmental regulations, we may be liable for substantial investigation and clean-up costs or we may be subject to lawsuits by governmental authorities or private plaintiffs.

We may be subjected to actions brought by the government under anti-fraud and abuse provisions or by individuals on the government's behalf under the False Claims Act's "qui tam" or "whistleblower" provisions.

The False Claims Act prohibits healthcare facilities and providers, as well as other entities or individuals from, among other things, knowingly submitting false claims for payment to the federal government, or knowingly causing the submission of such claims. The "qui tam" or "whistleblower" provisions of the False Claims Act allow private individuals to bring actions under the False Claims Act on behalf of the government. These private parties are generally entitled to share in any amounts recovered by the government, and, as a result, the number of "whistleblower" lawsuits that have been filed against providers has increased significantly in recent years. We are required to provide information to our employees and certain contractors about state and federal false claims laws and whistleblower provisions and protections. Defendants found to be liable under the False Claims Act may be required to pay up to three times the actual damages sustained by the government, plus substantial civil monetary penalties, that are subject to annual inflation adjustments, for each separate false claim.

There are many potential bases for liability under the False Claims Act, including reckless or intentional acts or omissions. The government has used the False Claims Act to prosecute Medicare and other government healthcare program violations such as coding errors, billing for services not provided, submitting false cost reports, and providing care that is not medically necessary or that is substandard in quality. The Affordable Care Act also (i) created potential False Claims Act liability for failing to report and repay identified overpayments within sixty (60) days of the identification of the overpayment or the date by which a corresponding cost report is due, whichever is later, and (ii) provided that claims submitted in connection with patient referrals that result from violations of the Anti-kickback Statute constitute false claims for the purposes of the False Claims Act. Violations of the Stark law can result in False Claims Act liability, as well. In addition, a number of states have adopted their own false claims and whistleblower provisions whereby a private party may file a civil lawsuit in state court.

Although we intend and will endeavor to conduct our business in compliance with all applicable federal and state laws, many of these laws are broadly worded and may be interpreted or applied in ways that cannot be predicted. Therefore, we cannot assure you that our arrangements or business practices will be free from government scrutiny or be found to be in compliance with applicable fraud and abuse laws.

The emergence and effects related to a pandemic, epidemic or outbreak of an infectious disease could adversely affect our operations and financial condition.

If a pandemic, epidemic, outbreak of an infectious disease or other public health crisis were to occur in an area in which we operate, our operations and financial condition could be adversely affected. In reaction to such a crisis or the fear of exposure to infection, patients might cancel elective procedures or fail to seek needed care at our facilities, which could result in reduced patient volumes and operating revenues, potentially over an extended period of time. Furthermore, a pandemic, epidemic or outbreak might adversely affect our operations by causing a temporary shutdown or diversion of patients, by disrupting or delaying production and delivery of materials and products in the supply chain or by causing staffing shortages in our facilities. Additionally, such a crisis could diminish the public trust in health care facilities, especially hospitals that fail to accurately or timely diagnose, or are treating (or have treated) patients affected by infectious diseases, and negatively affect the reputation at our facilities.

Although we have disaster plans in place and operate pursuant to infectious disease protocols, the extent to which the potential emergence of a pandemic, epidemic or outbreak would impact our business and operations is difficult to predict and would depend on many factors beyond our control, including the speed of the contagion, the development and implementation of effective preventative measures and possible treatments, the scope of governmental and other restrictions on travel and other activities, and public reactions to these factors. For example, we own and operate facilities in areas impacted by the recent outbreak of respiratory illness caused by a novel coronavirus known as COVID-19. We are actively monitoring the situation, which evolves daily, and carefully following guidance from the Center for Disease Control and Prevention and the World Health Organization; however, we cannot predict with certainty the extent of any impact that COVID-19 may have on our operations or financial condition.

Changes in payer mix, the financial condition of payers and healthcare cost containment initiatives may limit our revenues and profitability.

The amounts we receive for services provided to patients are determined by a number of factors, including the payer mix of our patients and the reimbursement methodologies and rates utilized by our payers. In recent years, we have seen shifts of patients from commercial and private insurance to Medicare and Medicaid programs and from "traditional" fee-for-service Medicare and Medicaid programs to "managed" Medicare and Medicaid programs. Some presidential candidates and members of Congress have also recently proposed measures that would expand government-sponsored coverage, including "Medicare-for-all" or other single-payer proposals. Reimbursement rates generally are lower for (i) Medicare and Medicaid beneficiaries than they are for patients whose care is covered by commercial and private insurance and (ii) managed Medicare and Medicaid beneficiaries than they are for traditional Medicare and Medicaid beneficiaries. We also experience demographic pressures as aging populations in our non-urban communities shift from commercial insurance programs to Medicare or managed Medicare programs. Our revenues and results of operations may be adversely affected by these shifts.

In addition, our revenues from negotiated rates with HMOs, PPOs, insurance companies, employers and other private payers may decline based on renegotiations and the respective bargaining power of the parties. There is a general trend towards further consolidation among private payers, which may increase their bargaining power over fee structures. As a result, payers increasingly are demanding discounted fee structures or the assumption by healthcare providers of all or a portion of the financial risk related to paying for care provided. These changes include moving away from a percent of charge payment structure to a fixed payment for an episode of care, which typically reduces our payment rate and limits our ability to raise prices going forward. Furthermore, low cost plans purchased through the Exchanges are increasingly using narrow and tiered networks that limit beneficiary provider choices, restrict or exclude our facilities or impose significantly higher cost sharing obligations for care provided by our facilities if they are classified in a disfavored tier. In addition, other healthcare providers, including some with greater financial resources, greater geographic coverage or a wider range of services, may negotiate exclusivity provisions with managed care plans or otherwise restrict the ability of managed care plans to contract with us.

There are also an increasing number of patients enrolling in insurance plans with high deductibles or high co-payments, including those purchased on the Exchanges, which increase the amount due from the patient and may result in reimbursement for a lower portion of the total payment amount relative to traditional employer-sponsored health insurance plans for the healthcare services provided by our facilities and employed providers. Patients enrolled in higher deductible and co-payment plans tend to defer elective and non-emergency procedures or default on their portion of the payment. We may be adversely affected by the growth in patient responsibility accounts because of plan structures, including HSAs, which shift greater responsibility for care to individuals through greater exclusions and higher co-deductible and co-payment amounts. If we experience shifts in our patient volumes to these types of plan structures, our revenue and results of operations may be adversely affected.

We anticipate that efforts to impose greater discounts and more stringent cost controls by government and private payers will continue, thereby reducing some of the payments we receive for our services. As payments are reduced, if we are excluded from more payer networks or if the scope of services covered by payers is limited, there could be a material adverse effect on our revenues and results of operations.

We may encounter difficulty operating, integrating and improving financial performance at acquired facilities. Also, if we acquire facilities with unknown or contingent liabilities, we could become liable for material obligations or it could diminish the anticipated value of the acquired facility.

We may be unable to timely and effectively integrate facilities that we acquire with our ongoing operations. Many of the facilities we have acquired had, or future acquisitions may have, significantly lower operating margins than we do and/or operating losses prior to the time we acquired or will acquire them. In the past, we have occasionally experienced delays in improving the operating margins or effectively integrating the operations of our acquired facilities and we may experience such delays in implementing operating procedures and systems in newly or future acquired facilities. Integrating an acquired facility could be expensive and time consuming and could disrupt our ongoing business, negatively affect cash flow and distract management and other key personnel. Additionally, we may experience delays in reimbursement from governmental and third-party payers as a result of the change of ownership of our acquired facilities.

We must integrate complex information, accounting and operational systems, compliance programs and internal controls over financial reporting of acquired facilities into our existing systems and internal controls. While we devote a significant amount of employee and management resources on these integrations, we also rely heavily on third parties for systems integration. Our efforts to integrate new facilities, including causing those third parties to convert our newly acquired facilities' systems, may fail or be significantly delayed. Failure to timely and effectively integrate or convert any of these systems could cause business interruption, affect provider and staff morale and our ability to accurately manage accounting, clinical, compliance and operational functions. As future acquisitions may involve large operations, any such failure could cause a material adverse effect on our results of operations.

Facilities we have acquired, including in connection with the LifePoint/RCCH Merger, or facilities we acquire in the future, may have unknown or contingent liabilities for historical activities or conditions, including liabilities for failure to comply with laws and regulations, retroactive payment adjustments or recoupments from payer audits, medical and general professional malpractice liabilities, unfunded pension liabilities, workers' compensation or other employee-related liabilities, previous tax or environmental liabilities, regulatory and compliance related liabilities, and unacceptable business or accounting practices. Although we endeavor to obtain contractual indemnification from sellers covering these matters in connection with some acquisitions, we have not obtained contractual indemnifications in connection with all of them, and any indemnification obtained from sellers may be insufficient to cover material claims or liabilities for past activities of acquired businesses and the sellers may have insufficient funds to satisfy any claims or liabilities for which we may otherwise be entitled to be reimbursed.

We typically retain and rely on existing local management teams at newly acquired facilities to implement changes to operating procedures and systems. Integrating local management teams can involve cultural and systems challenges that may demand a disproportionate share of our resources and senior management's attention, and we may experience turnover of providers and other key personnel. Our acquisitions have become, and may continue to become larger, and may occur in communities with competing facilities. As a result, the issues surrounding integration may become more complex, expensive and time-consuming and may have a greater impact on our financial performance when we experience delays or difficulties.

If our fair value declines or if our estimated future cash flows decrease, a material non-cash charge to earnings from impairment of our goodwill or our long-lived assets could result.

As of December 31, 2019, we had approximately $3,034.7 million of goodwill and other intangible assets and approximately $3,859.4 million of long-lived assets, net of accumulated depreciation. We expect to recover the carrying values of both our goodwill as well as our long-lived assets through our future cash flows. We evaluate the carrying value of our goodwill at least annually, based on our fair value, to determine whether it is impaired. We evaluate our long-lived assets for possible impairment whenever circumstances indicate that the carrying amount of the asset, or related group of assets, may not be recoverable from estimated future cash flows. If the carrying value of our goodwill or our long-lived assets is impaired, we may incur a material non-cash charge to earnings.

We will be subject to liabilities because of malpractice and related legal claims brought against our facilities or healthcare providers associated with, or employed by, our facilities or affiliated entities. If we become subject to these claims, we could be required to pay significant damages, which may not be covered by insurance.

We will be subject to medical malpractice lawsuits and other legal actions arising out of the operations of our facilities and the activities of our employed or affiliated providers. As a matter of policy, we typically notify patients of any potential harms they may have suffered at our facilities, regardless of whether such notifications are required by law and notwithstanding our uncertainty as to the severity of such harms or whether they even took place. This may lead to class actions or other multi-plaintiff lawsuits or whistleblower reports. These actions may involve large claims and significant defense costs and, if we or our facilities are found liable, any judgments against us may be material. Furthermore, some states in which we operate do not impose caps on non-economic malpractice damages and, even in the states that have imposed caps on such damages, litigants may seek recoveries under alternative theories of liability that might not be subject to such caps. In an effort to resolve one or more of these matters, we may choose to negotiate a settlement whether or not we believe we are liable. Amounts we pay to settle any of these matters also may be material.

Although we maintain professional and general liability insurance with unrelated commercial insurance carriers, each individual plaintiff's claim is generally subject to an SIR insurance program administered in-house by our risk department with assistance from our insurance brokers. Any successful claim against us that is within our SIR amounts could have an adverse effect on our results of operations or liquidity. Some of these claims could exceed the scope of the excess coverage in effect, or coverage of particular claims could be denied, and any amounts not covered by insurance could be material.

Insurance coverage in the future may not continue to be available at a cost allowing us to maintain adequate levels of insurance with acceptable SIR attachments. One or more of our insurance carriers may become insolvent and unable to fulfill its obligation to pay or reimburse us when that obligation becomes due. In addition, providers using our facilities may be unable to obtain insurance on acceptable terms, which could result in these providers not being able to meet the minimum insurance requirements in the applicable facilities' medical staff bylaws or necessitate a reduction in the level of insurance required to be carried under such bylaws.

As a result of reviews of claims to Medicare and Medicaid for our services, we may experience delayed payments or incur additional costs and may be required to repay amounts already paid to us.

We are subject to regular post-payment inquiries, investigations and audits of the claims we submit to Medicare and Medicaid for payment for our services. These post-payment reviews may increase as a result of government cost-containment initiatives, including enhanced medical necessity reviews for patients admitted as inpatients to general acute care hospitals for certain procedures and audits of claims under the RAC programs to detect overpayments not identified through existing claims review mechanisms. RACs utilize a post-payment targeted review process employing data analysis techniques in order to identify those claims most likely to contain overpayments, such as incorrectly coded services, short stays, incorrect payment amounts, non-covered services and duplicate payments. The claims review strategies used by the RACs generally include a review of high dollar claims, including inpatient hospital claims. As a result, a large majority of the total amounts recovered by RACs has come from hospitals.

In addition, CMS and the states use UPICs to perform post-payment audits of claims and identify Medicare and Medicaid overpayments. Third party audits or investigations of Medicare or Medicaid claims could result in increases or decreases in operating revenues to be recognized in periods subsequent to when the related services were performed, which may have a material adverse effect on our results of operations.

Controls designed to reduce inpatient services may reduce our revenues.

Over the last several years, payers have instituted policies and procedures to reduce or limit the use of inpatient services. Controls imposed by Medicare, Medicaid, and commercial third-party payers designed to reduce admissions and lengths of stay, commonly referred to as "utilization review," have affected and are expected to continue to affect our facilities. Federal law contains numerous provisions designed to ensure that services rendered by hospitals to Medicare and Medicaid patients meet professionally recognized standards and are medically necessary and that claims for payment are properly filed. These provisions include a requirement that a sampling of admissions of Medicare and Medicaid patients must be reviewed by QIOs, which review the appropriateness of Medicare and Medicaid patient admissions and discharges, the quality of care provided, the validity of the MS-DRG classifications and the appropriateness of cases of extraordinary length of stay or cost on a post-discharge basis. QIOs may deny payment for services or assess fines and also have the authority to recommend to HHS that a provider that is in substantial noncompliance with quality standards be excluded from participation in the Medicare program.

Utilization review is also a requirement of most non-governmental managed care organizations and other third-party payers. Inpatient utilization, average lengths of stay and occupancy rates continue to be negatively affected by payer-required preadmission authorization and utilization review and by payer pressure to maximize outpatient and alternative healthcare delivery services for less acutely ill patients. Additionally, in some states in which we operate, commercial third-party payers and Medicaid managed care plans have instituted policies that retroactively limit or deny patient coverage for emergency department and certain other services provided at hospitals if the payers believe the services could have been provided in less expensive settings. For example, such payers are increasingly seeking to pay relatively low "triage fees" for patients seen in emergency departments when the payers retrospectively determine the patients' treatment did not qualify as an emergency service. Significant limits on the scope of services reimbursed or on the amounts paid for such services could have a material adverse effect on our revenues and results of operations.

We are subject to risks associated with outsourcing functions to third parties.

We outsource selected business functions to third parties. We take steps to monitor and regulate the performance of independent third parties to whom we delegate selected functions, including revenue cycle management, patient access, billing, cash collections, payment compliance and support services, project implementation, supply chain management, payroll system services and parts of cybersecurity. Arrangements with third party service providers may make our operations vulnerable if vendors fail to satisfy their obligations to us as a result of their performance, changes in their own operations, financial condition, or other matters outside of our control. We may also face legal, financial or reputational harm for the actions or omissions of such providers, including for violations of HIPAA and other privacy and security laws applicable to healthcare providers, and we may not have effective recourse against the providers for those harms. The expanding role of third party providers may also require changes to our existing operations and the adoption of new procedures and processes for retaining and managing these providers, as well as redistributing responsibilities as needed. Effective management, development and implementation of our outsourcing strategies are important to our business and strategy. If there are delays or difficulties in enhancing business processes or our third party providers do not perform as anticipated, we may not fully realize on a timely basis the anticipated economic and other benefits of the outsourcing projects or other relationships we enter into with key vendors, which could result in substantial costs, divert management's attention from other strategic activities, negatively affect employee morale or create other operational or financial problems for us. Terminating, transitioning or renegotiating arrangements with key vendors or failure to renegotiate on favorable terms could result in additional costs and a risk of operational delays, potential errors and possible control issues as a result of the termination or during the transition or renegotiation phase.

We conduct a significant portion of our operations through joint ventures. We cannot provide assurances that relationships with our joint venture partners will remain strong, which could negatively affect our joint ventures, affiliations and other strategic alliances as well as our overall business.

We have completed a number of joint ventures, affiliations and other strategic alliances as part of our business strategy. We expect to enter into similar transactions in the future, including joint ventures where we may have a minority or non-controlling interest. Any changes in our relationships with our joint venture partners could disrupt ongoing business, negatively affect cash flow and distract management and other key personnel.

In the event of a material disagreement with any of our joint venture partners or the breach of any of our joint venture agreements, a joint venture may be subject to dissolution, unwinding or purchase of either party's interest, which could have a material adverse effect on our revenues and results of operations or result in reputational harm.

As a general matter, our joint venture partners may have investment and operational goals that are not consistent with our company-wide objectives, including the timing, terms and strategies for future growth and development opportunities, and we could reach an impasse on certain decisions, which may hinder our ability to pursue preferred strategies for growth and development, could require significant resources and attention from management and key employees to resolve and could have an adverse effect on our operations, cash flow and revenue growth. In addition, our joint venture relationships with not-for-profit partners and the agreements that govern these relationships are structured based on current provisions of the Internal Revenue Code of 1986, as amended (the "***Code***") (and the Treasury Regulations thereunder), published rulings by the IRS, as well as case law relevant to joint ventures between for-profit and not-for-profit entities. Material changes in these legal authorities could adversely affect our relationships with not-for-profit partners and related joint venture arrangements.

Furthermore, joint ventures in which we have a minority equity interest and minority investments inherently involve a lesser degree of control over business operations, thereby potentially increasing the financial, legal, operational and compliance risks associated with the joint venture or minority investment. We may be dependent on joint venture partners or management who may have business interests, strategies or goals that are inconsistent with ours. Business decisions or other acts or omissions of the joint venture partner or management may adversely affect the value of our investment, result in litigation or regulatory action against us, result in reputational harm to us or adversely affect the value of our investment or partnership. To the extent another party makes decisions that negatively impact the joint venture or internal control issues arise within the joint venture, we may have to take responsive or other actions or we may be subject to penalties, fines or other related actions for these activities.

Factors related to our employment of physicians could affect our financial performance.

We employ a large number of physicians. Physician employment by health systems and acute care facilities, where permissible, is a trend in the industry and has become more common as a result of actual and potential reductions in payment amounts for physician services and increasing costs to physicians, such as EHR implementation and professional liability insurance expenses. Employed physicians generally present more direct risks to us than those presented by independent members of our hospitals' medical staffs, such as risks of unsuccessful physician integration, challenges associated with physician practice management and compliance risks arising from the increased billing and coding activities associated with the employment of physicians, the possibility of legal claims under federal and state employment law, and governmental scrutiny of physician employment arrangements. Employed physicians also require us to incur additional expenses, such as increased salary and benefit costs, medical malpractice expense and rent expense. Payments received by us for services provided by our employed physicians, the physicians to whom our facilities have provided recruitment assistance, and the physician members of our medical staffs could be adversely affected as physician payment methodologies move toward pay-for-performance as hospital payment models are doing. The combination of payment cuts, potential liabilities and increased expenses could have an adverse effect on our results of operations.

Deterioration in the collectability of "patient due" accounts could adversely affect our revenues and results of operations.

The primary collection risks associated with our accounts receivable relate to uninsured patient accounts and patient accounts for which the primary insurance carrier has paid the amounts covered by the applicable agreement, but patient responsibility amounts (exclusions, deductibles and co-payments) remain outstanding. The provision for doubtful accounts relates primarily to amounts due directly from patients. The amount of our provision for doubtful accounts is based on management's assessment of historical collection trends, business and economic conditions, trends in federal and state governmental and private employer health coverage, the rate of growth in uninsured patient admissions and other collection indicators. While we have experienced a reduction in uninsured patients as a result of the Affordable Care Act, the risk of collection from insured patients, and the amounts due, have increased, and will likely continue to increase, as more individuals are enrolled in insurance plans with larger deductibles and/or co-payments, including those purchased on insurance exchanges.

If we experience growth in self-pay volume and revenue, including increased acuity levels for uninsured patients and increases in co-payments and deductibles for insured patients, our revenues and results of operations could be adversely affected. Although we have experienced a reduction in uninsured patients since 2014 as a result of the Affordable Care Act and the expansion of state Medicaid programs, we are unable to predict whether that trend will continue in light of the repeal of the penalties associated with the individual mandate, the cessation of the cost sharing reduction payments to insurers, and the decision by some states not to expand their Medicaid programs. In addition, the risk of collection from insured patients (and the amounts due) has increased, and will likely continue to increase, as a result of more individuals being enrolled in insurance plans with high deductibles and high co-payments. Furthermore, our ability to improve co-insurance collections and collections from self-pay patients may be limited by legislative developments, such as federal and state legislation designed to reduce "surprise billing," or by other regulatory or investigatory initiatives, including private lawsuits directed at hospital charges and collection practices for uninsured and underinsured patients.

An increase in the proportion of our accounts receivable being comprised of uninsured accounts and a deterioration in the collectability of these both insured and uninsured accounts could adversely affect our results of operations and revenues. Even if the Affordable Care Act remains implemented in its current form, we may continue to experience bad debts and be required to provide uninsured discounts and charity care for patients who choose not to purchase coverage, are undocumented immigrants who are not permitted to enroll in the Exchanges or government healthcare programs or live in states that do not expand or maintain the expansion of their Medicaid programs.

We are subject to potential legal and reputational risk as a result of our access to personal information of our patients and employees.

HIPAA and numerous other federal and state laws and regulations govern the collection, dissemination, use, privacy, security, confidentiality, integrity, and availability of personally identifiable information ("***PII***") and PHI. HIPAA imposes privacy and security requirements on healthcare providers who are covered entities such as us, including to implement reasonable and appropriate administrative, physical and technical safeguards to protect PHI, including PHI maintained, used and disclosed in electronic form, and data breach notification requirements for certain unauthorized access, acquisition, use or theft of PHI. The safeguards include employee training, identifying "business associates" with whom we need to enter into HIPAA-compliant contractual arrangements, and various other measures. We are required to develop and adopt a comprehensive set of policies and procedures to comply with HIPAA and other privacy and information security laws. Ongoing implementation and oversight of these measures involves significant time, effort and expense. In the ordinary course of our business, we, and vendors acting on our behalf, collect, transmit, share and store sensitive data, including PHI and PII of our patients and employees. Such information is at risk of accidental or intentional misuse or disclosure, and is often targeted by criminal organizations. The secure processing, maintenance and transmission of this information is critical to our operations and business strategy. If, in spite of our security and compliance efforts we or any of our business associates were to experience a breach, loss, or other compromise of PHI or PII, such event could disrupt our operations, result in increased data protection costs, damage our reputation, or result in regulatory penalties, legal claims and civil or criminal liability under HIPAA and other state and federal laws, which could have a material adverse effect on our results of operations.

HHS requires covered entities to report breaches of unsecured PHI to affected individuals without unreasonable delay and in no case later than 60 days after the discovery of the breach by the covered entity or its agents. Notification must also be made to HHS and, in certain situations involving large breaches, to the media. HIPAA creates a presumption that all non-permitted uses or disclosures of unsecured PHI are breaches unless the covered entity establishes that there is a low probability the information has been compromised. HHS has imposed substantial mandatory civil and criminal penalties for violations of HIPAA's requirements, with potential civil penalties exceeding $1.7 million in a calendar year for multiple violations of the same requirement in a single year. Moreover, because a single breach incident can result in multiple violations of multiple requirements, potential penalties can range much higher. We are also subject to state breach notification laws which may differ from HIPAA. In addition, state attorneys general and private plaintiffs have brought civil actions seeking injunctions and damages in response to violations of state or federal privacy laws or HIPAA's privacy, security and breach notification rules, as applicable. While HIPAA does not create a private right of action allowing individuals to sue us in civil court for violations of HIPAA's requirements, its standards have been used as a basis for the duty of care in state civil suits, such as those for negligence or recklessness in the handling of PHI. In addition, HIPAA mandates that the Secretary of HHS conduct periodic compliance audits of HIPAA covered entities such as us, and has reserved the right to initiate enforcement actions where it discovers noncompliance.

In addition, many states in which we operate may impose laws that are more protective of the privacy and security of PII than HIPAA. Where these state laws are more protective of individual privacy than HIPAA, we have to comply with their stricter provisions. Not only may some of these state laws impose fines and penalties upon violators, but some may also afford private rights of action to individuals who believe their PII has been misused. Both state and federal laws are subject to modification or enhancement of privacy protection at any time. Our facilities will continue to remain subject to any federal or state privacy-related laws that are more restrictive than the privacy regulations issued under HIPAA. These statutes vary and could impose additional requirements on us and more severe penalties for disclosures of confidential health information. New health information standards could have a significant effect on the manner in which we do business, and the cost of complying with new standards could be significant. We may not remain in compliance with the diverse privacy requirements in all of the jurisdictions in which we do business. If we fail to comply with HIPAA or similar state laws, we could incur substantial civil monetary or criminal penalties.

A cybersecurity attack or security breach could cause a loss of confidential data, give rise to remediation and other expenses, expose us to liability under HIPAA, consumer protection laws, common law or other theories, subject us to litigation and federal and state governmental inquiries, damage our reputation, and otherwise be disruptive to our business.

We rely extensively on our information systems and certain systems operated by us and third-parties to manage clinical, financial and employee data, communicate with our patients, payers, vendors and other third parties and summarize and analyze operating results. These systems are at risk from cybersecurity attacks and other intrusions, including attempts to gain unauthorized access to and theft of our confidential data, misuse, corruption or destruction of confidential data and damage, disruptions or shutdowns of these systems due to viruses, malware, ransomware, employee error or malfeasance, and other electronic security breaches. Our systems, which transmit and store sensitive and confidential data, including PHI and other PII of our patients, employees and others, and our proprietary and confidential business performance and other data, will continue to be a target for attempts to gain unauthorized access and data theft due to the valuable nature of the information they contain, as well as at risk for accidental exposure. In addition, certain third-party medical devices and equipment are used at our facilities, and may be vulnerable to cybersecurity attacks or other breaches which could negatively impact our systems or our patients.

Cybersecurity breaches and other unauthorized access to our data can sometimes be difficult to discern, and any delays in detection may lead to increased harm. Such attacks or breaches are common in the healthcare sector and could result in the compromise of health information or other data subject to protection by HIPAA and other laws and regulations, or disrupt our IT systems or business. While we are not aware of having experienced a material cybersecurity breach, there can be no assurance that we will not be subject to material cyber-attacks or security breaches in the future, or that the preventive actions we take to reduce the risk of such incidents and protect our IT and data will be sufficient. We continue to prioritize cybersecurity and the development of practices and controls to protect our systems. However, regardless of the nature, extent and timing of our actions, these measures may not prevent security breaches. If our services are subject to cyber-attacks that impair or deny the ability of patients to access our services, current and potential patients may become unwilling to provide us the information necessary for them to become users of our services or may curtail or stop using our services. As cyber-threats continue to evolve, we may be required to expend significant additional resources to continue to modify or enhance our protective measures and to investigate and remediate any information security vulnerabilities. As we are subjected to cyber-attacks and possible security breaches in the future, this could have an adverse impact on our business, reputation, financial condition and results of operations. See "—We are subject to potential legal and reputational risk as a result of our access to personal information of our patients and employees" for more information.

We may not be able to generate sufficient cash flow through operations or successfully access other capital resources to fund all of our capital expenditure programs and commitments.

We require substantial capital resources to fund our growth strategy and ongoing capital expenditure programs, including capital expenditure programs for renovation, expansion and construction at our facilities and the addition of equipment and technology at our facilities. We often commit to significant capital expenditures well in advance of the time these expenditures will be made. Our cash flows and available capital resources may be insufficient to fund our capital expenditure programs and commitments, and we may be forced to reduce or delay planned and required capital expenditures. Additionally, we may experience delays or impediments in satisfying the schedule for capital expenditure commitments because of a variety of factors beyond our control, such as zoning, environmental, licensing and certificate of need regulations and restrictions. The failure to satisfy our capital expenditure commitment obligations could also damage our reputation within our communities, expose us to potential claims from former owners of acquired facilities, lessors or other governing or regulatory agencies, and adversely impact our ability to negotiate and complete future acquisitions.

At December 31, 2019, we estimated our total remaining capital expenditure commitments to be approximately $1,523.1 million, which generally have remaining terms of one to six years. Of this amount, more than one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time. The failure to satisfy our capital expenditure commitment obligations could damage our reputation within our communities, expose us to potential claims from former owners of acquired facilities, lessors or other governing or regulatory agencies, and adversely impact our ability to negotiate and complete future acquisitions. As a result, if our cash flows and available capital resources are not sufficient to fund all of our anticipated capital expenditures, it may be necessary for us to give priority to contractual capital expenditure commitment obligations over other elective capital expenditure programs.

Other hospitals and outpatient facilities provide services similar to those which we offer. In addition, healthcare providers provide services in their offices that could be provided in our facilities. These factors increase the level of competition we face and may therefore adversely affect our revenues and results of operations.

Competition among hospitals and other healthcare service providers, including outpatient facilities, has intensified in recent years. We also have acquired, and may continue to acquire, larger facilities in more concentrated population centers, which experience greater competition for healthcare services. We compete with other facilities, including larger tertiary and quaternary care centers located in metropolitan areas. Although the facilities with which we compete may be a significant distance away from our facilities, patients in our markets may migrate on their own to, may be referred by local providers to, or may be required by their health plan to travel to these facilities. Furthermore, some of the facilities with which we compete may offer more or different services than those available at our facilities, may have more advanced equipment or technology or may have a medical staff that is perceived to be better qualified. We also compete with facilities and health systems that are implementing physician and other provider alignment strategies, such as employing providers, acquiring physician practice groups and participating in ACOs or other clinical integration models, which may impact our competitive position. Also, many of the facilities that compete with our facilities are owned by tax-supported governmental agencies or not-for-profit entities supported by endowments and charitable contributions and are eligible to participate in the 340B Program. These facilities, in most instances, are also exempt from paying sales, property and income taxes and have the ability to issue tax-exempt bonds for financing.

Quality of care and value-based purchasing have also become significant trends and competitive factors in the healthcare industry. CMS makes public the performance data relating to multiple quality measures that facilities submit in connection with their Medicare payment. CMS also requires every Medicare participating hospital to establish and update annually a public online listing of the hospital's standard charges for items and services and recently issued new regulations that would significantly increase hospital charge reporting requirements. If the publicly-available performance and charge data become a primary factor in where patients choose to receive care, and if competing facilities have lower charges or better results than our facilities on those measures, our revenues and/or patient volumes could decline.

We also face significant and increasing competition from services offered by providers (including providers on our medical staffs) in their offices and from other specialized care providers, including freestanding emergency departments and outpatient surgery, oncology, physical therapy, diagnostic and urgent care centers (including many in which providers may have an ownership interest). We also compete with specialty facilities that focus on one or a small number of lucrative service lines, some of which are not required to operate emergency departments. Some of our facilities have and will seek to develop outpatient facilities where necessary to compete effectively. However, to the extent that other providers are successful in developing outpatient facilities or providers are able to offer additional, advanced services in their offices, our market share for these services will likely decrease in the future.

The industry emphasis on value-based purchasing and bundled payment arrangements may negatively affect our revenues.

There is a trend in the healthcare industry toward value-based purchasing of healthcare services and bundled payment arrangements. Value-based purchasing programs include both public reporting of quality data and payment limitations tied to the incidence of preventable adverse events or the quality and efficiency of care provided by facilities. For example, Medicare, Medicaid and many large commercial payers may require facilities to report certain quality data to receive full payment updates or avoid payment reductions. They may also impose payment reductions in connection with HACs and excessive readmissions for certain conditions designated by HHS. Our revenue may be negatively impacted by the application of one or more of these measures. Bundled payment arrangements generally set target payment amounts for all healthcare services provided to patients during particular episodes of care. They are intended to create incentives for physicians, hospitals and other providers to work together to provide higher quality and more coordinated care at a lower cost. We currently participate in a few ACOs as well as a number of bundled payment programs, and we expect value-based purchasing programs, including programs that condition payment on patient outcome measures, to become more common and to involve a higher percentage of payment amounts. We are unable at this time to predict how this trend will affect our results of operations, but it could negatively affect our revenues.

If we do not effectively attract, recruit and retain qualified physicians and other healthcare providers, our ability to deliver healthcare services efficiently will be adversely affected.

The success of our business operations depends on the number and quality of the physicians and other healthcare providers who perform services at our facilities. Our ability to recruit and retain quality providers in turn depends on several factors, including the actual and perceived quality of services furnished by our facilities, our ability to meet demands for new technology, our ability to identify and communicate with providers who want to practice in our communities and our ability to provide competitive financial compensation packages. Our ability to attract and retain providers is increasingly dependent on the ability of our facilities to offer and sustain employment arrangements. In particular, we face intense competition in the recruitment and retention of specialists and primary care providers. We may not be able to recruit all of the providers we target. In addition, we may incur increased malpractice, compliance or insurance expense depending on the quality of providers' clinical outcomes.

Additionally, our ability to recruit and employ providers is closely regulated. For example, the types, amount and duration of compensation and assistance we can provide to recruited physicians are limited by the Stark law, the Anti-kickback Statute, state anti-kickback and self-referral statutes, and related regulations. The Stark law requires, among other things, that recruitment assistance can only be provided to physicians who meet certain geographic and practice requirements, that the amount of assistance cannot be changed during the term of the recruitment agreement, and that the recruitment payments cannot generally benefit physicians currently in practice in the community beyond recruitment costs actually incurred by them. All arrangements with physicians must also be fair market value and commercially reasonable.

In addition to these legal requirements, there is competition from other communities and facilities for these providers, and this competition continues after the provider is practicing in one of our communities. For example, integrated ACOs and other kinds of "narrow" provider networks or organizations may exclude our providers from their plans' networks of healthcare providers. These contracting networks often organize hospitals, providers and ancillary healthcare providers into exclusive networks involving fewer healthcare providers. If our affiliated providers are excluded from such networks, we may have difficulty recruiting new providers or retaining existing providers.

Furthermore, a significant portion of the providers serving our facilities are native to countries other than the U.S. Our ability to recruit such providers and their ability and willingness to remain and work in the U.S. are impacted by immigration laws and regulations. Changes in immigration or naturalization laws, regulations, or procedures may adversely affect our ability to hire or retain providers and may adversely affect our costs of doing business or our ability to deliver services in our communities.

Generally, a small number of attending physicians within each of our facilities represent a large share of our inpatient revenues and admissions. The loss of one or more of these physicians—even if temporary—could cause a material reduction in our revenues, which could take significant time to replace given the difficulty and cost associated with recruiting and retaining physicians.

We may have difficulty acquiring or divesting facilities on favorable terms. Furthermore, our business could be negatively affected if acquisitions or divestitures are not successfully completed or if contingent liabilities materialize in connection with such transactions.

A significant element of our business strategy is expansion through the acquisition of acute care facilities, especially those around which a system of facilities and other healthcare services can be created. We face significant competition to acquire attractive facilities, and we may not find suitable acquisitions on favorable terms. Our primary competitors for acquisitions have included for-profit and tax-exempt facilities and hospital systems and privately capitalized start-up companies. Buyers with a strategic desire for any particular facility—for example, a facility located near existing facilities or those who will realize economic synergies—have demonstrated an ability and willingness to pay premium prices for facilities. Strategic buyers, as a result, can present a competitive barrier to our acquisition efforts.

The cost of an acquisition could result in a dilutive effect on our results of operations, depending on various factors, including the amount paid for the acquisition, the acquired facility's results of operations, allocation of purchase price, effects of subsequent legislation and limitations on rate increases. As part of our acquisition strategy, we may commit to making significant capital improvements at acquired facilities. Such improvements may be difficult to achieve in the anticipated timeframe, if at all, due to a variety of factors beyond our control, such as zoning, environmental, licensing and certificate of need regulations and restrictions.

Our ability to engage in certain acquisitions in several states may be limited due to exclusivity, non-competition and non-solicitation provisions that we have agreed to in connection with our joint ventures and previous acquisitions and divestiture transactions. Additionally, certain acquisitions may require the consent of and collaboration with our joint venture partners based upon the applicable governing documents. If we cannot obtain the cooperation of our joint venture partners in certain instances, we may not be able to pursue these opportunities.

Even if we are able to identify an attractive target, we may need to obtain financing for acquisitions, joint ventures or required capital improvements. Such financing may not be available, or we may incur or assume additional indebtedness as a result. Any financing arrangements we enter into may not be on terms favorable to us, and this could have a material adverse effect on our results of operations.

In recent years, the legislatures and attorneys general of several states have sought to exercise more active oversight authority regarding sales of facilities by tax-exempt entities. For example, as a condition to approving an acquisition involving a non-profit hospital, the state attorney general of a state in which an acquisition takes place may require us to maintain specific service lines or provide charity care at certain minimum levels for set periods of time after closing of the acquisition, regardless of profitability. This heightened scrutiny may increase the cost and difficulty, or prevent the completion, of transactions with tax-exempt organizations in the future. Our failure to acquire facilities consistent with our growth plans could prevent us from increasing our revenues.

We regularly evaluate the potential disposition of assets and facilities that may no longer help us attain our objectives. When we decide to sell assets or facilities, we may encounter difficulties in finding buyers or alternative exit strategies on acceptable terms or in a timely manner, which could delay the achievement of our strategic objectives. Additionally, the terms of our master leases entered into pursuant to sale leaseback transactions may make it more difficult to dispose of certain facilities. We may also dispose of assets or a facility at a price, or on terms, less desirable than we anticipated. In addition, we may experience greater dis-synergies than expected. After reaching an agreement with a buyer for the disposition of assets or a facility, we will be subject to satisfaction of pre-closing conditions as well as to necessary regulatory and governmental approvals on acceptable terms, which, if not satisfied or obtained, may prevent us from completing the transaction. Dispositions may also involve continued financial involvement in the divested facilities, such as through continuing equity ownership, guarantees, indemnities, transition service agreements or other financial and commercial obligations, and inability to avoid retention of certain regulatory and compliance risks. There can be no assurance that the anticipated benefits of our future divestiture strategies will be realized. Furthermore, we may be exposed to contingent liabilities in connection with completed divestitures. Finally, certain acquisition agreements and joint venture arrangements contain covenants that restrict our ability to dispose of certain facilities without first seeking consent of a joint venture partner or other third parties, which may affect our ability to take advantage of business opportunities that may be in our interest. If we do not realize the anticipated benefits of such divestitures, if contingent liabilities related to such divestitures materialize or if we are unable to divest certain properties on favorable terms or at all, this could have a material adverse effect on our results of operations.

Many of the non-urban communities in which we operate continue to face challenging economic conditions and demographic trends, which may materially and adversely impede our business strategies intended to generate organic growth and improve operating results at our facilities.

While the U.S. economy as a whole is expanding, many of the non-urban communities in which we operate continue to face challenging economic conditions, including high levels of unemployment and demographic trends. The economies in the non-urban communities in which our facilities primarily operate are often dependent on a small number of large employers, especially manufacturing or similar facilities. These employers often provide income and health insurance for a disproportionately large number of community residents who may depend on our facilities for care. The failure of one or more large employers, or the closure or substantial reduction in the number of individuals employed at manufacturing or similar facilities located in or near many of the non-urban communities in which our facilities primarily operate, could cause affected employees to move elsewhere for employment or lose insurance coverage that was otherwise available to them. When patients are experiencing personal financial difficulties or have concerns about general economic conditions, they may choose to:

- defer or forego elective surgeries and other non-emergent procedures, which are generally more profitable lines of business for facilities; or
- purchase a high-deductible insurance plan or no insurance at all, which increases a facility's dependence on self-pay revenue. Moreover, a greater number of uninsured patients may seek care in our emergency rooms.

Additionally, non-urban communities are experiencing a much slower rate of growth, if any, as compared to more concentrated population centers. As a result, we may experience payer mix pressures as aging populations in our non-urban communities shift from commercial insurance programs to Medicare or managed Medicare programs.

The occurrence of these events may impede our business strategies intended to generate organic growth and improve operating results at our facilities.

If we are unable to implement successfully standardized processes, policies and systems throughout our facilities, our operating results could be negatively impacted.

We have initiated a multi-year business initiative to standardize certain processes, policies and systems throughout our facilities, including migrating our multiple IT platforms to a smaller number of enterprise-wide systems solutions. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure and implement standardized systems, or if we fail to achieve the expected benefits from this initiative, it may impact our ability to operate profitably and efficiently, and comply in a timely manner with changing regulatory requirements and with the requests of patients, payers and business partners. The failure to transition to these systems on time, or anticipate necessary readiness and training needs, could lead to business disruption and loss of revenue. In addition, the operating results of newly acquired facilities could be impacted if such facilities are not integrated on a timely basis into our new systems. The actions we take to resolve compliance or regulatory issues within acquired facilities may affect our revenue or results of operations.

In addition, as new information systems are developed in the future, we will need to integrate them into our existing systems. Evolving industry and regulatory standards may require changes to our systems in the future. System conversions are costly, time consuming and disruptive for providers, staff and, in some cases, patients. Some of our facilities have recently converted or are currently converting from their existing system to another third party information system. If such conversions occurred on a large scale or if conversions at our larger facilities experience difficulties, the costs and disruptions could have a material adverse effect on our revenues or results of operations.

If access to our information systems or those provided by our third party vendors is interrupted or restricted, or if we are unable to make changes to our information systems, our operations could suffer.

Our business depends heavily on effective information systems to process clinical, operational and financial information. Information systems require an ongoing commitment of significant resources to maintain and enhance existing systems and to develop new systems in order to keep pace with continuing changes in information processing technology. In addition to our own systems, we rely on multiple third party providers of financial, clinical, supply chain, patient accounting and network information services and, as a result, we face operational challenges in maintaining multiple provider platforms and facilitating the interface of such systems with one another. The third party providers may not have appropriate controls to protect confidential information. We do not control the information systems of third party providers, and in some cases we may have difficulty accessing information archived on third party systems, which could subject us to liability for failure to respond to legal, regulatory or payer obligations or information requests. Our networks and technology systems are also subject to disruption due to events such as a major earthquake, fire, flood, hurricane, telecommunications failure, terrorist attack or other catastrophic event. If these systems fail or are interrupted, if our access to these systems is limited in the future or if providers develop systems more appropriate for more urban healthcare markets and not suited for our facilities, our operations could suffer.

We intend to expand our operations, including by acquiring more facilities, which will require us to integrate and transition certain existing information systems. In addition, as new information systems are developed in the future, we will need to integrate them into our existing systems. Evolving industry and regulatory standards, such as the HITECH Act, HIPAA and EHR meaningful use regulations, also may require changes to our information systems in the future. System conversions are costly, time consuming and disruptive for providers, staff and, in some cases, patients. If such conversions occurred on a large scale or if we are unable to properly integrate other information systems or expand or update our current information systems, the costs and disruptions could have a material adverse effect on our revenues or results of operations.

Our facilities face competition for management and other non-physician staffing, which may increase labor costs and reduce profitability.

In addition to depending on our physicians and other providers, the operations of our facilities are dependent on the efforts, abilities and experience of our management and medical support personnel, such as nurses, pharmacists and lab technicians. We compete with other healthcare facilities in recruiting and retaining qualified management and staff personnel responsible for the day-to-day operations of each of our facilities, including physician assistants, nurses and other non-physician healthcare professionals. In some markets, the scarce availability of nurses and other medical support personnel presents a significant operating issue and the competition for experienced and talented hospital management personnel is intense. This may result in employee turnover, require us to enhance wages and benefits to recruit and retain management, nurses and other medical support personnel, recruit personnel from foreign countries (which may be limited by changes in immigration law, regulation and policy), and hire more expensive temporary or contract personnel. In addition, the states in which we operate could adopt mandatory nurse staffing ratios or could increase mandatory nurse-to-patient staffing ratios already in place. State-mandated nurse-staffing ratios could significantly affect labor costs and have an adverse impact on revenues if we are required to limit admissions in order to meet the required ratios. Some of the employees at some of our facilities are represented by a union, and others may be in the future, which can also increase the cost of labor. If our labor costs increase, we may not be able to raise rates to offset these increased costs. We also depend on the available labor pool of semi-skilled and unskilled employees in each of the markets in which we operate. Because a significant percentage of our revenue consists of fixed, prospective payments, our ability to pass along increased labor costs is constrained. Our failure to recruit and retain qualified management, nurses and other medical support personnel, or to control our labor costs could have a material adverse effect on our revenues or results of operations.

Labor union activity could raise costs and interfere with our operations. Certain of our employees are union members and subject to the terms of collective bargaining agreements.

Increased or ongoing labor union activity is another factor that could adversely affect our labor costs or otherwise adversely impact us. Several of our facilities have unionized employees. When a new collective bargaining agreement with a union must be negotiated, whether such agreements are renewals or first contracts, there is the possibility that strikes could occur, and our operations could be disrupted or our labor costs increased as a result of these disruptions. Our labor costs also could increase significantly if a substantial number of other employees at our facilities unionize.

If our labor costs increase, we may not be able to raise rates to offset these increased costs. Because a significant percentage of our revenue consists of fixed, prospective payments, our ability to pass along increased labor costs is constrained.

The terms of the collective bargaining agreements also set forth certain requirements related to the respective facility's employment practices, seniority, hours of work, overtime, holidays, use and redemption of paid time off, extended illness bank, vacation scheduling, compensation, pay practice, health and non-health benefits, leaves of absence, grievance procedures, disability accommodations and the facility's drug and alcohol policies. If these facilities fail to fulfill any of these requirements, it could result in discussions with union representatives or the filing of a grievance that could be costly and time-consuming for those facilities. Furthermore, the terms of the collective bargaining agreements constrain our flexibility with respect to these and other employee issues. The inability to negotiate future collective bargaining agreements on favorable terms with these employees or with other unionized employees could have a material adverse effect on our business, results of operations and financial condition.

If we fail to implement and maintain certified electronic health record and coding systems in an effective and timely manner, our operations could be adversely affected.

The Medicare and Medicaid Promoting Interoperability Programs (formerly known as the Medicare and Medicaid EHR Incentive Programs for Eligible Hospitals, Critical Access Hospitals, and Eligible Professionals, and formerly referred to as "***Meaningful Use***") was established in 2011 to encourage eligible professionals, eligible hospitals, and critical access hospitals to adopt, implement, upgrade and demonstrate meaningful use of certified health information technology ("***Certified HIT***") for the purposes of advancing care coordination and improving the quality of care. In 2018, CMS merged the Meaningful Use program into the programs that are being created under MACRA, included this technology requirement as one of the four components of MIPS, and changed the name of the Meaningful Use program to the Promoting Interoperability Program. Each year, HHS and CMS revise standards required for use of Certified HIT, and they periodically revise standards required for a technology's designation as a Certified HIT. In order to meet the requirements for the Promoting Interoperability Program, we must implement, maintain and use technology that meets the Certified HIT standards. In addition, use of specific Certified HIT is required for reporting under other CMS payment programs, such as ACOs and bundled payment programs. Certain of our EHR's will require software upgrades in the future in order to continue being categorized as Certified HIT as designated by HHS. Failure to effectively comply with the new requirements of the Promoting Interoperability Program, implement EHR systems or maintain current requirements for EHR systems effectively and in a timely manner could have a material adverse effect on our revenue generated from Medicare Part B claims and other CMS QPPs in which we participate.

Under Meaningful Use, we received certain incentive payments related to our efforts to implement our EHR. Incentive payments we have received in prior years for EHR implementation were materially reduced over the program's life to immaterial amounts in 2018 and 2019. EHR incentive payments that we have previously recognized are subject to audit by CMS and potential recoupment if it is determined that we did not meet the applicable Meaningful Use standards required in connection with such incentive payments. To the extent a CMS audit determines that we did not meet the reporting requirements for Meaningful Use, the Company would be subject to the potential recoupment of the incentive and other payments previously received in connection with the Meaningful Use program. In addition, reporting under MIPS results in either a negative or positive per claim payment adjustment by CMS and potential bonus payments, as well. To the extent a CMS audit determines that we did not meet the reporting requirements of the Promoting Interoperability Program, the Company would be subject to potential recoupment of any positive adjustments or bonus payments that were previously made. Finally, certain CMS payment programs and alternative payment models, such as ACOs or bundled payment programs, in which the Company participates may require implementation and use of a specific Certified HIT. Failure to use the required Certified HIT may negatively impact the Company's participation payments, and the Company could be subject to recoupment of participation payments if CMS determines that the Company's Certified HIT did not meet the applicable requirements. A determination by CMS that the Company has made a false attestation regarding its Meaningful Use or Promoting Interoperability Program participation could also potentially be grounds for liability under the False Claims Act or other applicable federal fraud and abuse laws.

Certificate of need laws and regulations regarding licenses, ownership and operation may impair our future expansion in some states. In states without certificate of need laws, competing providers of healthcare services are able to expand and construct facilities without the need for significant regulatory approval.

Some states require prior approval for the purchase, construction and expansion of healthcare facilities, based on the state's determination of need for additional or expanded healthcare facilities or services. Certain states in which we operate facilities require a certificate of need for the purchase, construction or expansion of hospital facilities, capital expenditures exceeding a prescribed amount, changes in bed capacity or services, or for other hospital-related activities. We may not be able to obtain certificates of need required for expansion activities or to effectively compete with competing healthcare providers in the future. In addition, all of the states in which we operate facilities require hospitals, other healthcare facilities, and most healthcare providers to maintain one or more licenses. If we fail to obtain any required certificate of need or license, our ability to operate or expand operations in those states could be impaired.

In the states in which we operate that do not require certificates of need for the purchase, construction and expansion of hospital facilities, competing healthcare facilities face lower regulatory barriers to entry and expansion. If competing healthcare entities are able to purchase, construct or expand healthcare facilities without the need for regulatory approval, we may face decreased market share and revenues in those markets.

The implementation of participation and quality measurement requirements under the MACRA's Merit-Based Incentive Payment System may affect our revenues.

Under MACRA, CMS updates payment rates for physician and practitioner services on an annual basis, and implements the QPP that rewards value and outcomes through participation in MIPS or an APM program. Beginning in 2017, MIPS started measuring provider performance under four categories: quality, improvement activities, promoting interoperability and cost, and annually establishes a point threshold for each category and overall performance. In 2019, MIPS began rewarding or penalizing providers based on performance reported in CY 2017 and subsequent years. The MIPS adjustment has a more significant impact on payment for physician and practitioner services than the annual inflationary update to the Medicare PFS.

Physicians are required to participate in MIPS unless they are participants of an APM, are newly enrolled in Medicare, or see a low volume of Medicare patients (i.e., no more than 200 patients in a calendar year, 200 covered professional services, or $90,000 in charges for professional services). MIPS eligible clinicians were subject to a payment adjustment of plus or minus 4% in CY 2019 (based on CY 2017 performance) and are subject to a payment adjustment of plus or minus 5% in CY 2020 (based on CY 2018 performance) with the payment adjustment increasing each year until it reaches plus or minus 9% in CY 2022 and beyond. In addition, MIPS eligible clinicians with exceptional performance may receive up to 10% bonus payment from $500 million that has been specifically allocated for this purpose. For CY 2020, which is based on CY 2018 reporting, CMS projects that 98% of participating MIPS eligible clinicians will receive a positive adjustment of 0% to 2%. It also projects that an additional positive adjustment of 1.86% for exceptional performance will be awarded to 84% of eligible clinicians. The remaining clinicians will likely receive a negative adjustment of up to 5%. MACRA requires MIPS to be operated in a budget neutral manner, and the current low performance thresholds have resulted in a large number of clinicians being eligible for a modest positive payment adjustment. However, CMS has indicated that performance thresholds will be increased over time, which will likely result in a smaller number of clinicians receiving larger positive payment adjustments and more clinicians receiving neutral or negative payment adjustments in the future. Providers participating in an APM may be eligible for more advantageous adjustments under MIPS (or avoid any negative adjustment) and receive a 5% bonus. At this time, we have limited participation in APMs.

If an eligible clinician has not been satisfactorily participating in MIPS (and is not qualified to participate in an APM), his or her claims for Medicare Part B services are likely to be subject to negative payment adjustments in CY 2020 (which is based on CY 2018 performance), CY 2021 (which will be based on CY 2019 performance) and CY 2022 (which will be based on CY 2020 performance). For participating eligible clinicians that meet or exceed the MIPS threshold or APM requirements, claims for payment are likely to be subject to positive adjustments as well as a share of an additional pool of bonus payments. At this time, and as CMS continues to modify MIPS payment policies, it is unclear how MIPS will impact our overall physician payments under the Medicare program. If we have not timely and effectively implemented policies and procedures, quality programs and appropriate clinician contracting to ensure compliance with MACRA and other QPP requirements, we would experience a negative effect on future revenues related to Medicare Part B claims.

MACRA requires that CMS publish each eligible clinician's MIPS score and performance category scores on its Physician Compare website. Publishing of MIPS scores could have an adverse reputational effect on us if our employed physicians have low scores or scores that are lower than those of the other clinicians in the relevant communities.

If current or future laws or regulations force us or cause us to restructure our arrangements with physicians and other providers, we may incur additional costs, lose contracts and suffer a reduction in net revenue under existing contracts, and we may need to refinance our debt or obtain consent from our lenders.

A number of laws bear on our relationships with our physicians and other providers. There is a risk that state authorities in some jurisdictions may find that our contractual relationships with our physicians violate laws prohibiting the corporate practice of medicine and fee-splitting. These laws generally prohibit the practice of medicine by lay entities or persons and are intended to prevent unlicensed persons or entities from interfering with or inappropriately influencing the physician's professional judgment. They may also prevent the sharing of professional services income with non-professional or business interests. In states that have enacted corporate practice of medicine and fee-splitting prohibitions, we believe that we have structured our physician contracts in an effort to remain compliant with such laws. A regulatory agency, however, could still make a determination that our arrangements constitute a corporate practice of medicine or fee splitting violation. A review or action by regulatory authorities or the courts could force us to terminate or modify our contractual relationships with physicians and affiliated medical groups or revise them in a manner that could be materially adverse to our business.

In addition, we have also entered into a number of joint venture arrangements with physicians and other providers (e.g., hospitals and hospital operators) that are subject to state and federal fraud and abuse laws, including the Anti-kickback Statute and False Claims Act. See "We are subject to increasingly stringent governmental regulations, and we may face allegations that we have failed to comply with such regulations, which could result in criminal and civil sanctions, exclusion from government healthcare programs and even greater scrutiny that may reduce our revenues and profitability." To the extent applicable, regulatory agencies may view these transactions as prohibited arrangements that must be restructured, or discontinued, or for which we could be subject to other significant penalties, including debarment, suspension or exclusion from state and federal government healthcare programs. Although compliance programs can mitigate the risk of investigation and prosecution for violations of these laws, the risks cannot be entirely eliminated. Any action against us for violation of these laws, even if we successfully defend against it, could cause us to incur significant legal expenses and loss of revenue from those joint ventures and divert our management's attention from the operation of our business.

We are dependent on our executive management team and the loss of the services of one or more of our executive management team could have a material adverse effect on our business.

The success of our business is largely dependent upon the services and management experience of our executive management team. In addition, we depend on the ability of our executive officers and key employees to manage growth successfully and on our ability to attract and retain skilled employees. We do not maintain key man life insurance policies on any of our officers. If we were to lose any of our executive management team or members of our local management teams, or if we are unable to attract other necessary personnel in the future, it could have a material adverse effect on our business, financial condition and results of operations. If we were to lose the services of one or more members of our executive management team, we could experience a significant disruption in our operations and failure of the affected facilities to adhere to their respective business plans.

Difficulties with major expansion projects may involve delays and significant capital expenditures that could have an adverse impact on our operations and liquidity.

We may decide to construct major expansion projects to existing facilities or new facilities, including replacement facilities, in order to achieve our growth objectives. Our ability to complete new expansion projects on budget and on schedule would depend on a number of factors, including, but not limited to:

- our ability to control construction costs;
- adverse weather conditions;
- shortages of labor or materials;
- our ability to obtain necessary licensing and other required governmental authorizations; and
- other unforeseen problems and delays.

As a result of these and other factors, we cannot assure you that if we decide to pursue major expansion projects we will not experience greater construction or other expansion or replacement costs than originally planned in connection with such expansion or replacement projects. Additionally, we cannot assure you that such expansion or replacement projects will be completed in a timely manner. Any delays or other difficulties in our ability to complete new expansion or replacement projects on budget and on schedule could have a material adverse effect on our results of operations and liquidity.

Under the A&R Capella Master Lease and the 2019 Master Lease that each separately governs certain of our facilities, a default with respect to one facility could cause a default under all of the facilities subject to the A&R Capella Master Lease or the 2019 Master Lease, as applicable, which would have a material adverse effect on our business, results of operations and financial condition.

If there is a default under that certain Amended and Restated Master Lease Agreement (including cross-defaulted separate affiliate leases for facilities operated by joint ventures, the "***A&R Capella Master Lease***") with MPT Camaro OpCo, LLC, a Delaware limited liability company and wholly-owned subsidiary of Medical Properties Trust, Inc. ("***MPT***"), dated as of March 21, 2016, or that certain Master Lease Agreement (the "***2019 Master Lease***") with certain subsidiaries of MPT, dated as of December 17, 2019 (together, the "***Master Leases***" and each a "***Master Lease***"), even if such default relates to one facility, it may terminate the applicable Master Lease in its entirety with respect to all of the facilities governed by such Master Lease.

Under each Master Lease, we are subject to financial covenants based on certain fixed charges, and the failure to meet such covenants results in an event of default. Other events that could trigger a default under the Master Lease if not cured within the time periods required by the Master Lease include, without limitation, (i) failure to pay rent or other amounts due under the lease, (ii) failure to comply with the non-financial covenants under the lease, (iii) the bankruptcy of any facility lessee under a Master Lease or the guarantor of the facility lessees under the applicable Master Lease, (iv) termination of any licenses necessary for operation of a facility or required for certification under Medicare or Medicaid, (v) a change of control (as defined in the applicable Master Lease) in violation of the Master Lease and (vi) a default under any material documents between any lessee of the facilities and any lessor of any facility. Each Master Lease contains cross-default provisions so that certain defaults with respect to one of the facilities subject to such Master Lease may cause a default under the entire Master Lease. Accordingly, a default under a Master Lease that results in a termination of such Master Lease would cause us to lose the ability to operate all of the facilities subject to such Master Lease and to incur substantial costs in restoring the premises, which would have a material adverse effect on our business, results of operations and financial condition. The A&R Capella Master Lease and the 2019 Master Lease are not cross defaulted to one another.

If either Master Lease is terminated prior to its expiration because of a default and the applicable affiliate of MPT, as lessor, exercises its rights thereunder, in addition to losing the ability to operate our facilities, we may be liable for (i) damages and incur charges such as continued lease payments through the end of the lease term (or such shorter period as proscribed in the applicable Master Lease or by law) and (ii) maintenance costs for the leased property. Upon termination of either Master Lease, we are obligated to restore the applicable premises to its original condition and repair all damage caused by the installation or removal of our personal property, ordinary wear and tear excepted. We also have restoration obligations with respect to certain casualty and condemnation events. In addition, upon termination of a Master Lease, the lessor has the option to purchase all of our personal property at fair market value.

Because many of the facilities we operate are subject to long-term leases, failure to comply with the terms of such leases or failure to renew such leases could cause us to lose the ability to operate these facilities altogether and incur substantial costs in restoring the premises.

The rights to use many of our facilities are based upon long-term leases, including the Master Leases. Pursuant to the terms of these leases, we are required to pay all rent due and comply with all other lessee obligations. As of December 31, 2019, the remaining term of these leases (including renewal options) ranged from approximately 6 months to 76 years. A pledge of our interest in some of these leases may also require the consent of the respective lessor and its lenders. As a result, we may not be able to sell, assign, transfer or convey our interest in certain facilities subject to such leases in the future absent consent of such third parties even if such transactions may be in our best interest. Most of the leases require that, upon the expiration or termination of the leases, we must surrender any improvements to the land to lessor. In addition, some of our leases include early termination provisions. We are typically responsible for all taxes, insurance, assessments and maintenance obligations under the leases. The leases also generally require the lessee to either reconstruct or restore the premises to its original condition following a casualty and to apply in a specified manner any proceeds received in connection therewith. In some leases the lessor has the option to purchase some or all of the assets owned by us and used in connection with the operation of the applicable facility. Accordingly, failure to comply with the terms of such leases, the invalidity of or default or termination under such leases could cause us to lose the ability to operate these facilities altogether and incur substantial costs in restoring the premises, which could have a material adverse effect on our business, results of operations and financial condition.

If certain sale-leaseback transactions are not characterized as "operating leases" under GAAP, this could adversely affect our results of operations and our financial condition.

We have entered into sale-leaseback transactions in the past and may enter into similar sale-leaseback transactions for properties that we acquire in the future, including pursuant to that certain Strategic Agreement, dated as of March 21, 2016, with MPT Operating Partnership, L.P. ("***MPT Op***"), which grants MPT Op and its affiliates certain rights and options to provide future sale-leaseback funding or real estate loans for certain acquisitions of additional properties. Although we may intend, in some cases, for such leases to be accounted for as an "operating lease" pursuant to GAAP, depending on the terms of any specific transaction, our auditors might take the position that the leases should be accounted for as "financing obligations" under Accounting Standards Codification ("***ASC***") 840, "Leases" ("***ASC 840***"). In that event, this may materially affect assets and liabilities in our balance sheet and certain expenses in our income statement, which could have a material adverse effect on our results of operations and our financial condition.

Our debt agreements contain restrictions that will limit our flexibility in operating our business.

The ABL Agreement, the Term Loan Agreement and the Indentures contain, and any other existing or future indebtedness of ours would likely contain, a number of covenants that impose significant operating and financial restrictions on us, including restrictions on our and our subsidiaries ability to, among other things:

- incur additional debt, guarantee indebtedness or issue certain preferred shares;
- pay dividends on or make distributions in respect of, or repurchase or redeem, our capital stock or make other restricted payments;
- prepay, redeem or repurchase certain debt;
- make loans or certain investments;
- sell certain assets;
- create liens on certain assets;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our assets;
- enter into certain transactions with our affiliates;
- alter the businesses we conduct;
- enter into agreements restricting our subsidiaries' ability to pay dividends; and
- designate our subsidiaries as unrestricted subsidiaries.

As a result of these covenants, we are limited in the manner in which we conduct our business, and we may be unable to engage in favorable business activities or finance future operations or capital needs.

In addition, the ABL Facility requires us to maintain a minimum fixed charge coverage ratio at any time when the average availability is less than the greater of $65.0 million and 10% of the lesser of the aggregate amount of revolving facility commitments and the borrowing base at such time. In that event, we must satisfy a minimum fixed charge ratio of 1.0 to 1.0. At December 31, 2019 we were in compliance with this financial maintenance covenant.

A failure to comply with the covenants under the ABL Facility, the Term Loan Facility, the Notes or any of our other future indebtedness could result in an event of default, which, if not cured or waived, could have a material adverse effect on our business, financial condition and results of operations. In the event of any such default, the lenders thereunder:

- will not be required to lend any additional amounts to us;
- could elect to declare all borrowings outstanding, together with accrued and unpaid interest and fees, to be due and payable and terminate all commitments to extend further credit;
- could require us to apply all of our available cash to repay these borrowings; or
- could effectively prevent us from making debt service payments on the Term Loan Facility and the Notes (due to a cash sweep feature under the ABL Facility).

Such actions by the lenders could cause cross defaults under our other indebtedness. If we were unable to repay those amounts, the lenders and holders under the ABL Facility, the Term Loan Facility and the Notes could proceed against the collateral granted to them to secure the ABL Facility, the Term Loan Facility or the Notes, respectively. If any of our outstanding indebtedness under the ABL Facility, the Term Loan Facility, the Notes or any of our other existing or future indebtedness were to be accelerated, there can be no assurance that our assets would be sufficient to repay such indebtedness in full.

Repayment of our debt is dependent on cash flow generated by our subsidiaries.

Repayment of our indebtedness, including the ABL Facility, the Term Loan Facility and the Notes, is dependent on the generation of cash flow by our subsidiaries and their ability to make such cash available to us, by dividend, debt repayment or otherwise. Unless they are guarantors of the indebtedness, our subsidiaries do not have any obligation to pay amounts due on such indebtedness or to make funds available for that purpose. Our subsidiaries may not be able to, or may not be permitted to, make distributions to enable us to make payments in respect of our indebtedness. Each subsidiary is a distinct legal entity and, under certain circumstances, legal and contractual restrictions may limit our ability to obtain cash from our subsidiaries. While our debt agreements will limit the ability of our restricted subsidiaries to incur consensual restrictions on their ability to pay dividends or make other intercompany payments to us, these limitations are subject to certain qualifications and exceptions. In the event that we do not receive distributions from our subsidiaries, we may be unable to make required principal and interest payments on our indebtedness. In the event we require restructuring or refinancing, we cannot assure you that we will be able to restructure or refinance any of our debt on commercially reasonable terms or at all.

Despite our substantial indebtedness, we may still be able to incur significantly more debt, which could intensify the risks described above.

We and our subsidiaries may be able to incur substantial indebtedness in the future. Although the terms of the ABL Agreement, the Term Loan Agreement and the Indentures contain restrictions on our and our subsidiaries' ability to incur additional indebtedness, these restrictions are subject to a number of important qualifications and exceptions, and the indebtedness incurred in compliance with these restrictions could be substantial. These restrictions also will not prevent us from incurring obligations that do not constitute indebtedness. As of December 31, 2019, we would have had approximately $547.3 million available for additional borrowing under the ABL Facility (without giving effect to letters of credit), all of which would be secured. In addition to the Notes and our borrowings under the ABL Facility and the Term Loan Facility, the covenants under any other existing or future debt instruments could allow us to incur a significant amount of additional indebtedness and, subject to certain limitations, such additional indebtedness could be secured. The more leveraged we become, the more we, and in turn our security holders, will be exposed to certain risks described above under "—Our debt agreements contain restrictions that will limit our flexibility in operating our business."

Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.

Borrowings under the ABL Facility and the Term Loan Facility are at variable rates of interest and expose us to interest rate risk. Assuming the ABL Facility is fully drawn at December 31, 2019 and, prior to giving effect to the Interest Rate Swap (defined below), each 1% change in variable interest rates would result in an approximate $43 million change in aggregate annual interest expense on indebtedness under the ABL Facility and the Term Loan Facility. To manage this risk, we entered into an interest rate swap agreement on December 21, 2018 with Citibank, N.A. as counterparty (the "***Interest Rate Swap***"). The terms of the Interest Rate Swap require us to pay a fixed rate of 2.63% on a notional amount of $1,100.0 million and, in exchange, we receive one-month London Interbank Offered Rate ("***LIBOR***"). The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. We have not designated our Interest Rate Swap as a cash flow hedge in accordance with ASC 815, "Derivatives and Hedging" ("***ASC 815***"). Therefore, all changes in the fair value of our Interest Rate Swap will be recognized through interest expense in our results of operations. Changes in the fair value of our Interest Rate Swap could result in a material effect on our consolidated results of operations and financial position; however, we do not anticipate that changes in the fair value of our Interest Rate Swap will have any impact on our cash flows.

Discontinuation, reform or replacement of LIBOR may adversely affect our results of operations.

The U.K. Financial Conduct Authority announced in 2017 that it intends to phase out LIBOR by the end of 2021. Changes to LIBOR or any other benchmark rate may impact credit markets. Borrowings under our Term Loan Facility and ABL Facility bear interest at rates based on LIBOR. The administrative agent for those facilities may approve a comparable or successor rate with respect to LIBOR or, if not feasible, another accommodation as reasonably determined by the agent. The replacement of LIBOR with a comparable or successor rate could cause the amount of interest payable on our Term Loan Facility and ABL Facility to be different than expected.

Additionally, the notional amount associated with our Interest Rate Swap is based on LIBOR. If LIBOR becomes unavailable, it is unclear how payments under our Interest Rate Swap would be calculated. Relevant industry groups are seeking to create a standard protocol addressing the expected discontinuation of LIBOR, but there can be no assurance that such a protocol will be developed or implemented with respect to our Interest Rate Swap.

Our ability to utilize our net operating loss carryforwards may be limited, and we may not be able to utilize our net operating loss carryforwards as a result of recent U.S. federal tax reform legislation.

As of December 31, 2019, we had net operating loss carryforwards ("***NOLs***") of approximately $388.7 million for federal income tax purposes, which expire at various dates between 2028 through 2037 for NOLs generated prior to 2018, and indefinite lives for NOLs generated in 2018 and future periods. Additionally, we had approximately $2.9 billion in state and local net operating loss carryforwards that expire at various dates between 2020 through 2038. To the extent available and not otherwise utilized, we intend to use any NOL carryforwards to reduce the applicable U.S. or state corporate income tax liability associated with our operations. However, our ability to utilize our NOL carryforwards is based on the extent to which we generate future taxable income and on prevailing corporate income tax rates, and we cannot provide any assurance as to when and to what extent we will generate sufficient future taxable income to realize our deferred tax assets, whether in whole or in part. Furthermore, the utilization of our NOL carryforwards may become subject to an annual limitation under Section 382 of the Code (and similar state provisions) in the event of certain cumulative changes in the ownership interest of significant shareholders in excess of 50 percent over a three-year period. This could limit the amount of NOL carryforwards that can be utilized annually to offset taxable income. The amount of the annual limitation is determined based on the value of a company immediately prior to the ownership change. Subsequent ownership changes may further affect the limitation in future years. For these reasons, our ability to utilize our NOLs may be limited.

Item 2. ***Properties.***

The table below presents certain information with respect to our hospital campuses as of December 31, 2019:

(a) This facility is owned and operated by a joint venture between us and an unrelated third party. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.
(b) This facility is owned and operated by a joint venture with physicians in which a wholly-owned LifePoint affiliate has a controlling interest. The real property on which this facility is located is owned by the LifePoint member and leased to the joint venture.
(c) This facility is owned and operated by a joint venture with physicians in which a wholly-owned LifePoint affiliate has a controlling interest.
(d) This facility is subject to a sale-leaseback arrangement with affiliates of MPT.
(e) Effective January 1, 2020, this facility is owned and operated by St. Francis Holding Company, LLC ("***SFHC***"), a joint venture between us and Emory. Effective January 1, 2020, a wholly-owned LifePoint affiliate owns the real property of this facility and leases the real property to SFHC.
(f) This facility is owned and operated by the Regional Health Network of Kentucky and Southern Indiana ("***RHN***"), a joint venture between us and Norton. A wholly-owned LifePoint affiliate owns a controlling interest in RHN.
(g) This facility is owned and operated by Duke LifePoint Healthcare (or a joint venture between affiliates of the members of Duke LifePoint Healthcare). A wholly-owned LifePoint affiliate owns a controlling interest in Duke LifePoint Healthcare and such other joint venture.
(h) This facility is owned and operated by a joint venture between a local not-for-profit entity and Duke LifePoint Healthcare.
(i) This facility is owned and operated by a joint venture among us, physicians and a joint venture between us and University of Washington. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.
(j) This facility is owned and operated by a joint venture between us and University of Washington. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.
(k) This facility is subject to a sale-leaseback arrangement with a third-party for a hospital building whose rent is contingent on the financial performance of the hospital and a sale-leaseback arrangement for a medical office building.

We own or lease and operate medical office buildings, clinics and other ancillary properties in conjunction with many of our hospitals. These medical office buildings and clinics are primarily occupied by physicians who practice at our hospitals. Additionally, we lease office space in Brentwood, Tennessee for our health support center. All of our facilities are suitable for their respective uses and are generally adequate for our present needs.

Item 3. ***Legal Proceedings.***

Healthcare facilities are, from time to time, subject to claims and suits arising in the ordinary course of business, including claims for damages for personal injuries, medical malpractice, breach of contracts, wrongful restriction of or interference with physicians' staff privileges and employment related claims. In certain of these actions, plaintiffs request payment for damages, including punitive damages, that may not be covered by insurance. We are currently not a party to any pending proceedings, which, in management's opinion, would have a material adverse effect on our business, financial condition or results of operations.

For more information about legal proceedings and general liability claims, refer to Note 14 to our accompanying consolidated financial statements included elsewhere in this Report.

Item 4. ***Mine Safety Disclosures*****.**

Not applicable.

PART II

Item 5. ***Market for Company's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***

All of our equity securities are held by Holdings, whose indirect parent is DSB Parent. As of December 31, 2019, our Sponsor beneficially owned approximately 98.6% of the capital units of LifePoint with the remaining approximate 1.4% owned by current or former directors, members of management, employees and consultants of the Company. Because our equity securities are privately held, there is no established public trading market for our equity securities.

Equity Compensation Plan Information

Refer to Note 13 to our accompanying consolidated financial statements included elsewhere in this Report for a discussion of profits units issued by DSB Parent to our employees and directors.

Recent Sales of Unregistered Securities

There have been no recent sales of unregistered equity securities of the Company within the period covered by this Report.

Item 6. ***Selected Financial Data.***

Set forth below is the selected historical consolidated financial data of the Company for the periods and as of the dates indicated.

On December 3, 2015, the Apollo/RegionalCare Acquisition was completed. For periods prior to the Apollo/RegionalCare Acquisition, our operations are referred to as the "***Predecessor***". For periods after the Apollo/RegionalCare Acquisition, our operations are referred to as the "***Successor***". Additionally, on April 29, 2016, the RegionalCare/Capella Merger was completed, which, for accounting purposes, became effective on May 1, 2016. Furthermore, on November 16, 2018, the LifePoint/RCCH Merger was completed, which, for accounting purposes became effective on November 17, 2018.

The RegionalCare/Capella Merger and LifePoint/RCCH Merger were significant transactions which affect the comparability of the selected financial data. The following information should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations," as well as our accompanying consolidated financial statements included elsewhere in this Report.

($ in millions)	Successor					Predecessor
	Year Ended December 31, 2019	Year Ended December 31, 2018	Year Ended December 31, 2017	Year Ended December 31, 2016	Period From 12/4/2015 through 12/31/2015	Period From 1/1/2015 through 12/3/2015
Statements of Operations Data:						
Revenues	$ 8,752.8	$ 2,778.1	$ 1,872.8	$ 1,502.7	$ 64.0	$ 770.1

Net cash provided by financing activities	585.7	5,760.7	32.0	683.2	6.4	47.3

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

We recommend that you read this discussion together with our accompanying consolidated financial statements and related notes included elsewhere in this Report.

The following management's discussion and analysis of our financial condition and results of operations covers periods prior to the consummation of the LifePoint/RCCH Merger, which was effective November 16, 2018, and for accounting purposes, became effective November 17, 2018. In this management's discussion and analysis, (i) the results of operations from January 1, 2019 to December 31, 2019 are those of the Company on a consolidated basis, (ii) the results of operations from January 1, 2018 to November 16, 2018 are those of RCCH only, and (iii) the results of operations from November 17, 2018 to December 31, 2018 are those of Legacy LifePoint and RCCH on a combined basis. Additionally, in this management's discussion and analysis under "Supplemental Results of Operations for Legacy LifePoint and RCCH on a Combined Basis for the Year Ended December 31, 2018 and for LifePoint on a Consolidated Basis for the Year Ended December 31, 2019," we are providing results of operations on a combined basis for the year ended December 31, 2018 as if the LifePoint/RCCH Merger had occurred on January 1, 2018. GAAP does not allow for such a combination of results of operations; however, we believe the combined results provide information that is useful in evaluating our financial performance.

Management's discussion and analysis of our financial condition and results of operations for the year ended December 31, 2017 has been omitted as permitted by Instruction 1 to Item 303(a) of Regulation S-K. Refer to "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Results of Operations for the Years Ended December 31, 2018 and 2017" in our Annual Report for the year ended December 31, 2018, dated March 28, 2019, for management's discussion and analysis of changes in financial condition and results of operations as of and for the years ended December 31, 2018 and 2017.

Overview

We own and operate community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities. As of December 31, 2019, we operated 88 hospital campuses in 29 states throughout the U.S., having a total of 11,493 licensed beds. We generate revenues by providing a broad range of general and specialized healthcare services to patients through a network of hospitals and outpatient facilities.

We seek to fulfill our mission of Making Communities Healthier® by (1) delivering high quality patient care, (2) supporting our physicians, (3) creating excellent workplaces for our employees, (4) taking a leadership role in our communities and (5) ensuring fiscal responsibility. We strive to create places where people choose to come for healthcare, physicians want to practice and employees want to work.

We generated $8,752.8 million, $2,778.1 million and $1,872.8 million in revenues during the years ended December 31, 2019, 2018 and 2017, respectively. In 2019, approximately 55.2% of our revenues related to patients participating in Medicare and Medicaid programs, collectively. Payments made to our facilities pursuant to the Medicare and Medicaid programs for services rendered rarely exceed our costs for such services. As a result, we rely largely on payments made by private or commercial payers, together with certain limited services provided to Medicare recipients, to generate an operating profit. The healthcare industry continues to endure a period where the costs of providing care are rising faster than reimbursement rates from government or private commercial payers. This places a premium on efficient operation, the ability to reduce or control costs and the need to leverage the benefits of our organization across all of our facilities.

Recent Developments

LifePoint/RCCH Merger

On July 22, 2018, RCCH, Legend Merger Sub and Legacy LifePoint entered into an agreement and plan of merger, pursuant to which, effective November 16, 2018, Legend Merger Sub merged with and into Legacy LifePoint, with Legacy LifePoint surviving the merger as a wholly-owned subsidiary of RCCH. Our consolidated results of operations for the year ended December 31, 2018 include the results of Legacy LifePoint beginning on November 17, 2018. For more information about the LifePoint/RCCH Merger, refer to "Part 1, Item 1. Business—Our Background" and Note 2 to our accompanying consolidated financial statements included elsewhere in this Report.

Acquisitions & Divestitures

The following table summarizes our hospital acquisitions and divestitures completed during the years ended December 31, 2019, 2018 and 2017:

Facility	Location	Effective Date
Acquisitions:		
Lourdes Health ("***Lourdes***") (two hospital campuses)	Pasco, Washington	September 1, 2018
Trios Health ("***Trios***") (two hospital campuses) (JV)	Kennewick, Washington	August 4, 2018
St. Joseph Regional Medical Center ("***St. Joseph***")	Lewiston, Idaho	May 1, 2017
Divestitures:		
Sharon Hospital ("***Sharon***")	Sharon, Connecticut	August 1, 2017
EaStar Health System ("***EaStar***")	Muskogee, Oklahoma	April 1, 2017
Teche Regional Medical Center ("***Teche***")	Morgan City, Louisiana	October 1, 2019

Additionally, effective April 1, 2018, we acquired Pacific Medical Data Solutions ("***PMDS***"). PMDS is a healthcare technology and software services company that provides revenue cycle, billing automation and software solutions to multi-specialty physician groups, ambulatory surgery centers and urgent care clinics.

For additional information regarding our recent acquisitions and divestitures, refer to Note 3 to our accompanying consolidated financial statements included elsewhere in this Report.

2019 MPT Sale-Leaseback Transaction

On November 4, 2019, certain of our subsidiaries (collectively, the "***LifePoint Entities***") entered into a Real Property Asset Purchase Agreement (the "***Real Property APA***") with certain subsidiaries of MPT. On December 17, 2019, pursuant to the Real Property APA, the LifePoint Entities sold the real estate of certain medical facilities (the "***2019 Master Lease Facilities***") to affiliates of MPT, and immediately thereafter certain LifePoint Entities leased or subleased the land and the buildings associated with the 2019 Master Lease Facilities from affiliates of MPT in accordance with the terms of the 2019 Master Lease. Such sale-leaseback transaction is referred to as the "***Sale Leaseback Transaction***". For additional information regarding the Sale Leaseback Transaction, refer to Note 8 to our accompanying consolidated financial statements included elsewhere in this Report.

Joint Ventures

Emory Healthcare Joint Venture

Effective January 1, 2020, we formed a new joint venture with Emory to operate St. Francis Hospital ("St. Francis") located in Columbus, Georgia. LifePoint holds a controlling interest in St. Francis such that it will continue to be included in our consolidated financial statements. For additional information regarding the Emory joint venture, refer to Note 3 to our accompanying consolidated financial statements included elsewhere in this Report.

In-Home Healthcare Partnership

We maintain a joint venture with a wholly-owned subsidiary of LHC, In-Home Healthcare Partnership ("IHHP"), the purpose of which is to own and operate our home health agencies and hospices and certain of LHC's home health agencies and hospices, leveraging our combined expertise with LHC to enhance home health and hospice services in the communities served by our hospitals.

During the year ended December 31, 2019, we expanded our partnership with LHC by transferring ownership and management of one of our home health agencies and two of our hospices to IHHP effective December 1, 2019. Additionally, effective January 1, 2020, we transferred the ownership of one additional home health agency and one additional hospice to IHHP and subsequently sold a portion of our ownership interest in IHHP to LHC for cash proceeds of approximately $23.6 million. For additional information regarding IHHP, refer to Note 3 to our accompanying consolidated financial statements included elsewhere in this Report.

Health Care Reform Efforts

The Affordable Care Act, which became federal law in 2010, dramatically altered the U.S. healthcare system and was intended to decrease the number of uninsured Americans and reduce the overall cost of healthcare by, among other things, requiring most Americans to obtain health insurance (the "***individual mandate***"), providing additional funding for Medicaid in states that choose to expand their programs, reducing Medicare inpatient prospective payment system, Medicare outpatient prospective payment system, and Medicare and Medicaid disproportionate share hospital payments to providers, expanding the Medicare program's use of value-based purchasing programs, tying hospital payments to the satisfaction of certain quality criteria, and instituting certain private health insurance reforms. The Affordable Care Act has, however, been subject to a number of legislative and regulatory changes and court challenges, and its future is uncertain.

The net effect of the Affordable Care Act, as currently adopted, on our business is subject to numerous variables, including the law's complexity, lack of complete implementing regulations and interpretive guidance, and the sporadic implementation of the numerous programs designed to improve access and quality. Additional variables related to the Affordable Care Act impacting our business will be how, if at all, Congress repeals, replaces, or otherwise modifies the Affordable Care Act, whether the Affordable Care Act is found to be unconstitutional after the repeal of the penalties associated with the individual mandate, and how states, providers, insurance companies, employers and other market participants respond during this period of uncertainty. As a result, we are unable to predict the effect on our business, financial condition or results of operations, the availability of adequate insurance coverage for patients seeking healthcare at our facilities, the reductions in government healthcare reimbursement spending, and numerous other provisions potentially impacted by the repeal of the penalties associated with the individual mandate, the cessation of the cost sharing reduction payments, and the possible repeal, replacement or modification of the Affordable Care Act.

Refer to "Part I, Item 1. Business—Health Care Reform" included elsewhere in this Report for more information about the Affordable Care Act.

Competitive and Structural Environment

The environment in which our facilities operate is extremely competitive. Our hospitals face competition from other acute care hospitals, including larger tertiary hospitals located in larger markets and/or affiliated with universities; specialty hospitals that focus on one or a small number of very lucrative service lines but that are not required to operate emergency departments; freestanding emergency departments and outpatient surgery, diagnostic, cancer care and urgent care centers; and physicians on the medical staffs of our hospitals. In many cases, our competitors focus on the service lines that offer the highest margins. By doing so, our competitors can potentially draw the best-paying business out of our hospitals. This, in turn, can reduce the overall operating profit of our hospitals as we are often obligated to offer service lines that operate at a loss or that have much lower profit margins. We continue to see the shift of increasingly complex procedures from the inpatient to the outpatient setting and have also seen growth in the general shift of lower acuity procedures to physician offices and other non-hospital outpatient settings. These trends have contributed to decreases in admissions and surgical volumes and have, to some extent, offset our efforts to improve equivalent admission rates at many of our hospitals.

Our hospitals also face extreme competition in their efforts to recruit and retain physicians on their medical staffs. It is widely recognized that the U.S. has a shortage of physicians in certain practice areas, including primary care physicians and specialists such as cardiologists, oncologists, urologists and orthopedists, in various areas of the country. This fact, and our ability to overcome these shortages, is directly relevant to our growth strategies because cardiologists, oncologists, urologists and orthopedists are often the physicians in highest demand in communities where our hospitals are located. Larger tertiary medical centers are acquiring physician practices and employing physicians in some of our communities. While physicians in these practices may continue to be members of the medical staffs of our hospitals, they may be less likely to refer patients to our hospitals over time.

We believe other key factors in our competition for patients is the quality of our patient care and the perception of that quality in the communities where our facilities are located, which may be influenced by, among other things, the technology, service lines and capital improvements made at our facilities and by the skills and experience of our non-physician employees involved in patient care.

In addition to competitive concerns, many of our communities are experiencing slow growth, and in some cases, population losses. We believe this trend has occurred mainly as a result of recent challenging economic conditions because the economies in the non-urban communities in which our facilities primarily operate are often dependent on a small number of larger employers, especially manufacturing or other facilities. This causes the economies of our communities to be more sensitive to economic downturns and slower to rebound when the overall U.S. economy improves. In addition, other economic factors, including, potentially, self-rationing of healthcare services, have made it more difficult to increase the number of patients who seek care at many of our facilities.

Regulatory Environment

Our business and our facilities are highly regulated, and the penalties for noncompliance can be severe. We are required to comply with extensive, complicated and overlapping government laws and regulations at the federal, state and local levels. These laws and regulations govern every aspect of how our hospitals conduct their operations, from what service lines must be offered in order to be licensed as an acute care hospital, to whether our hospitals may employ physicians, and to how (and whether) our hospitals may receive payments pursuant to the Medicare and Medicaid programs. The failure to comply with these laws and regulations can result in severe penalties including criminal penalties, civil sanctions, and the loss of our ability to receive reimbursements through the Medicare and Medicaid programs or the refund of such payments we previously received.

Not only are our facilities heavily regulated, but the rules, regulations and laws to which they are subject often change, with little or no notice, and are often interpreted and applied differently by various regulatory agencies with authority to enforce such requirements. Each change or conflicting interpretation may require our facilities to make changes in space usage, equipment, personnel or services, and may also require that standard operating policies and procedures be re-written and re-implemented. The cost of complying with such laws and regulations is a significant component of our overall expenses. Further, this expense has grown in recent periods because of new regulatory requirements and the severity of the penalties associated with non-compliance. Management anticipates that compliance expenses will continue to grow in the foreseeable future. The healthcare industry has seen a number of ongoing investigations related to patient referrals, physician recruiting and employment practices, cost reporting and billing practices, medical necessity of inpatient admissions, physician office leasing, laboratory and home healthcare services, physician ownership of hospitals and other healthcare providers, and joint ventures involving hospitals and physicians. Hospitals continue to be one of the primary focal areas of the OIG, the DOJ and other governmental fraud and abuse programs.

The Affordable Care Act imposed an affirmative obligation on healthcare providers to report and refund any overpayments received. “Overpayments” in this context include any amount received from a government program by a provider to which it is not entitled, regardless of the cause. Such overpayments are deemed to be fraudulent and become violations of the False Claims Act if not reported and refunded within the later of 60 days of identification or the date any corresponding cost report is due (if applicable). Hospitals can meet the obligation to report and refund in three ways: (1) refunding overpayments directly to the program; (2) self-disclosing the overpayment to the OIG via its voluntary self-disclosure protocol (with respect to False Claims Act and other violations not related to the Stark law); and (3) self-disclosing to CMS via the self-referral disclosure protocol (with respect to overpayments caused by potential violations of the Stark law only) for which CMS has the authority to reduce the amounts otherwise owed.

On October 8, 2019, CMS and the OIG issued proposed rules that would modify the regulations that implement and interpret the federal anti-kickback and civil monetary penalty for beneficiary inducement statutes and the Stark law. Among other things, the proposed rules would create new anti-kickback and beneficiary inducement statute safe harbors and Stark law exceptions for certain value based arrangements and arrangements that involve the donation of cybersecurity technology. In addition, the proposed rules would also provide additional guidance on several key requirements, including fair market value and commercial reasonableness, that must be met in order for physicians and healthcare providers to comply with the Stark law. CMS and the OIG have indicated that the proposed rules are intended to reduce unnecessary regulatory barriers and accelerate the transformation of the healthcare system into one that betters pay for value and promotes the coordination of care among providers. We cannot predict whether the proposed rules will be adopted and, if adopted, whether the proposed rules will be adopted in their current forms or the impact that the proposed rules would have on the Company.

Revenue Sources

Our facilities generate revenues by providing healthcare services to our patients. Depending upon the patient’s medical insurance coverage, we are paid for these services by governmental Medicare and Medicaid programs, commercial insurance, including managed care organizations, and directly by the patient. The amounts we are paid for providing healthcare services to our patients vary depending upon the payer. Governmental payers generally pay significantly less than the hospital’s customary charges for the services provided. Insured patients are generally not responsible for any difference between customary hospital charges and the amounts received from commercial insurance payers. However, insured patients are responsible for payments not covered by insurance, such as exclusions, deductibles and co-payments.

Medicare and Medicaid Reimbursement

Revenues from governmental payers, such as Medicare and Medicaid, are controlled by complex rules and regulations that stipulate the amount a hospital is paid for providing healthcare services. We must comply with these rules and regulations to continue to be eligible to participate in the Medicare and Medicaid programs. These rules and regulations are subject to frequent changes as a result of legislative and administrative action and annual payment adjustments on both the federal and the state levels. In addition, Medicare payment methodologies have been, and are expected to continue to be, revised significantly based on cost containment and policy considerations.

For more information about Medicare and Medicaid reimbursement matters, refer to "Part I, Item 1. Business—Sources of Revenue" included elsewhere in this Report.

Physician & Non-Physician Practitioner Services

We employ an increasing number of physicians and non-physician practitioners, such as physician assistants and nurse practitioners, in our hospital markets. Medicare pays us for services provided by our employed physicians and non-physician practitioners under the PFS system. MACRA, which was adopted in 2015, significantly changed how CMS determines the annual updates to the PFS. Under MACRA, the PFS payment rates that were in effect when MACRA was enacted were extended through June 30, 2015, and then increased by 0.5% for the remainder of CY 2015. PFS payment rates were increased annually by an additional 0.5% for CYs 2016, 2017 and 2018 and, after the adoption of the 2018 Act, were increased by 0.25% for CY 2019. PFS payment rates are scheduled to remain at their CY 2019 levels through CY 2025. In addition, MACRA also established the QPP for incentivizing physician and practitioner care that meets certain value, quality, cost, and performance criteria, and, beginning in CY 2019, amounts paid to physicians and practitioners under the PFS are subject to adjustment through the QPP and participation in either MIPS or an APM. For more information, refer to "Part I, Item 1. Business—Sources of Revenue—Medicare Physician Fee Schedule" included elsewhere in this Report.

HMOs, PPOs and Other Private Insurers

In addition to government programs, our facilities are reimbursed by differing types of private payers, including HMOs, PPOs and other private insurers. Revenues from HMOs, PPOs and other private insurers are subject to contracts and other arrangements that require us to discount the amounts we customarily charge for healthcare services or accept fixed, pre-determined fees for our services. These contractual discounted arrangements often limit our ability to increase charges or revenues in response to increasing costs. We actively negotiate with these payers in an effort to maintain or increase the pricing of our healthcare services; however, we have no control over patients switching their healthcare coverage to a payer with which we have negotiated less favorable reimbursement rates. In recent years, an increasing number of our patients have moved to lower-cost healthcare coverage plans, and such plans generally provide lower reimbursement rates and require patients to pay an increased portion of the costs of care through deductibles, co-payments or exclusions. Additionally, plans purchased through the Exchanges are increasingly using narrow and tiered networks that limit beneficiary provider choices. If we provide services when we are not a participating provider in the network, it can result in higher patient responsibility amounts that a patient may not have the ability to pay or may choose not to pay. We expect these trends to continue in the coming years.

Self-pay Patients

Self-pay revenues are primarily generated through the treatment of uninsured patients. Beginning in 2014, our self-pay revenues began to decrease as a percentage of overall revenues due largely to a shift from self-pay to Medicaid and HMOs, PPOs and other private insurers for a portion of our patient population, which primarily has been a result of the Affordable Care Act and the expansion of Medicaid coverage in certain of the states in which we operate. These reductions partially offset trends our facilities have experienced in prior years, which included increases in self-pay revenues due to a combination of broad economic factors, including high levels of unemployment in many of our markets and increasing numbers of individuals and employers who purchase insurance plans with high deductibles and high co-payments. We cannot predict how administrative or judicial interpretations, legislative actions or any other modifications to the Affordable Care Act that may be implemented or adopted, such as the cessation of cost sharing reduction payments or the repeal of the individual mandate, may impact our self-pay revenues.

Surprise Medical Billing

Congress is considering legislation to limit the "surprise" medical bills that are often received by individuals receiving emergency and certain other services (such as anesthesia services) from out-of-network providers. Various proposals have been introduced in Congress that would generally limit cost sharing for insured individuals who receive emergency and certain other services from out-of-network providers to in-network co-payment and deductible amounts, and would generally prohibit out-of-network providers from balance billing patients for any additional amounts. The proposals would either set payments from payers to out-of-network providers at the median in-network rate, or would allow payers and providers to refer payment disagreements to independent dispute resolution mechanisms. A number of states are considering or have already adopted legislation to eliminate surprise billing. We cannot predict how legislative actions to modify or pass these proposals may be implemented or adopted, or what impact, if any, this may have on our contracts with providers or on our revenues.

Price Transparency

Under the OPPS Rule for CY 2020, CMS finalized price transparency requirements that are applicable to hospitals and, beginning January 1, 2021, require (i) public online disclosure of all standard charges for all hospital items and services and (ii) public display in a consumer-friendly manner of cash prices, payer-specific negotiated charges, and de-identified minimum and maximum negotiated charges for at least 300 "shoppable" services (70 CMS-specified and 230 hospital-selected). The final rule also authorizes CMS to monitor hospital compliance with reporting requirements and to take actions to address hospital noncompliance (including issuing a warning notice, requesting a corrective action plan, and imposing civil monetary penalties). The Departments of the Treasury, Labor, and Health and Human Services have also undertaken regulatory efforts to increase price transparency with a proposal requiring health plans to publicly release all of their negotiated rates. On December 4, 2019, a lawsuit was filed challenging the final rule and CMS' new price transparency requirements. We are unable to predict the outcome of that litigation or what affect the public disclosure of hospitals' or insurance providers' negotiated rates would have on our future negotiations with payers or on our revenues.

Results of Operations

Certain Definitions

The following definitions apply throughout the remaining portion of Management's Discussion and Analysis of Financial Condition and Results of Operations:

Adjusted EBITDA. EBITDA adjusted to exclude unusual items and other adjustments required or permitted in calculating debt covenant compliance under the Indentures governing the Notes and/or the Term Loan Facility and ABL Facility. We believe that this inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA are appropriate to provide additional information to investors about the impact of certain non-cash items, unusual items that we do not expect to continue at the same level in the future and other items.

Admissions. The total number of patients admitted to our hospitals. Used by management and investors as a general measure of inpatient volume.

Combined. Combined information for the year ended December 31, 2018 includes the results of Legacy LifePoint and RCCH as if the LifePoint/RCCH Merger had occurred on January 1, 2018.

Consolidated. Consolidated information includes the results of all hospital operations and corporate overhead costs, including the results of our recent acquisitions and divestitures, and the results of Legacy LifePoint beginning on November 17, 2018.

EBITDA. Earnings before interest, taxes, depreciation and amortization.

Equivalent admissions. Management and investors use equivalent admissions as a general measure of combined inpatient and outpatient volume. We compute equivalent admissions by multiplying admissions (inpatient volume) by the Outpatient factor. The equivalent admissions computation "equates" outpatient revenue to the volume measure (admissions) used to measure inpatient volume resulting in a general measure of combined inpatient and outpatient volume.

Medicare case mix index. Refers to the acuity or severity of illness of an average Medicare patient at our hospitals.

Outpatient factor. The sum of gross inpatient revenue and gross outpatient revenue divided by gross inpatient revenue.

Same-hospital. Same-hospital information includes the results of the same 84 hospital campuses operated during the years ended December 31, 2019 and 2018 on a combined basis as if the LifePoint/RCCH Merger had occurred on January 1, 2018. Same-hospital information excludes the results of our recent acquisitions and divestitures completed in 2019 and 2018.

Summary

The following table summarizes our results of operations for the years ended December 31, 2019 and 2018 (dollars in millions):

	Years Ended December 31,			
	2019		2018	
	Amount	% of Revenues	Amount	% of Revenues
Revenues	$ 8,752.8	100.0 %	$ 2,778.1	100.0 %
Salaries and benefits	4,044.0	46.2	1,329.4	47.9
Supplies	1,471.7	16.8	484.5	17.4
Other operating expenses, net	2,140.6	24.4	709.2	25.6
Depreciation and amortization	378.7	4.4	129.0	4.6
Interest expense, net	577.6	6.6	186.1	6.7
Merger, acquisition and other transaction-related costs	76.9	0.9	141.5	5.1
Impairments of goodwill and long-lived assets	3.3	-	78.4	2.8
Other non-operating losses, net	5.5	0.1	7.8	0.3
	8,698.3	99.4	3,065.9	110.4
Income (loss) before income taxes	54.5	0.6	(287.8)	(10.4)
Provision for (benefit from) income taxes	77.9	0.9	0.2	-
Net loss	(23.4)	(0.3)	(288.0)	(10.4)
Less: Net income attributable to noncontrolling interests and redeemable noncontrolling interests	(19.3)	(0.2)	(5.7)	(0.2)
Net loss attributable to LifePoint Health, Inc.	$ (42.7)	(0.5) %	$ (293.7)	(10.6) %

For the Years Ended December 31, 2019 and 2018

Revenues

The following table summarizes our key revenue metrics on a consolidated basis for the years ended December 31, 2019 and 2018:

	Years Ended December 31,		Increase	% Increase
	2019	2018	(Decrease)	(Decrease)
Consolidated:				
Number of hospital campuses at end of period	88	89	(1)	(1.1)%
Revenues (in millions)	$ 8,752.8	$ 2,778.1	$ 5,974.7	215.1 %
Admissions	339,571	118,366	221,205	186.9 %
Equivalent admissions	888,331	287,619	600,712	208.9 %
Revenues per equivalent admission	$ 9,853	$ 9,659	$ 194	2.0 %
Medicare case mix index	1.58	1.60	(0.02)	(1.3)%
Inpatient surgeries	92,908	33,360	59,548	178.5 %
Outpatient surgeries	344,919	109,759	235,160	214.3 %
Total surgeries	437,827	143,119	294,708	205.9 %
Emergency department visits	1,961,459	616,150	1,345,309	218.3 %

For the year ended December 31, 2019, our consolidated revenues increased $5,974.7 million, or 215.1%, to $8,752.8 million compared to $2,778.1 million for the prior year. The increase in our revenues was primarily a result of the LifePoint/RCCH Merger and our 2018 acquisitions, net of the impact of our 2019 divestiture of Teche. Refer to *"Supplemental Results of Operations for Legacy LifePoint and RCCH on a Combined Basis for the Year Ended December 31, 2018 and for LifePoint on a Consolidated Basis for the Year Ended December 31, 2019"* included elsewhere in this Report for a more comparable analysis of our revenues on a combined basis as if the LifePoint/RCCH Merger had occurred on January 1, 2018.

During the year ended December 31, 2018, we recorded a decrease to revenues of $17.0 million as a result of a change in our accounting estimate of the collectability of accounts receivable. During the year ended December 31, 2018, we identified additional information which indicated that our current collection estimates might be different from our historical collection estimates. We utilized this new information to further refine our estimation procedures to more precisely estimate the collectability of accounts receivable. The change in our estimation procedures of the collectability of our accounts receivable is considered a change in accounting estimate in accordance with ASC 250, "Accounting Changes and Error Corrections" ("***ASC 250***").

Our revenues by payer and approximate percentages of revenues on a consolidated basis were as follows for the years ended December 31, 2019 and 2018:

	Years Ended December 31,			
	2019		2018	
	Amount	% of Revenues	Amount	% of Revenues
Medicare	$ 3,338.1	38.1 %	$ 1,105.3	39.8 %
Medicaid	1,495.3	17.1	486.3	17.5
HMOs, PPOs and other private insurers	3,698.6	42.3	1,113.8	40.1
Self-pay	59.2	0.7	17.2	0.6
Other	143.6	1.6	49.4	1.8
Revenue from contracts with customers	8,734.8	99.8	2,772.0	99.8
Rental income	18.0	0.2	6.1	0.2
Revenues	$ 8,752.8	100.0 %	$ 2,778.1	100.0 %

Salaries and Benefits

For the year ended December 31, 2019, our consolidated salaries and benefits expense was $4,044.0 million, or 46.2% of revenues, compared to $1,329.4 million, or 47.9% of revenues, for the prior year. The increase in our salaries and benefits expense was primarily a result of the LifePoint/RCCH Merger and our 2018 acquisitions, net of the impact of our 2019 divestiture of Teche.

Supplies

For the year ended December 31, 2019, our consolidated supplies expense was $1,471.7 million, or 16.8% of revenues, compared to $484.5 million, or 17.4% of revenues, for the prior year. The increase in our supplies expense was primarily a result of the LifePoint/RCCH Merger and our 2018 acquisitions, net of the impact of our 2019 divestiture of Teche.

Other Operating Expenses, Net

Other operating expenses include, among other things, contract services, professional fees, rents and leases, repairs and maintenance, utilities, insurance, non-income taxes, other income and other expenses. For the year ended December 31, 2019, our consolidated other operating expenses were $2,140.6 million, or 24.4% of revenues, compared to $709.2 million, or 25.6% of revenues, for the prior year. The increase in our other operating expenses was primarily a result of the LifePoint/RCCH Merger and our 2018 acquisitions, net of the impact of our 2019 divestiture of Teche.

Depreciation and Amortization

For the year ended December 31, 2019, our consolidated depreciation and amortization expense was $378.7 million, or 4.4% of revenues, compared to $129.0 million, or 4.6% of revenues, for the prior year. The increase in our depreciation and amortization expense was primarily a result of the LifePoint/RCCH Merger and our 2018 acquisitions, net of the impact of our 2019 divestiture of Teche.

Interest Expense, Net

For the year ended December 31, 2019, our consolidated interest expense was $577.6 million, or 6.6% of revenues, compared to $186.1 million, or 6.7% of revenues, for the prior year. The increase in our interest expense was primarily a result of the debt financing activities in connection with the LifePoint/RCCH Merger. For a further discussion of our debt and corresponding interest rates, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Merger, Acquisition and Other Transaction-Related Costs

For the year ended December 31, 2019, we recognized costs of $76.9 million, primarily related to employee severance and retention costs and other integration-related expenses in connection with the LifePoint/RCCH Merger, as well as costs related to the Sale Leaseback Transaction. For the year ended December 31, 2018, we recognized costs of $141.5 million, primarily related to legal and transaction advisory services as well as employee severance and retention costs in connection with the LifePoint/RCCH Merger, as well as costs related to our 2018 acquisitions.

Impairments of Goodwill and Long-lived Assets

For the year ended December 31, 2019, we recognized a goodwill impairment charge of $3.3 million related to one of our facilities. For the year ended December 31, 2018, we recognized impairment charges in the aggregate of $78.4 million, comprised of $53.9 million of goodwill impairments related to three of our facilities, and $24.5 million of long-lived asset impairments primarily related to the write-down of certain assets to their estimated fair values at one of our facilities. For a further discussion of impairments of goodwill and other long-lived assets, refer to Note 1 and Note 5 to our accompanying consolidated financial statements included elsewhere in this Report.

Other Non-Operating Losses, Net

For the year ended December 31, 2019, we recognized net other non-operating losses of $5.5 million, primarily related to miscellaneous asset disposals, partially offset by gains recognized in connection with the transfer of one home health agency and two hospices to IHHP. For the year ended December 31, 2018, our net other non-operating losses were primarily related to the write-off of $8.2 million of previously capitalized debt issuance costs in connection with the termination of our Prior ABL Facility and Prior Term Facility, partially offset by other miscellaneous gains and losses.

Income Taxes

For the year ended December 31, 2019, we recorded a provision for income taxes of $77.9 million, primarily related to a gain recognized for tax purposes only resulting from the Sale Leaseback Transaction. For the year ended December 31, 2018, we recorded a provision for income taxes of $0.2 million, primarily related to the non-deductibility of certain merger and acquisition costs and an increase in the valuation allowance against our deferred tax assets. For a further discussion of our income taxes, refer to Note 6 to our accompanying consolidated financial statements included elsewhere in this Report.

Supplemental Results of Operations for Legacy LifePoint and RCCH on a Combined Basis for the Year Ended December 31, 2018 and for LifePoint on a Consolidated Basis for the Year Ended December 31, 2019

As discussed above, the results of operations in this section for the year ended December 31, 2018 are presented on a combined basis as if the LifePoint/RCCH Merger had occurred on January 1, 2018. GAAP does not allow for such a combination of results of operations; however, we believe the combined results provide information that is useful in evaluating our financial performance.

The following table summarizes our key revenue metrics on a consolidated and same-hospital basis for the year ended December 31, 2019 and on a combined and same-hospital basis for the year ended December 31, 2018:

	Years Ended December 31,		Increase	% Increase
	2019	2018	(Decrease)	(Decrease)
	(Consolidated)	(Combined)		
Number of hospital campuses at end of period	88	89	(1)	(1.1)%
Revenues (in millions) (a)	$ 8,752.8	$ 8,364.9	$ 387.9	4.6 %
Admissions	339,571	343,109	(3,538)	(1.0)%
Equivalent admissions	888,331	888,441	(110)	(0.0)%
Revenues per equivalent admission (a)	$ 9,853	$ 9,415	$ 438	4.6 %
Medicare case mix index	1.58	1.55	0.03	1.9 %
Inpatient surgeries	92,908	94,044	(1,136)	(1.2)%
Outpatient surgeries	344,919	347,227	(2,308)	(0.7)%
Total surgeries	437,827	441,271	(3,444)	(0.8)%
Emergency department visits	1,961,459	1,958,745	2,714	0.1 %
Same-hospital:				
Number of hospital campuses at end of period	84	84	-	- %
Revenues (in millions) (a)	$ 8,432.1	$ 8,162.0	$ 270.1	3.3 %
Admissions	329,788	333,943	(4,155)	(1.2)%
Equivalent admissions	861,227	862,365	(1,138)	(0.1)%
Revenues per equivalent admission (a)	$ 9,791	$ 9,465	$ 326	3.4 %
Medicare case mix index	1.58	1.55	0.03	1.9 %
Inpatient surgeries	89,815	91,468	(1,653)	(1.8)%
Outpatient surgeries	336,390	338,437	(2,047)	(0.6)%
Total surgeries	426,205	429,905	(3,700)	(0.9)%
Emergency department visits	1,891,097	1,881,896	9,201	0.5 %

(a) Revenues and revenues per equivalent admission for the year ended December 31, 2018 have been adjusted to exclude a charge of $17.0 million related to a change in our accounting estimate of the collectability of accounts receivable. The change in our estimation procedures of the collectability of our accounts receivable is considered a change in accounting estimate in accordance with ASC 250.

For the year ended December 31, 2019, our consolidated revenues increased $387.9 million, or 4.6%, compared to the prior year. The increase in our revenues was primarily attributable to a 3.3% increase in our same-hospital revenues and our 2018 acquisitions, partially offset by certain Legacy LifePoint divestitures completed in 2019 and 2018. The increase in our same-hospital revenues for the year ended December 31, 2019 was primarily attributable to improvements in commercial and governmental pricing as well as the continuation of increases in higher acuity cases treated during the year ended December 31, 2019 compared to the prior year. Our same-hospital admissions and equivalent admissions for the year ended December 31, 2019 declined by 1.2% and 0.1%, respectively, compared to the prior year on a combined basis. The decrease in our same-hospital admissions was partially attributable to isolated physician coverage challenges in a few of our markets that resulted in a decline in certain lower acuity medical admissions, including deliveries. Additionally, we experienced declines in inpatient surgeries in areas such as orthopedics as well as certain lower acuity endoscopy and obstetrics related procedures. Our same-hospital equivalent admissions declined less significantly than admissions as a result of growth in emergency department visits, partially due to a higher number of flu related cases as well as the positive impact of certain recent strategic capital investments that we have made in a few of our markets.

Our revenues by payer and approximate percentages of revenues on a consolidated basis for the year ended December 31, 2019 and on a combined basis for the year ended December 31, 2018 were as follows:

	Years Ended December 31,			
	2019		2018	
	Amount	% of Revenues	Amount	% of Revenues
	(Consolidated)		(Combined)	
Medicare	$ 3,338.1	38.1 %	$ 3,169.7	37.9 %
Medicaid	1,495.3	17.1	1,388.8	16.6
HMOs, PPOs and other private insurers	3,698.6	42.3	3,572.5	42.7
Self-pay	59.2	0.7	75.0	0.9
Other	143.6	1.6	141.0	1.7
Revenue from contracts with customers	8,734.8	99.8	8,347.0	99.8
Rental income	18.0	0.2	17.9	0.2
Revenues (a)	$ 8,752.8	100.0 %	$ 8,364.9	100.0 %

(a) Revenues for the year ended December 31, 2018 have been adjusted to exclude a charge of $17.0 million related to a change in our accounting estimate of the collectability of accounts receivable. The change in our estimation procedures of the collectability of our accounts receivable is considered a change in accounting estimate in accordance with ASC 250.

Non-GAAP Measures

Adjusted EBITDA

The following table presents a reconciliation of net loss to EBITDA and Adjusted EBITDA on a consolidated basis for the year ended December 31, 2019 and on a combined basis for the year ended December 31, 2018 (in millions):

	Years Ended December 31,	
	2019	2018
	(Consolidated)	(Combined)
Net loss	$ (23.4)	$ (424.0)
Interest expense, net	577.6	315.9
Income taxes	77.9	0.3
Depreciation and amortization	378.7	413.5
EBITDA	1,010.8	305.7
(a) Stock-based compensation	7.6	91.8
(b) Change in accounting estimate of collectability of accounts receivable	-	17.0
(c) Merger, acquisition and other transaction-related costs	76.9	321.0
(d) Impairments of goodwill and long-lived assets	3.3	204.2
(e) Facility lease expense	(31.8)	(28.2)
(f) Discontinued operations	2.3	5.2
(g) Non-cash and other items	12.1	39.3
(h) One-time costs and non-recurring items	27.9	18.2
Subtotal	1,109.1	974.2
(i) Pro forma EBITDA from in-market investments and acquisitions	30.7	60.3
(j) Pro forma cost savings	13.5	67.5
Subtotal	1,153.3	1,102.0
(k) Pro forma facility lease expense	(48.7)	(50.8)
Adjusted EBITDA	$ 1,104.6	$ 1,051.2

* *Footnote references included on the following page.*

(a) Represents the exclusion of stock-based compensation expense.
(b) Represents the exclusion of one-time, non-cash charges recognized in the fourth quarter of 2018 related to changes in our accounting estimates of the collectability of accounts receivable.
(c) Represents costs associated with the LifePoint/RCCH Merger, the Sale Leaseback Transaction and certain other transactions, including legal, financing and transaction advisory services, employee severance and retention costs and other integration-related expenses associated with such transactions.
(d) Represents the exclusion of non-cash impairment charges related to goodwill and long-lived assets.
(e) Represents cash interest expense in connection with certain leases that are recorded as capital and financing leases within our accompanying consolidated financial statements included elsewhere in this Report. Pursuant to the terms of our financial covenants contained in our debt agreements, we are required to consider cash interest expense on hospital-related capital and financing leases within the definition of Adjusted EBITDA. Additionally, differences between cash payments and reported rent expense for facility operating leases are reflected within this adjustment in accordance with our debt agreements.
(f) Represents the elimination of EBITDA associated with facilities that have been divested.
(g) Represents the exclusion of certain non-cash gains and losses and other items.
(h) Represents the exclusion of certain one-time costs and non-recurring items.
(i) Represents the EBITDA of acquired facilities for periods prior to the acquisition date, inclusive of certain run rate cost savings for implemented headcount reductions. Additionally, the net pro forma EBITDA from new or expanded service lines and newly constructed facilities are included within this adjustment.
(j) Represents the unrealized annual cost savings related to certain corporate integration, operational improvements and synergies anticipated from the LifePoint/RCCH Merger.
(k) Represents the unrealized incremental annual lease expense associated with the Sale Leaseback Transaction. This incremental expense is also included for the year ended December 31, 2018 on a pro forma basis for comparative purposes.

Leverage

The following table illustrates our indebtedness and certain leverage ratios prepared in accordance with the calculations set forth in the Indentures and the ABL Agreement and the Term Loan Agreement as of and for the years ended December 31, 2019 and 2018 (dollars in millions):

	December 31, 2019	December 31, 2018
Cash and cash equivalents	$ 748.1	$ 58.1
ABL Facility	$ -	$ 20.0
Term Loan Facility	3,523.4	3,550.0
8.25% Secured Notes	800.0	800.0
Total Secured Debt (a)	$ 4,323.4	$ 4,370.0
Net Secured Debt (a)	$ 3,575.3	$ 4,311.9
9.75% Unsecured Notes	$ 1,425.0	$ 1,425.0
11.5% Unsecured Notes	350.0	350.0
Total Debt (a)	$ 6,098.4	$ 6,145.0
Net Debt (a)	$ 5,350.3	$ 6,086.9
Adjusted EBITDA (b)	$ 1,104.6	$ 1,102.0
Total Secured Debt (a) / Adjusted EBITDA (b)	3.91x	3.97x
Net Secured Debt (a) / Adjusted EBITDA (b)	3.24x	3.91x
Total Debt (a) / Adjusted EBITDA (b)	5.52x	5.58x
Net Debt (a) / Adjusted EBITDA (b)	4.84x	5.52x

(a) Excludes capital and financing leases, which are not considered indebtedness for purposes of calculating the ratios set forth in the Indentures, the ABL Agreement and the Term Loan Agreement, as well as subordinated debt and unamortized debt issuance costs.
(b) Adjusted EBITDA and the resulting ratios above for the year ended December 31, 2019 are presented on a consolidated basis after giving effect to the Sale Leaseback Transaction, and Adjusted EBITDA and the resulting ratios above for the year ended December 31, 2018 are presented on a combined basis and as originally reported prior to giving effect to the Sale Leaseback Transaction.

Liquidity and Capital Resources

Liquidity

Our primary sources of liquidity are cash generated by operations and borrowings under the ABL Facility. Our primary uses of cash are working capital requirements, debt service requirements and capital expenditures. Based on our current level of operations and available cash, we believe our cash flows from operations, combined with availability under the ABL Facility, will provide sufficient liquidity to fund our current obligations, projected working capital requirements, debt service requirements and capital spending requirements over the next twelve months. We cannot assure you, however, that our business will generate sufficient cash flows from operations or that future borrowings will be available to us under the ABL Facility, which is subject to a borrowing base, in an amount sufficient to enable us to pay principal and interest on the ABL Facility, the Term Loan Facility and the Notes, or to fund other liquidity needs. Our ability to do so depends on prevailing economic conditions, many of which are beyond our control. In addition, upon the occurrence of certain events, such as a change of control, we could be required to repay or refinance our indebtedness. We cannot assure you that we will be able to refinance any of our indebtedness on commercially reasonable terms or at all. Any future acquisitions, joint ventures or other similar transactions will likely require additional capital, and there can be no assurance that any such capital will be available to us on acceptable terms or at all.

The following table presents summarized cash flow information for the years ended December 31, 2019 and 2018 (in millions):

	2019	2018
Net cash provided by (used in) operating activities	$ 413.6	$ (73.0)
Net cash used in investing activities	(310.1)	(5,645.7)
Net cash provided by financing activities	585.7	5,760.7
Net change in cash and cash equivalents	$ 689.2	$ 42.0

Operating Activities

For the year ended December 31, 2019, our cash flows from operating activities increased by $486.6 million compared to the prior year, primarily as a result of our strong operating performance, in addition to the collection of income tax refunds and less merger, acquisition and other transaction-related expenses during the year ended December 31, 2019 compared to the prior year. For the year ended December 31, 2018, our cash flows from operating activities decreased by $178.6 million compared to the prior year, primarily as a result of merger-related expenses including legal and transaction advisory services as well as employee severance and retention costs in connection with the LifePoint/RCCH Merger.

Investing Activities

For the year ended December 31, 2019, our net cash used in investing activities primarily consisted of purchases of property and equipment.

We invested $336.7 million and $319.7 million in purchases of property and equipment for the years ended December 31, 2019 and 2018, respectively. Refer to "*Capital Expenditures*" for further information.

Additionally, for the year ended December 31, 2018, we invested $5,345.9 million primarily related to the LifePoint/RCCH Merger in addition to our acquisitions of Lourdes, Trios and PMDS.

Financing Activities

For the year ended December 31, 2019, our net cash provided by financing activities primarily consisted of proceeds from our Sale-Leaseback Transaction, net repayments of loans outstanding on our ABL Facility and installment payments on our Term Loan Facility. Additionally, for the year ended December 31, 2019, we made cash distributions to DSB Parent L.P., a Delaware limited partnership ("***DSB Parent***"), which is our indirect parent, of $10.9 million, primarily in connection with DSB Parent's repurchase of certain previously issued capital units and profits units that were held by former employees and executives. For the year ended December 31, 2018, net cash provided by financing activities related primarily to the net increase in borrowings and equity to effectuate the LifePoint/RCCH Merger. Refer to "*Capital Resources*" for further information regarding our recent debt transactions.

Capital Expenditures

We continue to make significant, targeted investments at our facilities to add new technologies, modernize facilities and expand the services available. These investments should assist in our efforts to attract and retain physicians, to offset outmigration of patients and to make our facilities more desirable to our employees and potential patients.

The following table summarizes our capital expenditures as a percentage of revenues and as a percentage of depreciation expense for the years ended December 31, 2019 and 2018 (dollars in millions):

	2019		2018	
	Amount	% of Revenues	Amount	% of Revenues
Capital expenditures	$ 336.7	3.8 %	$ 319.7	11.5 %
Depreciation expense	376.9		128.5	
Ratio of capital expenditures to depreciation expense	89.3 %		248.8 %	

We have a formal and intensive review procedure for the authorization of capital expenditures that exceed an established threshold. One of the most important financial measures of acceptability for a discretionary capital project is whether its projected discounted cash flow return on investment exceeds our projected cost of capital for that project. We expect to continue to invest in information systems, modern technologies, emergency room and operating room expansions, the construction of medical office buildings for physician expansion and the reconfiguration of the flow of patient care. Additionally, we may from time to time replace existing hospital buildings with new buildings as we evaluate ongoing repair and maintenance costs and other factors that impact the future operations of the existing buildings. Refer to *"Liquidity and Capital Resources Outlook"* for further information regarding our long-term capital expenditure commitments.

Capital Resources

ABL Facility

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we entered into the ABL Facility in an aggregate principal amount of up to $800.0 million with a maturity of five years and we terminated our Prior ABL Facility. For further information regarding the ABL Facility, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Term Loan Facility

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we entered into the Term Loan Facility with an original aggregate principal amount of $3,550.0 million with a maturity of seven years and we repaid in full our Prior Term Facility. The Term Loan Facility was amended in connection with a refinancing transaction during the first quarter of 2020. For further information regarding the Term Loan Facility, including certain restrictive covenants and the refinancing transaction, refer to Note 4 and Note 15 to our accompanying consolidated financial statements included elsewhere in this Report.

9.75% Unsecured Notes

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we issued the 9.75% Unsecured Notes in an aggregate principal amount of $1,425.0 million with a maturity of eight years. For further information regarding the 9.75% Unsecured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

8.25% Secured Notes

Effective April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, we issued the 8.25% Secured Notes in an aggregate principal amount of $800.0 million with a maturity of seven years. The indenture governing the 8.25% Secured Notes was satisfied and discharged on March 9, 2020 in connection with a refinancing transaction during the first quarter of 2020. For further information regarding the 8.25% Secured Notes, including the refinancing transaction, refer to Note 4 and Note 15 to our accompanying consolidated financial statements included elsewhere in this Report.

11.5% Unsecured Notes

Effective April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, we issued the 11.5% Unsecured Notes in a private offering in an aggregate principal amount of $350.0 million with a maturity of eight years. The indenture governing the 11.5% Unsecured Notes was satisfied and discharged on March 9, 2020 in connection with a refinancing transaction during the first quarter of 2020. For further information regarding the 11.5% Unsecured Notes, including the refinancing transaction, refer to Note 4 and Note 15 to our accompanying consolidated financial statements included elsewhere in this Report.

A roll-forward of our long-term debt, including current portions, during 2019 is as follows (in millions):

	December 31, 2018	Net Change in ABL Facility	Payments of Borrowings	Amortization of Debt Issuance Costs	Reclassification of Debt Issuance Costs	New Capital and Financing Leases	Amortization of Capital and Financing Leases	December 31, 2019
Senior borrowings:								
ABL Facility	$ 20.0	$ (20.0)	$ -	$ -	$ -	$ -	$ -	$ -
Term Loan Facility	3,550.0	-	(26.6)	-	-	-	-	3,523.4
9.75% Unsecured Notes	1,425.0	-	-	-	-	-	-	1,425.0
8.25% Secured Notes	800.0	-	-	-	-	-	-	800.0
11.5% Unsecured Notes	350.0	-	-	-	-	-	-	350.0
Unamortized debt issuance costs	(227.4)	-	-	26.6	9.0	-	-	(191.8)
Capital and financing leases	557.2	-	-	-	-	722.4	(11.7)	1,267.9
Subordinated borrowings, net	3.0	-	(1.7)	0.3	-	-	-	1.6
	$ 6,477.8	$ (20.0)	$ (28.3)	$ 26.9	$ 9.0	$ 722.4	$ (11.7)	$ 7,176.1

We monitor the capital markets and our capital structure and make changes from time to time, with the goal of maintaining financial flexibility, preserving or improving liquidity and/or achieving cost efficiency. From time to time, we may elect to repurchase amounts of our outstanding debt, including any of the Notes, for cash through open market repurchases or privately negotiated transactions with certain of our debt holders, although there is no assurance we will do so.

Liquidity and Capital Resources Outlook

We continue to have ongoing capital commitments in connection with several of our acquired facilities. At December 31, 2019, we estimated our total remaining capital expenditure commitments to be approximately $1,523.1 million, which generally have remaining terms of one to six years. Of this amount, more than one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time. We anticipate funding these expenditures through cash provided by operating activities, available cash and borrowings available under the ABL Facility.

Our business strategy contemplates the selective acquisition of additional hospitals and other healthcare service providers, and we regularly review potential acquisitions. These acquisitions may, however, require additional financing. Our primary sources of liquidity are cash flows provided by our operations and our borrowings available under the ABL Facility. We believe that our internally generated cash flows and borrowing availability under the ABL Facility will be adequate to service existing debt, finance internal growth and fund capital expenditures and small to mid-size hospital acquisitions over the next twelve months and into the foreseeable future prior to maturity dates of our outstanding debt. Certain larger hospital acquisitions may, however, require additional financing.

Inflation

The healthcare industry is labor-intensive. Wages and other expenses increase during periods of inflation and when labor shortages in marketplaces occur. In addition, suppliers pass along rising costs to us in the form of higher prices. Private insurers pass along their rising costs in the form of lower reimbursement to us. Our ability to pass on these increased costs in increased rates is limited because of increasing regulatory and competitive pressures and the fact that the majority of our revenues are fee-based. Accordingly, inflationary pressures could have a material adverse effect on our results of operations.

Contractual Obligations, Commitments and Off-Balance Sheet Arrangements

Contractual Obligations and Commitments

We have various contractual obligations, which are recorded as liabilities in our consolidated financial statements. Other items, such as certain purchase commitments and other executory contracts, are not recognized as liabilities in our consolidated financial statements but are required to be disclosed. For example, we are required to make certain minimum lease payments for the use of property under certain of our operating lease agreements.

The following table summarizes our significant contractual obligations as of December 31, 2019 and the future periods in which such obligations are expected to be settled in cash (in millions):

	Payments Due by Period				
Contractual Obligations	**Total**	**2020**	**2021 - 2022**	**2023 - 2024**	**After 2024**
Long-term debt obligations [(a)]	$ 8,776.4	$ 525.2	$ 1,012.5	$ 2,024.2	$ 5,214.5
Capital expenditure obligations [(b)]	1,523.1	178.6	319.9	253.9	770.7
Capital and financing lease obligations [(c)]	3,063.8	118.2	283.6	218.8	2,443.2
Operating lease obligations [(d)]	251.6	46.4	78.9	43.6	82.7
Other liabilities [(e)]	282.8	77.4	99.1	53.4	52.9
Purchase obligations [(f)]	982.3	451.2	379.4	145.4	6.3
Total	$ 14,880.0	$ 1,397.0	$ 2,173.4	$ 2,739.3	$ 8,570.3

(a) Included in long-term debt obligations are future cash principal and interest on our outstanding debt obligations as of December 31, 2019 excluding unamortized debt issuance costs and related non-cash amortization. These obligations are explained further in Note 4 to our accompanying consolidated financial statements included elsewhere in this Report. Additionally, the amounts included above are presented prior to giving effect to the refinancing activities occurring in the first quarter of 2020 which are described further in Note 15 to our accompanying consolidated financial statements included elsewhere in this Report.

(b) We are subject to annual capital expenditure commitments in connection with many of our facilities. Additionally, we had projects under construction with an estimated additional cost to complete of approximately $91.5 million as of December 31, 2019. However, because we can terminate substantially all of the related construction contracts at any time without paying a termination fee, these costs are excluded from the above table except for amounts contractually committed by us.

(c) Included in capital and financing lease obligations are the future cash payments, including interest, due under our capital and financing lease agreements. These obligations are explained further in Note 8 to our accompanying consolidated financial statements included elsewhere in this Report.

(d) This reflects our future minimum operating lease payments. These obligations are explained further in Note 8 to our accompanying consolidated financial statements included elsewhere in this Report.

(e) Included in other liabilities are the current and long-term portions of our reserves for self-insurance claims of $64.5 million and $196.5 million, respectively, but excluding the portion of the reserve related to our estimate of recoveries for certain claims in excess of our self-insured retention levels that do not require us to make cash payments. Refer to Note 1 to our accompanying consolidated financial statements included elsewhere in this Report for more information on our reserves for self-insurance claims. Additionally, included in other long-term liabilities are the estimated cash contributions we expect to make to our defined benefit pension plans sufficient to meet our minimum funding requirements as prescribed by the Employee Retirement Income Security Act of 1974, as amended, and our other long-term obligations which require the delivery of cash and for which we can reasonably estimate the timing of such payments.

(f) The following table summarizes our significant purchase obligations as of December 31, 2019 and the future periods in which such obligations are expected to be settled in cash (in millions):

	Payments Due by Period				
Purchase Obligations	**Total**	**2020**	**2021 - 2022**	**2023 - 2024**	**After 2024**
Shared centralized resource model agreements [1]	$ 251.6	$ 85.7	$ 165.9	$ -	$ -
IT Services [2]	368.0	97.7	139.4	130.9	-
GEMS obligations [3]	69.5	69.5	-	-	-
Other purchase obligations [4]	293.2	198.3	74.1	14.5	6.3
Total	$ 982.3	$ 451.2	$ 379.4	$ 145.4	$ 6.3

(1) We have various arrangements with a third party to provide certain nonclinical business functions to us, including payroll, supply chain management and revenue cycle management under a shared centralized resource model for periods ranging from one to three years.

(2) We have various arrangements with third parties to provide information technology services, including, but not limited to, financial, clinical, patient accounting and other information services to us under contracts ranging from one to five years.

(3) General Electric Medical Services ("GEMS") provides diagnostic imaging equipment maintenance and bio-medical services to us pursuant to a contract that expires on December 31, 2020.

(4) Reflects our minimum commitments to purchase other miscellaneous goods or services under non-cancelable contracts as of December 31, 2019.

Off-Balance Sheet Arrangements

We had letters of credit outstanding of approximately $44.1 million as of December 31, 2019, primarily related to the self-insured retention level of our general and professional liability insurance and workers' compensation programs as security for payment of claims and as security for certain lease agreements.

Recently Issued Accounting Pronouncements

Refer to Note 1 to our accompanying consolidated financial statements included elsewhere in this Report for a discussion of recently issued accounting standards.

Critical Accounting Estimates

The preparation of financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts and related disclosures. We consider an accounting estimate to be critical if:

- it requires assumptions to be made that were uncertain at the time the estimate was made; and
- changes in the estimate or different estimates that could have been made could have a material impact on our consolidated results of operations or financial condition.

Our critical accounting estimates include the following areas:

- Revenue recognition and accounts receivable;
- Goodwill impairment analysis;
- Accounting for income taxes; and
- Reserves for self-insurance claims.

The following discussion of critical accounting estimates is not intended to be a comprehensive list of all of our accounting policies that require estimates, but the estimates discussed below involve a higher degree of judgment and complexity. We believe the current assumptions and other considerations used to estimate amounts reflected in our consolidated financial statements are appropriate. However, if actual experience differs from the assumptions and other considerations used in estimating amounts reflected in our consolidated financial statements, the resulting changes could have a material adverse effect on our consolidated results of operations and our financial condition. The discussion that follows presents information about our critical accounting estimates, as well as the effects of hypothetical changes in the material assumptions used to develop each estimate.

Revenue Recognition and Accounts Receivable

We recognize revenues in the period in which performance obligations are satisfied. Generally, we bill patients and third-party payers several days after the services are performed or the patient is discharged. Accounts receivable primarily consist of amounts due from third-party payers and patients. Our ability to collect outstanding receivables is critical to our results of operations and cash flows. Amounts we receive for treatment of patients covered by governmental programs and third-party payers such as Medicare, Medicaid, HMOs, PPOs and private insurers as well as directly from patients are subject to contractual adjustments, discounts and implicit price concessions. Accordingly, the revenue and accounts receivable reported in our financial statements are recorded at the net consideration to which we expect to be entitled to receive in exchange for providing patient care.

Approximately 98.2%, 98.0% and 98.4% of our patient revenues recognized during the years ended December 31, 2019, 2018 and 2017, respectively, related to discounted charges, which were comprised of the following sources (as a percentage of our net patient revenues):

	2019	2018	2017
Medicare	38.1 %	39.8 %	40.6 %
Medicaid	17.1 %	17.5	18.5 %
HMOs, PPOs and other private insurers	42.3 %	40.1	38.7 %
Self-pay	0.7 %	0.6	0.6 %

Revenues are recorded at estimated net amounts due from patients, third-party payers and others for healthcare services provided. For certain payers, such as Medicare, Medicaid, as well as some managed care payers with which we have contractual arrangements, the contractual allowances are calculated by computerized logging systems based on defined payment terms. For other payers, the contractual allowances are determined based on historical data by insurance plan. All contractual adjustments, regardless of type of payer or method of calculation, are reviewed and compared to actual experience.

We monitor our processes for calculating contractual allowances through:

- review of payment discrepancy reports for logged payers;
- analysis of historical contractual allowance trends based on actual claims paid by HMOs, PPOs and other private insurers;
- review of contractual allowance information reflecting current contract terms;
- consideration and analysis of changes in charge rates and payer mix reimbursement levels; and
- other issues that may impact contractual allowances.

Medicare and Medicaid

The majority of services performed on Medicare and Medicaid patients are reimbursed at predetermined reimbursement rates. The differences between the established billing rates (i.e. gross charges) and the predetermined reimbursement rates are recorded as contractual discounts and deducted from gross charges. Under the Medicaid program's prospective reimbursement systems, there is no adjustment or settlement of the difference between the actual cost to provide the service and the predetermined reimbursement rates.

Discounts for retrospectively cost-based revenues are estimated based on historical and current factors and are adjusted in future periods when settlements of filed cost reports are received. Final settlements under these programs are subject to adjustment based on administrative review and audit by third party intermediaries, which can take several years to resolve completely.

Because the laws and regulations governing the Medicare and Medicaid programs are complex and subject to change, the estimates of contractual discounts we record could change by material amounts. A significant increase in our estimate of contractual discounts for Medicare and Medicaid would lower our earnings. This would adversely affect our results of operations, financial condition, liquidity and future access to capital.

HMOs, PPOs and Other Private Insurers

Amounts we receive for the treatment of patients covered by HMOs, PPOs and other private insurers (collectively "***managed care plans***") are generally less than our established billing rates. We include contractual allowances as a reduction to revenues in our consolidated financial statements based on payer specific identification and payer specific factors for rate increases and denials. For most managed care plans, estimated contractual allowances are adjusted to actual contractual allowances as cash is received and claims are reconciled.

The process of determining the allowance requires us to estimate the amount expected to be received based on payer contract provisions, historical collection data as well as other factors and requires a high degree of judgment. It is impacted by changes in managed care contracts and other related factors. A significant increase in our estimate of contractual discounts for managed care plans would lower our earnings. This would adversely affect our results of operations, financial condition, liquidity and future access to capital.

Self-Pay Revenues

Self-pay revenues are derived from patients who do not have any form of healthcare coverage as well as from patients with third party healthcare coverage related to the patient responsibility portion, including deductibles and co-payments. The Company evaluates these patients, after the patient's medical condition is determined to be stable, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid or other governmental assistance programs. The Company estimates the transaction price for self-pay patients and the patient responsibility portion using a number of analytical tools, benchmarks and market conditions. No single statistic or measurement determines the transaction price for these patients. Some of the analytical tools that the Company utilizes include, but are not limited to, historical cash collection experience, revenue trends by payer classification and revenue days in accounts receivable.

The revenues associated with self-pay patients are reported at the net amount that the Company expects to collect. Because the Company provides care to patients regardless of their ability to pay, the Company has determined that the differences between the amounts it bills based on gross or discounted charges and the amounts the Company expects to collect represent implicit price concessions. The final amount that will be received from the patient is not known at the date of service, and the Company accounts for this variable consideration in accordance with the provisions of ASC 606. Self-pay accounts receivable are written off after collection efforts have been followed in accordance with the Company's policies.

Goodwill Impairment Analysis

Goodwill represents the excess of the purchase price over the fair value of the net assets of acquired businesses. Our goodwill included in our consolidated balance sheet as of December 31, 2019 was $2,961.2 million. Refer to Note 5 to our accompanying consolidated financial statements included elsewhere in this Report for a detailed rollforward of our goodwill.

In accordance with ASC 350, "Intangibles — Goodwill and Other" ("***ASC 350***") goodwill and intangible assets with indefinite lives are reviewed by us at least annually for impairment. Prior to the LifePoint/RCCH Merger, we historically determined that each of our hospitals represented a reporting unit in accordance with ASC 280, "Segment Reporting" ("***ASC 280***") and ASC 350. Due to the significance of the LifePoint/RCCH Merger and its impact on our management team and business operations, we re-evaluated our reporting units in accordance with ASC 280 and ASC 350 during 2019 and determined that our consolidated business comprises a single reporting unit for goodwill impairment testing purposes. For the annual impairment evaluation, we determine fair value using a discounted cash flow ("***DCF***") analysis and consideration of certain market inputs including those of guideline public companies. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates and the amount and timing of expected future cash flows. The significant judgments are typically based upon Level 3 inputs, generally defined as unobservable inputs representing our assumptions. The cash flows employed in the DCF analysis are based on our most recent financial budgets and business plans and, when applicable, various growth rates for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risks inherent in the future cash flows of the respective reporting unit.

If we determine the carrying value of goodwill is impaired, or if the carrying value of a business that is to be sold or otherwise disposed of exceeds its fair value, then we reduce the carrying value, including any allocated goodwill, to fair value. Refer to Note 5 to our accompanying consolidated financial statements included elsewhere in this Report for further discussion of the results of our annual goodwill impairment evaluation procedures.

Accounting for Income Taxes

Deferred tax assets generally represent items that will result in a tax deduction in future years for which we have already recorded the tax benefit in our income statement. We assess the likelihood that deferred tax assets will be recovered from future taxable income. To the extent we believe that recovery is not probable, a valuation allowance is established. To the extent we establish a valuation allowance or increase this allowance, we must include an expense as part of the income tax provision in our results of operations. Our deferred tax asset balances in our consolidated balance sheets were $550.1 million and $456.4 million as of December 31, 2019 and 2018, respectively. Our valuation allowances for deferred tax assets in our consolidated balance sheets were $495.5 million and $274.4 million as of December 31, 2019 and 2018, respectively.

In addition, significant judgment is required in determining and assessing the impact of certain tax-related contingencies. We establish accruals when, despite our belief that our tax return positions are fully supportable, it is probable that we have incurred a loss related to tax contingencies and the loss or range of loss can be reasonably estimated. We adjust the accruals related to tax contingencies as part of our provision for income taxes in our results of operations based upon changing facts and circumstances, such as progress of a tax audit, development of industry related examination issues, as well as legislative, regulatory or judicial developments. A number of years may elapse before a particular matter, for which we have established an accrual, is audited and resolved.

The first step in determining the deferred tax asset valuation allowance is identifying reporting jurisdictions where we have a history of tax and operating losses or are projected to have losses in future periods as a result of changes in operational performance. We then determine if a valuation allowance should be established against the deferred tax assets for that reporting jurisdiction.

The second step is to determine the amount of the valuation allowance. We will generally establish a valuation allowance equal to the net deferred tax asset (deferred tax assets less deferred tax liabilities) related to the jurisdiction identified in step one of the analysis. In certain cases, we may not reduce the valuation allowance by the amount of the deferred tax liabilities depending on the nature and timing of future taxable income attributable to deferred tax liabilities.

In assessing tax contingencies, we apply the provisions of ASC 740, “Income Taxes”. We apply the recognition threshold and measurement of a tax position taken or expected to be taken in a tax return and follow the guidance on various matters such as derecognition, interest, penalties and disclosure. We classify interest and penalties as a component of income tax expense.

During each reporting period, we assess the facts and circumstances related to recorded tax contingencies. If tax contingencies are no longer deemed probable based upon new facts and circumstances, the contingency is reflected as a reduction of the provision for income taxes in the current period.

Our deferred tax assets exceeded our deferred tax labilities by $489.3 million as of December 31, 2019, excluding the impact of valuation allowances. Historically, we have not produced federal taxable income, and in connection with the LifePoint/RCCH Merger, the Company became highly leveraged. As such, we believe it is likely that the deferred tax assets will not be realized and thus have established a valuation allowance against the deferred tax assets as of December 31, 2019. In addition, we do have subsidiaries with a history of tax losses in certain state jurisdictions and, based upon those historical tax losses, we assumed that the subsidiaries would not be profitable in the future for those states’ tax purposes. If our assertion regarding the future profitability of those subsidiaries was incorrect, then our deferred tax assets would be understated by the amount of the state valuation allowance of $202.3 million at December 31, 2019.

Additionally, on December 22, 2017, the Tax Act was signed into law. The Tax Act significantly revises the U.S. corporate income tax by, among other things, lowering the statutory corporate tax rate from 35% to 21% and eliminating certain deductions. Due to the timing of the enactment and the complexity involved in applying the provisions of the Tax Act, we made reasonable estimates of the effects of the Tax Act on our existing deferred tax assets and liabilities and recognized a provisional benefit for income taxes of $57.7 million during the year ended December 31, 2017. We completed our analysis during the year ended December 31, 2018 and determined that no additional adjustment was needed to the $57.7 million provisional expense that we recorded for the year ended December 31, 2017.

Reserves for Self-Insurance Claims

Given the nature of our operating environment, we are subject to potential professional liability claims, employee workers’ compensation claims and other claims. To mitigate a portion of this risk, we maintain insurance for individual professional liability claims and employee workers’ compensation claims exceeding SIR and deductible levels. At December 31, 2019, our SIR for professional liability claims is $5.0 million per claim, with a $5.0 million inner aggregate, at the majority of our facilities. Additionally, we participate in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2019, our deductible for workers’ compensation claims was $1.0 million per claim in all states in which we operate except for Montana, Oklahoma, Ohio, Washington and Wyoming. We participate in state-specific programs for our workers’ compensation claims arising in these states. Our SIR and deductible levels are evaluated annually as a part of our insurance program’s renewal process.

Each year, we obtain quotes from various insurers with respect to the cost of obtaining insurance coverage. We compare these quotes to our most recent actuarially determined estimates of losses at various self-insured retention and deductible levels. Accordingly, changes in insurance costs affect the self-insured retention and deductible levels we choose each year.

Our reserves for self-insurance and deductible claims reflect the current estimate of all outstanding losses, including incurred but not reported losses, based upon actuarial calculations as of the balance sheet date. The loss estimates included in the actuarial calculations may change in the future based upon updated facts and circumstances. Our expense for self-insurance and deductible claims coverage each year includes: the actuarially determined estimate of losses for the current year, including claims incurred but not reported; the change in the estimate of losses for prior years based upon actual claims development experience as compared to prior actuarial projections; the insurance premiums for losses in excess of our self-insured retention and deductible levels; the administrative costs of the insurance program; and interest expense related to the discounted portion of the liability.

Our reserves for professional liability claims are based upon quarterly and/or semi-annual actuarial calculations. Our reserve calculations consider historical claims data, demographic considerations, severity factors and other actuarial assumptions, which are discounted to present value. We have discounted our reserves for self-insured claims to their present value using a discount rate of 1.9% at December 31, 2019, 1.8% at December 31, 2018 and in a range of 1.4% to 2.4% at December 31, 2017. We select a discount rate by considering a risk-free interest rate that corresponds to the period when the self-insured claims are incurred and projected to be paid.

The following table provides information regarding our reserves for self-insured claims at December 31, 2019 and 2018 (in millions):

	2019	2018
Undiscounted	$ 275.8	$ 279.0
Discounted (as reported)	$ 261.0	$ 264.7

As of December 31, 2019 and 2018, we estimated less than 1% of our reserves for self-insured claims represent reserves for settled and unpaid claims. Our average lag time between the settlement and payment of a self-insured claim ranges from 1 to 2 weeks.

Our estimated reserves for self-insured claims will be significantly affected if current and future claims differ from historical trends. While we monitor reported claims closely and consider potential outcomes when determining our reserves for self-insured claims, the complexity of the claims, the extended period of time to settle the claims and the wide range of potential outcomes complicate the estimation process. In addition, certain states have passed varying forms of tort reform which attempt to limit the amount of awards. If such laws are passed in the states where our hospitals are located, our loss estimates could decrease.

Our estimate of reserves for self-insured and deductible claims are based upon actuarial calculations and are significantly influenced by key assumptions and other factors. These factors include, but are not limited to: historical paid claims; trending of loss development factors; trends in the frequency and severity of claims, which can differ significantly by jurisdiction as a result of the legislative and judicial climate in such jurisdictions; coverage limits of third-party insurance and actuarial determined statistical confidence levels. Given the number of assumptions and characteristics of each assumption considered in establishing the reserves for self-insured claims, it is difficult to compute the individual financial impact of each assumption or groups of assumptions. Some of the assumptions are dependent upon the quantitative measurement of other assumptions, and therefore are not accurately evaluated in isolation. For example, a change in the frequency of claims assumption is also affected by the estimated severity of these claims resulting in an inability to properly isolate and quantify the impact of a change in this assumption.

Professional and general liability claims are typically resolved over an extended period of time, often as long as five years or more, while workers' compensation claims are typically resolved in one to two years. Our reserves for self-insured claims are comprised of estimated indemnity and expense payments related to reported events and incurred but not reported events as of the end of the period. We have the ability to reliably determine the amount and timing of payments based on sufficient history of our claims development, the use of external actuarial expertise and our rigorous review process. Actuarial payment patterns are based on our individual hospital historical data both prior to and after our inception. The processes, performed by both external actuaries and our management, enable us to reliably determine the amount of our ultimate losses as well as the timing of the loss settlements such that discounting of the reserves for self-insured claims is appropriate. Given the number of factors considered in establishing the reserves for self-insured claims, it is neither practical nor meaningful to isolate a particular assumption or parameter of the process and calculate the impact of changing that single item.

Ultimately, from an actuarial standpoint, the sensitivity in the estimates of reserves for self-insured claims is reflected in the various actuarial confidence levels. Our best estimate of our reserves for self-insured claims utilizes an actuarial central estimate, which employs a statistical confidence level that approximates 50%. Higher statistical confidence levels, while not representative of our best estimate, reflect reasonably likely outcomes upon the ultimate resolution of related claims. Using a higher statistical confidence level would increase the estimated reserves for self-insured claims. At a 75% statistical confidence level, our estimated reserve would increase by $28.9 million. Changes in our estimates of reserves for self-insured claims are non-cash charges and accordingly, do not impact our liquidity or capital resources.

The combination of changing conditions and the extended time required for claim resolution results in a loss estimation process that requires actuarial skill and the application of judgment, and such estimates require periodic revision. As a result of the variety of factors that must be considered, there is a risk that actual incurred losses may develop differently from estimates. The results of our quarterly and semi-annual actuarial calculations resulted in changes to our reserves for self-insured claims for prior years. As a result, for the year ended December 31, 2019, our related self-insured claims expense increased by $6.7 million and for the years ended December 31, 2018 and 2017, our related self-insured claims expense decreased by $3.9 million and $12.1 million, respectively.

Item 7A. ***Quantitative and Qualitative Disclosures about Market Risk.***

Market Risk

Market risk is defined as the risk of loss resulting from changes in market prices as a result of changes in interest rates, credit and liquidity or general economic conditions. Our principal market risks in the ordinary course of business are credit risk, liquidity risk and interest rate risk. We currently do not have direct exposure to either market risk from trading activities or foreign currency exchange rate risk.

Credit Risk

We define credit risk as the risk that amounts payable by uninsured patients and remaining patient responsibility amounts (deductibles and co-payments) for patient accounts where the primary insurance carrier has paid the amounts covered by the applicable agreements will not be paid. The provision for doubtful accounts relates primarily to amounts due directly from patients. While we have experienced a reduction in uninsured patients, the risk of collection from insured patients and the amounts due, may increase as more individuals are enrolled in insurance plans with larger deductibles and/or co-payments, including those purchased on insurance exchanges. Additionally, the counterparty to our Interest Rate Swap exposes us to credit risk in the event of nonperformance. However, we do not anticipate nonperformance by our counterparty. We do not hold or issue derivative financial instruments for trading purposes.

Liquidity Risk

We define liquidity risk as the risk that we will not meet our payment obligations in a timely manner or the risk that market conditions or institution-specific events may reduce our ability to raise funds from market counterparties. An adverse institution-specific event such as a major loss that causes a perceived or actual deterioration in our financial condition or an adverse systemic event could affect our funding liquidity.

Interest Rate Risk

Borrowings under the ABL Facility and the Term Loan Facility are at variable rates of interest and expose us to interest rate risk. To manage this risk, we entered into an Interest Rate Swap. The terms of the Interest Rate Swap require us to pay a fixed rate of 2.63% on a notional amount of $1,100.0 million and, in exchange, we receive one-month LIBOR. The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. We have not designated our Interest Rate Swap as a cash flow hedge in accordance with ASC 815. Therefore, all changes in the fair value of our Interest Rate Swap will be recognized through interest expense in our results of operations. Changes in the fair value of our Interest Rate Swap could result in a material effect on our consolidated results of operations and financial position; however, we do not anticipate that changes in the fair value of our Interest Rate Swap will have any impact on our cash flows.

As of December 31, 2019, we had total outstanding debt of approximately $6,100.0 million, excluding capital and financing leases and unamortized debt issuance costs, of which $2,423.4 million, or 39.7%, was subject to variable rates of interest after giving effect to our Interest Rate Swap. If the interest rate on our variable rate long-term debt outstanding as of December 31, 2019, not subject to our Interest Rate Swap, were to increase by 100 basis points during any annual period, our cash flows would be negatively impacted by approximately $24.2 million.

Item 8. ***Financial Statements and Supplementary Data.***

Information with respect to this Item is contained in our accompanying consolidated financial statements beginning on page F-1 of this Report.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*****.**

None.

Item 9A. ***Controls and Procedures.***

The information that would be required to be disclosed under Part II, Item 9A of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a**)** of each of the Indentures.

Item 9B. ***Other Information.***

None.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance*.**

The following table provides information regarding our executive officers and the members of our Board of Directors (ages as of March 12, 2020):

Name	Age	Position(s)
David M. Dill	51	President and Chief Executive Officer
Michael S. Coggin	50	Executive Vice President and Chief Financial Officer
Victor E. Giovanetti	56	Executive Vice President, Hospital Operations
Robert F. Jay	52	Executive Vice President, Integrated Operations
Jennifer C. Peters	48	Executive Vice President, General Counsel and Corporate Secretary
Terry W. Terrill, Jr.	53	Executive Vice President, Administration
J. Michael Grooms	41	Senior Vice President and Chief Accounting Officer
Matthew H. Nord	40	Director and Chairman
William F. Carpenter III	65	Director and Chairman Emeritus
Norman Brownstein	76	Director
Christopher J. Christie	57	Director
Maxwell David	29	Director
Michael P. Haley	69	Director
Steve Levin	54	Director
Holly McMullan	43	Director
Daniel Morissette	54	Director
Eric L. Press	54	Director
Martin S. Rash	65	Director
Olivia Wassenaar	40	Director
G. Rodney Wolford	73	Director

David M. Dill became our Chief Executive Officer upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Dill served in various roles at Legacy LifePoint as President since January 2011 and as Chief Operating Officer since April 2009. Mr. Dill served as Executive Vice President from February 2008 to January 2011. Mr. Dill joined Legacy LifePoint in July 2007 as Chief Financial Officer and continued to serve in that role until April 2009. From March 2006 until Mr. Dill joined Legacy LifePoint, he served as executive vice president of Fresenius Medical Care North America and as chief executive officer of one of two United States divisions of Fresenius Medical Care Services, a wholly owned subsidiary of Fresenius Medical Care AG & Co. KGaA. Mr. Dill previously served as executive vice president, chief financial officer and treasurer of Renal Care Group, Inc., a publicly-traded dialysis services company, from November 2003 until Renal Care Group was acquired by Fresenius Medical Care in March 2006. From 1996 to November 2003, Mr. Dill served in various finance and accounting roles with Renal Care Group, Inc. Mr. Dill served as a member of the board of directors of Psychiatric Solutions, Inc., a behavioral health services company, from 2005 until 2010.

Michael S. Coggin became our Executive Vice President and Chief Financial Officer upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Coggin served in various roles at Legacy LifePoint as Executive Vice President, Chief Financial Officer and Chief Accounting Officer, since September 2016. From December 2008 until September 2016, Mr. Coggin served as Senior Vice President and Chief Accounting Officer of Legacy LifePoint. From September 2007 until December 2008, Mr. Coggin served as chief financial officer of Specialty Care Services Group, a multi-service line healthcare provider primarily focused on providing perfusion and auto-transfusion services to hospitals. Mr. Coggin was a senior vice president in the finance, accounting and internal audit groups of Renal Care Group, Inc. from April 2004 until its acquisition by Fresenius Medical Care AG & Co. KGaA in March 2006. Following the acquisition, Mr. Coggin provided finance and accounting oversight for business units within the East Division of Fresenius. Prior to that time, Mr. Coggin was an audit manager at KPMG Peat Marwick in Nashville, Tennessee.

Victor E. Giovanetti became our Executive Vice President, Hospital Operations upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Giovanetti served as President of Legacy LifePoint's Eastern Group since January 2017. From July 2015 to January 2017, Mr. Giovanetti served as President of Legacy LifePoint's Western Group. Mr. Giovanetti joined Legacy LifePoint in July 2013 as Chief Operating Officer of Legacy LifePoint's Eastern Group. Mr. Giovanetti has more than 25 years of management experience in operations, financial, clinical and strategic aspects of healthcare administration. Prior to joining the Company, his positions included president of HCA Lewis-Gale Regional Health System in Roanoke, Virginia, chief executive officer and chief operating officer of Southern Hills Medical Center in Nashville, Tennessee, and various management roles with HCA, Symbion and other healthcare organizations in Georgia.

Robert F. Jay became our Executive Vice President, Integrated Operations upon consummation of the LifePoint/RCCH Merger. Mr. Jay previously served as RCCH's Executive Vice President and Chief Operating Officer, a position he held from January 2018. Mr. Jay has served in various roles with RCCH, including Executive Vice President Operations Support from May 2016 to September 2016 and Division President from September 2016 to January 2018. Prior to that he served as Chief Operating Officer for RCCH from January 2014 until May 2016. Prior to joining RCCH, he spent seven years at Vanguard Health Systems in a variety of operations and development positions. He joined Vanguard Health Systems as its Corporate Director Operations and Financial Analysis where he was responsible for managing and reporting operational, clinical, and financial results. In 2008, Mr. Jay was promoted to Vice President, Supply Chain Management of Vanguard where he oversaw the overall strategic direction and tactical execution of supply chain operations. In 2009 he transitioned to Vice President, Development of Vanguard where he led acquisition teams that closed on hospital transactions with combined net revenues of over $2.2 billion. Prior to joining Vanguard Health Systems, Mr. Jay worked as the Corporate Controller for Health Management Associates, Inc. in Naples, Florida. He has also served as a Controller in a not-for-profit hospital and also spent time at KPMG as an auditor.

Jennifer C. Peters became our Executive Vice President and General Counsel upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Ms. Peters served as Legacy LifePoint's General Counsel since April 2017 and Corporate Secretary since June 2017. Prior to that, Ms. Peters served as senior vice president and chief operations counsel of Legacy LifePoint, where she was responsible for overseeing the Company's operations lawyers and contract management team to ensure consistent legal guidance across all operational units. Prior to joining Legacy LifePoint in November 2013, Ms. Peters served as general counsel, secretary and chief compliance officer for Simplex Healthcare from October 2010 through November 2013. Ms. Peters has also served as vice president and associate general counsel at Community Health Systems. In addition, Ms. Peters has experience as a hospital administrator.

Terry W. "Sonny" Terrill, Jr. joined the Company in April 2019 as Executive Vice President, Human Resources. Mr. Terrill is responsible for providing leadership in developing and executing human resources strategies in support of the overall business plan and strategic direction of the organization. Mr. Terrill has three decades of HR experience, including executive coaching, full-cycle talent management and management of large scale system and organizational integration. Before joining the Company, he served in a number of leadership roles, most recently as executive vice president, chief human resources officer for BrightSpring Health from August 2017 to March 2019 and human resources officer for CIGNA- HealthSpring from May 2005 to August 2017. He is also a Six Sigma Black Belt.

J. Michael Grooms became our Senior Vice President and Chief Accounting Officer upon consummation of the LifePoint/RCCH Merger. Mr. Grooms previously served as Chief Accounting Officer of Legacy LifePoint from June 2018 and as Vice President of Accounting and Financial Reporting from March 2012. Additionally, Mr. Grooms served in various other accounting financial reporting roles since joining Legacy LifePoint in September 2006. Prior to that time, he served as controller with Delek US from 2005 to 2006, and as an auditor with KPMG from 2001 to 2005.

Matthew H. Nord has been our Director since consummation of the Apollo/RegionalCare Acquisition in December 2015 and became Chairman of the Board in December 2018. Mr. Nord is Co-Lead Partner of Private Equity at Apollo Global Management, Inc., where he has been employed since 2003. From 2001 to 2003, Mr. Nord was a member of the Investment Banking division of Salomon Smith Barney Inc. Mr. Nord serves on several boards of directors, including Intrado Corporation and ADT Inc. Mr. Nord also serves on the Board of Trustees of Montefiore Health System and on the Board of Overseers of the University of Pennsylvania's Weitzman School of Design. During the past five years, Mr. Nord has also served as a director of Affinion Group Holdings, Inc. (from October 2006 to November 2015), Constellium N.V. (from May 2010 to November 2015), Noranda Aluminum Holding Corporation (from March 2007 to December 2015) Novitex Holdings, Inc. (from October 2013 to July 2017), Exela Technologies, Inc. (from July 2017 to October 2019), and Presidio, Inc. (from November 2014 to December 2019). Mr. Nord graduated summa cum laude with a B.S. in Economics from the Wharton School of the University of Pennsylvania. Between his work at Apollo and his prior experience in investment banking, Mr. Nord has approximately 15 years of experience analyzing, financing and investing in public and private companies.

William F. Carpenter III became our Director and Chairman Emeritus upon consummation of the LifePoint/RCCH Merger. Mr. Carpenter was a founding member of Legacy LifePoint, having served in various roles as Executive Vice President, Senior Vice President, General Counsel, Secretary and Corporate Governance Officer. In 2006, Mr. Carpenter was appointed Chief Executive Officer and elected to the Board of Directors of Legacy LifePoint and, in 2010, was appointed Chairman of the Board. In 2019, Mr. Carpenter was appointed by Tennessee Governor Bill Lee as co-chair of the Governor's Health Care Modernization Task Force. In January 2020, Mr. Carpenter was elected to the Board of Directors of FB Financial Corporation (NYSE: FBK), a bank holding company headquartered in Nashville, Tennessee. Additionally, Mr. Carpenter formerly served on the board of directors of the American Hospital Association, and as Chairman and a member of the board of the Federation of American Hospitals, the national public policy organization for investor-owned hospitals. Mr. Carpenter previously served on the board of directors of the Nashville Area Chamber of Commerce, is also a member and past chairman of the Nashville Health Care Council Board of Directors and serves on the boards of directors of NashvilleHealth, the Center for Medical Interoperability, United Way of Nashville, and Nashville Public Radio. A recognized leader in the healthcare industry, he has appeared on *Modern Healthcare* magazine's annual "100 Most Influential People in Healthcare" list numerous times, and was the recipient in 2019 of the *Nashville Business Journal*'s Lifetime Achievement Award.

Norman Brownstein became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Brownstein is the founding member and chairman of the board of the law firm of Brownstein Hyatt Farber Schreck, LLP. Mr. Brownstein is nationally recognized for his extensive experience in real estate law, commercial transactions and public policy advocacy, which spans the economic spectrum, extending to telecommunications, financial services, agriculture, tax and health care interests. Mr. Brownstein's firm is one of the leading lobbying firms in the United States. Mr. Brownstein serves on the board of directors of National Jewish Health and the Simon Wiesenthal Center, and during the past five years has also served as a director of Ardent Healthcare Services. Mr. Brownstein received a B.S. from the University of Colorado and a J.D. from the University of Colorado Law School.

Christopher J. Christie became our Director in December 2018. Mr. Christie served two terms as Governor of New Jersey from 2010 to 2018. Prior to that, Mr. Christie served as U.S. Attorney for the District of New Jersey from 2002 to 2008. During his governorship, Mr. Christie chaired the President's Commission on Combating Drug Addiction and the Opioid Crisis in 2017. He currently serves as a legal and political commentator for ABC News. Mr. Christie is a graduate of the University of Delaware and Seton Hall University School of Law.

Maxwell David became our Director in December 2018. Mr. David is a Principal in Apollo Global Management's Private Equity business, having joined in 2014. Prior to that time, Mr. David was a member of the Investment Banking division of Bank of America Merrill Lynch. Mr. David serves on the board of directors of CareerBuilder and Aris Mortgage Holding Company, LLC (more commonly known as Amerihome). Mr. David graduated cum laude from Dartmouth College with a B.A. in Economics.

Michael P. Haley became our Director in December 2018. Prior to that time, Mr. Haley served as a director of Legacy LifePoint since 2005 and as chair of its Audit Committee since 2016. Mr. Haley is also a member of the board of directors of American National Bankshares, Inc., a bank holding company. From 2005 until April 2018, Mr. Haley served as a director of Ply Gem Holdings, Inc., a producer of window, door and siding products for the residential construction industry. Mr. Haley served as an advisor to Fenway Partners, LLC, a private equity investment firm, from April 2006 to June 2015, and was a managing director of its affiliate, Fenway Resources, from 2008 to June 2015. Mr. Haley's previous executive leadership experience includes service as executive chairman of Coach America, a transportation services operator, and as chairman, president and chief executive officer of MW Manufacturers, Inc., a subsidiary of Ply Gem Industries, Inc. In addition, Mr. Haley has served on the Board of Trustees of Roanoke College (Virginia) since 2010 and previously served on the board of the Martinsville-Henry County United Way and as chairman of the board of trustees of Memorial Hospital of Martinsville and of the Martinsville-Henry County Economic Development Corporation.

Steven Levin became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Levin was the chief strategy officer of Waystar, a healthcare revenue cycle technology platform. In 2018, Waystar acquired Connance, an analytics company that delivers workflow optimization technology for healthcare providers, which Mr. Levin founded in collaboration with Tenet Healthcare, FICO and Northbridge Venture Partners. Prior to Connance, Mr Levin was a Partner at Monitor Company (now Monitor Deloitte) working with hospitals, HCIT companies and health insurers. Mr. Levin holds a B.A. from Dartmouth College and an M.B.A. from Harvard Business School.

Holly McMullan became our Director in December 2018. Ms. McMullan is a Partner in Apollo Global Management's Client and Product Solutions group, where she is responsible for fundraising efforts for Apollo's private equity and capital markets businesses, having joined in 2008. Prior to that time, Ms. McMullan was a Senior Vice President at Pequot Capital Management and was previously a member of Guggenheim Advisors, Bear Stearns, and Robertson Opportunity Capital. She currently serves on the following advisory boards: 30 % Coalition, McCombs Advisory Council, New York for McCombs (Chair) and the Hicks Muse Private Equity Research Center at the University of Texas at Austin. Ms. McMullan holds an MBA with a concentration in Finance from the McCombs School of Business at the University of Texas at Austin and a BA (honors) in International Business from Sheffield Hallam University, Sheffield, UK.

Daniel Morissette became our Director upon consummation of the Transaction in April 2016. Mr. Morissette serves as Senior Executive Vice President and Chief Financial Officer for Common Spirit Health and served as Senior Executive Vice President/Chief Financial Officer for Dignity Health since February 2016. Previously, Mr. Morissette served as the Chief Financial Officer for Stanford Health Care. Mr. Morissette has over 25 years of experience in health care, consulting and international business development. During the past five years, Mr. Morissette served as a director for Optum360. Mr. Morissette received a B.S. from DePaul University and an M.B.A. from The University of Chicago, Booth School of Business.

Eric L. Press has been our Director since consummation of the Apollo/RegionalCare Acquisition in December 2015. Mr. Press is a senior partner of Apollo Global Management, Inc., where he has been employed since 1998 and has served as an officer of certain affiliates of Apollo. From 1992 to 1998, Mr. Press was associated with the law firm of Wachtell, Lipton, Rosen & Katz specializing in mergers, acquisitions, restructurings and related financing transactions. From 1987 to 1989, Mr. Press was a consultant with The Boston Consulting Group. Mr. Press serves on several boards of directors, including Apollo Commercial Real Estate Finance, Inc., PlayAGS, Inc., Princimar Chemical Holdings, LLC, ADT Inc. and Constellis Holdings, LLC. During the past five years, Mr. Press also served as a director of Affinion Group Holdings, Inc. (from October 2005 to September 2015), Athene Holding Ltd. (from July 2009 to February 2014), Metals USA Holdings Corp. (from May 2005 to April 2013), Noranda Aluminum Holding Corporation (from March 2007 to December 2015), Prestige Cruise Holdings, Inc. (from April 2007 to November 2014), Verso Corporation (from January 2009 to July 2016) and Caesars Entertainment Corporation (from January 2008 to October 2017). Mr. Press graduated magna cum laude from Harvard University with a A.B. in economics and received his JD from Yale Law School. Mr. Press has significant experience making and managing private equity investments on behalf of Apollo. Between his work at Apollo and his prior experience as an attorney and a management consultant, Mr. Press has approximately 28 years of experience in the process of financing, analyzing, and investing in public and private companies and serving on their board of directors.

Martin S. Rash has been our director since October 2015 following the Apollo/RegionalCare Acquisition and served as Executive Chairman following the consummation of the RegionalCare/Capella Merger in April 2016 until October 2016. Additionally, Mr. Rash served as Chief Executive Officer and Chairman of RegionalCare from October 2016 until the consummation of the LifePoint/RCCH Merger. Mr. Rash served as the Executive Chairman at RegionalCare Hospital Partners, Inc. from March 2013 to January 2014 and served as its Chief Executive Officer from 2009 until March 2013. From December 1996 to 2005, Mr. Rash was Chairman and Chief Executive Officer of Province Healthcare, a $1 billion NYSE company that owned 21 hospitals and managed more than 50 facilities. Prior to his tenure at Province Healthcare, Mr. Rash served as Executive Vice President and Chief Operating Officer for Community Health Systems where he led the growth of the company from 10 to 41 hospitals in 17 states. Earlier in his 40-year healthcare career, he worked at numerous community hospitals in various administrative and financial roles. Mr. Rash's experience and leadership includes Board of Directorships in the past at Healthspring, a NYSE company, and Odyssey Healthcare, a NASDAQ company. He is a past Chairman of the Federation of American Hospitals and of the Nashville Health Care Council. He holds both a B.A. and M.B.A. from Middle Tennessee State University. He currently serves as Chairman of American Pathology Partners.

Olivia Wassenaar became our Director in December 2018. Ms. Wassenaar is a Senior Partner at Apollo Global Management and is Co-Lead of Natural Resources, having joined in 2018. Prior to that time, Ms. Wassenaar was a Managing Director at Riverstone Holdings and was previously a member of the Investment Banking division of Goldman Sachs. Ms. Wassenaar also serves on the boards of directors of Talos Energy Inc., Jupiter Resources Ltd., and American Petroleum Partners, LLC. During the past five years, Ms. Wassenaar also served as a director of Northern Blizzard Resources Inc. (from June 2011 to May 2017), USA Compression Partners, LP (from June 2011 to April 2018), Admiral Permian Resources, LLC (from March 2017 to May 2018), Hammerhead Resources Inc. (from June 2017 to May 2018), Canadian Non-Operated Resources GP Inc. (from August 2014 to May 2018), Eagle Energy Exploration LLC (from December 2013 to May 2018), Vesta Energy Corp. (from May 2017 to May 2018), Canera III (from 2015 to 2017), Niska Gas Storage Partners LLC (from July 2014 to June 2016), Pegasus Optimization Partners, LLC (from May 2019 to October 2019), Apex Energy, LLC (from September 2019 to December 2019). She received her AB, magna cum laude, from Harvard College and an MBA from the Wharton School at the University of Pennsylvania.

G. Rodney Wolford became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Wolford has over 40 years of wide-ranging experience in the health care industry, having served in leadership roles with health care providers, suppliers, consulting firms, associations and insurers. Redirecting his professional time from active executive leadership, he now focuses his professional time on multiple boards of directors and rural community economic development. Among his many executive positions, Mr. Wolford served as chief executive officer of Alliant Healthcare (now Norton Healthcare), the leading hospital system in Louisville, KY, Sterling Diagnostic, a worldwide manufacturer of x-ray film, Forhealth Technologies, the inventor of the first robot dedicated to hospital IV production, and a senior executive of Blue Cross Tennessee. Mr. Wolford currently serves on the boards of Atlanta based D4C Brands, a pediatric dentistry company, and Liberate Medical, which develops electronic stimulation for ventilator patients, and as a fund manager of Bluegrass Angel Fund III. During the past five years, Mr. Wolford has also served as a director of Haven Behavioral, Laboratory Supply Company, VetCor and Essent Healthcare.

Code of Ethics

Our Board expects its members, as well as our officers and employees, to act ethically at all times and to acknowledge in writing their adherence to the policies comprising our Code of Conduct, which is known as "Common Ground," and, as applicable, our Code of Ethics for Senior Financial Officers and Chief Executive Officer.

Board Structure

The Board consists of 13 directors. The Board has the following standing committees: audit; compensation; nominating and governance; compliance; quality; and executive. In addition, the board of directors of our parent company, DSB Parent, also has a compensation committee that administers equity-based compensation plans in which our managers, officers, employees, consultants and directors participate. As a result of the LifePoint/RCCH Merger and the RegionalCare/Capella Merger, Apollo has the power to control us and our affairs and policies, including the designation of a majority of the members of our Board and the appointment of management.

Committees of our Board of Directors

The Board has adopted written charters for each of the following standing committees:

Audit Committee

The current members of our audit committee are Messrs. Morissette, Haley and Wolford. Mr. Morissette is the chairman of our audit committee. The principal duties and responsibilities of our audit committee are to assist the Board in overseeing:

- the integrity of our financial statements;
- the independent auditor's qualifications, independence and performance;
- the performance of our internal audit function; and
- our compliance with certain legal, ethical and regulatory requirements.

The audit committee has the authority to conduct or authorize investigations into or studies of matters within its scope of responsibilities. It also has the authority to retain and determine funding for independent legal, accounting or other advisors (without seeking Board approval) as it determines necessary or appropriate to carry out its duties and responsibilities.

Our Board has determined that each of Messrs. Morissette and Wolford is an "audit committee financial expert" within the meaning of applicable SEC regulations.

Compensation Committee

The current members of our compensation committee are Messrs. Nord and Press. Mr. Press is the chairman of our compensation committee. The principal duties and responsibilities of our compensation committee are as follows:

- approving the non-equity-based compensation of our officers, directors and employees;
- administering our non-equity-based compensation plans; and
- making recommendations to DSB Parent for the equity-based compensation of DSB Parent and its subsidiaries' officers, directors and employees.

Nominating and Governance Committee

The current members of our nominating and governance committee are Messrs. Christie, Press and Rash. Mr. Press is the chairman of our nominating and governance committee. The principal duties and responsibilities of our nominating and governance committee are as follows:

- to assist the Board in identifying individuals qualified to serve as members of the Board and/or its committees; and
- other duties and responsibilities that our Board may delegate to the nominating and governance committee.

Compliance Committee

The current members of our compliance committee are Messrs. Levin, Morissette, Wolford and Rash. Mr. Wolford is the chairman of our compliance committee. The compliance committee is responsible for overseeing our legal and regulatory compliance program, including certain healthcare and regulatory compliance matters that affect us and our business operations.

Quality Committee

The current members of our quality committee are Messrs. Brownstein, Carpenter, David, Haley and Ms. McMullan. Mr. Carpenter is the chairman of our quality committee. The quality committee is responsible for monitoring and evaluating the adequacy and effectiveness of our quality of care and patient safety programs and initiatives.

Executive Committee

The current members of our executive committee are Messrs. David, Nord and Press. Mr. Nord is the chairman of our executive committee. The principal duties and responsibilities of our executive committee are as follows:

- to advise and counsel the Chief Executive Officer regarding company matters; and
- to take such actions as are necessary due to their urgent or highly confidential nature, or where convening the Board is impracticable, subject to certain limitations.

Item 11. ***Executive Compensation.***

The information that would be required to be disclosed under Part III, Item 11 of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a) of each of the Indentures.

Item 12. ***Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.***

The information that would be required to be disclosed under Part III, Item 12 of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a) of each of the Indentures.

Item 13. ***Certain Relationships and Related Transactions, and Director Independence*****.**

For a discussion of certain relationships and related party transactions, refer to the notes to our accompanying consolidated financial statements included elsewhere in this Report and disclosure regarding our relationships and related party transactions contained in the Offering Memorandum dated February 11, 2020 for the 4.375% Secured Notes.

Equity Repurchases

Since the closing of the LifePoint/RCCH Merger, through December 31, 2019, DSB Parent has repurchased 3,750,184 profit units and 380,000 capital units from various former employees of LifePoint. Repurchases completed in 2019 are reflected as "Distributions to parent" in our accompanying consolidated statements of cash flows for the year ended December 31, 2019 included elsewhere in this Report. The aggregate amount of repurchases not completed prior to the end of 2019 is included under the caption "Accrued salaries" in our accompanying consolidated balance sheet as of December 31, 2019 included elsewhere in this Report. Repurchases are ongoing in the first quarter of 2020 and are anticipated to continue to occur from time to time.

Item 14. ***Principal Accounting Fees and Services*****.**

The Audit Committee has appointed Ernst & Young LLP as our independent registered public accounting firm. Services provided to us by Ernst & Young LLP in fiscal 2018 are described below.

Audit Fees. The aggregate audit fees billed by Ernst & Young LLP for professional services rendered for the audit of our annual consolidated financial statements and services that are normally provided by the independent registered public accounting firm in connection with statutory and regulatory filings totaled approximately $4.3 million for 2019 and approximately $6.0 million for 2018.

Audit-Related Fees. The aggregate fees billed by Ernst & Young LLP for assurance and related services other than those described under "Audit Fees" were approximately $2.4 million for 2019 and $0.2 million for 2018.

Tax Fees. The aggregate fees billed by Ernst & Young LLP for professional services rendered for tax compliance, tax advice and tax planning were approximately $0.3 million for both 2019 and 2018.

All Other Fees. There were no fees billed by Ernst & Young LLP for products or services other than those described above in 2019 or 2018.

PART IV

Item 15. ***Exhibits, Financial Statement Schedules.***

(a) The following documents are filed as part of this Report:

1. *Consolidated Financial Statements*:

2. *Financial Statement Schedule*: All schedules for which provision is made in the applicable accounting regulations of the SEC are omitted because they either are not required under the related instructions, are inapplicable, or the required information is shown in the consolidated financial statements or notes thereto.

3. *Exhibits*: The exhibits required by Item 601 of Regulation S-K that would be disclosed under Part IV, Item 15 of an annual report on Form 10-K filed with the SEC have been omitted as permitted pursuant to Section 4.02(a) of the Indentures.

Building a better working world

Report of Independent Auditors

Board of Directors and Shareholders of
LifePoint Health, Inc.

We have audited the accompanying consolidated financial statements of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.), which comprise the consolidated balance sheets as of December 31, 2019 and 2018, and the related consolidated statements of operations, comprehensive loss, equity and cash flows for each of the three years in the period ended December 31, 2019, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.) at December 31, 2019 and 2018, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2019 in conformity with U.S. generally accepted accounting principles.

Note 1. Organization and Summary of Significant Accounting Policies

Organization

LifePoint Health, Inc., a Delaware corporation, acting through its subsidiaries, owns or leases and operates community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities. At December 31, 2019, on a consolidated basis, LifePoint Health, Inc. operated 88 hospital campuses in 29 states throughout the United States ("U.S.").

Unless otherwise indicated or the context otherwise requires, references throughout these notes to the consolidated financial statements to the "Company" or "LifePoint" refer to LifePoint Health, Inc., and each of its consolidated subsidiaries after giving effect to the LifePoint/RCCH Merger (defined below) and (ii) "RCCH" refer to RegionalCare Hospital Partners Holdings, Inc. and each of its consolidated subsidiaries before giving effect to the LifePoint/RCCH Merger. References in this Report to the "Sponsor" refer to certain funds that are affiliates of the Company (the "Apollo Funds") that are ultimately controlled and/or managed by Apollo Management VIII, L.P. ("Apollo Management" and, when acting on behalf of the Apollo Funds, "Apollo"), which is an affiliate of Apollo Global Management LLC.

Additionally, references throughout these notes to the consolidated financial statements to the "LifePoint/RCCH Merger" refer to the merger, which was effective on November 16, 2018, of Legend Merger Sub, Inc., a Delaware corporation and wholly owned subsidiary of RCCH ("Legend Merger Sub"), with and into LifePoint Health, Inc., a Delaware corporation ("Legacy LifePoint"), with Legacy LifePoint surviving the LifePoint/RCCH Merger as a subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners, Inc." to "LifePoint Health, Inc."

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of the Company and all subsidiaries and entities controlled by the Company through majority voting control, and variable interest entities which the Company controls. All significant intercompany accounts and transactions within the Company have been eliminated in consolidation. Noncontrolling interests in non-wholly-owned consolidated subsidiaries of the Company are presented as noncontrolling interests and redeemable noncontrolling interests and distinguish between the interests of the Company and the interests of the noncontrolling owners. Net income attributable to noncontrolling interests and redeemable noncontrolling interests represents the amounts attributable to the noncontrolling interests for each of the applicable periods presented. Investments in entities the Company does not control but does have a substantial ownership interest and can exercise significant influence are accounted for using the equity method.

The Company's financial statements have been presented on the basis of push down accounting in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") No. 805-50-S99. Under the push down basis of accounting, certain transactions incurred by the parent company which would otherwise be accounted for in the accounts of the parent are "pushed down" and recorded on the financial statements of the subsidiary. Accordingly, certain items resulting from the acquisition by Apollo have been recorded on the financial statements of the Company.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in the Company's accompanying consolidated financial statements and notes to the consolidated financial statements. Actual results could differ from those estimates.

Revenue Recognition and Accounts Receivable

Overview

The Company recognizes revenues in the period in which performance obligations are satisfied. Generally, the Company bills patients and third-party payers several days after the services are performed or the patient is discharged. Accounts receivable primarily consist of amounts due from third-party payers and patients. The Company's ability to collect outstanding receivables is critical to its results of operations and cash flows. Amounts the Company receives for treatment of patients covered by governmental programs and third-party payers such as Medicare, Medicaid, health maintenance organizations ("HMOs"), preferred provider organizations ("PPOs") and private insurers as well as directly from patients are subject to contractual adjustments, discounts and implicit price concessions. Accordingly, the revenue and accounts receivable reported in the Company's financial statements are recorded at the net consideration to which the Company expects to be entitled to receive in exchange for providing patient care.

The majority of the Company's performance obligations are satisfied over time for the delivery of patient care in both outpatient and inpatient settings. Revenue for performance obligations satisfied over time is recognized based on actual charges incurred in relation to total expected charges for services anticipated to be provided. The Company believes that this method provides a faithful depiction of the transfer of services over the term of the performance obligation based on the remaining services needed to satisfy the obligation. Generally, unsatisfied or partially unsatisfied performance obligations at the end of the reporting period are related to patients admitted to the Company's hospitals that have not yet been discharged. The performance obligations for these patients are typically satisfied when the patients are discharged, which generally occurs within a matter of days of admission. Patients are generally billed when discharged, though they may be billed on an interim basis for longer stays. Accordingly, because all of the Company's performance obligations are part of a contract that is expected to have a duration of one year or less, the Company has elected to apply the exemption provided by ASC 606, "Revenue from Contracts with Customers" ("ASC 606") to not disclose the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied as of period end.

Subsequent adjustments that are determined to be the result of an adverse change in the patient's or the payer's ability to pay are recognized as bad debt expense. With the adoption of ASC 606, bad debt expense is included under the caption "Other operating expenses, net" in the accompanying consolidated statements of operations, instead of separately as a deduction to arrive at revenue. Bad debt expense for the years ended December 31, 2019, 2018 and 2017 was not material for the Company.

Change in Accounting Estimate

During the year ended December 31, 2018, the Company recorded a decrease to revenues of $17.0 million as a result of a change in its accounting estimate of the collectability of accounts receivable. During the year ended December 31, 2018, the Company identified additional information which indicated that its current collection estimates might be different from its historical collection estimates. Management utilized this new information to further refine its estimation procedures to more precisely estimate the collectability of accounts receivable. The Company's change in its estimation procedures of the collectability of its accounts receivable is considered a change in accounting estimate in accordance with ASC 250, "Accounting Changes and Error Corrections."

Contractual Discounts

The Company derives a significant portion of its revenues from Medicare, Medicaid and other payers that receive discounts from the Company's established billing rates. The Company must estimate the total amount of these discounts to prepare its financial statements. The Medicare and Medicaid regulations and various managed care contracts under which these discounts must be calculated are complex and are subject to interpretation and adjustment. The Company estimates contractual discounts on a payer-specific basis given its interpretation of the applicable regulations or contract terms. These interpretations sometimes result in payments that differ from the Company's estimates. Additionally, updated regulations and contract renegotiations occur frequently, necessitating regular review and assessment of the estimation process by management. Subsequent changes in estimates for contractual discounts are reflected as an adjustment to revenues in the period of the change. Medicare, Medicaid and other discounted payer accounts receivables are written off after they have been final settled with the payer.

Cost Report Settlements

Cost report settlements under reimbursement agreements with Medicare, Medicaid and certain other payers for retroactive adjustments due to audits, reviews or investigations are considered variable consideration and are included in the determination of the estimated transaction price for providing patient care. These settlements are estimated based on the payment terms of the reimbursement agreement with the payer, correspondence from the payer, and the Company's historical experience. Estimated settlements are adjusted in future periods as final settlements are determined. There is a reasonable possibility that recorded estimates will change by a material amount in the near term. For the years ended December 31, 2019, 2018 and 2017, the net adjustments to estimated cost report settlements and other government reimbursements resulted in an increase to revenues of $17.2 million, a decrease to revenues of $4.0 million, and an increase to revenues of $3.6 million, respectively.

The net cost report settlements due from the Company at December 31, 2019 and 2018 were $6.6 million and $0.5 million, respectively. The Company's management believes that adequate provisions have been made for adjustments that may result from final determination of amounts earned under these programs consistent with the constraints that are required by ASC 606.

Self-Pay Revenues

Self-pay revenues are derived from patients who do not have any form of healthcare coverage as well as from patients with third party healthcare coverage related to the patient responsibility portion, including deductibles and co-payments. The Company evaluates these patients, after the patient's medical condition is determined to be stable, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid or other governmental assistance programs. The Company estimates the transaction price for self-pay patients and the patient responsibility portion using a number of analytical tools, benchmarks and market conditions. No single statistic or measurement determines the transaction price for these patients. Some of the analytical tools that the Company utilizes include, but are not limited to, historical cash collection experience, revenue trends by payer classification and revenue days in accounts receivable.

The revenues associated with self-pay patients are reported at the net amount that the Company expects to collect. Because the Company provides care to patients regardless of their ability to pay, the Company has determined that the differences between the amounts it bills based on gross or discounted charges and the amounts the Company expects to collect represent implicit price concessions. The final amount that will be received from the patient is not known at the date of service, and the Company accounts for this variable consideration in accordance with the provisions of ASC 606. Self-pay accounts receivable are written off after collection efforts have been followed in accordance with the Company's policies.

Charity Care

The Company provides care without charge to certain patients that qualify under the local charity care policy of each of its hospitals. For the years ended December 31, 2019, 2018 and 2017, the Company estimates that its costs of care provided under its charity care programs approximated $34.1 million, $16.8 million and $11.7 million, respectively. The Company does not report a charity care patient's charges in revenues or in the provision for doubtful accounts as it is the Company's policy not to pursue collection of amounts related to these patients, and therefore contracts with these patients do not exist.

The Company's management estimates its costs of care provided under its charity care programs utilizing a calculated ratio of costs to gross charges multiplied by the Company's gross charity care charges provided. The Company's gross charity care charges include only services provided to patients who are unable to pay and qualify under the Company's local charity care policies. To the extent the Company receives reimbursement through the various governmental assistance programs in which it participates to subsidize its care of indigent patients, the Company does not include these patients' charges in its cost of care provided under its charity care program.

Financing Component

The Company has elected to apply the practical expedient permitted under ASC 606 and does not adjust the estimated amount of consideration from patients and third-party payers for the effects of a significant financing component due to the Company's expectation that the period between the time the service is provided to a patient and the time that the patient or a third-party payer pays for that service will be one year or less.

Rental Income

The Company leases certain real estate assets it owns to unrelated third parties, primarily medical office buildings to non-employed physicians. The Company recognizes rental income for these operating lease arrangements in which the Company is the lessor on a straight-line basis over the lease term in accordance with ASC 840, "Leases" ("ASC 840").

Concentration of Revenues

The Company's revenues by payer and approximate percentages of revenues were as follows for the years ended December 31, 2019, 2018 and 2017 (dollars in millions):

	2019		2018		2017	
	Amount	% of Revenues	Amount	% of Revenues	Amount	% of Revenues
Medicare	$ 3,338.1	38.1 %	$ 1,105.3	39.8 %	$ 760.6	40.6 %
Medicaid	1,495.3	17.1	486.3	17.5	346.2	18.5
HMOs, PPOs and other private insurers	3,698.6	42.3	1,113.8	40.1	723.8	38.7
Self-pay	59.2	0.7	17.2	0.6	11.4	0.6
Other	143.6	1.6	49.4	1.8	26.7	1.4
Revenue from contracts with customers	8,734.8	99.8	2,772.0	99.8	1,868.7	99.8
Rental income	18.0	0.2	6.1	0.2	4.1	0.2
Revenues	$ 8,752.8	100.0 %	$ 2,778.1	100.0 %	$ 1,872.8	100.0 %

During the years ended December 31, 2019, 2018 and 2017, approximately 55.2%, 57.3% and 59.1%, respectively, of the Company's revenues related to patients participating in the Medicare and Medicaid programs, collectively. The Company's management recognizes that revenues and receivables from government agencies are significant to the Company's operations, but it does not believe that there are significant credit risks associated with these government agencies.

Any changes in the current demographic, economic, competitive or regulatory conditions, or to Medicaid programs could have an adverse effect on the Company's revenues or results of operations. The Company's management does not believe that there are any other significant concentrations of revenues from any particular payer or geographic area that would subject the Company to any significant credit risks in the collection of its accounts receivable.

The Company's revenues by primary service type and approximate percentages of revenues were as follows for the years ended December 31, 2019, 2018 and 2017 (dollars in millions):

	2019		2018		2017	
	Amount	% of Revenues	Amount	% of Revenues	Amount	% of Revenues
Inpatient services	$ 3,524.0	40.3 %	$ 1,188.3	42.8 %	$ 828.9	44.3 %
Outpatient services	5,067.2	57.9	1,534.3	55.2	1,013.1	54.1
Non-patient (a)	161.6	1.8	55.5	2.0	30.8	1.6
Revenues	$ 8,752.8	100.0 %	$ 2,778.1	100.0 %	$ 1,872.8	100.0 %

(a) Represents revenues from ancillary goods, services and rental income.

General and Administrative Costs

The majority of the Company's operating expenses are "cost of revenue" items. Operating costs that could be classified as "general and administrative" by the Company would include its corporate overhead costs, excluding depreciation and amortization and merger, acquisition and other transaction-related costs, which were $179.5 million, $72.4 million and $42.8 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash on hand and short-term investments with original maturities of three months or less. The Company places its cash in financial institutions that are federally insured in limited amounts.

Inventories

Inventories of supplies are stated at the lower of cost (first-in, first-out) or market and consist of purchased items. Inventories acquired in connection with business combinations are recorded at fair value which approximates replacement cost. Inventory items are primarily operating supplies used in the direct or indirect treatment of patients.

Investments

The Company accounts for its investments in entities in which the Company exhibits significant influence, but not control, under the equity method of accounting in accordance with ASC 323, "Investments – Equity Method and Joint Ventures" ("ASC 323"). The Company does not consolidate its equity method investments, but rather measures them at their initial costs and then subsequently adjusts their carrying values through income for their respective shares of the earnings or losses during the period. Refer to Note 9 for further discussion of the Company's equity method investments.

Property and Equipment

Purchases of property and equipment are recorded at cost. Property and equipment acquired in connection with business combinations are recorded at estimated fair value in accordance with the acquisition method of accounting as prescribed in ASC 805, "Business Combinations" ("ASC 805"). Routine maintenance and repairs are charged to expense as incurred. Expenditures that increase capacities or extend useful lives are capitalized. Fully depreciated assets are retained in property and equipment accounts until they are disposed. The Company capitalizes interest on funds used to pay for the construction of major capital additions and such interest is included in the cost of each capital addition.

Depreciation is computed by applying the straight-line method over the estimated useful lives of buildings, improvements and equipment. Assets under capital and financing leases are generally amortized using the straight-line method over the shorter of the estimated useful life of the assets or life of the lease term, excluding any lease renewals, unless the lease renewals are reasonably assured. Capitalized internal-use software costs are amortized over their expected useful life, which is generally four years. Useful lives are as follows:

	Years		
Buildings and improvements (including those under capital leases and financing obligations)	3	-	40
Equipment	2	-	15
Equipment under capital leases	3	-	6

Depreciation expense (including capital and financing lease amortization) totaled $376.9 million, $128.5 million and $80.1 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Whenever events or changes in circumstances indicate that the carrying values of certain long-lived assets may be impaired, the Company projects the undiscounted cash flows expected to be generated by these assets. If the projections indicate that the reported amounts are not expected to be recovered, such amounts are reduced to their estimated fair value based on a quoted market price, if available, or an estimate based on valuation techniques available in the circumstances.

For the year ended December 31, 2018, the Company recognized an impairment charge of $24.5 million to reduce the carrying amounts of certain long-lived assets at one of its facilities to their estimated fair values, which is included under the caption "Impairments of goodwill and long-lived assets" in the accompanying consolidated statements of operations for the year ended December 31, 2018. There were no long-lived asset impairments recorded for the year ended December 31, 2019 or 2017.

Goodwill and Intangible Assets

The Company accounts for its acquisitions in accordance with ASC 805 using the acquisition method of accounting. Goodwill represents the excess of the cost of an acquired entity over the net amounts assigned to assets acquired and liabilities assumed. In accordance with ASC 350, Intangibles – Goodwill and Other ("ASC 350"), goodwill and intangible assets with indefinite lives are reviewed by the Company annually for impairment on October 1. Prior to the LifePoint/RCCH Merger, the Company historically determined that each of its hospitals represented a reporting unit in accordance with ASC 280, "Segment Reporting" ("ASC 280") and ASC 350. Due to the significance of the LifePoint/RCCH Merger and its impact on the Company's management team and business operations, the Company re-evaluated its reporting units in accordance with ASC 280 and ASC 350 during 2019 and determined that the consolidated business comprises a single reporting unit for goodwill impairment testing purposes. For the annual impairment evaluation, the Company determines fair value using a discounted cash flow ("DCF") analysis and consideration of certain market inputs including those of guideline public companies. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates, profitability and the amount and timing of expected future cash flows. The significant judgments are typically based upon Level 3 inputs, generally defined as unobservable inputs representing the Company's assumptions. The cash flows employed in the DCF analysis are based on the Company's most recent financial budgets and business plans and, when applicable, various growth rates and profitability for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risks inherent in the future cash flows of the reporting unit.

The Company's intangible assets relate to contract-based physician minimum revenue guarantees; non-competition agreements; certificates of need and certificates of need exemptions; and licenses, provider numbers, accreditations and other. Contract-based physician minimum revenue guarantees and non-competition agreements are amortized over the terms of the agreements. The certificates of need, certificates of need exemptions, licenses, provider numbers, accreditations and other have been determined to have indefinite lives and, accordingly, are not amortized. Refer to Note 5 for further discussion of the Company's goodwill and intangible assets.

Income Taxes

The Company accounts for income taxes using the asset and liability method. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the income tax provision in the period that includes the enactment date. The Company assesses the likelihood that deferred tax assets will be recovered from future taxable income. To the extent the Company believes that recovery is not likely, a valuation allowance is established. The establishment or increase in a valuation allowance is included as an expense within the provision for income taxes in the consolidated statements of operations. The Company classifies interest and penalties related to its tax positions as a component of income tax expense. Refer to Note 6 for further discussion of the Company's accounting for income taxes.

Reserves for Self-Insurance Claims

Given the nature of the Company's operating environment, it is subject to potential professional liability claims, employee workers' compensation claims and other claims. To mitigate a portion of this risk, the Company maintains insurance for individual professional liability claims and employee workers' compensation claims exceeding self-insured retention ("SIR") and deductible levels. At December 31, 2019, the Company's SIR for professional liability claims is $5.0 million per claim, with a $5.0 million inner aggregate, at the majority of its facilities. Additionally, the Company participates in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2019, the Company's deductible for workers' compensation claims was $1.0 million per claim in all states in which it operates except for Montana, Oklahoma, Ohio, Washington and Wyoming. The Company participates in state-specific programs for its workers' compensation claims arising in these states. The Company's SIR and deductible levels are evaluated annually as a part of its insurance program's renewal process.

The Company's reserves for self-insurance and deductible claims reflect the current estimate of all outstanding losses, including incurred but not reported losses, based upon actuarial calculations as of the balance sheet date. The loss estimates included in the actuarial calculations may change in the future based upon updated facts and circumstances. The Company's expense for self-insurance and deductible claims coverage each year includes: the actuarially determined estimate of losses for the current year, including claims incurred but not reported; the change in the estimate of losses for prior years based upon actual claims development experience as compared to prior actuarial projections; the insurance premiums for losses in excess of the Company's self-insured retention and deductible levels; the administrative costs of the insurance program; and interest expense related to the discounted portion of the liability. The Company's expense for self-insurance and deductible claims was approximately $75.6 million, $20.7 million and $7.7 million for the years ended December 31, 2019, 2018 and 2017, respectively.

The Company's reserves for professional liability claims are based upon quarterly and/or semi-annual actuarial calculations. These reserve calculations consider historical claims data, demographic considerations, severity factors and other actuarial assumptions, which are discounted to present value. The Company's reserves for self-insured claims have been discounted to their present value using a discount rate of 1.9% at December 31, 2019, 1.8% at December 31, 2018 and in a range of 1.4% to 2.4% at December 31, 2017. The Company's management selects a discount rate by considering a risk-free interest rate that corresponds to the period when the self-insured claims are incurred and projected to be paid.

Professional and general liability claims are typically resolved over an extended period of time, often as long as five years or more, while workers' compensation claims are typically resolved in one to two years. Accordingly, the Company's reserves for self-insured claims, comprised of estimated indemnity and expense payments related to reported events and incurred but not reported events as of the end of the period, include both a current and long-term component. The current portion of the Company's reserves for self-insured claims is included under the caption "Other current liabilities" and the long-term portion is included under the caption "Long-term portion of reserves for self-insurance claims" in the accompanying consolidated balance sheets.

The following table provides information regarding the classification of the Company's reserves for self-insured claims at December 31, 2019 and 2018 (in millions):

	2019	2018
Current portion	$ 64.5	$ 70.7
Long-term portion	196.5	194.0
	$ 261.0	$ 264.7

The following table presents the changes in our reserves for self-insured claims for the years ended December 31, 2019 and 2018 (in millions):

	2019	2018
Reserve at the beginning of the period	$ 264.7	$ 65.0
Liabilities assumed in LifePoint/RCCH Merger	-	194.7
Increase for the provision of current year claims	69.2	23.0
Increase (decrease) for the provision of prior year claims	6.7	(3.9)
Payments related to current year claims	(5.2)	(1.0)
Payments related to prior year claims	(75.9)	(14.8)
Provision for the change in discount rate	(0.3)	1.6
Noncash change in reserve for claims in excess of self-insured retention levels	1.8	0.1
Reserve at the end of the period	$ 261.0	$ 264.7

The combination of changing conditions and the extended time required for claim resolution results in a loss estimation process that requires actuarial skill and the application of judgment, and such estimates require periodic revision. As a result of the variety of factors that must be considered, there is a risk that actual incurred losses may develop differently from estimates. The results of the Company's quarterly and semi-annual actuarial calculations resulted in changes to its reserves for self-insured claims for prior years. As a result, the Company's related self-insured claims expense increased by $6.7 million for the year ended December 31, 2019 and decreased by $3.9 million and $12.1 million for the years ended December 31, 2018 and 2017, respectively.

Point of Life Indemnity, Ltd.

The Company operates, with approval from the Cayman Islands Monetary Authority, a captive insurance company under the name Point of Life Indemnity, Ltd. Through this wholly-owned subsidiary of the Company, the captive insurance company issues malpractice insurance policies to certain of the Company's employed physicians and contracted physicians in addition to providing workers' compensation deductible coverage. Fees charged to these employed physicians and contracted physicians are eliminated in consolidation. Reserves for the Company's estimate of the related outstanding claims, including incurred but not reported losses, are actuarially determined and are included as a component of the Company's reserves for professional liability self-insurance claims.

Self-Insured Medical Benefits

The Company is self-insured for substantially all of the medical expenses and benefits of its employees. The reserve for medical benefits primarily reflects the current estimate of incurred but not reported losses based upon an annual actuarial calculation as of the balance sheet date. The undiscounted reserve for self-insured medical benefits was $53.8 million and $46.1 million at December 31, 2019 and 2018, respectively, and is included in the Company's accompanying consolidated balance sheets under the caption "Other current liabilities".

Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling interests represent the portion of equity in a subsidiary not attributable, directly or indirectly, to the Company. The Company's accompanying consolidated financial statements include all assets, liabilities, revenues, and expenses at their consolidated amounts, which include the amounts attributable to the Company and the noncontrolling interest. The Company recognizes as a separate component of earnings that portion of income or loss attributable to noncontrolling interests based on the portion of the entity not owned by the Company. Refer to Note 10 for further discussion of the Company's noncontrolling interests and redeemable noncontrolling interests.

Variable Interest Entities

The Company's consolidated financial statements at December 31, 2019 include eight facilities that qualify as a variable interest entity in which the Company is the primary beneficiary under the provisions of ASC 810, "Consolidation," and in which the Company owns a controlling economic interest.

Stock-Based Compensation

The Company's indirect parent, DSB Parent L.P., a Delaware limited partnership ("DSB Parent"), has issued profits units (the "Units") to certain employees, directors and consultants under the terms and conditions of the Amended and Restated Limited Partnership Agreement of DSB Parent dated of December 3, 2015 (the "DSB Parent Partnership Agreement") and forms of award agreements. The Company accounted for these stock-based awards in accordance with the provisions of ASC 718, "Compensation – Stock Compensation" ("ASC 718"). In accordance with ASC 718, the Company recognized compensation expense based on the estimated grant date fair value of each stock-based award. The Company recognizes forfeitures of Units as they occur. Refer to Note 13 for further discussion of the Company's accounting for the Units.

Defined Benefit Pension Plans

In connection with the LifePoint/RCCH Merger, the Company acquired certain assets and assumed certain liabilities associated with two separate defined benefit pension plans covering certain employees at two of Legacy LifePoint's facilities. The Company accounts for its defined benefit pension plans in accordance with ASC 715, "Compensation – Defined Benefit Plans", ("ASC 715"). In accordance with ASC 715, the Company recognizes the unfunded liability of its defined benefit pension plans in the Company's consolidated balance sheets and unrecognized gains (losses) and prior service credits (costs) as changes in other comprehensive income (loss). The measurement date of the defined benefit pension plans' assets and liabilities coincides with the Company's year-end. The Company's pension benefit obligations are measured using actuarial calculations that incorporate discount rates, rate of compensation increases, when applicable, expected long-term returns on plan assets and consider expected age of retirement and mortality. Refer to Note 12 for further discussion of the Company's defined benefit pension plans.

Defined Contribution Plans

The Company maintains three separate defined contribution retirement plans covering a majority of the Company's employees, including Legacy LifePoint employees, RCCH employees and employees at Community Medical Center. These defined contribution retirement plans contain discretionary matching contribution formulas and definite non-elective contribution formulas for employees at certain facilities. Effective as of the end of the day on December 31, 2019, the plan covering RCCH employees was merged into the plan covering Legacy LifePoint employees. Refer to Note 12 for further discussion of the Company's defined contribution plans.

Reclassifications

Certain reclassifications have been made to the prior years to conform to current year presentation. These reclassifications had no effect on net loss or cash flows as previously reported.

Adoption of Recently Issued Accounting Standards

ASC 606, "Revenue from Contracts with Customers"

Effective January 1, 2019, the Company adopted the provisions of ASC 606, which supersedes most existing revenue recognition guidance, including industry-specific healthcare guidance, by applying the full retrospective method for all periods presented. ASC 606 provides for a single comprehensive principles-based standard for the recognition of revenue across all industries through the application of the following five-step process:

Step 1: Identify the contract(s) with a customer.
Step 2: Identify the performance obligations in the contract.
Step 3: Determine the transaction price.
Step 4: Allocate the transaction price to the performance obligations in the contract.
Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation.

The adoption of the provisions of ASC 606 had no impact on the Company's current or historical financial position, results of operations or cash flows. Additionally, management does not anticipate that the provisions of ASC 606 will have an impact on the amount or timing of when the Company recognizes revenue prospectively. However, in accordance with ASC 606, the Company now recognizes the majority of its previously reported provision for doubtful accounts, primarily related to its self-pay patient population, as a direct reduction to revenues as an implicit pricing concession, instead of separately as a discrete deduction to arrive at revenue, and the related presentation of the allowance for doubtful accounts has been eliminated for all periods presented.

Accounting Standard Not Yet Adopted - Accounting Standards Update ("ASU") 2016-02, "Leases" ("ASU 2016-2")

In February 2016, the FASB issued ASU 2016-2, along with subsequent amendments, updates and an extension of the effective date (collectively, the "New Lease Standard"). The New Lease Standard requires the rights and obligations arising from lease contracts, including existing and new arrangements, to be recognized as assets and liabilities on the balance sheet. The New Lease Standard is effective for annual reporting periods beginning after December 15, 2020. As permitted, the Company plans to adopt the New Lease Standard early effective January 1, 2020 by applying a modified retrospective approach with a cumulative effect of the retrospective application of the provisions as an adjustment through retained earnings and without any adjustments to the comparable prior period information. Additionally, the Company expects to apply a number of available practical expedients to facilitate the adoption of the New Lease Standard, including the package of practical expedients to not reassess whether a contract is or contains a lease, the lease classification and the initial direct costs.

In preparation for the adoption of the New Lease Standard, the Company has implemented a new information technology application as well as new processes, policies, procedures and controls. The Company continues to evaluate and refine its estimates of the anticipated impacts the New Lease Standard will have on its financial position, results of operations and financial disclosures.

Note 2. LifePoint/RCCH Merger

Summary

On July 22, 2018, RCCH, Legend Merger Sub and Legacy LifePoint entered into an agreement and plan of merger, pursuant to which, effective November 16, 2018, Legend Merger Sub merged with and into Legacy LifePoint, with Legacy LifePoint surviving the merger as a wholly-owned subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc."

Equity Contribution

In connection with the LifePoint/RCCH Merger, the Apollo Funds, together with certain other co-investors investing through a co-investment vehicle controlled by our Sponsor or its affiliates, indirectly contributed $1,000.0 million of newly invested capital to DSB Parent, which is the Company's indirect parent and is owned by the Apollo Funds, such co-investment vehicle and certain current or former directors, members of management, employees and consultants of the Company, and the $1,000.0 million of newly invested capital was further contributed to the Company to be used to partially fund the LifePoint/RCCH Merger.

Financing Transactions

Concurrently with the closing of the LifePoint/RCCH Merger, the Company (1) issued $1,425.0 million principal amount of 9.750% Senior Notes due 2026 (the "9.75% Unsecured Notes"), (2) entered into a new senior secured asset-based revolving credit facility (the "ABL Facility") in an aggregate principal amount of $800.0 million with a maturity of five years, (3) terminated its existing senior secured asset-based revolving credit facility, entered into on April 29, 2016 (the "Prior ABL Facility"), (4) entered into a senior secured term loan credit facility (the "Term Loan Facility") in an aggregate principal amount of $3,550.0 million with a maturity of seven years, and (4) repaid in full its $150.0 million term loan facility, entered into on April 25, 2018 (the "Prior Term Facility").

The Company has accounted for the LifePoint/RCCH Merger in accordance with ASC 805 under the acquisition method of accounting. The following table summarizes the fair values of assets acquired and liabilities assumed in connection with the LifePoint/RCCH Merger (in millions):

Cash	$	139.8
Accounts receivable		778.8
Other current assets		473.4
Property and equipment		2,711.4
Goodwill		2,331.2
Intangible assets		66.8
Other long-term assets		261.7
Accounts payable		(185.3)
Accrued salaries		(407.8)
Other current liabilities		(260.2)
Capital and financing leases, including current maturities		(141.4)
Other long-term liabilities		(238.0)
Noncontrolling interests and redeemable noncontrolling interests		(100.8)
Net assets acquired	$	5,429.6

The results of operations of Legacy LifePoint are included in the Company's results of operations beginning on November 17, 2018. Revenues from the operations acquired in the LifePoint/RCCH Merger included in the Company's consolidated statements of operations were $754.9 million for the year ended December 31, 2018. Income before income taxes from the operations acquired in the LifePoint/RCCH Merger was $50.9 million for the year ended December 31, 2018.

For the years ended December 31, 2019 and 2018, the Company recognized merger and integration-related costs of $47.1 and $134.7 million, respectively, primarily related to legal and transaction advisory services as well as employee severance and retention and other integration-related expenses in connection with the LifePoint/RCCH Merger. Included in the 2018 merger-related costs is a $55.0 million transaction fee paid by the Company to an affiliate of its Sponsor upon the closing of the LifePoint/RCCH Merger.

Note 3. Acquisitions, Divestitures and Joint Ventures

Acquisitions

Lourdes Health ("Lourdes")

At the close of business on August 31, 2018, the Company acquired Lourdes for $21.3 million, of which $17.5 million was financed from a sale-leaseback transaction with an affiliate of Medical Properties Trust ("MPT"), a Maryland corporation operating as a real estate investment trust. Lourdes is comprised of a 95 bed medical center and a 32 bed counseling center each located in Pasco, Washington. The results of operations of Lourdes are included in the Company's results of operations beginning on September 1, 2018.

Trios Health ("Trios")

At the close of business on August 3, 2018, the Company acquired Trios for $18.0 million. Trios is comprised of two hospital campuses with a total of 111 beds each located in Kennewick, Washington. In connection with the Trios acquisition, the Company entered into a sale-leaseback arrangement for a hospital building whose rent is contingent on the financial performance of the hospital and a sale-leaseback arrangement for a medical office building. The results of operations of Trios are included in the Company's results of operations beginning on August 4, 2018.

Pacific Medical Data Solutions ("PMDS")

Effective April 1, 2018, the Company acquired PMDS for $10.7 million. PMDS is a healthcare technology and software services company that provides revenue cycle, billing automation and software solutions to multi-specialty physician groups, ambulatory surgery centers and urgent care clinics.

St. Joseph Regional Medical Center ("St. Joseph")

At the close of business on April 30, 2017, the Company acquired St. Joseph, a 145 bed hospital in Lewiston, Idaho, for $112.2 million, of which $87.5 million was financed from a sale-leaseback transaction with MPT. The results of operations of St. Joseph are included in the Company's results of operations beginning on May 1, 2017.

Divestitures

Teche Regional Medical Center ("Teche")

In August 2018, the Company entered into a proposed settlement agreement with The Hospital Service District No. 2 of the Parish of St. Mary ("HSD"), a political subdivision of the state of Louisiana, outlining the terms of a definitive settlement agreement to terminate the Company's lease of Teche, located in Morgan City, Louisiana, and transfer the operations of Teche to a new operator designated by the HSD. In connection with the transfer of the operations of Teche to the new operator, in June 2019, the Company entered into a definitive agreement to sell substantially all of the owned assets of Teche to the HSD's designated new operator. In July 2019, the Company entered into a definitive settlement agreement with the HSD pursuant to which, among other things, at the effective time of the transfer of the owned assets of Teche to the HSD's designated new operator, the Company's lease of Teche terminated, the Company surrendered the leased assets of Teche to the HSD in accordance with the terms of the existing lease agreement, and the Company transferred operation of Teche to the HSD's designated new operator. The settlement and sale transactions were completed effective October 1, 2019. Included in the Company's consolidated results of operations for the years ended December 31, 2019 and 2018 are net operating losses before income taxes attributable to Teche of $1.4 million and $0.6 million, respectively.

Sharon Hospital ("Sharon")

The Company sold Sharon, located in Sharon, Connecticut on August 1, 2017 for $3.6 million. The Company recorded a loss on sale of $2.8 million during the year ended December 31, 2017 as a result of the divestiture. Included in the Company's consolidated results of operations for the year ended December 31, 2017 is a net operating loss before income taxes attributable to Sharon of $2.1 million.

EaStar Health System ("EaStar")

On March 31, 2017, the Company sold EaStar, located in Muskogee, Oklahoma. The total sales price was $89.3 million, plus certain working capital items and sales taxes. Of the proceeds, $68.5 million were paid to MPT to pay off the financing lease obligation and the related prepayment penalty. The remainder of the proceeds of $20.8 million were paid directly to the Company's parent. Included in the Company's consolidated results of operations for the year ended December 31, 2017 is a net operating loss before income taxes attributable to EaStar of $8.9 million.

Joint Ventures

Emory Healthcare Joint Venture

Effective January 1, 2020, the Company formed a new joint venture with Emory Healthcare, Inc. ("Emory") to operate St. Francis Hospital ("St. Francis") located in Columbus, Georgia. The Company holds a controlling interest in St. Francis such that it will continue to be included in the Company's consolidated financial statements.

In-Home Healthcare Partnership

The Company maintains a joint venture with a wholly-owned subsidiary of LHC Group, Inc. ("LHC"), In-Home Healthcare Partnership ("IHHP"), the purpose of which is to own and operate the Company's home health agencies and hospices and certain of LHC's home health agencies and hospices, leveraging the combined expertise of the Company and LHC to enhance home health and hospice services in the communities served by the Company's hospitals. The Company accounts for its ownership interest in IHHP as an equity method investment in accordance with ASC 323.

During the year ended December 31, 2019, the Company expanded its partnership with LHC by transferring ownership and management of one of the Company's home health agencies and two of the Company's hospices to IHHP effective December 1, 2019. As a result, the Company has transferred assets primarily comprised of accounts receivable and allocated goodwill in exchange for cash, and recognized aggregate gains of approximately $1.1 million, which is included under the caption "Other non-operating losses, net" in the accompanying consolidated statements of operations for the year ended December 31, 2019.

Additionally, effective January 1, 2020, the Company transferred the ownership of one additional home health agency and one additional hospice to IHHP and subsequently sold a portion of its ownership interest in IHHP to LHC for cash proceeds of approximately $23.6 million.

Note 4. Long-Term Debt

The Company's long-term debt, including current portions and capital and financing leases, consists of the following at December 31, 2019 and 2018 (in millions):

	2019	2018
Senior borrowings:		
ABL Facility	$ -	$ 20.0
Term Loan Facility	3,523.4	3,550.0
9.75% Unsecured Notes	1,425.0	1,425.0
8.25% Secured Notes	800.0	800.0
11.5% Unsecured Notes	350.0	350.0
Capital and financing lease obligations	1,267.9	557.2
Unamortized debt issuance costs	(191.8)	(227.4)
	7,174.5	6,474.8
Subordinated borrowings, net	1.6	3.0
Total debt	$ 7,176.1	$ 6,477.8

Maturities of the Company's long-term debt outstanding at December 31, 2019, including capital and financing leases, but excluding unamortized debt issuance costs and other obligations that do not require eventual settlement in cash, are as follows for the years indicated (in millions):

2020	$ 69.9
2021	61.3
2022	125.2
2023	854.4
2024	404.5
Thereafter	5,682.0
	$ 7,197.3

ABL Facility

General

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, the Company and Legend Merger Sub (together, prior to the effective time of the LifePoint/RCCH Merger, the "Co-Borrowers") entered into the ABL Facility in an aggregate principal amount of $800.0 million and terminated its Prior ABL Facility. The ABL Facility has a maturity of five years; provided that if more than $200.0 million aggregate principal amount of the 8.25% Secured Notes remain outstanding 91 days before the stated maturity thereof (the "ABL Springing Maturity Date"), then the ABL Facility will mature and the commitments under the ABL Facility will terminate on the ABL Springing Maturity Date. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint assumed all of the rights and obligations of Legend Merger Sub under the ABL Facility. The ABL Facility also includes both a letter of credit sub-facility and a swingline loan sub-facility (including in its capacity as co-borrower under the Term Loan Facility). In addition, the Company may request one or more incremental revolving commitments in an aggregate principal amount up to the greater of (x) the greater of (i) $255.0 million and (ii) 0.23 times pro forma Adjusted EBITDA for the most recently available four fiscal quarter periods, and (y) the amount by which the borrowing base exceeds the aggregate commitments under the ABL Facility, subject to certain conditions and receipt of commitments by existing or additional lenders.

As of December 31, 2019, the Company had no borrowings outstanding under the ABL Facility and approximately $44.1 million in letters of credit outstanding primarily related to the self-insured retention level of its general and professional liability insurance and workers' compensation programs as security for payment of claims and as security for certain lease agreements. Amounts available for borrowing under the ABL Facility were approximately $547.3 million as of December 31, 2019.

Collateral and Guarantors

All obligations under the ABL Facility are unconditionally guaranteed by DSB Acquisition, LLC, a Delaware limited liability company ("Holdings"), on a limited recourse basis and each of the existing and future direct and indirect material, wholly-owned domestic subsidiaries of the Co-Borrowers, subject to certain exceptions.

The obligations under the ABL Facility are secured by a pledge of the capital stock of the Co-Borrowers and substantially all of their assets and those of each subsidiary guarantor, including a pledge of the capital stock of all entities directly held by the Company (including Legacy LifePoint) and each subsidiary guarantor (which pledge is limited to 65% of the voting capital stock of first-tier foreign subsidiaries), in each case subject to certain exceptions. Such security interests consist of a first-priority lien with respect to the ABL Priority Collateral and a second-priority lien with respect to the Non-ABL Priority Collateral. Additionally, certain of the Company's restricted subsidiaries that are not guarantors will pledge certain of their assets (the "Credit Support Party Collateral") on a first-priority basis, as further security of the obligations under the ABL Facility. The Credit Support Party Collateral will secure only the obligations under the ABL Facility.

All borrowings under the ABL Facility are subject to the satisfaction of customary conditions, including the absence of a default and the accuracy of representations and warranties.

Interest Rates and Fees

Borrowings under the ABL Facility will bear interest at a rate equal to, at the Company's option, either (a) a LIBOR rate determined by reference to the costs of funds for Eurodollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs or (b) a base rate determined by reference to the highest of (i) the federal funds rate plus 0.50%, (ii) the prime rate of Citibank, N.A. and (iii) the one-month adjusted LIBOR plus 1.00%, in each case plus an initial applicable margin of 1.75% for LIBOR loans and 0.75% for base rate loans. The applicable margin for borrowings will be subject to step-downs based on average availability thresholds.

In addition to paying interest on outstanding principal under the ABL Facility, the Co-Borrowers will be required to pay a commitment fee under the ABL Facility in respect of the unutilized commitments under the ABL Facility at an initial rate equal to 0.375% per annum. The commitment fee may be subject to one step-down based on the average daily utilization under the ABL Facility. The Co-Borrowers will also be required to pay customary agency fees as well as letter of credit participation fees.

Restrictive Covenants and Other Matters

The ABL Facility contains certain customary affirmative covenants and events of default. The negative covenants in the ABL Facility include, among other things, limitations (none of which are absolute) on the Co-Borrowers and their subsidiaries' ability to incur additional debt or issue certain preferred shares, create liens on certain assets, make certain loans or investments (including acquisitions), pay dividends on or make distributions in respect of their capital stock or make other restricted payments, consolidate, merge, sell or otherwise dispose of all or substantially all of theirs and their restricted subsidiaries' assets, sell certain assets, enter into certain transactions with their affiliates, enter into sale-leaseback transactions, change their lines of business, restrict dividends from their subsidiaries or restrict liens, change their fiscal year; and modify the terms of certain debt.

The ABL Facility requires that the Co-Borrowers and its restricted subsidiaries maintain a minimum fixed charge coverage ratio at any time when availability is less than an agreed amount.

The ABL Facility contains certain customary events of default, including relating to a change of control. If an event of default occurs, the lenders under the ABL Facility are entitled to take various actions, including the acceleration of amounts due under the ABL Facility and all actions permitted to be taken by a secured creditor in respect of the collateral securing the ABL Facility.

Term Loan Facility

General

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, Co-Borrowers entered into the Term Loan Facility with an original aggregate principal amount of $3,550.0 million and repaid in full its Prior Term Facility. The Term Loan Facility has a maturity of seven years; provided that if more than $150.0 million aggregate principal amount of the 11.5% Unsecured Notes remain outstanding 91 days before the stated maturity thereof (the "Term Springing Maturity Date"), then the Term Loan Facility will mature and the commitments under the Term Loan Facility will terminate on the Term Springing Maturity Date. At the Effective Time, Legacy LifePoint assumed all of the rights and obligations of Merger Sub under the Term Loan Facility (including in its capacity as a Co-Borrower under the Term Loan Facility). In addition, the Company may request one or more incremental commitments in an aggregate principal amount up to the sum of (x) the greater of (i) $800.0 million and (ii) 0.75 times pro forma Adjusted EBITDA for the most recently available four fiscal quarter periods, plus additional amounts subject to certain agreed leverage requirements, certain other conditions and receipt of commitments by existing or additional lenders.

The Term Loan Facility required scheduled quarterly amortization payments on the term loans in an annual amount equal to 1.0% of the original principal amount of the term loans, with the balance to be paid at maturity. After giving effect to the refinancing activities further described in Note 15, there are no more quarterly amortization payments required on the Term Loan Facility prior to maturity.

Collateral and Guarantors

All obligations under the Term Loan Facility are unconditionally guaranteed by Holdings on a limited recourse basis and each of the existing and future direct and indirect material, wholly-owned domestic subsidiaries of the Co-Borrowers, subject to certain exceptions.

The obligations under the Term Loan Facility are secured by a pledge of the capital stock of the Company and substantially all of its assets and those of each subsidiary guarantor, including a pledge of the capital stock of all entities directly held by the Company (including Legacy LifePoint) and each subsidiary guarantor (which pledge is limited to 65% of the voting capital stock of first-tier foreign subsidiaries), in each case subject to certain exceptions. Such security interests consist of a first-priority lien with respect to the "Non-ABL Priority Collateral" (which generally includes most inventory and fixed assets, equity interests and intellectual property of the Co-Borrowers and the subsidiary guarantors) and a second-priority lien with respect to the "ABL Priority Collateral" (which generally includes most accounts receivable and certain related assets of the Co-Borrowers and the subsidiary guarantors).

Interest Rates

Borrowings under the Term Loan Facility bore interest at a rate equal to, at the Company's option, either (a) a LIBOR rate determined by reference to the costs of funds for Eurodollar deposits for the interest period relevant to such borrowing, adjusted for certain additional costs or (b) a base rate determined by reference to the highest of (i) the federal funds rate plus 0.50%, (ii) the prime rate of Citibank, N.A. and (iii) the one-month adjusted LIBOR plus 1.00%, in each case plus an applicable margin of 4.50% for LIBOR loans and 3.50% for base rate loans. In connection with a repricing of the Term Loan Facility on January 21, 2020 as further described in Note 15, the applicable margins were reduced to 3.75% for LIBOR loans and 2.75% for base rate loans.

Restrictive Covenants and Other Matters

The Term Loan Facility contains certain customary affirmative covenants and events of default. The negative covenants in the Term Loan Facility include, among other things, limitations (none of which are absolute) on the Co-Borrowers and their subsidiaries' ability to incur additional debt or issue certain preferred shares, create liens on certain assets, make certain loans or investments (including acquisitions), pay dividends on or make distributions in respect of their capital stock or make other restricted payments, consolidate, merge, sell or otherwise dispose of all or substantially all of theirs and their restricted subsidiaries' assets, sell certain assets, enter into certain transactions with their affiliates enter into sale-leaseback transactions, change their lines of business, restrict dividends from subsidiaries or restrict liens, change their fiscal year and modify the terms of certain debt or organizational agreements.

The Term Loan Facility contains certain customary events of default, including relating to a change of control. If an event of default occurs, the lenders under the Term Loan Facility are entitled to take various actions, including the acceleration of amounts due under the Term Loan Facility and all actions permitted to be taken by a secured creditor in respect of the collateral securing the Term Loan Facility.

Refer to Note 15 for further discussion of refinancing activities occurring subsequent to December 31, 2019 and the related impact to the Term Loan Facility.

9.75% Unsecured Notes

On November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, the Company issued $1,425.0 million aggregate principal amount of the 9.75% Unsecured Notes. The 9.75% Unsecured Notes will mature on December 1, 2026. Interest on the 9.75% Unsecured Notes will accrue at 9.750% per annum and will be paid semi-annually, in arrears, on June 1 and December 1 of each year, beginning June 1, 2019.

Prior to December 1, 2021, the Company may redeem the 9.75% Unsecured Notes at its option, in whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the 9.75% Unsecured Notes redeemed, plus a "make-whole" premium and accrued and unpaid interest, if any. Additionally, prior to December 1, 2021, the Company may redeem in the aggregate up to 40% of the aggregate principal amount of the 9.75% Unsecured Notes in an aggregate amount not to exceed the amount of net cash proceeds of one or more equity offerings at a redemption price equal to 109.750%, plus accrued and unpaid interest, if any, so long as at least 50% of the original aggregate principal amount of the 9.75% Unsecured Notes must remain outstanding after each such redemption. On or after December 1, 2021, the Company may redeem the 9.75% Unsecured Notes at its option, in whole at any time or in part from time to time, at the redemption prices set forth in indenture governing the 9.75% Unsecured Notes (the "9.75% Unsecured Notes Indenture").

The Company's obligations under the 9.75% Unsecured Notes are fully and unconditionally guaranteed by each of the Company's wholly-owned domestic restricted subsidiaries that guarantees the Term Loan Facility. The 9.75% Unsecured Notes and the related guarantees are unsecured obligations of the Issuers and the subsidiary guarantors.

The 9.75% Unsecured Notes Indenture, among other things, limits the Company's ability and the ability of its restricted subsidiaries to, among other things: (i) incur or guarantee additional indebtedness; (ii) pay dividends or distributions on, or redeem or repurchase, capital stock and make other restricted payments; (iii) make certain investments; (iv) consummate certain asset sales; (v) engage in certain transactions with affiliates; (vi) grant or assume certain liens; and (vii) consolidate, merge or transfer all or substantially all of their assets. These covenants are subject to a number of important qualifications and exceptions. Additionally, upon the occurrence of specified change of control events, the Company must offer to repurchase the 9.75% Unsecured Notes at 101% of the principal amount, plus accrued and unpaid interest, if any, to, but not including, the purchase date. The 9.75% Unsecured Notes Indenture also provides for customary events of default.

8.25% Secured Notes

On April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, the Company issued $800.0 million aggregate principal amount of 8.25% Secured Notes. The 8.25% Secured Notes are senior obligations of the Company which mature on May 1, 2023 and bear interest at a rate of 8.25% per annum, payable semiannually on May 1 and November 1 of each year.

On or after May 1, 2019, the Company may redeem the 8.25% Secured Notes at its option, in whole at any time or in part from time to time, at redemption prices set forth in the indenture governing the 8.25% Secured Notes.

The Company's obligations under the 8.25% Secured Notes are fully and unconditionally guaranteed, jointly and severally, by the Company's present and future direct and indirect wholly-owned material domestic subsidiaries that guarantee the Term Loan Facility. The 8.25% Secured Notes are secured by first priority security interests in the Non-ABL Priority Collateral and a second priority security interests in the ABL Priority Collateral.

The indenture governing the 8.25% Secured Notes contains restrictive covenants that are substantially the same as those in the 9.75% Unsecured Notes Indenture.

Refer to Note 15 for further discussion of refinancing activities occurring subsequent to December 31, 2019 and the related impact to the 8.25% Secured Notes.

11.5% Senior Unsecured Notes

Effective April 29, 2016, concurrently with the closing of the RegionalCare/Capella Merger, the Company issued $350.0 million aggregate principal amount of 11.5% Unsecured Notes in a private offering. The 11.5% Unsecured Notes mature on May 1, 2024 and bear interest at a rate of 11.5% per annum, payable semi-annually on May 1 and November 1 of each year.

On or after May 1, 2019, the Company may redeem the 11.5% Unsecured Notes at its option, in whole at any time or in part from time to time, at the redemption prices set forth in the indenture governing the 11.5% Unsecured Notes.

The Company's obligations under the 11.5% Unsecured Notes are fully and unconditionally guaranteed, jointly and severally, by the Company's present and future direct and indirect wholly-owned material domestic subsidiaries that guarantee the Term Loan Facility.

The indenture governing the 11.5% Unsecured Notes contains restrictive covenants that are substantially the same as those in the 9.75% Unsecured Notes Indenture.

Refer to Note 15 for further discussion of refinancing activities occurring subsequent to December 31, 2019 and the related impact to the 11.5% Unsecured Notes.

Capital and Financing Leases

Refer to Note 8 for further discussion of the Company's capital and financing leases.

Interest Rate Swap Agreement

On December 21, 2018, the Company entered into an interest rate swap agreement with Citibank, N.A. as counterparty (the "Interest Rate Swap") whereby the Company pays a fixed rate of 2.63% on a notional amount of $1,100.0 million and receives one-month LIBOR. The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. Refer to Note 11 for additional information regarding the Company's accounting for its Interest Rate Swap.

Debt Transaction Costs

In connection with the issuance of the Term Loan Facility, the ABL Facility and the 9.75% Unsecured Notes, the Company capitalized $201.8 million of new debt issuance costs associated with these new debt instruments, which are included as a reduction to "Long-term debt, net" on the Company's accompanying consolidated balance sheet. During the year ended December 31, 2018, the Company wrote off $8.2 million of previously capitalized debt issuance costs in connection with the extinguishment of the Prior ABL Facility and Prior Term Facility, which is included under the caption "Other non-operating losses, net" in the accompanying consolidated statement of operations for the year ended December 31, 2018. For the year ended December 31, 2017, the Company recorded a loss on debt refinancing of $4.3 million, which is included under the caption "Other non-operating losses, net" in the accompanying consolidated statement of operations for the year ended December 31, 2017.

Note 5. Goodwill and Intangible Assets

Goodwill

The following table presents the changes in the carrying amount of goodwill for the years ended December 31, 2019 and 2018 (in millions):

Balance at January 1, 2018	$	651.5
Goodwill acquired in the LifePoint/RCCH Merger		1,950.1
Acquisitions		19.9
Impairments		(53.9)
Balance at December 31, 2018		2,567.6
Finalization of purchase price allocations for the LifePoint/RCCH Merger		381.1
Adjustments related to current and prior year acquisitions		17.0
Impairments		(3.3)
Write-off allocation related to IHHP transactions		(1.2)
Balance at December 31, 2019	$	2,961.2

Prior to the LifePoint/RCCH Merger, the Company historically determined that each of its hospitals represented a reporting unit in accordance with ASC 280 and ASC 350. Due to the significance of the LifePoint/RCCH Merger and its impact on the Company's management team and business operations, the Company re-evaluated its reporting units in accordance with ASC 280 and ASC 350 during 2019 and determined that the consolidated business comprises a single reporting unit for goodwill impairment testing purposes. In accordance with ASC 350, the Company evaluated goodwill for impairment in 2019 under both the prior and current reporting unit methodologies. Under the prior reporting unit methodology, for which each of the Company's hospitals represented a reporting unit, the Company performed a goodwill impairment test as of October 1, 2019 and recorded a non-cash impairment charge of $3.3 million for the year ended December 31, 2019 related to one of its facilities. Additionally, under the current methodology, for which the consolidated Company comprises a single reporting unit, the Company performed a goodwill impairment test as of October 1, 2019 which did not yield an impairment charge. For the year ended December 31, 2018, the Company recorded non-cash impairment charges in the aggregate of $53.9 million related to three of its facilities. For the year ended December 31, 2017, the Company recorded a non-cash impairment charge of $14.1 million related to one of its facilities.

Intangible Assets

The following table provides information regarding the Company's intangible assets included in the accompanying consolidated balance sheets as of December 31, 2019 and 2018 (in millions):

	2019	2018
Amortizable intangible assets:		
Contract-based physician minimum revenue guarantees		
Gross carrying amount	$ 34.7	$ 34.0
Accumulated amortization	(12.7)	(7.1)
Net total	22.0	26.9
Other amortizable intangible assets		
Gross carrying amount	13.8	4.5
Accumulated amortization	(3.6)	(0.5)
Net total	10.2	4.0
Total amortizable intangible assets		
Gross carrying amount	48.5	38.5
Accumulated amortization	(16.3)	(7.6)
Net total	32.2	30.9
Indefinite-lived intangible assets:		
Certificates of need and certificates of need exemptions	29.3	31.0
Licenses, provider numbers, accreditations and other	12.0	12.6
Net total	41.3	43.6
Total intangible assets:		
Gross carrying amount	89.8	82.1
Accumulated amortization	(16.3)	(7.6)
Net total	$ 73.5	$ 74.5

Contract-Based Physician Minimum Revenue Guarantees

The Company has committed to provide certain financial assistance pursuant to recruiting agreements, or "physician minimum revenue guarantees," with various physicians practicing in the communities it serves. In consideration for a physician relocating to one of its communities and agreeing to engage in private practice for the benefit of the respective community, the Company may advance certain amounts of money to a physician to assist in establishing his or her practice.

The Company accounts for its physician minimum revenue guarantees in accordance with the provisions of ASC 460, "Guarantees" ("ASC 460"). In accordance with ASC 460, the Company records a contract-based intangible asset and a related guarantee liability for new physician minimum revenue guarantees. The contract-based intangible asset is amortized as a component of other operating expenses, in the accompanying consolidated statements of operations, over the period of the physician contract, which typically ranges from four to five years. As of December 31, 2019 and 2018, the Company's liability for contract-based physician minimum revenue guarantees was $9.3 million and $12.6 million, respectively. These amounts are included as a current liability under the caption "Other current liabilities" in the Company's accompanying consolidated balance sheets.

Other Amortizable Intangible Assets

The Company has entered into non-competition agreements with certain physicians and other individuals which are amortized on a straight-line basis over the term of the agreements. Additionally, in connection with the LifePoint/RCCH Merger, the Company recognized favorable leasehold interest intangible assets related to certain real property leases. The favorable leasehold interest represents the asset in excess of the approximate fair market value of the lease liabilities assumed as of the date of the LifePoint/RCCH Merger, which are amortized through rent expense on a straight-line basis over the remaining life of the leases.

Certificates of Need and Certificates of Need Exemptions

The construction of new facilities, the acquisition or expansion of existing facilities and the addition of new services and certain equipment at the Company's facilities may be subject to state laws that require prior approval by state regulatory agencies. These certificate of need laws generally require that a state agency determine the public need and give approval prior to the construction or acquisition of facilities or the addition of new services. The Company has acquired facilities in certain states that have adopted certificate of need laws. The Company has determined that these intangible assets have an indefinite useful life.

Licenses, Provider Numbers, Accreditations and Other

To operate hospitals, the Company must obtain certain licenses, provider numbers and accreditations from federal, state and other accrediting agencies. The Company has acquired facilities in certain jurisdictions that require licenses, provider numbers and accreditations. The Company has determined that these intangible assets have an indefinite useful life.

Amortization Expense

Amortization expense for the Company's intangible assets during the years ended December 31, 2019, 2018 and 2017 was $14.1 million, $4.7 million and $3.6 million, respectively.

Total estimated amortization expense for the Company's intangible assets during the next five years are as follows (in millions):

2020	$	11.3
2021		7.8
2022		4.7
2023		2.1
2024		1.0
Thereafter		5.3
	$	32.2

Note 6. Income Taxes

The provision for (benefit from) income taxes for the years ended December 31, 2019, 2018 and 2017 consisted of the following (in millions):

	2019	2018	2017
Current:			
Federal	$ 67.5	$ -	$ -
State	8.2	1.3	0.4
	75.7	1.3	0.4
Deferred:			
Federal	(80.6)	(27.1)	37.7
State	(19.9)	(10.0)	(4.4)
	(100.5)	(37.1)	33.3
Change in valuation allowance	102.7	36.0	(35.0)
Total	$ 77.9	$ 0.2	$ (1.3)

The Tax Cuts and Jobs Act (the "Tax Act") was signed into law on December 22, 2017. The Tax Act significantly revised the U.S. corporate income tax laws. The Company is most notably impacted by the reduction of the U.S. corporate tax rate from 35% to 21% for tax years after December 31, 2017 and limiting certain deductions such as interest expense and net operating loss carryforwards. The Tax Act also enhanced and extended through 2026 the option to claim accelerated depreciation deductions on qualified property. Due to the timing of the enactment and the complexity involved with applying the provisions of the Tax Act, the Company had not completed its determination of the accounting implications of the Tax Act on its income tax accruals for the year ended December 31, 2017. However, the Company reasonably estimated the effects of the Tax Act on its existing deferred tax assets and liabilities and recognized a provisional expense for income taxes of $57.7 million for the year ended December 31, 2017. The Company completed its analysis during the year ended December 31, 2018 and determined that no additional adjustment was needed to the $57.7 million provisional expense recorded for the year ended December 31, 2017.

The following table reconciles the differences between the statutory federal income tax rate to the Company's effective tax rate on net income (loss) before income taxes and including net income attributable to noncontrolling interests and redeemable noncontrolling interests for the years ended December 31, 2019, 2018 and 2017 (in millions):

	2019	2018	2017
Federal statutory rate	21.0 %	21.0 %	35.0 %
State income taxes, net of federal income tax benefits	(26.3)	2.2	23.2
Change in valuation allowance	171.0	(12.5)	99.6
Provisional expense resulting from the Tax Act	-	-	(146.6)
Tax effect of impairments of goodwill	1.8	(2.3)	(12.5)
Noncontrolling interests and redeemable noncontrolling interests	(7.4)	0.4	6.4
Nondeductible acquisition costs	(25.4)	(6.6)	-
Nondeductible merger-related compensation costs	1.2	(1.6)	-
Other nondeductible expenses and other items	7.1	(0.7)	(1.9)
Effective income tax rate	143.0 %	(0.1) %	3.2 %

Deferred income taxes result from temporary differences in the recognition of assets, liabilities, revenues and expenses for financial accounting and tax purposes. Sources of these differences and the related tax effects were as follows as of December 31, 2019 and 2018 (in millions):

	2019	2018
Deferred income tax liabilities:		
Depreciation and amortization	$ (36.2)	$ (137.7)
Deferred loan costs	-	(0.4)
Tax deductible goodwill	(18.3)	(11.2)
Debt discount	-	(0.1)
Equity investments	-	(32.6)
Other	(6.3)	(4.0)
Total deferred income tax liabilities	(60.8)	(186.0)
Deferred income tax assets:		
Provision for doubtful accounts	48.1	72.4
Employee compensation	45.9	50.5
Acquisition and start-up costs	15.6	10.2
Net operating loss carryforwards	220.6	195.8
Insurance reserves	67.5	64.4
Prepaid rent	16.4	18.5
Section 163(j) interest expense carryforward	81.8	31.7
Investments in partnerships	27.1	-
Other	27.1	12.9
Total deferred income tax assets	550.1	456.4
Valuation allowance	(495.5)	(274.4)
Net deferred income tax assets	54.6	182.0
Deferred income taxes	$ (6.2)	$ (4.0)

Noncurrent deferred income tax liabilities totaled $6.2 million and $4.0 million at December 31, 2019 and 2018, respectively. As of December 31, 2019, the Company had federal net operating loss carryforwards of $388.7 million and state and local net operating loss carryforwards of approximately $2.9 billion. As of December 31, 2018, the Company had federal net operating loss carryforwards of $342.4 million and state and local net operating loss carryforwards of approximately $2.5 billion. The federal net operating loss carryforwards generated prior to 2018 expire between 2028 and 2037. The federal net operating loss carryforwards generated in 2018 and forward have an indefinite carryforward period. The state net operating loss carryforwards will expire between 2020 and 2038. The Company has established a valuation allowance for deferred tax assets at December 31, 2019 and 2018, due to the uncertainty of realizing these assets in the future. The valuation allowance increased $221.1 million during 2019, of which $117.0 million was a result of the finalization of the purchase price allocations for the LifePoint/RCCH Merger. The valuation allowance increased $140.3 million during 2018, of which $103.2 million of the increase was a result of the LifePoint/RCCH Merger.

No federal income tax payments were made during the years ended December 31, 2019, 2018 or 2017. Net refunds of Federal income taxes paid by Legacy LifePoint for tax years ended December 31, 2017 and November 16, 2018 in the amount of $59.5 million and $54.1 million were received during the years ended December 31, 2019 and 2018. The tax year 2017 refund resulted from an automatic accounting method change, for tax purposes, relating to income recognition made by Legacy LifePoint. The November 16, 2018 tax year-end refund resulted from estimated tax payments made by Legacy LifePoint prior to the announced LifePoint/RCCH Merger that were not needed due to the taxable loss generated for the year. Net state and local income tax payments in the amount of $1.0 million, $0.4 million, and $0.8 million were made during the years ended December 31, 2019, 2018 and 2017, respectively.

The Company's policy is to accrue interest and penalties related to potential underpayment of income taxes within the provision for income taxes. Interest is computed on the difference between the Company's uncertain tax benefit positions and the amount deducted or expected to be deducted in our income tax returns.

The Company files a consolidated U.S. federal income tax return, as well as income tax returns in various state jurisdictions. All of the Company's tax years are subject to examination by the Internal Revenue Service and various state taxing authorities.

Note 7. Other Current Liabilities

The following table provides information regarding the Company's other current liabilities, which are included in the accompanying consolidated balance sheets at December 31, 2019 and 2018 (in millions):

	2019	2018
Accrued interest	$ 49.6	$ 68.9
Current portion of self-insurance reserves	64.5	70.7
Self-insured medical benefits liabilities	53.8	46.1
Income taxes payable	71.8	-
Accrued property taxes	18.6	19.1
Accrued expenses and other	187.7	217.4
	$ 446.0	$ 422.2

Note 8. Leases

The Company leases real estate property and equipment under cancelable and non-cancelable leases. The leases expire at various times and have various renewal options. Certain leases that meet the lease capitalization criteria in accordance with ASC 840 have been recorded as an asset and liability at the lower of the net present value of the minimum lease payments at the inception of the lease or the fair value of the asset at the inception date. Interest rates used in computing the net present value of the lease payments are based on the Company's incremental borrowing rate at the inception of the lease. All of the lease agreements generally require the Company to pay maintenance, repairs, taxes and insurance costs. Rental expense of operating leases totaled $118.6 million, $57.3 million and $44.0 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Future minimum lease payments at December 31, 2019, for those leases having an initial or remaining noncancelable lease term in excess of one year, but excluding obligations that do not require eventual settlement in cash, are as follows for the years indicated (in millions):

	Operating Leases	Capital and Financing Leases	Total
2020	$ 46.4	$ 118.2	$ 164.6
2021	45.4	102.9	148.3
2022	33.5	180.7	214.2
2023	24.8	109.4	134.2
2024	18.8	109.4	128.2
Thereafter	82.7	2,443.2	2,525.9
	$ 251.6	$ 3,063.8	$ 3,315.4
Less: interest portion		(1,966.5)	
		$ 1,097.3	

Sale-Leaseback Transactions

The real estate associated with certain of the Company's facilities and its health support center are leased from various third party entities in connection with sale-leaseback transactions. Certain of these leasing arrangements contain various forms of continuing involvement and resultantly fail sale-leaseback accounting criteria in accordance with ASC 840. Those leases with continuing involvement are accounted for as financing transactions. Additionally, for certain properties which satisfied the sale-leaseback accounting criteria, the sales proceeds received were in excess of the fair value of the properties leased. Accordingly, financing obligations have been recorded for such excess. At December 31, 2019, the Company has recorded $1,135.0 million of total financing obligations, including current portions, associated with sale-leaseback transactions in its accompanying consolidated balance sheet.

Properties failed sale-leaseback criteria due to several reasons, including fully prepaid arrangements with government authorities, the ability to share in the appreciation rights of the property, involvement in an ongoing build to suit construction project financed by a third party and more than minor subleasing arrangements.

2019 Sale Leaseback Transaction

On November 4, 2019, certain subsidiaries of the Company (collectively, the "LifePoint Entities") entered into a Real Property Asset Purchase Agreement (the "Real Property APA") with certain subsidiaries of MPT. The sale-leaseback transaction (the "Sale Leaseback Transaction") was completed effective December 17, 2019. Pursuant to the Real Property APA, the LifePoint Entities sold the real estate of the following medical facilities (the "2019 Master Lease Facilities") to certain affiliates of MPT, and immediately thereafter certain LifePoint Entities and certain affiliates of MPT entered into an agreed upon Master Lease Agreement (the "2019 Master Lease") pursuant to which such LifePoint Entities now lease or sublease the land and the buildings associated with the 2019 Master Lease Facilities from certain affiliates of MPT:

- Conemaugh Memorial Medical Center located in Pennsylvania;
- Conemaugh Meyersdale Medical Center located in Pennsylvania;
- Conemaugh Miners Medical Center located in Pennsylvania;
- Nason Medical Center located in Pennsylvania;
- Ottumwa Regional Health Center located in Iowa;
- Palestine Regional Medical Center located in Texas;
- SageWest Health Care – Lander Campus located in Wyoming;
- SageWest Health Care – Riverton Campus located in Wyoming;
- Southwestern Medical Center (including the Southwestern Behavioral Health Center) located in Oklahoma; and
- Western Plains Medical Complex located in Kansas.

The 2019 Master Lease has an initial term of 20 years (the "Initial Term"). However, the LifePoint Entities who are parties to the 2019 Master Lease have the option to extend the Initial Term for two additional five-year periods.

In connection with the Sale Leaseback Transaction, the Company received an aggregate amount of sale proceeds of $700.0 million and incurred $18.1 million of transaction-related expenses, which is included under the caption "Merger, acquisition and other transaction-related expenses" for the year ended December 31, 2019.

The Company anticipates using the net proceeds to reinvest in the Company and its subsidiaries. To the extent not so reinvested, such net proceeds will be used to repay existing debt of the Company and its subsidiaries in accordance with the Company's debt agreements. Refer to Note 15 for further discussion of refinancing activities occurring subsequent to December 31, 2019.

Note 9. Investments

The Company accounts for its investments in entities in which the Company exhibits significant influence, but not control, under the equity method of accounting in accordance with ASC 323. The Company does not consolidate its equity method investments, but rather measures them at their initial costs and then subsequently adjusts their carrying values through income for their respective shares of the earnings or losses during the period. The Company's equity method investments totaled $274.3 million and $231.9 million at December 31, 2019 and 2018, respectively, and are included under the caption "Other long-term assets" in the accompanying consolidated balance sheets.

Note 10. Noncontrolling Interests and Redeemable Noncontrolling Interests

Noncontrolling Interests

Noncontrolling interests represent the portion of equity in a subsidiary not attributable, directly or indirectly, to a parent. The Company's accompanying consolidated financial statements include all assets, liabilities, revenues and expenses at their consolidated amounts, which include the amounts attributable to the Company and the noncontrolling interest. The Company recognizes as a separate component of equity and earnings on the portion of income or loss attributable to noncontrolling interests based on the portion of the entity not owned by the Company.

The following table presents the changes in the Company's noncontrolling interests during the years ended December 31, 2019 and 2018 (in millions):

Balance at January 1, 2018	$ -
Noncontrolling interests assumed in the LifePoint/RCCH Merger	29.9
Net income attributable to noncontrolling interests	0.2
Distributions	(0.2)
Balance at December 31, 2018	29.9
Finalization of purchase price allocations for the LifePoint/RCCH Merger	(0.2)
Net income attributable to noncontrolling interests	4.4
Distributions	(8.2)
Balance at December 31, 2019	$ 25.9

Redeemable Noncontrolling Interests

Certain of the Company's noncontrolling interests include redemption features that cause these interests not to meet the requirements for classification as equity in accordance with ASC 480-10-S99-3, "Distinguishing Liabilities from Equity." Redemption features related to these interests could require the Company to deliver cash, if exercised. Accordingly, these redeemable noncontrolling interests are classified in the mezzanine section of the Company's accompanying consolidated balance sheets under the caption "Redeemable noncontrolling interests." Changes in the fair value of the Company's redeemable noncontrolling interests are recognized as adjustments to consolidated stockholders' equity.

The following table presents the changes in the Company's redeemable noncontrolling interests during the years ended December 31, 2019 and 2018 (in millions):

Balance at January 1, 2018	$ 60.7
Redeemable noncontrolling interests assumed in the LifePoint/RCCH Merger	75.7
Net income attributable to redeemable noncontrolling interests	5.5
Distributions, net of proceeds	(5.8)
Balance at December 31, 2018	136.1
Finalization of purchase price allocations for the LifePoint/RCCH Merger	(4.6)
Net income attributable to redeemable noncontrolling interests	14.9
Fair value adjustments	11.2
Distributions and repurchases	(9.8)
Balance at December 31, 2019	$ 147.8

Note 11. Fair Value of Financial Instruments

Fair Value Hierarchy

Fair value is a market-based measurement, not an entity-specific measurement. Therefore, a fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. As a basis for considering market participant assumptions in fair value measurements, the Company utilizes the fair value hierarchy pursuant to ASC 820, "Fair Value Measurements and Disclosures" ("ASC 820") that distinguishes between market participant assumptions based on market data obtained from sources independent of the reporting entity (observable inputs that are classified within Levels 1 and 2 of the hierarchy) and the reporting entity's own assumption about market participant assumptions (unobservable inputs classified within Level 3 of the hierarchy).

The inputs used to measure fair value are classified into the following fair value hierarchy:

Level 1: Quoted market prices in active markets for identical assets or liabilities.
Level 2: Observable market-based inputs or unobservable inputs that are corroborated by market data.
Level 3: Unobservable inputs that are supported by little or no market activity and are significant to the fair value of the assets or liabilities. Level 3 includes values determined using pricing models, discounted cash flow methodologies, or similar techniques reflecting the Company's own assumptions.

In instances where the determination of the fair value hierarchy measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment of factors specific to the asset or liability.

Cash and Cash Equivalents, Accounts Receivable, Accounts Payable and Other Current Liabilities

The carrying amounts reported in the accompanying consolidated balance sheets for cash and cash equivalents, accounts receivable, accounts payable and other current liabilities approximate fair value because of the short-term nature of these instruments.

Long-Term Debt

The carrying amounts and fair values of the Company's ABL Facility, Term Loan Facility, 9.75% Unsecured Notes, 8.25% Secured Notes and 11.5% Unsecured Notes, excluding unamortized debt issuance costs, as of December 31, 2019 and December 31, 2018 were as follows (in millions):

	Carrying Amount		Fair Value	
	December 31, 2019	December 31, 2018	December 31, 2019	December 31, 2018
ABL Facility	$ -	$ 20.0	$ -	$ 20.0
Term Loan Facility	$ 3,523.4	$ 3,550.0	$ 3,549.8	$ 3,487.9
9.75% Unsecured Notes	$ 1,425.0	$ 1,425.0	$ 1,610.3	$ 1,353.8
8.25% Secured Notes	$ 800.0	$ 800.0	$ 849.0	$ 808.0
11.5% Unsecured Notes	$ 350.0	$ 350.0	$ 376.3	$ 359.6

The fair values of the Company's long-term debt instruments were estimated based on the average bid and ask price as determined using published rates and categorized as Level 2 within the fair value hierarchy in accordance with ASC 820.

Interest Rate Swap

The Company measures its Interest Rate Swap at fair value on a recurring basis. The fair value of the Company's Interest Rate Swap is based on quotes from its counterparty. The Company considers those inputs to be Level 2 in the fair value hierarchy. At December 31, 2019 and 2018, the fair value of the Company's Interest Rate Swap was a total liability of $24.6 million and $5.8 million, respectively, of which $10.7 million and $0.7 million, respectively, is included under the caption "Other current liabilities" and $13.9 million and $5.1 million, respectively, is included under the caption "Other long-term liabilities" in the Company's accompanying consolidated balance sheets.

The Company has not designated its Interest Rate Swap as a cash flow hedge in accordance with ASC 815, "Derivatives and Hedging." Accordingly, all changes in the fair value of the Company's Interest Rate Swap are recognized through interest expense in its statement of operations. For the years ended December 31, 2019 and 2018, the Company recognized additional interest expense of $18.8 million and $5.8 million, respectively, related to changes in the fair value of its Interest Rate Swap.

Changes in the fair value of the Company's Interest Rate Swap could result in a material effect on its consolidated results of operations and financial position; however, the Company does not anticipate that changes in the fair value of its Interest Rate Swap will have any impact on its cash flows. The counterparty to the Interest Rate Swap exposes the Company to credit risk in the event of nonperformance. However, the Company does not anticipate nonperformance by its counterparty. The Company does not hold or issue derivative financial instruments for trading purposes.

Financial Liabilities

The Company has a contingent consideration liability payable to the former owners of Canyon Vista that represents the Level 3 estimated fair value of the contingent consideration using unobservable inputs and assumptions available to the Company. The liability for Canyon Vista is recorded at an estimated fair value of approximately $13.6 million at both December 31, 2019 and 2018. The key assumptions used in estimating the fair value of the Canyon Vista liability are the range of probabilities that the payments will be earned by the seller and a discount rate adjusted for the Company's credit risk.

Note 12. Employee Benefit Plans

Defined Benefit Pension Plans

In connection with the LifePoint/RCCH Merger, the Company acquired certain assets and assumed certain liabilities associated with two separate defined benefit pension plans (i) associated with certain employees of Marquette General Hospital covered by a collective bargaining agreement (the "Marquette Pension Plan") and (ii) associated with certain non-union employees of Bell Hospital (the "Bell Pension Plan" and, collectively with the Marquette Pension Plan, the "Pension Plans"). Both Pension Plans are closed to new participants. Participants in the Marquette Pension Plan are required to make annual contributions totaling 6% of annual compensation to the Marquette Pension Plan to continue accruing benefits. Participants in the Bell Pension Plan no longer accrue benefits. The Company makes contributions to the Pension Plans sufficient to meet its minimum funding requirements as prescribed by the Employee Retirement Income Security Act of 1974, as amended.

Status and Expense

The following table presents the changes in the benefit obligations and plan assets of the Pension Plans during the years ended December 31, 2019 and 2018 and the unfunded liability of the Pension Plans at December 31, 2019 and 2018 (in millions):

	2019	2018
Change in benefit obligation:		
Benefit obligation at beginning of year	$ 58.6	$ -
Benefit obligations assumed in the LifePoint/RCCH Merger	-	56.5
Service costs	0.5	0.1
Interest costs	2.4	0.3
Participant contributions	0.3	0.1
Actuarial loss	10.2	1.8
Benefits paid	(1.9)	(0.2)
Benefit obligation at end of year	70.1	58.6
Change in plan assets:		
Fair value of plan assets at beginning of year	38.5	-
Plan assets acquired in the LifePoint/RCCH Merger	-	39.6
Actual return on plan assets	8.1	(1.0)
Employer contributions	2.1	-
Participant contributions	0.3	0.1
Benefits and expenses paid	(1.9)	(0.2)
Fair value of plan assets at end of year	47.1	38.5
Unfunded liability included in other long-term liabilities in the Company's accompanying consolidated balance sheet	$ 23.0	$ 20.1

The Company recognizes changes in the funded status of the Pension Plans as a direct increase or decrease to stockholders' equity through accumulated other comprehensive income (loss). For the years ended December 31, 2019 and 2018, the Company recognized comprehensive losses of $4.4 million and $3.1 million, respectively, as decreases in stockholders' equity through accumulated other comprehensive loss. The adjustments were primarily related to changes in the Company's unfunded pension liability due to changes in the discount rates and mortality assumptions used to measure the projected benefit obligation.

The following table summarizes the projected benefit obligation, accumulated benefit obligation and fair value of plan assets related to the Pension Plans as of December 31, 2019 and 2018 (in millions):

	2019	2018
Projected benefit obligation	$ 70.1	$ 58.6
Accumulated benefit obligation	$ 65.4	$ 54.9
Fair value of plan assets	$ 47.1	$ 38.5

The following table summarizes the weighted-average assumptions used by the Company to determine its benefit obligation as of December 31, 2019 and 2018 (in millions):

	2019	2018
Discount rate	3.1 %	4.1 %
Rate of compensation increases, when applicable	3.0 %	3.0 %

The following table summarizes the components of net periodic costs for the years ended December 31, 2019 and 2018 (in millions):

	2019	2018
Service cost	$ 0.5	$ 0.1
Interest cost	2.4	0.3
Expected return on plan assets	(2.2)	(0.3)
Total net periodic benefit cost	$ 0.7	$ 0.1

The following table summarizes the weighted-average assumptions used by the Company to determine its net periodic benefit costs during the years ended December 31, 2019 and 2018 (in millions):

	2019	2018
Discount rate	4.1 %	4.2 %
Rate of compensation increases, when applicable	3.0 %	3.0 %
Expected long-term return on plan assets	5.7 %	5.8 %

Plan Assets

The investment policy for the Pension Plans has been formulated to achieve a risk adjusted return that balances the need for asset growth against the risk of significant fluctuations in asset prices and the need for significant contributions from the Company. On a quarterly basis, or more frequently as necessary, the current risk levels, asset performance and expected return on assets are reviewed and evaluated against goals and targets by a committee appointed to oversee investment of the Pension Plans' assets (the "Investment Committee"). The Investment Committee strives to maintain a balance between risk and return through the use of modern portfolio theory methods, in conjunction with Monte Carlo modeling to evaluate the behavior of the portfolio under different scenarios. At December 31, 2019, the Pension Plans' investments include a balance of mutual funds and money market funds in order to achieve an overall rate of return that minimizes the need for additional employer contributions. The Company measures the fair value of its Pension Plans' assets in accordance with ASC 820.

The Pension Plans' investments in mutual funds are valued at the net asset value ("NAV") of shares reported in the active market in which the funds are traded. Because quoted prices are available for mutual funds and the markets in which they are traded are generally considered active, the Company has classified each of them as a Level 1 investment. The Pension Plans' investments in money market funds are valued at quoted prices in markets that are not active by a combination of inputs, including but not limited to dealer quotes who are market makers in the underlying funds and other directly and indirectly observable inputs. Because the inputs used to value money market funds are either directly or indirectly observable, but are not quoted prices in active markets, the Company has classified these assets as Level 2 investments.

The following table summarizes the assets of the Pension Plans, measured at fair value as of December 31, 2019 and 2018, by major asset category and aggregated by level within the fair value hierarchy (in millions):

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
December 31, 2019:				
Mutual funds	$ 44.5	$ 44.5	$ -	$ -
Money market funds	2.6	-	2.6	-
Total	$ 47.1	$ 44.5	$ 2.6	$ -
December 31, 2018:				
Mutual funds	$ 34.6	$ 34.6	$ -	$ -
Money market funds	3.9	-	3.9	-
Total	$ 38.5	$ 34.6	$ 3.9	$ -

The Company expects to contribute approximately $2.9 million to the Pension Plans during the year ended December 31, 2020. Additionally, the Company expects to make future benefit payments from the Pension Plans as follows for the years indicated (in millions):

2020	2.3
2021	2.5
2022	2.7
2023	2.9
2024	3.1
Five years thereafter	17.5
	$ 31.0

Multiemployer Pension Plan

In connection with the LifePoint/RCCH Merger, the Company assumed the obligation to contribute to a multiemployer pension plan on behalf of certain employees covered by collective bargaining agreements, in accordance with the terms of such collective bargaining agreements. The Company's contributions to the multiemployer pension plan are determined based on the terms of the applicable collective bargaining agreements. Multiemployer plans are different from single-employer plans because assets contributed to the multiemployer plan by one employer may be used to provide benefits to employees of other participating employers. Also, if a participating employer stops contributing to the plan, the unfunded obligations of the plan may be borne by the remaining participating employers. If the Company stops participating in the multiemployer plan, the Company may be required to pay a withdrawal liability based on its portion of the unfunded status of the plan. Currently, the Company does not anticipate ending its participation in this plan.

Defined Contribution Plans

The Company maintains three separate defined contribution retirement plans covering a majority of the Company's employees, including Legacy LifePoint employees, RCCH employees and employees at Community Medical Center. These defined contribution plans contain discretionary matching contribution formulas and definite non-elective contribution formulas for employees at certain facilities. Effective as of the end of the day on December 31, 2019, the plan covering RCCH employees was merged into the plan covering Legacy LifePoint employees. The Company's expense related to its defined contribution plans was $31.2 million, $5.6 million and $3.1 million for the years ended December 31, 2019, 2018 and 2017, respectively.

Deferred Compensation Plans

The Company maintains three separate supplemental deferred compensation plans with respect to certain of its employees and affiliated physicians. As of December 31, 2019 and 2018, the assets associated with these deferred compensation plans were $39.6 million and $34.5 million, respectively, and the liabilities were $48.1 million and $41.3 million, respectively. These amounts are included under the captions "Other long-term assets" and "Other long-term liabilities", respectively, on the accompanying consolidated balance sheets at December 31, 2019 and 2018.

Note 13. Stock-Based Compensation

DSB Parent is authorized to issue Units to employees, executives, consultants and directors of the Company, under the DSB Parent Partnership Agreement. The Company has determined that the Units are a substantive class of members' equity for accounting purposes because the Units are legal equity of DSB Parent, they have participation features, including distribution and liquidation rights which allow them to participate in the residual returns of the DSB Parent and vested interests are retained upon termination. As a result, these awards are accounted for under ASC 718.

There are 35,270,000 aggregate number of Units authorized for issuance. Service Units and Performance Units have been issued under the DSB Parent Partnership Agreement and forms of award agreements.

Service Units

Service Units have been granted to certain members of the board of directors and Tranche A Units to certain employees, executives and consultants. Units that have been granted to members of the board of directors vest on a time-basis only, either in three equal installments on each of the first three anniversaries of the grant date or on the date that is the earliest of (i) six months and one day following November 16, 2018 or (ii) the date of the applicable director's termination of service due to death, disability or as a result of the director's removal from the board of directors other than for cause. Tranche A Units granted to certain employees, executives and consultants vest in equal installments on the last day of each of the first twenty calendar quarters that commence on or after the grant date or, in some cases, November 16, 2018. Service Units will automatically vest upon the sale of the Company. In the event of an initial public offering, all unvested Service Units will remain outstanding and continue to vest based on the stated vesting pattern. Unvested Service Units are forfeited upon a holder's termination of service.

Service Units are accounted for as equity awards and related compensation expense is recognized ratably over the vesting period. For employees and executives granted Service Units prior to November 16, 2018 who are severed during the 18-month period following the LifePoint/RCCH Merger under certain circumstances, Tranche A Units vest in full upon the eligible employee's termination date. On November 16, 2018, Service Units originally issued to approximately 40 employees and executives were modified in connection with the LifePoint/RCCH Merger. The Company calculated the fair value of the service units before and after the modification and recorded expense of $2.4 million and $2.7 million for the years ended December 31, 2019 and 2018, respectively, related to the modification and acceleration of service units. As of December 31, 2019, Service Units had unrecognized compensation expense of $8.0 million. The expense is expected to be recognized over a weighted-average period of 2.0 years from December 31, 2019.

Performance Units

Performance Units, which have been granted as Tranche B Units and Tranche C Units, will vest based upon equity holders of DSB Parent realizing certain targeted multiples of invested capital ("MOIC thresholds"). Performance Units are accounted for as equity awards with expense recognition occurring upon the realization of the stated MOIC thresholds due to a liquidity event. For employees and executives granted Performance Units prior to November 16, 2018 who were severed in connection with the LifePoint/RCCH Merger, Tranche B units vest in full upon the eligible employee's termination date and Tranche C units are forfeited in accordance with the original terms and conditions of the applicable Profits Units award agreement. On November 16, 2018, Tranche B Units previously issued to approximately 40 employees and executives were modified in connection with the LifePoint/RCCH Merger. The Company calculated the fair value of the Tranche B Units before and after the modification and recorded expense of $2.7 million and $3.6 million for the years ended December 31, 2019 and 2018, respectively, related to the modification and acceleration of Tranche B Units. For Performance Units not modified in connection with the LifePoint/RCCH Merger, the Company determined that a liquidity event was not probable, therefore no compensation expense has been recognized related to the unmodified Performance Units. Performance Units had unrecognized compensation expense of $2.4 million as of December 31, 2019. Unvested Units that do not vest on termination are forfeited upon such termination, subject to certain conditions.

The following table summarizes the Company's total stock-based compensation expense for the years ended December 31, 2019, 2018 and 2017 (in millions):

	2019	2018	2017
Service Units	$ 3.5	$ 3.4	$ 0.7
Performance Units	1.3	3.6	-
	4.8	7.0	0.7
Modification expense for awards classified as a liability	2.8	-	-
Total stock-based compensation expense	$ 7.6	$ 7.0	$ 0.7

Valuation Assumptions

The fair value of all Units was determined using a Monte Carlo simulation framework. The following table shows the weighted average assumptions used by the Company to develop the fair value estimates and the resulting estimates of weighted-average fair value per Unit granted during the years ended December 31, 2019, 2018 and 2017:

	2019	2018	2017
Common equity value of the Company (in millions)	$ 1,671.9	$ 624.1	$ 513.8
Expected volatility	38.0 %	24.0 %	27.5 %
Risk-free interest rate	2.90 %	1.60 %	1.10 %
Expected dividends	-	-	-
Average expected term (years)	5.0	3.2	4.1

Units Activity

The following represents the activity of the Units for the years ended December 31, 2019, 2018 and 2017:

	Service Units		Performance Units			
	Tranche A and Units to the Board	Weighted Average Grant Date Fair Value per Unit	Tranche B	Weighted Average Grant Date Fair Value per Unit	Tranche C	Weighted Average Grant Date Fair Value per Unit
Unvested at January 1, 2017	4,522,133	$ 0.69	4,893,569	$ 0.41	2,446,785	$ 0.30
Granted	548,200	0.93	548,200	0.47	274,100	0.28
Vested	(1,104,234)	0.64	-	-	-	-
Forfeited	(165,070)	0.84	(179,600)	0.44	(89,800)	0.28
Unvested at December 31, 2017	3,801,029	0.71	5,262,169	0.41	2,631,085	0.30
Granted	1,229,200	1.43	1,229,200	0.68	614,600	0.37
Vested	(2,054,331)	0.82	(1,636,959)	0.46	-	-
Forfeited	(266,140)	0.70	(379,400)	0.41	(1,008,180)	0.31
Unvested at December 31, 2018	2,709,758	0.97	4,475,010	0.47	2,237,505	0.31
Granted	6,996,576	1.23	6,868,920	0.80	3,884,460	0.63
Vested	(2,893,910)	1.07	(891,400)	0.54	-	-
Forfeited	(85,044)	1.18	(136,640)	0.60	(514,020)	0.38
Unvested at December 31, 2019	6,727,380	$ 1.19	10,315,890	$ 0.68	5,607,945	$ 0.53

During the year ended December 31, 2019, there were no convertible or expired Units.

Note 14. Commitments and Contingencies

Capital Expenditure Commitments

The Company is reconfiguring some of its facilities to more effectively accommodate patient services and to provide for a greater variety of services. The Company has incurred approximately $148.6 million in costs related to uncompleted projects as of December 31, 2019, which is included under the caption "Construction in progress" in the Company's accompanying consolidated balance sheet. At December 31, 2019, these uncompleted projects had an estimated cost to complete of approximately $91.5 million. The estimated timeframe for completion of these projects generally ranges from less than one year up to two years. Additionally, the Company is subject to annual capital expenditure commitments in connection with several of its facilities. At December 31, 2019, the Company estimated its total remaining capital expenditure commitments to be approximately $1,523.1 million, which generally have remaining terms of one to six years. Of this amount, more than one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time.

Legal Proceedings and General Liability Claims

Healthcare facilities, including the Company and its facilities, are, from time to time, subject to claims and suits arising in the ordinary course of business, including claims for damages for personal injuries, medical malpractice, breach of contracts, wrongful restriction of or interference with physicians' staff privileges and employment related claims. In certain of these actions, plaintiffs request payment for damages, including punitive damages that may not be covered by insurance.

In addition, the Company is subject to the regulation and oversight of various state and federal governmental agencies. Further, under the False Claims Act, private parties have the right to bring qui tam, or "whistleblower," suits against healthcare facilities that submit false claims for payments to, or improperly retain identified overpayments from, governmental payers. Some states have adopted similar state whistleblower and false claims provisions. These qui tam or "whistleblower" actions initiated under the civil False Claims Act may be pending but placed under seal by the court to comply with the False Claims Act's requirements for filing such suits. As a result, they could be proceeding without the Company's knowledge. If a provider is found to be liable under the False Claims Act, the provider may be required to pay up to three times the actual damages sustained by the government plus substantial civil monetary penalties that are subject to annual adjustment for inflation for each separate false claim.

Although the healthcare industry has seen numerous ongoing investigations related to compliance and billing practices, hospitals, in particular, continue to be a primary enforcement target for the Office of Inspector General ("OIG"), the Department of Justice ("DOJ") and other governmental agencies and fraud and abuse programs. Certain of the Company's individual facilities have received, and from time to time, other facilities may receive, inquiries or subpoenas from Medicare Administrative Contractors, and federal and state agencies. Any proceedings against the Company may involve potentially substantial amounts as well as the possibility of civil, criminal, or administrative fines, penalties, or other sanctions, which could be material. Settlements of suits involving Medicare and Medicaid issues routinely require both monetary payments as well as corporate integrity agreements. Depending on whether the underlying conduct in these or future inquiries or investigations could be considered systemic, their resolution could have a material adverse effect on the Company's financial position, results of operations and liquidity.

The Company does not control and cannot predict with certainty the progress or final outcome of discussions with government agencies, investigations and legal proceedings against the Company. Therefore, the final amounts paid to resolve such matters, claims and obligations could be material and could materially differ from amounts currently recorded, if any. Any such changes in the Company's estimates or any adverse judgments could materially adversely impact the Company's future results of operations and cash flows.

The Company accrues an estimate for a contingent liability when losses are both probable and reasonably estimable. The Company reviews its accruals each quarter and adjusts them to reflect the impact of developments, advice of legal counsel and other information pertaining to a particular matter.

Note 15. Subsequent Events

In accordance with the provisions of ASC 855, "Subsequent Events," the Company evaluated all material events subsequent to the balance sheet date through March 12, 2020, the date of issuance, for events requiring disclosure or recognition in the Company's consolidated financial statements. There were no subsequent events requiring disclosure or recognition in the Company's consolidated financial statements other than those noted below or included elsewhere in this Report.

Repricing of Term Loan Facility and Repayment of a Portion of Term Loan Facility

On January 21, 2020, the Company amended its Term Loan Facility to, among other things, reduce the applicable interest rate margin for the term loans by 0.75% to 3.75% with respect to London Interbank Offered Rate ("LIBOR")-based loans and 2.75% with respect to base rate loans.

On January 23, 2020, the Company made a mandatory prepayment of $400.0 million of term loans outstanding under the Term Loan Facility with a portion of the net proceeds from the Sale Leaseback Transaction. After giving effect to the mandatory prepayment, the Company had prepaid all remaining quarterly amortization payments in respect of the Term Loan Facility.

Tender Offer, Redemption and Discharge of 8.25% Secured Notes and 11.5% Unsecured Notes

On February 7, 2020, the Company commenced a tender offer and consent solicitation (the "tender offer") to purchase any and all of its outstanding (i) 8.25% Secured Notes issued pursuant to the indenture, dated as of April 29, 2016, among the Company, the guarantors party thereto and Wilmington Trust, National Association, as trustee (as amended, supplemented or otherwise modified, the "8.25% Secured Notes Indenture") and (ii) 11.5% Unsecured Notes issued pursuant to the indenture, dated as of April 29, 2016, among the Company, the guarantors party thereto and Wilmington Trust, National Association, as trustee (as amended, supplemented or otherwise modified, the "11.5% Unsecured Notes Indenture"). The early tender deadline for the tender offer was February 21, 2020 and the expiration date for the tender offer was March 6, 2020.

Upon expiration of the early tender deadline, on February 24, 2020, the Company accepted and purchased (i) $622.5 million of the aggregate principal amount of the 8.25% Secured Notes that were validly tendered for total consideration of $1,052.50 per $1,000 principal amount, plus accrued and unpaid interest thereon, and (ii) $84.1 million of the aggregate principal amount of the 11.5% Unsecured Notes that were validly tendered for a total consideration of $1,072.50 per $1,000 principal amount, plus accrued and unpaid interest thereon. Following the expiration of the tender offer, on March 9, 2020, the Company accepted and purchased an additional $0.2 million of the aggregate principal amount of the 8.25% Secured Notes that were validly tendered after the early tender deadline for a tender consideration of $1,022.50 per $1,000 principal amount, plus accrued and unpaid interest thereon. No additional 11.5% Unsecured Notes were tendered after the early tender deadline.

On March 9, 2020, (i) pursuant to the 8.25% Secured Notes Indenture, the Company provided notice to the holders that it had elected to redeem any and all of the 8.25% Secured Notes that remain outstanding after giving effect to the tender offer at a redemption price of 104.125%, plus accrued and unpaid interest thereon, on May 1, 2020 (the "8.25% Notes Redemption") and (ii) pursuant to the 11.5% Unsecured Notes Indenture, the Company provided notice to the holders that it had elected to redeem any and all of the 11.5% Unsecured Notes that remain outstanding after giving effect to the tender offer at a redemption price of 105.750%, plus accrued and unpaid interest thereon, on May 1, 2020 (the "11.5% Notes Redemption"). Concurrently with the delivery of the notices of redemption, on March 9, 2020, the Company (i) irrevocably deposited with the trustee for the 8.25% Secured Notes approximately $191.9 million, which is the amount sufficient to fund the 8.25% Notes Redemption and to satisfy and discharge the Company's obligations under the 8.25% Secured Notes and the 8.25% Secured Notes Indenture, and (ii) irrevocably deposited with the trustee for the 11.5% Unsecured Notes approximately $296.5 million, which is the amount sufficient to fund the 11.5% Notes Redemption and to satisfy and discharge the Company's obligations under the 11.5% Unsecured Notes and the 11.5% Unsecured Notes Indenture.

Offering of 4.375% Secured Notes

On February 13, 2020, the Company completed the offering of $600.0 million in aggregate principal amount of its 4.375% Senior Secured Notes due 2027 (the "4.375% Secured Notes"). The 4.375% Secured Notes were offered and sold to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933, as amended (the "Securities Act"), to persons outside of the United States in compliance with Regulation S under the Securities Act and to certain accredited investors as defined under Regulation D under the Securities Act. The 4.375% Secured Notes have not been, and are not required to be, registered under the Securities Act or any state securities laws and may not be offered or sold in the United States absent an effective registration statement or an applicable exemption from registration requirements or a transaction not subject to the registration requirements of the Securities Act or any state securities laws. The 4.375% Secured Notes were issued pursuant to the Indenture, dated as of February 13, 2020 (the "4.375% Secured Notes Indenture") among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee and notes collateral agent.

The net proceeds from the offering, together with the net proceeds from the Incremental Term Loan and cash on hand, was used to fund the settlement of the tender offer, the 8.25% Notes Redemption and the 11.5% Notes Redemption and to pay certain fees in connection with the refinancing transactions described herein.

The 4.375% Secured Notes are fully and unconditionally guaranteed by each of the Company's wholly-owned domestic restricted subsidiaries that guarantee the Company's Term Loan Facility. The 4.375% Secured Notes and the related guarantees are secured obligations of the Company and each subsidiary guarantor. The 4.375% Secured Notes and related guarantees are secured by, subject to permitted liens, (i) first-priority security interests in the Company's Non-ABL Priority Collateral and (ii) second-priority security interests in the Company's ABL Priority collateral.

The 4.375% Secured Notes will mature on February 15, 2027. Interest on the 4.375% Secured Notes will accrue at 4.375% per annum and will be paid semi-annually, in arrears, on February 15 and August 15 of each year, beginning August 15, 2020.

On or after February 15, 2022, the Company may redeem the 4.375% Secured Notes at its option, in whole at any time or in part from time to time, at the redemption prices set forth in the 4.375% Secured Notes Indenture. In addition, prior to February 15, 2022, the Company may redeem the 4.375% Secured Notes at its option, in whole at any time or in part from time to time, at a redemption price equal to 100% of the principal amount of the 4.375% Secured Notes redeemed, plus a "make-whole" premium and accrued and unpaid interest, if any. Prior to February 15, 2022, the Company may also redeem up to 40% of the original aggregate principal amount of the 4.375% Secured Notes (calculated after giving effect to any issuance of additional notes) in an aggregate amount not to exceed the amount of net cash proceeds of one or more equity offerings at a redemption price equal to 104.375%, plus accrued and unpaid interest, if any, so long as at least 50% of the original aggregate principal amount of the 4.375% Secured Notes (calculated after giving effect to any issuance of additional notes) must remain outstanding after each such redemption.

The 4.375% Secured Notes Indenture, among other things, limits the Company's ability and the ability of its restricted subsidiaries to, among other things: (i) incur or guarantee additional indebtedness; (ii) pay dividends or distributions on, or redeem or repurchase, capital stock and make other restricted payments; (iii) make certain investments; (iv) consummate certain asset sales; (v) engage in certain transactions with affiliates; (vi) grant or assume certain liens; and (vii) consolidate, merge or transfer all or substantially all of their assets.

These covenants are subject to a number of important qualifications and exceptions as described in the 4.375% Secured Notes Indenture. Additionally, upon the occurrence of specified change of control events, the Company must offer to repurchase the 4.375% Secured Notes at 101% of the principal amount, plus accrued and unpaid interest, if any, to, but not including, the purchase date. The 4.375% Secured Notes Indenture also provides for customary events of default.

Issuance of Incremental Term Loan

On February 24, 2020, the Company closed the issuance of $600.0 million of incremental term loans (the "Incremental Term Loan") under the Term Loan Facility. The Incremental Term Loan bears interest at a rate equal to, at its option, (a) a LIBOR rate plus an applicable margin of 3.75% or (b) a base rate plus an applicable margin of 2.75%. There are no scheduled amortization payments required on the Incremental Term Loan prior to maturity. The net proceeds from the Incremental Term Loan, together with the net proceeds from the 4.375% Secured Notes and cash on hand, was used to fund the settlement of the tender offer, the 8.25% Notes Redemption and the 11.5% Notes Redemption and to pay certain fees in connection with the refinancing transactions described herein.

TABLE OF CONTENTS

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

This Annual Report for the fiscal year ended December 31, 2020 (this "***Report***") contains forward-looking statements that involve risks and uncertainties. Forward-looking statements include any statements that address future results or occurrences. In some cases, you can identify forward-looking statements by terminology such as: "may," "might," "will," "would," "should," "could" or the negatives thereof. Generally, the words "anticipate," "believe," "continue," "expect," "intend," "estimate," "project," "plan" and similar expressions identify forward-looking statements. In particular, statements about our expectations, beliefs, plans, objectives, assumptions or future events or performance contained elsewhere in this Report are forward-looking statements. These forward-looking statements include statements that are not historical facts, including statements concerning our possible or assumed future actions and business strategies. We have based these forward-looking statements on our current expectations, assumptions, estimates and projections. While we believe these expectations, assumptions, estimates and projections are reasonable, such forward-looking statements are only predictions and involve known and unknown risks, uncertainties and other factors, many of which are outside of our control, which could cause our actual results, performance or achievements to differ materially from any results, performance or achievements expressed or implied by such forward-looking statements. Such factors include, among others, the following:

- the length and severity of the novel coronavirus ("***COVID-19***") pandemic, the measures we are taking to respond to the pandemic and the potential availability of a vaccine on a widespread basis;
- significantly reduced patient volumes and operating revenues for elective procedures and services provided to non-COVID-19 patients and the uncertainty of future patient volumes and related revenues, including shifts from in-person patient services to telehealth services;
- the impact of increases in the volume of COVID-19 patients cared for across our facilities;
- the impact of existing or future COVID-19 related government and administrative regulation and stimulus, including the Families First Coronavirus Response Act, the Coronavirus Aid, Relief, and Economic Security Act (the "***CARES Act***") and other COVID-19 relief or stimulus legislation, and uncertainty in how these programs may be administered, monitored and modified in the future;
- supply shortages, workforce disruptions or shortages, and increased costs of providing care to our patients, including increased equipment, staffing and supply expenses resulting from the COVID-19 pandemic;
- the emergence of and effects related to other pandemics, epidemics and highly contagious infectious diseases;
- payment changes, including policy considerations and changes resulting from federal and state budgetary restrictions;
- impact from or likelihood of the repeal of, or material modification to, the Patient Protection and Affordable Care Act, as amended by the Health Care and Education Reconciliation Act of 2010 (collectively, the "***Affordable Care Act***"), as a result of court or legislative action;
- potential impact from the repeal of the penalties associated with the "***individual mandate***" to purchase health insurance under the Affordable Care Act, included in the Tax Cuts and Jobs Act of 2017 (the "***Tax Act***");
- impact from changes to Medicaid supplemental payment programs;
- our compliance with new and existing laws and regulations, including laws and regulations adopted in connection with the COVID-19 pandemic, as well as costs and benefits associated with compliance;
- any potential action brought by the government under anti-fraud and abuse provisions or by individuals on the government's behalf under the "qui tam" or "whistleblower" provisions of the federal False Claims Act (the "***False Claims Act***");
- impact from the changes in payer mix marked by a shift of patients from private insurance to Medicare and Medicaid programs;
- our acquisition strategy, including integration risks relating to future acquisitions;
- the potential for material obligations if we acquire facilities with unknown or contingent liabilities;
- claims and legal actions relating to professional liabilities and other litigation risks;
- delayed payments and repayments resulting from reviews of claims to Medicare and Medicaid for our services;
- impact of controls imposed by payers designed to reduce inpatient services;
- risks associated with outsourcing functions to third-parties;
- our relationships with our joint venture partners;
- changes in physician employment regulations;
- increases in the amount and risk of collectability of patient accounts receivable, particularly as the unemployment rate and number of underinsured and uninsured patients increases as a result of the COVID-19 pandemic;
- our need to make investments continually in our processes and information systems to protect the privacy of patients, employees and other persons and reduce the risk of successful cybersecurity attacks;
- damage to our reputation, regulatory penalties, legal claims and liability under state and federal laws that we could suffer upon any cybersecurity or privacy breaches;
- anticipated capital expenditures, including routine projects, investments in information systems and capital projects related to acquisitions, construction of new facilities and construction projects and the expectation that capital commitments could be a component of future acquisitions;
- effects of competition in a facility's market;
- changes in industry and general economic trends, including macroeconomic conditions negatively impacted by the COVID-19 pandemic;
- recruitment and retention of senior executives, providers and other healthcare employees;

- our ability to acquire facilities on favorable terms and successfully complete asset sales and divestitures;
- effects of union organizing activities;
- potential recoupment of previously recognized income from electronic health record ("***EHR***") incentive programs;
- timeframes for completion of capital projects;
- changes in depreciation and amortization expenses;
- costs of providing care to our patients, including increased equipment, staffing and supply expenses resulting from the COVID-19 pandemic;
- accounting estimates and the impact of accounting methodologies and new accounting pronouncements;
- changes in interpretations, assumptions and expectations regarding tax legislation, including provisions of the CARES Act, and additional guidance that may be issued by federal and state taxing authorities;
- consolidation of commercial insurance companies and patient shifts to lower cost healthcare plans, including association health plans and short-term limited duration health insurance plans, which generally provide lower payment for services provided;
- participation in the healthcare exchanges (the "***Exchanges***") and the impact of increasing enrollment by patients in insurance plans with narrow networks, tiered networks, high deductibles or high co-payments;
- governmental or third-party investigations, legal actions and voluntary self-disclosures relating to overpayments or other regulatory compliance matters;
- the ability of our local management teams to identify and meet the needs of our patients, medical staffs and their communities;
- the efforts of insurers, healthcare providers and others to contain healthcare costs;
- our ability to obtain adequate levels of general and professional liability insurance;
- our ability to implement initiatives promoting cost reductions and operational efficiencies;
- possible future indebtedness that may be incurred; and
- other factors referenced under the caption "Risk Factors" in this Report.

Given these uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. We disclaim any obligation to update any such factors or to announce the result of any revisions to any of the forward-looking statements contained herein to reflect future results, events or developments.

Statements in this Report are made as of the date hereof unless stated otherwise. New factors emerge from time to time, and it is not possible to predict all such factors.

EXPLANATORY INFORMATION REGARDING THIS REPORT

This Report has been prepared in accordance with the obligations of the Company under (i) Section 4.02 of the Indenture, dated as of December 4, 2020 (the "***5.375% Unsecured Notes Indenture***"), among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee, relating to the Company's 5.375% Senior Notes due 2029 (the "***5.375% Unsecured Notes***"), (ii) Section 4.02 of the Indenture, dated as of April 13, 2020 (as amended or supplemented from time to time, the "***6.75% Secured Notes Indenture***"), among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee and notes collateral agent, relating to the Company's 6.750% Senior Secured Notes due 2025 (the "***6.75% Secured Notes***"), (iii) Section 4.02 of the Indenture, dated as of February 13, 2020 (as amended or supplemented from time to time, the "***4.375% Secured Notes Indenture***") among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee and notes collateral agent, relating to the Company's 4.375% Senior Secured Notes due 2027 (the "***4.375% Secured Notes***") and (iv) Section 4.02 of the Indenture, dated as of November 16, 2018 (as amended or supplemented from time to time, the "***9.75% Unsecured Notes Indenture***" and, together with the 5.375% Unsecured Notes Indenture, the 6.75% Secured Notes Indenture and the 4.375% Secured Notes Indenture , the "***Indentures***"), among the Company, as issuer, each of the subsidiary guarantors party thereto and Wilmington Trust, National Association, as trustee, relating to the Company's 9.750% Senior Notes due 2026 (the "***9.75% Unsecured Notes***" and, together with the 5.375% Unsecured Notes, 6.75% Secured Notes and the 4.375% Secured Notes, the "***Notes***"), (v) Section 5.04 of the Asset-Based Revolving Credit Agreement, dated as of November 16, 2018 (as amended or supplemented from time to time, the "***ABL Agreement***"), among the Company, as Lead Borrower, DSB Acquisition, LLC, a Delaware limited liability company ("***Holdings***"), the lenders party thereto from time to time and Citibank, N.A., as administrative agent and collateral agent, and (vi) Section 5.04 of the First Lien Credit Agreement, dated as of November 16, 2018 (as amended or supplemented from time to time, the "***Term Loan Agreement***" and, together with the ABL Agreement, the "***Credit Agreements***"), among the Company, as Lead Borrower, Holdings, the lenders party thereto and Citibank, N.A., as administrative agent and collateral agent. This Report has been prepared in all material respects in accordance with the rules and regulations of the Securities and Exchange Commission (the "***SEC***") applicable to an Annual Report on Form 10-K for the fiscal year ended December 31, 2020, except to the extent permitted to be excluded by the Indentures and the Credit Agreements.

USE OF NON-GAAP FINANCIAL INFORMATION

In this Report, we have provided EBITDA and Adjusted EBITDA (collectively, the "***Non-GAAP Measures***") because we believe they provide the holders of our Notes (the "***Holders***") and the lenders under our Credit Agreements ("***Lenders***") with additional information to measure our performance and evaluate our ability to service our indebtedness. We believe that the presentation of Non-GAAP Measures is appropriate to provide additional information to the Holders and Lenders about certain material non-cash items and about unusual items that we do not expect to continue or to continue at the same level in the future as well as other items. Further, we believe the Non-GAAP Measures provide a meaningful measure of operating profitability because we use them for evaluating our business performance and understanding certain significant items.

The Non-GAAP Measures are not presentations made in accordance with United States ("***U.S.***") generally accepted accounting principles ("***GAAP***"), and our use of these terms may vary from others in our industry. EBITDA and Adjusted EBITDA should not be considered as alternatives to operating income or any other performance measures derived in accordance with GAAP as measures of operating performance or cash flows as measures of liquidity. EBITDA and Adjusted EBITDA have important limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results as reported under GAAP. Because of these limitations, we rely primarily on our GAAP results and use EBITDA and Adjusted EBITDA only as a supplement. Refer to "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" for a description of the calculation and limitations of these measures.

DOCUMENT SUMMARIES AND REQUESTS

This Report contains summaries believed to be accurate with respect to certain documents, but reference is made to the actual documents for complete information. All such summaries, which do not purport to be complete, are qualified in their entirety by such reference. Copies of the documents referred to herein will be made available without cost to Holders and Lenders by making a written or oral request to us. Any such request may be made to us at the following address and telephone number:

FISCAL YEAR

All references to "fiscal year" are to the twelve months ended December 31 of the year referenced.

OTHER ITEMS

LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.), a Delaware corporation, along with each of its consolidated subsidiaries, is referred to herein as the "***Company***," "***LifePoint***," "***we***," "***our***," "***us***," and, before giving effect to the LifePoint/RCCH Merger (as defined below), "***RCCH***," in each case, unless the context otherwise requires.

References in this Report to the "***LifePoint/RCCH Merger***" refer to the merger, which was effective on November 16, 2018, of Legend Merger Sub, Inc., a Delaware corporation and wholly-owned subsidiary of RCCH ("***Legend Merger Sub***"), with and into LifePoint Health, Inc., a Delaware corporation ("***Legacy LifePoint***"), with Legacy LifePoint surviving the LifePoint/RCCH Merger as a subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc."

References in this Report to the "***RegionalCare/Capella Merger***" refer to the merger, effective for accounting purposes on May 1, 2016, of a wholly-owned subsidiary of RegionalCare Hospital Partners Inc. ("***Regional Care***"), with and into Capella Health Holdings, LLC ("***Capella***"), with Capella surviving the RegionalCare/Capella Merger as a wholly-owned subsidiary of RegionalCare, which began to do business as RCCH HealthCare Partners.

References in this Report to the "***Apollo/RegionalCare Acquisition***" refer to the merger, which was effective on December 3, 2015, of DSB Merger Sub Inc., a Delaware corporation and wholly-owned subsidiary of Holdings, with and into RegionalCare with RegionalCare surviving such merger as a direct wholly-owned subsidiary of Holdings, which is indirectly controlled by our Sponsor.

References in this Report to the "***Sponsor***" refer to certain funds that are affiliates of the Company (the "***Apollo Funds***") that are ultimately controlled and/or managed by Apollo Management VIII, L.P. ("***Apollo Management***" and, when acting on behalf of the Apollo Funds, "***Apollo***"), which is an affiliate of Apollo Global Management, Inc.

PART I

Item 1. *Business*.

Our Company

We own and operate community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities through our subsidiaries. As of December 31, 2020, we operated 88 hospital campuses in 29 states throughout the U.S., having a total of 11,512 licensed beds. We generate revenues by providing a broad range of general and specialized healthcare services to patients through a network of hospitals and outpatient facilities.

We seek to fulfill our mission of Making Communities Healthier® by (1) delivering high quality patient care, (2) supporting our physicians, (3) creating excellent workplaces for our employees, (4) taking a leadership role in our communities and (5) ensuring fiscal responsibility. We strive to create places where people choose to come for healthcare, physicians want to practice and employees want to work.

Our Business Strategy

The key elements of our business strategy include:

- *Commitment to the Delivery of Exceptional Quality Patient Care*. Providing high quality patient care is essential to our mission and will always be our top priority. We believe our quality efforts are central to creating places where people choose to come for care, physicians want to practice and employees want to work. Our National Quality Program provides a structured, evidence approach to enhancing quality and patient safety and is nationally renowned. Several factors contribute to providing high quality patient care, including leadership and accountability at all levels of our organization, aligning ourselves with talented physicians and medical staff who share our commitment to quality, and providing a clinical environment that is satisfactory to our patients, physicians and employees. We continually strive to improve physician and employee satisfaction, which we believe is critical to delivering quality patient care. We also partner with academic medical centers and regional health systems to better serve the needs of our communities. In addition, providing high quality patient care is increasingly vital to achieving our operating and financial success, including with governmental and commercial payers.

- *Continue to Grow in Existing Markets by Expanding Services and Access Points to Care*. We regularly conduct in-depth strategic reviews of the major service lines offered at each of our facilities and evaluate additional services through which we could better serve our communities and grow in our markets. We leverage our market-specific knowledge together with input and guidance from our local physician and community leaders to prioritize the healthcare services our communities are seeking. Focus areas include expansion of specialty service lines to meet unserved patient needs, expansion of access points to care, including outpatient, ancillary, retail and virtual health services, as well as investment in technology and equipment. We invest strategically in our markets in order to increase the quality and scope of services we provide, meet the needs of our communities and maintain our strong reputation as the healthcare provider of choice. This in turn helps us to continue recruiting physicians and growing the revenue of our facilities. We are implementing a transfer center strategy across our portfolio to increase access to our healthcare system and enhance the continuum of care through the delivery of quality care close to home, which further supports volume growth.

- *Develop Digital Health Capabilities to Engage our Communities with Seamless, Personalized, Quality Experiences Across the Healthcare Continuum*. We are committed to providing high quality care close to home and identifying innovative ways to make it easier for patients to access the care they need when and where they need it. We are working to optimize the patient health journey by partnering with digital health technology providers and connecting our patients and physicians with enhanced digital capabilities that increase access, improve engagement and satisfaction, and result in a more complete and seamless patient experience. Some of our digital health initiatives include on-demand telehealth services, artificial intelligence functionality, online scheduling for in-person and telehealth visits, virtual check-in and waiting room options, remote patient monitoring, next best action campaigns, and computational linguistics designed to identify at-risk patients.

- *Continue to Recruit and Retain Leading Physicians*. Our physician engagement strategies drive our ability to enhance and expand our services to meet the healthcare needs of our communities. We have a comprehensive recruiting program that is directed by an experienced department at our Health Support Center ("***HSC***") and is supported at the local level by our hospital system chief executive officers ("***CEOs***") and Boards of Trustees. We supplement our local teams with experienced specialists at our HSC and several third-party recruiting firms to assist us in identifying candidates that match the profile of our physician needs. We maintain a flexible approach to aligning our goals with our physician partners, including our willingness to recruit physicians through multi-year employment and/or income guarantee arrangements. In addition, we believe our physicians are attracted to our facilities because of several factors, including our commitment to quality care, our focus on employing and developing high quality nurses and support staff and our integration into, and support of, the communities we serve.

- *Routinely Optimize Our Portfolio to Strengthen Our Position in Existing Markets and Expand into New Markets*. We evaluate and selectively pursue acquisitions of hospitals, outpatient and ancillary clinics and other healthcare facilities in new and existing markets, with the goal of improving our operating performance and better meeting the healthcare needs of our communities. We employ a rigorous and disciplined approach to new market acquisitions and focus on a range of criteria, including expected financial returns and strategic benefits, to evaluate a target's suitability and fit within our portfolio. We seek to operate health systems that are, or have the potential to become, market leaders in communities with favorable demographic trends. We often acquire underperforming and/or undermanaged facilities where we can drive operating efficiencies in order to realize significant upside potential following an acquisition to generate attractive effective purchase multiples and strong returns on our investment. The recent market trend toward health system consolidation, particularly among underperforming not-for-profit hospital operators without the scale and/or operating discipline to compete, has benefited us and we believe will continue to support our acquisition strategy. Furthermore, we routinely evaluate our existing portfolio to assess whether we are meeting our strategic and financial objectives in our markets. We evaluate and may seek to opportunistically divest assets that do not meet our strategic and/or financial objectives and which may deliver more value to our stakeholders and the respective communities through a sale.

- *Continue to Engage in Strategic Relationships with Local Partners*. We partner with several academic medical centers and regionally significant health systems to better serve our communities. We have established partnerships with Duke University Health System ("***Duke***"), Norton Healthcare, Inc. ("***Norton***"), LHC Group, Inc. ("***LHC***"), University of Washington Health, Billings Clinic and Emory Healthcare ("***Emory***").

- *Continue to Focus on Cost Reduction and Operational Efficiency*. We strive to improve our operating performance by making our revenue cycle processes more efficient, making an even higher level of purchases through our group purchasing organization, operating more efficiently and effectively, and working to appropriately standardize our policies, procedures and practices across all of our affiliated facilities. As part of our ongoing efforts to further manage costs and improve the results of our revenue cycle, we have partnered with various third parties to provide certain nonclinical business functions, including payroll processing, supply chain management and revenue cycle functions. We believe this model is the most cost effective and efficient approach to managing these nonclinical business functions across multi-facility enterprises. Additionally, in connection with our efforts to responsibly manage purchasing costs, we participate along with other healthcare companies in a group purchasing organization, HealthTrust Purchasing Group, which makes certain national supply and equipment contracts available to our facilities. We also implement this operating discipline when we enter a new market through acquisitions, where we focus on optimizing staffing levels to reduce labor costs, leveraging our national scale and group purchasing organizations to reduce supply costs and standardizing revenue cycle and information technology ("***IT***") systems. We have made substantial progress implementing these initiatives consistently across our network, and we believe that opportunity exists for continued improvement in the near term, particularly among our recently acquired facilities.

- *Experienced Executive Management and Leadership Teams.* Our executive management team has an average of more than 20 years of healthcare industry experience with a proven record of achieving strong operating results. The executive management team is highly respected in the hospital management industry and has significant experience in managing and acquiring hospitals. Our executive management team is led by David Dill, who serves as our President and Chief Executive Officer. Mr. Dill has more than 20 years of operational and financial leadership experience in the healthcare industry.

Our Background

LifePoint/RCCH Merger

Summary

On July 22, 2018, RCCH, Legend Merger Sub and Legacy LifePoint entered into an agreement and plan of merger, pursuant to which, effective November 16, 2018, Legend Merger Sub merged with and into Legacy LifePoint, with Legacy LifePoint surviving the merger as a wholly-owned subsidiary of RCCH. At the effective time of the LifePoint/RCCH Merger, Legacy LifePoint changed its name from "LifePoint Health, Inc." to "Legacy LifePoint Health, Inc." and, immediately following the effective time of the LifePoint/RCCH Merger, RCCH changed its name from "RegionalCare Hospital Partners Holdings, Inc." to "LifePoint Health, Inc." Subsequently, Legacy LifePoint converted from a corporation to a limited liability company.

Equity Contribution

In connection with the LifePoint/RCCH Merger, the Apollo Funds, together with certain other co-investors investing through a co-investment vehicle controlled by our Sponsor or its affiliates, indirectly contributed $1,000.0 million of newly invested capital to DSB Parent L.P., a Delaware limited partnership ("***DSB Parent***"), which is our indirect parent and is owned by the Apollo Funds, such co-investment vehicle and certain current or former directors, members of management, employees and consultants of the Company, and the $1,000.0 million of newly invested capital was further contributed to the Company to be used to partially fund the LifePoint/RCCH Merger.

Financing Transactions

Concurrently with the closing of the LifePoint/RCCH Merger, we (1) issued the 9.75% Unsecured Notes, (2) entered into the ABL Agreement, which provides a senior secured asset-based revolving credit facility (the "***ABL Facility***") in an aggregate principal amount of $800.0 million with a maturity of five years, (3) terminated our existing senior secured asset-based revolving credit facility, which we entered into on April 29, 2016 (the "***Prior ABL Facility***"), (4) entered into the Term Loan Agreement, which provides a senior secured term loan credit facility (the "***Term Loan Facility***") in an aggregate principal amount of $3,550.0 million with a maturity of seven years, and (5) repaid in full our $150.0 million term loan facility, which we entered into on April 25, 2018 (the "***Prior Term Facility***").

Our Operations

Services

We operate health systems that provide a range of medical, surgical and behavioral health services across inpatient and outpatient settings, including general surgery, internal medicine, cardiology, radiology, oncology, orthopedics, women's services, neurology, rehabilitation services, pediatric services, emergency services and, primarily through our joint venture with LHC, home health and hospice services. In some of our health systems, we offer specialized services such as open heart surgery, skilled nursing, psychiatric care and neurosurgery. In many markets, we also provide outpatient services such as same day surgery, clinical laboratory services, diagnostic imaging services, respiratory therapy services, sports medicine services, urgent care services and lithotripsy. The services provided in any specific health system depend on many factors, including the community need for the service, whether physicians necessary to safely operate the service line are members of the medical staff of that hospital and the existence of any contractual or certificate of need restrictions.

Impact of COVID-19

During March 2020, the global COVID-19 pandemic began to significantly affect our facilities, employees, patients, communities, business operations and financial performance, as well as the U.S. economy and financial markets, as a whole. Approximately one year into the pandemic, we continue to be deeply committed to protecting the health of our communities and are continuing to respond to the evolving COVID-19 situation across the country. Importantly, we are taking every precaution to ensure we can continue providing quality care and safeguard the health and well-being of patients, employees, providers, volunteers and visitors in each community we serve. The national footprint of our health system, along with our HSC, has enabled us to support our communities during this challenging time.

We established an internal COVID-19 taskforce during the early stages of the pandemic which continues to meet regularly today. Additionally, in November 2020, we established a COVID-19 vaccine team to help facilitate the successful distribution and administration of vaccines across our markets.

Our top priority continues to be ensuring the safety, health and well-being of those in our facilities and communities. We have put in place a number of protocols to protect our patients, providers, employees, volunteers and visitors, including:

- mandatory masking for all providers, employees, volunteers and visitors across our facilities;
- required eye protection for providers and employees during all clinical encounters across our facilities;
- required COVID-19 testing for all admissions in communities with the highest rates of COVID-19 spread;
- performing pre-operative COVID-19 testing for patients undergoing certain elective procedures; and
- social distancing practices and other protective measures throughout our facilities, including visitor restrictions, closing common areas, limiting entry points and screening providers, employees and visitors who enter our facilities based on criteria established by the Centers for Disease Control and Prevention (the "***CDC***").

Restrictive measures, such as travel bans, social distancing and quarantine guidelines, significantly reduced the volume of procedures performed at our facilities during 2020, as well as the volume of emergency room and physician office visits unrelated to COVID-19. Furthermore, broad economic factors resulting from the current COVID-19 pandemic, including increasing unemployment rates and reduced consumer spending, could negatively affect our payer mix, increase the relative proportion of lower margin services we provide and reduce patient volumes, as well as diminish our ability to collect outstanding receivables.

Our evaluation of the measures taken across our health system in response to COVID-19 is ongoing and additional updates to our policies, procedures and operations could occur as best practices continue to evolve. Furthermore, our facilities are located across a wide geographic range of communities, which may require us to modify measures we take at specific facilities based on local conditions, including the severity of COVID-19 in the community served by the facility and changes in state and local restrictive measures.

As a result of the adverse impact of the COVID-19 pandemic on our business, we have undertaken several additional measures intended to enhance our financial flexibility, including among other things:

- increasing our liquidity with proceeds from the offering of the 6.75% Secured Notes;
- instituting net working capital optimization initiatives along with the curtailment of non-critical capital expenditures;
- receiving Medicare accelerated payments under the Centers for Medicare and Medicaid Services *("**CMS**")* expanded Accelerated and Advance Payment Program;
- receiving direct grant aid payments from the Emergency Fund established under the CARES Act; and
- anticipating current year cash tax savings related to various tax provisions of the CARES Act.

Additionally, although we have received funds that are available to us and our facilities under the CARES Act and other stimulus legislation and may seek additional funds that may become available under existing or future stimulus legislation, we cannot predict the manner in which such funds will be allocated or administered and we cannot assure you that we will be able to access such funds in a timely manner or at all. Most of these programs require healthcare providers to meet certain requirements and/or otherwise agree to certain terms and conditions in order to receive payment. In many cases, only limited guidance has been provided on those requirements and terms and conditions, and we already have seen changes in the substance and interpretation of that guidance.

For additional information about the risks presented by the COVID-19 pandemic, our responses to the pandemic, and the resources available to healthcare providers, refer to "—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19" below and "Part I, Item 1A. Risk Factors" and "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Developments, Trends and Operating Environment—Impact of COVID-19" included in this Report.

Management and Oversight

Our executive management team has extensive experience in operating multi-facility hospital networks and plays a vital role in the strategic planning for our facilities. A hospital's local management team is typically comprised of a CEO, chief operating officer, chief financial officer and a chief nursing officer. Local management teams work with the hospital's Board of Trustees and our HSC management teams to develop annual operating plans setting forth growth strategies through the expansion of current services, implementation of new services and the recruitment and retention of physicians in each community, as well as plans to improve operating efficiencies and reduce costs. We believe that the ability of each local management team to identify and meet the needs of our patients, medical staffs and the community as a whole is critical to the success of our facilities. We base the compensation for each local management team in part on its ability to achieve the goals set forth in the annual operating plan, including quality of care, patient satisfaction and financial measures.

The Board of Trustees at each facility, consisting of local community leaders, members of the medical staff and the facility CEO, advises the local management teams and helps develop the strategic operating plan for their facility. In addition, it plays a key role in providing the patient care excellence that we demand. Members of each Board of Trustees are identified and recommended by our local management teams. The Boards of Trustees oversee policies concerning medical, professional and ethical practices, monitor these practices and ensure that they conform to our high standards. We maintain company-wide compliance and quality assurance programs and use patient care evaluations and other assessment methods to support and monitor quality of care standards and to meet accreditation and regulatory requirements.

The majority of our facilities have a physician engagement group ("***PEG***") or a physician leadership group ("***PLG***") comprised of key physicians and members of the facility's administrative team. The mission of the PEG or PLG is to provide ongoing dialogue between hospital facility administration and members of the medical staff and community physicians primarily in the areas of operations, quality patient care, employee satisfaction and community relations.

We also provide support to the local management teams through our HSC resources in areas such as revenue cycle, business office, legal, managed care, clinical efficiency, physician services and other administrative functions. These resources allow for sharing best practices and standardization of policies and processes among all of our facilities.

Cost Management

We strive to improve our operating performance by making our revenue cycle processes more efficient, making an even higher level of purchases through our group purchasing organization, operating more efficiently and effectively, and working to appropriately standardize our policies, procedures and practices across all of our affiliated facilities.

As part of our ongoing efforts to further manage costs and improve the results of our revenue cycle, we have partnered with various third parties to provide certain nonclinical business functions, including payroll processing, supply chain management and revenue cycle functions. We believe this model is the most cost effective and efficient approach to managing these nonclinical business functions across multi-facility enterprises.

Attracting Patients

We believe that the most important factors influencing a patient's choice in where to receive healthcare services are the quality of care delivered by the facility, the overall reputation of the facility, the availability and expertise of physicians and nurses, and the location and convenience of the facility. Other factors that affect utilization include local demographics and population growth, local economic conditions and the facility's success in contracting with a wide range of local payers.

Outpatient Services

The healthcare industry has experienced an accelerated shift during recent years from inpatient services to outpatient services as Medicare, Medicaid and managed care payers have sought to reduce costs by shifting lower-acuity cases to an outpatient setting. Advances in medical equipment technology and pharmacology also have supported the shift to outpatient utilization. However, we expect the decline in inpatient admission use rates to moderate over the long term as the baby boomer population reaches ages where inpatient admissions become more prevalent. We have responded to the shift to outpatient services through expanding service offerings and increasing the throughput and convenience of our emergency departments, outpatient surgery facilities and other ancillary units in our facilities.

Sources of Revenues

General

Our facilities generate revenues by providing healthcare services to our patients. Depending upon the patient's medical insurance coverage, we are paid for these services by governmental Medicare and Medicaid programs, commercial insurance, including health maintenance organizations ("***HMOs***"), preferred provider organizations ("***PPOs***") and plans offered through the Exchanges, private insurers, and directly by the patient. The amounts we are paid for providing healthcare services to our patients vary depending upon the payer. Governmental payers generally pay significantly less than the hospital's customary charges for the services provided. Insured patients are generally not responsible for any difference between customary hospital charges and the amounts received from commercial insurance payers. However, insured patients are responsible for payments not covered by insurance, such as exclusions, deductibles and co-payments.

Our revenues by payer and approximate percentages of revenues on a consolidated basis were as follows for the years ended December 31, 2020, 2019 and 2018 (dollars in millions):

	2020		2019		2018	
	Amount	% of Revenues	Amount	% of Revenues	Amount	% of Revenues
Medicare	$ 3,134.0	38.6 %	$ 3,338.1	38.1 %	$ 1,105.3	39.8 %
Medicaid	1,392.4	17.1	1,495.3	17.1	486.3	17.5
HMOs, PPOs and other private insurers	3,381.9	41.6	3,698.6	42.3	1,113.8	40.1
Self-pay	54.5	0.7	59.2	0.7	17.2	0.6
Other	142.7	1.8	143.6	1.6	49.4	1.8
Revenue from contracts with customers	8,105.5	99.8	8,734.8	99.8	2,772.0	99.8
Rental income	16.4	0.2	18.0	0.2	6.1	0.2
Revenues	$ 8,121.9	100.0 %	$ 8,752.8	100.0 %	$ 2,778.1	100.0 %

Medicare

For the year ended December 31, 2020, approximately 38.6% of our revenues related to patients participating in Medicare programs. Medicare provides hospital and medical insurance benefits, regardless of income, to persons age 65 and over, some disabled persons and persons with end-stage renal or Lou Gehrig's disease. All of our hospitals are currently certified as providers of Medicare services.

Over the years, Congress and CMS have made several sweeping changes to the Medicare program and its reimbursement methodologies, including the numerous changes contained in the Affordable Care Act. Many of these changes have resulted in decreased reimbursement to healthcare providers. In addition, the Budget Control Act of 2011 ("***BCA***"), which is intended to reduce the federal deficit, imposed a 2% reduction in Medicare spending which began on April 1, 2013. Congress has extended the 2% reduction in Medicare spending on numerous occasions. Most recently, Congress adopted the CARES Act and the Consolidated Appropriations Act, 2021 (the "***CCA***"), which temporarily suspend Medicare sequestration from May 1, 2020 until March 31, 2021, but also extend the 2% reduction in Medicare spending through 2030. Additional reductions in Medicare reimbursement could result from changes to, or the repeal of, the Affordable Care Act, or as a result of the enactment of Medicare reform, deficit reduction or other legislation.

Medicare Inpatient Prospective Payment System

Under the Medicare program, hospitals are reimbursed for the costs of acute care inpatient stays under an inpatient prospective payment system ("***IPPS***"). Under the IPPS, our hospitals are paid a prospectively determined amount for each hospital discharge that is based on the patient's diagnosis. Specifically, each discharge is assigned to a Medicare severity diagnosis related group ("***MS-DRG***"), which groups patients that have similar clinical conditions and that are expected to require a similar amount of hospital resources. Each MS-DRG is, in turn, assigned a relative weight that is prospectively set and that reflects the average amount of resources, as determined on a national basis, that are needed to treat a patient with that particular diagnosis, compared to the amount of hospital resources that are needed to treat the average Medicare inpatient stay. The IPPS payment for each discharge is based on two national base payment rates or standardized amounts, one that covers hospital operating expenses and another that covers hospital capital expenses. The base MS-DRG payment rate for operating expenses has two components, a labor share and a non-labor share. Although the labor share is adjusted by a wage index to reflect geographical differences in the cost of labor, the base MS-DRG payment rate does not consider the actual costs incurred by an individual hospital in providing a particular inpatient service. In addition to IPPS reimbursement, Medicare also makes supplemental payments known as outlier payments to compensate hospitals for cases involving extraordinarily high costs.

The base MS-DRG operating expense payment rate that is used by the Medicare program in the IPPS is adjusted by an update factor each federal fiscal year ("***FFY***"), which begin on October 1 (for example, FFY 2021 began on October 1, 2020). The index used to adjust the base MS-DRG payment rate, which is known as the "hospital market basket index," gives consideration to the inflation experienced by hospitals in purchasing goods and services. For FFYs 2021, 2020, and 2019, the hospital market basket index increased 2.4%, 3.0%, and 2.9%, respectively. Generally, however, the percentage increase in the MS-DRG payment rate has been lower than the projected increase in the cost of goods and services purchased by hospitals. In addition, as mandated by the Affordable Care Act, the hospital market basket increase for FFY 2019 was reduced by CMS by 0.75%. As also mandated by the Affordable Care Act, the market basket increase is reduced by a productivity adjustment equal to the Bureau of Labor Statistics' 10-year moving average of changes in annual economy-wide productivity. For FFYs 2021, 2020, and 2019, the productivity adjustment equated to a 0.0%, 0.4%, and 0.8% reduction in the market basket increase, respectively. As a result of these reductions and other changes implemented by CMS, the MS-DRG-rate increased by 2.9% for FFY 2021.

On October 1, 2007, CMS replaced the previously existing 538 diagnosis related groups with 745 MS-DRGs. The MS-DRGs are intended to more accurately reflect the cost of providing inpatient services and eliminate any incentives that hospitals may have to only treat the healthiest and most profitable patients. The American Taxpayer Relief Act of 2012 ("***ATRA***") required CMS to recoup $11 billion from IPPS payments in FFYs 2014 through 2017 to offset an additional increase in aggregate payments to hospitals that Congress believes occurred from FFYs 2008 through 2013 solely as the result of the transition to the MS-DRG system. In FFYs 2014, 2015 and 2016, CMS applied negative 0.8% adjustments as part of the recovery process required by ATRA, and it applied a negative 1.5% adjustment in FFY 2017 to recover the remaining outstanding amount. CMS had previously indicated that the reductions required by ATRA would be fully restored in FFY 2018. However, under the Medicare Access and CHIP Reauthorization Act of 2015 ("***MACRA***"), those reductions were to be restored in 0.5% increments over a six-year period from FFYs 2018 through 2023, which would result in a cumulative 3.0% increase in rates, which would be less than the 3.9% reduction that was imposed by CMS in FFYs 2014 through 2017. In addition, some of that restoration has been subject to further limits, such as under the 21st Century Cures Act (the "***Cures Act***") which further reduced the restoration for FFY 2018 from 0.5% to 0.4588%.

CMS has implemented a number of programs and requirements that are intended to promote value-based purchasing and to link payments to quality and efficiency. For example, all acute care hospitals are required to participate in CMS' Hospital Inpatient Quality Reporting Program (the "***IQR Program***") in order to receive the full hospital market basket update. Hospitals that do not participate in the IQR Program receive a 25% reduction in their IPPS annual payment update for the applicable FFY. Our hospitals reported all quality measures required by CMS related to the IQR Program and nearly all will receive the full market basket update through FFY 2021. In addition, hospitals that are not meaningful EHR users are also subject to an additional 75% reduction of the hospital market basket increase.

In addition, the Affordable Care Act requires U.S. Department of Health and Human Services ("***HHS***") to implement a value-based purchasing program for inpatient hospital services. This program rewards hospitals based either on how well the hospitals perform on certain quality measures or how much the hospitals' performance improves on certain quality measures from their performance during a baseline period. As part of the program, the Affordable Care Act requires HHS to reduce inpatient hospital payments for all discharges by 2.0% each FFY. HHS pools the amount collected from these reductions to fund payments to reward hospitals that meet and exceed certain quality performance standards established by HHS. Under the program, each hospital's performance is evaluated during a specified performance period, and hospitals receive points on each of a number of pre-determined measures based on the higher of (i) their level of achievement relative to an established standard or (ii) their improvement in performance from their performance during a prior baseline period. Each hospital's combined scores on all the measures are translated into value-based incentive payments. Hospitals that receive higher total performance scores receive higher incentive payments than those that receive lower total performance scores. Because the Affordable Care Act provides that the funds pooled and otherwise set aside for the value-based purchasing program will be fully distributed, hospitals with high scores may receive greater reimbursement under the value-based purchasing program than they would have otherwise, and hospitals with low scores may receive reduced Medicare inpatient hospital payments.

Medicare also does not allow an inpatient hospital discharge to be assigned to a higher paying MS-DRG if certain designated hospital acquired conditions ("***HACs***") were not present on admission and the identified HAC is the only condition resulting in the assignment of the higher paying MS-DRG. In those situations, the case is paid as though the secondary diagnosis was not present. In addition, hospitals that fall into the top 25.0% of national risk-adjusted HAC rates for all hospitals in the previous year receive a 1.0% reduction in their total Medicare payments.

Furthermore, inpatient payments are reduced pursuant to the Affordable Care Act if a hospital experiences "excessive readmissions" within a 30-day period of discharge for certain conditions designated by CMS including heart attack, chronic obstructive pulmonary disease, heart failure, pneumonia, coronary artery bypass, and total hip arthroplasty. Hospitals with what HHS defines as "excessive readmissions" for these conditions will receive reduced payments for all inpatient discharges, not just discharges relating to the conditions subject to the excessive readmission standard. Each hospital's performance is publicly reported by HHS. HHS has the discretion to determine what "excessive readmissions" means, the amount of the payment reduction and other terms and conditions of this program. The basic maximum payment reduction amount is 3.0%. The Cures Act does, however, allow for an adjustment factor that would reduce the penalties imposed on hospitals, based on the portion of beneficiaries the hospitals serve that are eligible for both Medicare and Medicaid.

Medicare Hospital Outpatient Prospective Payment System and Other Outpatient Services

CMS reimburses hospital outpatient services under the Medicare hospital outpatient prospective payment system ("***OPPS***"), and generally uses fee schedules to pay for durable medical equipment and physical, occupational and speech therapy, clinical diagnostic laboratory and independent diagnostic testing facility services. Under the OPPS, hospital outpatient services are classified into groups called ambulatory payment classifications ("***APCs***"). Services in each APC are clinically similar and are similar in terms of the resources they require. Depending on the services provided, a hospital may be paid for more than one APC for an encounter. CMS establishes a payment rate for each APC by multiplying the scaled relative weight for the APC by a conversion factor. The payment rate is further adjusted to reflect geographic wage differences. The APC conversion factors for calendar years ("***CYs***") 2021, 2020, and 2019 were $82.797, $80.793, and $79.490, respectively, after the inclusion of the productivity adjustments and other reductions that were required by the Affordable Care Act. APC classifications and payment rates are reviewed and adjusted on an annual basis, and, historically, the rate of increase in payments for hospital outpatient services has been higher than the rate of increase in payments for inpatient services. To receive the full increase, hospitals must satisfy the reporting requirements of the Hospital Outpatient Quality Reporting Program (the "***OQR Program***"). Hospitals that do not satisfy the reporting requirements of the OQR Program are subject to a reduction of 2.0% in their annual payment update under the OPPS. Our hospitals reported all quality measures required by CMS related to the OQR Program and will receive the full market basket update through CY 2021.

Section 603 of the Bipartisan Budget Act of 2015 limits reimbursement for items and services that are furnished by certain off-campus outpatient provider-based departments ("***off-campus PBDs***") of hospitals. CMS included several provisions implementing Section 603 in the OPPS final rule for CY 2017. Under the final rule, CMS continues to make OPPS payments to off-campus PBDs that were billing Medicare as hospital departments under the OPPS prior to November 2, 2015 ("***grandfathered PBDs***"). However, grandfathered PBDs generally are not be able to relocate, and CMS has indicated that it may adopt limitations on the expansion of the service lines provided at grandfathered PBDs in the future. In addition to grandfathered PBDs, CMS continues to reimburse all items and services that are furnished in a "dedicated emergency department" of a hospital, as such term is defined for the purposes of the Emergency Medical Treatment and Active Labor Act ("***EMTALA***"), regardless of whether the items and services are emergency items and services, and all items and services that are furnished in off-campus PBDs that are located within 250 yards of a remote location of a hospital, which is a facility that is either created or acquired by a hospital for the purpose of furnishing inpatient hospital services under the name, ownership, and financial and administrative control of the hospital, under the OPPS. All items and services not provided at a grandfathered or otherwise excepted off-campus PBD are generally paid by CMS under Medicare physician fee schedule ("***PFS***") rates that are approximately 40% of the applicable OPPS rate (the "***PFS Adjusted Rate***"). In addition, in 2018, CMS issued a final rule that generally reimburses clinic visit services provided at all off-campus PBDs, including grandfathered PBDs, at a reduced Medicare PFS-equivalent payment rate. The payment reduction for clinic visit services provided at off-campus PBDs was to be phased in over a two year period beginning in FFY 2019.

In December 2018, a lawsuit was filed challenging the portion of CMS' final rule that reduced reimbursement for clinic visit services provided at grandfathered PBDs to the lower Medicare PFS-equivalent payment rate. On September 17, 2019, the U.S. District Court for the District of Columbia ruled that the reduction in reimbursement for clinic services provided at grandfathered PBDs exceeded CMS' statutory authority. As a result of the ruling, CMS paid claims for clinic visit services provided at grandfathered PBDs in CY 2019 at the full OPPS payment rate. However, in the OPPS final rule for CY 2020, CMS noted that the court's ruling only applied to clinic visit services provided in CY 2019, and, as a result, CMS moved forward with the planning phase-in of the second year of the clinic visit service payment reduction in CY 2020 while it appealed the court's decision. A new lawsuit was filed on January 13, 2020, challenging the continued phase-in of the reduction for CY 2020. On July 17, 2020, the U.S. Court of Appeals for the District of Columbia reversed the lower court's ruling regarding the CY 2019 reductions and upheld CMS' reimbursement reductions for clinic visit services provided at grandfathered PBDs. The ruling of the U.S. Court of Appeals for the District of Columbia has been appealed to the U.S. Supreme Court. However, we cannot predict whether the U.S. Supreme Court will agree to hear the appeal and, if so, whether the appeal will be successful. CMS has stated that it will reprocess claims for outpatient clinic visit services that were provided at grandfathered PBDs in CY 2019 at the lower Medicare PFS-equivalent payment rate. CMS has indicated that it expects the reprocessing of the affected claims to be completed by July 1, 2021.

In addition to those reimbursement reductions and in furtherance of its efforts to increase site neutrality in Medicare payments, CMS announced in the OPPS final rule for CY 2021 that it would eliminate the Medicare program's inpatient only procedure list over a three-year period, beginning with the removal of approximately 300 primarily musculoskeletal-related procedures, with the list being completely phased out by CY 2024. The elimination of the inpatient only procedure list will make those procedures eligible to be paid by Medicare in the hospital outpatient setting when outpatient care is appropriate, as well as maintain the ability of Medicare to pay for these services in the hospital inpatient setting when inpatient care is appropriate, as determined by the patient's physician.

As part of the OPPS final rule for CY 2018, CMS also finalized a change to the payment rate for certain Medicare Part B drugs purchased by hospitals through the 340B Drug Pricing Program (the "***340B Program***"). The 340B Program allows certain non-profit and governmental hospitals and other healthcare providers to obtain substantial discounts on covered outpatient drugs (prescription drugs and biologics other than vaccines) from drug manufacturers. Under the final rule, CMS pays for separately reimbursable, non-pass through drugs and biologicals (other than vaccines) purchased through the 340B Program at the average sales price ("***ASP***") minus 22.5% rather than ASP plus 6%. CMS estimated that this change reduced Medicare payments for drugs and biologicals by $1.6 billion in CY 2018. To maintain budget neutrality, CMS implemented an offsetting increase in the conversion factor. As a result, OPPS reimbursement rates for non-drug items and services provided by all hospitals, including those not eligible to participate in the 340B Program, were increased in connection with the reduction to 340B Program payments. In the OPPS final rule for CY 2019, CMS expanded the 340B Program payment reductions to drugs that are obtained through the 340B Program and furnished by non-excepted, off-campus PBDs.

In September 2018, a lawsuit was filed challenging the authority of CMS to make the 340B Program payment reductions set forth in the OPPS final rule for CY 2018. On December 27, 2018, the U.S. District Court for the District of Columbia held that the payment reductions exceeded CMS' statutory authority and entered a permanent injunction against the reductions. However, because the 340B Program payment reductions were made in a budget-neutral manner and the savings derived from the reductions were used to increase reimbursement for all of the other items and services provided under the OPPS, the court ordered the parties to submit briefs as to how the issue should be remedied. The lawsuit was subsequently expanded to include the 340B Program payment reductions that were made in CY 2019, and an additional lawsuit has been filed against the 340B Program payment reductions being made by CMS in CY 2020. CMS appealed the District Court's rulings, and, on July 31, 2020, the U.S. Court of Appeals for the District of Columbia reversed the lower court's ruling and upheld CMS' 340B Program payment reductions. The ruling of the U.S. Court of Appeals for the District of Columbia has been appealed to the U.S. Supreme Court, and we cannot predict whether the appeal will be successful or whether CMS will continue the 340B Program payment reductions under the new Presidential administration. If OPPS payments to hospitals are reduced (either retroactively or prospectively) in connection with the 340B Program, we would be materially adversely affected.

Medicare Disproportionate Share Hospital Payments

Hospitals may also qualify for Medicare disproportionate share hospital ("***DSH***") payments, if they treat a high percentage of low-income patients (as determined by a ratio involving Medicare and Medicaid patients eligible to receive Supplemental Security Income). DSH payments are determined annually based on certain statistical information specified by HHS and are paid as an addition to MS-DRG payments. The Affordable Care Act requires Medicare DSH payments to providers to be reduced by 75% beginning in FFY 2014, subject to adjustment if the Affordable Care Act does not decrease uncompensated care to the extent anticipated. The amount that is withheld is reduced by the percentage change in uninsured individuals under the age of 65, and then paid as additional payments to DSH hospitals based on the amount of uncompensated care provided by each hospital relative to the amount of uncompensated care provided by all hospitals receiving DSH payments during the applicable time period. The IPPS final rule for FFY 2021 established the uncompensated care amount which will be distributed to qualifying hospitals in FFY 2021 at approximately $8.3 billion, a decrease of approximately $60 million from FFY 2020.

Medicare Dependent and Low Volume Hospital Programs

On April 16, 2015, MACRA was enacted. Among other things, MACRA extended the Medicare dependent hospital program, which provides enhanced payment support for rural hospitals that have no more than 100 beds and at least 60% of their inpatient days or discharges covered by Medicare, and the Medicare low volume hospital program, which provides additional Medicare reimbursement for general acute care hospitals that are located a certain distance from another general acute care hospital and have less than a certain number of Medicare discharges each fiscal year, through September 30, 2017. The Bipartisan Budget Act of 2018 extended both of these programs through FFY 2022.

Cost Reports

Hospitals participating in the Medicare and some Medicaid programs, whether paid on a reasonable cost basis or under a prospective payment system, are required to meet certain financial reporting requirements. Federal and, where applicable, state regulations require submission of annual cost reports identifying medical costs and expenses associated with the services provided by each hospital to Medicare and Medicaid recipients.

Annual cost reports required under the Medicare and some Medicaid programs are subject to routine governmental audits. These audits may result in adjustments to the amounts ultimately determined to be payable to us under these reimbursement programs. Finalization of these audits often takes several years. Providers may appeal any final determination made in connection with an audit, and it is common to contest issues raised in audits of cost reports.

Medicare Bad Debt Reimbursement

Under Medicare, the costs attributable to the deductible and coinsurance amounts that remain unpaid by Medicare beneficiaries after reasonable collection efforts can be added to the Medicare share of allowable costs as cost reports are filed. Hospitals generally receive interim pass-through payments during the cost report year which were determined by the Medicare administrative contractor (*"**MAC**"*) from prior cost report filings.

The amounts uncollectible from specific beneficiaries are to be charged off as bad debts in the accounting period in which the accounts are deemed to be worthless. In some cases, an amount previously written off as a bad debt and allocated to the program may be recovered in a subsequent accounting period. In these cases, the recoveries must be used to reduce the cost of beneficiary services for the period in which the collection is made. In determining reasonable costs for hospitals, the amount of bad debts otherwise treated as allowable costs is reduced by 35%.

Medicare Physician Fee Schedule

Professional medical services provided to Medicare beneficiaries by physicians and certain other healthcare practitioners, including physician assistants and nurse practitioners, are reimbursed under the PFS. Under the PFS, CMS has assigned a national relative value unit ("***RVU***") to most medical procedures and services that reflects the various resources required by a physician or practitioner to provide the services relative to all other services. Each RVU is calculated based on a combination of work required in terms of time and intensity of effort for the service and the practice overhead and malpractice insurance expenses that are attributable to the service. These three elements are each modified by a geographic adjustment factor to account for local practice costs and are then aggregated. The aggregated amount is multiplied by a conversion factor to determine the payment rate for the service. The conversion factor is updated by CMS on an annual basis.

MACRA, which was adopted in 2015, significantly changed how CMS determines the annual updates to the PFS. Under MACRA, the PFS payment rates that were in effect when MACRA was enacted were extended through June 30, 2015, and then increased by 0.5% for the remainder of CY 2015. PFS payment rates were increased annually by an additional 0.5% for CYs 2016, 2017 and 2018 and, after the adoption of the Bipartisan Budget Act of 2018, were increased by 0.25% for CY 2019. PFS payment rates are scheduled to remain at their CY 2019 levels through CY 2025. To account for changes that have been made to the RVUs associated with certain procedures and services, particularly those associated with evaluation and management visits, the final PFS rule for CY 2021 reduced the PFS conversion factor to $32.41, an approximate reduction of 10.2%, in order to maintain budget neutrality as required by law. However, the CCA temporarily increases PFS payment rates by 3.75% (approximately $3 billion) for CY 2021 and partially offsets the reduction.

In addition to revising the methodology that is used to update payments that are made under the PFS, MACRA also established a Quality Payment Program ("***QPP***") for incentivizing physician and practitioner care that meets certain value, quality, cost, and performance criteria. Beginning in CY 2019, amounts paid to physicians and practitioners under the PFS are subject to adjustment through the QPP and participation in either the Merit-Based Incentive Payment System ("***MIPS***") or an Advanced Alternative Payment Model ("***APM***") program. Physicians and practitioners who participate in the MIPS program, which essentially consolidated the prior Physician Quality Reporting System, the Value-Based Modifier, and the Meaningful Use of EHR incentive programs, are subject to positive, zero, or negative performance adjustments depending on how the physician's or practitioner's performance compared to a performance threshold. The payment adjustments are based on the physician's or practitioner's performance in the year that is two years prior to the current payment period. As a result, PFS payments in CY 2021 will be based on CY 2019 performance scores, and so on for the following years. HHS and CMS revise the MIPS reporting measures on an annual basis and have indicated that they intend to routinely increase the performance thresholds in connection with those revisions. In addition, from CY 2019 through CY 2024, MACRA provides $500 million per year for an additional performance adjustment for physicians and practitioners who participate in MIPS and achieve exceptional performance. Physicians and practitioners who participate in a specified APM program, which, among other things, requires the physician or practitioner to receive a substantial amount of their revenue from an APM, will receive, from CYs 2019 through 2024, a lump-sum payment equal to 5% of their Medicare payments in the prior year for services paid under the PFS. Beginning in CY 2026, PFS payment rates for physicians and practitioners participating in an APM program would be increased by 0.75% a year. Payments for other physicians and practitioners would be increased by 0.25% per year.

Medicaid

For the year ended December 31, 2020, approximately 17.1% of our revenues related to patients participating in the various state Medicaid programs. Included in these payments are DSH and other supplemental payments received under various state Medicaid programs. Medicaid programs are funded by both the federal government and states to provide healthcare benefits to limited categories of low-income individuals under 65 years of age. These programs and the reimbursement methodologies are administered by the states under approved plans and vary from state to state and from year to year. Amounts received under the Medicaid programs are often significantly less than the hospital's customary charges for the services provided. Most state Medicaid payments are made under a prospective payment system, fee schedule, cost reimbursement program, or some combination of these three methods. All of our hospitals are currently certified to participate in their respective state Medicaid programs.

As enacted, the Affordable Care Act essentially required states to expand Medicaid coverage to all individuals under age 65 with incomes effectively at or below 138% of the federal poverty level ("***FPL***"). However, that portion of the Affordable Care Act was held to be unconstitutional by the U.S. Supreme Court, and, as a result, states may opt out of the expansion without losing their existing Medicaid funding. Therefore, the income level required for individuals to qualify for Medicaid varies widely from state to state. To offset the cost of the Medicaid program's expansion, the Affordable Care Act authorized the federal government to provide states with "matching funds" (referred to as "***Enhanced FMAP***") to cover the costs of covering the newly eligible individuals. The Enhanced FMAP was 100% for CYs 2014 through 2016; 95% in CY 2017; 94% in CY 2018; 93% in CY 2019; and will be 90% in CYs 2020 and thereafter.

In recent years, we have benefited from the expansion of Medicaid under the Affordable Care Act, and effective as of January 1, 2020, Idaho and Utah, two additional states in which we operate, expanded their Medicaid programs. In addition, Oklahoma, an additional state in which we operate, is expected to expand its Medicaid program in 2021. However, a number of states in which we operate have not expanded their Medicaid programs or are seeking waivers that could reduce their Medicaid-eligible populations. Several states have adopted or are considering legislation designed to reduce or control their Medicaid expenditures, including enrolling Medicaid recipients in managed care programs, and imposing additional taxes on hospitals to help finance such states' Medicaid systems. Given the reductions in the Enhanced FMAP and in light of the ongoing litigation regarding the constitutionality of, and potential further modification to, the Affordable Care Act, we are unable to predict how many, if any, additional states in which we operate will expand their Medicaid programs or how many, if any, of the states in which we operate that have expanded their Medicaid programs will keep their expansions in place in the future.

The Affordable Care Act also included a number of provisions that are intended to improve the quality of care that is provided to Medicaid beneficiaries. Among other things, the Affordable Care Act prohibits federal funds from being used to reimburse providers for services related to provider preventable conditions, such as HACs, wrong site surgeries and other provider preventable conditions that may be designated by each state Medicaid program.

Work Requirements

In addition to implementing value-based purchasing and quality-driven reimbursement requirements, CMS has also issued new guidance permitting states to impose work and/or community engagement requirements on certain Medicaid beneficiaries. In response to the guidance, a number of states, including several in which the Company has facilities, have requested demonstration waivers from CMS that would allow those states to impose work requirements on their Medicaid beneficiaries. CMS has approved the requests that have been made by Arizona, Arkansas, Georgia, Indiana, Michigan, Ohio, South Carolina, Utah and Wisconsin, and the remaining requests are still pending. However, a number of lawsuits have been filed challenging the authority of CMS to allow state Medicaid programs to impose work and/or community engagement requirements on their respective beneficiaries and, as a result, most of the demonstration waivers that have been approved by CMS have not yet been implemented. We cannot predict whether CMS will grant additional waivers that allow for the imposition of work and community engagement requirements on Medicaid beneficiaries or the impact that any such waivers will have on coverage for patients seeking care at our facilities. We also cannot predict whether the legal challenges that have been initiated against the demonstration waivers that have been approved by CMS will be successful or whether any legal challenges will be initiated against any other similar demonstration waivers that have been or may be granted by CMS in the future.

Medicaid Block Grants and Capped Federal Funding

As part of the movement to repeal, replace or modify the Affordable Care Act and as a means to reduce the federal budget deficit, there have been Congressional and administrative efforts to move Medicaid from an open-ended program with coverage and benefits set by the federal government to one in which states receive a fixed amount of federal funds, either through block grants or per capita caps, and have more flexibility to determine benefits, eligibility and provider payments. If implemented, we cannot predict whether the amount of fixed federal funding to the states will be based on current payment amounts, or if it will be based on lower payment amounts, which would negatively impact those states that expanded their Medicaid programs in response to the Affordable Care Act. Such efforts to modify or reduce federal funding of the Medicaid program, as well as those that would reduce the amount of federal Medicaid matching funds available to states by curtailing the use of provider taxes, could have a negative impact on state Medicaid budgets resulting in less coverage for eligible individuals or lower reimbursement rates.

On November 11, 2019, Tennessee, one of the states in which we operate, submitted an amendment to CMS for its Medicaid demonstration waiver that would convert federal funding for the Tennessee Medicaid program to a modified block grant program. CMS approved the amendment on January 8, 2021, and as required by state law, the Tennessee General Assembly approved the implementation of the amendment on January 15, 2021. Under the amendment, the Tennessee Medicaid program would receive federal matching funds for expenditures up to an aggregate annual cap. The aggregate cap would be based on the Tennessee Medicaid program's historical expenditures and would be increased to reflect a reasonable growth rate over time and for unexpected increases in enrollment. In exchange, the Tennessee Medicaid program would be given increased flexibility in how it operates and would be entitled to 55% of any savings that are achieved if spending is below the aggregate cap and the state meets certain quality targets. Any savings would generally be required to be re-invested in the Tennessee Medicaid or other health related programs. Despite being granted increased administrative flexibility, the Tennessee Medicaid program would be required to maintain the coverage and benefit levels that were in place as of December 31, 2020. We cannot predict whether the new Presidential administration will attempt to rescind CMS' approval of the amendment to the Tennessee Medicaid program, whether litigation will be filed against the conversion of federal funding for the Tennessee Medicaid program to a modified block grant program, whether the changes authorized by the amendment to the Tennessee Medicaid program will ever become effective, and, if so, the impact those changes will have on our operations and revenues.

Medicaid Supplemental Payments

Medicaid supplemental payments ("***MSPs***") are payments made to providers separate from and in addition to those made at a state's standard Medicaid payment rate. MSP programs are jointly financed by state funds and federal matching funds. The state portion may be funded through general revenue, intergovernmental transfers from local governments or healthcare related taxes imposed by states in the form of a mandatory provider payment related to healthcare items or services. The two most prevalent forms of MSPs are Medicaid DSH and Upper Payment Limit ("***UPL***") payments.

Medicaid DSH payments are federally required to be made by the states to hospitals that serve significant numbers of Medicaid and uninsured patients in recognition of the added costs incurred by hospitals in treating those patients. The federal government distributes federal Medicaid DSH funds to each state based on a statutory formula. The states then distribute the DSH funding among qualifying hospitals. Although federal Medicaid law defines some level of hospitals that must receive Medicaid DSH funding, states have broad discretion to define additional hospitals that also may qualify for Medicaid DSH payments and the amount of such payments. However, the total amount of Medicaid DSH payments a state may make and the total amount any one hospital may receive are both capped by federal law.

Pursuant to the Affordable Care Act, as amended by subsequent legislation, funding for Medicaid DSH programs was to be reduced by $4 billion in FFY 2020 and $8 billion per year from FFY 2021 through FFY 2025. Congress has delayed the reduction in funding for Medicaid DSH programs on a number of occasions, most recently through the CCA, which eliminates the scheduled Medicaid DSH reductions for FFYs 2021 through 2023 but adds additional Medicaid DSH reductions for FFYs 2026 and 2027. We cannot predict whether Congress will further delay or otherwise modify the reductions in the future. Because many of the states in which we operate have not expanded Medicaid programs as intended under the Affordable Care Act, the reduction in Medicaid DSH payments may take place without a coupled increase in the Medicaid eligible population, thus increasing the net amount of uncompensated care we provide.

Unlike Medicaid DSH payments, UPL payments are not required to be made by states under federal law. Rather, federal regulations establish an upper payment limit above which states may not receive federal matching dollars. UPL programs have expanded in recent years, and certain of our hospitals receive payments under such programs. Because services provided to Medicaid beneficiaries enrolled in managed care are not included in state UPL calculations, as states increase their use of managed care Medicaid programs, UPL MSPs could be reduced. UPL funding and matching federal funds may also be reduced or eliminated as a result of state or local governmental legislation, state changes to historical funding levels or related taxes, compliance reviews by CMS, or changes to federal Medicaid funding affecting such programs.

On November 18, 2019, CMS released a proposed rule, the Medicaid Fiscal Accountability Rule, that was intended to increase federal oversight of MSPs and state Medicaid financing policies. Among other things, the proposed rule would have added new reporting requirements on UPL payment arrangements, imposed limitations on UPL payments that are made to physicians and certain other practitioners, and imposed limits on the use of healthcare provider taxes, intergovernmental transfers and certified public expenditures. CMS withdrew the proposed rule in 2020. However, some of the reporting requirements contained in the Medicaid Fiscal Accountability Rule were included in the CCA, and, beginning in FFY 2022, each state will be required to provide CMS with, among other things, (i) a description of the stated purpose and intended effects of the state's MSPs, (ii) an explanation of how the state's MSPs will result in payments that are consistent with the requirements of the Medicaid program, including the program's standards with respect to efficiency, economy, quality of care, and access, (iii) the criteria used to determine provider eligibility for the state's MSPs, (iv) a comprehensive description of the methodology used to calculate the amount of, and distribute, MSPs to each eligible provider, and (v) an assurance that the total Medicaid payments made by the state to inpatient hospital providers, including any MSPs, will not exceed the UPL. The CCA also further clarifies how third-party payments are to be considered when determining Medicaid DSH hospital-specific limits. We cannot predict the impact, if any, that the reporting requirements and other Medicaid provisions in the CCA will have on MSPs and UPL payments that are made by state Medicaid programs or whether Congress or CMS will adopt any additional legislation or regulations that will eliminate or otherwise limit MSPs and/or UPL payments. In addition, we cannot predict whether MSP programs will continue (and, if continued, whether we will qualify for such programs) or guarantee that revenues recognized from these programs will not decrease.

Budget cuts, federal or state legislation, or other changes in the administration or interpretation of government health programs by government agencies or contracted managed care organizations could have a material adverse effect on our financial position and results of operations.

Recovery Audit and Other Review Contractors

Recovery audit contractors ("***RACs***") are used by CMS and state agencies to detect Medicare and Medicaid overpayments not identified through existing claims review mechanisms. The RAC program relies on private companies to examine Medicare and Medicaid claims filed by healthcare providers. RACs perform post-discharge audits of medical records to identify overpayments resulting from incorrect payment amounts, non-covered services, medically unnecessary services, incorrectly coded services, and duplicate services and are paid on a contingency basis. Any claims identified as overpayments are subject to a RAC program appeals process. In 2016, in connection with the procurement of the new recovery audit contracts, CMS made a number of enhancements to the RAC program, including the establishment of a RAC program Provider Relations Coordinator, requiring RACs to maintain an overturn rate of less than 10% at the first level of appeal, requiring RACs to maintain an accuracy rate of at least 95%, and establishing additional documentation request limits based on a provider's compliance with Medicare rules, that are intended to address provider and other stakeholder concerns. CMS has also limited the number of claims that RACs may audit by limiting the number of records that RACs may request from hospitals based on each hospital's claim denial rate for the previous year.

In addition to RACs, CMS employs Unified Program Integrity Contractors ("***UPICs***"), which integrate the functions of the former Zone Program Integrity Contractors, Program Safeguard Contractors, and Medicaid Integrity Contractors, to perform post-payment audits of Medicare and Medicaid claims and identify overpayments. A number of state Medicaid agencies and other contractors have also increased their review activities.

Although we believe our claims for reimbursement submitted to the Medicare and Medicaid programs are accurate, many of our hospitals have had Medicare claims audited by the RAC program. While our hospitals have successfully appealed many of the adverse determinations raised by Medicare RAC audits, we cannot predict if this trend will continue or the results of any future audits. We cannot predict the volume or outcome of any future audits conducted by the various RACs and other review programs to which our hospitals will be subject.

Utilization and Claim Review

Federal law contains numerous provisions designed to ensure that services rendered to Medicare and Medicaid patients meet professionally recognized standards and are medically necessary and that claims for reimbursement are properly filed. These provisions include a requirement that a sampling of admissions of Medicare and Medicaid patients must be reviewed on a post-discharge basis by quality improvement organizations ("***QIOs***"), which review the appropriateness of Medicare and Medicaid patient admissions and discharges, the quality of care provided, the validity of MS-DRG classifications and the appropriateness of cases of extraordinary length of stay or cost. QIOs may deny payment for services or assess fines and also have the authority to recommend to HHS that a provider which is in substantial noncompliance with the standards of the QIO be excluded from participation in the Medicare program. Utilization review is also a requirement of most non-governmental managed care organizations.

In addition to utilization reviews, CMS has also adopted a nationwide claim review and provider education program known as the Targeted Probe and Educate ("***TPE***") program, which is intended to reduce errors in the claims submission process and focuses on items and services that pose the greatest risk to the Medicare program or that have a high national error rate, such as short inpatient stays. Under the TPE program, MACs use data analysis to identify providers who, for a particular item or service, have high claim denial rates or billing practices that vary significantly from their peers. Once a provider has been identified, the MAC reviews between 20 and 40 of the provider's claims for the item or service and, if issues are noted, offers the provider an individualized education session that is based on the results of the review. The provider is then generally given 45 days to improve its systems and processes, and, after that period has ended, the MAC conducts another review of the provider's claims. If additional issues are identified, the provider is given the opportunity for another education session. Providers are typically given three rounds of review and education before being referred to CMS for further action, potentially including pre-payment review, referral for RAC review, or in some cases revocation of billing privileges.

HMOs, PPOs and Other Private Insurers

In addition to government programs, our facilities are reimbursed by differing types of private payers including HMOs, PPOs and other private insurers. Also included in this category are the patient responsibility portions for co-payment and deductible obligations under these programs. Our revenues from HMOs, PPOs and other private insurers were approximately 41.6% of our revenues for the year ended December 31, 2020. Revenues from HMOs, PPOs and other private insurers are subject to contracts and other arrangements that require us to discount the amounts we customarily charge for healthcare services or accept fixed, pre-determined fees for our services. These discounted contractual arrangements often limit our ability to increase charges or revenues in response to increasing costs. We actively negotiate with these payers in an effort to maintain or increase the pricing of our healthcare services. However, we have no control over patients switching their healthcare coverage to a payer with which we have negotiated less favorable reimbursement rates. In recent years, an increasing number of our patients have moved to lower cost healthcare coverage plans, and such plans generally provide lower reimbursement rates and require patients to pay an increased portion of the costs of care through deductibles, co-payments or exclusions. Additionally, plans purchased through the Exchanges are increasingly using narrow and tiered networks that limit beneficiary provider choices. If we provide services when we are not a participating provider in the network, it can result in higher patient responsibility amounts that a patient may not have the ability to pay or may choose not to pay. We expect these trends to continue in the coming years.

Self-Pay Patients

Self-pay revenues are primarily generated through the treatment of uninsured patients. Our revenues from self-pay patients were approximately 0.7% of our revenues for the year ended December 31, 2020. Beginning in 2014, our self-pay revenues began to decrease as a percentage of overall revenues due largely to a shift from self-pay to Medicaid and HMOs, PPOs and other private insurers for a portion of our patient population, which primarily has been a result of the Affordable Care Act and the expansion of Medicaid coverage in certain of the states in which we operate. These reductions partially offset trends our facilities experienced in prior years, which included increases in self-pay revenues due to a combination of broad economic factors, including high levels of unemployment in many of our markets and increasing numbers of individuals and employers who purchase insurance plans with high deductibles and high co-payments. We cannot predict how administrative or judicial interpretations, legislative actions or any other modifications to the Affordable Care Act that may be implemented or adopted, such as the cessation of cost sharing reduction payments or the repeal of the individual mandate, may impact our self-pay revenues. We also cannot predict whether the business closures and layoffs that are occurring as a result of the COVID-19 pandemic will increase the number of underinsured and uninsured patients that seek treatment at our facilities.

In addition, effective January 1, 2022, the No Surprises Act requires health care providers, including hospitals and other health care facilities, to provide uninsured patients with a good faith estimate of the provider's total expected charges for scheduled items or services, including any expected ancillary services, before providing the items or services to the patient. Uninsured patients will be able to utilize a patient-provider dispute resolution process to challenge the provider's charges if they receive a bill that is substantially higher than the good faith estimate that was provided by the health care provider. We cannot predict how the uninsured patient good faith estimate and dispute resolution provisions of the No Surprises Act will impact the amounts collected by the Company's facilities for self-pay patients.

Surprise Medical Billing

On December 21, 2020, Congress adopted legislation that is intended to limit the "surprise" medical bills that are often received by individuals receiving emergency and certain other services (such as anesthesia services) from out-of-network providers. Effective as of January 1, 2022, the No Surprises Act prohibits out-of-network providers from balance billing patients for (i) emergency care services that are provided by out-of-network facilities or at in-network facilities by out-of-network providers and (ii) transportation and related services that are provided by out-of-network air ambulance providers. The No Surprises Act also generally prohibits out-of-network providers from billing patients for non-emergency medical treatment unless the provider first notifies the patient of the provider's network status and estimated charges and the patient agrees to be financially liable for the additional amounts. Violations of the No Surprises Act are punishable by civil monetary penalties of up to $10,000, and the No Surprises Act may be enforced by both the state and federal governments.

When the prohibitions of the No Surprises Act apply, a patient's financial liability will generally be limited to his or her in-network amount, which will be determined in accordance with a process that will be set forth in regulations that are required to be promulgated by the Secretary of HHS prior to the effective date of the legislation. In addition, the patient's third-party payer must either pay the out-of-network provider an initial payment amount or issue a notice of denial to the provider for the services that were rendered within 30 days of the payer's receipt of the provider's claim. If the provider is not satisfied with the payer's initial payment amount, the provider and the payer will begin a 30-day negotiation period. If the provider and the payer cannot agree on a payment amount during the negotiation period, the parties may elect to initiate an independent dispute resolution ("***IDR***") process. The IDR process will be conducted by a neutral arbitrator that has been approved by the federal government. As part of the IDR process, the provider and the payer will each submit a final payment offer for consideration by the arbitrator. The arbitrator may consider any relevant information regarding the claim, including the acuity of the patient and the training and experience of the provider. However, the arbitrator may not consider the provider's billed charges or the reimbursement rates paid by Medicare, Medicaid or any other government healthcare program. The arbitrator will be required to pick one of the two offers (i.e., the arbitrator will not be allowed to split the difference between the amounts that have been proposed by the payer and the provider or otherwise determine a different payment amount), and the losing party will be responsible for the costs of the arbitration.

We cannot predict how the No Surprises Act will be implemented by HHS or how it will ultimately be enforced by the federal and various state governments. We also cannot predict the amounts that will be received by our facilities and our employed providers for out-of-network services, whether the No Surprises Act will impact the in-network payment rates that are offered by third-party payers and the willingness of those payers to enter into participation agreements with us and our facilities in the future, or the costs we will incur in complying with the requirements of the No Surprises Act. In addition, a number of states are considering or have already adopted legislation to eliminate surprise medical billing. We cannot predict how state legislative actions to modify or pass these proposals may be implemented or adopted, or what impact, if any, those actions may have on our operations and revenues.

Price Transparency

Transparency in healthcare pricing has become a focal point for CMS, Congress, and many state legislatures. For example, effective as of January 1, 2021, hospitals generally are required to post their standard charges prominently on a publicly available website. Under CMS regulations, each hospital's standard charges must be posted in two ways: (1) a single machine-readable digital file containing the gross charges, discounted cash prices, payer-specific negotiated charges, and de-identified minimum and maximum negotiated charges for all items and services provided by the hospital and (2) a public display in a consumer-friendly manner of cash prices, payer-specific negotiated charges, and de-identified minimum and maximum negotiated charges for at least 300 "shoppable" services (70 CMS-specified and 230 hospital-selected). CMS has stated that it intends to audit and monitor hospital compliance with its reporting requirements and to take actions to address hospital noncompliance, including issuing a warning notice, requesting a corrective action plan, and imposing civil monetary penalties. In addition to the CMS hospital price transparency regulations, HHS and the Departments of the Treasury and Labor have issued regulations that require most private health plans, including group health plans and individual health insurance market plans, to disclose pricing and cost-sharing information to their beneficiaries. A number of states have also adopted their own healthcare price transparency and/or disclosure statutes.

In addition to addressing surprise billing, the No Surprises Act contains a number of provisions that are intended to promote provider and health plan price transparency. Among other things, effective as of January 1, 2022, under the No Surprises Act, healthcare providers will be required to provide "good faith estimates" of their total expected charges for scheduled items and services to the patient's health plan if the patient is insured prior to the item and/or service being provided. Health plans will be required to provide patients with an "advanced explanation of benefits" that includes: (1) information regarding the network status of the provider, (2) a copy of the provider's "good faith estimate," (3) an estimate of the amount that the patient will be expected to pay for the item or service, and (4) information on any applicable pre-authorization requirements. The Secretary of HHS is required to adopt regulations to implement the price transparency provisions of the No Surprises Act.

Although we continue to evaluate, and are taking proactive steps in response to, the legislative and regulatory developments regarding price transparency, we cannot predict how existing regulations will be implemented or interpreted or whether any other requirements will be imposed on providers and health plans. We also cannot predict what affect the public disclosure of hospitals' or insurance providers' negotiated rates will have on our future negotiations with payers or the effect that the disclosure of pricing information by healthcare providers and health plans will have on our patient volumes and revenues.

Healthcare Reform

The Affordable Care Act, which became federal law in 2010, dramatically altered the U.S. healthcare system and was intended to decrease the number of uninsured Americans and reduce the overall cost of healthcare by, among other things, requiring most Americans to obtain health insurance, also referred to as the "individual mandate," providing additional funding for Medicaid in states that choose to expand their programs, reducing IPPS, OPPS and Medicare and Medicaid DSH payments to providers, expanding the Medicare program's use of value-based purchasing programs, tying hospital payments to the satisfaction of certain quality criteria, and instituting certain private health insurance reforms. The Affordable Care Act has, however, been subject to a number of legislative and regulatory changes and court challenges, and its future is uncertain.

For example, during his term, President Trump issued various executive orders that were designed to delay or alter the implementation of various provisions of the Affordable Care Act. While President Biden has stated that he will take executive actions to increase the number of individuals covered under the Affordable Care Act, such as by opening a special enrollment period, we cannot predict the impact that the change in Presidential administrations may have on how the Affordable Care Act is interpreted and/or implemented in the future. In addition, a number of bills have been introduced in Congress that would repeal the Affordable Care Act and would replace it with varying health coverage plans, including plans that would allow insurers to sell health insurance across state lines, allow the use of health savings accounts ("***HSAs***") without a high-deductible plan, or give states the option to either keep the coverage framework created by the Affordable Care Act (e.g., expanded Medicaid, individual subsidies, and insurance exchanges) or utilize the increased federal funding that was intended for Medicaid expansion to be provided by the federal government under the Affordable Care Act to create HSAs that can be used by low-income individuals to purchase health insurance.

In addition to the administrative actions and legislative efforts to repeal, replace or modify the Affordable Care Act, there have been and may continue to be a number of legal challenges to various provisions of the Affordable Care Act and the regulations that have been promulgated thereunder. For example, in 2018, a number of states filed a lawsuit against the federal government alleging that, in light of the repeal of the penalties associated with the individual mandate, the entire Affordable Care Act was unconstitutional. On December 14, 2018, the U.S. District Court for the Northern District of Texas ruled in favor of those states and held that the Affordable Care Act was unconstitutional. The Court did not, however, issue an injunction against the continued enforcement of the Affordable Care Act. On appeal, the U.S. Fifth Circuit Court of Appeals held that the individual mandate was unconstitutional, but it remanded the case back to the U.S. District Court for the Northern District of Texas for further analysis as to whether the entire Affordable Care Act should be held to be unlawful. The case was appealed to the U.S. Supreme Court, which heard oral arguments on the matter in November 2020 and is expected to issue its ruling on the case in the spring or summer of 2021.

We cannot predict the outcome or impact of any legislative efforts to repeal, replace, or materially modify the Affordable Care Act or the litigation that has been filed in relation to the Affordable Care Act, including its constitutionality. Additionally, we also cannot predict the impact that the new Presidential administration and Congressional leadership will have on the implementation and enforcement of the provisions of the Affordable Care Act, on any current, pending or potential regulations adopted to implement the law, or any future healthcare reform legislation or initiatives, including "Medicare-for-all" or other single-payer proposals.

Expanded Coverage

Based on original Congressional Budget Office ("***CBO***") and CMS estimates, by 2020, the Affordable Care Act was originally expected to expand coverage to 32 to 34 million people, resulting in coverage of an estimated 95% of the legal U.S. population and an uninsured population of approximately 27 million individuals. This increased coverage was expected to occur through a combination of public program expansion and private sector health insurance and other reforms. However, in September 2020, the CBO estimated that, due to a number of factors, between 31 and 32 million people were uninsured in 2020 and that the number of uninsured individuals would remain relatively consistent through 2030.

Public program expansion has been driven primarily by expanding the categories of individuals who are eligible for Medicaid coverage and allowing individuals with relatively higher incomes to qualify for Medicaid coverage. When the Affordable Care Act was adopted, it essentially made the expansion of the Medicaid program mandatory. However, in 2012, the U.S. Supreme Court held that the provision of the Affordable Care Act that authorized the Secretary of HHS to penalize states that chose not to participate in the expansion of the Medicaid program by removing all of their existing Medicaid funding was unconstitutional. Based on the U.S. Supreme Court's ruling, a number of states, including several in which the Company has facilities, have opted not to expand their Medicaid programs. Additional public program expansion has occurred through provisions of the Affordable Care Act that authorize the federal government to subsidize states that create non-Medicaid plans for residents whose incomes are greater than 133% of the FPL but do not exceed 200% of the FPL and allow Medicaid participating hospitals to make presumptive determinations of Medicaid eligibility for certain categories of individuals, such as pregnant women, infants, children, and parents and other caretaker relatives and their spouses. If an individual is found to be presumptively eligible for Medicaid benefits, the hospital will get paid for the services it provides during the temporary presumptive eligibility period, just as though the patient were already enrolled in the Medicaid program.

The expansion of health coverage through the private sector as a result of the Affordable Care Act has occurred through new requirements on health insurers, employers and individuals. For example, commencing January 1, 2014, health insurance companies were prohibited from imposing annual coverage limits, excluding persons based upon pre-existing conditions or denying coverage for any individual who is willing to pay the premiums for such coverage. In addition, since January 1, 2011, each health plan has been required to keep its annual non-medical costs lower than 15% of premium revenue for the group market and lower than 20% in the small group and individual markets or rebate its enrollees the amount spent in excess of the percentage. Also, since September 23, 2010, health insurers have not been permitted to deny coverage to children based upon a pre-existing condition and must allow dependent care coverage for children up to 26 years old. Larger employers are subject to new requirements and incentives to provide health insurance benefits to their full-time employees, and, effective January 1, 2016, all employers subject to the requirement were required to offer health insurance coverage to 95% of their full-time employees and their dependents in order to avoid penalties.

To facilitate the purchase of health insurance by individuals and small employers, each state was required to establish an Exchange by January 1, 2014. For individuals and families below 400% of the FPL, the cost of obtaining health insurance through the Exchanges is subsidized by the federal government. Those with lower incomes will be eligible to receive greater subsidies. Health insurers participating in the Exchanges must offer a set of minimum benefits to be defined by HHS and may offer more benefits. Any benefits to us from the expansion of private sector coverage depend in large part on our success in contracting with payers whose policies are listed on the Exchanges. We currently have contracts with Exchange payers in every state in which we operate, and the reimbursement rates paid under those contracts generally are comparable to that paid to us by other private payers.

Public Program Spending

The Affordable Care Act provides for a number of Medicare, Medicaid and other federal healthcare program spending reductions. The CBO previously estimated that between 2013 and 2023, these program spending reductions would include $415 billion in Medicare fee-for-service market basket and productivity reimbursement reductions for all providers, the majority of which ($260 billion) would come from hospitals. The CBO's estimate also included an additional $56 billion in reductions of Medicare and Medicaid DSH funding. CMS had originally estimated that the Affordable Care Act would result in $64 billion in reductions of Medicare and Medicaid DSH funding, with $50 billion of the reductions coming from Medicare. Some of those reductions, most notably the Medicaid DSH funding reductions, have been delayed by subsequent legislation, and we cannot predict whether the public program spending reductions required by the Affordable Care Act will be further delayed or modified in the future.

Accountable Care Organizations

The Affordable Care Act requires HHS to establish a Medicare Shared Savings Program that promotes accountability and coordination of care through the creation of accountable care organizations ("***ACOs***"). ACOs are groups of hospitals, physicians and other designated professionals and suppliers who come together voluntarily to invest in infrastructure and redesign delivery processes to achieve high quality and efficient delivery of services. The program is intended to produce savings as a result of improved quality and operational efficiency. ACOs that achieve quality performance standards established by HHS are eligible to share in a portion of the amounts saved by the Medicare program. There are several types of ACO programs, and as of January 1, 2021, 477 ACOs had been established to participate in the Medicare Shared Savings Program, and additional ACOs are being established by private payers. A few of our facilities currently participate in ACOs.

Bundled Payment Pilot Programs

The Affordable Care Act created the Center for Medicare & Medicaid Innovation ("***CMMI***") and made it responsible for establishing demonstration projects and other initiatives in order to identify, develop, test and encourage the adoption of new methods of delivering and paying for healthcare that create savings under the Medicare and Medicaid programs while improving quality of care. Under these projects and initiatives, participating providers agree to receive one payment for services provided to Medicare patients for certain medical conditions or episodes of care and accept accountability for costs and the quality of care that is provided. By financially rewarding providers for quality, cost-effective care and penalizing providers when costs exceed a certain amount, these models are intended to lead to higher quality, more coordinated care at a lower cost to the Medicare program. In connection with these programs, CMMI has developed a voluntary Bundled Payment for Care Improvement Advanced Model ("***BPCI Advanced***") to test innovative payment and service delivery models that have the potential to reduce Medicare and Medicaid expenditures while preserving or enhancing the quality of care for beneficiaries. Participation in bundled payments programs is generally voluntary, but CMS does currently require hospitals in certain geographic areas to participate in the Comprehensive Care for Joint Replacement model, which covers certain extremity joint replacement procedures and is scheduled to end in 2021. CMS has developed a radiation oncology bundled payment program that could become effective as soon as January 1, 2022, and CMS has indicated that it expects to develop additional voluntary and mandatory bundled payment models in the future. Several of our facilities currently participate in bundled payment programs.

Specialty Hospital Limitations

Over the last decade, we have faced competition from hospitals that have physician ownership. The Affordable Care Act prohibits newly created physician-owned hospitals from billing for Medicare patients referred by their physician owners. While the Affordable Care Act grandfathers existing physician-owned hospitals, it does not allow these hospitals to increase the percentage of physician ownership and significantly restricts their ability to expand. As of December 31, 2020, we operated four hospitals through joint ventures with physicians in which we own a controlling interest.

Impact of the Affordable Care Act on the Company

The expansion of health insurance coverage under the Affordable Care Act has resulted in an increase in the number of patients using our facilities who have either private or public program coverage. It is difficult to predict with great precision the timing or size of positive or negative impacts on revenue as a result of the Affordable Care Act, because of uncertainty surrounding a number of material factors, including the following:

- the elimination of the penalties associated with the individual mandate;
- the cessation of cost sharing reduction payments to insurers;
- the outcome of continuing litigation relating to the constitutionality of the Affordable Care Act or the possibility that the Affordable Care Act will be further modified by Congress;
- how many previously uninsured individuals will ultimately obtain coverage as a result of the Affordable Care Act;
- what percentage of the future newly insured patients will be covered under the Medicaid program and what percentage will be covered by private health insurers;
- the extent to which states impose work and community engagement and/or premium requirements on their Medicaid beneficiaries;
- the number of states that ultimately elect to expand their Medicaid programs and when that expansion occurs;
- whether any states that have expanded their Medicaid programs will scale back such expansion through the imposition of work or premium requirements or otherwise as the Enhanced FMAP is reduced;
- the extent to which states will enroll any new Medicaid participants in managed care programs;
- the rates charged by private payers for insurance purchased on the Exchanges;
- the change, if any, in the volume of inpatient and outpatient hospital services that are sought by and provided to previously uninsured individuals;
- the future rates paid to hospitals by private payers for newly covered individuals under different plans, including those covered through the Exchanges and those who might be covered under the Medicaid program under contracts with the state;
- increasing self-pay amounts as a result of individuals in the Exchanges who select high deductible plans and risks presented by their ability to pay such deductibles;
- whether or not private insurers will participate in the Exchanges, and whether such participation is through the use of narrow networks that restrict the number of participating providers or tiered networks that impose significantly higher cost sharing obligations on patients that obtain services from providers in a disfavored tier; and
- whether the net effect of the Affordable Care Act, including the prohibition on excluding individuals based on pre-existing conditions, the requirement to keep medical costs lower than a specified percentage of premium revenue, other health insurance reforms and the annual fee applied to all health insurers, will be to put pressure on the bottom line of health insurers, which in turn might cause them to seek to reduce payments to hospitals with respect to both newly insured individuals and their existing business.

Additionally, since approximately 55.7% of our revenues in 2020 were related to patients participating in Medicare and Medicaid programs, collectively, the reductions in Medicare and Medicaid reimbursement and in the growth of spending by the Medicare and Medicaid programs that are contemplated by the Affordable Care Act will significantly impact us and could offset any positive effects of the Affordable Care Act. It is difficult to predict with great precision the size of the revenue reductions to Medicare and Medicaid spending, because of uncertainty regarding a number of material factors, including the following:

- the amount of overall revenues we will generate from Medicare and Medicaid business when the reductions are fully implemented;
- whether reductions required by the Affordable Care Act will be changed by statute;
- whether efforts to reform Medicaid funding into block grants or per capita caps will be successful, and, if implemented, the impact such changes may have on the Medicaid programs of states in which we operate;
- the size of the Affordable Care Act's annual productivity adjustment to the market basket in future years;
- the amount of the Medicare DSH reductions that are made;
- the allocation to our hospitals of the Medicaid DSH reductions, if and when they are put into effect;
- what the losses in revenues will be, if any, from the Affordable Care Act's quality initiatives;
- the scope and nature of potential changes to Medicare reimbursement methods, such as an emphasis on bundling payments or coordination of care programs; and
- reductions to Medicare payments CMS may impose for "excessive readmissions."

Because of the many variables involved, we are unable to predict the future effect on the Company of the expected increases or decreases in insured individuals using our facilities, the reductions in Medicare spending and reductions in Medicare and Medicaid DSH funding, and numerous other provisions in the Affordable Care Act that may affect us. Additionally, it is unclear how many states will ultimately implement the Medicaid expansion, whether the Medicaid program will be reformed, or whether the Affordable Care Act will be further modified or found to be unconstitutional. Due to these factors, we are unable to predict with any reasonable certainty or otherwise quantify the future impact of the Affordable Care Act on our business model, financial condition or result of operations.

Competition for Patients

Our hospitals and other healthcare businesses operate in extremely competitive environments. Competition among healthcare providers occurs primarily at the local level. Accordingly, each facility develops its own strategies to address competition locally. A hospital's position within the geographic area in which it operates is affected by a number of competitive factors, including, but not limited to:

- the scope, breadth and quality of services a hospital offers to its patients and physicians;
- whether new, competitive services are subject to certificate of need or other restrictions;
- the number, quality and specialties of the physicians who admit and refer patients to the hospital;
- the nurses and other healthcare professionals employed by the hospital or on the hospital's staff;
- the hospital's reputation;
- its managed care contracting relationships;
- its location and the location and number of competitive facilities and other healthcare alternatives;
- the physical condition of its buildings and improvements;
- the quality, age and state-of-the-art of its medical equipment;
- its parking or proximity to public transportation;
- the length of time it has been a part of the community;
- the relative convenience of the manner in which care is provided (for example, whether services are available on an outpatient basis and whether services can be obtained quickly);
- the choices made by the physicians on the medical staff of the hospital; and
- the charges for its services.

In addition, tax-exempt competitors may have certain financial advantages not available to our facilities, such as endowments, charitable contributions, tax-exempt financing, exemptions from sales, property and income taxes, and participation in the 340B Program. In certain states, some not-for-profit hospitals are permitted by law to directly employ physicians while for-profit hospitals are prohibited from doing so.

We also face increasing competition from specialized care providers, including freestanding emergency departments and outpatient surgery, oncology, physical therapy, diagnostic and urgent care centers, as well as competing services rendered in physician offices. To the extent that other providers are successful in developing specialized outpatient facilities, our market share for those specialized services will likely decrease. Physician competition also has increased as physicians, in some cases, have become equity owners in surgery centers and outpatient diagnostic centers to which they refer patients. Some of our hospitals have developed specialized outpatient facilities where necessary to compete with these other providers.

Human Capital Resources

Overview

At December 31, 2020, our subsidiaries collectively had approximately 52,000 employees, including approximately 12,000 part-time employees. The majority of these employees are hospital-based, including nursing staff, physical and occupational therapists, laboratory and radiology technicians, pharmacy staff, facility maintenance workers and the administrative staffs of our facilities. We understand that, to fulfill our mission of Making Communities Healthier®, we must create places where people choose to come for healthcare, physicians want to practice, and employees want to work. To support this mission, talent development has been a longstanding strategic pillar for the organization.

Diversity, Equity and Inclusion

We are committed to creating an inclusive, community-based healthcare delivery system that provides equitable opportunities for all people, starting with our employees. We appointed a Chief Diversity and Patient Experience officer in early 2021 who is leading an enterprise-wide strategy focused on training and education of our workforce, targeted efforts to address health equity in our communities, and the recruitment and development of diverse talent. This includes the creation of new formal partnerships to recruit more diverse talent and match new recruits with carefully selected mentors and sponsors within our organization.

Recruitment and Retention

We believe that healthcare is best delivered close to home, and our facilities strive to recruit and retain qualified management and staff personnel. Our frontline caregivers, including nurses, are the heartbeat of our organization, and we have a robust strategy to enhance the recruitment and retention of clinical staff into the future. This strategy includes meaningful education and career advancement opportunities, and competitive compensation. The scarce availability of nurses and other medical support personnel in some markets has required us to enhance wages and benefits and/or hire more expensive temporary personnel in certain situations.

Our facilities also employ and have affiliations with physicians. Many physicians today prefer to be employed, rather than operating their own practices or joining existing medical groups. Our hospitals and affiliated entities employed more physicians during 2020 than 2019. When employing office-based physicians, we also often employ office employees and other personnel necessary to support these physicians and incur additional expenses as a result. We expect this trend to continue.

We seek to attract both employed and affiliated physicians by maintaining a sharp focus on quality, driven by our National Quality Program; employing high performing talent; equipping our facilities with technologically advanced equipment and an attractive, up-to-date physical plant; and otherwise creating an environment within which physicians choose to practice. While physicians may terminate their association with our facilities at any time, we believe that by striving to maintain and improve the quality of care at our facilities and by maintaining ethical and professional standards, our facilities will be better positioned to attract and retain qualified physicians with a variety of specialties.

When recruiting new physicians to our communities, the types, amount and duration of compensation and assistance we can provide to recruited physicians are limited by the federal physician self-referral law (commonly referred to as the "***Stark law***"), the federal Anti-kickback Statute (the "***Anti-kickback Statute***"), state anti-kickback and physician self-referral statutes, and related regulations. The Stark law requires, among other things, that recruitment assistance can only be provided to physicians who meet certain geographic and practice requirements, that the amount of assistance cannot be changed during the term of the recruitment agreement, and that the recruitment payments cannot generally benefit physicians currently in practice in the community beyond recruitment costs actually incurred. In addition to these legal requirements, there is competition from other communities and facilities for these physicians, and this competition continues after the physician begins practicing in one of our communities.

Labor Costs and Union Activity

Approximately 3,000 of our employees across certain of our facilities are unionized. While some of our non-unionized facilities experience union organizing activity from time to time, currently we do not expect these efforts to affect our future operations materially. Our facilities, like most facilities, have experienced rising labor costs. Our labor costs also may increase at higher rates among unionized employees. Unionized employees also may have rights under their collective bargaining agreements that restrict the ability of a facility to take certain actions with respect to these employees.

Government Regulation

Overview

All participants in the healthcare industry are required to comply with extensive government regulations at the federal, state and local levels. Under these laws and regulations, facilities must meet requirements for licensure and to qualify to participate in government healthcare programs, including the Medicare and Medicaid programs. These requirements relate to the adequacy of medical care, equipment, personnel, operating policies and procedures, maintenance of adequate records, rate-setting, compliance with building codes and environmental protection laws. If we fail to comply with applicable laws and regulations, we may be subject to criminal penalties and civil sanctions, and our facilities may lose their licenses and ability to participate in Medicare and Medicaid. In addition, government regulations frequently change. When regulations change, we may be required to make changes in our facilities, equipment, personnel and services so that our facilities remain licensed and qualified to participate in these programs. We believe that our facilities are in substantial compliance with current federal, state and local regulations and standards.

Acute care hospitals are subject to periodic inspection by federal, state and local authorities to determine their compliance with applicable regulations and requirements necessary for licensing, certification and accreditation. All of our hospitals are currently licensed under appropriate state laws and are qualified to participate in the Medicare and Medicaid programs. In addition, as of December 31, 2020, with the exception of Bluegrass Community Hospital and Saline Memorial Hospital, all of our hospitals were accredited by the Joint Commission.

Legislative and Regulatory Developments in Response to COVID-19

Numerous recent legislative and regulatory actions have been taken in an attempt to provide businesses, including healthcare providers, with relief from the negative impacts of the COVID-19 pandemic. The legislative and regulatory responses to COVID-19 generally impact many of the statutes, regulations and policies summarized or discussed throughout this Report. Unless otherwise noted, such summaries or discussions have not been updated to reflect the impact of the COVID-19 legislative and regulatory developments.

CARES Act and Related Stimulus Legislation

On March 27, 2020, the CARES Act was signed into law. The CARES Act is intended to provide over $2 trillion in stimulus funding for the U.S. economy. Among other things, the CARES Act contains a number of provisions that are intended to assist healthcare providers as they combat the effects of the COVID-19 pandemic. Those provisions include, among others:

- the temporary suspension of Medicare sequestration from March 1, 2020, to December 31, 2020;
- the delay of the planned reductions to the Medicaid DSH payments program until December 11, 2020;
- an appropriation of $180 million to Health Resources and Services Administration's Federal Office of Rural Health Policy that will be awarded to small rural hospitals by the states through the Small Rural Hospital Improvement Program;
- an appropriation of $250 million to the Hospital Preparedness Program; and
- an appropriation of $100 billion to the Emergency Fund for a new program to reimburse, through grants or other mechanisms, hospitals, healthcare providers and other approved entities for COVID-19-related expenses or lost revenues, represented as a negative change in year-over-year net patient care operating income.

The Paycheck Protection Program and Health Care Enhancement Act was enacted on April 24, 2020, which, among other things, provides an additional allocation of $75 billion to the Emergency Fund and an allocation of $25 billion for COVID-19 testing.

On December 21, 2020, Congress adopted the CCA, which provides an additional $900 billion in COVID-19 relief, including an additional $3 billion allocation to the Emergency Fund. The CCA also, among other things, further extends the temporary suspension of Medicare sequestration through March 31, 2021, delays the planned reductions to the Medicaid DSH payments program through FFY 2023, adds additional reductions to the Medicaid DSH payments program in FFYs 2026 and 2027, provides for a 3.75% increase in PFS rates in CY 2021 and allocates $30 billion for the purchase and administration of COVID-19 vaccines and related therapeutics.

Direct Grant Aid Payments

With respect to payments being made to providers from the Emergency Fund, beginning April 10, 2020, the Emergency Fund distributed $50 billion to hospitals based on their 2018 net patient revenue. Since that time, the Emergency Fund has distributed an additional $56 billion to a number of different types of healthcare providers, including participants in state Medicaid/CHIP programs, providers in areas particularly impacted by the COVID-19 outbreak, rural providers (including hospitals and rural health clinics), skilled nursing facilities, dentists, providers of services with lower shares of Medicare reimbursement or who predominantly serve Medicaid beneficiaries, and providers requesting reimbursement for the treatment of uninsured patients. In addition, on October 1, 2020, HHS announced that an additional $24.5 billion in relief payments would be made from the Emergency Fund, on an application basis, to certain healthcare providers. HHS has stated that these additional relief payments will be allocated in a way that is intended to achieve an equitable payment of two percent of annual revenue from patient care for all applicants and may also take into account a provider's change in operating revenues from patient care, minus their operating expenses from patient care. We recognized $646.3 million of direct grant aid payments as other income under the caption "Government stimulus income" in our accompanying consolidated statement of operations for the year ended December 31, 2020 included elsewhere in this Report.

Payments made by the Emergency Fund to healthcare providers are not loans, and, as a result, they do not need to be repaid. However, healthcare providers are required to file attestations acknowledging receipt of the payments and must agree to and meet the terms and conditions that are associated with the payments, which include, among other things, accepting in-network amounts for presumptive or actual out-of-network COVID-19 patients and not using the payments received from the Emergency Fund to reimburse expenses or losses that other sources are obligated to reimburse. HHS has indicated that it will be closely monitoring the payments that are made to providers through the Emergency Fund, and that HHS, along with the OIG, will be auditing providers to ensure that recipients comply with the terms and conditions that are associated with the Emergency Fund and other COVID-19 relief programs.

Medicare Accelerated and Advance Payment Program

Using existing authority and certain expanded authority under the CARES Act, HHS temporarily expanded the CMS Accelerated and Advance Payment Program to a broad group of Medicare Part A and Part B providers. Under the expanded Accelerated and Advance Payment Program, inpatient acute care hospitals could request up to 100% of their Medicare payment amount for a six-month period (critical access hospitals could request up to 125% of their payment amount for such period), and other providers and suppliers could request up to 100% of their Medicare payment amount for a three-month period. The repayment of these accelerated/advance payments does not begin until one year after the date of the provider's or supplier's receipt of the payment, which means repayment of these amounts will not commence until the second quarter of 2021. Once the repayment period starts, the amounts previously advanced to the provider or supplier will automatically be recouped from the provider's or supplier's new Medicare claims at a rate of 25% for a period of 11 months. After the end of that 11-month period, the amounts previously advanced to the provider or supplier will be automatically recouped from the provider's or supplier's new Medicare claims at a rate of 50% for a period of six months. At the end of the 17-month recoupment period, a letter requesting repayment of any remaining balance will be issued, and the provider or supplier will have 30 days from the date of the letter to repay the balance in full. If the remaining balance is not repaid after 30 days, the unpaid balance will accrue interest at a rate of 4% from the date of the demand letter until the balance has been repaid in full. Through December 31, 2020, we received a total of $991.0 million of Medicare advance payments under the Accelerated and Advance Payment Program, of which $369.8 million and $621.2 million are included under the captions "Current portion of Medicare advance payments" and "Long-term portion of Medicare advance payments", respectively, in our accompanying consolidated balance sheet at December 31, 2020 included elsewhere in this Report. We do not anticipate receiving any additional funds from the CMS Accelerated and Advance Payment Program.

COVID-19 Waivers and Temporary Suspension of Certain Regulatory Requirements

In addition to the financial relief that has been provided by the federal government under the CARES Act and other legislation that has been passed by Congress, CMS and many state governments have also issued a number of waivers or temporarily suspended a number of healthcare facility licensure and reimbursement requirements in order to provide hospitals, skilled nursing facilities, and other types of healthcare providers with increased flexibility to meet the challenges that are being presented by the COVID-19 pandemic. For example, CMS has temporarily waived the enforcement of certain requirements of the Medicare hospital conditions of participation and the Stark law to enable hospitals to treat patients in temporary locations and to obtain services from physicians in a more efficient and timely manner. Likewise, many states have also suspended the enforcement of certain certificate of need and licensure requirements to ensure that hospitals and other healthcare providers have sufficient capacity to treat COVID-19 patients. Our facilities have utilized the waivers and regulatory flexibility that is being provided to the extent necessary to appropriately respond to the COVID-19 pandemic.

CARES Act Tax Provisions

The CARES Act also provides for certain federal income tax changes, including an increase in the interest expense tax deduction limitation, the deferral of the employer portion of Social Security payroll taxes, refundable payroll tax credits, employee retention tax credits, net operating loss carryback periods, alternative minimum tax credit refunds and bonus depreciation of qualified improvement property. The federal income tax changes brought about by the CARES Act are complex and further guidance is expected. For the year ended December 31, 2020, we have deferred cash payments of approximately $84 million related to Social Security payroll tax payments into 2021 and 2022. Additionally, we have generated 2020 cash tax savings of approximately $57 million related to corporate tax law changes which increased the limitation in the tax deductibility of interest expense from 30% to 50% of adjusted taxable income as well as the ability to carry back net operating losses to each of the five tax years preceding the tax year of such loss. However, we may change our provision for income taxes and our deferred income taxes as our understanding of the CARES Act tax provisions evolves due to additional U.S. Department of Treasury guidance. Any such adjustments could materially impact our provision for income taxes and, as a result, our financial results in the relevant periods.

Fraud and Abuse Laws

Participation in the Medicare and/or Medicaid programs is heavily regulated by federal statutes and regulations. If a hospital fails to comply substantially with the numerous federal laws governing the facility's activities, the hospital's participation in the Medicare and/or Medicaid programs may be terminated, and/or civil or criminal penalties may be imposed. For example, a hospital may lose its ability to participate in the Medicare and/or Medicaid programs if it, among other things:

- submits claims to Medicare and/or Medicaid for services not provided or misrepresents actual services provided in order to obtain higher payments;
- pays money to induce the referral of patients or purchase of items or services where such items or services are reimbursable under a federal or state healthcare program; or
- fails to provide appropriate emergency medical screening services to any individual who comes to a hospital's campus or otherwise fails to properly treat and transfer emergency patients.

Anti-kickback Statute

The Anti-kickback Statute prohibits the payment, receipt, offer or solicitation of anything of value, whether in cash or in kind, with the intent of generating referrals or orders, or recommending or arranging for services or items covered by a federal or state healthcare program. Violations of the Anti-kickback Statute are punishable by, among other things, imprisonment, criminal fines, substantial civil monetary penalties that are subject to annual adjustments for inflation for each violation, damages equal to three times the total remuneration associated with the unlawful referrals or services, and/or possible exclusion from participating in Medicare, Medicaid or other governmental healthcare programs. Violations of the Anti-kickback Statute can also result in liability under the False Claims Act.

The OIG is responsible for identifying fraud and abuse activities in government healthcare programs. In order to fulfill its duties, the OIG performs audits, investigations and inspections. In addition, it provides guidance to healthcare providers by identifying types of activities that could violate the Anti-kickback Statute. The OIG has identified the following hospital/physician incentive arrangements, among other things, as potential violations:

- payment of any incentive by a hospital based on physician referrals of patients to the hospital;
- use of free or significantly discounted office space or equipment;
- provision of free or significantly discounted billing, nursing or other staff services;
- free training (other than compliance training) for a physician's office staff, including management and laboratory technique training;
- guarantees which provide that if a physician's income fails to reach a predetermined level, the hospital will pay any portion of the remainder;
- low-interest or interest-free loans, or loans that may be forgiven if a physician refers patients to the hospital;
- payment of the costs for a physician's travel and expenses for conferences;
- payment of services which require few, if any, substantive duties by the physician or which are in excess of the fair market value of the services rendered; or
- purchasing goods or services from physicians at prices in excess of their fair market value.

We have a variety of financial relationships with physicians who refer patients to our facilities, including employment contracts, independent contractor agreements, professional service agreements, leases and joint ventures. We provide financial incentives to recruit physicians to relocate to communities served by our facilities. These incentives for relocation include minimum revenue guarantees and, in some cases, loans. The OIG is authorized to publish regulations outlining activities and business relationships that would be deemed not to violate the Anti-kickback Statute. These regulations are known as "safe harbor" regulations. Failure to comply with the safe harbor regulations does not make conduct illegal, but instead the safe harbors delineate standards that, if complied with, protect conduct that might otherwise be deemed in violation of the Anti-kickback Statute. We intend for all our business arrangements to be in full compliance with the Anti-kickback Statute and seek to structure each of our arrangements with physicians to fit as closely as possible within an applicable safe harbor. However, not all of our business arrangements fit wholly within safe harbors, so we cannot guarantee that these arrangements will not be scrutinized by government authorities or, if scrutinized, that they will be determined to be in compliance with the Anti-kickback Statute or other applicable laws.

Stark Law

The Stark law prohibits physicians from referring Medicare and Medicaid patients to entities with which they or any of their immediate family members have a financial relationship if those entities provide certain "designated health services" unless an exception applies. The Stark law also prohibits entities that provide designated health services reimbursable by Medicare and Medicaid from billing the Medicare and Medicaid programs for any items or services that result from a prohibited referral and requires entities to refund amounts received for items and services provided pursuant to a prohibited referral on a timely basis. "Designated health services" include, among other things, inpatient and outpatient hospital services, laboratory services and radiology services. A violation of the Stark law may result in (i) a denial of payment, (ii) substantial civil monetary penalties that are subject to annual adjustments for inflation for each violation or circumvention scheme and (iii) exclusion from participation in the Medicare and Medicaid programs and other governmental healthcare programs. In addition, violations of the Stark law could also result in penalties under the False Claims Act.

There are ownership and compensation arrangement exceptions to the self-referral prohibition. There are also exceptions for many of the customary financial arrangements between physicians and facilities, including employment contracts, leases and recruitment agreements, and there is a "whole hospital exception," which allows a physician to make a referral to a hospital if, among other things, the physician owns an interest in the entire hospital, as opposed to an ownership interest in a department of the hospital. The Affordable Care Act significantly modified the requirements of the whole hospital exception and placed a number of restrictions on the ownership structure, operations, and expansion of physician owned hospitals. Four of our facilities are subject to those requirements. We intend for our financial arrangements with physicians to comply with the exceptions included in the Stark law and regulations.

In recent years, CMS has issued a number of proposed and final rules modifying and/or clarifying the Stark law exceptions. For example, on November 20, 2020, HHS published two final rules related to the Anti-kickback Statute and the Stark law that are intended to reduce regulatory barriers to care coordination and ease unnecessary compliance burdens for physicians and other healthcare providers. Among other things, the rules create new Anti-kickback Statute safe harbors and Stark law exceptions for value-based and cyber-technology arrangements and provide new guidance and clarification as to how the Anti-kickback Statute and Stark law will be interpreted and enforced by the OIG and CMS, respectively. We cannot predict the impact that the final rules will have on our facilities and our operations or whether the recent trend toward reducing provider compliance burdens will continue in the future. We also anticipate that there will be further changes to the regulations that implement the Anti-kickback Statute and/or the Stark law, and those changes may require us to modify our activities.

In addition to issuing new regulations, or applying new interpretations to existing rules or regulations, the federal government has modified its approach for ensuring compliance with and enforcing penalties for violations of the Stark law. In 2010, CMS also issued a "self-referral disclosure protocol" for hospitals and other providers that wish to self-disclose potential violations of the Stark law and attempt to resolve those potential violations and any related overpayment liabilities at levels below the maximum penalties and amounts set forth in the statute.

False Claims Act

The False Claims Act prohibits providers from, among other things, knowingly submitting false or fraudulent claims for payment to the federal government and failing to refund identified overpayments received from the government. The False Claims Act defines the term "knowingly" broadly, and while simple negligence generally will not give rise to liability, submitting a claim with reckless disregard to its truth or falsity can constitute the "knowing" submission of a false or fraudulent claim for the purposes of the False Claims Act. The "qui tam" or "whistleblower" provisions of the False Claims Act allow private individuals to bring actions under the False Claims Act on behalf of the government. These private parties are generally entitled to share in any amounts recovered by the government, and, as a result, the number of "whistleblower" lawsuits that have been filed against providers has increased significantly in recent years. When a private party brings a qui tam action under the False Claims Act, because such cases are filed under seal, the defendant will generally not be aware of the lawsuit until the government makes a determination whether it will intervene and take a lead in the litigation. If found liable under the False Claims Act, a provider may be required to pay up to three times the actual damages sustained by the government plus substantial civil monetary penalties that are subject to annual adjustments for inflation for each separate false claim. The government and whistleblowers have used the False Claims Act to prosecute Medicare, Medicaid and other government healthcare program fraud such as coding errors, billing for services not provided, submitting false cost reports and providing care that is not medically necessary or that is substandard in quality. Violations of the Stark law can result in False Claims Act liability, as well.

Changes in the Regulatory Environment

The Fraud Enforcement and Recovery Act of 2009 ("***FERA***") expanded the scope of the False Claims Act by, among other things, creating liability for knowingly and improperly avoiding or decreasing an obligation to pay money to the federal government and broadening protections for whistleblowers. In addition, the Affordable Care Act made several significant changes to healthcare fraud and abuse laws, including providing additional enforcement tools to the government, increasing cooperation between agencies by establishing mechanisms for the sharing of information and enhancing criminal and administrative penalties for non-compliance. For example, the Affordable Care Act: (1) expands the scope of the RAC program to include Medicaid, (2) authorizes HHS, in consultation with the OIG, to suspend Medicare and Medicaid payments to a provider of services or a supplier "pending an investigation of a credible allegation of fraud," (3) provides Medicare contractors with additional flexibility to conduct random prepayment reviews, and (4) requires providers to adopt compliance programs that meet certain specified requirements as a condition of their Medicare enrollment. The Affordable Care Act also expanded the scope of the False Claims Act to cover payments in connection with the Exchanges if those payments include any federal funds and provides that claims submitted in connection with patient referrals that result from violations of the Anti-kickback Statute constitute false claims for the purposes of the False Claims Act.

In addition to the changes mentioned above, the Affordable Care Act created False Claims Act liability for the knowing failure to report and return an overpayment within 60 days of the identification of the overpayment or the date by which a corresponding cost report is due, whichever is later. On February 11, 2016, CMS published a final rule that provides clarification around the meaning of overpayment identification and generally establishes a six-year lookback period for Medicare Part A and Part B providers and suppliers. To avoid liability, providers must, among other things, carefully and accurately code claims for reimbursement, promptly return overpayments, accurately prepare cost reports and timely resolve credit balances. In light of the provisions of FERA and the Affordable Care Act relating to reporting and refunding overpayments and the robust funding for enforcement activities and audits, an increasing number of healthcare providers have self-reported potential violations of law, including technical violations of certain fraud and abuse laws, and refunded overpayments to avoid incurring fines and penalties. It is likely such refunds and voluntary disclosures will continue in the future, and we will make such refunds and disclosures in accordance with the law.

State Laws

Many of the states in which we operate have adopted laws similar to the Anti-kickback Statute and the Stark law. These state laws are generally very broad in scope and typically apply to patients whose treatment is covered by the Medicaid program and, in some cases, to all patients regardless of payment source. In addition, many of the states in which we operate have false claims statutes that impose civil and/or criminal liability for the types of acts prohibited by the False Claims Act or that otherwise prohibit the submission of false or fraudulent claims to the state government or Medicaid program. Violations of these laws are punishable by substantial civil and/or criminal penalties and, in many cases, the loss of the facility's license. Although we believe that our operations and arrangements with physicians and other referral sources comply with the applicable state fraud and abuse laws, most of these laws have not been interpreted by any court or governmental agency, and there can be no assurance that the regulatory authorities responsible for enforcing these laws will determine that our arrangements comply with the applicable requirements.

Emergency Medical Treatment and Active Labor Act

All of our facilities are subject to EMTALA. This federal law requires any hospital that participates in the Medicare program to conduct an appropriate medical screening examination of every person who presents to the hospital's emergency department for treatment and, if the patient is suffering from an emergency medical condition, to either stabilize that condition or make an appropriate transfer of the patient to a facility that can handle the condition. The obligation to screen and stabilize emergency medical conditions or transfer exists regardless of a patient's ability to pay for treatment. Off-campus facilities such as specialty clinics, surgery centers and other facilities that lack emergency departments or otherwise do not treat emergency medical conditions are not generally subject to EMTALA. They must, however, have policies in place that explain how the location should proceed in an emergency situation, such as transferring the patient to the closest hospital with an emergency department. There are severe penalties under EMTALA if a hospital fails to screen or appropriately stabilize or transfer a patient or if the hospital delays appropriate treatment in order to first inquire about the patient's ability to pay, including substantial civil monetary penalties and exclusion from participation in the Medicare program. In addition, an injured patient, the patient's family or a medical facility that suffers a financial loss as a direct result of another hospital's violation of the law can bring a civil suit against that other hospital. CMS has actively enforced EMTALA and has indicated that it will continue to do so in the future. Although we believe that our hospitals comply with EMTALA, we cannot predict whether CMS will implement new requirements in the future and, if so, whether our hospitals will comply with any new requirements.

Administrative Simplification Provisions and Privacy and Security Requirements

We are subject to the administrative simplification provisions of the Health Insurance Portability and Accountability Act of 1996 ("***HIPAA***") which require the use of uniform electronic data transmission standards for healthcare claims and payment transactions submitted or received electronically. These provisions are intended to encourage electronic commerce in the healthcare industry. Additionally, we are subject to the privacy, security and breach notification regulations promulgated under HIPAA and the Health Information Technology for Economic and Clinical Health Act (the "***HITECH Act***"), which are designed to protect the confidentiality, availability and integrity of protected health information ("***PHI***") and establish an array of patient rights with respect to such information. The HIPAA privacy, security and breach notification regulations apply to covered entities, which include health plans, healthcare clearinghouses, and healthcare providers that conduct certain standard transactions (such as billing insurance) electronically. In addition, certain provisions of the privacy, security and breach notification regulations apply to business associates, which are entities that perform certain functions or activities on behalf of covered entities that require access to or the use or disclosure of protected health information. In certain circumstances, a covered entity may be held liable for the actions of its business associate if HHS determines an agency relationship exists between the covered entity and the business associate under federal agency law.

The HIPAA privacy regulations, which apply to individually identifiable health information held or disclosed by a covered entity in any form, whether communicated electronically, on paper or orally, impose extensive administrative requirements on us, which require that we adopt policies and procedures to comply with HIPAA, routinely train our workforce members on our HIPAA policies, provide patients with a copy of our notice of privacy practices, comply with rules governing the use and disclosure of PHI and impose these rules, by contract, on any business associate to whom we disclose such information in order to perform functions on our behalf. They also create rights for patients in their health information, such as the right to access and amend their health information and to request an accounting for certain disclosures of their health information. The HIPAA security regulations require us to establish and maintain reasonable and appropriate administrative, technical and physical safeguards to ensure the integrity, confidentiality and the availability of electronic health information and to perform ongoing assessments of the potential risks and vulnerabilities to the confidentiality, integrity and availability of such information. In addition, the HIPAA breach notification regulations require that we report breaches of unsecured (unencrypted) PHI to affected individuals without unreasonable delay, but in no case later than 60 calendar days of discovery of the breach. Notification must also be made to HHS and, in certain cases involving large breaches, to the local media. HHS is required to report on its website a list of all covered entities that report a breach involving more than 500 individuals. All non-permitted uses or disclosures are presumed to be breaches unless the covered entity or business associate can demonstrate that there is a low probability that the information has been compromised. We implement a comprehensive set of HIPAA policies and procedures, which we believe materially complies with the privacy, security and breach notification requirements of HIPAA.

Violations of the HIPAA regulations may result in criminal penalties and substantial civil monetary penalties subject to a limit for violations of the same requirement in a calendar year, based on the level of culpability associated with the violation. The civil monetary penalties are also subject to annual inflation adjustments. In addition, state attorneys general are authorized to bring civil actions seeking either injunction or damages up to $25,000 for violations of the same requirement in a calendar year in response to HIPAA violations that affect their state residents. HHS has the discretion in many cases to resolve HIPAA violations through informal means without the imposition of penalties. However, the HIPAA privacy, security and breach notification regulations have and will continue to impose significant costs on our facilities in order to comply with these standards. We expect increased enforcement of the HIPAA regulations.

Our facilities continue to remain subject to other applicable federal or state laws that are more restrictive than the HIPAA privacy and security regulations, which could impose additional penalties on us. For example, the Federal Trade Commission uses its consumer protection authority to initiate enforcement actions against companies whose inadequate data security programs may expose consumers to fraud, identity theft and privacy intrusions, including the security programs of entities subject to the HIPAA regulations.

Corporate Practice of Medicine and Fee-Splitting

Some states have laws that prohibit unlicensed persons or business entities, including corporations or business organizations that own hospitals, from employing physicians. Some states also have adopted laws that prohibit direct or indirect payments or fee-splitting arrangements between physicians and unlicensed persons or business entities. Possible sanctions for violations of these restrictions include loss of a physician's license, civil and criminal penalties and rescission of business arrangements. These laws vary from state to state, are often vague and have seldom been interpreted by the courts or regulatory agencies. We attempt to structure our arrangements with healthcare providers to comply with the relevant state laws and the few available judicial and regulatory interpretations.

Certificates of Need

The construction of new facilities, the acquisition or expansion of existing facilities and the addition of new services and expensive equipment at our facilities may be subject to state laws that require prior approval by state regulatory agencies. These certificate of need laws generally require that a state agency determine the public need and give approval prior to the construction or acquisition of facilities or the addition of the new equipment or services and allow competing healthcare providers to challenge the need for the facility, service or equipment. We operate facilities in certain states that have adopted certificate of need laws. If we fail to obtain necessary state approval, we will not be able to expand our facilities, complete acquisitions or add new services at our facilities in these states. Violation of these state laws may result in, among other things, the imposition of civil sanctions or the revocation of the applicable hospital or facility license. Some states in which we operate do not have certificate of need requirements. Additionally, from time to time, states with existing requirements may repeal or limit the scope of their certificate of need programs. Our facilities in states that do not have (or limit the scope of) certificate of need programs could be subject to increased competition from other providers who may choose to enter the market.

Not-for-Profit Hospital Conversion Legislation

Many states have adopted legislation regarding the sale or other disposition of hospitals operated by not-for-profit entities. In states that do not have such legislation, the attorneys general have demonstrated an interest in reviewing these transactions under their general obligations to protect charitable assets. These legislative and administrative efforts primarily focus on the appropriate valuation of the assets divested and the use of the proceeds of the sale by the not-for-profit seller. Reviews and approval processes adopted by state authorities can add additional time to the closing of a not-for-profit hospital acquisition, and can also impose on buyers ongoing requirements to provide certain levels of charity care, or limit buyers' ability to discontinue particular service lines or to sell or otherwise dispose of a converted hospital. Future actions by state legislators or attorneys general may seriously delay or even prevent our ability to acquire certain hospitals.

Environmental Regulation

Our healthcare operations generate medical waste that must be disposed of in compliance with federal, state and local environmental laws, rules and regulations. Our operations, as well as our purchases and sales of healthcare facilities, are also subject to compliance with various other environmental laws, rules and regulations. Such compliance costs are not significant, and we do not anticipate that such compliance costs will be significant in the future.

Compliance Program

We maintain a company-wide ethics and compliance program designed to ensure that we maintain high standards of ethical conduct in the operation of our business and to meet or exceed applicable federal guidance and industry standards. We continually implement written policies and procedures for all of our employees to promote compliance with all applicable laws, regulations and Company policies and to encourage a "culture of compliance" within the Company and its facilities. The organizational structure of our ethics and compliance program includes oversight by our Board of Directors and compliance committees at the Company and facility levels. We have compliance officers and personnel at the Company level and at our facilities. Other features of our compliance program include initial and periodic ethics and compliance training, systems for identifying and tracking potential compliance issues (including databases and hotlines for employees to report, without fear of retaliation, any suspected legal or ethical violations), regular auditing and monitoring of activities that may give rise to potential compliance concerns, including coding audits and reviews of our financial relationships with physicians, and prompt review and resolution of any potential compliance issues that are identified.

Our compliance program also oversees the implementation and monitoring of the standards set forth by HIPAA for privacy. Ongoing HIPAA compliance also includes self-monitoring of HIPAA policy and procedure implementation by each of our healthcare facilities and oversight at the Company level.

Risk Management and Insurance

Given the nature of our operating environment, we are subject to potential professional liability claims, employee workers' compensation claims and other claims. To mitigate a portion of this risk, we maintain insurance for individual professional liability claims and employee workers' compensation claims exceeding self-insured retention ("***SIR***") and deductible levels. At December 31, 2020, our SIR for professional liability claims is $15.0 million per claim at the majority of our facilities. Additionally, we participate in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2020, our deductible for workers' compensation claims was $1.0 million per claim in all states in which we operate except for Montana, Ohio, Oklahoma, Washington and Wyoming. We participate in state-specific programs for our workers' compensation claims arising in these states. Our SIR and deductible levels are evaluated annually as a part of our insurance program's renewal process.

We also maintain directors' and officers', property, some professional liability and other types of insurance coverage with unrelated commercial carriers. Our directors' and officers' liability insurance coverage for current officers and directors is a program that protects us as well as the individual director or officer. We maintain property insurance through unrelated commercial insurance companies.

We operate a captive insurance company under the name Point of Life Indemnity, Ltd. This captive insurance company, which is licensed by the Cayman Islands Monetary Authority and is a wholly-owned subsidiary of LifePoint, issues malpractice indemnity policies to some subsidiaries employing physicians and advanced practice providers.

Item 1A. ***Risk Factors.***

Any of the following risks could materially and adversely affect our business, financial condition or results of operations. In addition, the risks described below are not the only risks that we face. The following information should be read in conjunction with "Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" included in this Report. Additional risks and uncertainties not currently known to us or those that we currently view to be immaterial could also materially and adversely affect our business, financial condition or results of operations.

Risk Factor Summary

The following is a summary of the principal risks that could adversely affect our business, operations and financial results.

COVID-19 and Other Potential Pandemic Risks

- The COVID-19 global pandemic continues to affect our operations, business and financial condition, and our liquidity could be negatively impacted, particularly if the U.S. economy remains unstable for a significant amount of time.
- There is a high degree of uncertainty regarding the implementation and impact of the CARES Act and other stimulus legislation, as well as future stimulus legislation, if any, and lack of guidance regarding accounting treatment of funds received under such acts.
- The emergence and effects related to a pandemic, epidemic or outbreak of an infectious disease could adversely affect our operations and financial condition.

Business and Operational Risks

- Our revenues will decline if federal or state programs reduce our Medicare or Medicaid payments.
- Uncertainty regarding the Affordable Care Act or future healthcare reform may adversely affect our business, financial condition and results of operations.
- Changes to Medicaid supplemental payment programs may materially and adversely affect our revenues and results of operations.
- Changes in payer mix, the financial condition of payers and healthcare cost containment initiatives may limit our revenues and profitability.
- We may encounter difficulty operating, integrating and improving financial performance at acquired facilities. Also, if we acquire facilities with unknown or contingent liabilities, we could become liable for material obligations, or it could diminish the anticipated value of the acquired facility.
- If our fair value declines or if our estimated future cash flows decrease, a material non-cash charge to earnings from impairment of our goodwill or our long-lived assets could result.
- We are subject to risks associated with outsourcing functions to third parties.
- We conduct a significant portion of our operations through joint ventures.
- Deterioration in the collectability of "patient due" accounts could adversely affect our revenues and results of operations.
- Other hospitals and outpatient facilities provide services similar to those which we offer. In addition, healthcare providers provide services in their offices that could be provided in our facilities.
- We may have difficulty acquiring or divesting facilities on favorable terms.
- If we are unable to implement successfully standardized processes, policies and systems throughout our facilities, our operating results could be negatively impacted.
- Under the A&R Capella Master Lease (as defined below) and the 2019 Master Lease, each of which separately governs certain of our facilities, a default with respect to one facility under either such lease, or in the case of the A&R Capella Master Lease, certain related separate leases, could cause a default under all of the facilities subject to the A&R Capella Master Lease or the 2019 Master Lease, as applicable, which would have a material adverse effect on our business, results of operations and financial condition.
- Because many of the facilities we operate are subject to long-term leases, failure to comply with the terms of such leases or failure to renew such leases could cause us to lose the ability to operate these facilities altogether and incur substantial costs in restoring the premises.
- Many of the non-urban communities in which we operate continue to face challenging economic conditions and demographic trends, which may materially and adversely impede our business strategies intended to generate organic growth and improve operating results at our facilities.

Credit and Liquidity Risks

- Our substantial indebtedness could materially and adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry and prevent us from making debt service payments.
- We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness that may not be successful.
- We may not be able to generate sufficient cash flow through operations or successfully access other capital resources to fund all of our capital expenditure programs and commitments.
- Our debt agreements contain restrictions that will limit our flexibility in operating our business.
- Repayment of our debt is dependent on cash flow generated by our subsidiaries.
- Despite our substantial indebtedness, we may still be able to incur significantly more debt, which could intensify the risks described above.
- Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.
- Our ability to utilize our net operating loss carryforwards ("***NOLs***") may be limited, and we may not be able to utilize our NOLs as a result of recent U.S. federal tax reform legislation.

Human Capital Risks

- Factors related to our employment of physicians could affect our financial performance.
- If we do not effectively attract, recruit and retain qualified physicians and other healthcare providers, our ability to deliver healthcare services efficiently will be adversely affected.
- Our facilities face competition for management and other non-physician staffing, which may increase labor costs and reduce profitability.
- Labor union activity could raise costs and interfere with our operations. Certain of our employees are union members and are subject to the terms of collective bargaining agreements.
- We are dependent on our executive management team and the loss of the services of one or more of our executive management team could have a material adverse effect on our business.

Regulatory and Legal Risks

- We are subject to increasingly stringent governmental regulations, and we may face allegations that we have failed to comply with such regulations, which could result in criminal and civil sanctions, exclusion from government healthcare programs and even greater scrutiny that may reduce our revenues and profitability.
- We may be subjected to actions brought by the government under anti-fraud and abuse provisions or by individuals on the government's behalf under the False Claims Act's "qui tam" or "whistleblower" provisions.
- We will be subject to liabilities because of malpractice and related legal claims brought against our facilities or healthcare providers associated with, or employed by, our facilities or affiliated entities. If we become subject to these claims, we could be required to pay significant damages, which may not be covered by insurance.
- As a result of reviews of claims to Medicare and Medicaid for our services, we may experience delayed payments or incur additional costs and may be required to repay amounts already paid to us.
- Controls designed to reduce inpatient services may reduce our revenues.
- Certificate of need laws and regulations regarding licenses, ownership and operation may impair our future expansion in some states. In states without certificate of need laws, competing providers of healthcare services are able to expand and construct facilities without the need for significant regulatory approval.
- If we fail to implement and maintain certified electronic health record systems and other health information technology in an effective and timely manner, our operations could be adversely affected.
- The industry emphasis on value-based purchasing and bundled payment arrangements may negatively affect our revenues.

Data Security and Privacy Risks

- A cybersecurity attack or security breach could cause a loss of confidential data, give rise to remediation and other expenses, expose us to liability under HIPAA, consumer protection laws, common law or other theories, subject us to litigation and federal and state governmental inquiries, damage our reputation, and otherwise be disruptive to our business.
- If access to our information systems or those provided by our third-party vendors is interrupted or restricted, or if we are unable to make changes to our information systems, our operations could suffer.

COVID-19 and Other Potential Pandemic Risks

The COVID-19 global pandemic continues to affect our operations, business and financial condition, and our liquidity could be negatively impacted, particularly if the U.S. economy remains unstable for a significant amount of time.

The COVID-19 global pandemic continues to affect our facilities, employees, patients, communities, business operations and financial performance, as well as the U.S. economy and financial markets. Although vaccines have been developed and are being distributed in the U.S., the length and severity of the COVID-19 pandemic continues to evolve and much of its impact remains unknown and difficult to predict because many of the driving factors are beyond our control, including the timing and effectiveness of the distribution of the vaccines.

We are taking every precaution to ensure we can continue providing quality care and safeguard the health and well-being of patients, employees, providers, volunteers and visitors in each community we serve. For example, during 2020, we cancelled or postponed a substantial number of elective procedures scheduled at our hospitals and closed or reduced operating hours at certain of our physician clinics, ambulatory surgery centers and other outpatient centers that specialize in elective procedures, resulting in significantly reduced patient volumes and operating revenues. We cannot predict how quickly elective procedure volumes will return or if they will be further restricted in the future. In addition, we instituted social distancing practices and protective measures throughout our facilities, including visitor restrictions, closing common areas, limiting entry points and screening staff and visitors who enter our facilities based on the CDC's criteria.

Even with such steps, exposure to COVID-19 patients has led to increased risks to doctors and nurses, which has reduced and may further reduce our operating capacity and/or staffing levels, and may require us to continue utilizing temporary healthcare practitioners. If our hospitals were to continue to treat an increasing number of COVID-19 patients, they could experience staffing shortages or become overwhelmed by excessive demand, potentially preventing them from treating all patients who seek care. We also experienced supply chain disruptions during 2020, including shortages and delays, as well as price increases, in equipment, pharmaceuticals and medical supplies, particularly personal protective equipment (or PPE). Any staffing, equipment, and pharmaceutical and medical supplies shortages may impact our ability to see, admit and treat patients.

The willingness and ability of patients to seek healthcare services also has been impacted by restrictive measures, like travel bans, social distancing and quarantine guidelines, which have further reduced the volume of procedures performed at our facilities more generally, as well as the volume of emergency room and physician office visits unrelated to COVID-19. Furthermore, in response to the COVID-19 pandemic, regulatory barriers to telehealth services have been reduced to expand the availability of remote care. As patients become more comfortable with remote care, which generally receives a lower reimbursement for services, our revenues may be adversely impacted.

Broad economic factors resulting from the current COVID-19 pandemic, including increased unemployment rates and reduced consumer spending, could also negatively affect our payer mix, increase the relative proportion of lower margin services we provide and reduce patient volumes, as well as diminish our ability to collect outstanding receivables. See "—Changes in payer mix, the financial condition of payers and healthcare cost containment initiatives may limit our revenues and profitability." Business closings and layoffs in the areas in which we operate may lead to increases in the uninsured, underinsured and Medicaid populations and adversely affect demand for our services, as well as the ability of patients and other payers to pay for services as rendered. Any increase in the amount or deterioration in the collectability of patient accounts receivable will adversely affect our cash flows and results of operations, requiring an increased level of working capital. If general economic conditions continue to deteriorate or remain uncertain for an extended period of time, our liquidity and ability to repay our outstanding debt may be harmed.

In addition, our results and financial condition may be further adversely affected by future federal or state laws, regulations, orders, or other governmental or regulatory actions addressing the current COVID-19 pandemic or the U.S. healthcare system, which, if adopted, could result in direct or indirect restrictions to our business, financial condition, results of operations and cash flow. We may also be subject to lawsuits from patients, employees and others exposed to COVID-19 at our facilities, or from other third-parties or family members who are exposed due to contact with patients, employees, or others exposed at our facilities. Such actions may involve large demands, as well as substantial defense costs. Our professional and general liability insurance may not cover all claims against us.

The foregoing and other continued disruptions to our business as a result of the COVID-19 pandemic have had and are likely to continue to have a material adverse effect on our business and could have a material adverse effect on our results of operations, financial condition, cash flows and our ability to service our debt. Furthermore, the COVID-19 pandemic (including governmental responses, broad economic impacts and market disruptions) has heightened the materiality of certain other risk factors described herein.

There is a high degree of uncertainty regarding the implementation and impact of the CARES Act and other stimulus legislation, as well as future stimulus legislation, if any, and lack of guidance regarding accounting treatment of funds received under such acts. There can be no assurance as to the total amount of financial assistance or types of assistance we will receive, or that the terms of provider relief funding or other programs will not change in ways that affect our funding or eligibility to participate.

We received and may seek other funds that are made available to us and our facilities under the CARES Act and other existing or future stimulus legislation, if any; however, there is still a high degree of uncertainty surrounding the interpretation and implementation of the terms and conditions of these acts. There can be no assurance that the terms of provider relief funding or other programs under the CARES Act, and other existing stimulus legislation or future stimulus legislation, if any, will not change in ways that affect our funding or eligibility to participate, or that changes to the terms of such programs will not result in government recoupment of funds that were initially released to us as grants. Additionally, although the federal government may consider additional stimulus and relief efforts, such efforts may be drafted or implemented in ways that restrict, limit or otherwise negatively impact our ability to access these funds. As a result, we cannot predict the manner in which existing or future stimulus funds will be allocated or administered and we cannot assure you that we will be able to access future stimulus funds in a timely manner or at all. For additional information regarding the CARES Act, and related stimulus legislation and our participation in programs under the CARES Act and related stimulus legislation, if any, see "Business—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19."

In addition, there currently is limited and sometimes changing guidance available regarding the accounting treatment of funds that have been received by us and our facilities under the CARES Act and other COVID-19 stimulus legislation. This lack of guidance requires us to apply professional judgement and make certain estimates and assumptions with respect to the presentation, amount and timing of our recognition of direct grant aid received under the CARES Act. For additional information regarding the CARES Act and related financial impact, refer to Note 2 to the consolidated financial statements included elsewhere in this Report.

The emergence and effects related to a pandemic, epidemic or outbreak of an infectious disease could adversely affect our operations and financial condition.

As evidenced by the COVID-19 pandemic, the occurrence of a pandemic, epidemic, outbreak of an infectious disease or other public health crisis in an area in which we operate could adversely affect our operations and financial condition. In reaction to such a crisis or the fear of exposure to infection, patients might cancel elective procedures or fail to seek needed care at our facilities, which could result in reduced patient volumes and operating revenues, potentially over an extended period of time. Furthermore, a pandemic, epidemic or outbreak might adversely affect our operations by causing a temporary shutdown or diversion of patients, by disrupting or delaying production and delivery of materials and products in the supply chain or by causing staffing shortages in our facilities. Additionally, such a crisis could diminish the public trust in healthcare facilities, especially hospitals that fail to accurately or timely diagnose, or are treating (or have treated) patients affected by infectious diseases, and negatively affect the reputation at our facilities.

Although we have disaster plans in place and operate pursuant to infectious disease protocols, the extent to which the potential emergence of a pandemic, epidemic or outbreak would impact our business and operations is difficult to predict and would depend on many factors beyond our control, including the speed of the contagion, the development and implementation of effective preventative measures and possible treatments, the scope of governmental and other restrictions on travel and other activities, and public reactions to these factors.

Business and Operational Risks

Our revenues will decline if federal or state programs reduce our Medicare or Medicaid payments.

For the years ended December 31, 2020, 2019 and 2018, approximately 55.7%, 55.2% and 57.3% of our revenues, respectively, related to patients participating in Medicare and Medicaid programs, collectively. Numerous factors could materially decrease, or delay timing of, Medicare and Medicaid payments to our facilities. These factors include statutory and regulatory changes, administrative rulings and determinations concerning patient and provider eligibility and requirements for utilization review. Furthermore, the Affordable Care Act and related federal laws provide for material scheduled reductions in the growth rate of Medicare and Medicaid program spending, including reductions in market basket updates and Medicare and Medicaid DSH funding. Additionally, a number of states have adopted or are considering legislation designed to reduce their Medicaid expenditures, including enrolling Medicaid recipients in managed care programs. States may also impose additional taxes on hospitals to help finance the state's Medicaid programs. Some states have also taken steps to implement work and/or community engagement requirements for Medicaid beneficiaries, which could have the effect of reducing the number of individuals eligible for Medicaid in those states.

Uncertainty regarding the Affordable Care Act or future healthcare reform may adversely affect our business, financial condition and results of operations.

The Affordable Care Act dramatically altered the U.S. healthcare system, and we have expended substantial cost and effort to prepare for and comply with the Affordable Care Act. The net effect of the Affordable Care Act on our business continues to be subject to a number of variables, including the law's complexity, lack of complete implementing regulations and interpretive guidance, and the sporadic implementation of the numerous programs designed to improve access to and the quality of healthcare services. Additionally, the Affordable Care Act has been challenged before the U.S. Supreme Court and several bills have been introduced in Congress to delay, defund or repeal implementation of or amend significant provisions of the Affordable Care Act.

For example, in 2017, the U.S. Department of Justice ("***DOJ***") announced that HHS was immediately ceasing its cost sharing reduction payments to insurance companies based on a determination that those payments had not been appropriated by Congress, and Congress enacted the Tax Act that, in addition to overhauling the federal tax system, repealed the penalties associated with the individual mandate effective as of January 1, 2019. In addition, in December 2019, the U.S. Fifth Circuit Court of Appeals found that the individual mandate set forth in the Affordable Care Act was unconstitutional and ordered the U.S. District Court for the Northern District of Texas to conduct further analysis as to whether the entire Affordable Care Act should be held to be unlawful. The U.S. Supreme Court heard the case during the fourth quarter of 2020, but it likely will not issue an opinion until 2021. We cannot predict the outcome of litigation challenging the constitutionality of the Affordable Care Act or whether the Affordable Care Act will be repealed, replaced, or modified. If the Affordable Care Act is found to be unconstitutional or if it is repealed, replaced or modified, we cannot predict what, if any, the replacement plan or modifications would be, when any such replacement plan or modifications would become effective, or whether any of the existing provisions of the Affordable Care Act would remain in place.

We also cannot predict the impact that the new Presidential administration and Congressional leadership will have on the implementation and enforcement of the provisions of the Affordable Care Act, on any current, pending or potential regulations adopted to implement the law, or any future healthcare reform legislation or initiatives, including "Medicare-for-all" or other single-payer proposals.

Changes to Medicaid supplemental payment programs may materially and adversely affect our revenues and results of operations.

MSPs are payments made to providers separate from and in addition to those made at a state's standard Medicaid payment rate. MSP programs are jointly financed by state funds and federal matching funds. The state portion may be funded through general revenue, intergovernmental transfers from local governments or healthcare related taxes imposed by states in the form of a mandatory provider payment related to healthcare items or services. The two most prevalent forms of MSPs are Medicaid DSH and UPL payments. Medicaid DSH payments are federally required to be made by the states to hospitals that serve significant numbers of Medicaid and uninsured patients in recognition of the added costs incurred by hospitals in treating these patients. The total amount of Medicaid DSH payments a state may make and the total amount any one hospital may receive are both capped by federal law. Unlike Medicaid DSH payments, UPL payments are not required to be made by states under federal law. Rather, federal regulations establish an upper payment limit above which states may not receive federal matching dollars.

The Affordable Care Act called for significant reductions in Medicaid DSH funding to account for decreases in uncompensated care anticipated under the health insurance coverage expansion. Subsequent changes in the law have delayed the implementation of these reductions, but they are scheduled to take effect in FFY 2021. Reductions in Medicaid DSH payments may take place without increases in the Medicaid eligible population, thus increasing the net amount of uncompensated care we provide.

UPL programs have expanded in recent years and certain of our hospitals receive payments under such programs. Because services provided to Medicaid beneficiaries enrolled in managed care are not included in state UPL calculations, as states increase their use of managed care Medicaid programs, UPL MSPs could be reduced. UPL funding and matching federal funds may also be reduced or eliminated as a result of state or local governmental legislation, state changes to historical funding levels or related taxes, compliance reviews by CMS, or changes to federal Medicaid funding affecting such programs. We cannot predict whether MSP programs will continue (and, if continued, whether we will qualify for such programs) or guarantee that revenues recognized from these programs will not decrease.

Changes in payer mix, the financial condition of payers and healthcare cost containment initiatives may limit our revenues and profitability.

The amounts we receive for services provided to patients are determined by a number of factors, including the payer mix of our patients and the reimbursement methodologies and rates utilized by our payers. We have seen shifts of patients from commercial and private insurance to Medicare and Medicaid programs and from "traditional" fee-for-service Medicare and Medicaid programs to "managed" Medicare and Medicaid programs. Additionally, we cannot predict whether the new Presidential administration or Congressional leadership will propose measures that would expand government-sponsored coverage, including "Medicare-for-all" or other single-payer proposals. Reimbursement rates generally are lower for (i) Medicare and Medicaid beneficiaries than they are for patients whose care is covered by commercial and private insurance and (ii) managed Medicare and Medicaid beneficiaries than they are for traditional Medicare and Medicaid beneficiaries. We also experience demographic pressures as aging populations in our non-urban communities shift from commercial insurance programs to Medicare or managed Medicare programs. Our revenues and results of operations may be adversely affected by these shifts.

In addition, our revenues from negotiated rates with HMOs, PPOs, insurance companies, employers and other private payers may decline based on renegotiations and the respective bargaining power of the parties. Also, consolidation among private payers may increase their bargaining power over fee structures. As a result, payers increasingly are demanding discounted fee structures or the assumption by healthcare providers of all or a portion of the financial risk related to paying for care provided. These changes include moving away from a percent of charge payment structure to a fixed payment for an episode of care, which typically reduces our payment rate and limits our ability to raise prices going forward. Furthermore, low-cost plans purchased through the Exchanges are increasingly using narrow and tiered networks that limit beneficiary provider choices, restrict or exclude our facilities or impose significantly higher cost sharing obligations for care provided by our facilities if they are classified in a disfavored tier. In addition, other healthcare providers, including some with greater financial resources, greater geographic coverage or a wider range of services, may negotiate exclusivity provisions with managed care plans or otherwise restrict the ability of managed care plans to contract with us.

There are also an increasing number of patients enrolling in insurance plans with high deductibles or high co-payments, including those purchased on the Exchanges, which increase the amount due from the patient and may result in reimbursement for a lower portion of the total payment amount relative to traditional employer-sponsored health insurance plans for the healthcare services provided by our facilities and employed providers. Patients enrolled in higher deductible and co-payment plans tend to defer elective and non-emergency procedures or default on their portion of the payment. We may be adversely affected by the growth in patient responsibility accounts because of plan structures, including HSAs, which shift greater responsibility for care to individuals through greater exclusions and higher co-deductible and co-payment amounts. If we experience shifts in our patient volumes to these types of plan structures, our revenue and results of operations may be adversely affected.

We anticipate that efforts to impose greater discounts and more stringent cost controls by government and private payers will continue, thereby reducing some of the payments we receive for our services. As payments are reduced, if we are excluded from more payer networks or if the scope of services covered by payers is limited, there could be a material adverse effect on our revenues and results of operations.

We may encounter difficulty operating, integrating and improving financial performance at acquired facilities. Also, if we acquire facilities with unknown or contingent liabilities, we could become liable for material obligations or it could diminish the anticipated value of the acquired facility.

We may be unable to timely and effectively integrate facilities that we acquire with our ongoing operations. Many of the facilities we have acquired had, or future acquisitions may have, significantly lower operating margins than we do and/or operating losses prior to the time we acquired or will acquire them. In the past, we have occasionally experienced delays in improving the operating margins or effectively integrating the operations of our acquired facilities, and we may experience such delays in implementing operating procedures and systems in newly or future acquired facilities. Integrating an acquired facility could be expensive and time consuming and could disrupt our ongoing business, negatively affect cash flow and distract management and other key personnel. Additionally, we may experience delays in reimbursement from governmental and third-party payers as a result of the change of ownership of our acquired facilities.

We must integrate complex information, accounting and operational systems, compliance programs and internal controls over financial reporting of acquired facilities into our existing systems and internal controls. While we devote a significant amount of employee and management resources on these integrations, we also rely heavily on third parties for systems integration. Our efforts to integrate new facilities, including causing those third parties to convert our newly acquired facilities' systems, may fail or be significantly delayed. Failure to timely and effectively integrate or convert any of these systems could cause business interruption, affect provider and staff morale and our ability to accurately manage accounting, clinical, compliance and operational functions. As future acquisitions may involve large operations, any such failure could cause a material adverse effect on our results of operations.

Facilities we have acquired, including in connection with the LifePoint/RCCH Merger, or facilities we acquire in the future, may have unknown or contingent liabilities for historical activities or conditions, including liabilities for failure to comply with laws and regulations, retroactive payment adjustments or recoupments from payer audits, medical and general professional malpractice liabilities, unfunded pension liabilities, workers' compensation or other employee-related liabilities, previous tax or environmental liabilities, regulatory and compliance related liabilities, and unacceptable business or accounting practices. Although we endeavor to obtain contractual indemnification from sellers covering these matters in connection with some acquisitions, we have not obtained contractual indemnifications in connection with all of them, and any indemnification obtained from sellers may be insufficient to cover material claims or liabilities for past activities of acquired businesses and the sellers may have insufficient funds to satisfy any claims or liabilities for which we may otherwise be entitled to be reimbursed.

We typically retain and rely on existing local management teams at newly acquired facilities to implement changes to operating procedures and systems. Integrating local management teams can involve cultural and systems challenges that may demand a disproportionate share of our resources and senior management's attention, and we may experience turnover of providers and other key personnel. Our acquisitions have become, and may continue to become larger, and may occur in communities with competing facilities. As a result, the issues surrounding integration may become more complex, expensive and time-consuming and may have a greater impact on our financial performance when we experience delays or difficulties.

If our fair value declines or if our estimated future cash flows decrease, a material non-cash charge to earnings from impairment of our goodwill or our long-lived assets could result.

As of December 31, 2020, we had approximately $2,976.8 million of goodwill and other intangible assets and approximately $3,523.0 million of long-lived assets, net of accumulated depreciation. We expect to recover the carrying values of both our goodwill as well as our long-lived assets through our future cash flows. We evaluate the carrying value of our goodwill at least annually, based on our fair value, to determine whether it is impaired. We evaluate our long-lived assets for possible impairment whenever circumstances indicate that the carrying amount of the asset, or related group of assets, may not be recoverable from estimated future cash flows. If the carrying value of our goodwill or our long-lived assets is impaired, we may incur a material non-cash charge to earnings.

We are subject to risks associated with outsourcing functions to third parties.

We outsource selected business functions to third parties, including revenue cycle management, patient access, billing, cash collections, payment compliance and support services, project implementation, supply chain management, payroll system services and parts of cybersecurity. We take steps to monitor and regulate the performance of the independent third parties to whom we delegate selected functions. Arrangements with third-party service providers may make our operations vulnerable if vendors fail to satisfy their obligations to us as a result of their performance, changes in their own operations, financial condition, or other matters outside of our control. We may also face legal, financial or reputational harm for the actions or omissions of such providers, including for violations of HIPAA and other privacy and security laws applicable to healthcare providers, and we may not have effective recourse against the providers for those harms. The expanding role of third-party providers may also require changes to our existing operations and the adoption of new procedures and processes for retaining and managing these providers, as well as redistributing responsibilities as needed. Effective management, development and implementation of our outsourcing strategies are important to our business and strategy. If there are delays or difficulties in enhancing business processes or our third-party providers do not perform as anticipated, we may not fully realize on a timely basis the anticipated economic and other benefits of the outsourcing projects or other relationships we enter into with key vendors, which could result in substantial costs, divert management's attention from other strategic activities, negatively affect employee morale or create other operational or financial problems for us. Terminating, transitioning or renegotiating arrangements with key vendors or failure to renegotiate on favorable terms could result in additional costs and a risk of operational delays, potential errors and possible control issues as a result of the termination or during the transition or renegotiation phase.

We conduct a significant portion of our operations through joint ventures. We cannot provide assurances that relationships with our joint venture partners will remain strong, which could negatively affect our joint ventures, affiliations and other strategic alliances as well as our overall business.

We have completed a number of joint ventures, affiliations and other strategic alliances as part of our business strategy. We expect to enter into similar transactions in the future, including joint ventures where we may have a noncontrolling interest. Any changes in our relationships with our joint venture partners could disrupt ongoing business, negatively affect cash flow and distract management and other key personnel. In the event of a material disagreement with any of our joint venture partners or the breach of any of our joint venture agreements, a joint venture may be subject to dissolution, unwinding or purchase of either party's interest, which could have a material adverse effect on our revenues and results of operations or result in reputational harm.

As a general matter, our joint venture partners may have investment and operational goals that are not consistent with our company-wide objectives, including the timing, terms and strategies for future growth and development opportunities, and we could reach an impasse on certain decisions, which may hinder our ability to pursue preferred strategies for growth and development, could require significant resources and attention from management and key employees to resolve and could have an adverse effect on our operations, cash flow and revenue growth. In addition, our joint venture relationships with not-for-profit partners and the agreements that govern these relationships are structured based on current provisions of the Internal Revenue Code of 1986, as amended (the "***Code***") (and the Treasury Regulations thereunder), published rulings by the Internal Revenue Service ("***IRS***"), as well as case law relevant to joint ventures between for-profit and not-for-profit entities. Material changes in these legal authorities could adversely affect our relationships with not-for-profit partners and related joint venture arrangements.

Furthermore, joint ventures in which we have a noncontrolling equity interest and noncontrolling investments inherently involve a lesser degree of control over business operations, thereby potentially increasing the financial, legal, operational and compliance risks associated with the joint venture or minority investment. We may be dependent on joint venture partners or management who may have business interests, strategies or goals that are inconsistent with ours. Business decisions or other acts or omissions of the joint venture partner or management may adversely affect the value of our investment, result in litigation or regulatory action against us, result in reputational harm to us or adversely affect the value of our investment or partnership. To the extent another party makes decisions that negatively impact the joint venture or internal control issues arise within the joint venture, we may have to take responsive or other actions or we may be subject to penalties, fines or other related actions for these activities.

Deterioration in the collectability of "patient due" accounts could adversely affect our revenues and results of operations.

The primary collection risks associated with our accounts receivable relate to uninsured patient accounts and patient accounts for which the primary insurance carrier has paid the amounts covered by the applicable agreement, but patient responsibility amounts (exclusions, deductibles and co-payments) remain outstanding. The provision for doubtful accounts relates primarily to amounts due directly from patients. The amount of our provision for doubtful accounts is based on management's assessment of historical collection trends, business and economic conditions, trends in federal and state governmental and private employer health coverage, the rate of growth in uninsured patient admissions and other collection indicators.

If we experience growth in self-pay volume and revenue, including increased acuity levels for uninsured patients and increases in co-payments and deductibles for insured patients, our revenues and results of operations could be adversely affected. Although we have experienced a reduction in uninsured patients since 2014 as a result of the Affordable Care Act and the expansion of state Medicaid programs, we are unable to predict whether that trend will continue in light of the repeal of the penalties associated with the individual mandate, the cessation of the cost sharing reduction payments to insurers, the decision by some states not to expand their Medicaid programs, and the business closings and layoffs that have and may continue to occur as a result of the COVID-19 pandemic. In addition, the risk of collection from insured patients (and the amounts due) has increased, and will likely continue to increase, as a result of more individuals being enrolled in insurance plans with high deductibles and high co-payments, including those purchased on the Exchanges. Furthermore, our ability to improve co-insurance collections and collections from self-pay patients may be limited by legislative developments, such as federal and state legislation designed to reduce "surprise billing," or by other regulatory or investigatory initiatives, including private lawsuits directed at hospital charges and collection practices for uninsured and underinsured patients.

An increase in the proportion of our accounts receivable being comprised of uninsured accounts and a deterioration in the collectability of these both insured and uninsured accounts could adversely affect our results of operations and revenues. Even if the Affordable Care Act remains implemented in its current form, we may continue to experience bad debts and be required to provide uninsured discounts and charity care for patients who choose not to purchase coverage, are undocumented immigrants who are not permitted to enroll in the Exchanges or government healthcare programs or live in states that do not expand or maintain the expansion of their Medicaid programs.

Other hospitals and outpatient facilities provide services similar to those which we offer. In addition, healthcare providers provide services in their offices that could be provided in our facilities. These factors increase the level of competition we face and may therefore adversely affect our revenues and results of operations.

Competition among hospitals and other healthcare service providers, including outpatient facilities, has intensified in recent years. We also have acquired, and may continue to acquire, larger facilities in more concentrated population centers, which experience greater competition for healthcare services. We compete with other facilities, including larger tertiary and quaternary care centers located in metropolitan areas. Although the facilities with which we compete may be a significant distance away from our facilities, patients in our markets may migrate on their own to, may be referred by local providers to, or may be required by their health plan to travel to these facilities. Furthermore, some of the facilities with which we compete may offer more or different services than those available at our facilities, may have more advanced equipment or technology or may have a medical staff that is perceived to be better qualified. We also compete with facilities and health systems that are implementing physician and other provider alignment strategies, such as employing providers, acquiring physician practice groups and participating in ACOs or other clinical integration models, which may impact our competitive position. Also, many of the facilities that compete with our facilities are owned by tax-supported governmental agencies or not-for-profit entities supported by endowments and charitable contributions and are eligible to participate in the 340B Program. These facilities, in most instances, are also exempt from paying sales, property and income taxes and have the ability to issue tax-exempt bonds for financing.

Quality of care and value-based purchasing have also become significant trends and competitive factors in the healthcare industry. CMS makes public the performance data relating to multiple quality measures that facilities submit in connection with their Medicare payment. CMS also requires every Medicare participating hospital to establish and update annually a public online listing of the hospital's standard charges for items and services and recently issued new regulations that would significantly increase hospital charge reporting requirements. If the publicly-available performance and charge data become a primary factor in where patients choose to receive care, and if competing facilities have lower charges or better results than our facilities on those measures, our revenues and/or patient volumes could decline.

We also face significant and increasing competition from services offered by providers (including providers on our medical staffs) in their offices and from other specialized care providers, including freestanding emergency departments and outpatient surgery, oncology, physical therapy, diagnostic and urgent care centers (including many in which providers may have an ownership interest). We also compete with specialty facilities that focus on one or a small number of lucrative service lines, some of which are not required to operate emergency departments. Some of our facilities have and will seek to develop outpatient facilities where necessary to compete effectively. However, to the extent that other providers are successful in developing outpatient facilities or providers are able to offer additional, advanced services in their offices, our market share for these services will likely decrease in the future. In addition, the phasing out and eventual elimination of the Medicare program's inpatient only procedure list may also reduce our inpatient volumes.

We may have difficulty acquiring or divesting facilities on favorable terms. Furthermore, our business could be negatively affected if acquisitions or divestitures are not successfully completed or if contingent liabilities materialize in connection with such transactions.

A significant element of our business strategy is expansion through the acquisition of acute care facilities, especially those around which a system of facilities and other healthcare services can be created. We face significant competition to acquire attractive facilities, and we may not find suitable acquisitions on favorable terms. Our primary competitors for acquisitions have included for-profit and tax-exempt facilities and hospital systems and privately capitalized start-up companies. Buyers with a strategic desire for any particular facility—for example, a facility located near existing facilities or those who will realize economic synergies—have demonstrated an ability and willingness to pay premium prices for facilities. Strategic buyers, as a result, can present a competitive barrier to our acquisition efforts.

The cost of an acquisition could result in a dilutive effect on our results of operations, depending on various factors, including the amount paid for the acquisition, the acquired facility's results of operations, allocation of purchase price, effects of subsequent legislation and limitations on rate increases. As part of our acquisition strategy, we may commit to making significant capital improvements at acquired facilities. Such improvements may be difficult to achieve in the anticipated timeframe, if at all, due to a variety of factors beyond our control, such as zoning, environmental, licensing and certificate of need regulations and restrictions.

Our ability to engage in certain acquisitions in several states may be limited due to exclusivity, non-competition and non-solicitation provisions that we have agreed to in connection with our joint ventures and previous acquisitions and divestiture transactions. Additionally, certain acquisitions may require the consent of and collaboration with our joint venture partners based upon the applicable governing documents. If we cannot obtain the cooperation of our joint venture partners in certain instances, we may not be able to pursue these opportunities.

Even if we are able to identify an attractive target, we may need to obtain financing for acquisitions, joint ventures or required capital improvements. Such financing may not be available, or we may incur or assume additional indebtedness as a result. Any financing arrangements we enter into may not be on terms favorable to us, and this could have a material adverse effect on our results of operations.

In recent years, the legislatures and attorneys general of several states have sought to exercise more active oversight authority regarding sales of facilities by tax-exempt entities. For example, as a condition to approving an acquisition involving a non-profit hospital, the state attorney general of a state in which an acquisition takes place may require us to maintain specific service lines or provide charity care at certain minimum levels for set periods of time after closing of the acquisition, regardless of profitability. This heightened scrutiny may increase the cost and difficulty, or prevent the completion, of transactions with tax-exempt organizations in the future. Our failure to acquire facilities consistent with our growth plans could prevent us from increasing our revenues.

We regularly evaluate the potential disposition of assets and facilities that may no longer help us attain our objectives. When we decide to sell assets or facilities, we may encounter difficulties in finding buyers or alternative exit strategies on acceptable terms or in a timely manner, which could delay the achievement of our strategic objectives. Additionally, the terms of our Master Leases (as defined below) entered into pursuant to sale leaseback transactions may make it more difficult to dispose of certain facilities. We may also dispose of assets or a facility at a price, or on terms, less desirable than we anticipated. In addition, we may experience greater dis-synergies than expected. After reaching an agreement with a buyer for the disposition of assets or a facility, we will be subject to satisfaction of pre-closing conditions as well as to necessary regulatory and governmental approvals on acceptable terms, which, if not satisfied or obtained, may prevent us from completing the transaction. Dispositions may also involve continued financial involvement in the divested facilities, such as through continuing equity ownership, guarantees, indemnities, transition service agreements or other financial and commercial obligations, and inability to avoid retention of certain regulatory and compliance risks. There can be no assurance that the anticipated benefits of our future divestiture strategies will be realized. Furthermore, we may be exposed to contingent liabilities in connection with completed divestitures. Finally, certain acquisition agreements and joint venture arrangements contain covenants that restrict our ability to dispose of certain facilities without first seeking consent of a joint venture partner or other third parties, which may affect our ability to take advantage of business opportunities that may be in our interest. If we do not realize the anticipated benefits of such divestitures, if contingent liabilities related to such divestitures materialize or if we are unable to divest certain properties on favorable terms or at all, this could have a material adverse effect on our results of operations.

If we are unable to implement successfully standardized processes, policies and systems throughout our facilities, our operating results could be negatively impacted.

We have initiated a multi-year business initiative to standardize certain processes, policies and systems throughout our facilities, including migrating our multiple IT platforms to a smaller number of enterprise-wide systems solutions. If we do not allocate and effectively manage the resources necessary to build and sustain the proper IT infrastructure and implement standardized systems, or if we fail to achieve the expected benefits from this initiative, it may impact our ability to operate profitably and efficiently, as well as comply in a timely manner with changing regulatory requirements and with the requests of patients, payers and business partners. The failure to transition to these systems on time, or anticipate necessary readiness and training needs, could lead to business disruption and loss of revenue. In addition, the operating results of newly acquired facilities could be impacted if such facilities are not integrated on a timely basis into our new systems. The actions we take to resolve compliance or regulatory issues within acquired facilities may affect our revenue or results of operations.

In addition, as new information systems are developed in the future, we will need to integrate them into our existing systems. Evolving industry and regulatory standards may require changes to our systems in the future. System conversions are costly, time consuming and disruptive for providers, staff and, in some cases, patients. Some of our facilities have recently converted or are currently converting from their existing system to another third-party information system. If such conversions occurred on a large scale or if conversions at our larger facilities experience difficulties, the costs and disruptions could have a material adverse effect on our revenues or results of operations.

Under the A&R Capella Master Lease (as defined below) and the 2019 Master Lease, each of which separately governs certain of our facilities, a default with respect to one facility under either such lease, or in the case of the A&R Capella Master Lease, certain related separate leases, could cause a default under all of the facilities subject to the A&R Capella Master Lease or the 2019 Master Lease, as applicable, which would have a material adverse effect on our business, results of operations and financial condition.

If there is a default under that certain Amended and Restated Master Lease Agreement (the "***A&R Capella Master Lease***") with subsidiaries of MPT Camaro OpCo, LLC, a Delaware limited liability company and wholly-owned subsidiary of MPT, dated as of March 21, 2016, or the 2019 Master Lease (together with the A&R Capella Master Lease, the "***Master Leases***" and each a "***Master Lease***"), even if such default relates to one facility, the lessor(s) may terminate the applicable Master Lease in its entirety with respect to all of the facilities governed by such Master Lease. Additionally, we have entered into amended and restated separate leases with affiliates of MPT with respect to our joint ventures Capital Medical Center located in Olympia, Washington on October 31, 2016 (the "***Olympia Lease***") and National Park Medical Center in Hot Springs, Arkansas on March 21, 2016 (the "***Hot Springs Lease***").

Under each Master Lease, the Olympia Lease and the Hot Springs Lease, we are subject to financial covenants based on certain fixed charges. The failure to meet or obtain a waiver of such covenants or otherwise cure such non-compliance in each Master Lease, the Olympia Lease or the Hot Springs Lease in the future would result in an event of default under the applicable lease. We have received a waiver of compliance with respect to the Olympia Lease financial covenants through March 31, 2022. There can be no assurance that we will be able to obtain a similar waiver in the future if we are unable to meet such financial covenants. Additionally, on December 23, 2020, we entered into a definitive agreement with an unrelated third-party to sell our ownership interest in Capital Medical Center.

Other events that could trigger a default under each Master Lease, the Olympia Lease or the Hot Springs Lease if not cured within the time periods required by such lease include, without limitation, (i) failure to pay rent or other amounts due under the lease, (ii) failure to comply with the non-financial covenants under the lease, (iii) the bankruptcy of any facility lessee under such lease or the guarantor of the facility lessees under the applicable lease, (iv) termination of any licenses necessary for operation of a facility or required for certification under Medicare or Medicaid, (v) a change of control (as defined in the applicable lease) in violation of such lease and (vi) a default under any material documents between any lessee of the facilities and any lessor of any facility. Each Master Lease contains cross-default provisions so that certain defaults with respect to one of the facilities subject to such Master Lease may cause a default under the entire Master Lease. Accordingly, a default under a Master Lease that results in a termination of such Master Lease would cause us to lose the ability to operate all of the facilities subject to such Master Lease and to incur substantial costs in restoring the premises, which would have a material adverse effect on our business, results of operations and financial condition. Although the A&R Capella Master Lease and the 2019 Master Lease are not cross defaulted to one another, a default under the Olympia Lease or the Hot Springs Lease may trigger a cross default of the A&R Capella Master Lease.

If any of the Master Leases, the Olympia Lease or the Hot Springs Lease, is terminated prior to its expiration because of a default and the applicable affiliate of MPT, as lessor, exercises its rights thereunder, in addition to losing the ability to operate our facilities, we may be liable for (i) damages and incur charges such as continued lease payments through the end of the lease term (or such shorter period as proscribed in the applicable lease or by law) and (ii) maintenance costs for the leased property. Upon termination of either Master Lease, the Olympia Lease or the Hot Springs Lease, we will be obligated to restore the applicable premises to its original condition and repair all damage caused by the installation or removal of our applicable personal property, ordinary wear and tear excepted. We also have restoration obligations with respect to certain casualty and condemnation events. In addition, upon termination of a Master Lease, the Olympia Lease or the Hot Springs Lease, the lessor will have the option to purchase all of the applicable lessee's personal property at fair market value.

Because many of the facilities we operate are subject to long-term leases, failure to comply with the terms of such leases or failure to renew such leases could cause us to lose the ability to operate these facilities altogether and incur substantial costs in restoring the premises.

The rights to use many of our facilities are based upon long-term leases, including the Master Leases. Pursuant to the terms of these leases, we are required to pay all rent due and comply with all other lessee obligations. As of December 31, 2020, the remaining term of these leases (including renewal options) generally ranged from less than one year up to 76 years. A pledge of our interest in some of these leases may also require the consent of the respective lessor and its lenders. As a result, we may not be able to sell, assign, transfer or convey our interest in certain facilities subject to such leases in the future absent consent of such third parties even if such transactions may be in our best interest. Most of the leases require that, upon the expiration or termination of the leases, we must surrender any improvements to the land to lessor. In addition, some of our leases include early termination provisions. We are typically responsible for all taxes, insurance, assessments and maintenance obligations under the leases. The leases also generally require the lessee to either reconstruct or restore the premises to its original condition following a casualty and to apply in a specified manner any proceeds received in connection therewith. In some leases the lessor has the option to purchase some or all of the assets owned by us and used in connection with the operation of the applicable facility. Accordingly, failure to comply with the terms of such leases, the invalidity of or default or termination under such leases could cause us to lose the ability to operate these facilities altogether and incur substantial costs in restoring the premises, which could have a material adverse effect on our business, results of operations and financial condition.

Many of the non-urban communities in which we operate continue to face challenging economic conditions and demographic trends, which may materially and adversely impede our business strategies intended to generate organic growth and improve operating results at our facilities.

Many of the non-urban communities in which we operate continue to face challenging economic conditions, including high levels of unemployment and demographic trends. These challenging economic conditions have been further exacerbated by the impact of the COVID-19 pandemic. The economies in the non-urban communities in which our facilities primarily operate are often dependent on a small number of large employers, especially manufacturing or similar facilities. These employers often provide income and health insurance for a disproportionately large number of community residents who may depend on our facilities for care. The failure of one or more large employers, or the closure or substantial reduction in the number of individuals employed at manufacturing or similar facilities located in or near many of the non-urban communities in which our facilities primarily operate, could cause affected employees to move elsewhere for employment or lose insurance coverage that was otherwise available to them.

When patients are experiencing personal financial difficulties or have concerns about general economic conditions, they may choose to:

- defer or forego elective surgeries and other non-emergent procedures, which are generally more profitable lines of business for facilities; or
- purchase a high-deductible insurance plan or no insurance at all, which increases a facility's dependence on self-pay revenue. Moreover, a greater number of uninsured patients may seek care in our emergency rooms.

Additionally, non-urban communities are experiencing a much slower rate of growth, if any, as compared to more concentrated population centers. As a result, we may experience payer mix pressures as aging populations in our non-urban communities shift from commercial insurance programs to Medicare or managed Medicare programs.

The occurrence of these events may impede our business strategies intended to generate organic growth and improve operating results at our facilities.

Credit and Liquidity Risks

Our substantial indebtedness could materially and adversely affect our ability to raise additional capital to fund our operations, limit our ability to react to changes in the economy or our industry and prevent us from making debt service payments.

We are a highly leveraged company. As of December 31, 2020, we had total outstanding debt of approximately $6,339.5 million, excluding finance leases and unamortized debt issuance costs and premium. Our substantial indebtedness could have important consequences for the Lenders and Holders of our indebtedness. For example, it could:

- limit our ability to borrow money for our working capital, capital expenditures, debt service requirements, strategic initiatives or other purposes;
- make it more difficult for us to satisfy our obligations with respect to our indebtedness and any failure to comply with the obligations of any of our debt instruments, including restrictive covenants and borrowing conditions, could result in an event of default under the agreements governing our indebtedness;
- require us to dedicate a substantial portion of our cash flow from operations to the payment of interest and the repayment of our indebtedness, thereby reducing funds available to us for other purposes;
- limit our flexibility in planning for, or reacting to, changes in our operations or business;
- make us more highly leveraged than some of our competitors, which may place us at a competitive disadvantage;
- make us more vulnerable to downturns in our business, our industry or the economy;
- restrict us from making strategic acquisitions, engaging in development activities, introducing new technologies or developing business opportunities;
- cause us to make non-strategic divestitures;
- limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds or dispose of assets;
- prevent us from raising the funds necessary to repurchase all notes tendered to us upon the occurrence of certain changes of control, which failure to repurchase would constitute an event of default under the Indentures governing the Notes; or
- expose us to the risk of increased interest rates, as certain of our borrowings, including borrowings under the ABL Facility and the Term Loan Facility, are at variable rates of interest.

In addition, the Indentures and the Credit Agreements contain restrictive covenants that limit or will limit our ability to engage in activities that may be in our long-term best interest. Our failure to comply with those covenants could result in an event of default which, if not cured or waived, could result in the acceleration of substantially all of our existing and future indebtedness.

We may not be able to generate sufficient cash to service all of our indebtedness and may be forced to take other actions to satisfy our obligations under our indebtedness that may not be successful.

Our ability to pay principal and interest and to satisfy our other debt obligations will depend upon, among other things:

- our future financial and operating performance (including the realization of any cost savings described herein), which will be affected by prevailing economic, industry and competitive conditions and financial, business, legislative, regulatory and other factors, many of which are beyond our control; and
- our future ability to borrow under the ABL Facility, the availability of which depends on, among other things, our complying with the covenants in the credit agreement governing the ABL Facility.

We cannot assure you that our business will generate cash flow from operations, or that we will be able to draw under the ABL Facility or otherwise, in an amount sufficient to fund our liquidity needs, including the payment of interest on the ABL Facility, the Term Loan Facility and the Notes.

If our cash flows and capital resources are insufficient to service our indebtedness, we may be forced to reduce or delay capital expenditures, sell assets, seek additional capital or restructure or refinance our indebtedness, including the Notes and any indebtedness under the Credit Agreements. These alternative measures may not be successful and may not permit us to meet our scheduled debt service obligations. Our ability to restructure or refinance our debt will depend on the condition of the capital markets and our financial condition at such time. Any refinancing of our debt could be at higher interest rates and may require us to comply with more onerous covenants, which could further restrict our business operations. In addition, the terms of existing or future debt agreements, including the ABL Facility, the Term Loan Facility, the Indentures, may restrict us from adopting some of these alternatives. In the absence of such operating results and resources, we could face substantial liquidity problems and might be required to dispose of material assets or operations to meet our debt service and other obligations. We may not be able to consummate those dispositions for fair market value or at all. Furthermore, any proceeds that we could realize from any such dispositions may not be adequate to meet our debt service obligations then due. The Sponsor and its affiliates have no continuing obligation to provide us with debt or equity financing. Our inability to generate sufficient cash flow to satisfy our debt obligations, or to refinance our indebtedness on commercially reasonable terms or at all, could result in a material adverse effect on our business, results of operations and financial condition and could negatively impact our ability to satisfy our obligations under our indebtedness.

If we cannot make scheduled payments on our indebtedness, we will be in default, and the Lenders under the Term Loan Facility and the Holders of the Notes could declare all outstanding principal and interest to be due and payable, the Lenders under the ABL Facility could terminate their commitments to loan money, our secured lenders (including the Lenders under the ABL Facility and the holders of the Notes) could foreclose against the assets securing their loans and the Notes and we could be forced into bankruptcy or liquidation.

We may not be able to generate sufficient cash flow through operations or successfully access other capital resources to fund all of our capital expenditure programs and commitments.

We require substantial capital resources to fund our growth strategy and ongoing capital expenditure programs, including capital expenditure programs for renovation, expansion and construction at our facilities and the addition of equipment and technology at our facilities. We often commit to significant capital expenditures well in advance of the time these expenditures will be made. Our cash flows and available capital resources may be insufficient to fund our capital expenditure programs and commitments, and we may be forced to reduce or delay planned and required capital expenditures. Additionally, we may experience delays or impediments in satisfying the schedule for capital expenditure commitments because of a variety of factors beyond our control, such as zoning, environmental, licensing and certificate of need regulations and restrictions, adverse weather conditions, shortages of labor or materials or other unforeseen problems or delays. The failure to satisfy our capital expenditure commitment obligations could also damage our reputation within our communities, expose us to potential claims from former owners of acquired facilities, lessors or other governing or regulatory agencies, and adversely impact our ability to negotiate and complete future acquisitions.

At December 31, 2020, we estimated our total remaining capital expenditure commitments to be approximately $1,174.7 million, which generally have remaining terms of two to six years. Of this amount, more than one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time. The failure to satisfy our capital expenditure commitment obligations could damage our reputation within our communities, expose us to potential claims from former owners of acquired facilities, lessors or other governing or regulatory agencies, and adversely impact our ability to negotiate and complete future acquisitions. As a result, if our cash flows and available capital resources are not sufficient to fund all of our anticipated capital expenditures, it may be necessary for us to give priority to contractual capital expenditure commitment obligations over other elective capital expenditure programs.

Our debt agreements contain restrictions that will limit our flexibility in operating our business.

The Indentures and the Credit Agreements contain a number of covenants that will impose significant operating and financial restrictions on us, including restrictions on our and our subsidiaries ability to, among other things:

- incur additional debt, guarantee indebtedness or issue certain preferred shares;
- pay dividends on or make distributions in respect of, or repurchase or redeem, our capital stock or make other restricted payments;
- prepay, redeem or repurchase certain debt;
- make loans or certain investments;
- sell certain assets;
- create liens on certain assets;
- consolidate, merge, sell or otherwise dispose of all or substantially all of our assets;
- enter into certain transactions with our affiliates;
- alter the businesses we conduct;
- enter into agreements restricting our subsidiaries' ability to pay dividends; and
- designate our subsidiaries as unrestricted subsidiaries.

As a result of these covenants, we will be limited in the manner in which we conduct our business, and we may be unable to engage in favorable business activities or finance future operations or capital needs.

In addition, the ABL Facility requires us to maintain a minimum fixed charge coverage ratio at any time when the average availability is less than the greater of $65.0 million and 10% of the lesser of the aggregate amount of revolving facility commitments and the borrowing base at such time. In that event, we must satisfy a minimum fixed charge ratio of 1.0 to 1.0. At December 31, 2020, we were in compliance with this financial maintenance covenant.

A failure to comply with the covenants under the Indentures, the Credit Agreements or any of our other future indebtedness could result in an event of default, which, if not cured or waived, could have a material adverse effect on our business, financial condition and results of operations. In the event of any such default, the Lenders thereunder:

- will not be required to lend any additional amounts to us;
- could elect to declare all borrowings outstanding, together with accrued and unpaid interest and fees, to be due and payable and terminate all commitments to extend further credit;
- could require us to apply all of our available cash to repay these borrowings; or
- could effectively prevent us from making debt service payments on the Notes (due to a cash sweep feature under the ABL Facility).

Such actions by the Lenders could cause cross defaults under our other indebtedness. If we were unable to repay those amounts, the Lenders and Holders under the ABL Facility, the Term Loan Facility, the 6.75% Secured Notes and the 4.375% Secured Notes could proceed against the collateral granted to them to secure the ABL Facility, the Term Loan Facility, the 6.75% Secured Notes and the 4.375% Secured Notes, respectively. If any of our outstanding indebtedness under the ABL Facility, the Term Loan Facility, the Notes or any of our other existing or future indebtedness were to be accelerated, there can be no assurance that our assets would be sufficient to repay such indebtedness in full.

Repayment of our debt is dependent on cash flow generated by our subsidiaries.

Repayment of our indebtedness, including the ABL Facility, the Term Loan Facility and the Notes, is dependent on the generation of cash flow by our subsidiaries and their ability to make such cash available to us, by dividend, debt repayment or otherwise. Unless they are guarantors of the indebtedness, our subsidiaries do not have any obligation to pay amounts due on such indebtedness or to make funds available for that purpose. Our subsidiaries may not be able to, or may not be permitted to, make distributions to enable us to make payments in respect of our indebtedness. Each subsidiary is a distinct legal entity and, under certain circumstances, legal and contractual restrictions may limit our ability to obtain cash from our subsidiaries. While our debt agreements will limit the ability of our restricted subsidiaries to incur consensual restrictions on their ability to pay dividends or make other intercompany payments to us, these limitations are subject to certain qualifications and exceptions. In the event that we do not receive distributions from our subsidiaries, we may be unable to make required principal and interest payments on our indebtedness. In the event we require restructuring or refinancing, we cannot assure you that we will be able to restructure or refinance any of our debt on commercially reasonable terms or at all.

Despite our substantial indebtedness, we may still be able to incur significantly more debt, which could intensify the risks described above.

We and our subsidiaries may be able to incur substantial indebtedness in the future. Although the terms of the Credit Agreements and the Indentures contain restrictions on our and our subsidiaries' ability to incur additional indebtedness, these restrictions are subject to a number of important qualifications and exceptions, and the indebtedness incurred in compliance with these restrictions could be substantial. These restrictions also will not prevent us from incurring obligations that do not constitute indebtedness. As of December 31, 2020, we had $538.8 million available for additional borrowing under the ABL Facility, after giving effect to any letters of credit issued thereunder, which were approximately $45.3 million as of December 31, 2020, all of which would be secured. In addition to the Notes and our borrowings under the Credit Agreements, the covenants under any other existing or future debt instruments could allow us to incur a significant amount of additional indebtedness and, subject to certain limitations, such additional indebtedness could be secured. The more leveraged we become, the more we, and in turn our security holders, will be exposed to certain risks described above under "—Our debt agreements contain restrictions that will limit our flexibility in operating our business."

Our variable rate indebtedness subjects us to interest rate risk, which could cause our debt service obligations to increase significantly.

Borrowings under the ABL Facility and the Term Loan Facility are at variable rates of interest and expose us to interest rate risk. Assuming the revolving credit facility is fully drawn, each 1% change in assumed blended interest rates would result in an approximately $40 million change in aggregate annual interest expense on indebtedness under the ABL Facility and the Term Loan Facility. To manage this risk, we entered into an interest rate swap agreement on December 21, 2018 with Citibank, N.A. as counterparty (the "***Interest Rate Swap***"). The terms of the Interest Rate Swap require us to pay a fixed rate of 2.63% on a notional amount of $1,100.0 million and, in exchange, we receive one-month LIBOR. The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. We have not designated our Interest Rate Swap as a cash flow hedge in accordance with ASC 815, "Derivatives and Hedging" ("***ASC 815***"). Therefore, all changes in the fair value of our Interest Rate Swap will be recognized through interest expense in our results of operations. Changes in the fair value of our Interest Rate Swap could result in a material effect on our consolidated results of operations and financial position; however, we do not anticipate that changes in the fair value of our Interest Rate Swap will have any impact on our cash flows.

Our ability to utilize our NOLs may be limited, and we may not be able to utilize our NOLs as a result of recent U.S. federal tax reform legislation.

As of December 31, 2020, we had approximately $1.9 billion in state and local NOLs that expire at various dates between 2021 and 2039. To the extent available and not otherwise utilized, we intend to use any NOLs to reduce the applicable state corporate income tax liability associated with our operations. However, our ability to utilize our NOLs is based on the extent to which we generate future taxable income and on prevailing corporate income tax rates, and we cannot provide any assurance as to when and to what extent we will generate sufficient future taxable income to realize our deferred tax assets, whether in whole or in part. Furthermore, the utilization of our NOLs may become subject to an annual limitation under Section 382 of the Code (and similar state provisions) in the event of certain cumulative changes in the ownership interest of significant shareholders in excess of 50 percent over a three-year period. This could limit the amount of NOLs that can be utilized annually to offset taxable income. The amount of the annual limitation is determined based on the value of a company immediately prior to the ownership change. Subsequent ownership changes may further affect the limitation in future years. For these reasons, our ability to utilize our NOLs may be limited.

Human Capital Risks

Factors related to our employment of physicians could affect our financial performance.

Our subsidiaries employ a large number of physicians. Physician employment by health systems and acute care facilities, where permissible, is a trend in the industry and has become more common as a result of actual and potential reductions in payment amounts for physician services and increasing operating costs to physicians. Employed physicians generally present more direct risks to us than those presented by independent members of our hospitals' medical staffs, such as risks of unsuccessful physician integration, challenges associated with physician practice management and compliance risks arising from the increased billing and coding activities associated with the employment of physicians, the possibility of legal claims under federal and state employment law, and governmental scrutiny of physician employment arrangements. Employed physicians also require us to incur additional expenses, such as increased salary and benefit costs, medical malpractice expense and rent expense. Payments received by us for services provided by our employed physicians, the physicians to whom our facilities have provided recruitment assistance, and the physician members of our medical staffs could be adversely affected as physician payment methodologies move toward pay-for-performance as hospital payment models are doing. The combination of payment cuts, potential liabilities and increased expenses could have an adverse effect on our results of operations.

If we do not effectively attract, recruit and retain qualified physicians and other healthcare providers, our ability to deliver healthcare services efficiently will be adversely affected.

The success of our business operations depends on the number and quality of the physicians and other healthcare providers who perform services at our facilities. Our ability to recruit and retain quality providers in turn depends on several factors, including the actual and perceived quality of services furnished by our facilities, our ability to meet demands for new technology, our ability to identify and communicate with providers who want to practice in our communities and our ability to provide competitive financial compensation packages. Our ability to attract and retain providers is increasingly dependent on the ability of our facilities to offer and sustain employment arrangements. In particular, we face intense competition in the recruitment and retention of specialists and primary care providers. We may not be able to recruit all of the providers we target. In addition, we may incur increased malpractice, compliance or insurance expense depending on the quality of providers' clinical outcomes.

Additionally, our ability to recruit and employ providers is closely regulated. For example, the types, amount and duration of compensation and assistance we can provide to recruited physicians are limited by the federal physician self-referral law (commonly referred to as the Stark law), the Anti-kickback Statute, state anti-kickback and self-referral statutes, and related regulations. The Stark law requires, among other things, that recruitment assistance can only be provided to physicians who meet certain geographic and practice requirements, that the amount of assistance cannot be changed during the term of the recruitment agreement, and that the recruitment payments cannot generally benefit physicians currently in practice in the community beyond recruitment costs actually incurred by them. All arrangements with physicians must also be fair market value and commercially reasonable.

In addition to these legal requirements, there is competition from other communities and facilities for these providers, and this competition continues after the provider is practicing in one of our communities. For example, integrated ACOs and other kinds of "narrow" provider networks or organizations may exclude our providers from their plans' networks of healthcare providers. These contracting networks often organize hospitals, providers and ancillary healthcare providers into exclusive networks involving fewer healthcare providers. If our affiliated providers are excluded from such networks, we may have difficulty recruiting new providers or retaining existing providers.

Furthermore, a significant portion of the providers serving our facilities are native to countries other than the U.S. Our ability to recruit such providers and their ability and willingness to remain and work in the U.S. are impacted by immigration laws and regulations. Changes in immigration or naturalization laws, regulations, or procedures may adversely affect our ability to hire or retain providers and may adversely affect our costs of doing business or our ability to deliver services in our communities.

Generally, a small number of attending physicians within each of our facilities represent a large share of our inpatient revenues and admissions. The loss of one or more of these physicians—even if temporary—could cause a material reduction in our revenues, which could take significant time to replace given the difficulty and cost associated with recruiting and retaining physicians.

Our facilities face competition for management and other non-physician staffing, which may increase labor costs and reduce profitability.

In addition to depending on our physicians and other providers, the operations of our facilities are dependent on the efforts, abilities and experience of our management and medical support personnel, such as nurses, pharmacists and lab technicians. We compete with other healthcare facilities in recruiting and retaining qualified management and staff personnel responsible for the day-to-day operations of each of our facilities, including physician assistants, nurses and other non-physician healthcare professionals. In some markets, the scarce availability of nurses and other medical support personnel presents a significant operating issue and the competition for experienced and talented hospital management personnel is intense. This may result in employee turnover, require us to enhance wages and benefits to recruit and retain management, nurses and other medical support personnel, recruit personnel from foreign countries (which may be limited by changes in immigration law, regulation and policy), and hire more expensive temporary or contract personnel. In addition, the states in which we operate could adopt mandatory nurse staffing ratios or could increase mandatory nurse-to-patient staffing ratios already in place. State-mandated nurse-staffing ratios could significantly affect labor costs and have an adverse impact on revenues if we are required to limit admissions in order to meet the required ratios. Some of the employees at some of our facilities are represented by a union, and others may be in the future, which can also increase the cost of labor. If our labor costs increase, we may not be able to raise rates to offset these increased costs. We also depend on the available labor pool of semi-skilled and unskilled employees in each of the markets in which we operate. Because a significant percentage of our revenue consists of fixed, prospective payments, our ability to pass along increased labor costs is constrained. Our failure to recruit and retain qualified management, nurses and other medical support personnel, or to control our labor costs could have a material adverse effect on our revenues or results of operations.

Labor union activity could raise costs and interfere with our operations. Certain of our employees are union members and subject to the terms of collective bargaining agreements.

Increased or ongoing labor union activity could adversely affect our labor costs or otherwise adversely impact us. Several of our facilities have unionized employees. When a new collective bargaining agreement with a union must be negotiated, whether such agreements are renewals or first contracts, there is the possibility that strikes could occur, and our operations could be disrupted or our labor costs increased as a result of these disruptions. Our labor costs also could increase significantly if a substantial number of other employees at our facilities unionize. If our labor costs increase, we may not be able to raise rates to offset these increased costs. Because a significant percentage of our revenue consists of fixed, prospective payments, our ability to pass along increased labor costs is constrained.

The terms of the collective bargaining agreements also set forth certain requirements related to the respective facility's employment practices, seniority, hours of work, overtime, holidays, use and redemption of paid time off, extended illness bank, vacation scheduling, compensation, pay practice, health and non-health benefits, leaves of absence, grievance procedures, disability accommodations and the facility's drug and alcohol policies. If these facilities fail to fulfill any of these requirements, it could result in discussions with union representatives or the filing of a grievance that could be costly and time-consuming for those facilities. Furthermore, the terms of the collective bargaining agreements constrain our flexibility with respect to these and other employee issues. The inability to negotiate future collective bargaining agreements on favorable terms with these employees or with other unionized employees could have a material adverse effect on our business, results of operations and financial condition.

We are dependent on our executive management team and the loss of the services of one or more of our executive management team could have a material adverse effect on our business.

The success of our business is largely dependent upon the services and management experience of our executive management team. In addition, we depend on the ability of our executive officers and key employees to manage growth successfully and on our ability to attract and retain skilled employees. We do not maintain key man life insurance policies on any of our officers. If we were to lose any of our executive management team or members of our local management teams, or if we are unable to attract other necessary personnel in the future, it could have a material adverse effect on our business, financial condition and results of operations. If we were to lose the services of one or more members of our executive management team, we could experience a significant disruption in our operations and failure of the affected facilities to adhere to their respective business plans.

Regulatory and Legal Risks

We are subject to increasingly stringent governmental regulations, and we may face allegations that we have failed to comply with such regulations, which could result in criminal and civil sanctions, exclusion from government healthcare programs and even greater scrutiny that may reduce our revenues and profitability.

All participants in the healthcare industry are required to comply with numerous overlapping laws and regulations at the federal, state and local government levels. These laws and regulations require that hospitals meet various requirements, including those relating to relationships with providers and other referral sources, the adequacy and quality of medical care, inpatient admission criteria, privacy and security of health information, standards for equipment, personnel, operating policies and procedures, billing and cost reports, payment for services and supplies, maintenance of adequate records, compliance with building codes and environmental protection, among other matters. Many of the laws and regulations applicable to the healthcare industry are complex and may be violated inadvertently, and there are numerous enforcement authorities, including CMS, the Office of Inspector General (the "***OIG***"), the DOJ, state attorneys general, and contracted auditors, as well as private plaintiffs.

There are also heightened coordinated civil and criminal enforcement efforts by both federal and state government agencies relating to the healthcare industry, including the hospital segment, which has led to a number of investigations, prosecutions, convictions and settlements in the healthcare industry. Recent enforcement actions have focused on, among other things, financial arrangements between hospitals and providers, billing for services without adequately documenting the medical necessity for such services and billing for services outside the coverage guidelines for such services. Hospitals continue to be one of the primary focal areas of the OIG and other governmental fraud and abuse programs, as described in the OIG Work Plan. Dealing with investigations can be time and resource consuming and can divert management's attention from the business. Any such investigation or settlement could increase our costs or otherwise have an adverse effect on our business. In addition, because of the potential for large monetary exposure under the False Claims Act, which provides for treble damages and substantial civil monetary penalties for each separate false claim or statement, healthcare providers often resolve allegations without admissions of liability for significant and material amounts to avoid the uncertainty of damages and penalties that may be awarded in litigation proceedings. Such settlements often contain additional compliance and reporting requirements as part of a consent decree, settlement agreement or corporate integrity agreement. These additional requirements can result in significant additional and ongoing expenditures. Given the significant size of actual and potential settlements, it is expected that the government will continue to devote substantial resources to investigating healthcare providers' compliance with the healthcare payment rules and fraud and abuse laws. Certain of our facilities have received inquiries and subpoenas from various governmental agencies regarding these matters, and we are also subject to various claims and lawsuits relating to these and other matters.

The laws and regulations with which we must comply continually change. In the future, different interpretations or enforcement of these laws and regulations could subject our business practices to allegations of impropriety or illegality or could require us to make changes in our facilities, equipment, personnel, services, capital expenditure programs and operating expenses. Although we intend and will endeavor to conduct our business in compliance with all applicable federal and state laws and regulations, many of these laws and regulations are broadly worded and may be interpreted or applied in ways that cannot be predicted. Therefore, we cannot assure you that our arrangements or business practices will be free from government scrutiny or be found to be in compliance with applicable laws and regulations. If we fail to comply with applicable laws and regulations, we could suffer substantial civil or criminal penalties, including the loss of our licenses to operate our facilities or loss of our ability to participate in the Medicare, Medicaid and other governmental programs.

Additionally, we are subject to a variety of different federal, state and local employment and wage and hour laws. While we strive to comply with those laws, if we fail to do so, we may be subject to lawsuits by governmental authorities or private plaintiffs. In addition, the IRS and/or state taxing authorities may successfully challenge positions taken on our tax returns.

We are also subject to various federal, state and local statutes and ordinances regulating the discharge of materials into the environment. For example, our healthcare operations generate medical waste, such as pharmaceuticals, biological materials and disposable medical instruments that must be disposed of in compliance with federal, state and local environmental laws, rules and regulations. Environmental regulations also may apply when we build new facilities or renovate existing facilities, particularly older facilities. If we fail to comply with environmental regulations, we may be liable for substantial investigation and clean-up costs or we may be subject to lawsuits by governmental authorities or private plaintiffs.

Finally, we send short message service ("***SMS***") text messages to patients. While we obtain consent from these individuals to send text messages, federal or state regulatory authorities or private litigants may claim that the notices and disclosures we provide, form of consents we obtain, or our SMS texting practices are not adequate or violate applicable law. In addition, we must ensure that our SMS texting practices comply with regulations and agency guidance under the Telephone Consumer Protection Act (the "***TCPA***"), a federal statute that protects consumers from unwanted telephone calls, faxes and text messages. While we strive to adhere to strict policies and procedures that comply with the TCPA, the Federal Communications Commission, as the agency that implements and enforces the TCPA, may disagree with our interpretation of the TCPA and impose penalties and other consequences for noncompliance. Determination by a court or regulatory agency that our SMS texting practices violate the TCPA could subject us to civil penalties and could require us to change some portions of our business. Even an unsuccessful challenge by patients or regulatory authorities of our activities could result in adverse publicity and could require a costly response from and defense by us.

We may be subjected to actions brought by the government under anti-fraud and abuse provisions or by individuals on the government's behalf under the False Claims Act's "qui tam" or "whistleblower" provisions.

The False Claims Act prohibits healthcare facilities and providers, as well as other entities or individuals from, among other things, knowingly submitting false claims for payment to the federal government, or knowingly causing the submission of such claims. The "qui tam" or "whistleblower" provisions of the False Claims Act allow private individuals to bring actions under the False Claims Act on behalf of the government. These private parties are generally entitled to share in any amounts recovered by the government, and, as a result, the number of "whistleblower" lawsuits that have been filed against providers has increased significantly in recent years. We are required to provide information to our employees and certain contractors about state and federal false claims laws and whistleblower provisions and protections. Defendants found to be liable under the False Claims Act may be required to pay up to three times the actual damages sustained by the government, plus substantial civil monetary penalties, that are subject to annual inflation adjustments, for each separate false claim.

There are many potential bases for liability under the False Claims Act, including reckless or intentional acts or omissions. The government has used the False Claims Act to prosecute Medicare and other government healthcare program violations such as coding errors, billing for services not provided, submitting false cost reports, falsely certifying meaningful use of certified health information technology, and providing care that is not medically necessary or that is substandard in quality. The Affordable Care Act also (i) created potential False Claims Act liability for failing to report and repay identified overpayments within sixty (60) days of the identification of the overpayment or the date by which a corresponding cost report is due, whichever is later, and (ii) provided that claims submitted in connection with patient referrals that result from violations of the Anti-kickback Statute constitute false claims for the purposes of the False Claims Act. Violations of the Stark law can result in False Claims Act liability, as well. In addition, a number of states have adopted their own false claims and whistleblower provisions whereby a private party may file a civil lawsuit in state court.

Although we intend and will endeavor to conduct our business in compliance with all applicable federal and state laws, many of these laws are broadly worded and may be interpreted or applied in ways that cannot be predicted. Therefore, we cannot assure you that our arrangements or business practices will be free from government scrutiny or be found to be in compliance with applicable fraud and abuse laws.

We will be subject to liabilities because of malpractice and related legal claims brought against our facilities or healthcare providers associated with, or employed by, our facilities or affiliated entities. If we become subject to these claims, we could be required to pay significant damages, which may not be covered by insurance.

We will be subject to medical malpractice lawsuits and other legal actions arising out of the operations of our facilities and the activities of our employed or affiliated providers. As a matter of policy, we typically notify patients of any potential harms they may have suffered at our facilities, regardless of whether such notifications are required by law and notwithstanding our uncertainty as to the severity of such harms or whether they even took place. This may lead to class actions or other multi-plaintiff lawsuits or whistleblower reports. These actions may involve large claims and significant defense costs and, if we or our facilities are found liable, any judgments against us may be material. Furthermore, some states in which we operate do not impose caps on non-economic malpractice damages and, even in the states that have imposed caps on such damages, litigants may seek recoveries under alternative theories of liability that might not be subject to such caps. In an effort to resolve one or more of these matters, we may choose to negotiate a settlement whether or not we believe we are liable. Amounts we pay to settle any of these matters also may be material.

Although we maintain professional and general liability insurance with unrelated commercial insurance carriers, each individual plaintiff's claim is generally subject to an SIR insurance program administered in-house by our risk department with assistance from our insurance brokers. Any successful claim against us that is within our SIR amounts could have an adverse effect on our results of operations or liquidity. Some of these claims could exceed the scope of the excess coverage in effect, or coverage of particular claims could be denied, and any amounts not covered by insurance could be material.

Insurance coverage in the future may not continue to be available at a cost allowing us to maintain adequate levels of insurance with acceptable SIR attachments. One or more of our insurance carriers may become insolvent and unable to fulfill its obligation to pay or reimburse us when that obligation becomes due. In addition, providers using our facilities may be unable to obtain insurance on acceptable terms, which could result in these providers not being able to meet the minimum insurance requirements in the applicable facilities' medical staff bylaws or necessitate a reduction in the level of insurance required to be carried under such bylaws.

As a result of reviews of claims to Medicare and Medicaid for our services, we may experience delayed payments or incur additional costs and may be required to repay amounts already paid to us.

We are subject to regular post-payment inquiries, investigations and audits of the claims we submit to Medicare and Medicaid for payment for our services. These post-payment reviews may increase as a result of government cost-containment initiatives, including enhanced medical necessity reviews for patients admitted as inpatients to general acute care hospitals for certain procedures and audits of claims under the RAC programs to detect overpayments not identified through existing claims review mechanisms. RACs utilize a post-payment targeted review process employing data analysis techniques in order to identify those claims most likely to contain overpayments, such as incorrectly coded services, short stays, incorrect payment amounts, non-covered services and duplicate payments. The claims review strategies used by the RACs generally include a review of high dollar claims, including inpatient hospital claims. As a result, a large majority of the total amounts recovered by RACs has come from hospitals.

In addition, CMS and the states use UPICs to perform post-payment audits of claims and identify Medicare and Medicaid overpayments. Third-party audits or investigations of Medicare or Medicaid claims could result in increases or decreases in operating revenues to be recognized in periods subsequent to when the related services were performed, which may have a material adverse effect on our results of operations.

Controls designed to reduce inpatient services may reduce our revenues.

Over the last several years, payers have instituted policies and procedures to reduce or limit the use of inpatient services. Controls imposed by Medicare, Medicaid, and commercial third-party payers designed to reduce admissions and lengths of stay, commonly referred to as "utilization review," have affected and are expected to continue to affect our facilities. Federal law contains numerous provisions designed to ensure that services rendered by hospitals to Medicare and Medicaid patients meet professionally recognized standards and are medically necessary and that claims for payment are properly filed. These provisions include a requirement that a sampling of admissions of Medicare and Medicaid patients must be reviewed by QIO, which review the appropriateness of Medicare and Medicaid patient admissions and discharges, the quality of care provided, the validity of the MS-DRG classifications and the appropriateness of cases of extraordinary length of stay or cost on a post-discharge basis. QIOs may deny payment for services or assess fines and also have the authority to recommend to HHS that a provider that is in substantial noncompliance with quality standards be excluded from participation in the Medicare program.

Utilization review is also a requirement of most non-governmental managed care organizations and other third-party payers. Inpatient utilization, average lengths of stay and occupancy rates continue to be negatively affected by payer-required preadmission authorization and utilization review and by payer pressure to maximize outpatient and alternative healthcare delivery services for less acutely ill patients. Additionally, in some states in which we operate, commercial third-party payers and Medicaid managed care plans have instituted policies that retroactively limit or deny patient coverage for emergency department and certain other services provided at hospitals if the payers believe the services could have been provided in less expensive settings. For example, such payers are increasingly seeking to pay relatively low "triage fees" for patients seen in emergency departments when the payers retrospectively determine the patients' treatment did not qualify as an emergency service. Significant limits on the scope of services reimbursed or on the amounts paid for such services could have a material adverse effect on our revenues and results of operations.

Certificate of need laws and regulations regarding licenses, ownership and operation may impair our future expansion in some states. In states without certificate of need laws, competing providers of healthcare services are able to expand and construct facilities without the need for significant regulatory approval.

Some states require prior approval for the purchase, construction and expansion of healthcare facilities, based on the state's determination of need for additional or expanded healthcare facilities or services. Certain states in which we operate facilities require a certificate of need for the purchase, construction or expansion of hospital facilities, capital expenditures exceeding a prescribed amount, changes in bed capacity or services, or for other hospital-related activities. We may not be able to obtain certificates of need required for expansion activities or to effectively compete with competing healthcare providers in the future. In addition, all of the states in which we operate facilities require hospitals, other healthcare facilities, and most healthcare providers to maintain one or more licenses. If we fail to obtain any required certificate of need or license, our ability to operate or expand operations in those states could be impaired.

In the states in which we operate that do not require certificates of need for the purchase, construction and expansion of hospital facilities, competing healthcare facilities face lower regulatory barriers to entry and expansion. If competing healthcare entities are able to purchase, construct or expand healthcare facilities without the need for regulatory approval, we may face decreased market share and revenues in those markets.

If we fail to implement and maintain certified electronic health record systems and other health information technology in an effective and timely manner, our operations could be adversely affected.

The federal government has adopted laws and regulations intended to promote the adoption of health information technology, advance the interoperability of medical record systems, and support the access, exchange, and use of electronic health information. For example, under the Medicare Promoting Interoperability Programs (formerly the Medicare EHR Incentive Program), eligible hospitals, critical access hospitals and eligible professionals that do not successfully demonstrate meaningful use of certified electronic health record technologies every year (absent a hardship exception) are subject to a downward payment adjustment under Medicare. In addition, the 21st Century Cures Act and its implementing regulations impose new Medicare conditions of participation on hospitals and critical access hospitals related to the exchange of electronic health information and prohibit information blocking, which includes any practice that is unreasonable and likely to interfere with, prevent, or materially discourage access, exchange, or use of electronic health information, by health care providers and certain other entities, unless required by law or otherwise permitted by an exception in the applicable regulations. Failure to comply with these requirements could subject us to financial penalties or other disincentives or reputational damage. In addition, complying with these and future initiatives related to health care technology and interoperability may require us to change our operations or incur additional costs related to investments in information technology and EHR system software upgrades, and our payers may not adequately reimburse us for these costs and investments.

The industry emphasis on value-based purchasing and bundled payment arrangements may negatively affect our revenues.

There is a trend in the healthcare industry toward value-based purchasing of healthcare services and bundled payment arrangements. Value-based purchasing programs include both public reporting of quality data and payment limitations tied to the incidence of preventable adverse events or the quality and efficiency of care provided by facilities. For example, Medicare, Medicaid and many large commercial payers may require facilities to report certain quality data to receive full payment updates or avoid payment reductions. They may also impose payment reductions in connection with hospital acquired conditions ("***HACs***") and excessive readmissions for certain conditions designated by HHS. Our revenue may be negatively impacted by the application of one or more of these measures. Bundled payment arrangements generally set target payment amounts for all healthcare services provided to patients during particular episodes of care. They are intended to create incentives for physicians, hospitals and other providers to work together to provide higher quality and more coordinated care at a lower cost. We currently participate in a few ACOs as well as a number of bundled payment programs, and we expect value-based purchasing programs, including programs that condition payment on patient outcome measures, to become more common and to involve a higher percentage of payment amounts. We are unable at this time to predict how this trend will affect our results of operations, but it could negatively affect our revenues.

The implementation of participation and quality measurement requirements under the MACRA's Merit-Based Incentive Payment System may affect our revenues.

Under MACRA, CMS updates payment rates for physician and practitioner services on an annual basis, and implements the QPP that rewards value and outcomes through participation in MIPS or an APM program. Beginning in 2017, MIPS started measuring provider performance under four categories: quality, improvement activities, promoting interoperability and cost, and annually establishes a point threshold for each category and overall performance. In 2019, MIPS began rewarding or penalizing providers based on performance reported in CY 2017 and subsequent years. The MIPS adjustment has a more significant impact on payment for physician and practitioner services than the annual inflationary update to the Medicare PFS.

Physicians participate in MIPS unless they are participants of specific forms of APM, are newly enrolled in Medicare, or see a low volume of Medicare patients (i.e., no more than 200 patients in a calendar year, 200 covered professional services, or $90,000 in charges for professional services). Groups or eligible clinicians who choose not to participate and fall within specified circumstances may request an exception through a hardship application and incur no MIPS impact on Medicare payments. CMS permitted hardship applications in 2020 based on circumstances arising from COVID related operational issues. MIPS eligible clinicians or Group Practices were subject to a negative payment adjustment of up to minus 5% in CY 2020, or positive adjustment on a sliding scale (based on CY 2018 performance) and are subject to a negative payment adjustment of up to minus 7% in CY 2021, or positive adjustment on a sliding scale (based on CY 2019 performance) with the payment adjustment increasing each year until it reaches minus 9% in CY 2023 and up to beyond. In addition, MIPS eligible clinicians with exceptional performance may receive up to 10% bonus payment from $500 million that has been specifically allocated for this purpose. For CY 2020 reporting, CMS offered reporting flexibilities, including expanded hardship exceptions, in response to pandemic challenges. For CY 2021 payment adjustments, which are based on CY 2019 reporting, CMS reported that more than 97% of eligible clinicians participated, and projects that in light of the large number of hardship exceptions, negative adjustments were negligible and positive payment adjustments were much lower than expected. However, for the 84% of participating MIPS eligible clinicians whose score was exceptional (above 75 points), an additional positive adjustment of 1.79% will be received. MACRA requires MIPS to be operated in a budget neutral manner, and the number of providers receiving hardship exceptions and neutral treatment reduced the funding from negative adjustments which would have been available for positive adjustment payments. The impact of COVID-19 expanded hardship exceptions in 2020 was reported by CMS to have resulted in 29,136 providers receiving neutral scores in 2020. Providers participating in an APM may be eligible for more advantageous adjustments under MIPS (or avoid any negative adjustment) and receive a 5% bonus. At this time, we have limited participation in APMs.

If an eligible clinician has not been satisfactorily participating in MIPS (and is not qualified to participate in an APM), his or her claims for Medicare Part B services are likely to be subject to negative payment adjustments in CY 2021 (which will be based on CY 2019 performance) and CY 2022 (which will be based on CY 2020 performance). For participating eligible clinicians that meet or exceed the MIPS threshold or APM requirements, claims for payment are likely to be subject to positive adjustments as well as a share of an additional pool of bonus payments. At this time, and as CMS continues to modify MIPS payment policies, it is unclear how MIPS will impact our overall physician payments under the Medicare program. If we have not timely and effectively implemented policies and procedures, quality programs and appropriate clinician contracting to ensure compliance with MACRA and other QPP requirements, we would experience a negative effect on future revenues related to Medicare Part B claims.

MACRA requires that CMS publish each eligible clinician's MIPS score and performance category scores on its Physician Compare website. Publishing of MIPS scores could have an adverse reputational effect on us if our employed physicians have low scores or scores that are lower than those of the other clinicians in the relevant communities.

If current or future laws or regulations force us or cause us to restructure our arrangements with physicians and other providers, we may incur additional costs, lose contracts and suffer a reduction in net revenue under existing contracts, and we may need to refinance our debt or obtain consent from our lenders.

A number of laws bear on our relationships with our physicians and other providers. There is a risk that state authorities in some jurisdictions may find that our contractual relationships with our physicians violate laws prohibiting the corporate practice of medicine and fee-splitting. These laws generally prohibit the practice of medicine by lay entities or persons and are intended to prevent unlicensed persons or entities from interfering with or inappropriately influencing the physician's professional judgment. They may also prevent the sharing of professional services income with non-professional or business interests. In states that have enacted corporate practice of medicine and fee-splitting prohibitions, we believe that we have structured our physician contracts in an effort to remain compliant with such laws. A regulatory agency, however, could still make a determination that our arrangements constitute a corporate practice of medicine or fee splitting violation. A review or action by regulatory authorities or the courts could force us to terminate or modify our contractual relationships with physicians and affiliated medical groups or revise them in a manner that could be materially adverse to our business.

In addition, we have also entered into a number of joint venture arrangements with physicians and other providers (e.g., hospitals and hospital operators) that are subject to state and federal fraud and abuse laws, including the Anti-kickback Statute and False Claims Act. See "—We are subject to increasingly stringent governmental regulations, and we may face allegations that we have failed to comply with such regulations, which could result in criminal and civil sanctions, exclusion from government healthcare programs and even greater scrutiny that may reduce our revenues and profitability." To the extent applicable, regulatory agencies may view these transactions as prohibited arrangements that must be restructured, or discontinued, or for which we could be subject to other significant penalties, including debarment, suspension or exclusion from state and federal government healthcare programs. Although compliance programs can mitigate the risk of investigation and prosecution for violations of these laws, the risks cannot be entirely eliminated. Any action against us for violation of these laws, even if we successfully defend against it, could cause us to incur significant legal expenses and loss of revenue from those joint ventures and divert our management's attention from the operation of our business.

Data Security and Privacy Risks

A cybersecurity attack or security breach could cause a loss of confidential data, give rise to remediation and other expenses, expose us to liability under HIPAA, consumer protection laws, common law or other theories, subject us to litigation and federal and state governmental inquiries, damage our reputation, and otherwise be disruptive to our business.

We rely extensively on our information systems and certain systems operated by us and third-parties to manage clinical, financial and employee data, communicate with our patients, payers, vendors and other third parties and summarize and analyze operating results. These systems are at risk from cybersecurity attacks and other intrusions, including attempts to gain unauthorized access to and theft of our confidential data, misuse, corruption or destruction of confidential data and damage, disruptions or shutdowns of these systems due to viruses, malware, ransomware, employee error or malfeasance, and other electronic security breaches. Our systems, which transmit and store sensitive and confidential data, including personally identifiable information ("***PII***") and other PHI of our patients, employees and others, and our proprietary and confidential business performance and other data, will continue to be a target for attempts to gain unauthorized access and data theft due to the valuable nature of the information they contain, as well as at risk for accidental exposure. In addition, certain third-party medical devices and equipment are used at our facilities, and may be vulnerable to cybersecurity attacks or other breaches which could negatively impact our systems or our patients.

Cybersecurity breaches and other unauthorized access to our data can sometimes be difficult to discern, and any delays in detection may lead to increased harm. Such attacks or breaches are common in the healthcare sector and could result in the compromise of health information or other data subject to protection by HIPAA and other laws and regulations or disrupt our IT systems or business. While we are not aware of having experienced a material cybersecurity breach, there can be no assurance that we will not be subject to material cyber-attacks or security breaches in the future, or that the preventive actions we take to reduce the risk of such incidents and protect our IT and data will be sufficient. We continue to prioritize cybersecurity and the development of practices and controls to protect our systems. However, regardless of the nature, extent and timing of our actions, these measures may not prevent security breaches. If our services are subject to cyber-attacks that impair or deny the ability of patients to access our services, current and potential patients may become unwilling to provide us the information necessary for them to become users of our services or may curtail or stop using our services. As cyber-threats continue to evolve, we may be required to expend significant additional resources to continue to modify or enhance our protective measures and to investigate and remediate any information security vulnerabilities. As we are subjected to cyber-attacks and possible security breaches in the future, this could have an adverse impact on our business, reputation, financial condition and results of operations.

The secure processing, maintenance and transmission of this information is critical to our operations and business strategy. If, in spite of our security and compliance efforts we or any of our business associates were to experience a breach, loss, or other compromise of PHI or PII, such event could disrupt our operations, result in increased data protection costs, damage our reputation, or result in regulatory penalties, legal claims and civil or criminal liability under HIPAA and other state and federal laws, which could have a material adverse effect on our results of operations.

If access to our information systems or those provided by our third-party vendors is interrupted or restricted, or if we are unable to make changes to our information systems, our operations could suffer.

Our business depends heavily on effective information systems to process clinical, operational and financial information. Information systems require an ongoing commitment of significant resources to maintain and enhance existing systems and to develop new systems in order to keep pace with continuing changes in information processing technology. In addition to our own systems, we rely on multiple third-party providers of financial, clinical, supply chain, patient accounting and network information services and, as a result, we face operational challenges in maintaining multiple provider platforms and facilitating the interface of such systems with one another. The third-party providers may not have appropriate controls to protect confidential information. We do not control the information systems of third-party providers, and in some cases we may have difficulty accessing information archived on third-party systems, which could subject us to liability for failure to respond to legal, regulatory or payer obligations or information requests. Our networks and technology systems are also subject to disruption due to events such as a major earthquake, fire, flood, hurricane, telecommunications failure, terrorist attack or other catastrophic event. If these systems fail or are interrupted, if our access to these systems is limited in the future or if providers develop systems more appropriate for more urban healthcare markets and not suited for our facilities, our operations could suffer.

We intend to expand our operations, including by acquiring more facilities, which will require us to integrate and transition certain existing information systems. In addition, as new information systems are developed in the future, we will need to integrate them into our existing systems. Evolving industry and regulatory standards, such as the HITECH Act, HIPAA and EHR meaningful use/promoting interoperability regulations, also may require changes to our information systems in the future. System conversions are costly, time consuming and disruptive for providers, staff and, in some cases, patients. If such conversions occurred on a large scale or if we are unable to properly integrate other information systems or expand or update our current information systems, the costs and disruptions could have a material adverse effect on our revenues or results of operations.

Item 2. ***Properties.***

The table below presents certain information with respect to our hospital campuses as of December 31, 2020:

Facility Name	City	Licensed Beds	Ownership and Real Property Status
Alabama			
Andalusia Regional Hospital	Andalusia	88	Own
North Alabama Medical Center	Florence	263	Own
Shoals Hospital	Muscle Shoals	198	Own
Vaughan Regional Medical Center (a)	Selma	175	JV/Own
Arizona			
Canyon Vista Medical Center	Sierra Vista	100	Lease
Havasu Regional Medical Center (b)	Lake Havasu City	171	JV/Own
Valley View Medical Center	Fort Mohave	84	Own
Arkansas			
National Park Medical Center (c) (d)	Hot Springs	163	JV/Lease
Saline Memorial Hospital (a)	Benton	177	JV/Lease
St. Mary's Regional Medical Center	Russellville	170	Own
Colorado			
Colorado Plains Medical Center	Fort Morgan	50	Lease
Georgia			
St. Francis Hospital (e)	Columbus	376	Own
Idaho			
St. Joseph Regional Medical Center (d)	Lewiston	145	Lease
Indiana			
Clark Memorial Hospital (f)	Jeffersonville	236	JV/Own
Scott Memorial Hospital (f)	Scottsburg	25	JV/Own
Iowa			
Ottumwa Regional Health Center (d)	Ottumwa	217	Lease
Kansas			
Western Plains Medical Complex (d)	Dodge City	99	Lease
Kentucky			
Bluegrass Community Hospital	Versailles	25	Own
Bourbon Community Hospital	Paris	58	Own
Clark Regional Medical Center	Winchester	79	Own
Fleming County Hospital	Flemingsburg	25	Own
Georgetown Community Hospital	Georgetown	75	Own
Jackson Purchase Medical Center	Mayfield	107	Own
Lake Cumberland Regional Hospital	Somerset	295	Own
Logan Memorial Hospital	Russellville	75	Own
Meadowview Regional Medical Center	Maysville	100	Own
Spring View Hospital	Lebanon	75	Own
Michigan			
UP Health System - Bell	Ishpeming	25	Own
UP Health System - Marquette (g)	Marquette	222	JV/Own
UP Health System - Portage (a)	Hancock	96	JV/Own
Mississippi			
Bolivar Medical Center	Cleveland	199	Lease
Montana			
Community Medical Center (a)	Missoula	151	JV/Own
Nevada			
Northeastern Nevada Regional Hospital	Elko	75	Own
New Mexico			
Los Alamos Medical Center	Los Alamos	47	Own
Memorial Medical Center of Las Cruces	Las Cruces	199	Lease

Facility Name	City	Licensed Beds	Ownership and Real Property Status
North Carolina			
Central Carolina Hospital (g)	Sanford	137	JV/Own

(a) This facility is owned and operated by a joint venture between us and an unrelated third-party. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.
(b) This facility is owned and operated by a joint venture with physicians in which a wholly-owned LifePoint affiliate has a controlling interest. The real property on which this facility is located is owned by the LifePoint member and leased to the joint venture.
(c) This facility is owned and operated by a joint venture with physicians in which a wholly-owned LifePoint affiliate has a controlling interest.
(d) This facility is subject to a sale-leaseback arrangement with affiliates of MPT.
(e) This facility is owned and operated by St. Francis Holding Company, LLC ("***SFHC***"), a joint venture between us and Emory. A wholly-owned LifePoint affiliate owns the real property of this facility and leases the real property to SFHC.
(f) This facility is owned and operated by the Regional Health Network of Kentucky and Southern Indiana ("***RHN***"), a joint venture between us and Norton. A wholly-owned LifePoint affiliate owns a controlling interest in RHN.
(g) This facility is owned and operated by Duke LifePoint Healthcare (or a joint venture between affiliates of the members of Duke LifePoint Healthcare). A wholly-owned LifePoint affiliate owns a controlling interest in Duke LifePoint Healthcare and such other joint venture.
(h) This facility is owned and operated by a joint venture between a local not-for-profit entity and Duke LifePoint Healthcare.
(i) This facility is owned and operated by a joint venture among us, physicians and a joint venture between us and University of Washington. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture. On December 23, 2020, certain LifePoint affiliates entered into an agreement with an unrelated third-party to sell LifePoint's majority ownership interest in this facility.
(j) This facility is owned and operated by a joint venture between us and University of Washington. A wholly-owned LifePoint affiliate owns a controlling interest in the joint venture.

We own or lease and operate medical office buildings, clinics and other ancillary properties in conjunction with many of our hospitals. These medical office buildings and clinics are primarily occupied by physicians who practice at our hospitals. Additionally, we lease office space in Brentwood, Tennessee for our HSC. All of our facilities are suitable for their respective uses and are generally adequate for our present needs.

Item 3. ***Legal Proceedings.***

Healthcare facilities are, from time to time, subject to claims and suits arising in the ordinary course of business, including claims for damages for personal injuries, medical malpractice, breach of contracts, wrongful restriction of or interference with physicians' staff privileges and employment related claims. In certain of these actions, plaintiffs request payment for damages, including punitive damages, that may not be covered by insurance.

Except as discussed under "Legal Proceedings and General Liability Claims" in Note 14 to our accompanying consolidated financial statements included elsewhere in this Report, we are currently not a party to any pending proceedings, which, in management's opinion would have a material adverse effect on our business, financial condition or results of operations.

Item 4. ***Mine Safety Disclosures*****.**

Not applicable.

PART II

Item 5. ***Market for Company's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***

All of our equity securities are held by Holdings, whose indirect parent is DSB Parent. As of December 31, 2020, our Sponsor beneficially owned approximately 98.6% of the capital units of LifePoint with the remaining approximate 1.4% owned by our current or former directors, members of management, employees and consultants. Because our equity securities are privately held, there is no established public trading market for our equity securities.

Equity Compensation Plan Information

Refer to Note 13 to our accompanying consolidated financial statements included elsewhere in this Report for a discussion of profits units issued by DSB Parent to our employees and directors.

Recent Sales of Unregistered Securities

There have been no recent sales of unregistered equity securities of the Company within the period covered by this Report.

Item 6. ***Selected Financial Data.***

Not applicable.

Item 7. ***Management's Discussion and Analysis of Financial Condition and Results of Operations.***

The following is management's discussion and analysis of our financial condition and results of operations for the three months and years ended December 31, 2020 and December 31, 2019. We recommend that you read this discussion together with our accompanying consolidated financial statements and related notes included elsewhere in this Report.

Management's discussion and analysis of our financial condition and results of operations as of and for the year ended December 31, 2018 has been omitted as permitted by Instruction 1 to Item 303(a) of Regulation S-K. Refer to "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations—Results of Operations for the Years Ended December 31, 2019 and 2018" in our Annual Report for the year ended December 31, 2019 for management's discussion and analysis of changes in financial condition and results of operations as of and for the year ended December 31, 2018.

Overview

We, acting through our subsidiaries, own and operate community hospitals, regional health systems, physician practices, outpatient centers, and post-acute facilities. As of December 31, 2020, we operated 88 hospital campuses in 29 states throughout the U.S., having a total of 11,512 licensed beds. We generate revenues by providing a broad range of general and specialized healthcare services to patients through a network of hospitals and outpatient facilities.

We seek to fulfill our mission of Making Communities Healthier® by (1) delivering high quality patient care, (2) supporting our physicians, (3) creating excellent workplaces for our employees, (4) taking a leadership role in our communities and (5) ensuring fiscal responsibility. We strive to create places where people choose to come for healthcare, physicians want to practice and employees want to work.

We generated revenues of $2,191.9 million and $2,218.6 million during the three months ended December 31, 2020 and 2019, respectively, and $8,121.9 million and $8,752.8 million for the years ended December 31, 2020 and 2019, respectively. For the years ended December 31, 2020 and 2019, approximately 55.7% and 55.2% of our revenues, respectively, related to patients participating in Medicare and Medicaid programs, collectively. Payments made to our facilities pursuant to the Medicare and Medicaid programs for services rendered rarely exceed our costs for such services. As a result, we rely largely on payments made by private or commercial payers, together with certain limited services provided to Medicare recipients, to generate an operating profit. The healthcare industry continues to endure a period where the costs of providing care are rising faster than reimbursement rates from government or private commercial payers. This places a premium on efficient operation, the ability to reduce or control costs and the need to leverage the benefits of our organization across all of our facilities.

Developments, Trends and Operating Environment

Entry into Agreement to Sell Capital Medical Center

On December 23, 2020, we entered into a definitive agreement with an unrelated third-party to sell our majority ownership interest in Capital Medical Center. We expect the transaction to close during the first half of 2021. We have excluded Capital Medical Center from the classification of "same-hospital" in the forthcoming discussion and analysis of our results of operations for the three months and years ended December 31, 2020 and 2019. For additional information regarding our planned and historical divestitures, refer to Note 3 to our accompanying consolidated financial statements included elsewhere in this Report.

Entry into Services Agreement for Revenue Cycle Management

On October 28, 2020, we announced entry, through our subsidiary, LifePoint Corporate Services, into a services agreement with R1 RCM Inc. ("***R1***"), pursuant to which, commencing January 1, 2021, R1 began to manage revenue cycle operations in our hospitals that currently utilize independent revenue cycle management systems and those supported by our Business Services Center in Johnstown, Pennsylvania.

Impact of COVID-19

During March 2020, the global COVID-19 pandemic began to significantly affect our facilities, employees, patients, communities, business operations and financial performance, as well as the U.S. economy and financial markets, as a whole. Approximately one year into the pandemic, we continue to be deeply committed to protecting the health of our communities and are continuing to respond to the evolving COVID-19 situation across the country. Importantly, we are taking every precaution to ensure we can continue providing quality care and safeguard the health and well-being of patients, employees, providers, volunteers and visitors in each community we serve. The national footprint of our health system, along with our HSC, has enabled us to support our communities during this challenging time.

We established an internal COVID-19 taskforce during the early stages of the pandemic which continues to meet regularly today. Additionally, in November 2020, we established a COVID-19 vaccine team to help facilitate the successful distribution and administration of vaccines across our markets.

Our top priority continues to be ensuring the safety, health and well-being of those in our facilities and communities. We have put in place a number of protocols to protect our patients, providers, employees, volunteers and visitors, including:

- mandatory masking for all providers, employees, volunteers and visitors across our facilities;
- required eye protection for providers and employees during all clinical encounters across our facilities;
- required COVID-19 testing for all admissions in communities with the highest rates of COVID-19 spread;
- performing pre-operative COVID-19 testing for patients undergoing certain elective procedures; and
- social distancing practices and other protective measures throughout our facilities, including visitor restrictions, closing common areas, limiting entry points and screening providers, employees and visitors who enter our facilities based on criteria established by the CDC.

Restrictive measures, such as travel bans, social distancing and quarantine guidelines, significantly reduced the volume of procedures performed at our facilities during 2020, as well as the volume of emergency room and physician office visits unrelated to COVID-19. Furthermore, broad economic factors resulting from the current COVID-19 pandemic, including increasing unemployment rates and reduced consumer spending, could negatively affect our payer mix, increase the relative proportion of lower margin services we provide and reduce patient volumes, as well as diminish our ability to collect outstanding receivables.

Our evaluation of the measures taken across our health system in response to COVID-19 is ongoing and additional updates to our policies, procedures and operations could occur as best practices continue to evolve. Furthermore, our facilities are located across a wide geographic range of communities, which may require us to modify measures we take at specific facilities based on local conditions, including the severity of COVID-19 in the community served by the facility and changes in state and local restrictive measures.

As a result of the adverse impact of the COVID-19 pandemic on our business, we have undertaken several additional measures intended to enhance our financial flexibility, including among other things:

- increasing our liquidity with proceeds from the offering of the 6.75% Secured Notes;
- instituting net working capital optimization initiatives along with the curtailment of non-critical capital expenditures;
- receiving Medicare accelerated payments under the expanded Accelerated and Advance Payment Program (described in more detail below);
- receiving direct grant aid payments from the Emergency Fund established under the CARES Act (described in more detail below); and
- anticipating current year cash tax savings related to various tax provisions of the CARES Act (described in more detail below).

Additionally, although we have received funds that are available to us and our facilities under the CARES Act and related stimulus legislation and may seek additional funds that may become available under existing or future COVID-19 stimulus legislation, we cannot predict the manner in which such funds will be allocated or administered and we cannot assure you that we will be able to access such funds in a timely manner or at all. Most of these programs require healthcare providers to meet certain requirements and/or otherwise agree to certain terms and conditions in order to receive payment. In many cases, only limited guidance has been provided on those requirements and terms and conditions, and we already have seen changes in the substance and interpretation of that guidance.

For additional information about the risks presented by the COVID-19 pandemic, our responses to the pandemic and the resources available to healthcare providers, refer to "Part I, Item 1A. Risk Factors" included in this Report.

Legislative and Regulatory Developments in Response to COVID-19

CARES Act, Other Stimulus Legislation and Regulatory Developments

Numerous recent legislative and regulatory actions have been taken in an attempt to provide businesses, including healthcare providers, with relief from the negative impacts of the COVID-19 pandemic. For additional information about the CARES Act and other stimulus legislation and regulatory development related to the COVID-19 pandemic, refer to "Part I, Item 1. Business—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19" included in this Report.

Direct Grant Aid Payments

With respect to payments being made to providers from the Emergency Fund, beginning April 10, 2020, the Emergency Fund distributed $50 billion to hospitals based on their 2018 net patient revenue. Since that time, the Emergency Fund has distributed an additional $74 billion to a number of different types of healthcare providers, including participants in state Medicaid/CHIP programs, providers in areas particularly impacted by the COVID-19 outbreak, rural providers (including hospitals and rural health clinics), skilled nursing facilities, dentists, providers of services with lower shares of Medicare reimbursement or who predominantly serve Medicaid beneficiaries, and providers requesting reimbursement for the treatment of uninsured patients. In addition, on October 1, 2020, HHS announced that an additional $24.5 billion in relief payments would be made from the Emergency Fund, on an application basis, to certain healthcare providers. HHS has stated that these additional relief payments will be allocated in a way that is intended to achieve an equitable payment of two percent of annual revenue from patient care for all applicants and may also take into account a provider's change in operating revenues from patient care, minus their operating expenses from patient care. For the year ended December 31, 2020, we recognized $646.3 million of direct grant aid payments as other income under the caption "Government stimulus income" in our accompanying consolidated statement of operations included elsewhere in this Report.

For additional information about direct grant aid payments, refer to "Part I, Item 1. Business—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19" included in this Report.

Medicare Accelerated and Advance Payment Program

Using existing authority and certain expanded authority under the CARES Act, HHS had also expanded the CMS Accelerated and Advance Payment Program to a broader group of Medicare Part A and Part B providers. Under the expanded Accelerated and Advance Payment Program, inpatient acute care hospitals could request up to 100% of their Medicare payment amount for a six-month period (critical access hospitals could request up to 125% of their payment amount for such period), and other providers and suppliers could request up to 100% of their Medicare payment amount for a three-month period. Through December 31, 2020, we received a total of $991.0 million of Medicare advance payments under the Accelerated and Advance Payment Program, of which $369.8 million and $621.2 million are included under the captions "Current portion of Medicare advance payments" and "Long-term portion of Medicare advance payments", respectively, in our accompanying consolidated balance sheet at December 31, 2020 included elsewhere in this Report. We do not anticipate receiving any additional funds from the CMS Accelerated and Advance Payment Program.

For additional information about the repayment of these accelerated/advance payments refer to "Part I, Item 1. Business—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19" included in this Report.

CARES Act Tax Provisions

The CARES Act also provides for certain federal income tax changes, including an increase in the interest expense tax deduction limitation, the deferral of the employer portion of Social Security payroll taxes, refundable payroll tax credits, employee retention tax credits, net operating loss carryback periods, alternative minimum tax credit refunds and bonus depreciation of qualified improvement property. The federal income tax changes brought about by the CARES Act are complex and further guidance is expected. For the year ended December 31, 2020, we have deferred cash payments of approximately $84 million related to Social Security payroll tax payments into 2021 and 2022. Additionally, we have generated 2020 cash tax savings of approximately $57 million related to corporate tax law changes which increased the limitation in the tax deductibility of interest expense from 30% to 50% of adjusted taxable income as well as the ability to carry back net operating losses to each of the five tax years preceding the tax year of such loss. However, we may change our provision for income taxes and our deferred income taxes as our understanding of the CARES Act tax provisions evolves due to additional U.S. Department of Treasury guidance. Any such adjustments could materially impact our provision for income taxes and, as a result, our financial results in the relevant periods.

Healthcare Reform Efforts

The Affordable Care Act, which became federal law in 2010, dramatically altered the U.S. healthcare system and was intended to decrease the number of uninsured Americans and reduce the overall cost of healthcare by, among other things, requiring most Americans to obtain health insurance, also referred to as the "individual mandate," providing additional funding for Medicaid in states that choose to expand their programs, reducing Medicare inpatient prospective payment system, Medicare outpatient prospective payment system, and Medicare and Medicaid disproportionate share hospital payments to providers, expanding the Medicare program's use of value-based purchasing programs, tying hospital payments to the satisfaction of certain quality criteria, and instituting certain private health insurance reforms. The Affordable Care Act has, however, been subject to a number of legislative and regulatory changes and court challenges, and its future is uncertain.

The net effect of the Affordable Care Act, as currently adopted, on our business continues to be subject to a number of variables, including the law's complexity, lack of complete implementing regulations and interpretive guidance, and the sporadic implementation of the numerous programs designed to improve access to and the quality of healthcare services. Additionally, the Affordable Care Act has been challenged before the U.S. Supreme Court. We cannot predict the outcome of litigation challenging the constitutionality of the Affordable Care Act or whether the Affordable Care Act will be repealed, replaced or modified. If the Affordable Care Act is found to be unconstitutional, we cannot predict what, if any, the replacement plan or modifications would be, when any such replacement plan or modifications would become effective, or whether any of the existing provisions of the Affordable Care Act would remain in place. We also cannot predict the impact that the new Presidential administration and Congressional leadership will have on the implementation and enforcement of the provisions of the Affordable Care Act, on any current, pending or potential regulations adopted to implement the law, or any future healthcare reform legislation or initiatives, including "Medicare-for-all" or other single-payer proposals.

Refer to "Part I, Item 1. Business—Healthcare Reform" included in this Report for more information about the Affordable Care Act.

Competitive and Structural Environment

The environment in which our facilities operate is extremely competitive. Our hospitals face competition from other acute care hospitals, including larger tertiary hospitals located in larger markets and/or affiliated with universities; specialty hospitals that focus on one or a small number of very lucrative service lines but that are not required to operate emergency departments; freestanding emergency departments and outpatient surgery, diagnostic, cancer care and urgent care centers; and physicians on the medical staffs of our hospitals. In many cases, our competitors focus on the service lines that offer the highest margins. By doing so, our competitors can potentially draw the best-paying business out of our hospitals. This, in turn, can reduce the overall operating profit of our hospitals as we are often obligated to offer service lines that operate at a loss or that have much lower profit margins. We continue to see the shift of increasingly complex procedures from the inpatient to the outpatient setting and have also seen growth in the general shift of lower acuity procedures to physician offices and other non-hospital outpatient settings. These trends have contributed to decreases in admissions and surgical volumes and have, to some extent, offset our efforts to improve equivalent admission rates at many of our hospitals.

Our hospitals also face extreme competition in their efforts to recruit and retain physicians on their medical staffs. It is widely recognized that the U.S. has a shortage of physicians in certain practice areas, including primary care physicians and specialists such as cardiologists, oncologists, urologists and orthopedists, in various areas of the country. This fact, and our ability to overcome these shortages, is directly relevant to our growth strategies because cardiologists, oncologists, urologists and orthopedists are often the physicians in highest demand in communities where our hospitals are located. Larger tertiary medical centers are acquiring physician practices and employing physicians in some of our communities. While physicians in these practices may continue to be members of the medical staffs of our hospitals, they may be less likely to refer patients to our hospitals over time.

We believe other key factors in our competition for patients is the quality of our patient care and the perception of that quality in the communities where our facilities are located, which may be influenced by, among other things, the technology, service lines and capital improvements made at our facilities and by the skills and experience of our non-physician employees involved in patient care.

In addition to competitive concerns, many of our communities are experiencing slow growth, and in some cases, population losses. We believe this trend has occurred mainly as a result of recent challenging economic conditions because the economies in the non-urban communities in which our facilities primarily operate are often dependent on a small number of larger employers, especially manufacturing or other facilities. This causes the economies of our communities to be more sensitive to economic downturns and slower to rebound when the overall U.S. economy improves. In addition, other economic factors, including, potentially, self-rationing of healthcare services, have made it more difficult to increase the number of patients who seek care at many of our facilities.

Regulatory Environment

Our business and our facilities are highly regulated, and the penalties for noncompliance can be severe. We are required to comply with extensive, complicated and overlapping government laws and regulations at the federal, state and local levels. These laws and regulations govern every aspect of how our hospitals conduct their operations, from what service lines must be offered in order to be licensed as an acute care hospital, to whether our hospitals may employ physicians, and to how (and whether) our hospitals may receive payments pursuant to the Medicare and Medicaid programs. The failure to comply with these laws and regulations can result in severe penalties including criminal penalties, civil sanctions, and the loss of our ability to receive reimbursements through the Medicare and Medicaid programs or the refund of such payments we previously received.

Not only are our facilities heavily regulated, but the rules, regulations and laws to which they are subject often change, with little or no notice, and are often interpreted and applied differently by various regulatory agencies with authority to enforce such requirements. Each change or conflicting interpretation may require our facilities to make changes in space usage, equipment, personnel or services, and may also require that standard operating policies and procedures be re-written and re-implemented. The cost of complying with such laws and regulations is a significant component of our overall expenses. Further, this expense has grown in recent periods because of new regulatory requirements and the severity of the penalties associated with non-compliance. Management anticipates that compliance expenses will continue to grow in the foreseeable future. The healthcare industry has seen a number of ongoing investigations related to patient referrals, physician recruiting and employment practices, cost reporting and billing practices, medical necessity of inpatient admissions, physician office leasing, laboratory and home healthcare services, physician ownership of hospitals and other healthcare providers, and joint ventures involving hospitals and physicians. Hospitals continue to be one of the primary focal areas of the OIG, the DOJ and other governmental fraud and abuse programs.

The Affordable Care Act imposed an affirmative obligation on healthcare providers to report and refund any overpayments received. “Overpayments” in this context include any amount received from a government program by a provider to which it is not entitled, regardless of the cause. Such overpayments are deemed to be fraudulent and become violations of the False Claims Act if not reported and refunded within the later of 60 days of identification or the date any corresponding cost report is due (if applicable). Hospitals can meet the obligation to report and refund in three ways: (1) refunding overpayments directly to the program; (2) self-disclosing the overpayment to the OIG via its voluntary self-disclosure protocol (with respect to False Claims Act and other violations not related to the Stark law); and (3) self-disclosing to CMS via the self-referral disclosure protocol (with respect to overpayments caused by potential violations of the Stark law only) for which CMS has the authority to reduce the amounts otherwise owed.

In light of the provisions of the Affordable Care Act relating to reporting and refunding overpayments and the robust funding for enforcement activities and audits, an increasing number of healthcare providers have self-reported potential violations of law and refunded overpayments to avoid incurring fines and penalties. It is likely such refunds and voluntary disclosures will continue in the future, and we will make such refunds and disclosures in accordance with the law.

Revenue Sources

Our facilities generate revenues by providing healthcare services to our patients. Depending upon the patient's medical insurance coverage, we are paid for these services by governmental Medicare and Medicaid programs, commercial insurance, including managed care organizations, and directly by the patient. The amounts we are paid for providing healthcare services to our patients vary depending upon the payer. Governmental payers generally pay significantly less than the hospital's customary charges for the services provided. Insured patients are generally not responsible for any difference between customary hospital charges and the amounts received from commercial insurance payers. However, insured patients are responsible for payments not covered by insurance, such as exclusions, deductibles and co-payments.

Medicare and Medicaid Reimbursement

Revenues from governmental payers, such as Medicare and Medicaid, are controlled by complex rules and regulations that stipulate the amount a hospital is paid for providing healthcare services. We must comply with these rules and regulations to continue to be eligible to participate in the Medicare and Medicaid programs. These rules and regulations are subject to frequent changes as a result of legislative and administrative action and annual payment adjustments on both the federal and the state levels. In addition, Medicare payment methodologies have been, and are expected to continue to be, revised significantly based on cost containment and policy considerations.

For more information about Medicare and Medicaid reimbursement matters, refer to "Part I, Item 1. Business—Sources of Revenue" included in this Report.

Physician & Non-Physician Practitioner Services

We employ an increasing number of physicians and non-physician practitioners, such as physician assistants and nurse practitioners, in our hospital markets. Medicare pays us for services provided by our employed physicians and non-physician practitioners under the PFS system. MACRA, which was adopted in 2015, significantly changed how CMS determines the annual updates to the PFS. Under MACRA, the PFS payment rates that were in effect when MACRA was enacted were extended through June 30, 2015, and then increased by 0.5% for the remainder of CY 2015. PFS payment rates were increased annually by an additional 0.5% for CYs 2016, 2017 and 2018 and, after the adoption of the Bipartisan Budget Act of 2018, were increased by 0.25% for CY 2019. PFS payment rates are scheduled to remain at their CY 2019 levels through CY 2025. In addition, MACRA also established the QPP for incentivizing physician and practitioner care that meets certain value, quality, cost, and performance criteria, and, beginning in CY 2019, amounts paid to physicians and practitioners under the PFS are subject to adjustment through the QPP and participation in either MIPS or an APM. For more information, refer to "Part I, Item 1. Business—Sources of Revenue—Medicare Physician Fee Schedule" included in this Report.

HMOs, PPOs and Other Private Insurers

In addition to government programs, our facilities are reimbursed by differing types of private payers, including HMOs, PPOs and other private insurers. Revenues from HMOs, PPOs and other private insurers are subject to contracts and other arrangements that require us to discount the amounts we customarily charge for healthcare services or accept fixed, pre-determined fees for our services. These contractual discounted arrangements often limit our ability to increase charges or revenues in response to increasing costs. We actively negotiate with these payers in an effort to maintain or increase the pricing of our healthcare services; however, we have no control over patients switching their healthcare coverage to a payer with which we have negotiated less favorable reimbursement rates. In recent years, an increasing number of our patients have moved to lower-cost healthcare coverage plans, and such plans generally provide lower reimbursement rates and require patients to pay an increased portion of the costs of care through deductibles, co-payments or exclusions. Additionally, plans purchased through the Exchanges are increasingly using narrow and tiered networks that limit beneficiary provider choices. If we provide services when we are not a participating provider in the network, it can result in higher patient responsibility amounts that a patient may not have the ability to pay or may choose not to pay. We expect these trends to continue in the coming years.

Self-pay Patients

Self-pay revenues are primarily generated through the treatment of uninsured patients. Beginning in 2014, our self-pay revenues began to decrease as a percentage of overall revenues due largely to a shift from self-pay to Medicaid and HMOs, PPOs and other private insurers for a portion of our patient population, which primarily has been a result of the Affordable Care Act and the expansion of Medicaid coverage in certain of the states in which we operate. These reductions partially offset trends our facilities have experienced in prior years, which included increases in self-pay revenues due to a combination of broad economic factors, including high levels of unemployment in many of our markets and increasing numbers of individuals and employers who purchase insurance plans with high deductibles and high co-payments. We cannot predict how administrative or judicial interpretations, legislative actions or any other modifications to the Affordable Care Act that may be implemented or adopted, such as the cessation of cost sharing reduction payments or the repeal of the individual mandate, may impact our self-pay revenues.

Surprise Medical Billing

On December 21, 2020, Congress adopted legislation that is intended to limit the "surprise" medical bills that are often received by individuals receiving emergency and certain other services (such as anesthesia services) from out-of-network providers. Effective as of January 1, 2022, the No Surprises Act prohibits out-of-network providers from balance billing patients for (i) emergency care services that are provided by out-of-network facilities or at in-network facilities by out-of-network providers and (ii) transportation and related services that are provided by out-of-network air ambulance providers. The No Surprises Act also generally prohibits out-of-network providers from billing patients for non-emergency medical treatment unless the provider first notifies the patient of the provider's network status and estimated charges and the patient agrees to be financially liable for the additional amounts. Violations of the No Surprises Act are punishable by civil monetary penalties of up to $10,000, and the No Surprises Act may be enforced by both the state and federal governments.

We cannot predict how the No Surprises Act will be implemented by HHS or how it will ultimately be enforced by the federal and various state governments. We also cannot predict the amounts that will be received by our facilities and our employed providers for out-of-network services, whether the No Surprises Act will impact the in-network payment rates that are offered by third-party payers and the willingness of those payers to enter into participation agreements with us and our facilities in the future, or the costs we will incur in complying with the requirements of the No Surprises Act. In addition, a number of states are considering or have already adopted legislation to eliminate surprise medical billing. We cannot predict how state legislative actions to modify or pass these proposals may be implemented or adopted, or what impact, if any, those actions may have on our operations and revenues.

Price Transparency

Transparency in healthcare pricing has become a focal point for CMS, Congress, and many state legislatures. For example, effective as of January 1, 2021, hospitals generally are required to post their standard charges prominently on a publicly available website. CMS has stated that it intends to audit and monitor hospital compliance with its reporting requirements and to take actions to address hospital noncompliance, including issuing a warning notice, requesting a corrective action plan, and imposing civil monetary penalties. In addition to the CMS hospital price transparency regulations, HHS and the Departments of the Treasury and Labor have issued regulations that require most private health plans, including group health plans and individual health insurance market plans, to disclose pricing and cost-sharing information to their beneficiaries. A number of states have also adopted their own healthcare price transparency and/or disclosure statutes.

In addition to addressing surprise billing, the No Surprises Act also contains a number of provisions that are intended to promote provider and health plan price transparency. Among other things, effective as of January 1, 2022, under the No Surprises Act, healthcare providers will be required to provide "good faith estimates" of their total expected charges for scheduled items and services to the patient's health plan if the patient is insured prior to the item and/or service being provided. Health plans will be required to provide patients with an "advanced explanation of benefits" that includes (1) information regarding the network status of the provider, (2) a copy of the provider's "good faith estimate," (3) an estimate of the amount that the patient will be expected to pay for the item or service, and (4) information on any applicable pre-authorization requirements. The Secretary of HHS is required to adopt regulations to implement the price transparency provisions of the No Surprises Act.

Although we continue to evaluate, and are taking proactive steps in response to, the legislative and regulatory developments regarding price transparency, we cannot predict how existing regulations will be implemented or interpreted or whether any other requirements will be imposed on providers and health plans. We also cannot predict what affect the public disclosure of hospitals' or insurance providers' negotiated rates will have on our future negotiations with payers or the effect that the disclosure of pricing information by healthcare providers and health plans will have on our patient volumes and revenues.

Results of Operations

Certain Definitions

The following definitions apply throughout the remaining portion of Management's Discussion and Analysis of Financial Condition and Results of Operations:

Adjusted EBITDA. EBITDA adjusted to exclude unusual items and other adjustments required or permitted in calculating debt covenant compliance under the Indentures governing the Notes and/or the Credit Agreements. We believe that this inclusion of supplementary adjustments to EBITDA applied in presenting Adjusted EBITDA are appropriate to provide additional information to investors about the impact of certain non-cash items, unusual items that we do not expect to continue or at the same level in the future and other items.

Admissions. The total number of patients admitted to our hospitals. Used by management and investors as a general measure of inpatient volume.

Case mix index. Refers to the acuity or severity of illness of an average patient at our hospitals.

Consolidated. Consolidated information includes the results of all hospital operations and corporate overhead costs, including the results of our recent acquisitions and divestitures.

EBITDA. Earnings before interest, taxes, depreciation and amortization.

Equivalent admissions. Management and investors use equivalent admissions as a general measure of combined inpatient and outpatient volume. We compute equivalent admissions by multiplying admissions (inpatient volume) by the Outpatient factor. The equivalent admissions computation "equates" outpatient revenue to the volume measure (admissions) used to measure inpatient volume resulting in a general measure of combined inpatient and outpatient volume.

Outpatient factor. The sum of gross inpatient revenue and gross outpatient revenue divided by gross inpatient revenue.

Same-hospital. Same-hospital information includes the results of the same 87 hospital campuses operated during both the three and twelve months ended December 31, 2020 and 2019. Same-hospital information excludes the results of our previously divested hospitals, as well as Capital Medical Center, which is classified as held-for-sale as of December 31, 2020.

For the Three Months Ended December 31, 2020 and 2019

Summary

The following table summarizes our results of operations for the three months ended December 31, 2020 and 2019 (dollars in millions):

	Three Months Ended December 31,			
	2020		2019 [(a)]	
	Amount	% of Revenues	Amount	% of Revenues
Revenues	$ 2,191.9	100.0 %	$ 2,218.6	100.0 %
Salaries and benefits	1,018.0	46.4	1,023.4	46.1

Net income (loss)	217.3	9.9	(76.5)	(3.4)
Less: Net income attributable to noncontrolling interests and redeemable noncontrolling interests	(8.3)	(0.4)	(3.7)	(0.2)
Net income (loss) attributable to LifePoint Health, Inc.	$ 209.0	9.5 %	$ (80.2)	(3.6) %

(a) Our results of operations for the three months ended December 31, 2019 have been restated in accordance with the adoption of Accounting Standards Update ("***ASU***") 2016-02, "Leases" ("***ASU 2016-02***"). For additional information regarding the impact of the adoption of ASU 2016-02, refer to Note 8 to our accompanying consolidated financial statements included elsewhere in this Report.

Revenues

The following table summarizes our key revenue metrics for the three months ended December 31, 2020 and 2019:

	Three Months Ended December 31,		Increase	% Increase
	2020	2019	(Decrease)	(Decrease)
Consolidated:				
Number of hospital campuses at end of period	88	88	-	- %
Revenues (in millions)	$ 2,191.9	$ 2,218.6	$ (26.7)	(1.2)%
Admissions	75,895	83,129	(7,234)	(8.7)%
Equivalent admissions	184,740	219,228	(34,488)	(15.7)%
Revenues per equivalent admission	$ 11,864	$ 10,120	$ 1,744	17.2 %
Case mix index	1.51	1.38	0.13	9.4 %
Inpatient surgeries	19,448	22,550	(3,102)	(13.8)%
Outpatient surgeries	75,763	86,271	(10,508)	(12.2)%
Total surgeries	95,211	108,821	(13,610)	(12.5)%
Emergency department visits	382,249	481,491	(99,242)	(20.6)%
Same-hospital:				
Number of hospital campuses at end of period	87	87	-	- %
Revenues (in millions)	$ 2,170.4	$ 2,185.8	$ (15.4)	(0.7)%
Admissions	75,192	81,912	(6,720)	(8.2)%

Revenues per equivalent admission	$ 11,884	$ 10,085	$ 1,799	17.8 %
Case mix index	1.51	1.38	0.13	9.4 %
Inpatient surgeries	19,280	21,975	(2,695)	(12.3)%
Outpatient surgeries	75,356	85,453	(10,097)	(11.8)%
Total surgeries	94,636	107,428	(12,792)	(11.9)%
Emergency department visits	378,700	476,408	(97,708)	(20.5)%

For the three months ended December 31, 2020, our consolidated revenues decreased $26.7 million, or 1.2%, to $2,191.9 million compared to $2,218.6 million for the same period last year. The decrease in our revenues was a direct result of declines in patient volumes across the majority of our markets and service lines, which we believe is related to the deferral of non-urgent and elective procedures in connection with the COVID-19 pandemic and the response of federal, state, and local governments to the pandemic. This decrease was partially offset by an increase in the overall acuity of services provided and improvements in both commercial and government pricing during the three months ended December 31, 2020 compared to the same period last year.

Our revenues by payer and approximate percentages of revenues on a consolidated basis were as follows for the three months ended December 31, 2020 and 2019 (dollars in millions):

	Three Months Ended December 31,			
	2020		2019	
	Amount	% of Revenues	Amount	% of Revenues
Medicare	$ 867.9	39.6 %	$ 844.2	38.1 %
Medicaid	358.5	16.4	374.2	16.9
HMOs, PPOs and other private insurers	908.5	41.4	944.1	42.6
Self-pay	13.7	0.6	14.2	0.6
Other	39.4	1.8	37.5	1.6
Revenue from contracts with customers	2,188.0	99.8	2,214.2	99.8
Rental income	3.9	0.2	4.4	0.2
Revenues	$ 2,191.9	100.0 %	$ 2,218.6	100.0 %

Salaries and Benefits

For the three months ended December 31, 2020, our consolidated salaries and benefits expense was $1,018.0 million, or 46.4% of revenues, compared to $1,023.4 million, or 46.1% of revenues, for the same period last year. The increase in our salaries and benefits expense as a percentage of revenues for the three months ended December 31, 2020 compared to the same period last year was primarily a result of the decrease in revenue associated with the COVID-19 pandemic.

Supplies

For the three months ended December 31, 2020, our consolidated supplies expense was $399.7 million, or 18.2% of revenues, compared to $374.1 million, or 16.9% of revenues, for the same period last year. The increase in our supplies expense was partially attributable to an increase in the overall level of acuity of services provided during the three months ended December 31, 2020 compared to the same period last year, in addition to higher costs and an increase in the utilization of supplies related to pharmaceuticals, laboratory supplies and personal protective equipment, primarily associated with the COVID-19 pandemic.

Other Operating Expenses, Net

Other operating expenses include, among other things, contract services, professional fees, rents and leases, repairs and maintenance, utilities, insurance, non-income taxes, other income and other expenses. For the three months ended December 31, 2020, our consolidated other operating expenses were $574.5 million, or 26.3% of revenues, compared to $545.1 million, or 24.6% of revenues, for the same period last year. The increase in our other operating expenses as a percentage of revenues for the three months ended December 31, 2020 compared to the same period last year was primarily related to increases in physician subsidies and an increase in the utilization of outsourced contracted services for laboratory testing associated with the COVID-19 pandemic.

Government Stimulus Income

As a result of the adverse impact of the COVID-19 pandemic on our business, we received direct grant aid payments from the Emergency Fund established under the CARES Act. For the three months ended December 31, 2020, we recognized $232.2 million of direct grant aid payments as other income. For a further discussion of the CARES Act and related financial impact, refer to "Part I, Item 1. Business—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19" and Note 2 to our accompanying consolidated financial statements included elsewhere in this Report.

Depreciation and Amortization

For the three months ended December 31, 2020, our consolidated depreciation and amortization expense was $90.7 million, or 4.1% of revenues, compared to $100.9 million, or 4.5% of revenues, for the same period last year. Our depreciation expense was higher during the three months ended December 31, 2019 due to the impact of the finalization of certain significant construction projects which resulted in additional depreciation expense.

Interest Expense, Net

For the three months ended December 31, 2020, our consolidated interest expense was $119.5 million, or 5.5% of revenues, compared to $132.5 million, or 6.0% of revenues, for the same period last year. The decrease in our interest expense was primarily attributable to the various debt financing activities completed during 2020, which resulted in a lower weighted average borrowing rate for the three months ended December 31, 2020 compared to the same period last year. Additionally, we recognized non-cash changes in the estimated fair value of our Interest Rate Swap through interest expense during the three months ended December 31, 2020 and 2019. For a further discussion of our debt and corresponding interest expense, refer to Notes 4 and 11 to our accompanying consolidated financial statements included elsewhere in this Report.

Debt Transaction Costs

For the three months ended December 31, 2020, we recognized $13.4 million of debt transaction costs associated with the offering of the 5.375% Unsecured Notes and the $500.0 million prepayment of the Term Loan Facility. For a further discussion of our debt transactions, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Merger, Integration and Other Transaction-Related Costs

For the three months ended December 31, 2019, we recognized merger, integration and other transaction-related costs of $39.1 million, primarily related to expenses associated with our sale-leaseback transaction with Medical Properties Trust, which became effective December 17, 2019 (the "***2019 Sale Leaseback Transaction***") and other integration-related expenses in connection with the LifePoint/RCCH Merger.

Other Non-Operating Losses, Net

For the three months ended December 31, 2020 and 2019, we recognized net other non-operating losses of $6.3 million and $1.8 million, respectively, primarily related to non-cash changes in the estimated fair value of certain contingent liabilities and miscellaneous disposals of property and equipment.

Income Taxes

For the three months ended December 31, 2020, we recognized a benefit from income taxes of $15.3 million, primarily related to differences in the current tax liabilities between the 2019 filed tax returns and amounts recorded in the 2019 tax provision that resulted from the significant revisions to the U.S. corporate tax laws due to the enactment of the CARES Act. For the three months ended December 31, 2019, we recognized a provision for income taxes of $74.9 million, primarily related to a gain, recognized for tax purposes only, resulting from the 2019 Sale Leaseback Transaction. For a further discussion of our income taxes, refer to Note 6 to our accompanying consolidated financial statements included elsewhere in this Report.

For the Years Ended December 31, 2020 and 2019

Summary

The following table summarizes our results of operations for the years ended December 31, 2020 and 2019 (dollars in millions):

	Years Ended December 31,			
	2020		2019 [a]	
	Amount	% of Revenues	Amount	% of Revenues
Revenues	$ 8,121.9	100.0 %	$ 8,752.8	100.0 %

Other non-operating losses, net	4.0	-	5.5	0.1
	7,880.9	97.0	8,696.8	99.4
Income (loss) before income taxes	241.0	3.0	56.0	0.6
(Benefit from) provision for income taxes	(63.7)	(0.8)	77.9	0.9
Net income (loss)	304.7	3.8	(21.9)	(0.3)
Less: Net income attributable to noncontrolling interests and redeemable noncontrolling interests	(21.5)	(0.3)	(19.3)	(0.2)
Net income (loss) attributable to LifePoint Health, Inc.	$ 283.2	3.5 %	$ (41.2)	(0.5) %

(a) Our results of operations for the year ended December 31, 2019 have been restated in accordance with the adoption of ASU 2016-02. For additional information regarding the impact of the adoption of ASU 2016-02, refer to Note 8 to our accompanying consolidated financial statements included elsewhere in this Report.

Revenues

The following table summarizes our key revenue metrics on a consolidated basis for the years ended December 31, 2020 and 2019:

	Years Ended December 31,		Increase	% Increase
	2020	2019	(Decrease)	(Decrease)
Consolidated:				
Number of hospital campuses at end of period	88	88	-	- %
Revenues (in millions)	$ 8,121.9	$ 8,752.8	$ (630.9)	(7.2)%
Admissions	299,254	339,571	(40,317)	(11.9)%
Equivalent admissions	744,917	888,331	(143,414)	(16.1)%
Revenues per equivalent admission	$ 10,903	$ 9,853	$ 1,050	10.7 %
Case mix index	1.45	1.37	0.08	5.8 %
Inpatient surgeries	79,612	92,908	(13,296)	(14.3)%
Outpatient surgeries	277,777	344,919	(67,142)	(19.5)%
Total surgeries	357,389	437,827	(80,438)	(18.4)%
Emergency department visits	1,570,558	1,961,459	(390,901)	(19.9)%
Same-hospital:				
Number of hospital campuses at end of period	87	87	-	- %
Revenues (in millions)	$ 8,025.4	$ 8,589.5	$ (564.1)	(6.6)%
Admissions	295,790	333,106	(37,316)	(11.2)%
Equivalent admissions	735,833	874,480	(138,647)	(15.9)%
Revenues per equivalent admission	$ 10,907	$ 9,822	$ 1,085	11.0 %
Case mix index	1.45	1.37	0.08	5.8 %
Inpatient surgeries	78,335	90,262	(11,927)	(13.2)%
Outpatient surgeries	275,522	340,602	(65,080)	(19.1)%
Total surgeries	353,857	430,864	(77,007)	(17.9)%
Emergency department visits	1,555,257	1,920,176	(364,919)	(19.0)%

For the year ended December 31, 2020, our consolidated revenues decreased $630.9 million, or 7.2%, to $8,121.9 million compared to $8,752.8 million for the prior year. The decrease in our revenues was a direct result of declines in patient volumes across the majority of our markets and service lines, which we believe is related to the deferral of non-urgent and elective procedures in connection with the COVID-19 pandemic and the response of federal, state, and local governments to the pandemic. This decrease was partially offset by an increase in the overall acuity of services provided and improvements in both commercial and government pricing during the year ended December 31, 2020 compared to the prior year.

Our revenues by payer and approximate percentages of revenues on a consolidated basis were as follows for the years ended December 31, 2020 and 2019 (dollars in millions):

	Years Ended December 31,			
	2020		2019	
	Amount	% of Revenues	Amount	% of Revenues
Medicare	$ 3,134.0	38.6 %	$ 3,338.1	38.1 %
Medicaid	1,392.4	17.1	1,495.3	17.1
HMOs, PPOs and other private insurers	3,381.9	41.6	3,698.6	42.3
Self-pay	54.5	0.7	59.2	0.7
Other	142.7	1.8	143.6	1.6
Revenue from contracts with customers	8,105.5	99.8	8,734.8	99.8
Rental income	16.4	0.2	18.0	0.2
Revenues	$ 8,121.9	100.0 %	$ 8,752.8	100.0 %

Salaries and Benefits

For the year ended December 31, 2020, our consolidated salaries and benefits expense was $3,877.5 million, or 47.7% of revenues, compared to $4,044.0 million, or 46.2% of revenues, for the prior year. The increase in our salaries and benefits expense as a percentage of revenues for the year ended December 31, 2020 compared to the prior year was primarily a result of the decrease in revenues associated with the COVID-19 pandemic.

Supplies

For the year ended December 31, 2020, our consolidated supplies expense was $1,417.6 million, or 17.5% of revenues, compared to $1,471.7 million, or 16.8% of revenues, for the prior year. The increase in our supplies expense was partially attributable to an increase in the overall level of acuity of services provided during the year ended December 31, 2020 compared to the same period last year, in addition to higher costs and an increase in the utilization of supplies related to pharmaceuticals, laboratory supplies and personal protective equipment, primarily associated with the COVID-19 pandemic.

Other Operating Expenses, Net

Other operating expenses include, among other things, contract services, professional fees, rents and leases, repairs and maintenance, utilities, insurance, non-income taxes, other income and other expenses. For the year ended December 31, 2020, our consolidated other operating expenses were $2,207.2 million, or 27.3% of revenues, compared to $2,150.3 million, or 24.6% of revenues, for the prior year. The increase in our other operating expenses was primarily related to increases in physician subsidies and an increase in the utilization of outsourced contracted services for laboratory testing associated with the COVID-19 pandemic.

Government Stimulus Income

As a result of the adverse impact of the COVID-19 pandemic on our business, we received direct grant aid payments from the Emergency Fund established under the CARES Act. For the year ended December 31, 2020, we recognized $646.3 million of direct grant aid payments as other income. For a further discussion of the CARES Act and related financial impact, refer to “Part I, Item 1. Business—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19” and Note 2 to our accompanying consolidated financial statements included elsewhere in this Report.

Depreciation and Amortization

For the year ended December 31, 2020, our consolidated depreciation and amortization expense was $377.4 million, or 4.6% of revenues, which was comparable to $376.5 million, or 4.3% of revenues, for the prior year.

Interest Expense, Net

For the year ended December 31, 2020, our consolidated interest expense was $528.1 million, or 6.5% of revenues, compared to $568.6 million, or 6.5% of revenues, for the prior year. The decrease in our interest expense was primarily attributable to the various debt financing activities completed during 2020, which resulted in a lower weighted average borrowing rate for the year ended December 31, 2020 compared to last year. Additionally, we recognized non-cash changes in the estimated fair value of our Interest Rate Swap through interest expense during the year ended December 31, 2020 and 2019. For a further discussion of our debt and corresponding interest expense, refer to Notes 4 and 11 to our accompanying consolidated financial statements included elsewhere in this Report.

Debt Transaction Costs

For the year ended December 31, 2020, we recognized $115.4 million of debt transaction costs associated with the various debt financing activities completed during 2020. For a further discussion of our debt transactions, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Merger, Acquisition and Other Transaction-Related Costs

For the year ended December 31, 2019, we recognized costs of $76.9 million, primarily related to employee severance and retention costs and other integration-related expenses in connection with the LifePoint/RCCH Merger, as well as costs related to the 2019 Sale Leaseback Transaction.

Impairments of Goodwill and Long-lived Assets

For the year ended December 31, 2019, we recognized a goodwill impairment charge of $3.3 million related to one of our facilities. For a further discussion of impairments of goodwill and other long-lived assets, refer to Notes 1 and 5 to our accompanying consolidated financial statements included elsewhere in this Report.

Other Non-Operating Losses, Net

For the years ended December 31, 2020 and 2019, we recognized net other non-operating losses of $4.0 million and $5.5 million, respectively, primarily related to non-cash changes in the estimated fair value of certain contingent liabilities and miscellaneous disposals of property and equipment.

Income Taxes

For the year ended December 31, 2020, we recognized a benefit from income taxes of $63.7 million, primarily as a result of significant revisions to the U.S. corporate tax laws due to the enactment of the CARES Act. We were most notably impacted by an increase in the limitation in the tax deductibility of interest expense from 30% to 50% of adjusted taxable income for the years ended December 31, 2020 and 2019, as well as the ability to carry back net operating losses to each of the five tax years preceding the tax year of such loss. For the year ended December 31, 2019, we recorded a provision for income taxes of $77.9 million, primarily related to a gain recognized for tax purposes only resulting from the 2019 Sale Leaseback Transaction. For a further discussion of our income taxes, refer to Note 6 to our accompanying consolidated financial statements included elsewhere in this Report.

Non-GAAP Measures

Adjusted EBITDA

Included in net income for the three months and year ended December 31, 2020 is $232.2 million and $646.3 million, respectively, of CARES Act direct grant aid payments recognized as other income.

The following table presents a reconciliation of net income (loss) to EBITDA and Adjusted EBITDA on a consolidated basis for the three months and years ended December 31, 2020 and December 31, 2019 (in millions):

	Three Months Ended December 31,		Years Ended December 31,	
	2020	**2019 [a]**	**2020**	**2019 [a]**
Net income (loss)	$ 217.3	$ (76.5)	$ 304.7	$ (21.9)
Interest expense, net	119.5	132.5	528.1	568.6
Income taxes	(15.3)	74.9	(63.7)	77.9
Depreciation and amortization	90.7	100.9	377.4	376.5
EBITDA	412.2	231.8	1,146.5	1,001.1
(1) Debt transaction costs	13.4	-	115.4	-
(2) Merger, integration and other transaction-related costs	-	39.1	-	76.9
(3) Facility lease expense	(19.9)	(9.5)	(79.8)	(31.8)
(4) One-time costs, non-cash charges and non-recurring items	22.1	17.6	74.7	62.9
Subtotal	427.8	279.0	1,256.8	1,109.1
(5) Pro forma run rate adjustments	19.4	(6.4)	76.3	(4.5)
Adjusted EBITDA	$ 447.2	$ 272.6	$ 1,333.1	$ 1,104.6

(a) Our results of operations for the three months and year ended December 31, 2019 have been restated in accordance with the adoption of ASU 2016-02. The adoption of ASU 2016-02 had no impact on Adjusted EBITDA. For additional information regarding the impact of the adoption of ASU 2016-02, refer to Note 8 to our accompanying consolidated financial statements included elsewhere in this Report.

* *Footnote references regarding EBITDA adjustments are included on the following page.*

(1) Represents costs associated with the various debt financing activities completed during 2020, including payments of early termination premiums and write-offs of previously capitalized debt issuance costs.

(2) Represents costs associated with the LifePoint/RCCH Merger, the 2019 Sale Leaseback Transaction and certain other transactions, including legal, financing and transaction advisory services, employee severance and retention costs and other integration-related expenses associated with such transactions.

(3) Represents cash interest expense in connection with certain finance leases. Pursuant to the terms of our financial covenants contained in our debt agreements, we are required to consider cash interest expense on hospital-related finance leases within the definition of Adjusted EBITDA.

(4) Represents the exclusion of certain one-time costs, non-cash charges and non-recurring items, including the elimination of EBITDA associated with facilities that have been divested, differences between cash payments and reported rent expense for facility operating leases, and certain accounting changes resulting from our adoption of ASU 2016-02.

(5) Represents the estimated pro forma EBITDA impact attributable to various strategic initiatives in accordance with our debt agreements. For the year ended December 31, 2020, such items primarily consist of (i) unrealized cost savings related to conversions of the revenue cycle management function in certain of our hospitals; (ii) new or expanded service lines, newly constructed facilities and other strategic investments; and (iii) the pro forma impact of our pending divestiture of Capital Medical Center. For the year ended December 31, 2019, such items primarily consist of (i) unrealized incremental lease expense associated with the 2019 Sale Leaseback Transaction; (ii) new acquisitions, new or expanded service lines, newly constructed facilities and other strategic investments; and (iii) unrealized cost savings related to synergies anticipated from the LifePoint/RCCH Merger.

Leverage

The following table illustrates our indebtedness and certain leverage ratios prepared in accordance with the calculations set forth in the Indentures and the Credit Agreements as of and for the years ended December 31, 2020 and 2019 (dollars in millions):

	December 31, 2020	December 31, 2019
Cash and cash equivalents [(a)]	$ 2,652.6	$ 748.1
ABL Facility	$ -	$ -
Term Loan Facility	3,214.5	3,523.4
6.75% Secured Notes	600.0	-
4.375% Secured Notes	600.0	-
8.25% Secured Notes	-	800.0
Total Secured Debt [(b)]	$ 4,414.5	$ 4,323.4
Net Secured Debt [(a)(b)]	$ 1,761.9	$ 3,575.3
9.75% Unsecured Notes	$ 1,425.0	$ 1,425.0
5.375% Unsecured Notes	500.0	-
11.5% Unsecured Notes	-	350.0
Total Debt [(b)]	$ 6,339.5	$ 6,098.4
Net Debt [(a)(b)]	$ 3,686.9	$ 5,350.3
Adjusted EBITDA	$ 1,333.1	$ 1,104.6
Total Secured Debt [(b)] / Adjusted EBITDA	3.31x	3.91x
Net Secured Debt [(a)(b)] / Adjusted EBITDA	1.32x	3.24x
Total Debt [(b)] / Adjusted EBITDA	4.76x	5.52x
Net Debt [(a)(b)] / Adjusted EBITDA	2.77x	4.84x

(a) Included in cash and cash equivalents at December 31, 2020 is $991.0 million of Medicare advance payments. For additional information regarding Medicare advance payments, refer to Note 2 to our accompanying consolidated financial statements included elsewhere in this Report.

(b) Excludes finance leases, which are not considered indebtedness for purposes of calculating the ratios set forth in the Indentures and the Credit Agreements, as well as unamortized debt issuance costs and premium.

Liquidity and Capital Resources

Liquidity

Our primary sources of liquidity are cash generated by operations and borrowings under the ABL Facility. Our primary uses of cash are working capital requirements, debt service requirements and capital expenditures. Based on our current level of operations and available cash, we believe our cash flows from operations, combined with availability under the ABL Facility, will provide sufficient liquidity to fund our current obligations, projected working capital requirements, debt service requirements and capital spending requirements over the next twelve months. We cannot assure you, however, that our business will generate sufficient cash flows from operations or that future borrowings will be available to us under the ABL Facility, which is subject to a borrowing base, in an amount sufficient to enable us to pay principal and interest on the ABL Facility, the Term Loan Facility and the Notes, or to fund other liquidity needs. Our ability to do so depends on prevailing economic conditions, many of which are beyond our control. In addition, upon the occurrence of certain events, such as a change of control, we could be required to repay or refinance our indebtedness. We cannot assure you that we will be able to refinance any of our indebtedness on commercially reasonable terms or at all. Any future acquisitions, joint ventures or other similar transactions will likely require additional capital, and there can be no assurance that any such capital will be available to us on acceptable terms or at all. Any refinancing of our indebtedness could be at higher interest rates and may require us to comply with more onerous covenants that could further restrict our business operations. See "Item 1A, Risk Factors—Credit and Liquidity Risks" included elsewhere in this Report.

The following table presents summarized cash flow information for the years ended December 31, 2020 and 2019 (in millions):

	2020	2019
Net cash provided by operating activities	$ 1,920.3	$ 413.6
Net cash used in investing activities	(120.6)	(310.1)
Net cash provided by financing activities	104.8	585.7
Change in cash and cash equivalents	$ 1,904.5	$ 689.2

Operating Activities

For the year ended December 31, 2020, our net cash provided by operating activities were $1,920.3 million, including the receipt of $991.0 million of Medicare advance payments in connection with the CARES Act. Additionally, our net cash provided by operating activities for the year ended December 31, 2020 was positively impacted by our receipt and recognition of CARES Act direct grant aid payments, as well as changes in net working capital, including the deferral of payroll taxes, lower cash interest payments and improvements in the amount and timing of collections of outstanding patient and other receivables. These positive operating cash flows were partially offset by differences in the amount and timing of income tax payments made during the year ended December 31, 2020, compared to the receipt of net income tax refunds in the prior year.

For the year ended December 31, 2019, our cash flows from operating activities were $413.6 million, primarily driven by our strong operating performance, in addition to the collection of income tax refunds.

Investing Activities

For the year ended December 31, 2020, our net cash used in investing activities primarily consisted of purchases of property and equipment. We invested $170.4 million and $336.7 million in purchases of property and equipment for the years ended December 31, 2020 and 2019, respectively. Refer to "—Capital Expenditures" below for further information.

Financing Activities

Our net cash provided by financing activities for the year ended December 31, 2020 consisted of proceeds from the offering of our 6.75% Secured Notes, 4.375% Secured Notes, and 5.375% Unsecured Notes, in addition to the issuances of the Incremental Term Loan, partially offset by payments made in connection with the redemption and discharge of our 8.25% Secured Notes and 11.5% Unsecured Notes, and prepayments of our Term Loan Facility. Refer to "—Capital Resources" below for further information regarding our recent debt transactions.

For the year ended December 31, 2019, our net cash provided by financing activities primarily consisted of proceeds from the 2019 Sale Leaseback Transaction, net repayments of loans outstanding on our ABL Facility and installment payments on our Term Loan Facility.

Capital Expenditures

We continue to make significant, targeted investments at our facilities to add new technologies, modernize facilities and expand the services available. These investments should assist in our efforts to attract and retain physicians, to offset outmigration of patients and to make our facilities more desirable to our employees and potential patients.

The following table summarizes our capital expenditures as a percentage of revenues and as a percentage of depreciation expense for the years ended December 31, 2020 and 2019 (dollars in millions):

	2020		2019	
	Amount	% of Revenues	Amount	% of Revenues
Capital expenditures	$ 170.4	2.1 %	$ 336.7	3.8 %
Depreciation expense	$ 376.1		$ 374.7	
Ratio of capital expenditures to depreciation expense	45.3 %		89.9 %	

We have a formal and intensive review procedure for the authorization of capital expenditures that exceed an established threshold. One of the most important financial measures of acceptability for a discretionary capital project is whether its projected discounted cash flow return on investment exceeds our projected cost of capital for that project. We expect to continue to invest in information systems, modern technologies, emergency room and operating room expansions, the construction of medical office buildings for physician expansion and the reconfiguration of the flow of patient care. Additionally, we may from time to time replace existing hospital buildings with new buildings as we evaluate ongoing repair and maintenance costs and other factors that impact the future operations of the existing buildings. For the year ended December 31, 2020, we intentionally decreased our capital expenditures by pausing on many of the growth and expansion projects during the early stages of the pandemic. Refer to "—Liquidity and Capital Resources Outlook" below for further information regarding our long-term capital expenditure commitments.

Capital Resources

ABL Facility

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we entered into the ABL Facility in an aggregate principal amount of up to $800.0 million with a maturity of five years. For further information regarding the ABL Facility, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

Term Loan Facility

Effective November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we entered into the Term Loan Facility with an original aggregate principal amount of $3,550.0 million with a maturity of seven years and we repaid in full our Prior Term Facility. The Term Loan Facility was amended in connection with a refinancing transaction during the first quarter of 2020. For further information regarding the Term Loan Facility, including certain restrictive covenants and the refinancing transactions, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

6.75% Secured Notes

On April 13, 2020, we issued the 6.75% Secured Notes in an aggregate principal amount of $600.0 million with a maturity of five years. For further information regarding the 6.75% Secured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

4.375% Secured Notes

On February 13, 2020, we issued the 4.375% Secured Notes in an aggregate principal amount of $600.0 million with a maturity of seven years. For further information regarding the 4.375% Secured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

9.75% Unsecured Notes

On November 16, 2018, concurrently with the closing of the LifePoint/RCCH Merger, we issued the 9.75% Unsecured Notes in an aggregate principal amount of $1,425.0 million with a maturity of eight years. For further information regarding the 9.75% Unsecured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

5.375% Unsecured Notes

On December 4, 2020, we issued the 5.375% Unsecured Notes in an aggregate principal amount of $500.0 million with a maturity of eight years. For further information regarding the 5.375% Unsecured Notes, including certain restrictive covenants, refer to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report.

A roll-forward of our long-term debt, including current portions, during 2020 is as follows (in millions):

	December 31, 2019 [a]	Proceeds from Borrowings	Payments of Borrowings	Debt Issuance Costs [b]	Finance Lease Obligations [c]	December 31, 2020
Senior borrowings:						
ABL Facility	$ -	$ -	$ -	$ -	$ -	$ -
ABL FILO Term Loan	-	80.0	(80.0)			-
Term Loan Facility	3,523.4	600.0	(908.9)	-	-	3,214.5
6.75% Secured Notes	-	600.0	-	-	-	600.0
4.375% Secured Notes	-	600.0	-	-	-	600.0
8.25% Secured Notes	800.0	-	(800.0)	-	-	-
9.75% Unsecured Notes	1,425.0	-	-	-	-	1,425.0
5.375% Unsecured Notes	-	500.0	-	-	-	500.0
11.5% Unsecured Notes	350.0	-	(350.0)	-	-	-
Finance lease obligations	1,128.3	-	-	-	(80.1)	1,048.2
Unamortized debt issuance costs and premium	(191.8)	1.5	-	38.5	-	(151.8)
Subordinated borrowings, net	1.6	-	(1.7)	0.1	-	-
	$ 7,036.5	$ 2,381.5	$ (2,140.6)	$ 38.6	$ (80.1)	$ 7,235.9

(a) Our finance lease obligations as of December 31, 2019 have been restated in accordance with the adoption of ASU 2016-02. For additional information regarding the impact of the adoption of ASU 2016-02, refer to Note 8 to our accompanying consolidated financial statements included elsewhere in this Report.

(b) Represents non-cash write-offs of $47.4 million and amortization of $26.0 million, partially offset by the capitalization of new debt issuance costs of $34.8 million.

(c) Represents finance lease obligations reclassified to liabilities held for sale of $111.3 million and amortization of $11.4 million, partially offset by new finance leases entered into during 2020 of $42.6 million.

We monitor the capital markets and our capital structure and make changes from time to time, with the goal of maintaining financial flexibility, preserving or improving liquidity and/or achieving cost efficiency. From time to time, we may elect to repurchase amounts of our outstanding debt for cash through open market repurchases or privately negotiated transactions with certain of our debt holders, although there is no assurance we will do so.

Liquidity and Capital Resources Outlook

We continue to have ongoing capital commitments in connection with several of our acquired facilities. At December 31, 2020, we estimated our total remaining capital expenditure commitments to be approximately $1,174.7 million, which generally have remaining terms of two to six years. Of this amount, more than one half represents obligations at certain facilities for which commitments are computed as a percentage of revenues, ranging from three to five percent, and for which the commitment periods generally span over a longer period of time. We anticipate funding these expenditures through cash provided by operating activities, available cash and borrowings available under the ABL Facility.

Our business strategy contemplates the selective acquisition of additional hospitals and other healthcare service providers, and we regularly review potential acquisitions. These acquisitions may, however, require additional financing. Our primary sources of liquidity are cash flows provided by our operations and our borrowings available under the ABL Facility. We believe that our internally generated cash flows and borrowing availability under the ABL Facility will be adequate to service existing debt, finance internal growth and fund capital expenditures and small to mid-size hospital acquisitions over the next twelve months and into the foreseeable future prior to maturity dates of our outstanding debt. Certain larger hospital acquisitions may, however, require additional financing.

Inflation

The healthcare industry is labor-intensive. Wages and other expenses increase during periods of inflation and when labor shortages in marketplaces occur. In addition, suppliers pass along rising costs to us in the form of higher prices. Private insurers pass along their rising costs in the form of lower reimbursement to us. Our ability to pass on these increased costs in increased rates is limited because of increasing regulatory and competitive pressures and the fact that the majority of our revenues are fee-based. Accordingly, inflationary pressures could have a material adverse effect on our results of operations.

Contractual Obligations and Material Cash Requirements

We have certain material contractual obligations which are recorded as liabilities in our consolidated financial statements, primarily including:

- long-term debt obligations (refer to "—Capital Resources" above and to Note 4 to our accompanying consolidated financial statements included elsewhere in this Report); and
- finance and operating lease obligations (refer to Note 8 to our accompanying consolidated financial statements included elsewhere in this Report).

Additionally, we have certain other material cash requirements related to items that are not recognized as liabilities in our consolidated financial statements, primarily including:

- capital expenditure commitments (refer to "—Capital Expenditures" above and to Note 14 to our accompanying consolidated financial statements included elsewhere in this Report);
- shared centralized resource model arrangements with various third-parties to provide certain nonclinical business functions to us, including payroll, supply chain management and revenue cycle management;
- information technology services, including, but not limited to, financial, clinical, patient accounting and other information services;
- diagnostic imaging equipment maintenance and bio-medical services; and
- other minimum commitments to purchase miscellaneous goods or services under non-cancelable contracts.

Off-Balance Sheet Arrangements

We had letters of credit outstanding of approximately $45.3 million as of December 31, 2020, primarily related to the self-insured retention level of our general and professional liability insurance and workers' compensation programs as security for payment of claims and as security for certain lease agreements.

Adoption of Recently Issued Accounting Standards

Refer to Note 1 to our accompanying consolidated financial statements included elsewhere in this Report for a discussion of our adoption of recently issued accounting standards.

Critical Accounting Estimates

The preparation of financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts and related disclosures. We consider an accounting estimate to be critical if:

- it requires assumptions to be made that were uncertain at the time the estimate was made; and
- changes in the estimate or different estimates that could have been made could have a material impact on our consolidated results of operations or financial condition.

Our critical accounting estimates include the following areas:

- Accounting for CARES Act direct grant aid payments;
- Revenue recognition and accounts receivable;
- Goodwill impairment analysis;
- Accounting for income taxes; and
- Reserves for self-insurance claims.

The following discussion of critical accounting estimates is not intended to be a comprehensive list of all of our accounting policies that require estimates, but the estimates discussed below involve a higher degree of judgment and complexity. We believe the current assumptions and other considerations used to estimate amounts reflected in our consolidated financial statements are appropriate. However, if actual experience differs from the assumptions and other considerations used in estimating amounts reflected in our consolidated financial statements, the resulting changes could have a material adverse effect on our consolidated results of operations and our financial condition. The discussion that follows presents information about our critical accounting estimates, as well as the effects of hypothetical changes in the material assumptions used to develop each estimate.

Accounting for CARES Act Direct Grant Aid Payments

For the year ended December 31, 2020, we recognized $646.3 million of direct grant aid payments as other income under the caption "Government stimulus income" in our accompanying consolidated statement of operations included elsewhere in this Report. Payments made by the Emergency Fund to healthcare providers are not loans, and, as a result, they do not need to be repaid. However, healthcare providers are required to file attestations acknowledging receipt of the payments and must agree to and meet the terms and conditions that are associated with the payments, which include, among other things, accepting in-network amounts for presumptive or actual out-of-network COVID-19 patients and not using the payments received from the Emergency Fund to reimburse expenses or losses that other sources are obligated to reimburse. HHS has indicated that it will be closely monitoring the payments that are made to providers through the Emergency Fund, and that HHS, along with the OIG, will be auditing providers to ensure that recipients comply with the terms and conditions that are associated with the Emergency Fund and other COVID-19 relief programs.

We have accounted for the direct grant aid payments received as a government grant related to income in a manner consistent with International Accounting Standards 20, "Accounting for Government Grants and Disclosure of Government Assistance" ("***IAS 20***"). In accordance with IAS 20, government grants are recognized either as other income or a reduction to a related expense when there is reasonable assurance that the grant will be received, and the entity will comply with any conditions attached to the grant. There is currently limited, and sometimes changing, guidance available regarding the accounting treatment of funds that have been received by us and our facilities under the CARES Act and the related stimulus legislation. This lack of guidance requires us to apply professional judgement and make certain estimates and assumptions with respect to the presentation, amount and timing of our recognition of direct grant aid received under the CARES Act. For additional information regarding the CARES Act and related financial impact, refer to "Part I, Item 1. Business—Government Regulation—Legislative and Regulatory Developments in Response to COVID-19" and Note 2 to our accompanying consolidated financial statements included elsewhere in this Report.

Revenue Recognition and Accounts Receivable

We recognize revenues in the period in which performance obligations are satisfied. Generally, we bill patients and third-party payers several days after the services are performed or the patient is discharged. Accounts receivable primarily consist of amounts due from third-party payers and patients. Our ability to collect outstanding receivables is critical to our results of operations and cash flows. Amounts we receive for treatment of patients covered by governmental programs and third-party payers such as Medicare, Medicaid, HMOs, PPOs and private insurers as well as directly from patients are subject to contractual adjustments, discounts and implicit price concessions. Accordingly, the revenue and accounts receivable reported in our financial statements are recorded at the net consideration to which we expect to be entitled to receive in exchange for providing patient care.

Approximately 98.0%, 98.2% and 98.0% of our patient revenues recognized during the years ended December 31, 2020, 2019 and 2018, respectively, related to discounted charges, which were comprised of the following sources (as a percentage of our revenues):

	2020	2019	2018
Medicare	38.6 %	38.1 %	39.8 %
Medicaid	17.1 %	17.1 %	17.5 %
HMOs, PPOs and other private insurers	41.6 %	42.3 %	40.1 %
Self-pay	0.7 %	0.7 %	0.6 %

Revenues are recorded at estimated net amounts due from patients, third-party payers and others for healthcare services provided. For certain payers, such as Medicare, Medicaid, as well as some managed care payers with which we have contractual arrangements, the contractual allowances are calculated by computerized logging systems based on defined payment terms. For other payers, the contractual allowances are determined based on historical data by insurance plan. All contractual adjustments, regardless of payer type or method of calculation, are reviewed and compared to actual experience.

We monitor our processes for calculating contractual allowances through:

- review of payment discrepancy reports for logged payers;
- analysis of historical contractual allowance trends based on actual claims paid by HMOs, PPOs and other private insurers;
- review of contractual allowance information reflecting current contract terms;
- consideration and analysis of changes in charge rates and payer mix reimbursement levels; and
- other issues that may impact contractual allowances.

Medicare and Medicaid

The majority of services performed on Medicare and Medicaid patients are reimbursed at predetermined reimbursement rates. The differences between the established billing rates (i.e. gross charges) and the predetermined reimbursement rates are recorded as contractual discounts and deducted from gross charges. Under the Medicaid program's prospective reimbursement systems, there is no adjustment or settlement of the difference between the actual cost to provide the service and the predetermined reimbursement rates.

Discounts for retrospectively cost-based revenues are estimated based on historical and current factors and are adjusted in future periods when settlements of filed cost reports are received. Final settlements under these programs are subject to adjustment based on administrative review and audit by third-party intermediaries, which can take several years to resolve completely.

Because the laws and regulations governing the Medicare and Medicaid programs are complex and subject to change, the estimates of contractual discounts we record could change by material amounts. A significant increase in our estimate of contractual discounts for Medicare and Medicaid would lower our earnings. This would adversely affect our results of operations, financial condition, liquidity and future access to capital.

HMOs, PPOs and Other Private Insurers

Amounts we receive for the treatment of patients covered by HMOs, PPOs and other private insurers (collectively "***managed care plans***") are generally less than our established billing rates. We include contractual allowances as a reduction to revenues in our consolidated financial statements based on payer specific identification and payer specific factors for rate increases and denials. For most managed care plans, estimated contractual allowances are adjusted to actual contractual allowances as cash is received and claims are reconciled.

The process of determining the allowance requires us to estimate the amount expected to be received based on payer contract provisions, historical collection data as well as other factors and requires a high degree of judgment. It is impacted by changes in managed care contracts and other related factors. A significant increase in our estimate of contractual discounts for managed care plans would lower our earnings. This would adversely affect our results of operations, financial condition, liquidity and future access to capital.

Self-Pay Revenues

Self-pay revenues are derived from patients who do not have any form of healthcare coverage as well as from patients with third-party healthcare coverage related to the patient responsibility portion, including deductibles and co-payments. We evaluate these patients, after the patient's medical condition is determined to be stable, for their ability to pay based upon federal and state poverty guidelines, qualifications for Medicaid or other governmental assistance programs. We estimate the transaction price for self-pay patients and the patient responsibility portion using a number of analytical tools, benchmarks and market conditions. No single statistic or measurement determines the transaction price for these patients. Some of the analytical tools that we utilize include, but are not limited to, historical cash collection experience, revenue trends by payer classification and revenue days in accounts receivable.

The revenues associated with self-pay patients are reported at the net amount that we expect to collect. Because we provide care to patients regardless of their ability to pay, we have determined that the differences between the amounts we bill based on gross or discounted charges and the amounts we expect to collect represent implicit price concessions. The final amount that will be received from the patient is not known at the date of service, and we account for this variable consideration in accordance with the provisions of ASC 606. Self-pay accounts receivable are written off after collection efforts have been followed in accordance with our policies.

Goodwill Impairment Analysis

Goodwill represents the excess of the purchase price over the fair value of the net assets of acquired businesses. Our goodwill included in our consolidated balance sheet as of December 31, 2020 was $2,918.5 million. Refer to Note 5 to our accompanying consolidated financial statements included elsewhere in this Report for a detailed rollforward of changes in our goodwill during the years ended December 31, 2020 and 2019.

In accordance with ASC 350, "Intangibles — Goodwill and Other" ("***ASC 350***") goodwill and intangible assets with indefinite lives are reviewed by us at least annually for impairment. Prior to the LifePoint/RCCH Merger, we historically determined that each of our hospitals represented a reporting unit in accordance with ASC 280, "Segment Reporting" ("***ASC 280***") and ASC 350. Due to the significance of the LifePoint/RCCH Merger and its impact on our management team and business operations, we re-evaluated our reporting units in accordance with ASC 280 and ASC 350 during 2019 and determined that our consolidated business comprises a single reporting unit for goodwill impairment testing purposes. For the annual impairment evaluation, we determine fair value using a discounted cash flow ("***DCF***") analysis and consideration of certain market inputs including those of guideline public companies. Determining fair value requires the exercise of significant judgment, including judgments about appropriate discount rates, perpetual growth rates and the amount and timing of expected future cash flows. The significant judgments are typically based upon Level 3 inputs, generally defined as unobservable inputs representing our assumptions. The cash flows employed in the DCF analysis are based on our most recent financial budgets and business plans and, when applicable, various growth rates for years beyond the current business plan period. Discount rate assumptions are based on an assessment of the risks inherent in the future cash flows of the respective reporting unit.

If we determine the carrying value of goodwill is impaired, or if the carrying value of a business that is to be sold or otherwise disposed of exceeds its fair value, then we reduce the carrying value, including any allocated goodwill, to fair value. Refer to Note 5 to our accompanying consolidated financial statements included elsewhere in this Report for further discussion of the results of our annual goodwill impairment evaluation procedures.

Accounting for Income Taxes

Deferred tax assets generally represent items that will result in a tax deduction in future years for which we have already recorded the tax benefit in our income statement. We assess the likelihood that deferred tax assets will be recovered from future taxable income. To the extent we believe that recovery is not probable, a valuation allowance is established. To the extent we establish a valuation allowance or subsequently increase or decrease this allowance, we must include an adjustment as part of the income tax provision in our results of operations. Our deferred tax asset balances in our consolidated balance sheets were $537.3 million and $636.9 million as of December 31, 2020 and 2019, respectively. Our valuation allowances for deferred tax assets in our consolidated balance sheets were $360.1 million and $493.6 million as of December 31, 2020 and 2019, respectively.

In addition, significant judgment is required in determining and assessing the impact of certain tax-related contingencies. We establish accruals when, despite our belief that our tax return positions are fully supportable, it is probable that we have incurred a loss related to tax contingencies and the loss or range of losses can be reasonably estimated. We adjust the accruals related to tax contingencies as part of our provision for income taxes in our results of operations based upon changing facts and circumstances, such as progress of a tax audit, development of industry related examination issues, as well as legislative, regulatory or judicial developments. A number of years may elapse before a particular matter, for which we have established an accrual, is audited and resolved.

The first step in determining the deferred tax asset valuation allowance is identifying reporting jurisdictions where we have a history of tax and operating losses or are projected to have losses in future periods as a result of changes in operational performance. We then determine if a valuation allowance should be established against the deferred tax assets for that reporting jurisdiction.

The second step is to determine the amount of the valuation allowance. We will generally establish a valuation allowance equal to the net deferred tax asset (deferred tax assets less deferred tax liabilities) related to the jurisdiction identified in step one of the analysis. In certain cases, we may not reduce the valuation allowance by the amount of the deferred tax liabilities depending on the nature and timing of future taxable income attributable to deferred tax liabilities.

In assessing tax contingencies, we apply the provisions of ASC 740, "Income Taxes". We apply the recognition threshold and measurement of a tax position taken or expected to be taken in a tax return and follow the guidance on various matters such as derecognition, interest, penalties and disclosure. We classify interest and penalties as a component of income tax expense.

During each reporting period, we assess the facts and circumstances related to recorded tax contingencies. If tax contingencies are no longer deemed probable based upon new facts and circumstances, the contingency is reflected as a reduction of the provision for income taxes in the current period.

Our deferred tax assets exceeded our deferred tax labilities by $341.7 million as of December 31, 2020, excluding the impact of valuation allowances. Historically, we have not produced federal taxable income, and in connection with the LifePoint/RCCH Merger, we became highly leveraged. As such, we believe it is likely that the majority of our deferred tax assets will not be realized and thus have established a valuation allowance against these deferred tax assets as of December 31, 2020. In addition, we have subsidiaries with a history of tax losses in certain state jurisdictions, and, based upon those historical tax losses, we have assumed that the subsidiaries would not be profitable in the future for those states' tax purposes. If our assertion regarding the future profitability of those subsidiaries would have been different, then our deferred tax assets would be understated by the amount of the state valuation allowance of $164.2 million at December 31, 2020. Furthermore, the valuation allowance decreased $133.5 million during the year ended December 31, 2020, primarily as a result of the projected utilization of all federal NOLs, as well as the significant revisions to the U.S. corporate tax laws due to the enactment of the CARES Act, specifically relating to the increase in the interest expense limitation from 30 percent to 50 percent for tax years 2019 and 2020. The interest expense limitation percentage decreases to 30 percent for tax years 2021 and forward, which may result in our inability to deduct all of the annual interest expense currently.

Reserves for Self-Insurance Claims

Given the nature of our operating environment, we are subject to potential professional liability claims, employee workers' compensation claims and other claims. To mitigate a portion of this risk, we maintain insurance for individual professional liability claims and employee workers' compensation claims exceeding SIR and deductible levels. At December 31, 2020, our SIR for professional liability claims is $15.0 million per claim at the majority of our facilities. Additionally, we participate in state-specific professional liability programs in Colorado, Indiana, Kansas, New Mexico, Pennsylvania and Wisconsin. At December 31, 2020, our deductible for workers' compensation claims was $1.0 million per claim in all states in which we operate except for Montana, Ohio, Oklahoma, Washington and Wyoming. We participate in state-specific programs for our workers' compensation claims arising in these states. Our SIR and deductible levels are evaluated annually as a part of our insurance program's renewal process.

Each year, we obtain quotes from various insurers with respect to the cost of obtaining insurance coverage. We compare these quotes to our most recent actuarially determined estimates of losses at various self-insured retention and deductible levels. Accordingly, changes in insurance costs affect the self-insured retention and deductible levels we choose each year.

Our reserves for self-insurance and deductible claims reflect the current estimate of all outstanding losses, including incurred but not reported losses, based upon actuarial calculations as of the balance sheet date. The loss estimates included in the actuarial calculations may change in the future based upon updated facts and circumstances. Our expense for self-insurance and deductible claims coverage each year includes: the actuarially determined estimate of losses for the current year, including claims incurred but not reported; the change in the estimate of losses for prior years based upon actual claims development experience as compared to prior actuarial projections; the insurance premiums for losses in excess of our self-insured retention and deductible levels; the administrative costs of the insurance program; and interest expense related to the discounted portion of the liability.

Our reserves for professional liability claims are based upon quarterly and/or semi-annual actuarial calculations. Our reserve calculations consider historical claims data, demographic considerations, severity factors and other actuarial assumptions, which are discounted to present value. We have discounted our reserves for self-insured claims to their present value using a discount rate of 1.7% at December 31, 2020, 1.9% at December 31, 2019, and 1.8% at December 31, 2018. We select a discount rate by considering a risk-free interest rate that corresponds to the period when the self-insured claims are incurred and projected to be paid.

The following table provides information regarding our reserves for self-insured claims at December 31, 2020 and 2019 (in millions):

	2020	2019
Undiscounted	$ 300.6	$ 275.8
Discounted (as reported)	$ 287.3	$ 261.0

As of December 31, 2020 and 2019, we estimated less than 1% of our reserves for self-insured claims represent reserves for settled and unpaid claims. Our average lag time between the settlement and payment of a self-insured claim ranges from 1 to 2 weeks.

Our estimated reserves for self-insured claims will be significantly affected if current and future claims differ from historical trends. While we monitor reported claims closely and consider potential outcomes when determining our reserves for self-insured claims, the complexity of the claims, the extended period of time to settle the claims and the wide range of potential outcomes complicate the estimation process. In addition, certain states have passed varying forms of tort reform which attempt to limit the amount of awards. If such laws are passed in the states where our hospitals are located, our loss estimates could decrease.

Our estimate of reserves for self-insured and deductible claims are based upon actuarial calculations and are significantly influenced by key assumptions and other factors. These factors include, but are not limited to: historical paid claims; trending of loss development factors; trends in the frequency and severity of claims, which can differ significantly by jurisdiction as a result of the legislative and judicial climate in such jurisdictions; coverage limits of third-party insurance and actuarial determined statistical confidence levels. Given the number of assumptions and characteristics of each assumption considered in establishing the reserves for self-insured claims, it is difficult to compute the individual financial impact of each assumption or groups of assumptions. Some of the assumptions are dependent upon the quantitative measurement of other assumptions, and therefore are not accurately evaluated in isolation. For example, a change in the frequency of claims assumption is also affected by the estimated severity of these claims resulting in an inability to properly isolate and quantify the impact of a change in this assumption.

Professional and general liability claims are typically resolved over an extended period of time, often as long as five years or more, while workers' compensation claims are typically resolved in one to two years. Our reserves for self-insured claims are comprised of estimated indemnity and expense payments related to reported events and incurred but not reported events as of the end of the period. We have the ability to reliably determine the amount and timing of payments based on sufficient history of our claims development, the use of external actuarial expertise and our rigorous review process. Actuarial payment patterns are based on our individual hospital historical data both prior to and after our inception. The processes, performed by both external actuaries and our management, enable us to reliably determine the amount of our ultimate losses as well as the timing of the loss settlements such that discounting of the reserves for self-insured claims is appropriate. Given the number of factors considered in establishing the reserves for self-insured claims, it is neither practical nor meaningful to isolate a particular assumption or parameter of the process and calculate the impact of changing that single item.

Ultimately, from an actuarial standpoint, the sensitivity in the estimates of reserves for self-insured claims is reflected in the various actuarial confidence levels. Our best estimate of our reserves for self-insured claims utilizes an actuarial central estimate, which employs a statistical confidence level that approximates 50%. Higher statistical confidence levels, while not representative of our best estimate, reflect reasonably likely outcomes upon the ultimate resolution of related claims. Using a higher statistical confidence level would increase the estimated reserves for self-insured claims. At a 75% statistical confidence level, our estimated reserve would increase by $33.4 million. Changes in our estimates of reserves for self-insured claims are non-cash charges and accordingly, do not impact our liquidity or capital resources.

The combination of changing conditions and the extended time required for claim resolution results in a loss estimation process that requires actuarial skill and the application of judgment, and such estimates require periodic revision. As a result of the variety of factors that must be considered, there is a risk that actual incurred losses may develop differently from estimates. The results of our quarterly and semi-annual actuarial calculations resulted in changes to our reserves for self-insured claims for prior years. As a result, for the years ended December 31, 2020 and 2018 our related self-insured claims expense decreased by $4.4 million and $3.9 million, respectively. For the year ended December 31, 2019, our related self-insured claims expense increased by $6.7 million.

Item 7A. ***Quantitative and Qualitative Disclosures About Market Risk.***

Market Risk

Market risk is defined as the risk of loss resulting from changes in market prices as a result of changes in interest rates, credit and liquidity or general economic conditions. Our principal market risks in the ordinary course of business are credit risk, liquidity risk and interest rate risk. We currently do not have direct exposure to either market risk from trading activities or foreign currency exchange rate risk.

Credit Risk

We define credit risk as the risk that amounts payable by uninsured patients and remaining patient responsibility amounts (deductibles and co-payments) for patient accounts where the primary insurance carrier has paid the amounts covered by the applicable agreements will not be paid. The provision for doubtful accounts relates primarily to amounts due directly from patients. While we have experienced a reduction in uninsured patients, the risk of collection from insured patients and the amounts due, may increase as more individuals are enrolled in insurance plans with larger deductibles and/or co-payments, including those purchased on insurance exchanges. Additionally, the counterparty to our Interest Rate Swap exposes us to credit risk in the event of nonperformance. However, we do not anticipate nonperformance by our counterparty. We do not hold or issue derivative financial instruments for trading purposes.

Liquidity Risk

We define liquidity risk as the risk that we will not meet our payment obligations in a timely manner or the risk that market conditions or institution-specific events may reduce our ability to raise funds from market counterparties. An adverse institution-specific event such as a major loss that causes a perceived or actual deterioration in our financial condition or an adverse systemic event could affect our funding liquidity.

Interest Rate Risk

Borrowings under the ABL Facility and the Term Loan Facility are at variable rates of interest and expose us to interest rate risk. To manage this risk, we entered into an Interest Rate Swap. The terms of the Interest Rate Swap require us to pay a fixed rate of 2.63% on a notional amount of $1,100.0 million and, in exchange, we receive one-month LIBOR. The Interest Rate Swap became effective on February 19, 2019 and is scheduled to mature on February 19, 2022. We have not designated our Interest Rate Swap as a cash flow hedge in accordance with ASC 815. Therefore, all changes in the fair value of our Interest Rate Swap will be recognized through interest expense in our results of operations. Changes in the fair value of our Interest Rate Swap could result in a material effect on our consolidated results of operations and financial position; however, we do not anticipate that changes in the fair value of our Interest Rate Swap will have any impact on our cash flows.

As of December 31, 2020, we had total outstanding debt of $6,339.5 million, excluding finance leases and unamortized debt issuance costs and premium, of which $2,114.5 million, or 33.3%, was subject to variable rates of interest after giving effect to our Interest Rate Swap. If the interest rate on our variable rate long-term debt outstanding as of December 31, 2020, not subject to our Interest Rate Swap, were to increase by 100 basis points during any annual period, our cash flows would be negatively impacted by approximately $21.1 million.

Item 8. ***Financial Statements and Supplementary Data.***

Information with respect to this Item is contained in our accompanying consolidated financial statements beginning on page F-1 of this Report.

Item 9. ***Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.***

None.

Item 9A. ***Controls and Procedures.***

The information that would be required to be disclosed under Part II, Item 9A of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a) of each of the Indentures.

Item 9B. ***Other Information.***

None.

PART III

Item 10. ***Directors, Executive Officers and Corporate Governance*.**

The following table provides information regarding our executive officers and the members of our Board of Directors (ages as of March 5, 2021):

Name	Age	Position(s)
David M. Dill	52	President and Chief Executive Officer
Michael S. Coggin	51	Executive Vice President and Chief Financial Officer
Victor E. Giovanetti	57	Executive Vice President, Hospital Operations
Robert F. Jay	53	Executive Vice President, Integrated Operations
Jennifer C. Peters	49	Executive Vice President, General Counsel and Corporate Secretary
Terry W. Terrill, Jr.	54	Executive Vice President, Administration
J. Michael Grooms	42	Senior Vice President and Chief Accounting Officer
Matthew H. Nord	41	Director and Chairman
Norman Brownstein	77	Director
Christopher J. Christie	58	Director
Maxwell David	30	Director
Michael P. Haley	70	Director
Steve Levin	55	Director
Holly McMullan	44	Director
Daniel Morissette	55	Director
Eric L. Press	55	Director
Martin S. Rash	66	Director
James H. Simmons III	54	Director
Olivia Wassenaar	41	Director
G. Rodney Wolford	74	Director

David M. Dill became our Chief Executive Officer upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Dill served in various roles at Legacy LifePoint as President since January 2011 and as Chief Operating Officer since April 2009. Mr. Dill served as Executive Vice President from February 2008 to January 2011. Mr. Dill joined Legacy LifePoint in July 2007 as Chief Financial Officer and continued to serve in that role until April 2009. From March 2006 until Mr. Dill joined Legacy LifePoint, he served as executive vice president of Fresenius Medical Care North America and as chief executive officer of one of two U.S. divisions of Fresenius Medical Care Services, a wholly owned subsidiary of Fresenius Medical Care AG & Co. KGaA. Mr. Dill previously served as executive vice president, chief financial officer and treasurer of Renal Care Group, Inc., a publicly-traded dialysis services company, from November 2003 until Renal Care Group was acquired by Fresenius Medical Care in March 2006. From 1996 to November 2003, Mr. Dill served in various finance and accounting roles with Renal Care Group, Inc. Mr. Dill served as a member of the board of directors of Psychiatric Solutions, Inc., a behavioral health services company, from 2005 until 2010.

Michael S. Coggin became our Executive Vice President and Chief Financial Officer upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Coggin served in various roles at Legacy LifePoint as Executive Vice President, Chief Financial Officer and Chief Accounting Officer, since September 2016. From December 2008 until September 2016, Mr. Coggin served as Senior Vice President and Chief Accounting Officer of Legacy LifePoint. From September 2007 until December 2008, Mr. Coggin served as chief financial officer of Specialty Care Services Group, a multi-service line healthcare provider primarily focused on providing perfusion and auto-transfusion services to hospitals. Mr. Coggin was a senior vice president in the finance, accounting and internal audit groups of Renal Care Group, Inc. from April 2004 until its acquisition by Fresenius Medical Care AG & Co. KGaA in March 2006. Following the acquisition, Mr. Coggin provided finance and accounting oversight for business units within the East Division of Fresenius. Prior to that time, Mr. Coggin was an audit manager at KPMG Peat Marwick in Nashville, Tennessee.

Victor E. Giovanetti became our Executive Vice President, Hospital Operations upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Mr. Giovanetti served as President of Legacy LifePoint's Eastern Group since January 2017. From July 2015 to January 2017, Mr. Giovanetti served as President of Legacy LifePoint's Western Group. Mr. Giovanetti joined Legacy LifePoint in July 2013 as Chief Operating Officer of Legacy LifePoint's Eastern Group. Mr. Giovanetti has more than 25 years of management experience in operations, financial, clinical and strategic aspects of healthcare administration. Prior to joining the Company, his positions included president of HCA Lewis-Gale Regional Health System in Roanoke, Virginia, chief executive officer and chief operating officer of Southern Hills Medical Center in Nashville, Tennessee, and various management roles with HCA, Symbion and other healthcare organizations in Georgia.

Robert F. Jay became our Executive Vice President, Integrated Operations upon consummation of the LifePoint/RCCH Merger. Mr. Jay previously served as RCCH's Executive Vice President and Chief Operating Officer, a position he held from January 2018. Mr. Jay has served in various roles with RCCH, including Executive Vice President Operations Support from May 2016 to September 2016 and Division President from September 2016 to January 2018. Prior to that he served as Chief Operating Officer for RCCH from January 2014 until May 2016. Prior to joining RCCH, he spent seven years at Vanguard Health Systems in a variety of operations and development positions. He joined Vanguard Health Systems as its Corporate Director Operations and Financial Analysis where he was responsible for managing and reporting operational, clinical, and financial results. In 2008, Mr. Jay was promoted to Vice President, Supply Chain Management of Vanguard where he oversaw the overall strategic direction and tactical execution of supply chain operations. In 2009 he transitioned to Vice President, Development of Vanguard where he led acquisition teams that closed on hospital transactions with combined net revenues of over $2.2 billion. Prior to joining Vanguard Health Systems, Mr. Jay worked as the Corporate Controller for Health Management Associates, Inc. in Naples, Florida. He has also served as a Controller in a not-for-profit hospital and also spent time at KPMG as an auditor.

Jennifer C. Peters became our Executive Vice President and General Counsel upon consummation of the LifePoint/RCCH Merger. Prior to the consummation of the LifePoint/RCCH Merger, Ms. Peters served as Legacy LifePoint's General Counsel since April 2017 and Corporate Secretary since June 2017. Prior to that, Ms. Peters served as senior vice president and chief operations counsel of Legacy LifePoint, where she was responsible for overseeing the Company's operations lawyers and contract management team to ensure consistent legal guidance across all operational units. Prior to joining Legacy LifePoint in November 2013, Ms. Peters served as general counsel, secretary and chief compliance officer for Simplex Healthcare from October 2010 through November 2013. Ms. Peters has also served as vice president and associate general counsel at Community Health Systems. In addition, Ms. Peters has experience as a hospital administrator.

Terry W. "Sonny" Terrill, Jr. joined the Company in April 2019 as Executive Vice President, Human Resources. Mr. Terrill is responsible for providing leadership in developing and executing human resources strategies in support of the overall business plan and strategic direction of the organization. Mr. Terrill has three decades of HR experience, including executive coaching, full-cycle talent management and management of large-scale system and organizational integration. Before joining the Company, he served in a number of leadership roles, most recently as executive vice president, chief human resources officer for BrightSpring Health from August 2017 to March 2019 and human resources officer for CIGNA- HealthSpring from May 2005 to August 2017. He is also a Six Sigma Black Belt.

J. Michael Grooms became our Senior Vice President and Chief Accounting Officer upon consummation of the LifePoint/RCCH Merger. Mr. Grooms previously served as Chief Accounting Officer of Legacy LifePoint from June 2018 and as Vice President of Accounting and Financial Reporting from March 2012. Additionally, Mr. Grooms served in various other accounting financial reporting roles since joining Legacy LifePoint in September 2006. Prior to that time, he served as controller with Delek US from 2005 to 2006, and as an auditor with KPMG from 2001 to 2005.

Matthew H. Nord has been our Director since consummation of the Apollo/RegionalCare Acquisition in December 2015 and became Chairman of the Board in December 2018. Mr. Nord is the Co-Lead Partner of Apollo Private Equity, having joined in 2003. Prior to that time, he was a member of the Investment Banking division of Salomon Smith Barney Inc. Mr. Nord serves on the board of directors of Tech Data Corporation, ADT, Intrado, and Lifepoint Health. Mr. Nord also serves on the board of trustees of Montefiore Health System and on the Board of Advisors of the University of Pennsylvania's Stuart Weitzman School of Design. He graduated summa cum laude with a BS in economics from the University of Pennsylvania's Wharton School of Business.

Norman Brownstein became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Brownstein is the founding member and chairman of the board of the law firm of Brownstein Hyatt Farber Schreck, LLP. Mr. Brownstein is nationally recognized for his extensive experience in real estate law, commercial transactions and public policy advocacy, which spans the economic spectrum, extending to telecommunications, financial services, agriculture, tax and healthcare interests. Mr. Brownstein's firm is one of the leading lobbying firms in the U.S. Mr. Brownstein serves on the board of directors of National Jewish Health and the Simon Wiesenthal Center, and during the past five years has also served as a director of Ardent Healthcare Services. Mr. Brownstein received a B.S. from the University of Colorado and a J.D. from the University of Colorado Law School.

Christopher J. Christie became our Director in December 2018. Mr. Christie served two terms as Governor of New Jersey from 2010 to 2018. Prior to that, Mr. Christie served as U.S. Attorney for the District of New Jersey from 2002 to 2008. During his governorship, Mr. Christie chaired the President's Commission on Combating Drug Addiction and the Opioid Crisis in 2017. He currently serves as a legal and political commentator for ABC News. Mr. Christie is a graduate of the University of Delaware and Seton Hall University School of Law.

Maxwell David became our Director in December 2018. Mr. David is a Principal in Apollo Global Management's Private Equity business, having joined in 2014. Prior to that time, Mr. David was a member of the Investment Banking division of Bank of America Merrill Lynch. Mr. David serves on the board of directors of Camaro Parent, LLC (parent of CareerBuilder) and Aris Mortgage Holding Company, LLC (parent of Amerihome). Mr. David graduated cum laude from Dartmouth College with a B.A. in Economics.

Michael P. Haley became our Director in December 2018. Prior to that time, Mr. Haley served as a director of Legacy LifePoint since 2005 and as chair of its Audit Committee since 2016. Mr. Haley is also a member of the board of directors of American National Bankshares, Inc., a bank holding company. From 2005 until April 2018, Mr. Haley served as a director of Ply Gem Holdings, Inc., a producer of window, door and siding products for the residential construction industry. Mr. Haley served as an advisor to Fenway Partners, LLC, a private equity investment firm, from April 2006 to June 2015, and was a managing director of its affiliate, Fenway Resources, from 2008 to June 2015. Mr. Haley's previous executive leadership experience includes service as executive chairman of Coach America, a transportation services operator, and as chairman, president and chief executive officer of MW Manufacturers, Inc., a subsidiary of Ply Gem Industries, Inc. In addition, Mr. Haley has served on the Board of Trustees of Roanoke College (Virginia) since 2010 and previously served on the board of the Martinsville-Henry County United Way and as chairman of the board of trustees of Memorial Hospital of Martinsville and of the Martinsville-Henry County Economic Development Corporation.

Steven Levin became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Levin is the Chief Executive Officer of Quest Analytics, a payer network analytic company focused on improve access to quality healthcare in America. Previous, Mr. Levin was the chief strategy officer of Waystar, a healthcare revenue cycle technology platform. In 2018, Waystar acquired Connance, an analytics company that delivers workflow optimization technology for healthcare providers, which Mr. Levin founded in collaboration with Tenet Healthcare, FICO and Northbridge Venture Partners. Prior to Connance, Mr. Levin was a Partner at Monitor Company (now Monitor Deloitte) working with hospitals, HCIT companies and health insurers. Mr. Levin holds a B.A. from Dartmouth College and an M.B.A. from Harvard Business School.

Holly McMullan became our Director in December 2018. Ms. McMullan is a Partner in Apollo Global Management's Client and Product Solutions group, where she is responsible for fundraising efforts for Apollo's private equity and capital markets businesses, having joined in 2008. Prior to that time, Ms. McMullan was a Senior Vice President at Pequot Capital Management and was previously a member of Guggenheim Advisors, Bear Stearns, and Robertson Opportunity Capital. She currently serves on the following advisory boards: 30 % Coalition, McCombs Advisory Council, New York for McCombs (Chair) and the Hicks Muse Private Equity Research Center at the University of Texas at Austin. Ms. McMullan holds an M.B.A. with a concentration in Finance from the McCombs School of Business at the University of Texas at Austin and a B.A. (honors) in International Business from Sheffield Hallam University, Sheffield, UK.

Daniel Morissette became our Director upon consummation of the Transaction in April 2016. Mr. Morissette serves as Senior Executive Vice President and Chief Financial Officer for Common Spirit Health and served as Senior Executive Vice President/Chief Financial Officer for Dignity Health since February 2016. Previously, Mr. Morissette served as the Chief Financial Officer for Stanford Health Care. Mr. Morissette has over 25 years of experience in healthcare, consulting and international business development. During the past five years, Mr. Morissette served as a director for Optum360. Mr. Morissette received a B.S. from DePaul University and an M.B.A. from The University of Chicago, Booth School of Business.

Eric L. Press has been our Director since consummation of the Apollo/RegionalCare Acquisition in December 2015. Mr. Press is a Senior Partner at Apollo, having joined in 1998. In his time with Apollo, he has been involved in many of the firm's investments in basic industrials, metals, lodging/gaming/leisure and financial services. Prior to joining Apollo, Mr. Press worked at the law firm of Wachtell, Lipton, Rosen & Katz, specializing in mergers, acquisitions, restructurings and related financing transactions. Prior thereto, Mr. Press was a consultant with The Boston Consulting Group, a management consulting firm focused on corporate strategy. Mr. Press serves on the board of directors of ADT Inc., Gamenet Group S.p.A., Apollo Commercial Real Estate Finance, Inc., and Eagle LM5 Holdings Inc. He previously served on the board of directors of Caesars Entertainment Corporation, Princimar Chemical Holdings, LLC, PlayAGS, Inc., and Verso Corporation. He graduated magna cum laude from Harvard College, with an A.B. in economics, and Yale Law School, where he was a Senior Editor of the Yale Law Journal.

Martin S. Rash has been our director since October 2015 following the Apollo/RegionalCare Acquisition and served as Executive Chairman following the consummation of the RegionalCare/Capella Merger in April 2016 until October 2016. Additionally, Mr. Rash served as Chief Executive Officer and Chairman of RegionalCare from October 2016 until the consummation of the LifePoint/RCCH Merger. Mr. Rash served as the Executive Chairman at RegionalCare Hospital Partners, Inc. from March 2013 to January 2014 and served as its Chief Executive Officer from 2009 until March 2013. From December 1996 to 2005, Mr. Rash was Chairman and Chief Executive Officer of Province Healthcare, a $1 billion NYSE company that owned 21 hospitals and managed more than 50 facilities. Prior to his tenure at Province Healthcare, Mr. Rash served as Executive Vice President and Chief Operating Officer for Community Health Systems where he led the growth of the company from 10 to 41 hospitals in 17 states. Earlier in his 40-year healthcare career, he worked at numerous community hospitals in various administrative and financial roles. Mr. Rash's experience and leadership includes Board of Directorships in the past at Healthspring, a NYSE company, and Odyssey Healthcare, a Nasdaq company, serving as the chair of the compensation committee for both organizations. He is a past Chairman of the Federation of American Hospitals and of the Nashville Health Care Council. He holds both a B.A. and M.B.A. from Middle Tennessee State University. He currently serves as Chairman of American Pathology Partners; ReVIDA Recovery; and Unifeye Vison Partners.

James H. Simmons III has been our director since September 2020. Mr. Simmons is Chief Executive Officer and Founding Partner of Asland Capital Partners, serving as head of its investment committee with oversight over the day-to-day operations of the firm. Mr. Simmons has over two decades of real estate investment experience across the public and private sectors. Prior to founding Asland Capital Partners, Mr. Simmons was a Partner at Ares Management, where he led the Ares Domestic Emerging Markets Fund, and was previously a Partner at Apollo Real Estate Advisors. Mr. Simmons was also previously President and Chief Executive Officer of the Upper Manhattan Empowerment Zone Development Corporation and held prior roles at Bankers Trust and Salomon Smith Barney. Mr. Simmons currently serves on the Board of Directors of the Real Estate Executive Council (Vice Chair), The Dalton School and the Greater Jamaica Development Corporation. Mr. Simmons received a BS degree from Princeton University, an M.S. from the Virginia Polytechnic Institute and State University and an M.M. from Northwestern University's J.L. Kellogg Graduate School of Management.

Olivia Wassenaar became our Director in December 2018. Ms. Wassenaar is a Senior Partner at Apollo Global Management and is Co-Lead of Natural Resources, having joined in 2018. Prior to that time, Ms. Wassenaar was a Managing Director at Riverstone Holdings and was previously a member of the Investment Banking division of Goldman Sachs. Ms. Wassenaar also serves on the boards of directors of Talos Energy Inc., Jupiter Resources Ltd., Pegasus Optimization Partners, LLC, and High Road Resources, LLC (f/k/a American Petroleum Partners, LLC). During the past five years, Ms. Wassenaar also served as a director of Northern Blizzard Resources Inc. (from June 2011 to May 2017), USA Compression Partners, LP (from June 2011 to April 2018), Admiral Permian Resources, LLC (from March 2017 to May 2018), Hammerhead Resources Inc. (from June 2017 to May 2018), Canadian Non-Operated Resources GP Inc. (from August 2014 to May 2018), Eagle Energy Exploration LLC (from December 2013 to May 2018), Vesta Energy Corp. (from May 2017 to May 2018), Canera III (from 2015 to 2017), Niska Gas Storage Partners LLC (from July 2014 to June 2016) and Apex Energy, LLC (from September 2019 to December 2019). She received her A.B., magna cum laude, from Harvard College and an M.B.A. from the Wharton School at the University of Pennsylvania.

G. Rodney Wolford became our Director upon consummation of the RegionalCare/Capella Merger in April 2016. Mr. Wolford has over 40 years of wide-ranging experience in the healthcare industry, having served in leadership roles with healthcare providers, suppliers, consulting firms, associations and insurers. Redirecting his professional time from active executive leadership, he now focuses his professional time on multiple boards of directors and rural community economic development. Among his many executive positions, Mr. Wolford served as chief executive officer of Alliant Healthcare (now Norton Healthcare) in Louisville, KY, Sterling Diagnostic, a worldwide manufacturer of x-ray film, Forhealth Technologies, the inventor of the first robot dedicated to hospital IV production, and a senior executive of Blue Cross Tennessee. Mr. Wolford currently serves on the boards of Atlanta based D4C Brands, a pediatric dentistry company, and Liberate Medical, which develops electronic stimulation for ventilator patients, and as a fund manager of Bluegrass Angel Funds III and IV. During the past five years, Mr. Wolford has also served as a director of Haven Behavioral, Laboratory Supply Company and VetCor.

Code of Ethics

Our Board expects its members, as well as our officers and employees, to act ethically at all times and to acknowledge in writing their adherence to the policies comprising our Code of Conduct, which is known as "Common Ground," and, as applicable, our Code of Ethics for Senior Financial Officers and Chief Executive Officer.

Board Structure

The Board consists of 13 directors. The Board has the following standing committees: audit; compensation; nominating and governance; compliance; quality; and executive. In addition, the board of directors of our parent company, DSB Parent, also has a compensation committee that administers equity-based compensation plans in which our managers, officers, employees, consultants and directors participate. As a result of the LifePoint/RCCH Merger and the RegionalCare/Capella Merger, Apollo has the power to control us and our affairs and policies, including the designation of a majority of the members of our Board and the appointment of management.

Committees of our Board of Directors

The Board has adopted written charters for each of the following standing committees:

Audit Committee

The current members of our audit committee are Messrs. Morissette, Haley and Wolford. Mr. Morissette is the chairman of our audit committee. The principal duties and responsibilities of our audit committee are to assist the Board in overseeing:

- the integrity of our financial statements;
- the independent auditor's qualifications, independence and performance;
- the performance of our internal audit function; and
- our compliance with certain legal, ethical and regulatory requirements.

The audit committee has the authority to conduct or authorize investigations into or studies of matters within its scope of responsibilities. It also has the authority to retain and determine funding for independent legal, accounting or other advisors (without seeking Board approval) as it determines necessary or appropriate to carry out its duties and responsibilities.

Our Board has determined that each of Messrs. Morissette and Wolford is an "audit committee financial expert" within the meaning of applicable SEC regulations.

Compensation Committee

The current members of our compensation committee are Messrs. Nord and Press. Mr. Press is the chair of our compensation committee. The principal duties and responsibilities of our compensation committee are as follows:

- approving the non-equity-based compensation of our officers, directors and employees;
- administering our non-equity-based compensation plans; and
- making recommendations to DSB Parent for the equity-based compensation of DSB Parent and its subsidiaries' officers, directors and employees.

Nominating and Governance Committee

The current members of our nominating and governance committee are Messrs. Christie, Press and Rash. Mr. Press is the chair of our nominating and governance committee. The principal duties and responsibilities of our nominating and governance committee are as follows:

- to assist the Board in identifying individuals qualified to serve as members of the Board and/or its committees; and
- other duties and responsibilities that our Board may delegate to the nominating and governance committee.

Compliance Committee

The current members of our compliance committee are Messrs. Levin, Morissette, Wolford and Rash. Mr. Wolford is the chair of our compliance committee. The compliance committee is responsible for overseeing our legal and regulatory compliance program, including certain healthcare and regulatory compliance matters that affect us and our business operations.

Quality Committee

The current members of our quality committee are Messrs. Brownstein, David, Haley and Ms. McMullan. The quality committee is responsible for monitoring and evaluating the adequacy and effectiveness of our quality of care and patient safety programs and initiatives.

Executive Committee

The current members of our executive committee are Messrs. David, Nord and Press. Mr. Nord is the chair of our executive committee. The principal duties and responsibilities of our executive committee are as follows:

- to advise and counsel the Chief Executive Officer regarding company matters; and
- to take such actions as are necessary due to their urgent or highly confidential nature, or where convening the Board is impracticable, subject to certain limitations.

Item 11. *Executive Compensation.*

The information that would be required to be disclosed under Part III, Item 11 of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a) of each of the Indentures.

Item 12. *Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.*

The information that would be required to be disclosed under Part III, Item 12 of an annual report on Form 10-K filed with the SEC has been omitted as permitted pursuant to Section 4.02(a) of each of the Indentures.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*.

For a discussion of certain relationships and related party transactions, refer to the Offering Memorandum dated December 4, 2020 for the 5.375% Unsecured Notes.

Equity Repurchases

Since the closing of the LifePoint/RCCH Merger, through December 31, 2020, DSB Parent has repurchased 3,807,682 profits units and 385,319 capital units from various former employees of LifePoint. Repurchases are anticipated to continue to occur from time to time.

Item 14. *Principal Accounting Fees and Services*.

The Audit Committee has appointed Ernst & Young LLP as our independent registered public accounting firm. Services provided to us by Ernst & Young LLP in fiscal 2018 are described below.

Audit Fees. The aggregate audit fees billed by Ernst & Young LLP for professional services rendered for the audit of our annual consolidated financial statements and services that are normally provided by the independent registered public accounting firm in connection with statutory and regulatory filings totaled approximately $3.8 million for 2020 and approximately $4.3 million for 2019.

Audit-Related Fees. The aggregate fees billed by Ernst & Young LLP for assurance and related services other than those described under “Audit Fees” were approximately $0.8 million for 2020 and $2.4 million for 2019.

Tax Fees. The aggregate fees billed by Ernst & Young LLP for professional services rendered for tax compliance, tax advice and tax planning were approximately $0.3 million for both 2020 and 2019.

All Other Fees. There were no fees billed by Ernst & Young LLP for products or services other than those described above in 2020 or 2019.

PART IV

Item 15. ***Exhibits, Financial Statement Schedules*.**

(a) The following documents are filed as part of this Report:

1. *Consolidated Financial Statements*:

2. *Financial Statement Schedule*: All schedules for which provision is made in the applicable accounting regulations of the SEC are omitted because they either are not required under the related instructions, are inapplicable, or the required information is shown in the consolidated financial statements or notes thereto.

3. *Exhibits*: The exhibits required by Item 601 of Regulation S-K that would be disclosed under Part IV, Item 15 of an annual report on Form 10-K filed with the SEC have been omitted as permitted pursuant to Section 4.02(a) of the Indentures.

Building a better working world

Report of Independent Auditors

Board of Directors and Shareholders of
LifePoint Health, Inc.

We have audited the accompanying consolidated financial statements of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.), which comprise the consolidated balance sheets as of December 31, 2020 and 2019, and the related consolidated statements of operations, comprehensive income (loss), equity and cash flows for each of the three years in the period ended December 31, 2020, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in conformity with U.S. generally accepted accounting principles; this includes the design, implementation and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of LifePoint Health, Inc. (formerly known as RegionalCare Hospital Partners Holdings, Inc.) at December 31, 2020 and 2019, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2020 in conformity with U.S. generally accepted accounting principles.

Change in Accounting Principle

As discussed in Note 8 to the consolidated financial statements, LifePoint Health, Inc. has changed its method of accounting for leases due to the adoption of Financial Accounting Standards Board Accounting Standards Update No. 2016-02, Leases, effective January 1, 2019. Our opinion is not modified with respect to this matter.

Ernst + Young LLP
